Intelligence having been received that the Government of Buenos Ayres has made satisfactory proposals for the settlement of the foreign debt :it being prepared to secure 6 per cent interest from 1857 to 1859, and £60,000 in 1859, besides leaving bonds for the arrears of dividends—there has been much excitement in the market for those securities, and a considerable advance has taken place in the quotations. The Brazilian Bonds a full average business has been transacted, and prices have steadily advanced. We have had dealings in Brazilian Five per Cents, Small, 9 -16; Ditto, Four-and-a-Half per Cents, 86; Belgian Four-and-a-Half per Cents, 95¾ ; Buenos Ayres Six per Cents, 76 to 79; Equador Bonds, 3⅝; Granada Two-and-a-Quarter per Cents, 7⅛; Mexican Three per Cents, 23⅝; Portuguese Four per Cents, 44; Russian Five per Cents, 105; Ditto, Four-and-a-Half per Cents, 95¾ ; Sardinian Five per Cents, 94¼ to 95; Spanish Three per Cents, 46¾ to 46⅝; Ditto, New Deferred, 25⅛; Ditto, Coupon, 5⅞ per cent; Turkish Six per Cents, 89¾ ; Ditto, Four per Cents, Guaranteed, 102; Venezuelan Four-and-a-Quarter per Cents, 30 ; Austrian Five per Cents, 83; Dutch Two-and-a-Half per Cents, 64⅞ ; Dutch Four per Cents, 94⅝; Peruvian, 78 ; Danish Three per Cents, 83¾

Most Joint-Stock Bank Shares have been in good request, as follows:—Bank of Egypt, 8⅝; British North American, 67; English, Scottish, and Australian Chartered, 42; London Chartered of Australia, 19; Ditto, Scrip, 6¼ ; London and County, 32½ ; London Joint-Stock, 29 ; London and Westminster, 48⅝ ; New South Wales, 42⅜ ; Ottoman Bank, 11⅝.

Miscellaneous Securities have continued firm in price, but the transactions in them have been very moderate. Canada Company's Bonds have marked 136; Ditto, Government Six per Cents, 111⅞ ; Crystal Palace, 2⅝ ; Ditto, Preference, 6⅜ ; East and West India Docks, 123 ; London General Omnibus, 9⅜ ; National Discount Company, 4⅜ ; New South Wales Government Debentures, 97 ; North of Europe Steam, 15⅜ ; Oriental Gas, 1⅛ ; Ditto, New Shares, 1⅝ ; Peninsular and Oriental Steam, 67 ; Royal Mail Steam, 73½ ; Victoria Dock, 9⅝.

There has been an improving market for all Railway Shares, and prices generally have advanced. The following are the official closing prices on Thursday :—

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston, 4⅜ ; Bristol and Exeter, 88 ; Chester and Holyhead, 16 ; Eastern Counties, 10⅛ ; East Lancashire, 78⅛ ; Great Northern, B Stock, 127 ; Great Southern and Western (Ireland), 106 ; Great Western, 60⅝ ; Lancashire and Yorkshire, 91 ; London and Brighton, 109⅛ ; London and North-Western, 102 ; Ditto, Eighths, 1⅜ ; London and South-Western, 96 ; Midland, 77⅜ ; Ditto, Birmingham and Derby, 47⅜ ; Norfolk, 85⅛ ; North-Eastern—Berwick, 81 ; Ditto, Extension, 16⅛ ; Ditto, Leeds, 102⅛ ; Ditto, York, 86 ; North Staffordshire, 11⅜ ; Oxford, Worcester, and Wolverhampton, 27½ ; South-Eastern, 71⅜ ; South Wales, 71⅛ ; Vale of Neath, 99¼.

LINES LEASED AT FIXED RENTALS.—Hull and Selby, 106; London, Tilbury, and Southend, 112. Lowestoft six per Cent, 111.

PREFERENCE SHARES.—Bristol and Exeter, 106 ; Edinburgh, Perth, and Dundee, 70 ; Great Western (Birmingham), 10 ; Ditto, 74 ; North-Eastern, Berwick, 93 ; Ditto, York, Mand S. Purchase, 98.

FOREIGN RAILWAYS AND MISCELLANEOUS.—Bombay, Baroda, and Central India, 5¼ ; Eastern of France, 4 ; East Indian, 24. Dutch Rhenish, 5⅜ ; Ditto, Certificates, 4⅜ ; Geelong and Melbourne 22½ ; Grand Trunk of Canada, 13 ; Great Indian Peninsula, 6 ; Great Luxembourg Shares, 5 ; Ditto, Certificates, 4⅜ ; Great Western of Canada, 20½ ; Ditto, New, 9 ; Namur and Liege, 7⅛ ; Paris and Lyons, 39½ ; Sambre and Meuse, 12½ ; West Flanders, 4⅜ to ⅝ ; Ditto, Five-and-a-Half per Cent, 4¼

Mining Shares have been firm on Thursday. —Cobre Copper were done at 64 ; Linares, 8½ ; United Mexican, 3⅜.

*Friday Afternoon.*

The Consol Market is steady to-day, but the business doing in it is remarkable. The Three per Cents for Money have marked 94⅜ ⅝ ; Ditto, for the Account, 94⅜. The Scrip of the New Loan is 1⅜ ½ prem. The reduced are 93¾ ⅞; and the New Three per Cents, 93⅜ ½. Foreign Bonds and Railway Shares are steady.

## THE MARKETS.

CORN EXCHANGE (Friday).—The arrivals of English wheat this week, coastwise and by land carriage, have been limited, and the show of samples in to-day's market was very moderate. In consequence of the short supply of fine qualities, Monday's prices were supported Only 2100 quarters of foreign wheat have come fresh to hand. Good heavy samples sold at full quotations, but all other kinds were dull. Barley and oats were very dull. Beans and Foreign sh are steady.

*Arrivals this Week*—English wheat, 1820 ; Scotch, 1930 ; malt, 1520 ; barley, 1060 ; Irish oats, 2050 ; Foreign wheat, 20 ; barley, 1490, oats, 5210 ; flour, 2000 sacks.

*English.*—Wheat, Essex and Kent, red, 69s. to 72s., ditto, white, 70s. to 75s ; Norfolk and Suffolk, red, 68s. to 70s., ditto, white, 70s. to 74s ; grinding barley, 28s. to 34s ; shelling ditto, 34s. to 36s ; malting, ditto, 38s to 39s ; Lincoln and Norfolk malt, 73s. to 79s ; ordinary ditto, 70s to 68s ; Kingston and Ware, 72s. to 80s ; Chevalier, 80s. to 84s ; Yorkshire and Lincolnshire feed oats, 23s to 28s ; potato ditto, 22s. to 24s.; Youghal and Cork black, 24s. to 25s ; ditto, white, 25s. to 26s ; Sligo, Limerick, and Belfast, 25s to 26s ; rough peas, 34s. to 36s ; maple, 37s to 41s ; white ditto, 40s. to 44s. per quarter Town-made flour, 45s. to 47s ; Suffolk, 40s. to 42s ; Stockton and Yorkshire, 43s. to 45s. ; American flour, 33s. to 39 per barrel

Cattle remained and ruled over a dull inquiry at full prices, but other seeds are a dull inquiry.

Linseed, English, crushing, 46s to 52s ; Mediterranean, 51s. to 52s. ; Odessa, 50s. to 51s. per quarter. Coriander, English grass, 20s. to 21s. per cwt. Canary, per quarter. Linseed cakes, English, £11 15s. to £12 ; ditto, foreign to £10 ; rape cakes, £6 to £6 5s ; hempseed, £25 to £26 10s. per quarter

*Bread.*—The prices of wheaten bread in the metropolis are from 9d to10d.; of household 7d to, 8d per 4lb. loaf.

*Imperial Weekly Averages.*—Wheat, 68s. 9d.; barley, 40s. 0d.; oats, 24s. 5d.; rye, 44s. 6d.; beans, 43s. 7d.; peas, 39s. 1d.

*The Six Weeks' Averages.*—Wheat, 68s. 1d.; barley, 39s. 10d.; oats, 23s. 8d., rye, 45s. 10d.; beans, 43s. 8d.; peas, 39s. 1d.

*English Grain Sold last Week.*—Wheat, 136,233 ; barley, 17,168; oats, 13,837; rye, 89; beans, 42-8; peas, 1,464 quarters.

*Teas.*—The public sales held this week have gone off slowly, and prices have shown a tendency to give way. In the private market very little business is doing, and common sorts of Congou are offered at 9d per lb.

*Sugar.*—There has been a falling off in the demand for all raw sugars, and prices have had a downward tendency. Refiners have been buyers of fine qualities of Mauritius, 37s. 6d. to 43s. 6d., Bengal 40s. to 44s ; Madras, 35s. 6d to 42s. per cwt. Refined goods move off slowly, at 45s to 45s. per cwt for fine.

*Coffee.*—All kinds of coffee are very slow in sale, and late rates are with difficulty supported.

*Rice.*—Owing to the heavy stock, over 21,000 tons, our markets are very inactive, and the operations are to be torn in favour of buyers.

*Provisions.*—Irish butter is in very moderate request, at the late decline in value. Foreign qual ities are very dull, and 2s. per cwt. lower. English bacon and cheese remain almost stationary. The bacon market is firm, and prices have an upward tendency. Hammon lard are quite as dear as last week

*Tallow.*—Very little change has taken place in the value of the article. P.Y.C. on the spot being quoted at 43s. 6d to 44s per cwt. Town tallow, 46s. net cash. Rough fat, 2s. 6d. per 8 lbs.

*Oils* Linseed oil sells at 32s. per cwt on the spot. In other oils very little is doing. Spirits of turpentine, 36s. 6d. to 37s. per cwt.

*Spirits.*—There is a moderate demand for rum, at last week's currency. Proof Leewards, 1s. 1d to 1s. 2d ; Jamaica, 1s. 2d to 1s. 3d. Malt whisky, per former terms. This week's imports are :—5 bales from Havre 33 from Rotterdam, and 50 from Hamburg. Mid and East Kent pockets, 84s to 90s ; Weald of ditto, 75s to 85s ; Sussex, £7 10s. to £8 10s. per cwt.

*Hops.*—Market Cattle Market (Friday).—To-day's markets was somewhat sarsuitsvay supplied with beasts, and the demand for all breeds ruled heavy, at a decline in value of 2d. per 8lb. Although but few fresh Scotch runners were sold supplies were large, in Sheep, in very middling condition, and the mutton trade was depressed, at 5d. to 6d. per 8lb. less money than on Monday Lambs—the show of which was good—sold heavily, at 3d. per 8lb. lower. About 200 calves were on sale. Pigs were dull, and lower in price. Mixed were retailed from 4s. to 4s 6d. per stone. Sheep—Downs, &c., 4s. 6d. to 4s. 8d.; coarse and inferior sheep, 3s. 8d to 4s 2d.; prime large Scots, &c., 4s. 4d. to 4s. 6d.; coarse and inferior sheep, 3s. 8d to 4s 2d.; prime Southdown, &c., 4s. 4d. to 4s. 6d.; coarse and inferior sheep, 3s. 8d to 4s 2d.; prime small ditto, 4s. 10d. to 5s. 4d.; large hogs, 3s. 4d. to 4s. 0d.; neat small porkers, 4s. 8d. to 4s. 10d.; lambs, 5s. 2d. to 5s. 10d.; sucking calves 32s to 36s.; and quarter-old store pigs, 25s to 28s. each Total supply: beasts, 1414; cows, 140; sheep and lambs, 11,960; calves, 212; pigs, 390. Foreign: beasts, 160; sheep, 140; calves, 180.

*Newgate and Leadenhall Market.*—We had a very dull trade, at drooping prices :— Beef, 3s 4d. to 4s. 6d.; coarse ditto, 3s. 8d. to 4s.; middling ditto, 4s. 8d. to 5s. 4d.; prime large ditto, 5s. 6d. to 5s. 8d.; small ditto, 5s. 10d. to 6s. 0d.; large pork, 3s. 2d. to 3s. 8d., inferior mutton, 4s. 0d. to 3s. 6d.; middling ditto, 3s 8d to 3s. 10d.; prime ditto, 4s 0d. to 4s. 6d.; veal, 3s. 8d. to 4s. 10d.; small pork, 4s. 8d to 5s. 4d.; lamb, 6s. 8d. to 6s. 8d.

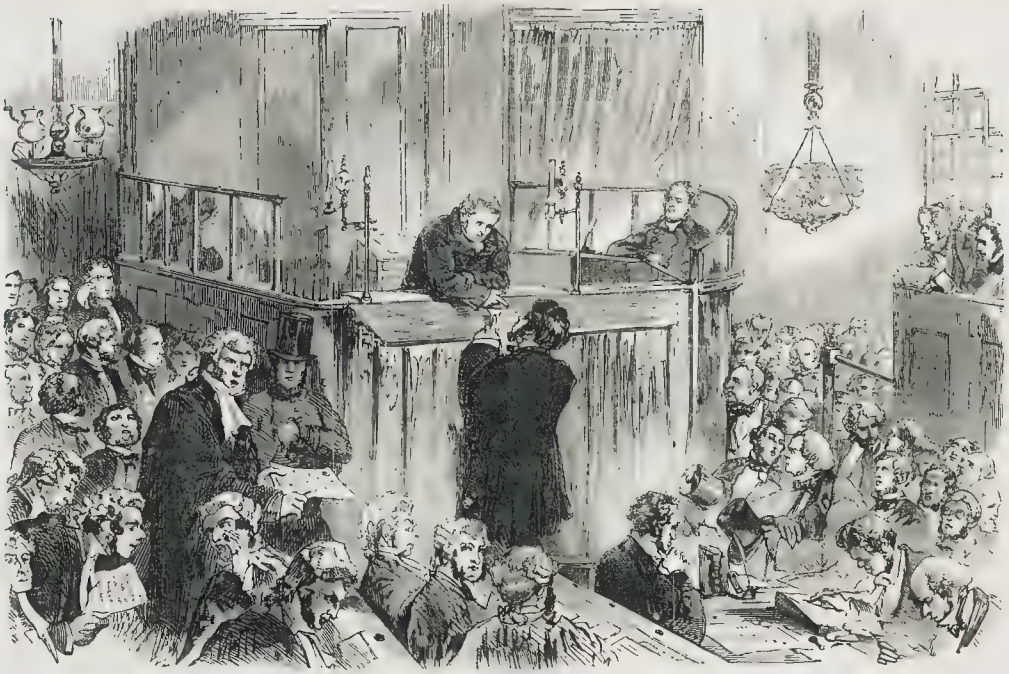
Selby, Mr. Frank Matthews, Mr. Wigan, Mr. Howard Paul, Mrs. Stirling, Mrs. Chippendale, Mrs. Leigh Murray, Miss Reynolds, Miss Fanny Wright, Miss Julia St. George, Miss Swanborough, Miss Caroline Parkes, Miss Thirlwall, Miss Laidlaw, Miss Bufton, Miss Lydia Thompson, Miss Lupino, Miss Ada Swanborough, Miss Fanny Lupino, Miss Ada Harris, Miss Marie Wilton, Miss Lizzie Wilton, Miss Lydia Foote, Miss Julia Harris, Miss Ellen Chaplin, Miss Emma Harris, Miss Ellen Foote, Miss Fanny Gwynne, Miss Ellen Laidlaw, Miss Fanny Vining, Miss Fanny Wells, Miss Fanny Gillett, Miss Fanny Lee, Miss Fanny Hughes, Miss Fanny Hall, Miss Fanny Hill, Miss Fanny Fitzwilliam, Miss Fanny Fairlie, Miss Fanny Fairbrother, Miss Fanny Fairbairn, Miss Fanny Fairfax, Miss Fanny Fairchild, Miss Fanny Fairclough, Miss Fanny Fairweather, Miss Fanny Fairfield, Miss Fanny Fairhead, Miss Fanny Fairhurst, Miss Fanny Fairlamb, Miss Fanny Fairley, Miss Fanny Fairlie, Miss Fanny Fairlight, Miss Fanny Fairman, Miss Fanny Fairmaid, Miss Fanny Fairnie, Miss Fanny Fairnington, Miss Fanny Fairnington, Miss Fanny Fairnington



THE POISONING CASES AT RUGELEY.—TRIAL OF WILLIAM PALMER, IN THE CENTRAL CRIMINAL COURT.

## THE RUGELEY POISONING CASES.

### TRIAL OF PALMER.

ON Wednesday morning, the 14th inst., the long-delayed trial of William Palmer, against whom the grand jury of Staffordshire have found true bills for the murders respectively of John Parsons Cook, who died suddenly at Rugeley on the 21st of November last, and of Anne Palmer, the wife of the accused, whose body was disinterred in consequence of the rumours to which the mysterious death of Mr. Cook gave rise, commenced at the Central Criminal Court, to which it was removed in virtue of the Trial of Offences Bill, which has recently received the Royal assent. The prisoner was brought from Staffordshire several days previously.

It being generally known that all attempts to obtain admission to hear the proceedings in this most remarkable case would prove useless unless provided with cards of admission, and the business in the police courts being suspended, the assemblage outside the doors of the Central Criminal Court on Wednesday morning was chiefly confined to those who enjoyed the privilege of entrée, and many of those had arrived as early as eight o'clock in the morning, from which hour until the doors were opened, which took place at nine, cabs and other vehicles continued to set down persons, those who were to be present, and at that hour a great number were assembled at the doors, and the greatest dissatisfaction was felt that no notification had been given as to the hour at which those to whom admissions had been granted would be let in. Shortly after nine o'clock a large body of police arrived, and, having been stationed at their respective barriers with a *corps de reserve*, the doors were thrown open, and amidst some confusion those present got into court, and from that time until the trial commenced continued to arrive, at which period it was quite filled.

Great excitement prevailed in reference to the trial, and large bodies of persons who could have no possible chance of admission crowded the avenues of the court. Day after day notices had appeared in the papers that only those who had obtained tickets of admission from the Sheriffs would be admitted; and the Under Sheriffs very wisely adhered to that determination. In consequence of their very excellent arrangements the court was at no time inconveniently crowded. At ten o'clock the Judges appointed to try the case entered the court and took their seats on the bench. They were Lord Campbell (the Lord Chief Justice of the Queen's Bench), Mr. Baron Alderson, and Mr Justice Cresswell. Amongst the officials on the bench were the Lord Mayor, Alderman and Sheriff Kennedy, Alderman and Sheriff Rose, Mr. Alderman Cubitt, M.P., Mr. Alderman Humphery, Mr. Alderman Wire, Alderman Sir R. W. Carden, Alderman Finnis, Alderman Sir F. G. Moon, Alderman Sir George Carroll, Mr. Alderman Lawrence, Alderman Sir H. Muggeridge, the Recorder, &c.

Several noblemen and gentlemen were accommodated with seats on the bench, amongst whom were the Marquis of Anglesey, Prince Edward of Saxe-Weimar, Lord George Lennox, Lord William Lennox, the Earl Grey, the Earl of Derby, Mr. Wakley (the Coroner for West Middlesex), Mr. Roundell Palmer, M.P., &c.

The prisoner was placed at the bar at a few minutes past ten o'clock, and the indictment charging him with the murder of John Parsons Cook having been read by the Clerk of Arraigns, he pleaded "Not Guilty." It was generally remarked that he looked little like a man who had committed murder, and that he had grown exceedingly stout since his committal to prison. He is a good-humoured, ordinary-looking man, and appears much older than he really is. He was invited to challenge the jury, but he made no objection to any one of the gentlemen called.

The Attorney-General, Mr. E. James, Q.C., Mr. Welsby, Mr. Bodkin, and Mr. Huddleston appeared for the prosecution.

Serjeant Shee, Mr. Grove, Q.C., Mr. Gray, and Mr. Kenealy were for the defence.

The Lord Advocate for Scotland sat between the counsel for the prosecution and those for the defence. Upon the name of the first juryman being called, Mr. Serjeant Shee said that if there was any gentleman upon the jury interested in the affairs of the insurance-offices with which the prisoner had transactions he begged he would retire, in order that there might not be any prejudice adverse to the prisoner. Lord Campbell expressed his approbation of the suggestion. The jury were then sworn.

A Mr. Mason, of Old Bond-street, was called, but begged to be excused upon the ground of his being rather indisposed, and that he felt a prejudice, which would not allow him fairly to judge the case. Lord Campbell said that was quite enough.

The Attorney-General, after a few introductory remarks, said he should be obliged to ask their serious attention to a series of facts extending over a number of years. The prisoner at the bar was a medical practitioner of Rugeley, in Staffordshire, where he practised for some time. In later years he became addicted to turf pursuits, which gradually weaned him from his profession, and during the last two or three years he had made over his business, except with regard to one or two patients, to a person named Thirlby, formerly an assistant. In the course of his pursuits connected with the turf, Palmer became intimately acquainted with Mr. John Parsons Cook, a young man of decent family, who had originally been articled to a solicitor, but having inherited property, to the extent of £12,000 or £15,000, he deserted the law for the turf, and in the course of his new pursuits became connected with Palmer. It was for the murder of this John Parsons Cook that William Palmer now stood indicted, the charge against him being that he took away that man's life by poison. The case for the prosecution was this—that being in desperate circumstances, with ruin, disgrace, and punishment staring him in the face, which could only have been averted by means of money, Palmer took advantage of his intimacy with Cook to destroy him, in order to gain possession of his property. In 1855 Cook was at the Shrewsbury races. At that time Palmer was a ruined man, and immediately afterwards occurred the transaction which the jury had to inquire into. Now, he would first proceed to show the jury what was the position of Palmer at that time, because out of that position, and the circumstances in which Palmer was then placed, sprang the motive which induced him to commit the act with which he was now charged.

It seemed that as early as 1853 Palmer had got into pecuniary difficulties, and had to raise money upon bills. In 1854 his circumstances became hopeless, and at this time he was indebted to various persons in large sums of money, and he then had recourse to forgery. Amongst the bills on which Palmer paid money in 1853 was one for £2000, discounted by a person named Padwick. That bill bore upon it the acceptance of Palmer's mother, Sarah Palmer, of Rugeley. She was a woman of very considerable wealth, and, her acceptances being believed to be genuine, money was readily advanced upon her security. In September of that year Palmer's wife died. He had an insurance upon the life of his wife to the extent of £13,000, and when his wife died that insurance was realised. With the money so obtained Palmer paid some of the most pressing claims against him. He employed a gentleman of the name of Pratt, who was in the habit of discounting bills, and whose name would be a good deal mixed up with the proceedings on the present trial. Out of the money Palmer received from the insurance-offices on his wife's death, Pratt received from him £8000 to pay his debts, and a solicitor at Birmingham received £6000 for the same purpose; but still Palmer was left with considerable liabilities, and the bill of Padwick remained unpaid. At the end of the year 1854 he effected another insurance in his brother's name; or rather the policy, as soon as the assurance was effected, was assigned to Palmer.

In the month of November, when Shrewsbury races took place, there were in Pratt's hands bills amounting in the whole to £12,500, but Palmer had in the previous July paid off £1000, making a balance against him of £11,500. Every one of these bills bore the forged acceptance of his mother. With all these liabilities hanging over him he had not a shilling to pay, and the time was coming when his inability to meet his engagements would expose him, and bring him within the penalties of the law. He (the Attorney-General) should mention also, before he went into the case, that the prisoner's brother had died in the month of August, 1855. William Palmer had insured that life for £13,000, or rather the policy had been assigned to him, and he expected that the proceeds of that insurance would pay off those liabilities. But the office in which the insurance was effected declined to pay the amount, and no assistance was derived from that source.

It was several months previously to this that Cook was first mixed up with the prisoner in some of these pecuniary transactions. In May, 1855, Palmer was pressed to pay a sum of £500 due upon a bill to a person named Sargent, formerly a publican in Fleet-street. He had at that time in the hands of Pratt

(*Continued in Supplement.*)

THE GRAVE OF COOK, IN RUGELEY CHURCHYARD.

## THE RUGELEY POISONING CASES

*(Continued from page 560.)*

a balance of £310 to his credit, and he wanted Pratt to advance £190 to make up the £500. Pratt declined to do so except upon security. Palmer gave him the acceptance of Cook, and upon that Pratt advanced the money. That appeared to be the first transaction with Cook. That bill of £190, when it became due, Cook failed to provide for, and Palmer provided for it himself. In August Palmer wrote to Pratt that he must have £1000 by the next Saturday. Pratt declined to advance £1000 without security, upon which Palmer offered the security of Cook's acceptance, representing him as a man of wealth; but still Pratt declined to advance the money without some more tangible security than the personal security of Cook. Palmer proposed an assignment by Cook of two racehorses, one Pole Star and the other Sirius, which was accordingly made and executed by Cook in favour of Pratt as collateral security for this £500. The agreement was that Pratt should give £375 in money, wine-warrants for £83, discount for three months £50, and expenses £10—making, in the whole, £600. Now, Cook was certainly entitled to the £375 in cash and the wine-warrants, but Palmer ingeniously contrived that the cheque and the wine-warrants should be sent to him, and not to Cook. He

THE POST-OFFICE, RUGELEY.

wrote to Pratt, desiring him to forward them to him at Doncaster, where he was to see Cook. But he was not to see Cook there, for he was not to be there at all. Palmer thus got the cheque and the warrants. Pratt sent down the cheque stamped, as required, and, as he was justified in doing by a late act, struck out the word "bearer," and wrote "order," which necessitated the indorsement of Cook upon the back of the cheque. It was never intended by Palmer that the proceeds of the cheque should find their way into Cook's hands, and therefore he forged the name of Cook, and paid the cheque into his bankers' at Rugeley, and it went to his credit. Cook never had the money, which went to the payment of a forged three months' bill which was about coming due, and the forgery of which, if not taken up, would have been detected. This took place in August, in which month, as has already been mentioned, Palmer's brother (whose life had been insured for £13,000) died. But the insurance-office refused to pay, and, the money not being forth coming, Palmer proposed to a person of the name of Bates to have his life insured. He induced Cook to assist him in this transaction by representing Bates as a man of wealth. On the 5th of September Bates, the prisoner, and Cook, were together at Rugeley. Bates was a person who had been better off in the world, and had latterly been in the employment of Palmer as the superintendent of his stable—a sort of hanger-on of Palmer's. He was a healthy young man, and Palmer proposed to him to insure his life, and framed a proposal. Bates said he did not wish to

LORD CHIEF JUSTICE CAMPBELL, FROM A PEN-AND-INK SKETCH.

insure, and declined it. Cook persuaded him, and said it would be for his benefit, and induced him to sign for £25,000, Cook attesting his proposal. Palmer was referred to as the medical man, and the assistant, Thurlby, as a person to whom reference was to be made as to his habits. This proposal was sent to the Solicitors and General Office. That office was not disposed to entertain the proposal, and a proposition for £1000 was made to the Midland Office. This office required further information as to the position of Bates, and the matter dropped.

The Attorney-General then read a number of letters from Pratt to the prisoner, written in the months of September, October, and November last, which showed that the pecuniary affairs of Palmer were then in a desperate condition. To such a point had the pressure gone that Pratt at length resolved on issuing writs against the prisoner's mother, which he was forthwith to have served in case Palmer should not find the means of paying a portion at least of his debts. That brought them to the events connected with the races at Shrewsbury. Cook was the owner of a horse called Polestar, which won the Shrewsbury Handicap on the 13th of November; and Cook thereby not only won the stakes, which realised £981, but also a considerable sum in bets, making him altogether by that race a winner of a sum of £2060. He had also been a winner during the preceding week at the Worcester races; and it would be shown that he had while at Shrewsbury a sum of between £700 and £800, a portion of which he had received in the shape of bets won on the handicap; while the remainder of those bets, as well as the amount of the stakes, were to be handed over to him at a later period; but no account had since been obtained of these £700 or £800. Within a week of that time he died; and the important subject on which the jury had to decide upon that occasion was, how he had come by his death—whether it had been caused by the hand of man, and, if so, whose was the hand by which he had fallen? He was a young man, and had gone down to Shrewsbury in good health, as would be proved by ample evidence. On the night of Wednesday, the 14th, the night after the day of the race, a remarkable event had happened to him, to which the special attention of the jury should be directed. While he (Palmer) and a person of the name of Fisher, who was also on the turf, were talking and having some drink together, although not indulging in any excess, for Cook was always an abstemious man, the latter said to Palmer, "You will have some more, will you not?" To that Palmer replied, "No, unless you finish your glass;" whereupon Cook said, "That is easily done," and then swallowed at a draught about half a tumbler of brandy-and-water which was before him. But he had no sooner done so than he exclaimed, "Good God! there is something in it." Palmer then took up the glass, and after drinking what remained in it, which was only about a teaspoonful, said, "Oh, nonsense; there is nothing in it." Within a few minutes Cook rose and left the room. He soon afterwards returned, and, then taking Fisher out with him, told him that he was taken violently ill. He then began to vomit violently; he was put to bed; but he vomited again and again. He continued in that state for some hours, but, medical assistance having been called in, he apparently got over the attack, and at length he fell into a quiet sleep. During his illness he gave Fisher the money he had about him, desiring him to take care of it, and Fisher would tell the jury that that money amounted to between £700 and £800. Next morning he was better, and Palmer gave him back the money. On the night on which Cook had taken the glass of brandy which had been followed by his illness, a woman of the name of Brooks had called at the hotel for the purpose of seeing Palmer. As she went into a lobby opening on Palmer's room she saw him holding up to the gaslight a glass with some liquor in it; and, after he had withdrawn with that glass into his own room, he came out again and went with it into the room in which Mr. Cook was drinking his brandy-and-water, and all that had occurred shortly before Cook had been taken ill, as already described. On Thursday, the 15th, Palmer and Cook went down together to Rugeley, where the latter put up at the Talbot Arms, an hotel exactly opposite the prisoner's house. That night he stated, in reply to inquiries addressed to him, that he had been poorly at Shrewsbury, but the people who saw him did not think that he was suffering from any serious disease. Next day he dined with Palmer, and returned to the hotel at about ten o'clock at night, perfectly sober. He then went to bed without any symptom that could lead the people about him to suppose that there was anything unusual the matter with him. Next morning Palmer visited him at an early hour, and was constantly with him in and out during the whole of that day and of the Sunday, which was the day following. Coffee was brought up to him by the chambermaid at the inn, on the Saturday morning, at Palmer's request, and Palmer was the person by whom that coffee was handed to him. Immediately after he had drunk it he was attacked by the same illness which had seized him at Shrewsbury. Palmer continued to wait on him the whole of that day and of the day following; and even toast-and-water had been sent to him from Palmer's house, while he was still tormented with the same incessant and troublesome sickness. On the Saturday Palmer ordered from the Albion Inn, at Rugeley, some broth, which he afterwards had sent over to Cook at the Talbot Arms; and as soon as the latter took a spoonful of it he was taken sick and threw it off his stomach. The prisoner soon afterwards called, and after having been told that Cook was unable to use the broth insisted on his taking some, and after Cook had done so he began immediately to vomit again. The chambermaid at the inn, who had been tempted by the appearance of the broth, and had taken a small quantity, was afterwards seized, as Cook had previously been seized, with violent

FAMILY GRAVE OF THE PALMERS, AT RUGELEY.

vomiting. On the Saturday, about three o'clock, Dr. Bamford, a medical practitioner, was called in to see the patient, who, as Palmer stated, had a bilious attack; and it should be observed that, according to other statements coming from the same quarter, Cook had been suffering from bilious diarrhœa. But it would be shown on the evidence of medical men that Cook had not exhibited a single bilious symptom of any kind. Dr. Bamford had prescribed some effervescing saline medicine; but after he had gone away the prisoner had offered more coffee for Cook, and after the latter had drunk that coffee he began to vomit again. Shortly afterwards he took some boiling water when Palmer was not there, and no vomiting ensued; but in about two hours more, when arrowroot had been administered to him in Palmer's presence, the vomiting had been renewed. On the Sunday Cook still continued ill; but Dr. Bamford, by whom he had been visited twice in the course of that day, could find no indication that he was suffering in any way from a bilious attack. They next came to the very important day in these transactions—Monday, the 19th, for the morning of that day Palmer left Rugeley to go to London; but before leaving he called early in the morning and ordered some coffee for Cook, which he himself handed to the latter, who was immediately after again seized with vomiting. Dr. Bamford saw Cook on the same morning and prescribed for him some new medicine, and after Cook had taken that medicine he began greatly to improve. He took coffee and was able to keep it on his stomach, and he continued much better the whole of that day. Palmer had, in

RESIDENCE OF WILLIAM PALMER, AT RUGELEY.

the mean time, gone to London, where he met, according to previous appointment, at Beaufort-buildings, a person of the name of Herring, when he commissioned to receive the money due to Cook at Tattersall's on that day, and whom he ordered at the same time to make two payments on his (Palmer's) own account with that money of Cook's—one of those payments being a sum of £580 to Padwick, and another a sum of £440 to Pratt. He told Herring, who was not the real agent of Cook, to write either to himself or to Cook upon this subject; but it subsequently appeared that Cook did intercept Cook's correspondence through the instrumentality of Cheshire, the postmaster at Rugeley. Herring had paid the £580 to Pratt, but he had not paid the £580 to Padwick, in consequence of his not having the power of attorney to collect upon that occasion the whole of the money due to Cook. Palmer returned to Rugeley on the Monday night about nine o'clock; and from that time until one or eleven o'clock he was frequently in and out of Cook's room. After arriving at Rugeley on that night he had gone to a person of the name of Newton, the assistant of a surgeon in the town, and asked him for some strychnine; and he accordingly got from Newton three grains of that poison. The Attorney-General then proceeded at great length to describe the circumstances connected with the death of Cook, and which took place after that event. The breath was barely out of his body when Palmer sent for women to lay out the corpse, and these women, when they arrived at the dead man's room, found Palmer searching the pockets of his coat, and under his pillow, and under his bolster. Cook had taken his betting-book with him to Rugeley; but after his death no trace of it could be found. Palmer appeared to have had no money just previously to that catastrophe; but immediately after it he seemed to have received fresh supplies, and he was known to have paid off a number of debts. He produced to Cheshire, the postmaster, a paper (No. 1), which was made to declare that £4000 worth of bills, in which he himself (Palmer) stood debited, had been obtained on Cook's account, and he requested Cheshire to attest the genuineness of Cook's signature to that document; but Cheshire refused to comply with that request, as he had not seen any such signature affixed by a man who was then dead. On the Friday after Cook's death his stepfather, Mr. Stevens, came down to Rugeley, and naturally felt desirous of inquiring into the state of his affairs. He was then informed by Palmer that Cook owed the £4000 worth of bills; but he (Mr. Stevens) stated that there were not 4000 shillings left by Cook, and that any claim against him could only be substantiated by an appeal to the Court of Chancery. He further learned, very much to his surprise, that the betting-book and the papers had completely disappeared, and that no trace of them could be found. His suspicions having been excited that there had been foul play in the case, he called upon the landlady of the Talbot Arms. When a certificate had been required of the cause of Cook's death, Dr. Bamford and Palmer had agreed to attribute it to apoplexy, and had made a return to that effect. Palmer, however, by the most overwhelming evidence that could not have been the real cause of the decease of Cook; and the fact of Dr. Bamford having subscribed his name to any such return could only be explained by the supposition that as he was a very old man he had been led into a weakness which it would be impossible wholly to justify. A *post-mortem* examination of the body of Cook had afterwards taken place. At that examination the prisoner, on finding that no trace of any poison had been discovered, turned round to Dr. Bamford, and made the strange remark, "Doctor, they will not hang us yet." The stomach of the deceased was upon that occasion sealed up in a jar, in order that it might be sent to London to undergo a chemical examination; and after it had been in the custody of the coroner was seen attempting to remove it from the room, and on his being obliged to bring it back it was found that there were two cuts in the parchment at the top of the jar, while it was evident from the appearance of those cuts that nothing had been taken away through them. When Palmer learned that a postboy at Rugeley was to drive to the railway station two gentlemen who had charge of the jar, he went to him and asked him whether he could not manage to upset the car he was to drive, and to spill or break the jar, promising him £10 if he could effect that object; but the postboy refused to carry out his wicked design, and reached the railway station safely with Dr. Taylor and Dr. Rees, of London, for the purpose of undergoing a chemical analysis, and they gave it as their opinion that Cook had died of the effects of poison.

After having called attention to various parts of the evidence, the Attorney-General wound up with the following summary of the course he meant to take to prove the guilt of Palmer:—

I shall show you that after the death of Cook he was flush of cash. He paid £150 into the bank in which he banked at Rugeley; he paid sums of £50 each to two or three persons in the neighbourhood; he paid money to Pratt in London; and I think I shall trace to his possession something like £400. Cook had £70 or £800 when he left Shrewsbury. Nowe is found. It may be that Cook, compassionating the condition in which Palmer was, assisted him with money. On the other hand, I think it impossible that Cook, who had nothing to look to but the money he had won at Shrewsbury and the money he was to take for the stakes, would lend it to the prisoner. The case, then, stands thus:—You have a man overwhelmed with debt, who has resorted to the desperate expedient of forging acceptances—who he had to meet these acceptances by a policy of insurance, but is disappointed—who is told by his agent who has discounted his bills that he must trifle with him no longer—that writs are issued, and that he will only obtain from serving them a few days longer. He knows that if money is sent he will hold them over. The man had ruin staring him in the face; and not only pecuniary ruin, but also the penalties attached to forgery. It will be for you to say whether the prospect of getting £4000 to be received after Cook's death would have been a sufficient inducement for him to commit this offence. But he seems to have had another and an additional object. No sooner was the breath out of Cook's body than he coveted him £4000. He asked Cheshire to attest the document, but Cheshire refused to do so. That was the assignment in Pratt's hands of February, and he could have found the money to pay that off he might have obtained the horse, which at last time was worth £150. The fact of Cook being mixed up with the proposal to insure the life of Bates would lead one to suppose that he was mixed up in the transactions by which Palmer hoped to raise money in that way. If you believe the evidence, that on the Monday night the prisoner purchased strychnine; that on Tuesday morning he again purchased strychnine; that he was found on Tuesday night the pills were administered by the hands of the prisoner, and that Cook died of strychnine, it will be for you to draw the inevitable inference. You may be told, and with truth, that no strychnine was found, though the contents of the body were subjected to the most searching analysis, and I am bound to say that it is so. I am told by high authority that although the presence of strychnine may be discovered by scientific tests, and that although the indication of its presence would lend irresistably to the conclusion of its having been administered, yet its presence was undiscovered. That depends upon circumstances. It will be given to you by experts that sometimes does will destroy life that half to three-quarters of a grain will lay the strongest man prostrate; but in order that it should produce this fatal effect it must be absorbed into the system. If it is taken in liquid form its effect is rapid. If taken in the form of a pill it requires a longer time. As the poison is a vegetable poison, the tests to discover it are much more difficult than in the case of a mineral poison. If a great dose be taken, if it passes into the system in a rapid state, before it is complete, death ensues; but, if a minimum dose is given, the contrary is the case, and experience proves that the theory I am pronouncing is borne out by practice. Experiments have been tried which show that, where the same amount of poison has been administered to animals of the same species, in which the tenacity of life may be presumed to be equal, death will ensue in the same number of minutes; and when death has ensued, how opened the poison cannot be discovered. It has been thought and said over and over again that the presence of strychnine cannot be detected; but those who say so have grossly misrepresented scientific men. They never said any such thing. They say the detection of this poison is a matter of great nicety. It would, indeed, be a grievous thing if it could not be discovered. Happily, the presence of this poison is accompanied by characteristics distinguishing it from all others; and it will be for you to say in this case, when you have heard the role of the evidence, whether those symptoms are not here exhibited. There is another circumstance which I think I ought to mention. The quantity of antimony was found in considerable quantities in the body. It is given to produce sickness, and it may be that when the deceased was sick, and there were no other symptoms, it was owing to the administration of tartar emetic. It may be that the prisoner's only object in administering it was to bring on the appearance of disease, and then to account for the death. I shall produce before you the evidence; I am sure that you will do it your duty to the public and to yourselves. I have the satisfaction of knowing that the prisoner will be defended by one of the most able and eloquent men at the bar. If, after a full consideration of the whole evidence, you are satisfied of the sufficiency of the evidence to that effect; but, if he shall fail to satisfy you that he is not guilty, if the explanation which he may offer you are inconsistent with the evidence, and if the facts which I have advanced lead to the conclusion that he is guilty, then, for the best interests of society, and in the performance of the duty which you owe, I shall demand at your hands a verdict of guilty.

The learned gentleman then sat down, having addressed the Court upwards of four hours.

Ishmael Fisher, examined by Mr. Edwin James: I am a wine-merchant, and am in the habit of attending races and betting upon them. I knew the deceased, and had done so for two years. I saw him on Tuesday, the 19th of November. He died on the Friday week after the following day, in the evening, I was at the Raven Hotel, Shrewsbury. The prisoner and deceased were staying at the same hotel, and occupied an adjoining room to mine. I generally breakfast with them. I saw the prisoner and the deceased and a gentleman named Myatt in the sitting-room occupied by the deceased and the prisoner. They were drinking grog. The deceased asked me to sit down, and I did so. Cook asked the prisoner to have some more brandy-and-water, and he said he would not have any more until he had drank his. Cook then took up his glass and drank all the liquor that was in it, and almost within a minute he exclaimed "There is something in it—it burns my throat dreadfully." Upon his saying this, Palmer took up the glass, and sipped up what remained in the glass, and said there was nothing in it. There was a very small quantity of liquor in the glass when the prisoner took it up. At this time a person named Reed, who also attends races, came into the room, when the prisoner handed the glass to him, and asked if he thought there was anything in it, and handed it to me also, and we said there was nothing we could recognise as the glass was so empty. I said, however, that I thought there was rather a strong scent upon it, but could not detect anything but brandy. Cook went out of the room, and when he returned he called me out. I went with him into my sitting room. He appeared very ill, and he told me that he had been very sick, and asked me to take his money. He at the same time told me that he thought that Palmer had been dosing him. He gave me over £700. He did not say what I was to do with the money. The deceased was very sick again after he had given me the money, and left my room, and when he came back again he told me how he had been suffering from sickness, and asked me to go with him to his bed-room, and I did so. Another person, named Jones, went with us, and the deceased vomited violently in the presence of Palmer and me. He was so ill that I advised him to send for a medical gentleman in the town, and he accordingly sent for Mr. Jones, and Mr. Jones administered to the deceased the medicine that was sent. On the following morning I saw the prisoner in my sitting-room. He told me that Cook had been stealing, that he had been putting something in his brandy overnight, and he said that he never played such tricks with people, and he added that Cook was drunk. I should say the deceased was certainly not drunk when I saw him, and there was nothing about him approaching to drunkenness. The deceased appeared very ill when I saw him that morning, but a good deal better than the previous night, and I returned him the money. I afterwards saw him on the race course, and he then looked very ill. I had been in the habit of settling the deceased's bets for him, and paying and receiving when he did not go to himself. I saw his betting-book in his hand at Shrewsbury. On the 17th of November I paid Mr. Pratt £200, at the request of the deceased. In the ordinary course the bets upon the races at Shrewsbury would be settled at Tattersall's on the Monday following, and I expected to have settled the deceased's bets, and I should have deducted the £200 from the money I received. I did not settle the account, and, consequently, my £200 were not repaid me.

Cross-examined: I was aware the prisoner and the deceased were intimately connected in racing matters, but I was not aware that they were partners, or that they owned horses jointly. They were on very intimate terms, and generally stopped at the same hotels. I do not know whether Palmer won any money at Shrewsbury. I received a letter from the deceased on the 15th of November. It was dated Rugeley, and I requested me to pay £200, to make up a sum of £900 that he wished to pay to Mr. Pratt, and he would make up the remainder the next day.

Re-examined: I did not see Palmer with the deceased, from what he said, and any very great respect for the prisoner. The prisoner had a horse called Chicken, which ran at Shrewsbury and lost, and I know that he betted upon it. Mr. [illegible] and Mr. [illegible] regarding what [illegible] Mr. [illegible] His tongue was perfectly clean. His abdomen was very much distended. I administered an emetic and sent the waitress for some warm water, and the deceased said he would make himself sick with the handle of a toothbrush. He drank all the water, and vomited, and the water returned perfectly clean. I then went home, and sent the deceased two pills and a draught. The pills were composed of rhubarb and calomel, and the draught consisted of some magnesia and ammonia.

Cross-examined: I went to work with the deceased as if he was poisoned. There was no thing peculiar in the matter which he vomited. He appeared a little excited by drink, but knew perfectly well what he was about. I consider that his brain was certainly stimulated by the brandy-and-water. I thought that the warm water was likely to relieve his stomach.

Elizabeth Mills: I was chambermaid at the Talbot Arms, at Rugeley, in November last. The prisoner lived at Rugeley, and was in the habit of coming to the Talbot Arms. The deceased came to the same hotel on the 16th November, between nine and ten at night. The prisoner came with him in a fly. He appeared to be poorly, and he said he had been ill at Shrewsbury. He went to bed about half-past ten o'clock, and on the following morning he went out about one o'clock, and he still appeared to be poorly. He returned to the inn about ten o'clock at night, quite sober and very ill indeed. He came to the same room at the inn that he had been dining at Palmer's, and he said he felt no worse. The prisoner came to see the deceased on the following morning, and asked me for a cup of coffee for him, which I gave him. I think I saw the pills of the deceased, and left the room. I did not see him drink the coffee; but when I went into the room shortly afterwards, I saw that it had been vomited by the side of the bed. I did not see the remains of toast-and-water in the bed-room, but a jug that did not belong to the Inn was carried down from the bed-room at night, for me to make some fresh toast-and-water. The deceased was sick until ten o'clock at night. The waitress took this broth to the deceased's bed-room. I saw the prisoner at the window, and he asked me if Mr. Cook had had his broth, and the waitress said she had taken it up, but that it had been sick, and he said that it would not stay on his stomach. The prisoner then told me to fetch the broth, as Mr. Cook must have it; I did so, and left it in the deceased's bed room, and I believe that he did not take it, but he vomited. The same evening some barley-water was made for the deceased, and the waitress answered; but I cannot say whether they remained on his stomach or vomited. I saw him in his bed-room, about eight o'clock in the morning, and he said he had slept well since twelve o'clock, and felt very comfortable. A large breakfast-cup of broth was brought from the prisoner's house, but the prisoner did not call on the Sunday, and I took it up to the deceased's bed-room. I tasted the broth, and was afterwards I was sick. I drank about two tablespoonfuls. I vomited violently all the afternoon, and was obliged to go to bed. I was quite well up to the time of my drinking the broth. I saw the deceased on Sunday evening, and he seemed in good spirits, and not to be any worse. I saw the prisoner on the Monday morning between seven and eight o'clock, when I took him a cup of coffee for his breakfast. He did not vomit the coffee. Palmer had seen him before this, but he did not come again until ten o'clock at night. The deceased got up about one o'clock, and he shaved and dressed himself and appeared much better, but said that he was exceedingly weak. Ashmall, the jockey, came to see him in the course of the day, and also Saunders, the trainer. Soon after one o'clock the deceased took some arrow root, and it remained on his stomach. The deceased went to bed at four o'clock, and between nine and ten the prisoner came into the room, and I left him there. Some pills were sent by Dr. Bamford for the deceased about eight o'clock, and I took them into his room and placed them on the dressing-table, and they were in the prisoner's presence when I left the room. I went to bed between ten and eleven, and I was called up about twelve. I heard violent screams from deceased's bed-room, and upon entering it I saw the deceased sitting in bed, and he desired me to fetch the prisoner directly. I told him he had been sent for, and I then walked to the bedside and found one of the pillows was upon the floor. I picked it up and replaced it. His head and body continued jerking, and he seized the spoon fast between his teeth, and seemed to bite very hard. The deceased shortly afterwards swallowed the toast-and-water and the pills, and the prisoner then handed him the draught. It had a thick, heavy appearance. The deceased snapped at the glass in the same way he did at the spoon, and he appeared unable to control himself. As soon as he had swallowed the draught he vomited it, and it appeared to me to smell like opium. After this the deceased died a little more easy. The attack lasted altogether about half an hour, and during the whole of the time the prisoner was present. When he was recovered, he asked the prisoner to feel how his heart beat, and Palmer went to his bedside, and put his hand either to his heart or the side of his face, and he said all right. I left the deceased about three o'clock in the morning, and at this time the prisoner was sitting in the easy chair, and I believe he was asleep. About six o'clock the same morning I saw the deceased dressed, and he told me that he had not left him about a quarter-past five o'clock. I asked him how he was, and he replied that he was no worse; and he then asked me if I had ever seen any one in such agony as he was the night before, and I told him I never had. He then said he was sure I should never like to see any one in such agony again, and I inquired what he thought was the cause. He replied that it was through some pills that Palmer had given him about half-past ten. The deceased was quite composed and quiet at this time, and there was no jerking or convulsion about him, but his eyes looked very wild. About twelve o'clock the deceased desired me to send Brooks over to Mr. Palmer to know whether he might have a cup of coffee. A message was brought back that he might, and that Mr. Palmer would be over immediately. When I took up the coffee the prisoner was in the room, and I gave him the coffee, and he tasted it to see that it was not too strong. Mr. Jones came to the inn about three o'clock, and I saw him in the deceased's room, and the prisoner after this told me that Cook had vomited the coffee. I saw Cook several times after this, and he appeared in very good spirits, and talked about getting up the next morning, and wished the barber to be sent for to shave him. I did not see the deceased later than half-past ten o'clock on the Tuesday night, and the prisoner was then in his bed-room, and I gave him some toast-and-water for the deceased, and the prisoner said he did not want anything more. I sat up in the kitchen on purpose to see how Mr Cook went on, and I heard the bell of Mr. Cook's room ring violently about ten minutes before twelve o'clock, and I went up immediately. Mr. Jones slept in another bed in the deceased's room. I found the deceased sitting up, and Mr. Jones had his arm round his shoulders, apparently supporting him. The deceased, when he saw me, told me to fetch Mr. Palmer directly, and I went over to his house and rang the surgery bell, and the prisoner came to the window almost in an instant, and he opened a small casement, and I told him to come over to Mr. Cook directly, as he was in much the same state he was the night before. The prisoner made some reply, and I went back to the Talbot Arms, and in a minute or two the prisoner came into Mr. Cook's room, and the first thing he said was that he did not think he had ever dressed so quickly in his life. At this time Mr. Jones was still supporting the deceased. I went out of the bed-room and remained upon the landing about a minute or two, when the prisoner came out, and I observed to him that the deceased appeared in the same state he was the night before, and Palmer replied that he was not so ill by a fifteenth part. He then went to his own house, and returned in a very short time and went into the deceased's bed-room. I then heard the deceased ask to be turned on his right side, and very shortly after this I heard that he was dead. I saw the prisoner feeling the deceased's pulse, and he said to Mr. Jones, "The pulse is gone." Mr. Jones then put his face to the heart of the deceased, and when he had done so he lifted up both his hands, but did not speak. The prisoner then told me to fetch Mr. Bamford, and he arrived very soon afterwards, and when he came down he told me that Mr. Cook was dead, and that he was dead when he arrived. I was told afterwards that the prisoner wanted me, and I went into the deceased's bed-room. The prisoner was there alone. I said to him, "Is Palmer, is it possible that Mr. Cook is dead?" and he replied, "Yes, he is dead." He then asked me who I thought would come to lay him out, and I mentioned some women whom I thought he knew, and he said they were just the women, and he told me to fetch them. While Mr. Cook was living at the Talbot Arms I saw a book which I supposed to be his betting book. He had it with him when he stopped at the Talbot Arms before, on his way to Liverpool Races. I saw this book in the deceased's bed-room in the room before he died. It was on the dining-table. The prisoner was in the bed-room the same night, and I never saw the book again. I have searched for it, but cannot find it anywhere. About ten days after the prisoner had died, and while Mr. Jones was out of the room, I saw the prisoner in the act of searching the pockets of Mr. Cook's coat. I also saw him search under the pillow and bolster. Before Mr. Cook died I saw some letters lying on the mantelpiece, but I have never seen them since.

At the close of the examination in chief of this witness, it being half-past six o'clock, the Court rose, and the trial was adjourned to next morning at ten o'clock.

The jury, as usual in such cases, were taken, in the charge of an officer, to the London Coffee-house.

## THURSDAY

The trial was resumed this morning. The court was densely crowded, and there was no abatement of the interest which the proceedings have from the commencement awakened. Among the distinguished persons present were the Earl of Derby, Earl Carlisle, Lord W. Lennox, Lord G. G. Lennox, Lord H. Lennox, &c. The learned Judges, Lord Chief Justice Campbell and Mr. Baron Alderson, accompanied by the Recorder, the sheriffs, Mr. Sheriff Carter, and several members of the Court of Aldermen, took their seats on the bench at ten o'clock. The prisoner was then placed at the bar. The expression of his countenance was sadder and more subdued than on the preceding day. He maintained his usual tranquillity of demeanour, seldom changing his position, and gazing steadfastly at the witnesses.

The jury, who had been all night at the London Coffee-house, were conducted into court by the officer who had them in charge.

Elizabeth Mills, who was under examination the previous evening, was again placed in the witness-box, and subjected to a long cross-examination; but no important point in her evidence was materially shaken.

Mrs. Ann Brooks, examined by the Attorney-General: I live at Manchester. I am in the habit of attending races. I was at Shrewsbury race on Tuesday, the 18th November, 1856. I saw Palmer there. On the 18th (Wednesday), about eight o'clock in the morning, I met him in the street, and asked him whether he thought his horse Chicken would win? He desired me if I heard anything further about a horse belonging to Lord Derby' which was also to run, to call upon him at his house on the following day. I went to the Raven to see him at half-past ten o'clock on the Thursday evening. Some person came to visit Palmer that night, and I waited in the passage. I saw Palmer standing by a small table in the passage. He had a tumbler-glass in his hand, in which there appeared to be a small quantity of water. I did not see him put anything into it. There was a light between him and me, and he held it up to the light. He said to me, "I will be with you presently." He saw me the moment I got to the top of the stairs. He stood at the table a minute or two longer with the glass in his hand, holding it up to the light once or twice, and now and then shaking it. I made an observation about the fineness of the weather. The door of a sitting-room, which I supposed was unoccupied, was partially open, and he went into it, taking the glass with him. In two or three minutes he came out again with the glass. What was in the glass was still the colour of water. He then carried it into his own sitting-room, the door of which was shut. He afterwards came out and brought me a glass with brandy-and-water in it. I might have been there the same glass. I had some of the brandy-and-water. It produced no unpleasant consequences. We had some conversation about the races. In the course of it he said he should back his own horse Chicken. I was present at the race, when Chicken ran and lost.

Cross-examined: I am a married woman. I go to the races near my own home. My husband does not go with me. He holds a high appointment, and does not sanction my going to races. A good many racing people were taken ill at Shrewsbury, and they thought it was occasioned by the water. They were affected by sickness and purging. A lady who occupied the room I was attacked in this manner. The prisoner held up the glass as though to see whether anything was floating in it. He did this in the passage, which led to several rooms, and it was lighted by a chandelier. I thought nothing whatever of the occurrence at the time: and I was not examined before the coroner.

Re-examined: I have known the prisoner as a betting-man for a great many years, and we were on very friendly terms.

Lavinia Barnes said: I am a widow. In 1856, I was engaged as waitress at the Talbot Arms, Rugeley. I knew the prisoner and the deceased. I saw the latter at the inn on the 12th November, when he was on his way to the races at Shrewsbury. He appeared quite as usual at that time. I saw him on the Friday following after the races, and the day he had dined with the prisoner. He was quite sober. I saw him twice the next day, and I remember taking a basin of some broth that had been sent by the prisoner. He said that he was too sick to take it, and I carried it down to the kitchen. I saw the prisoner afterwards; he said that Mr. Cook must have the broth, and the chambermaid took it up a second time. I remember that Elizabeth Mills was taken ill on the Sunday, and was vomiting, and left her work and went to bed. I saw her vomiting violently. I took some more broth in the kitchen on the Sunday, but I don't know where it came from. I saw the prisoner between seven and eight in the morning on Monday, and I heard him tell Elizabeth Mills that he was going to London. The cup the broth was in did not belong to the Talbot Arms. Mr. Saunders, the trainer, came to see Mr. Cook on the Monday. On the Monday night I slept in a room adjoining that of Mr. Cook. Mr. Palmer had been to see him between eight and nine o'clock in the evening. About twelve o'clock, while I was in the kitchen, I heard Mr. Cook's bell ring very violently, and I went up stairs, and found Mr. Cook very ill, and he asked me to send for Mr. Palmer. He groaned, and cried "Murder!" and said he was suffocated, and his eyes looked very wild, and stood out of his head. He was also beating the bed with his hands, and he exclaimed repeatedly, "Christ have mercy on my soul!" Palmer came very shortly, and went to the deceased's bed-room, and at this time he appeared to be more composed, but said that he should die. The prisoner said to him, "Don't be alarmed, Jack." Shortly after this I saw the deceased in the act of drinking some dark liquid from a glass, and I heard his teeth snap at the glass. After he had taken the draught he appeared to be more composed, and on the following morning he seemed a good deal better, and continued so all day. On the Tuesday night, about the same time, I again heard the deceased's bell ring, and the chambermaid went up to his room and I followed her. Palmer came very shortly, and went to the deceased's bed-room, and at this time he appeared to be more composed, but said that he should die. The prisoner said to him, "Don't be alarmed, Jack." Shortly after this I saw the deceased in the act of drinking some dark liquid from a glass, and I heard his teeth snap at the glass. After he had taken the draught he appeared to be more composed, and on the following morning he seemed a good deal better, and continued so all day. On the Tuesday night, about the same time, I again heard the deceased's bell ring, and the chambermaid went up to his room and I followed her. Palmer came very shortly, and went to the deceased's bed-room, and at this time he appeared to be more composed, as the night before. The prisoner was sent out, and as he passed me I told him that Mr. Cook was ill again, and he replied, "Is he?" and went into the bed-room. The prisoner was dressed as usual. After he had been in the bed-room a short time he came out and I told me that Mr Cook was not so bad by a fiftieth part as he was the night before. He afterwards said the same thing to Elizabeth Mills. I went into the bed-room shortly after, and heard the deceased ask Mr. Jones to turn him over in the bed. I was not in the room when he died. After the death had taken place I saw the prisoner with a coat in his hand, and he seemed to be searching in the pockets. I said to him, "Oh, Mr. Cook can't be dead!" and Palmer replied, "He is, I knew he would be." I then left him in the room with the dead body. I remember seeing Palmer on the Thursday

following in the hall of the hotel, and he asked me for the key of Mr. Cook's bed-room, as he said he wanted some books and papers and a paper-knife, which he said he had borrowed from a stationer's, and he should have to pay for them if he did not return them. I accompanied him to the bed-room, and he sent me out on a message to Miss Bond, the housekeeper of the house. When I went back the prisoner was still in Mr Cook's room, and he appeared to be searching among the deceased's clothes and papers, and he said he could not find the paper-knife. Miss Bond, the housekeeper, afterwards came into the room, and I left. I heard Mr. Jones ask Mr. Palmer on the Friday following if he knew where Cook's betting-book was, and Palmer said it would be sure to be found, and he added that it was not worth anything to any one else but to Cook. I remember Mr. Stevens coming to the Talbot Arms, and after he had gone Palmer told me to go and look for the betting-book in Mr. Cook's bed-room, and we did so, but could not find it. I told Palmer on the previous night to ask Mr. Jones, and he said it would be found somewhere, and he would go and look for it himself. I don't know how long Palmer was in the deceased's room on Thursday.

Cross-examined: I do not know the exact time that Palmer went into the deceased's bed-room on the Monday night, but I am sure it was before ten o'clock. I saw a glass near Mr. Cook's bed, but I do not know who gave it to him, and I am not sure that he had it in his hand at all. The chambermaid was near him, and so was Palmer, and I think they were helping up the glass. The deceased had a considerable quantity of clothes of all descriptions. I do not know when the bed room door was first locked after the death. The undertakers and the women who laid out the body were also allowed to go into the room by themselves, and they were there for some time.

Re-examined: I and the chambermaid were in the room while the women were engaged in laying out the body, and also while the undertakers were there. I saw a book lying on the dressing-table during the deceased's illness, but I never saw it afterwards. I looked for the book afterwards, but could not find it.

Anne Rowley said: I am a charwoman, and live at Rugeley. I remember taking some broth from the Alston Inn to the prisoner's house. I took it to the kitchen, and tasted it, and the prisoner then told me to take it to Mr. Cook at the Talbot Arms, and I was to ask whether he would like some bread or toast with it, and I was to say that Mr. Jones, a head-centleman, had sent the broth. Cook was in bed at Rugeley. He is a friend of the prisoner. I gave the broth to Lavinia Barnes, the waitress at the Talbot Arms. The prisoner warmed the soup himself while I was in the kitchen. I was paid about five hours.

Cross-examined: I know that Mr. Smith was in the habit of putting up at the Alston. He was on very friendly terms with Mr. Cook.

Charles Hadley said: I was gardener at Rugeley, and I was occasionally employed by the prisoner. I was at his house on the Sunday before Mr. Cook's death, and he asked me to take some broth over to him. The broth was in a small cup with a cover to it. I took the broth to the Talbot Arms, and gave it to one of the servant girls.

Sarah Bond said: I was housekeeper at the Talbot Arms at the time of Mr. Cook's death, in November last. I remember the deceased going to Shrewsbury races, and I saw him upon his return, and he told me he was very poorly. He arrived home about half-past eleven o'clock on the even before he died, as I do then said he was better. I saw the prisoner shortly afterwards, and asked him what he thought of Mr. Cook, and he said that he was better, and that he did not require any one to sleep with him. I had suggested that some one should do so, and the prisoner said he was so much better that it was not necessary. On the Monday morning I saw Palmer in the kitchen, about seven o'clock, and he told me that Mr. Cook was better, and he asked me to make him a cup of coffee. He remained in the kitchen while I made the coffee, and he took it from me to go to Mr. Cook's bed-room. He then said that he was going to London, and that he had written to Mr. Jones to come and stop with Mr. Cook. Between eleven and twelve o'clock at night I heard that the deceased was very ill, and I went to his bed-room. He was sitting up, and he appeared disappointed when I went in at not seeing the prisoner. Palmer came shortly afterwards and went into the deceased's room. He then fetched some medicine, and shortly afterwards I heard that Mr. Cook was very sick and very ill, and I heard him say that he thought he should die. I was standing in the passage when this occurred. The prisoner appeared to cheer him up, and went into the room of the room I asked if Mr Cook had any relations, and he said he had only a step-mother. On the following day Mr. Jones came, and he stayed with the deceased till his death. The Wednesday morning after the death of the deceased I locked the door of Mr. Cook's bed-room, and kept the key in my possession. I afterwards gave it to the barber, to where the deceased, and subsequently to Lavinia Barnes. The key was given to the undertaker, and ultimately I handed it to Mr. Stevens, the father-in-law of Mr. Cook.

Mr. W. B. Stevens said: I am a surgeon, and reside at Lutterworth. I was intimately acquainted with the deceased, and he occasionally resided at my house. He was twenty-eight years old at the time of his death. He was married. He followed no profession, but latterly devoted his attention entirely to the turf, and kept race-horses and betted. I do not know how long he had been acquainted with the prisoner, but they had been in habits more than a twelvemonth. I saw the prisoner frequently, and he was generally good, but he was not a robust man. He used to hunt and play cricket. He invited me to Shrewsbury to see his horses run, and I spent the Tuesday, the 18th of November, with him at the races. We dined with him at the Raven Hotel, with several other friends. There was a little extra champagne on account of the horse having won, but the party broke up between eight and nine o'clock. The deceased accompanied me on my way to the train, and we stopped at the house of Mr. Ashmall, the clerk of the course, and I saw the deceased produce his betting book, and he made a payment in the shape of a bank-note to Mr. Ashmall's niece. Mr. Cook was not at all the worse for liquor on this day, and he appeared to be in perfect health when I left him. On the following Monday I received a letter from the prisoner, and in consequence of what I saw I took a fly and proceeded to Rugeley. I arrived at the Talbot Arms about [illegible] o'clock, and I found Mr. Cook in bed. His appearances did not correspond with a case of [illegible] and the prisoner said that I should have seen him before. I did not prescribe anything, because he was not in my hands at all; but I suggested three several times, and he appeared to be getting better. He vomited once after I had given him some tasteless drink that was in the room. Dr. Bamford arrived the same afternoon, about seven o'clock, and I heard his opinion that Mr. Cook was going on satisfactorily. Something was said about what Mr. Cook was to have, and he objected to take any more pills, and said that they had [illegible] him on previous nights. Palmer was present when this took place. We all left the room, and Palmer and I supposed that Mr. Bamford should make up some morphine pills as he had [illegible] the prisoner told me not to tell Cook what the pills were composed of, as he objected to the morphine so much. We then went into the deceased's room several times during the evening, and the deceased appeared very [illegible] and I did not observe any vomiting. I did not observe any [illegible] symptoms whatever about him, nor was there any appearance of his having recently suffered from such an attack. About eight o'clock the prisoner left us to go to his own house, and when he returned he brought a box of pills with him, and he opened the direction in which they were [illegible] directed my attention to the handwriting, and said it was very excellent for an old man of eighty. It was very good writing. The prisoner then proposed to Mr. Cook to take the pills, and he protested very much against doing so, on the ground that they made him so ill on the previous night. Palmer pressed him very much, and at last Cook complied and after he had taken the pills he vomited, but did not bring up the pills. After he had vomited he laid down and remained perfectly quiet. He had become much stronger after he took the pills, and got up and sat in a chair, and was in very good spirits, and laughed and joked about what he was going to do during the winter. I went down to supper, and, as he had requested, I should sleep in his room, a bed was prepared for me. I went to bed about twelve o'clock, having previously conversed for a few minutes with the deceased. He appeared very low, but there was nothing about him to excite apprehension. After I had been in bed about ten minutes, the deceased suddenly raised himself in his bed, and called out, "Doctor, get up, I am going to be ill," and he rang the bell, and sent for Palmer. I sprang out of bed at the bell, and the chambermaid came, and he again called out to send for Mr. Palmer. The deceased then asked me to give him something to relieve him, and I told Palmer would be there directly. He then asked me to rub his neck, and I did so, and observed a great stiffness about the muscles of the neck. Palmer came into the room almost immediately, and he made me remark that he did not think he had ever dressed so quickly in his life. He brought some ammonia pills with him, and Cook swallowed them, and directly afterwards uttered violent screams, threw himself back on the bed, and was dreadfully convulsed. The ammonia pills could not have been the cause of this. The deceased then [illegible] said, "Doctor, get up or I shall be suffocated." The convulsions extended over all the muscular tissue of the body, every muscle was convulsed, and there was a stiffening of the limbs. I endeavoured to raise the deceased with the assistance of Mr. Palmer, but it was quite impossible to do so from the rigidity of the limbs. He then asked to turn him over, and we did so. At this time he was quite sensible. I then went to the setter of the heart, and found it to gradually weaken; and I asked the prisoner to fetch some spirits of ammonia as a stimulant, and he left for that purpose, and returned in two or three minutes, and at that time the heart was gradually sinking in its action and life was nearly extinct. The deceased died almost immediately after Palmer returned with the ammonia. Not more than ten minutes or a quarter of an hour elapsed from the time the deceased first called out to me until his death. The immediate cause of death, in my opinion, was tetanus. By that expression is understood a spasmodic affection of the whole of the muscles of the body, leading to a stoppage of respiration and ultimately suffocation. When death took place the deceased was lying on his side, and both hands were tightly clenched, and the head and neck were bent back into quite an unnatural position, and the body was twisted back; in fact, it was quite bowed, and if the body had been placed on the back it would have rested on the head and heels. The prisoner remained in the room for sometime after the deceased died, and I saw him upon my return, after I had been absent a short time, with the deceased's cheque in his hand, and he said, as I was his private friend, I had better take possession of his effects, and I took his watch and his purse, which contained five sovereigns and five shillings; there was no money in it. I saw nothing of his betting book. Before I left the prisoner said it was a bad thing for him that Mr. Cook had died, for he was responsible for him for three or four thousand pounds, and I heard Mr. Cook's friends would not let him lose it, and if they did not assist all his horses would be seized. I was present when Mr. Stevens, the stepfather of the deceased, arrived at Rugeley, and I heard the prisoner say that if Mr. Stevens would not bury the deceased he should. Mr. Stevens, the pri-oner, I, and Mr. Bamford dined together on this day, and Mr. Stevens asked me to look for Cook's betting book and papers. Palmer and I went out of the room together. He followed me as I was going to look for the papers and the betting-book. I had looked for the book before, and the prisoner then told me it was of no use to any one, but he had no doubt that it would be found. When I went to search for it a second time I could not find it, and I informed Mr Stevens of this in Palmer's presence, but I do not recollect what he said in reply.

By the Lord Chief Justice: Nothing was said on the Tuesday night at the consultation at which the prisoner was present about the spasms of the previous night.

Cross-examined: The deceased lived a good deal at my house, and his health was generally good. I know that he had been treated successfully, but not to any great extent. He had suffered from a slightly ulcerated throat. I know, also, that he had found it necessary to apply caustic to his tongue, but he had ceased to do so for two months before his death. I believe he had suffered from a certain disease, and that he was apprehensive of secondary symptoms. He had been in reduced circumstances, but I understood that his condition was improving at the time. I knew that he had several race-horses, and that Palmer was joint owner of one of them. He was very anxious about the race at Shrewsbury, and the result was a matter of very great importance to him. Smith looked at Palmer's

THE TALBOT ARMS INN, RUGELEY.

"Pray, Mr. Palmer, did you attend my son in a medical capacity?" He said, "Oh, dear, no!" I said, "I ask you that question because I am determined to have his body examined: if you had attended him medically, the gentlemen I shall call in will feel it proper that you should be present." He then said, "Can you tell me who is to perform the examination?" or words to that effect. I said, "I cannot; I shall not know myself until to-morrow. I thought it right to tell you of it. I shall have it done to my satisfaction after what you have said, and it is a matter of indifference to me whether you are present or not." He said, "So it is to me." He again the same evening asked me who the medical men were. When I first saw the body on the Friday it had no appearance whatever of decomposition; on the contrary, it did not look like a dead body, and I was startled.

Dr John Harland, physician at Stafford: I went from Stafford to Rugeley on Nov-mber 26 to make a *post-mortem* examination. I arrived about eleven o'clock in the day. I called upon Dr Bamford. As I went to him I was joined by Palmer. He said, "I am glad you have come to make a *post-mortem* examination. Some one might have been sent whom I did not know." I said, "What is this case? I hear there is a suspicion of poison." He said, "Oh no, I think not; he had an epileptic fit on Monday and Tuesday night, and you will find old disease in the heart and in the head." We then went on together to Dr. Bamford's. Palmer said there was a queer old man who seemed to have suspected something; adding, he did not know what he would be at, or what he wanted. He also said, "He seems to suspect that I have got a betting-book—Cook had no betting-book which would be of use to any one." The witness then gave a minute account of the appearance of the body on the *post-mortem* examination. The body was very stiff—much stiffer than dead bodies usually are five or six days after death. The muscles of the body were strongly contracted and thrown out. The hands were stiff and firmly closed. The abdominal viscera were in a perfectly healthy state; the liver was healthy. The lungs were also healthy; they had blood in them, but not more than could be accounted for by gravitation after death. The brain was quite healthy. There was no extravasation or any serum in the brain; nothing which would cause pressure. The heart was contracted, but contained no blood. That appeared to arise, not from disease, but from spasmodic action. There was no appearance of anything in the stomach which could at all account for death. After the stomach had been examined, Palmer, who had been watching the proceedings very attentively, said to Mr. Bamford, in a loud whisper, "They won't hang us yet." He afterwards made the same remark to various persons. A second *post-mortem* examination was held on the 25th of January, of which a report was read. It was dated the 25th January, 1856, and, after stating that there was still much rigidity of the muscles, that considerable force was required to alter the position of the different limbs, and that the fingers were firmly fixed and the soles of the feet inverted, it went on to describe the state of the spinal cord, and the conclusion the medical men came to on that point was that the spina cord was in its usual normal character and condition, allowance being made for decomposition after death, and that there was nothing about it to account for the death of the deceased.

James Myatt said: In November last I was postboy at the Talbot Arms. On the 28th November I was ordered to take Mr. Stevens to the Stafford station, and before I started I went home to get my tea. As I was returning I met the prisoner, and he asked me if I was going to drive Mr. Stevens to Stafford. I told him I was, and he then asked me if I would upset the jars. He said before this he supposed I was going to take them, and I said I believed I was. He then asked me if I thought I could upset them, and, if I could, there was a £10 note *for* me. I told him I could not, and said I must go, as the horse was in the fly, waiting for me at the Star; and, if I did not go, some one else would go. The prisoner told me not to be in a hurry, for if any one else went he would pay me.

Samuel Cheshire who was brought from the gaol to give evidence, said: I was formerly postmaster at Rugeley, and I am now under sentence for having read a letter. I went to the Shrewsbury races with the prisoner in 1855; it was the day Polestar won. I returned to Rugeley the same day, and on the Saturday following I saw the deceased in bed at the Talbot Arms. The prisoner took me. The same day I received a message from the prisoner, desiring me to go to him, and take a receipt stamp with me. In consequence of that message I went to his house, and purchased a shilling's worth of stamps on my way. I found the pri-

RUGELEY—SKETCHED FROM THE RAILWAY.

## MONUMENT TO JOHN WESLEY.

THERE have already been memorials raised to the founder of Methodism; but the place of his birth does not possess any sculptural record of the event. We are, therefore, gratified to learn th t the good people of the town of Epworth, in Lincolnshire (Wesley's birthplace), propose to commemorate the excellence by the erection of a statue "by a National Penny Subscription," so as to afford all classes the means of participating in the good work. The movement originated with Dr Dunn, of Doncaster, who, in April last addressed the following admirable letter to Mr. Joseph Merrils, solicitor, of Epworth:—

My dear Sir,—On the 17th June, 1703, a child was ushered into the world at the old Rectory House of Epworth, which child was rescued from the flames when six years old by two courageous and humane inhabitants of that town. The subsequent career of that child was most remarkable, showing that an all-wise Providence had saved him for purposes of his own. Any man that could have brought about a revival of religion in the eighteenth century, and more especially in the early part of it, must have been a man specially designed, highly gifted, and spiritually guarded. Such a man was John Wesley, who has left his name, his fame, and his works as a light, an example, and a triumph for all and every one who dares to be virtuous in a vicious age, and was willing to suffer for Christ's sake. While statues of bronze and of marble are reared to perpetuate the memory and the deeds of soldiers, poets, and statesmen, is it not surprising—nay, humiliating—to reflect that John Wesley, who did so much, suffered so much, accomplished so much, whose followers and admirers are numbered by millions, should have not one lasting monument to perpetuate his memory, or to act as a stimulant to others to follow his example? If it is right that this omission should be rectified, then it is right that Epworth should claim—nay, insist—upon its being the site for such monument. I now write to ask your kind and zealous co-operation in this good work, and to beg of you to fix a time before or after my lecture on Thursday next, where the preliminaries may be arranged, a secretary and treasurer appointed, and subscriptions entered into. I am a Churchman, you are a Wesleyan; but I believe that Churchmen, Wesleyans, and Dissenters of all denominations will not fail to assist in this good work. One thing only I earnestly entreat, that the inhabitants of Epworth will not be lukewarm in this matter, which so nearly concerns them, and that they will listen to no suggestions which would rob them and their native town of the honour and ornament that such a work would confer.

I am, my dear Sir, yours most faithfully,

To Josiah Merrils, Esq., Solicitor, Epworth. GEORGE DUNN.

Mr. Merrils, who entered at once zealously into the subject, invited many of the inhabitants of Epworth to be present at the lecture, when they received Dr. Dunn's remarks with great enthusiasm, and formed a committee to carry it out. A report of the lecture having been inserted in many of the provincial papers, the proposal was everywhere favourably received. In Manchester, Leeds, Sheffield, Bradford, and Hull, arrangements have been made and subscriptions received, and we have little doubt there will be few but who will be anxious to contribute their penny. Mr. Tilbury, the artist, has designed the intended monument, which is exceedingly appropriate. The statue of Wesley, 7 feet 9 inches in height, is placed upon a square stone basement 9 feet high, in which there will be three *alto-relievo* panels 6 feet by 4 feet 6 inches, the one in front representing "The Last Supper," and one on each side—"Christ Blessing Little Children," and "Christ Healing the Sick." Upon this basement rises a Gothic foriated baldachino, or canopy, underneath which is, of course, the figure. The attitude of Wesley is indeed expressive, holding the Bible in one hand. He is represented as exhorting the people with that earnestness and truth which so distinguished his life. Altogether, from the ground to the apex of the arch, the height will be twenty-five feet. The whole is surrounded by an appropriate palisading. In carrying out this elegant work of art everything depends upon the amount of the subscriptions; but it is much to be desired that a design which reflects such credit upon Mr. Tilbury should be perfected in the most substantial manner.

MONUMENT TO JOHN WESLEY, TO BE ERECTED AT EPWORTH.

STATE OF ITALY.—HALF-MEASURES.—The *Corriere Italiano* of Vienna (a journal believed to be semi-official) has some remarks on the state of Italy, especially the Pontifical States. It characterises the reports of great sufferings and discontents among the population as considerably exaggerated, but it does not deny the necessity of reforms in the Roman States. Those reforms should be, the organisation of public instruction, a radical change in the judicial system, participation of the laity in public functions, and a proper regulation of municipal administration confined to a central representation. In addition, a general recruitment is necessary to supply the Pope with a standing army; but it adds that, to carry out these reforms, the prolongation of the occupation by the French and Italian troops is necessary.

THE AUSTRIANS IN PARMA.—The state of siege is excessively rigorous and annoying to the inhabitants. After ten at night Austrian patrols arrest every man they meet in the streets. More than 200 have been thus arrested. Words can scarcely describe with what indignity these persons, who are only arrested on suspicion, are treated in the prisons, where they are shut up indiscriminately. Sometimes twenty days elapse before they are examined, when most of them, against whom nothing can be proved, are set at liberty. The prisons in which political offenders are locked up are guarded by Austrians; and in reply to the request of some of these unfortunate innocent men to be allowed to purchase some better food, the Austrian gaoler replied that "prison fare was quite good enough for them." The persons arrested belong chiefly to the working classes. When one of these is arrested the shop in which he works is immediately shut up, and thus whole families are punished on a simple ground of suspicion against an individual member, and should any kind-hearted friend offer relief, he is immediately arrested and thrown into prison for having shown sympathy for a suspected person. The arrest of fifty young men, who have been sent off under an escort to Mantua, has aroused public indignation to an extraordinary pitch. The Austrian authorities themselves own that the only cause of their arrest was that they were known to entertain political principles not fully conformable to those entertained by the Government of Parma. The Austrian General said that they would not be brought to trial, but simply be locked up in the fortress of Mantua until they had given evident proofs of a return to better sentiments towards their legitimate Government. Some of these unfortunate young men were arrested by mistake, and, on a representation to this effect being made, the Austrian General replied that he was sorry for it, but he could not release them, as it would be dangerous to admit that the authorities could commit an error.—*Letter from Parma, May 8.*

## THE FLYING FOXES AT THE ZOOLOGICAL SOCIETY'S GARDENS, REGENT'S PARK.

WHIT-MONDAY is always a great day at the Zoological Gardens. In 1853, under the auspicious radiance of a glorious sun, the visitors exceeded 22,000; in 1854 they were almost equally numerous; in 1855 unfavourable weather intervened; but on Monday week, if we take holiday numbers as a test of popularity, this interesting establishment well nigh achieved a greater triumph than ever. By eleven o'clock the crowd at the gates became oppressive, and from that time till the rain began to fall in the afternoon the stream flowed in continuously. At two o'c ock the broad walk of the Park, the main pedestrian thoroughfare to the gardens, "was black with people," as an old observer remarked to us, all wending their way after dinner to the lions and tigers, giraffes, hippopotami, and elands. By three o'clock 16 000 visitors had entered, when the first drops of rain slackened the steps of the host without; and as the certainty of a wet evening grew more confirmed influx ceased.

Never before had the holiday-makers seen a nobler collection, more numerous, or better ordered. The retarded spring still keeps the green foliage in; and the lilac blooms, which ought before this time to have clothed the gardens with a cloud of colour, is still unfolded; but neatness and preparation are discernible on all hands; and after the first week of summer every corner will be bright and full of interest.

Since our last notice of the Zoological Society several additions have been made to their menagerie, of which we have selected the most curious as the subject of our present Illustration. The Flying Fox is the largest of the fruit-eating bats of India, and is often erroneously called the Vampire. The latter name really belongs to a smaller group of blood-sucking bats which inhabit South America.

The Flying Fox (*Pteropus edulis*), when perfectly adult, has a large head, with not a little of the expression of a fox about it, and an expanse of wing which measures at least three feet, and therefore gives to its flight a nobleness of sweep to which the flickering evolutions of the insectivorous bat of Europe are infinitely inferior. During the day the Indian *Pteropi* repose in the deep shade of the banyan-trees, suspended by their powerful feet, and wrapped round with their beautiful dark-brown wings as closely as a mummy in a cerecloth. When evening comes they issue out and wheel majestically down to the margin of the river, of the reservoir, where the sportsman is waiting silently for the approach of some higher quarry at the drinking-place. Close to him glides the *Pteropus*—not unperceiving, but without fear; and some believe that in the darkness it alights on the earth to drink at the water's edge. But as in that case it would have great difficulty in taking flight again, without hooking itself to some stray branch trailing on the ground, and thence ascending to a sufficient height to fling itself clear into the air, it is probable that it drinks like the swallow, on the wing.

FLYING FOXES IN THE GARDENS OF THE ZOOLOGICAL SOCIETY, REGENT'S-PARK.

The movement of the *Pteropus*, when not in flight, closely resembles that of the stork. The first digit of the wing terminates in a hooked claw, which grips firmly, and the body, when this claw is in action, assumes a pendulous horizontal position parallel to the branch on which it travels.

These very interesting animals were brought over from India for the society by Captain Nesbit. They appear to be perfectly sensible of the kindness of their keeper, and feed freely from his hand.

AMERICAN DECREES ON COURT COSTUME.—Mr. Marcy, the American Secretary, who has manifested such an obstinate and impracticable spirit in his political correspondence with our Government, is determined to be consistent in all things, and has actually, after due consultation with the Government tailors of the United States, defined and prescribed the dress in which all American gentlemen must appear at Foreign Courts, and our own especially. The order which has been conveyed to the American Legation is not limited in its application to the members of the diplomatic corps, but to all free and independent citizens, who thus do not enjoy the same liberty of action which the subjects of the monarchies of Europe to a certain extent do. The costume which the united taste and wisdom of Mr. Marcy and his coadjutors have decided on consists of an ordinary black dress-coat, a white waistcoat, white cravat, black pantaloons or breeches, silk stockings, a black sword, and a cocked hat. Several American gentlemen have openly expressed their feelings of annoyance at this proceeding of Mr. Marcy. They would willingly, when seeking for their own pleasure, to pay their respects to the Sovereign of Great Britain, and as a matter of true politeness and good taste, conform to the usages and customs of her Court; but this order of Mr. Marcy is of so imperative a nature as to leave the intelligent members of the great republic no option.

GOOD CAUSE FOR RUSSIAN SATISFACTION.—The Russian officers in the Crimea, according to recent letters, express the greatest delight that the war is ended. "Some," says a letter just received, "laughed at us very much for not having taken Sebastopol, and the whole Crimea, after the battle of Alma, when they said, they had only 26,000 men in all the Crimea. At Inkerman they had 40,000, and now 250,000 in the Crimea. They refer the cause of all their sufferings to not having a railway from Moscow, or roads through the province, so that transport in wet weather was nearly impossible. We had, of course, many invitations to Moscow and St. Petersburg, which we returned with similar ones to them. The hospitals were all full of patients, and typhus raging severely. They said Simpheropol was in a terrible state during the bombardment, full of wounded; and that of the Fourth Division, which was in Sebastopol almost since the beginning of the siege, there is hardly one of the old officers left."

FLOVERS.—(SEE PAGE 571.)

## TRIAL OF WILLIAM PALMER.

*(Continued from page 564.)*

sooner in his sitting-room, and he said he wanted me to write out a cheque, and he produced a copy. I did as he requested, and he said it was for money that Mr. Cook owed him. I left the cheque in the possession of the prisoner. He told me the reason he wanted me to write the cheque was that Messrs. Mosely, from whom it was drawn, would know Cook's handwriting; and he said he was going to take the cheque for Mr. Cook to sign.

Mr. Weatherby, the secretary to the Jockey Club, was here called, and he explained that it was his duty to pay the stakes to the owners of winning race-horses, and he also kept a bank. The deceased had a banking account with him. He knew Palmer. He kept no account; but he had paid him stakes that he had won. On the 21st November he received a cheque bearing the signature of the deceased. He returned that cheque to the prisoner by post. The amount written upon it he had joined with Cook, and that it was all for Cook's benefit, and this was the document stating so. I think the handwriting of the paper was Palmer's. I told him I could not sign such a document, as I had not seen Cooke sign it, and that I might be called upon afterwards to give evidence respecting it, and the Post-office authorities would not like my leaving my place for such a purpose. The production of this document was then called for. It was not produced.) I believe there was a stamp upon the paper, and it contained a statement that certain bills were all for Mr. Cook's benefit, and not Mr. Palmer's. The amounts were rather large, but I do not remember the precise sums; but one was for £1000 and another £50 It was signed "J. P. Cook." I was in the habit of giving the prisoner letters addressed to Mr. Cook. While the inquest was going on I remember the prisoner asking me, if I heard anything fresh to let him know. I thought it was a temptation for me to open a letter, and I told him I could not do so. Since I am suffering imprisonment for it one addressed by Dr. Taylor to Mr. Gardner. I read a portion of that letter, and communicated what I had read to the prisoner. I informed him that Dr. Taylor said that no trace of strychnia had been found in Cook's body. The prisoner, when I told him this, replied that he knew they would not, for he was perfectly innocent.

Mr. Hatton, the chief constable of the Staffordshire police, here produced a letter sent by the prisoner to Mr. Ward, the coroner. It was read, and stated that he knew Professor Taylor had stated that he could not discover either strychnia or prussic acid in the body, and that he hoped the verdict would be that he died from natural causes. It concluded

"Everyours, W. P."

Mr. Ellis Crisp, inspector of police at Rugeley, said: On the 17th December I assisted to search the prisoner's house, and found the book I now produce. It contains the following entry in the prisoner's handwriting:—"Strychnine kills by causing a tetanic fixing of the respiratory muscles."

Mrs. Elizabeth Hawkes said: I keep a boarding-house in Beaufort-buildings, Strand. I knew the prisoner. He was at my house on the 1st of December last, and I purchased some game and a turkey for him on that day, and the porter purchased some fish. The things were all packed up in a hamper, and I directed the hamper to Mr. Ward, the coroner, at Stoke-upon-Trent.

Mr. G. Herring said: I live at New-cross. I am independent. I knew the deceased, and I saw him at Shrewsbury races. I put up at the Raven, and occupied rooms next to that occupied by the prisoner and Mr. Cook. On the Wednesday of the races I saw a considerable sum of money, in bank notes, in possession of the deceased. He showed me his betting-book, and it contained entries of bets he had made upon the races. On Monday, the 10th of November, I received a letter from the prisoner, which he requested me to forward him at his lodging in Bedford-buildings. I went at the time appointed, and saw the prisoner. I asked him how Mr Cook was, and he said he was all right, as a physician had given him a dose of salts, and he added him pot-pourri, and that I might go to

of remedy were found. Half a grain three or four days before death, if favourably given, and not vomited, would, I should expect, leave a trace. One grain would certainly do so. I heard the evidence as to the death of Mrs. Smyth, Agnes French, and the other lady mentioned, and also as to the attack of Clutterbuck.

From your experience in reference to strychnine, do you coincide in opinion with the other witnesses, that the deaths in those cases were caused by strychnine?—Yes.

Did the symptoms in Cook's case appear to be of a similar character to the symptoms in those cases?—They did.

As a professor of medical science, do you know any cause in the range of human disease except strychnine to which the symptoms in Cook's case can be referred?—I do not.

Cross-examined by Mr. Serjeant Shee: I was first applied to in this case on Tuesday, the 25th of November, by Mr. Stevens, who was introduced to me by Mr. Warrington, Professor of Chemistry. Either then or subsequently he mentioned Mr. Gardner. I had not known Mr. Gardner before. I had never before been concerned in cases of this kind at Rugeley.

Mr. Serjeant Shee read the letter written by Dr. Taylor to Mr. Gardner:—

Chemical Laboratory, Guy's Hospital, Dec. 4, 1855.

*Re* J. P. Cook, Esq., deceased.

Dear Sir,—Dr. Rees and I have completed the analysis to-day. We have sketched a report, which will be ready to-morrow or next day.

As I am going to Durham Assizes on the part of the Crown, in the case of *Reg. v.* Wesley, the report will be in the hands of Dr. Rees, No. 28, Albemarle-street. It will be most desirable that Mr. Stevens should call on Dr. Rees, read the report with him, and put such questions as may occur.

In reply to your letter received here this morning I beg to say that we wish a statement of all the medicines prescribed for deceased (unt l his death) to be drawn up and sent to Dr. Rees.

We do not find strychnine, prussic acid, or any trace of opium. From the contents having been drained away it is now impossible to say whether any strychnine had or had not been given just before death, but it is quite possible for tetanic effects to destroy life if given in repeated doses; and, so far as we can at present form an opinion, in the absence of any natural cause of death, the deceased may have died from the effects of antimony in this or some other form.—We are, dear Sir, yours faithfully,

ALFRED S. TAYLOR.
G. OWEN REES

Witness: I think I was quite justified in coming to the conclusion that antimony was the cause of death. The quantity of antimony found in the body was no criterion of the quantity that might have been administered; it might have been merely the residue of what had been taken. If the deceased had taken quack medicines that contained antimony, the same results would undoubtedly have been apparent. We were told by Mr. Stevens that his son-in-law was in good health at Shrewsbury races—that he made no complaint of illness—that he was suddenly attacked by vomiting and died, and there was, of course, a suspicion that he had not come by his death fairly, as there was no natural cause to account for death.

Serjeant Shee: In such a case as this, do you enlighten your judgment by all the hearsay evidence you can get?

Witness: I think it right to get all the information I can; but I do not allow my judgment to be influenced in any manner by what I hear. I consider it necessary to obtain all the information I can when I have to investigate a case of this description.

Cross-examination continued: We do not say that the deceased died from the administration of antimony; but we say that he may have died from that cause. I was present at the inquest upon Cook on the 14th of December. I heard Mr. Jones, Dr. Bamford, and Dr. Jones examined; but I am not quite sure whether I heard the evidence given by Newton. I had some of the experiments I have alluded to twenty-three years ago. These are the experiments I refer to in my book. I have made the last experiments since the inquest. I consider the experiments upon these rabbits, coupled with my knowledge of the nature and character of poisons for twenty-five years, to be satisfactory. A rabbit I consider to be an animal calculated for the purpose. I don't very much like operating in this manner with cats or dogs, because I consider it dangerous. I should rather decline trying these experiments with dogs or cats (A. No.) I was aware that the prisoner had purchased strychnine, prussic acid, and Battley's solution, before I made my report, but we did not allow that fact to influence our judgment in the slightest possible degree.

The examination and cross-examination of Dr. Taylor occupied five hours. The chief point which Mr. Serjeant Shee seemed anxious to establish was that Dr. Taylor had varied in his opinion as to the cause of Cook's death. At first he supposed it to be a case of poisoning by doses of strychnine; but now he agreed with all the other medical and scientific witnesses, that the symptoms which preceded death were not such result from strychnine.

Dr. G. Rees, examined by Mr. E. James, Q.C., said: I am a lecturer on materia med ca at Guy's Hospital, and I assisted Dr. Taylor in making the *post-mortem* examination referred to by the gentlemen, and he has most correctly stated the result. I was present during the whole time, and at the discovery of the antimony. I am of opinion that it must have been administered within a few days or a few hours of Mr. Cook's death. I have tests we employ to discover the presence of strychnine. I agree with Dr. Taylor as to the manner in which strychnine acts upon the human frame, and I am of opinion that it may be taken either by accident or design sufficient to destroy life, and no trace of it be found after death. I just present at the experiments made by Dr. Taylor upon the animals and at the endeavour to extract from them the strychnine. We failed to do so in those cases out of four. The symptoms accompanying the deaths of the animals were very similar to those described in the case of Mr. Cook. I have heard the case that has been mentioned in this case, and the symptoms in every one of them are analogous to those in the case of Mr. Cook.

Professor Brande. I am professor of chemistry at the Royal Institution. I was present at one of the analyses. We examined, in the first place, a small portion of copper upon a very weak solution of antimony, and we ascertained there was no action until the solution was slightly acidified by muriatic acid. The antimony was then deposited, and it was very difficult to state positively that that deposit was antimony. The experiment was made for the purpose of testing the accuracy of the test that had already been supplied, and it was perfectly satisfactory.

Professor Christison said: I am a fellow of the Royal College of Physicians, and professor of materia medica to the University of Edinburgh. I am also the author of a work on the subject of poisons, and I have directed a good deal of attention to strychnia. In my opinion it acts by absorption into the blood, and through that upon the nervous system. If strychnine were administered in the form of a pill it might be mixed with other ingredients that would protract the period of its operation. This would be the case if it were mixed with resinous materials, or any materials that were difficult of digestion, and such materials would be within the knowledge of any medical man, and they are frequently used for the purpose of making ordinary pills. Absorption in such a case would not commence until the pill was broken up by the process of digestion. In the present state of our knowledge of the subject I do not think it is possible to fix the precise time when the operation of the poison commences in a human subject. In the case of an animal we take care that it is fasting, and we mix the poison with ingredients that are readily soluble, and every circumstance favourable for the development of the poison. I have seen many cases of tetanus arising from wounds and other causes. The general symptoms of the disorder very nearly resemble each other, and in the natural forms of tetanus the symptoms begin and advance much more slowly, and they prove fatal much more slowly, and there is no intermission in certain forms of natural tetanus. In tetanus from strychnine there are short intermissions. I have heard the evidence of what took place at the Talbot Arms on the 14th and Tuesday, and the result of my experience induces me to come to the conclusion that the symptoms exhibited by the deceased were only attributable to strychnia, or the four poisons containing it. (The witness gave the technical names of the poisons he referred to.) There is no natural disease of which I am acquainted with to which I could refer these symptoms.

The trial was again adjourned at six o'clock until next morning at ten o'clock. Every day it takes us on the former occasions, to the London Coffee-house, in the c.large of the officers of the court.

## TUESDAY.

At ten o'clock this morning the prisoner Palmer was again placed at the bar. On the bench with the learned Judges were the Recorder, Mr. Bicrkman, M.P., Sir J. Bamford, Dr. John Wilson, the Governor of Chelsea Hospital, and the Rev. W. Upton Richards.

Dr. John Jackson said: he was a member of the College of Physicians, and had recently returned from India, where he had practised twenty-five years. He had his attention directed to idiopathic and traumatic tetanus. In England idiopathic tetanus was rare, but not so rare in India. About forty cases of idiopathic tetanus had come under his notice in India. Idiopathic tetanus in India was equally fatal with traumatic, and was frequently found in children, both natives and Europeans. Many occurred in the first month of the third day after birth. It was not unfrequently occasioned by cold in that country. In infants idiopathic tetanus exhibited more marked symptoms of lockjaw than traumatic tetanus. In adults there was no difference in the symptoms from traumatic. He had always seen the disease preceded by premonitory symptoms—as, for instance, a peculiar expression of the countenance, stiffness in the muscles of the throat, and lock-jaw. Idiopathic tetanus usually proved fatal to infants in forty-eight hours in adults, arising from cold, it was of longer duration, and might continue many days, going through the same grades as the traumatic form.

Cross-examined by Serjeant Shee: A patient was always uncomfortable before an attack of idiopathic tetanus came on. He would complain of the muscles of his neck, but his appetite would not be much affected. He might take his food up to within twelve hours of the attack setting in. He never heard a patient complain of want of appetite on such occasions. He had seen a case of idiopathic tetanus in which the first paroxysms were in bed.

By the Attorney-General: In an infant not more than six hours would elapse between the premonitory symptoms and the tetanic convulsions. In an adult from twelve to twenty-four hours would elapse, and sometimes more than that. The period between the tetanic convulsions and death would vary—perhaps from three days to ten. Death in two days he should consider early. That applied to traumatics as well as idiopathic tetanus. He had never seen a case in which the disease ran its course and terminated in death in half-an-hour.

Mr. D. Bergan, chief superintendent of the Stafford police, examined by the Attorney-General, said: he attended before the coroner at Rugeley on Saturday, Dec. 15, he searched the prisoner's house. He found there a diary. It was in a drawer in his surgery. He found other papers in the bed room and other parts of the house. He put them all into one place in the drawing-room. He locked the drawer and put the key in his pocket. On the following day he endeavoured to make a selection from them in the presence of Mr. George Palmer, an attorney at Rugeley, and the brother of the prisoner. Eventually he packed up all the papers and gave up the idea of selection. On the following Tuesday morning he took them all away in a black leather bag and conveyed them to Stafford, where he handed them over to Mr. Hatton, the chief of the county police. The papers were then minutely gone through by Mr. Deane, a solicitor acting for the prosecution. Mr. Deane classified them, and copied a portion of them. They were then left with Mr. Hatton. While he was searching the house he went through the papers and saw what they were. He did not find a cheque purporting to bear the signature of Mr. Weatherby, a racing-agent; nor did he find any paper or document bearing Cook's signature, affecting bills of exchange, with dates, and acknowledging that such bills had been negotiated for the benefit of Cook, and that Palmer had had no benefit from them.

Mr. Henry A. Deane, a solicitor, was called and examined by Mr. James, Q.C. He said he was employed by certain insurance companies to attend the inquest on the body of Anne Palmer, the prisoner's wife. The first time he saw Palmer's papers was at Stafford. They were in the possession of Mr. Burgen, the last witness. The papers were in a black bag, which was unsealed in his presence. He carefully examined the whole of the papers, for the purpose of giving those which were important to the chief superintendent, and of returning those which were immaterial to Mr. George Palmer. He had heard the witness Cheshire examined as to the document Palmer wished him to attest. He found no such documents. He saw Mr. George Palmer take the papers were returned to him.

Cross-examined by Serjeant Shee: The firm with which witness was connected were the solicitors for the Prince of Wales Insurance Company. Inspector Field was employed by him to go to Rugeley. He was at Rugeley part of one day, and at Stafford three or four days. Field did not see Palmer while he was in Staffordshire. He was accompanied by another officer, named Simpson. He told witness that he had seen Palmer. Simpson was first employed by witness on this matter in the first week in October.

By Mr. James: Field was sent down to make inquiries as to the habits and life of Mr. Walter Palmer, of those death the Prince of Wales Insurance-office had shortly before received notice. Also to make inquiries in the circumstances of a person named Bates, on whose life there had been a proposal for the insurance of £25,000.

Mr. J. Espin said he was a solicitor, acting for Mr. Padwick. He produced a bill for £2000, which was put in his hands by Mr. Padwick to get payment from the prisoner Palmer. (This bill was handed to Mr. Strawbridge, the manager of the Rugeley bank. He proved that the drawing and indorsement of the bill were in William Palmer's handwriting, but that the acceptance, purporting to be that of Sarah Palmer, prisoner's mother, was not in her handwriting. This bill was the subject of the action tried by Mr. Justice Erle, a few weeks since, when Palmer admitted in court that his wife, Mrs. Palmer, since deceased, had, in his presence, written his mother's name to the bill.) Palmer paid £1000 off the bill, and on the 20th of Nov. Mr Padwick pressed the prisoner for the remainder. The bill was put into witness's hands for the purpose of enforcing payment; and on the 12th of December judgment against Palmer was signed. On the 12th of November Palmer wrote to Padwick, stating that he sent a cheque for £1000, but he had not sent it. He presented until the 28th, which date it bore. That cheque was not paid. On December 8 Padwick received another cheque from Palmer, for £630. That was not paid. The last cheque was received a few days after the first was dishonoured.

Mr. Serjeant Shee briefly cro-examined the witness, but nothing material was elicited

Mr. William Bamford, surgeon, of Rugeley, was then called, and examined by the Attorney-General: He first saw Cook on Saturday, the 17th of November. On that day Palmer called upon witness, and asked a friend of his, who was lying ill at the Talbot Arms. Palmer said that Mr. Cook had dined with him the day before, and had taken too much champagne. Witness went to see Cook immediately. He found Mr. Cook whether he took too much wine the day before, and he assured him that he had taken only two glasses. Cook was constantly vomiting while witness was with him. Witness prescribed for him effervescing draughts and a six-ounce mixture. On his second visit he prescribed pills for him, but he never saw him take any of them. On the Monday evening he prepared some pills, which he gave to Palmer at the Talbot Arms to give to a servant-maid who was in attendance on Cook. He saw her take them up stairs. Those pills were of the same ingredients as those he had prepared for Cook on the Saturday and Sunday previous. Witness attended Cook on the Tuesday morning. He was going down to see Cook, when he met Palmer, and he asked him whether he had seen Cook? He said he saw him between nine and ten o'clock that morning, and that he had given him for half an hour. Palmer asked witness not to go to see Cook then, and he returned home without seeing him. At a later hour of the day witness was again sent for to see Cook. Witness found Palmer there, and him not to go, as Cook was quiet, and he (Palmer) did not wish to have him disturbed. At seven o'clock Palmer called at witness's house, and requested him to go down to see Cook. Witness went, and saw him for the first time he saw him on Tuesday. He left the inn with Mr. Jones and Mr. Palmer. Palmer said he rather wished Cook to have his pills again, and he said he would walk up to witness's house and get them. Palmer did while witness prepared them. He prepared the pills in his surgery, and Palmer saw him weigh out the ingredients. He had some strychnine in his own private room, but not in his surgery. He put the pills in a box, and wrote on paper, "Night pills—John Parsons Cook, Esq." When first he sent the pills Palmer told him to put a direction on. Nothing more was said either by himself or Palmer about the direction. He never saw Cook alive after that time. Palmer took away the pills after witness had wrapped the box in a separate piece of paper and sealed it. The direction was written upon it. Witness left Palmer at home, and there was nothing written on the box itself. It was about twenty minutes past twelve o'clock at night he saw Cook dead. The body was stretched out as rigid as it could be, and resting on the heels and back of the head. The arms were extended down each side of the body, and his hands were tightly clenched. Witness had given it as his opinion that he died from apoplexy. He filled up a certificate to that effect. Palmer asked him to fill up the certificate. He had the forms in his own possession. Witness told Palmer that as Cook was his patient it was his place to fill up the certificate. Palmer said he wished witness to do it, and he then did it. Witness was present at the *post-mortem* examination. After it was over Palmer said to witness, "We ought not to have let that jar go."

Mr. Thomas Pratt, a solicitor, of Queen-street, May-fair, was examined by Mr. James: He said he knew the prisoner Palmer. Their acquaintance commenced at the latter end of 1853. Witness obtained for him a loan of £1000. That was ultimately paid. That was about the end of November, 1854. In November, 1854, he was employed by Palmer to make a claim upon two policies on the death of Anne Palmer. He sent a cheque for £6000 from the Sun, and £3000 from the Norwich Union. The money was applied in payment of three bills amounting to £3000 or £4000, due on acceptances and loans obtained subsequently. For the loan of £3000; but he did not recollect that he mentioned the purposes for which he required it. Witness cashed it on the bills for £2000, accepted by Sarah Palmer. On the 20th of November the bills were paid, and still had, seven or eight bills—that was, they were held by himself and his clients. Four were held by his clients and four by himself. There were two of these bills overdue in November. The total amount was £12,000, and they all purported to be accepted by Sarah Palmer, prisoner's mother. The bills were to be held over for one month to month, and interest paid. The rates of discount were, with few exceptions, sixty per cent. In November last the interest on the bills standing over was due. He knew Walter Palmer, who died in August, 1855. Witness was instructed by the prisoner to make a claim on the Prince of Wales office for a policy held on his life; the amount claimed was £18,000. Sarah Palmer, whose name was on the bills, was the prisoner's mother, and witness frequently addressed letters to her at Rugeley on the subject of the bills. (These and several other letters were put in and read.) In letters Pratt addressed to Palmer reminded him that the bills which were about falling due must be renewed, as the money could not be obtained from the Prince of Wales office for at least three months. They spoke also of the exertions Pratt had made, and was making, to obtain a settlement of the claim on the Prince of Wales office, and in more than one instance Pratt complained that Palmer did not deliver his answers to answer the letters addressed to him in reference to her acceptances.) Towards the end of October Palmer paid him £250 in part payment of the bills. Witness said he must have further sum of £200 before the following Wednesday. Pratt was represented against Mrs. Palmer, upon which Palmer wrote imploringly for time, adding that he would raise the money at any sacrifice. On the 6th of November he (Mr. Pratt) issued writs against Palmer and his mother. He sent the writs to Mr. Crump, a solicitor at Rugeley. They were sued for £4000. On the 10th of November Palmer called upon him, and paid him £200. With £200 received before, that made £800. Credit was given him for £400, and £200 was taken for interest. Nothing positive was said about further payments, but something was said about his endeavouring to make further advances as soon as possible. On the 19th Palmer called upon him again, and paid him £50 in notes and a cheque, and told him he would receive £450 from Herring through the post. Subsequently he received a cheque from Mr. Herring for £450, which was through his banker. Afterwards he heard from the prisoner that Cook had died, and he promised to remit money the next day. He told witness at the same time that if any one asked him about Cook's affairs he was not to answer any questions before seeing him (Palmer). I received a letter from the prisoner on the 22nd November, informing me that Messrs. Weatherby would forward me a cheque for £75 for payment of the interest on the £1500 bills that were held over. I afterwards received a cheque for £75 on Messrs. Weatherby, but they refused to pay it. I afterwards received a letter from the prisoner headed "strictly private and confidential," in which he requested me not to give any information to any person as to whether Cook had any money transactions with me. I did not know Mr. Cook, but I had a bill of sale executed by him upon the two horses, Polestar and Sirius, in September, 1855. It was security for a loan for £400 upon a bill of exchange that was sent to me by post. There was no drawer's name upon it at that time. The prisoner made all the arrangements about this loan and bill of sale, and I never saw the deceased in the transaction. I advanced a sum of £375 and a wine-warrant upon the bill for £500, and took the bill of sale as security. The prisoner requested me to send the money in a letter addressed to him at Doncaster, and I did so. I sent £800 in bank-notes, and a cheque for £375, but I took the precaution to make out the words "or bearer," so that it would require the indorsement of Mr. Cook before the money could be obtained.

Mr. Stevens was here called, and the cheque for £375 was shown to him, and he identified the indorsement of Mr. Cook's name was a forgery. He always signed his name "J. Parsons Cook."

"J. P. Cook"?

Mr. Strawbridge, the manager of the Rugeley Bank, was called, and having examined all the bills that had been produced, he said: I see the signature, "Sarah Palmer," to the whole of them was forged, and was not the handwriting of the prisoner's mother.

William Cheshire, a clerk in the National Provincial Bank at Rugeley, proved that the cheque for £375 was paid in to the prisoner's account.

Mr. Pratt, cross-examined by Mr. Serjeant Shee: I knew nothing of Cook at the time of the bill transaction. I had at the time a sum of £310 in my hands that belonged to the prisoner. Palmer wanted me to pay £100 more to a person named Sergeant, which I declined to do without further security, and the prisoner then proposed the acceptance of Mr. Cook for £300, and he represented him as a man of respectability and influence. I consented to take the acceptance, and the prisoner thus obtained the £300 that he required. Mr. Cook paid the £300, and I returned him his acceptance. I wrote to him on the 18th of November, reminding him that the £300 bill would become due on the 2nd of December. I addressed the letter to Lutterworth.

Re-examined: The £300 bill became due on the 20th of June. It was not paid on that day, but Mr. Cook duly honoured it.

Mr. John Armstrong, an attorney, practising at Rugeley, said: About the 12th of November last I was employ ed to recover a debt of £90 from the prisoner for a mercer's bill. On the 17th I got instructions for a writ, and on the following day, by direction of the plaintiff, I went to the prisoner's house, and he paid me two £50 notes in satisfaction of the debt. He, at the same time, said he hoped he should not have to pay the costs of the writ.

Mr. John Wallbank, a butcher, at Rugeley, proved that on the 12th of November he was sent for to Palmer's house, and saw him there. The prisoner said to him, "Wallbank, I want you to lend me five-and-twenty pounds." I replied, "Doctor, I am very short of money, but I will try and get it." He replied, "Do, there's a good fellow, and I will give it you again on Saturday morning, as I shall receive some money at Shrewsbury." This was the week before Shrewsbury races. I lent him the money, and he repaid me on the day he had promised.

Mr. John Spilsbury, a farmer, living at Stafford, proved that he had dealings with the prisoner, and in November last Palmer owed him £46 3s. He called upon the prisoner casually on the 27th of November, and he paid him the amount he owed him. He paid him in bank-notes.

Mr. Strawbridge, the bank clerk, was recalled, and he said that on the 19th of November the prisoner had £1,400 in his four. The last payment to the credit of the prisoner's account was made on the 10th of October.

Mr. Herbert Wright, solicitor, at Birmingham, said he had known the prisoner since 1851, and in November, 1855, he was indebted to witness's firm to the amount of £10,460. They had a bill of sale of his property. It was executed by the prisoner. He made various out of advances upon bills of exchange, accepted by Sarah Palmer, and drawn and indorsed by the prisoner. He assigned the whole of his property—race-horses and everything he possessed—as security for the payment of the money. The witness produced bills of exchange to the amount of £8600, bearing the signature of Sarah Palmer. During the month of November he was pressing the prisoner for money, and the money that had been advanced, and in the beginning of December the bill of sale was put in force. Witness was present, but he did not find or take away any papers from the house at Rugeley.

Cross-examined: He should probably not have objected to carry on the bills if the prisoner had paid interest. He never lent any money to Mr. Cook. He saw him, and requested him to lend him some money, but the affair never seemed completion.

By the Attorney-General: These bills were discounted at the rate of 60 per cent per annum. If the prisoner had been able to continue to pay interest at that rate, the bills would probably have been renewed.

Mr. Serjeant Shee said he was then again called, and he said that the acceptances of Sarah Palmer to the whole of the bills produced by the last witnesses were forgeries

The case was then closed.

Mr. Serjeant Shee: We thereby was here called, but that gentleman was not in attendance.

The Attorney-General then intimated that he would put a few questions to Mr. Cook at the opening of the court next day; and he would also examine for a few minutes [illegible] (Mr. Serjeant Shee) would have an [illegible] to the speech [illegible] of evidence.

It was then agreed that the proceedings should be adjourned at [illegible] o'clock.

## WEDNESDAY.

At ten o'clock the prisoner Palmer was again placed at the bar. The proceedings commenced by the counsel for the prosecution calling Mr. Weatherby, the secretary to the Jockey Club, and other persons. Their evidence went mainly to prove that certain bills, cheques and other documents, purporting to be in Cook's handwriting were not signed by him.

Mr. Jeremiah Butler proved that Palmer paid him £40 after Shrewsbury races. He owed him £700, and on the had some cash to receive shortly. He gave him a cheque for £250 on the Rugeley bank, but without having the money. He knew Mr. Cook's horse Polestar. It was worth £700 after it had won the race. It was worth more before the race, in consequence of its engagements.

## RELIGIOUS INTOLERANCE IN AUSTRIA.—A few days since you learnt from your Vienna correspondent reply had been given to the Protestant Consistory when it complained to Government of some of the recent ordinances of the Bishops; and the following further information on the same subject has been communicated. The Government was told that, though the civil authorities could not prevent the publication of such ordinances, they would do all in their power to settle the matter to the satisfaction of all parties. Such a promise seems intended to mean no more than that a separate piece of ground will be allotted to the non-Catholics as a place of burial for their deceased relatives. M. Urban, the Rector of the parish of Matzleinsdorf, a village outside the lines of Vienna, a few days since, refused to permit the body of the parish pall to be used for the corpse of a Protestant. In the very face of such occurrences the Roman Catholic hierarchy boasts of the spirit of toleration by which it is animated, and declares that it has no intention whatever of persecuting Protestants, or depriving any subjects of non-Catholic subjects. A Vienna writer for the *Frankfort Post Zeitung* writes that family vaults in the general cemeteries of Vienna "exist only in the imagination of certain correspondents in Paris, who, being strangers, are the masters of the subject on which they write." The "private graves," as they are here called, are innumerable; the number of regular family vaults is 650 odd, and above 100 of them belong to Protestants.—*Letter from Vienna.*

## LARGE POLYANTHUS.—Mr. Bennington has in his garden at Midsun mer-place, Houselow, in the Staines road, a polyanthus which he has raised from seed three years old, of the following extraordinary dimensions:—Circumference of plant, nearly 6 feet; breadth of leaf, 4 inches; length of stem and truss, 15 inches; circumference of flower-stem, 2½ inches; number of pips in flower and buds inclosed in one truss, 150, all quite distinct to the eye of the observer. The circumference of the flower-stem, 2½ inches.

## THE LATE DR. MAYO.—We have received a letter from the Editor of the ILLUSTRATED LONDON NEWS.—In your notice of the late Dr. Cutterbuck you have assigned to him a date beyond his years. He was, as may be seen [illegible] Jan. 26, 1767. He was consequently not 81 years of age. At his decease he was the Senior Fellow of the Medical Society of London, a distinction which [illegible] I am, Sir, your obedient servant, T. J. PETTIGREW, Osnaw-crescent, Brompton, May 17, 1856.

## STILTON CHEESE.—(*From a Correspondent*).—Dear on the [illegible] inst., Mrs. Pick, Willcote Lodge, Leicestershire, aged ninety-s[illegible]. At this lodge, in early life, Mrs. Pick and her parents were the origina. makers of that far-famed delicacy, "Stilton Cheese." The secret of its make [illegible] came confined to the Pick family, who were under an engagement to [illegible] the cheese they could make to Mr. Cooper Thornhill, innkeeper, of Stilton; and, being true to be obtained of him, it received the name of "Stilton cheese," when it would have been more properly named Wilhcote cheese, being first made in the small village of that name, on the eastern side of Leicestershire. Stilton cheese is now chiefly made in the neighbouring villages: during the late war much of it was sent as presents to the Crimea.

"AND THE PRAYER OF FAITH SHALL SAVE THE SICK."—PAINTED BY J. PHILLIP.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

## PICTURES IN THE ROYAL ACADEMY EXHIBITION, AND IN THE EXHIBITION OF THE FRENCH SCHOOL.

Our Fine Art Illustrations for the present week—three in number—are taken from the Royal Academy Exhibition, and from the third annual exhibition in London of the French School of the Fine Arts.

Our large Illustration is one of four pictures contributed by Mr. John Phillip (Phillip of Spain, as he is called), and to our thinking the best of the four. It represents the interior of a church in Spain, and is entitled "And the prayer of faith shall save the sick." Very seldom indeed has sincerity of religious sure and certain hope been more faithfully depicted. Mark the skilful contrasts in the picture. Observe, also, the well-sustained and well-subdued tone of colour throughout. A young lady not inaptly described it, in our hearing, as "A Cabinet Altarpiece." It is not too much here to repeat of Mr. Phillip that he is one of the few contributors to this year's Exhibition who is seen to have made a gigantic stride in his art. That "Gipsy Water-carrier of Seville" (*No.* 535) might be hung to no disadvantage by the side of the famous "Water-carrier" of Velasquez now at Apsley House.

Since Mr Hook abandoned red-legged Venetians for fishermen on Cromer Sands and shrimpers in Babbacombe Bay, Mr. F. R. Pickersgill is left the leading representative of a particular school of art in this country that never failed to supply pictures that arrested and retained the attention of the well-informed and the uninformed. Young Mr. Pickersgill—for so we must call him to distinguish him from the Academician of the same name—never puts his pallet on his thumb without devoting his best talents and time to what he is about. He is never careless. You see that he never relies on mere unaided genius. Every part is studied. These qualities are particularly observable in the two contributions he has made to the present Exhibition. His subjects he has sought in the best of books in the Bible and in Shakspeare. His Scripture subject is from *St.* Mark—"And He took them up in his arms, put his hands upon them, and blessed them." A great matter indeed to grapple with, and very fervently and feelingly rendered.

The Shakspeare subject is from "Love's Labour's Lost," and is hung as No. 17 in the Great Room. Shakspeare's own words will explain our Engraving:—

*Biron.* Lady, I will commend you to my own heart.
*Rosaline.* Pray you, do my commendations; I will be glad to see it
* * * * *
*Longaville.* I beseech you a word: what is she in the white?
*Boyet.* A woman, sometimes, an you saw her in the light.
* * * * *
Shot by heaven proceed, sweet Cupid.—Act ii.

There is not to our tastes a better picture from Shakspeare than this in the present Exhibition.

Our Illustration from the French Exhibition is "The Water-cart," one

"THE WATER-CART."—PAINTED BY TROYON.—FROM THE LOAN EXHIBITION OF THE FRENCH SCHOOL OF THE FINE ARTS.

"LOVE'S LABOUR'S LOST."—PAINTED BY F. R. PICKERSGILL.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

of five pictures contributed by Constant Troyon, a pupil of Riocreux. M. Troyon received in 1838 the *third*-class medal for landscape; in 1840 the *second*-class medal, and in 1846 and 1848 the *first*-class medal. He has thus worked his way assiduously and deservedly to distinction. In 1849 he was made a Chevalier of the Legion of Honour; and only last year he received, with the approbation of his countrymen, the first-class medal at the Universal Exhibition. As yet M. Troyon is too little known in this country, but his "Applegatherers," his "Landscape with Cattle on the Banks of the Seine," "The Lock," and "Going to Market" will introduce him honourably to all true lovers of landscape-painting in England.

M. Troyon's five works are appropriately hung together, and thus his style may be studied to the best advantage. This arrangement was in force at first in our own Royal Academy, and the plan has much to recommend it. We shall have something more to say about it in the observations we have to make on the French Exhibition and its influence on English art.

## SIR ROBERT PEEL'S POSTHUMOUS MEMOIRS.*

THE circumstances under which these posthumous memoirs of Sir Robert Peel come before us are matter of notoriety with most of our readers. The great statesman, in the midst of the every-day harassing calls of active public life, had time to think of what was due to his reputation and to public opinion after death had severed his connection with the world. There are few statesmen that ever lived who have not, in the course of a long career, done many things calling for explanation or apology, but there is scarcely one who has met the requirement so freely, so unreservedly, as Peel in the revelations now partly before us. True, perhaps, there never has been an instance where a Minister of a constitutional Crown, like Peel, has seen the necessity, in the latter half of his career, of reversing the cherished policy of years upon two great questions of momentous import to the country, who has had the courage to do so, and also the good fortune to maintain a reputation superior to all the hostility and odium which such conduct invariably challenges—on the one hand, from disappointed friends, deserted in their need; on the other, from ancient foes, whom concession has strengthened but not conciliated. Peel did all this in the case of the Catholic Question and of the Corn-laws; and amongst the voluminous papers left behind him the correspondence and notes relating to these questions form the most prominent part. The whole of the numerous MSS. thus preserved as *pièces justificatives* were bequeathed by Peel to Lord Mahon (now Earl Stanhope) and the Right Hon. E. Cardwell, with full power to select for publication what portions they might think proper, "in the full assurance that they will so exercise the discretion given to them that no honourable confidence shall be betrayed, no private feelings be unnecessarily wounded, and no public interests injuriously affected, in consequence of premature or indiscreet publication."

Whatever be said of the qualities of industry and discretion displayed by the editors in the performance of the delicate trust thus reposed in them, they cannot, at any rate, be charged with undue haste in publishing. Nearly six years have elapsed since the great statesman died, and they have only now produced a single volume of 360 pages post octavo, containing memoranda and correspondence relating to a single transaction—that of the Catholic Bill, 1828-9. Two other memoirs—respectively on the subjects of the formation of Peel's "first Ministry, in 1834 and 1835;" and of the settlement of the Corn-law—are announced to follow "after a certain interval in their chronological series." In explanation of the methodical dilatoriness, past and future, in their proceedings the editors state:—

> Considering the perfect order and arrangement a which these and nearly all the other MSS. are found, it would have been easy for the editors to send them to press forthwith. That was not, however, their own opinion of their duty. Where the claims to an enduring renown are such as they are, it may be necessary to catch the popular favour as it flies. But in the case of a truly great statesman his fame has everything to gain, and nothing to lose, by well-considered delay in the publication of his papers. Such delay affords a proof that there are no party or personal motives to subserve: it allows the party spirit in all quarters to subside; it both induces and enables every reader to contemplate every question in a calm historic point of view.

This may all be very true and very sound philosophy; but at the same time, whilst we consider what is due to the dead, we should not forget the living; whilst we consult the claims of posterity and of history, we should not altogether overlook what is due to our own time; and who can be more deeply interested in the motives of a great statesman, involved by circumstances in a tortuous and exceptional policy, than the man who and the public who watched and applauded him? The very interest in such matters, too, except to the inquiring few, is apt to subside with the "party spirit" to which they gave rise; to disappear before the more engrossing claims of each new question of the day. How many, for instance, would at this day read posthumous papers, if such were to turn up, of Marlborough, or Bolingbroke, or Walpole, or Bute, or other statesmen who in their day engrossed the attention and divided the suffrages of the world? and yet there are occasional suppressions, out of consideration for individuals. If the same period elapse before the memoirs of the short and stirring Administration of 1834-5 are published, we shall have to wait another half-century for them; and a continuance of the same reserve would postpone the memoirs on the Corn-law Question for ten years beyond that, each "in their chronological series." Let us hope that this snail's-march measure will not be persevered in.

What can be greater proof of the truth of the remark we have just made as to the evanescent quality of the "party spirit" which forms the life of political struggles than the disappointment which attends the perusal of this volume of memoirs upon the Catholic Question; industriously compiled and preserved by the greatest statesman of our age, and left behind him as a special legacy to his country? In this we write as we feel; we are not afraid to avow our opinion, although we are well aware that there are very many persons who will be disposed to denounce it as presumptuous and irreverent; very many critics who will be prepared to insist that these memoirs are the most valuable additions to historical literature which it would be possible for the most consummate wisdom or the most fertile imagination to supply. We do not deny that there are in the course of them many revelations of the intrigues of party and the conduct of individuals which are important in the interests of truth; neither do we dispute that the full confession of the doubts and fears which distracted the King's Government during a series of years upon this one great question of Catholic Emancipation, of their hesitating and uncertain policy, and of the disingenuous gloss with which they were frequently obliged to conceal their real feelings and apprehensions from Parliament and the country, are without their use. They teach us that there is but one right line of policy in public affairs, and that the straight and the just one; they teach us to think with humility of human justice and human wisdom, when we find, by the confession of one of the most disinterested and upright Ministers that ever lived, that in the case of these Catholic claims the King and the King's Government yielded to terror what they had long withheld, and would still, if they dared, have withheld, upon principle; in teaches us, it should teach all men, to mistrust their own judgment upon existing affairs and prognostics of evil when they find men like Peel and Wellington adopting a policy on such a question which they only considered "a choice of evils," induced by "an abnormal and unhealthy condition of the public mind in Ireland,"—a concession to agitation, as the only means of conciliating a sufficient amount of public support to resist open rebellion.

From a perusal of these memoirs what is plainer than this position, that in all the earlier stages of this question it was never rightly understood by those who had to deal with it; that the ultimate issue to which all their measures tended was up to the very moment of the crisis as a sealed book to them; and that in what was to follow upon that crisis they judged as widely from the truth as at any period of the story?

What was the state of affairs which, in 1828, impelled Wellington and Peel to take up the Catholic claims as a Cabinet question, with a view to settlement? The Seditious Assemblies Act, especially levelled against O'Connell and his confederates, had proved an utter failure, and was about to expire, and the Government, upon the advice of the law officers of the Crown, were afraid to renew it with such amendments as might make it more effective. The Clare election had just taken place—Mr. O'Connell, a Catholic, being returned by a tremendous majority, in spite of all the exertions of the landlords and of the Crown. "A prospect tremendous indeed!" is Peel's observation, echoing the words of Mr. Vesey Fitzgerald. In the natural course of events this one defeat would speedily be followed by others all over the country. "He must be blind indeed to the natural progress of events, and to the influence of example in times of public excitement on the feelings and passions of men, who could cherish the delusive hope that the instrument of political power shivered to atoms in the county of Clare could still be wielded with effect in Cork or Galway." In the midst of all these defeats and pressing dangers, Lord Anglesey, the Lord Lieutenant, was daily conferring with the Government as to the number of constabulary and military available for the repression of outrage, the probability of their remaining staunch, and the reinforcements which might possibly be sent to assist them from England. But Peel saw that the game was "up," and resolved to abandon an untenable position. Is it not lamentable that in so doing he should still have persisted in blinking the natural justice of the case; that for an instant there should not have flashed across his mind a suspicion that his previous policy had been a wrong one, wrong as respects justice and truth; a doubt as to the moral impossibility of a whole people being guilty of treason? But no; he maintained the justice of his old position, but conceded that position upon considerations of physical necessity. His letter to the Duke of Wellington (August 11, 1828), in which he unfolds his views upon the posture of affairs, is a remarkable document in many respects. We extract some of its most striking passages. He states:—

> I have uniformly opposed what is called Catholic Emancipation, and have, resisted my opposition upon broad and uncompromising grounds.
>
> I wish I could say that my views upon the question were materially changed and that I now believed that full concessions to the Roman Catholics could be made either exempt from the dangers which I have apprehended from them, or productive of the full advantages which their advocates anticipate from the grant of them.

He then goes on to say: "It becomes necessary to make your choice between different kinds and different degrees of evil," and "maturely to consider whether it may not be better to encounter every eventual risk of concession than to submit to a certain continuance—or, rather perhaps, the certain aggravation—of existing evils." One circumstance of "overwhelming embarrassment" is, that "the Protestant mind is divided, and nearly balanced" on the question; that "we cannot escape discussion;" that in the Commons a minority of four had been changed to a majority of six on the question; that "the majority of the House of Lords against the principle—looking at the constitution of that majority—is far from satisfactory." Upon the whole he states:—"I am ready, at the hazard of any sacrifice, to maintain the opinion which I now deliberately give—that there is, upon the whole, less of evil in making a decided effort to settle the Catholic Question than in leaving it, as it has been left, an open question." He adds a suggestion, the motive or reasonableness of which we must confess we are at a loss to appreciate:—"I must, at the same time, express a very strong opinion that it would not conduce to the satisfactory adjustment of the question that the charge of it in the House of Commons should be committed to my hands." He would rather give his support to it, and give it "with cordiality," out of office. In a later communication to the Duke (Jan. 12, 1829) he reiterates his request to be allowed to retire from office; adding, however:—

> If my retirement should prove, in your opinion, after the communications which you have had with the King, or with those whom it may be necessary for you to consult, an *insuperable obstacle* to the adoption of the course which, upon the whole, I think the most advisable under all the existing circumstances of the time, in that case you shall command any service that I can render in any capacity.

How slow are the best of us to perceive the advancing steps of "Progress"! Even Peel, with his contempt for the ultra Tories—("I care not," he says, writing to Mr. Gregory, "for the distinction of ultra Tories")—with his nice appreciation of the value of the support of certain "warm friends" of his party; "those warm friends being prosperous country gentlemen, foxhunters, &c., &c.—most excellent men, who will attend one night, but who will not leave their favourite pursuits to sit up till two or three o'clock fighting questions of detail, on which, however, a Government must have a majority;" with this "significant" hint before him, a decided willingness by him, "of the progress of public opinion upon this question," viz.: "that many of the younger members of the House of Commons who had previously taken a part against the Roman Catholic claims followed the example of Mr. Brownlow, and admitted the change of opinion, and that it rarely, if ever, happened that the list of speakers against concession was reinforced by a young member even of ordinary ability:"—with all these various suggestions to influence his judgment, Peel avowed that he conceded this question against his well-grounded conviction of its merits, and under pressure of circumstances which he could not, but would, control.

Another party in this hard-fought and anxious struggle now remains to be mentioned. "The chief difficulty," writes Sir Robert Peel in this Memoir (p. 274), "was the King," who, in a letter dated Nov. 19, 1824, to Mr. Peel, thus expressed himself:—

> The sentiments of the King upon Catholic Emancipation are those of his revered and excellent father: from those sentiments the King never can, and never will, deviate.

George III.'s obstinacy upon this subject is well known; and, certainly, the following passage, in reference to the obstruction which he personally opposed to the progress of the measure, coming from a Minister of the Crown, reads a little odd. Peel writes (p. 60):—

> But in the year 1813 that obstacle to concession which was opposed by the decisive veto of George III. was removed, in consequence of his incapacity for the exercise of the Royal functions, and the appointment of a Regent without restrictions.

To return, however, to the year 1829—to George IV. and his Ministers. The King gave a reluctant assent to the views promulgated by Peel in the letter previously referred to; and in the Royal Speech on opening Parliament (17th January, 1829) the announcement of an intended measure for the improvement of the Catholic Association was made concurrently with a recommendation to "review the laws which impose civil disabilities on his Majesty's Roman Catholic subjects." What follows is so interesting in an historical point of view that we quote the passage at length—the more especially as an erroneous version some of the circumstances has already appeared in a recent publication. After describing his resignation of his seat for the Oxford University, his subsequent rejection, on contest, in favour of Sir R. H. Inglis, and his election for Westbury—thanks to the patronage of Sir Manasseh Lopes—Sir Robert goes on to state:—

> I took my seat on Tuesday, the 3rd of March. We had continued our deliberations in cabinet up to that time, and had agreed with perfect unanimity on the general outline, and indeed on the details, of the several measures to be proposed to Parliament. We acted under the impression that we had the sanction (the reluctant certainly, but still the complete sanction) of the King for our proceedings. Being anxious that there should not be a moment of unnecessary delay, I gave notice on the 3rd of March that I would on Thursday the 5th call the attention of the House of Commons to that part of the Speech from the Throne which related to the state of Ireland, and the removal of the civil disabilities under which the Roman Catholics laboured.
>
> In the interim circumstances wholly unforeseen occurred, which appeared for a time to oppose an insuperable barrier to any further progress with the measures of which the actual notice had been thus given.
>
> On the evening of Tuesday, the 3rd of March, the King commanded the Duke of Wellington, the Lord Chancellor, and myself to attend his Majesty at Windsor at an early hour on the following day. We went there accordingly, and on our arrival were ushered into the presence of the King, who received us with his usual kindness and cordiality. He was grave, and apparently labouring under some anxiety and uneasiness. His Majesty said that we must be fully aware that it had caused him the greatest pain to give his assent to the proposition made to him by his Cabinet that they should be at liberty to offer their collective advice on the Catholic Question, and still greater pain to feel that he had no alternative but to act upon the advice which he had received. His Majesty then observed, that as the question was about to be brought forward in Parliament, he wished to have a previous personal conference with those of his Ministers whom he had summoned on this occasion to attend him, and whom he must regard as chiefly responsible for the advice tendered to him. He said that he desired to receive from us a more complete and detailed explanation of the manner in which we proposed to effect the object we had in view.
>
> Upon this requisition from his Majesty, being probably most familiar with the details of the measure which I had to submit to the House of Commons on the following day, I proceeded to explain them to the King. I observed to his Majesty that the chief impediment to the enjoyment of complete civil privileges by his Roman Catholic subjects was the obligation to make the Declaration against Transubstantiation and to take the Oath of Supremacy as qualifications for such privileges—that we proposed to repeal altogether the Declaration against Transubstantiation, and to modify in the case of the Roman Catholics that part of the Oath of Supremacy which relates to the spiritual and ecclesiastical jurisdiction and superiority of the Pope.
>
> On this reference to the Oath of Supremacy the King seemed much surprised, and said rapidly and earnestly, "What is this? you surely do not mean to alter the ancient Oath of Supremacy!" He appealed to each of his Ministers on this point. We explained to his Majesty that we proposed that to all his subjects, excepting the Roman Catholics, the Oath should be administered in its present form, and that the Roman Catholics should be required to declare on Oath his belief that no foreign Prince or Prelate hath any temporal or civil jurisdiction, power, superiority, or pre-eminence, directly or indirectly within this realm. We added, that if the Roman Catholic was still required, before his admission to office or to Parliament, to declare his belief that no foreign Prelate hath or ought to have any spiritual or ecclesiastical jurisdiction, power, or pre-eminence within the realm, the measure of relief would be unavailing; that an effectual impediment to the enjoyment of civil privileges would remain unremoved.
>
> The King observed, that he that as it might, he could not possibly consent to any alteration of the sacred Oath of Supremacy—that he was exceedingly sorry that there had been any misunderstanding on so essential a point—that he did not blame us on account of that misunderstanding—that he did not mean to imply that in the explanation which we had previously given to him in writing we had been any unnecessary reserve on this point: still the undoubted fact was that he had given his sanction to our proceedings under misapprehension with regard to one particular point, and that a most important one, namely, the alteration of the Oath of Supremacy; and he felt assured that our opinions would be in concurrence with his own—that a sanction so given ought not to be binding upon the Sovereign, and that his Majesty had no alternative but to retract his consent, if the measure to which it had been given under an erroneous impression were *bonâ fide* disapproved of by his deliberate and conscientious judgment.
>
> In answer to this appeal we expressed our deep concern that there had been any misunderstanding on so important a matter, but our entire acquiescence in the King's opinion that his Majesty ought not to be bound by a consent unwarily given to important public measures under a misapprehension of their real character and import. After a short lapse of time his Majesty then said, "But after this explanation of my feelings what course do you propose to take as my Ministers?" He observed that notice had been given of proceedings in the House of Commons for the following day; and addressing himself particularly to me, who had charge of those proceedings, said, "Now, Mr. Peel, tell me what course you propose to take to-morrow." I replied that, with all deference and respect for his Majesty, I could not have a moment's hesitation as to my course—that the Speech from the Throne had justified the universal expectation that the Government intended to propose measures for the complete relief of the Roman Catholics from civil incapacities—that I had vacated the seat for Oxford on the assumption that such measures would be proposed—that the consent of the House of Commons had been given to the Bill for the Suppression of the Roman Catholic Association, if not on the express assurance, at least with the full understanding, that the measure of coercion would be immediately followed by the measure of relief—that I must therefore entreat his Majesty at once to accept my resignation of office, and to permit me on the following day to inform the House of Commons that unforeseen impediments, which would be hereafter explained, prevented the King's servants from proposing to Parliament the measures that had been announced—that I no longer held the seals of the Home Department, and that it was my painful duty to withdraw the notice which had been given in my name.
>
> The King put a similar question to the Duke of Wellington, who replied that he desired to be permitted by his Majesty to retire from office, and to make to the House of Lords an announcement to the same effect with that which I wished to make to the House of Commons. The Chancellor intimated his entire acquiescence in the course which the Duke of Wellington and I proposed to pursue. His Majesty was pleased to express his deep regret that we could not remain in his service consistently with our sense of honour and public duty. His Majesty said, moreover, that he could not be surprised at our decision, or blame us for the conclusion at which we had arrived.
>
> Our interview with his Majesty lasted for the long period of five hours: there was much unrestricted conversation during the whole time, but nothing material passed excepting that the purport of which I have faithfully reported. At the close of the interview the King took leave of us with great composure and great kindness, gave to each of us a salute on each cheek, and accepted our resignation of office, generously expressing his sincere regret at the necessity which compelled us to retire from his service.

A sudden change, however, took place in the King's intention. On the evening of the 4th he wrote to the Duke of Wellington, informing him that he anticipated so much difficulty in forming another Administration, that he could not dispense with the services of his present Ministers, and requested them to remain in office, intimating that, in so doing, they would be "at liberty to proceed with the measures of which notice had been given in Parliament." Both Peel and Wellington, on consultation, thought this, after what had passed, too vague, and a reference was made to the King in the course of the night, which brought full authorisation, in satisfactory form, to proceed with these measures. It was "for the purpose of silencing all cavil on this subject," writes Sir Robert, that in opening these measures on the following evening in the House he commenced his speech with these words:—

> I rise as a Minister of the King, and sustained by the just authority which belongs to that character, to vindicate the advice given to his Majesty by an united Cabinet, &c., &c.

With this we must close. We have endeavoured to give an abstract of the more important historical features in a work which will naturally attract a large share of public attention. Further curiosity upon many matters of temporary and personal interest will be amply satisfied by a reference to the volume itself.

---

CRIMEAN HEROES AT CHATHAM.—To show the great interest which the Queen attaches to everything connected with the late war we may mention that immediately after her last visit to the hospitals at Chatham her Majesty desired that portraits of nine of those men whose cases most attracted her notice should be photographed for the Royal Scrap-book. One hero, Corporal M'Mahon, of the 1st Royal Dragoons, a fine-looking man, who has entirely lost the use of his left arm from a bullet which passed through his breast and shoulder-blade—as reported to have been as brave a man as any in the whole army, a trumpeter in every future hope, and a picked man for every arduous enterprise. Another handsome fellow, with a beard a young Guardsman would envy, John Dryden, of the 11th Hussars, received no less than thirty-one wounds at the memorable charge of the Light Brigade at Balaclava. He was surrounded by Russian lances, and received from them no less than twenty-eight stabs in his arms, side, and back; besides having two severe sabre-cuts on the back of his head, and a frightful gash over the bridge of his nose. He was taken prisoner to Simpheropol, where his wounds were dressed; and, after passing three months in the hospital, he was carried some 1800 miles up the country, where he remained until he was exchanged at Odessa. Three men were photographed in a group, without so much as one leg among them. They seemed very healthy and happy, and occasionally raced together over the brick-yard amid the cheers and acclamations of their comrades. Two of these poor fellows lost their limbs from frost-bite, the third was wounded by the splinters of a shell. One of them, Conner, of the 49th, has received a pair of mechanical legs—a present from her Majesty. With these he can cross the barrack-yard without the aid of a stick; but he finds it rather awkward to recover legs when he trips up. From the appearance of these poor men we may realise the frightful amount of human suffering that has been endured by the crowded wards in the Crimean hospitals. Imagine the case of Thomas M'Kavery of the 68th, who was wounded in the thigh by the fragment of a shell. The doctors say, in this case is a triumph of surgery: a piece of bone five inches in length was sawn out of his hip-bone. The wound is healed up, and, by the aid of a thick-soled boot, the poor man walks; but his wasted face and hollow eyes tell a most sad tale. Amongst rest were two men (O'Brien, of the 42nd Highlanders, and Lockhart, of the 31st) who were shot through the head, and yet are alive and well. In both cases the balls injured the eye and passed out at the back of the neck. The weight of the shot that passed through poor Lockhart's cranium is 18½ oz.—it is about the size of a billiard ball, and the poor fellow shows it with no small degree of triumph. We have had an opportunity of inspecting these photographs, which were taken by Mr. Cundall and Mr. Howlett, of the Photographic Institution in Bond-street, and were much pleased with them. Had we not already presented our readers with so many scenes of the same character, we should have engraved one or two of the group.

The Imperial Russian arms in cast iron taken from over the gates of the arsenal at Sonjouk, in Circassia, have been sent to the Units Service Institution by Capt. Spratt, R.N.

* "Memoirs of the Right Hon. Sir Robert Peel, Bart., M.P., &c., published by the Trustees of his Papers, Lord Mahon (now Earl Stanhope) and the Right Hon. Edward Cardwell, M.P. Part I., the Roman Catholic Question, 1828-9." Murray.

## PLOVERS' EGGS.

AMONGST the delicacies of the table which the present season offers may be enumerated what are commonly termed Plovers' Eggs. Of these great quantities may be seen in the markets and poulterers' shops of the metropolis, to which they are sent from those districts in which the plovers abound. We should, however, observe that the plover in question is neither the Golden Plover (*Charadrius pluvialis*), which breeds in Scotland and Ireland, nor the Grey Plover (*Squatarola cinerea*), which is a winter visitant to our island, breeding in high northern latitudes; but the Lapwing or Pewit (*Vanellus cristatus*), one of our most attractive British birds, and very numerous in its favourite localities. The name of Lapwing (in French *Le Vanneau*) is evidently derived from its easy, flapping mode of flight, on ample and rounded wings, and its grassfully-varied aerial evolutions; while the additional title of Pewit, or Peewet (its ordinary provincial name), is a mere imitation of its reiterated note: in like manner it is called *Dixhuit* by the French.

The localities which the lapwing chiefly affects are hilly moorlands, wild heaths, extensive commons, and marshes or peat-lands; in these situations vast flocks assemble together, and remain from early spring to the close of autumn, each pair attending to their own nest and brood. On the setting in of the cold they retire from the interior of the country towards the open lands near the coast, and along the mouths of rivers, where fresh or saline marshes, fallow lands, and turnip-fields afford them subsistence. Here they disperse themselves as circumstances may require till the pairing season returns, when they wend their way back to their summer haunts. These observations particularly apply to such flocks as tenant our inland moors or heaths, for it must be remembered that the seaboard marshes—such as those of Romney, &c.—have their own colonies, and these remain stationary during the months of winter. On the contrary, as we have ourselves observed, the hilly, bleak moorlands of Derbyshire are deserted by the lapwings during the winter—and for a good reason: it would be impossible for them to find food when the hills are covered with snow, and the intersecting dales are buried beneath the drift. It is true that we miss the lapwing; but, as soon as he snows have melted, and the heather, the bilberry plants, and the broad sheets of wiry cotton-grass make green the mountain side, while yet n secluded hollows the ice-varnished snow lingers, then may the lapwings be seen, at first in small companies, and scattered far and wide, afterwards in greater numbers, uttering their mournful note of "peewet, peewet," as they sail along over the head of the solitary shepherd or adventurous wanderer. At this season, and also in autumn, the flocks wander far abroad, resorting like rooks to distant feeding grounds, and returning in the dusk of evening. Often, while traversing the roads and by-ways of the Peak district, as evening shadows closed around, have we watched the lapwings in columns, sometimes of consider ble length, steadily wending their way over the dark slope of the moor nd range, on their homeward return. But during the pairing season in s ring, the breeding-ground of the lapwing—whether on the hill side, the wid low moorland, or tremulous turf-bog—presents an animated aspect. It is then that they exhibit the most extraordinary powers of wing, darting upwards, sweeping, or indeed apparently tumbling downwards, with abrupt turns, and sudden, unexpected, but most elegant evolutions; during these performances the vibration of the pinions produces a whizzing sound, distinctly audible as the bird flies overhead. It is by the males principally that these aerial displays are made, doubtless by way of recommending themselves to their newly-chosen mates, and under the excitement of exuberant joy; so the Arab youths, aspirants for fame, engage in the mimic combat of the jereed, before the tents of the fair, in order to gain favour by their marvellous skill and address in the management of their fiery steeds.

But the breeding-ground of the lapwing soon presents another scene. To joyful excitement succeeds a period of care. The females have prepared their rude and simple nests—a few stalks of grass or dried rushes or fibres, in some slight depression—and on these are their eggs deposited. Now it is that the males exert themselves by every artifice to draw away the intruder, be it man or dog, from the site of incubation. The female usually sits close, and, when roused up flies low, and to a short distance only, without uttering any cry. Not so the male—he is loudly clamorous, and by various stratagems endeavours to deceive. He dashes wildly about, often sweeping close round the intruder's head, then falling to the ground as if lame or wounded, and, fluttering a few yards before him, puts on such a semblance as would lead him, if unwary, to believe that the capture of the bird was easily within his power. On flutters the bird, strangely eluding the most strenuous efforts to secure it, till, having effected its purpose, it rises on triumphant wings and sails in a wide circle back to its expectant mate. We have seen, on more than one occasion, a lapwing entice a dog to give it chase, fluttering and limping within a few yards of its nose; and thus, after fatiguing the pursuer till fairly out of breath, suddenly rise, and strike it with a smart blow on the nose as it soared away. We have seen it nearly brush the hat of a man with its pinions, and have ourselves all but felt its stroke.

All these articles, however, do not secure the nests of the lapwing. The eggs, as we have said, are delicacies in demand for the table: hence, therefore, they are collected in great numbers by persons well practised in the work, and who, being minutely conversant with the bird's habits, are not to be deceived by its stratagems. It is not to the clamorous and fluttering males, but to the actions of the females, that they chiefly direct their observation; they watch the birds as they steal in alarm from their nest, and, marking the spot, proceed to it, seldom in error as to its precise locality. "So expert (says Mr. Salmon, as quoted by Mr. Yarrell) have some men become that they will not only walk straight towards a nest which may be at a considerable distance, but tell the probable number of eggs it may contain previous to inspection; generally judging of the situation and number of the eggs by the conduct of the female bird, which, when disturbed, leaves its eggs and flies off to a short distance, without uttering any note of alarm." In some districts dogs are trained for the purpose of finding the eggs; and this would appear to be the case in Romney Marsh, whence, as Mr. Yarrell was informed by Dr. Plomley, two hundred dozen of plovers' eggs were sent to Dover in the season of 1839.

It must not, however, be supposed the searchers for plovers' eggs invariably proceed upon either of the two methods above noticed—methods which involve skill and knowledge. On the contrary, the commonplace practice, at least as far as we have seen, is for the children and women of the cottages of the district to disperse themselves over the grounds which the birds frequent, and in which it is known that they breed, and institute a careful search as they quarter the ground, without paying any particular attention to the birds, whether male or female, which their incursion really disturbs.

It may be supposed, from this wholesale spoliation of the nests of the lapwing, that a general decrease in its numbers would, as a matter of course, soon become apparent; but this is not the case, for many nests, each containing four eggs, escape research; and in most cases there is reason to believe that, after the first loss, a second laying takes place. At the same time, as it regards our island generally, there has been during the last century a marked decrease in the numerical ratio of these birds; but this decrease is owing to the advancement of cultivation, to the reclaiming of marshes, wide commons, and turf lands; the chaseous and fallow, which, by inclosure and good husbandry, have been often completely abolished. Speaking from personal knowledge, we are well acquainted with certain tracts which, in our boyhood, were stocked with lapwings, but over which, at the present day, not a single bird is to be seen, except perhaps a straggler. At a period not very distant the lapwing will no doubt become much rarer than it is at present, and the demand for eggs in the market will be chiefly or solely supplied from Holland, the Netherlands, and the wide marshes of the adjacent parts of France. At present, however, the London market receives the greatest proportion of plovers' eggs from the nests of our home-bred birds, especially from the fens, lowlands, and warrens of Lincolnshire, Cambridgeshire, and Norfolk; several districts in Essex, the marsh lands of Kent bordering the Thames and Medway; Romney Marsh, and similar localities along the Kentish seaboard. The season of collecting continues for about six weeks or two months, when the molestation ceases.

With respect to the average number of plovers' eggs annually received by the London dealers during the season, we have no means of coming to any thing like a correct estimate. Every salesman makes his own calculation, and his reason is not within the limits of statistics; but, although no general returns are, or perhaps can be, submitted to the inquirer, observation alone will serve to prove that the numbers are very great—far more so than might be supposed by any one who has not entered into the subject.

The flesh of all the plovers is held in high estimation for juiciness and bird flavour—that of the golden is of epicurean celebrity, while that of the lapwing is but little inferior. Like the golden plover, the lapwing is in season during the autumn and winter, during the months of which the markets are often abundantly supplied, the birds being received not only from our own marshes and fens, but also from Holland and the Netherlands, together with various wild fowl.

We read that at the famous feast of Archbishop Neville, in the reign of Henry IV., a thousand birds called egrittes or egrets were served in due state; and some have supposed that the species known to naturalists as the little egret (*Ardea Garzetta*), was the bird in question; but they have been evidently misled by a mere name. The little egret (and the same observation applies to the great white heron) can scarcely be placed among British birds; indeed, it is of very rare occurrence on the adjacent parts of the Continent—Turkey, Hungary, the confines of Asia, and Northern Africa being its natural localities. On this account, for we cannot suppose that the egret ever did at any previous period habitually tenant our island, we must see if we cannot fix upon some other bird to which the term egret is applicable, and of which a thousand were procurable without much difficulty, while at the same time it was worthy of a place among the viands prepared for a sumptuous banquet. It is with little or no hesitation that we nominate the lapwing as the bird in question. Beautiful in form and colouring, the lapwing is furnished with an egret (*aigrette*) or long occipital crest composed of slender feathers, turning slightly upwards, and capable of being erected or depressed at pleasure: it is, in fact an egretted bird, and one, moreover, which has ever been held in estimation for the excellence of its flesh.

This opinion was first, we believe, advanced by Dr. Fleming, in his "History of British Animals," and was adopted by Mr. Selby, and we hesitate not as to its correctness.

In the "Northumberland Household Book" the lapwing, or peewit, is called Wype, and is placed among the more recherché articles for the table. The term Wype is evidently the same as the Swedish Wipa, or Kowipa, and the Vibe and Kivit of the Danes.

The lapwing appears to have been held in as high estimation by the French in former days as by our own countrymen. Belon, in his "Portraits des Oyseaux," gives the following quatrain under the figure of this bird:—

Voy cy dessus le portraict du Vaneau,
Et le voyant pourra la verue peindre;
Mais si tu veulx d'un bon morceau repaistre,
Il y a peu de meilleurs oyseaux d'eau.

(Behold, above, the Lapwing, drawn with care,
Its portrait will may gratify the eye:
And, should you wish to taste of dainty fare,
Scarce better bird o'er watery marsh doth fly.)

Like the plovers generally, the lapwing feeds on worms, slugs, insects, and their larvæ, especially such as tenant humid, oozy places, and fresh or saline marshes, fallow lands, &c. In the search of worms it displays considerable address. Many it catches when they are wholly above the surface, others it seizes by the exposed end, while the rest is buried in the ground, and either draws them forth, or by its sharp pinch occasions them to writhe and emerge altogether. Dr. Latham says—"I have seen this bird approach a worm-cast, turn it aside, and, after walking two or three times about it, by way of giving motion to the ground, the worm come out, and the watchful bird seizing hold of it draws it forth." It has indeed been asserted by some that the lapwing will beat the ground with its feet, so as to alarm the worm and induce it to make its appearance; but to this we yield no credence. No bird treads more lightly than the lapwing: its object is to surprise its prey, nor do we believe it to be capable of stamping with sufficient force so as to jar the miry or wet ground even in the slightest degree. This observation applies to Dr. Latham's supposition that by walking round the worm-cast it shakes the ground. The truth is that, after the mouth of its hole is disturbed, the worm becomes restless, creeps out, and is immediately seized.

From its beauty, the gracefulness of its actions, and its utility in destroying slugs and insects in their various stages, the lapwing is frequently kept in gardens, and will often become very familiar. It is amusing to watch it tripping over a dewy lawn or grassplot, ever and anon suddenly stopping in its course, attracted perhaps by some fresh worm-cast, or by the quick plunge of a worm into its retreat. Under these circumstances the bird requires protection, and a supply of food during the winter, especially if the ground be frozen. It will feed on finely-minced or scraped beef.

The lapwing is spread over the whole of Europe, and, as it would appear, of Asia also; it is found in India, on the plains between the Black and Caspian seas, in Japan, China, &c. Nor is it wanting in Africa, as Mr. Gould states that he has seen it in collections from the latter country. On the Continent it would appear to be far more decidedly migratory than in our island, for it is noted by Messrs. Dixon and Ross as occurring in great numbers near Erzeroum, where it arrives towards the end of March, departing at the close of November. In like manner it is a summer visitant to the borders of the River Karaun, or northern branch of the Euphrates, where its frequents swampy fields; and where another species of Vanellus and two of *Charadrius* (*Morinellus* and *M ver*) were also seen."—*Proceeds. Zool. Soc.*, 1839.

The natural number of eggs laid by the lapwing is four—their ground-colour is dull green, mixed, speckled, and marked with blackish brown. But when the nest is robbed, the bird goes on laying, in order to make up the proper complement; hence the nest-seekers generally, we believe, suffer one egg to remain untouched, by way of inducing the bird to continue laying, till the last clearance is effected. When boiled, the white or albumen of the plover's egg becomes nearly transparent, and presents a tinge of blue.

The young when hatched are covered with down of an ochreous yellow mixed with brown. They run about under the assiduous care of their parents, who conduct them to soft and humid spots where food is easily obtained.

The colouring of the plumage of the lapwing is very beautiful, especially that of the male in his nuptial attire, when the black of the breast and throat is a very deep and glossy; and the dark glossy green of the upper surface becomes extremely brilliant. The sides of the neck, the under surface generally, and the base of the tail are pure white; the latter being largely terminated with black; but the outside feather on each side is almost entirely white, upper tail coverts, chestnut; under tail coverts, fawn colour. Total length, thirteen inches, expanse of wings, two feet six inches.

Accidental varieties of a pure white sometimes occur, and also of yellowish white, with faint indications of deeper markings.

Our Illustration is copied, by permission, from Mr. Gould's magnificent work on the Birds of Europe. W. M.

## ADDISON'S WRITING-TABLE.

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

IN your remarks on the sale of the works of art, &c., forming the collection of the late Mr. Rogers, you observe, in speaking of Addison's Writing-table, that "Addison's only child, who lived to a great age, gave this very table to Sir Thomas Lawrence." This statement is not correct. Sir Thomas Lawrence first visited Rugby, the adjoining parish to Bilton, in the latter part of the year 1797, to attend the funeral of his father, Mr. Thomas Lawrence, who died at the residence of the Rev. R. R. Bloxam, D.D., who had married the youngest sister of Sir Thomas Lawrence. Miss Addison died at Bilton Hall, in the month of March previous, and Sir Thomas Lawrence was neither personally acquainted with her nor had ever seen her. After Miss Addison's death the library and medals at Bilton Hall, collected by Addison, were removed to London and sold; but the furniture at Bilton Hall, much of which had belonged to Addison, was not sold till the month of March, 1826. This was twenty-eight years after Miss Addison's death. At this sale I purchased Addison's writing-table. There were then living at Rugby and Bilton several persons who had been acquainted with Miss Addison, and some of these were able to verify the table in question as one Miss Addison used to speak of as a favourite writing-table of her father, and having been used by him in writing papers for the *Spectator*, &c. A clergyman, living at Rugby at the time of Miss Addison's death, the Rev. J. H. C. Moor, late Vicar of Coventry, Dunsmoreland, and on that occasion the overlooking of the papers at Bilton Hall. He informed me he found amongst them several of the original draughts of papers intended for the *Spectator* with alterations and corrections in Addison's handwriting. Soon after I had purchased the writing-table of the poet, Sir Thomas Lawrence was informed of the fact, and evinced an earnest desire to possess it, I was under deep obligations to him for many acts of kindness conferred by him upon me, and the only mode by which I could show my gratitude was by presenting the writing-table to him. I should not otherwise have parted with it.

Rugby. MATTHEW HOLBECHE BLOXAM.

DESTRUCTIVE INUNDATIONS.—The French journals give distressing accounts of the inundations caused by the late rains, though they agree in stating that an improvement had taken place in the weather, all that the various rivers were beginning to subside, although slowly. On Saturday last the Seine marked five metres above the ordinary level. The works of the lock near the Mint were under water, and the tops of the piers at the Ponts d'Austerlitz, Notre Dame, Saint Michel, and des Saints-Pères, had disappeared. Above Paris a part of the plain of Ivry was inundated.

MARRIAGE OF DUMAS' DAUGHTER.—Mdlle. DUMAS, daughter of M. Alexandre Dumas, was married on Thursday last, at St. Philippe du Roule, to M. Pierre [illegible], a gentleman connected with the diplomatic world. A great number of distinguished personages were present on the occasion, and amongst the celebrated names, Roger, of the Grand Opéra, sang the "O Salutaris." It is said that M. A. Dumas, junior, placed the sum of 25,000f. in his sister's *corbeille*.

## EPITOME OF NEWS—FOREIGN AND DOMESTIC.

A special general Court was held at the Trinity House on Monday last, at which his Royal Highness Prince Albert was unanimously re-elected Master of that ancient Corporation for the ensuing year.

Prince Frederic William of Prussia arrived at Dover on Tuesday night, from Ostend. Count Bernstorf, Prussian Minister, and Colonel Seymour, received the Prince on his landing.

The King of Prussia was prevented by a slight indisposition from going to meet the Empress Dowager of Russia last week. She was received at the frontier by Colonel Mantouffel and the members of the Russian Embassy.

The 16th of June is spoken of at Paris as the day upon which the baptism of the Imperial Prince will take place. An article of law granting 400,000 francs towards the expenses has been adopted by the Legislative Body.

The coronation of the Emperor Alexander is fixed for the 24th of August. It will be in conformity with the preceding ceremonial of the same nature.

Mr. Gibbs, the tutor of the Prince of Wales, and who has hitherto had the charge also of Prince Alfred, will, for the future, be an attaché exclusively of the heir apparent.

The Grand Duke Maximilian of Austria arrived at Paris on the 15th inst. He was received at the railway station by Prince Napoleon, and immediately proceeded to St. Cloud, where he was received by their Majesties with all the honours due to a crowned head.

King Ferdinand of Portugal left Seville for Gibraltar on the 15th inst.

The banquets usually given on the day set apart for the celebration of her Majesty's birthday by the great officers of state will take place this year on Saturday next, the 31st inst., so as not to interfere with the outdoor rejoicings appointed for the 26th inst.

The King of Naples is preparing a written justification of his policy, to be issued in the form of a letter to the Austrian Government.

The Duke of Cambridge has consented to preside at the anniversary festival of the Royal Caledonian Asylum, to be held at the Freemasons' Tavern on the 3rd of June.

Prince Napoleon's visit to Stockholm is said to be connected with drawing upon the hand of Princess Charlotte Eugenia, daughter of the King, and sixteen years of age. This union, and that of Prince Oscar with a member of our own Royal family, will, it is thought, quiet the fears of many as to the future of the kingdom of Sweden.

Earl Granville was the nobleman selected by her Majesty to dance with the Princess Royal in the first quadrille after supper at the State Ball last week. The noble Earl, as Lord President, enjoys a precedence above that of Dukes.

The Pope entered his sixty-fifth year on Tuesday last.

Prince Metternich entered his eighty-third year on the 15th inst. Next month the veteran diplomatist will take up his residence at a beautiful villa at Johannisberg, upon the Rhine.

The Premier, who never enjoyed better health, arrived in town on Friday, from Broadlands; attended the Cabinet Council on Saturday, at the Foreign-office; and went to Brocket-hall, Herts, in the evening, whence he returned to London on Monday morning, to be present at the bidding for the loan.

It has been determined that Lord Granville, the President of the Council, shall proceed upon an extraordinary mission to St. Petersburg on the occasion of the Emperor of Russia's coronation.

Baron de Brunnow has presented to Louis Napoleon a letter from the Emperor of Russia, which also edits him on an "extraordinary mission" to his Imperial Majesty.

The King of Prussia, it is said, has invited Napoleon III. to visit Berlin this summer, and meet there the Emperor Alexander and Ferdinand Joseph.

The Queen of Spain has ordered the Count de Altamira, grand equerry, to go to Seville, to invite the King, ex-Regent of Portugal, to visit her at Madrid.

Count Rudolph d'Appony, the newly-appointed Minister from Austria to the Court of St. James's, accompanied by the Countess d'Appony and family, arrived at Claridge's House at the close of last week from Vienna, to enter on his diplomatic functions.

The Duke of Brunswick has left his dominions on a tour to Vienna, Venice, Rome, and Naples.

The Duchess d'Orleans has left her residence at Eisenach for Soden, in Nassau, where she intends to pass some weeks in drinking the waters.

The Ambassador of Turkey and Madame Musurus gave a grand dinner on Monday last at the residence of the Ottoman Embassy, in Bryanston-square, to his Highness the Grand Vizier of Turkey.

The Countess Walewska, wife of the French Minister for Foreign Affairs, has received from the Queen of Spain the Cordon of the Order of the Noble Ladies of Maria Luisa.

The Marquis Pas de Villamarina, Sardinian Ambassador at Paris, has been raised by the King of Sardinia to the rank of senator.

General Chesney and Mr. W. P. Andrew had an interview with H. H. Asli Pacha, Grand Vizier, on Saturday last, at Claridge's Hotel, regarding the Euphrates Valley route to India.

The refusal of the Grand Duke of Tuscany to conclude a new concordat with the Pope is reviving his popularity at Florence.

The Abbé Coquereau, who accompanied the Prince de Joinville to St. Helena to bring home the remains of Napoleon I., has been summoned to Bordeaux, to await the arrival of the Legate who is to hold the Imperial Prince at the font.

The steam-corvette the *Reine Hortense* has been placed at the orders of Prince Napoleon, for his voyage of scientific exploration in the North Sea, which will extend as far as Spitzbergen.

The Crown, in compliance with a memorial signed by creditors of the late John Sadleir, representing debts to the extent of £250,000, has agreed to appoint Mr. Anthony Norris, of Bedford-row, London, as administrator for collecting the assets of the deceased.

Austria is about to offer to the Emperor Napoleon the ashes of the Duke de Reichstadt for interment beside his father in the Invalides.

Prince Oscar of Sweden arrived in Paris on Monday. He was received at the terminus with all the honours due to his rank, and went in the evening to St. Cloud.

Mr. Mechi, of Leadenhall-street and Regent-street, has made arrangements for allowing his assistants a half-holiday on alternate Saturdays, the services of an equal number being dispensed with on each Saturday throughout the year.

Excursion trips to St. Petersburg, 12*l* per head, are being organised in Paris.

The *Times* contradicts on authority an Indian rumour of the intention of the Court of Directors to annex Hyderabad in the Deccan.

A proposition, originating with M. Charles Dupin, is before the French Senate, providing for the erection in Paris of an immense column, surmounted by a statue of the Emperor, as a memorial to the army of the East.

The Greek Government protests against the indefinite occupation of Greece, as intimated in the Conferences.

James Murphy and Thomas Dunn, who were convicted at the late special commission of being concerned in the murder of Miss Hinds, were executed at Cavan on the 16th inst.

In consequence of the extent to which emigration is going on in certain parts of Belgium, public notices have been issued by the governors of provinces embodying a caution, and containing advice to those leaving their country.

Owing to the continued demand for silver for India, the total amount of specie and bullion shipped on board the *Peru*, which left Southampton on Monday for Alexandria, was £530,242.

It is said that the Crédit Mobilier is about to lend 20,000,000 reals to the Spanish Government.

The boiler of the steamer *Nimrod*, from Liverpool, lying at Cork Quay, burst on Monday morning, and killed two engineers and four firemen.

The Swedish Consuls resident in Marseilles, Toulon, and Havre, will undertake the functions of Russian Consuls until the Government is able to complete its appointments of Russian Consuls at those places.

The spring fleet from the north of Scotland for Canada has taken out above 1000 passengers to Canada this season. Most of them are agricultural labourers and small farmers, whose friends, having gone out before, encourage others to follow.

Two workmen lost their lives at the Thirtwood Colliery, Gloucestershire, last week. One by rashly going into a pit full of foul air, and in his second endeavouring to rescue him.

Various extravagant lottery and railway schemes having been lately announced in the French papers, a notice has been sent by the Minister of the Interior to the various editors to pay the greatest attention to such insertions, and only to publish the same after due inquiry as to their correctness.

PROGRESS OF THE GREAT SHIP, BUILDING AT MILLWALL, FOR THE EASTERN STEAM NAVIGATION COMPANY.

## PROGRESS OF THE GREAT SHIP NOW BUILDING FOR THE EASTERN STEAM NAVIGATION COMPANY.

THE progress of this leviathan vessel excites interest akin to that of the Thames Tunnel, a wonder of the same locality. As you steam down the river, many are the objects on the banks to arrest your attention; and, although the domes of Greenwich Hospital are still striking objects, the chief attraction is "the big ship" now to be seen in progress of construction in the building-yard of Messrs. Scott Russell and Co., in Millwall, or the Isle of Dogs.

From the point of view chosen by our Artist for his Illustration, the appearance of the ship, stretching over long rows of buildings, is most extraordinary; and, great as is its present length, the vessel is still growing at both the head and stern, it requiring 60 feet at one end and 70 feet at the other—in all 130 feet to complete the work.

On entering Messrs. Scott Russell and Co.'s shipyard, the proportions of the ship are seen to great advantage, the form being to a great extent kept free from the forest of poles which form the stages used in ordinary shipbuilding. In the present instance the four poles, &c., used are rigged with ropes and stanchions composed of the best materials. A gang of riggers, under the direction of a boat swain, are constantly employed in looking after this part of the work; and so good has been the effect of this care, that up to the present time only one accident (and that arising from carelessness) has happened.

It is by no means a short walk round the ship, as may be readily conceived by the circumstance that when the vessel is completed there will be a promenade round the deck of *upwards of a quarter of a mile*. On looking at the solid form of iron before us, containing about 7000 tons, one cannot help ruminating on the immense labour of raising it from the bowels of the earth—in smelting—shaping the plates, and carrying it from Yorkshire to the present spot.

When we learn that this great ship is to be six times the size of the *Duke of Wellington* war-vessel, that it will be 18,500 tons register and 23,000 tons builder's measure; 680 feet long, 83 feet broad; depth from deck to keel, 58 feet; nominal horse power—screw, 1000 horses; paddles, 1000 horses, which could be worked up to 10,000 horse-power; the draught of water-loaded, 28 feet; light, 13 feet; and that it will carry of first-class passengers 600, second-class passengers 1800 in all 2400 and troops with field equipments 10,000—we look with wonder, and inquire if the builders have not been guilty of similar oversight to that made by the far-famed Robinson Crusoe in the matter of his boat? This, however, has been carefully considered by Mr. I. K. Brunel, whose plan is to place under the vessel two launches 80 feet by 40 feet, at 140 feet apart; the launches will communicate with an inclined plane leading to the river, to which the great ship will be run sideways to the water-mark, and then allowed to float. By this method there will be a portion of the ship (140 feet) left entirely depending on the strength of the construction for support.

Having reached the deck of the ship, we perceive that it is tubular, after the plan of the Britannia bridge; and it is formed of two half-inch plates at the bottom and two half-inch plates at the top, between which are webs which run the whole length of the ship. The centre of the vessel is divided into eleven water-tight compartments. The part below the water line is provided with longitudinal cells, held together in the same manner as the parts above; in fact, the construction consists of two ships—a large one and a still larger. Descending from the deck is a considerable space, which will be covered, and made available as a promenade for the passengers when the weather is too bad to enable them to remain on deck; below this is a saloon 80 feet long, 36 feet wide, and 15 feet high; from this passages lead to the sleeping-berths, each 10 feet by 6½ feet, 7½ feet high and which are well lighted and ventilated. There are fourteen of these bedrooms on each side of the saloon; and the vessel consisting of three decks, we have eighty-four of these apartments in each division of the ship, which is distinctly separated from the other compartments. Down in the depths of the ship, so deep that a feeling of dizziness is caused by looking down, are the boilers, of which there will be ten: some are fixed; indeed, 120 feet is entirely completed with the exception of the fittings of the cabins. There is also room for 10,000 tons of coals.

Notwithstanding the large amount of the steam force provided, the ship will be provided with six masts; there will be twenty ports on the lower deck, each five feet square, to receive railway waggons. She will also have sixty ports, two feet six inches square, for ventilation; and an abundance of dead-lights. The lower ports will be ten feet above the water when the ship is loaded. At the stern will be provided the means of keeping various animals—cows, sheep, poultry; in fact, a regular farm-yard. We noticed fire-buckets here and there, all filled and ready for instant use; for, although the chief part of the materials require no such precaution, and the woodwork is rendered incombustible by Lieutenant Jackson's process, still the occasional dropping of a hot rivet amongst the shavings below renders this precaution necessary.

It is hoped that in twelve months this wonderful work will be ready to test the possibility of steam conveyance to Australia and other distant parts.

The following details are from the new number of the *Quarterly Review*:—

It is said that ten water-tight bulk-heads, 60 feet apart, divide this leviathan ship transversely; whilst two longitudinally iron walls, 36 feet apart, traverse 350 feet of her length. If we could take Mivart's Hotel, and drop it into one of these; take Farrance's and drop it into the second; take Morley's, at Charing-cross, and fit it into the third; and adjust the Great Western Hotel, at Paddington, and the Great Northern, at King's-cross, into compartments four and five, we should get some faint idea of the accommodation to be afforded. Each compartment will be a distinct hotel, with its splendid saloons, upper and lower, of 60 feet in length, its bedrooms, its kitchen, and its bar. The "big shut" is destined, be it remembered, to carry 800 first-class, 2000 second-class, and 1200 third-class passengers, making a total of 4000 guests, independently of the crew. The total length of the vessel will be 692 feet. To make the capacity of these figures better understood, it may be stated that neither Grosvenor nor Belgrave square could take the *Great Eastern* in; Berkeley-square would barely admit her, and when rigged her mizen-boom would project some distance up Davies-street, whilst her bowsprit, if she had one, would hang a long way over the Marquis of Lansdowne's garden. She is the eighth of a mile in length, and consequently four turns up and down her deck would afford the passengers a walk of a mile. Her width is 83 feet, the width of Pall-mall across her paddle-boxes her breadth is 114 feet; and if she had to steam up Portland-place she would scrape the houses on each side. This floating town will be propelled by three powers—paddle, screw, and sail. Her paddle-wheels, fifty-six feet in diameter, or considerably larger than the circus at Astley's, will be propelled by four engines. The screw is twenty-four feet in diameter, and the four fans remind the spectator of the blade-bones of some huge antediluvian monster. Its shaft is 160 feet in length, and weighs sixty tons. Thus the ship will be pulled and pushed in its course like an invalid in a Bath chair and sails will only be used with a strong wind in the direction of her course—say a breeze going twenty-five miles per hour, for which she is prepared with seven masts and 6500 square yards of canvas. As speaking-trumpets would be useless aboard a vessel of the dimensions of the *Great Eastern*, a semaphore will be used to signal to the helmsman by day, and a system of coloured lights by night. The engineer will be communicated with by the electric telegraph. A standard compass will be placed upon a stage forty feet in height, and the helmsman will either read off the points through a transparent card, illuminated like a clock front, or the shadow of the needle will be projected down a long tube upon a card below, so as to avoid the necessity of the helmsman looking up, and to obviate the difficulty which would be felt in fogs. Her ten anchors will weigh 55 tons; her 800 fathoms of chain cable 96 tons; and her capstan and warps, 100 tons total, 25 tons of appliances for making her fast. Gas will be manufactured on board, and laid on to all parts of the ship, and the electric light will be fixed at the masthead. The operation of launching will be as great a novelty as the vessel herself. Notwithstanding that her weight, when that moment arrives, will be no less than 12,000 tons, she is to enter the water broadside on, by means of an inclined plane, which is the reason why she is building parallel to the river.

It may be interesting to add a few details of the spot upon which this stupendous vessel is being built. The Isle of Dogs, a place which most Londoners have heard of, is however—although already a scene of busy industry—a place which has been but little visited except by those whose employment renders it convenient for them to dwell on the island, as it is called, and a small number who may be brought by curiosity or otherwise to this curious spot.

Having reached the Blackwall Railway station, and taking a peep, as we always do if time allows when in this direction, at the crowds of famous vessels and busy people from various lands who congregate in the East India Docks, we take a westerly direction; and, being provided with a map, we see by it that the Isle of Dogs is a large piece of land of a horse-shoe shape, surrounded by those parts of the Thames called Blackwall Reach, Greenwich Reach, and Limehouse Reach. The west part of the *horse-shoe* is intersected by two cuttings—one at the entrance of the West India Import and Export Docks, and the other the City Canal; those forming two water roads across the island, there are also the Blackwall road, and the Deptford and Greenwich road, leading to a ferry. Part of the district is seven feet lower than the level of the Thames, and some more of it level with high water mark. Our map, being seven or eight years old, shows no houses on the centre of the island, except a place called Chapel-house.

Thus informed we travel on, remarking the curious old carving of about the time of James I. which is above the entrance to Wigram's ship-building yard, and some quaint looking houses with ornaments on them, which were probably in existence at the time when Queen Elizabeth progressed to Tilbury Fort. A sight of these remains of other days suggests many a thought of the changes in our commercial arrangements since that time. Crossing the bridge over the entrance to the West India Docks, and that over the City Canal, many persons will be surprised at the primitive appearance of the toll-gate which is placed at the entrance of the island. From here the embanked wall of the Thames—that wonderful work—is distinctly visible now, built on almost every portion either on or against it, with various shipbuilding yards and manufactories. The spire of the church, and houses of Cubitt Town, and the beginning of the buildings in its neighbourhood, give some idea of what will be the ultimate value of this site. The spot at night-time must be very lonely, in the middle of the marsh—the lights of the steamers, &c., passing along like will-o'-the-wisps in the distance

RECEPTION OF THE NEW GOVERNOR (KENNEDY) OF WESTERN AUSTRALIA.

## WESTERN AUSTRALIA.

EVERY portion of the Australian continent possesses more or less of interest to the people of Great Britain. Few families of the middle class can be found in England of which one or more members have not emigrated to Australia, and among the working class emigration has been going on, not of individuals, but of whole families; so great has been the attraction of the fields of gold in the eastern and southern districts of New Holland. Of those flourishing colonies almost daily accounts are looked for and received in the mother country. There is, however, one part of Australia of which, beyond its own limits, comparatively little is known, namely, the settlement on the western coast. Colonised in 1829, on a large scale, and puffed beyond all reason, Western Australia, a few years after its settlement, was looked upon as a bubble that had burst; and, as it sunk in public estimation in England, so did the difficulties of the early settlers increase, until convicts were sent thither to assist the colonists, both by carrying out useful public works, and by the expenditure in the colony necessary for their maintenance. The country is now on the point of yielding corn enough for the wants of its own people—a point of prosperity, from whatever cause, not hitherto attained; and this, too, strange to say, in a land where the earth yields her increase with the greatest rapidity and ease. With such advantages, it is matter of regret that Western Australia has not become a corn growing country, exporting her surplus grain to the sister colonies, and in return receiving a share of their golden harvest. Nor is it cereals alone which flourish in this district. It might also become a wine-growing country—the vine grows most luxuriantly, and produces grapes of the largest size in bunches often of five and six pounds weight. The olive is another tree the growth of which in Western Australia is remarkable, comparing it with that in the south of Europe. In the former the tree bears fruit in about seven years; while in the latter it has become a proverb that a man plants the olive, not for himself, but for his grandchildren. The fig-tree flourishes equally well with the vine. The sugar-cane also has been introduced, and might be largely cultivated, and with great advantage. Western Australia also abounds in the best of timber—the jarrah, or native mahogany—for a quantity of which a contract has recently been taken to supply sleepers for the Adelaide Railway, a purpose for which it is remarkably adapted, as experience has proved that it may continue for years under water, or imbedded in the earth, without exhibiting the smallest sign of decay. The white ant, so destructive of softer woods, will not touch it; it also resists the attacks of the *teredo navalis*, and is, therefore, invaluable for shipbuilding. Although not equalling in beauty the finest Honduras mahogany, it far surpasses much of that used for furniture in England. In minerals, if Western Australia be not so fruitful as its neighbours, there is nevertheless plenty of iron-stone and lead: the latter being at present worked by a local company. Coal, also, has been discovered in one part of the colony, but has not yet been worked. The coasts of Western Australia abound with whales, and the fishery is being carried on, and is gradually increasing in extent. After many years of difficulty and depression, both agriculturists and traders are thriving. Men with capital emigrating to the colony, concurrently with labouring men, would be amply repaid for their outlay. The population of Western Australia numbers about 19,000,

PERTH, WESTERN AUSTRALIA, FROM MOUNT ELIZA.

not including the aborigines. The principal towns are Fremantle, the chief port of the colony at the mouth of the River Swan, with a population of about 3000; and Perth, the seat of Government, situated twelve miles up that river, and containing also about 3000 inhabitants. In climate it is the most favoured of the Australian colonies, being less subject to the hot winds which prevail during the summer in Victoria and South Australia. Its salubrity is attested by the health of its inhabitants and the absence of epidemic disorders. In addition to its many natural advantages, Western Australia has recently received an accession of strength and vigour in the person of Governor Kennedy, so well known by his activity and humanity in exposing the maladministration of the Poor-law in the Kilrush Union during the famine in Ireland, and whose able and energetic administration of the Government of Sierra Leone has been highly appreciated

We have engraved the scene of the reception given to the new Governor on his landing in November last. We also engrave a general view of Perth, the seat of the Government.

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*A little chink may let in much light.*"—OLD PROVERB.

### NOTES FROM THE MS. MEMORANDA BOOKS OF THE REV. SIR RICHARD KAYE, BART., DEAN OF LINCOLN.

STEELE AND ADDISON.—Lord Bath or Granville) said that Steele and Addison were excellent companions—the one at the beginning of the evening, the other at the latter end, for by the time that Steele had drunk himself down Addison had drunk himself up

THE DUCHESS OF NEWCASTLE, wife of John, used to receive the ladies in her bedchamber, then go to sit at dinner with the gentlemen, but eat nothing. When the cloth was drawn she returned to the ladies, and dined with them upon the dishes which came from the gentlemen's table.

WILKES.—One day Wilkes came to Dr. Turton and desired to speak with him. He was shaving. Wilkes desired he might come up but for five minutes. During the time General Tatton came in, and the Doctor desired his brother to rid him of Wilkes, it might spoil his preferment. The General asked Wilkes if it was anything he could do, as his brother could not then see him. Wilkes said it was very odd he could not see him, he only wanted to ask him if he might not take the bark. The General then said he fancied he meant to call upon Dr. Turton. Wilkes said he did, and went away.

LORD NORTH.—Lord North generally sleeps as soon as he gets into a chair. He has a lowering countenance when out of spirits, his brows are rough and his eyes dim, and he is inattentive to everything about him, probably intense thought within. The King says he knows whether Lord North is in spirits from his first appearance, before he has well made his bow.

Dean Brailsford Rector of Kirkby left very minute and accurate accounts of the value and rights of the Deanery of Wells, which are in Dr. Harris's possession He lived with his coachman and coachman's wife, was not satisfied till his pockets were filled with money, and was then careless how it went. He used to stop his carriage and tell his coachman to make a back, upon which he wrote lest he should forget his thought before he got home

The Lords may summon Lord Bristol in cases of breach of privilege. They have done so and require his being in his place. If the Usher of the Black Rod returns that he is not in the kingdom, they send their summons to the ambassador who may serve him with it, and he is bound to obey the authority of Parliament in any country. If he comes to England he either appears or is lodged in the Tower. When he appears, an y *Lord* may ask him questions upon his honour, which may make him and the Duchess tremble. If he prevaricates it must be taken against him: equity justifies and demands this, whether he receive any sum bet ween £10,000 and £14,000, without specifying for why. Some witnesses will probably appear who will bring a most horrid scene to light.

One day Lord Gower met the Duke of Grafton in the street. He said Lord Gower could not guess where he had been walking to. He has been to see Mr. Wilkes in the Tower. Lord Gower said your Grace is a man of too much rank and consequence in this country not to repent of this walk hereafter

Charles Fox speaks pleasantly and earnestly about everything, even nothing. Was a week at Welbeck, sat next the Duchess, and never said a word. If she asked him if he would have fruit, he just answered. In helping to soup he puts the plate towards each person, but says nothing. Once he found three or four ladies he never saw, but talked incessantly. He is very fond of planting, talks of every tree. I dare say it is a new passion and the reason obvious.

Mann, the woollendraper, noticed Sir Robert Walpole with money when in the Tower the latter end of the Q ueen's reign. When Sir Robert came into power he gave Mann the contract for clothing the army, and Mann left his son £7000 a year and £150,000 in money. He made it over to his brother James, and it was continued in the family by keeping well with both the Colonels and Secretary-at-War, till they were supposed not to make less than £600,000 or £700 000 by this article.

Dr. Goodenough asked Dr. Johnson how a tea-kettle came to be cool at the bottom with boiling water within? He answered, "Is it a *fact*?"

### RARE OR UNPUBLISHED LETTERS.

MADAME DE MAINTENON.

In the private library of the Rev. Dr. Bandinel, Bodleian librarian, to whose kindness I am indebted for this notice, there is a book entitled "Office de la Semaine Sainte, Latin et Français," printed at Paris in 1701, which formerly belonged to Madame de Maintenon, and was by her presented to Madame de Nadaize, Abbess of Gomerfontaine.

On the fly-leaf is the following beautiful note written by Madame de Maintenon, which breathes all the spirit of the zealous foundress of St. Cyr:—

H. S. H., Oxford.

Ce livre que vous trouvés trop magnifique pour une religieuse passera sous mon nom, et je vous le donne d'autant plus hardiment que le cognois vostre eslolgement pour le monde et vostre fidelit e pour l'accomplissement de vos vœux. Conservés, ma chere Abbesse, tout ce que Dieu à mis en vous, faittes le glorifier dans vostre maison; il vous met à la teste pour gouverner, pour edifier, pour lui rendre compte des ames qu'il vous confie, et non pour les dominer avec hauteur: vos obligations sont infinies; la plus part des Abbesses les ignorent; iespere que vous serez leur exemple: et je le souhaitte par la solide tendresse que iay pour vous.—MAINTENON.

### NOTES.

CURIOUS INSCRIPTION ON A TOMB.—The following is a copy of an inscription on a tomb which stands alone in a larch plantation four miles from Macclesfield, and about one-third of a mile from Gawsworth Church, in Cheshire. Can any of your readers say where Johnson lived and died, and where he carried on his various professions?—AN OLD MACCLESFIELD SCHOLAR.

Under this Stone rest the remains of Mr. Samuel Johnson, afterwards ennobled with the grander Title of Lord Flame, who, after having been in his life distinct from all other men by the constitution of his genius, chose to retain the same character after his death, and was at his own request buried here, May 5, 1772, aged 82

Stay thou whom chance directs or ease persuades
To seek the quiet of these sylvan shades;
Here undisturbed and hid from vulgar eyes—
A wit, humourist, poet, player lies.
A dancing-master, too, in grace he shone,
And all the arts of Opera were his own.
In comedy, well skilled, he drew Lord Flame,
Acted the part, and gained himself the name,
Averse to strife, how oft he'd gravely say
Three peaceful graves should shade his breathless clay
That when he rose again, laid here alone,
No friend and he should quarrel for a bone;
Thinking that, were some old lame gossip nigh,
She possibly might take his leg or thigh.

PATRONYMIC SURNAMES FORMED WITH THE CELTIC AP.—We are familiar enough with those patronymic surnames which arise from adding *s* or *son* to a Christian name, as Adams, Adamson, Jones, Johnson, &c. Those with the Gaelic prefix Mac (Macgregor, Macdonald, &c.), are also household names to us. But those similarly formed with the Cymrian *Ap* are not so clearly distinguished, owing to the loss of the vowel in almost every case (Aprece is the only exception which occurs to us), and the change from P to B in many, and to G or F in a few instances. It may, therefore, be useful and amusing to give a list of such patronymics, so far as they are known to me; and your correspondents may perhaps be able to extend it, or clear up those cases that are doubtful. The formations here following admit of no doubt:—Abraham becomes Bevan, sometimes written Baddam and Badham; Ap-Edward becomes Bedward; Ap-Edwin, Bedwin; Ap-Enion, Benyon and Beynon; Ap-Evan, Bevan and Beavan; Ap-Ethel or Ap-Ythel, Bethel and Bythel; Ap-Eddy, Beddow, Beddoe, &c.; Ap-Henry, Penry, Perry; Ap-Harry, Parry; Ap-Hugh, Pugh, Pughe; Ap-Humphrey, Pumphrey; Ap-Howel., Powel.; Ap-Llwyd, Bloyd, Blood, Floyd (and probably Blewitt, Blewet, &c.); Ap-Luke, Bluck; Ap-Lewis, Bews, Blewes, Flews; Ap-Owen, Bowen, Ap-Richard, Prichard, Pritchard (Prickett); Ap-Robert, Ap-Robin, Probert, Probin, Proby; Ap-Rosser, Prosser: Ap-Roger, Prodger; Ap-Roderick, Ap-Rodic, Ap-Ryddereh, Broderick, Brodrick, Brodie, Pryddereh, Prytherch, Protheroe; Ap-Rudulph, Bardolph; Ap-Rhys, Pryce, Price, Prys, Prees, Apreece, Breese, Rhese, Rhys, Bron, &c.; Ap-Wilkin, Gwilkin; Ap-Watkin, Gwatkin. To these may be added the more conjectural names of Ap-Arthur, Ap-Atty, Parnther, Batty, Bathe; Ap-Antony, Panton; Ap-Andrew, Bandy; Ap-Ely, Paley (Peel, Pease), Pely, Baily, &c.; Ap-John, Pigeon, Pidgeon; Ap-Hard, Pride, Proud (Prowd), Preddy, Priddy, &c.—S. S.

THE FIRST SUGGESTION OF AN ELECTRIC TELEGRAPH.—On lately looking over a curious Latin poem on Electricity, I met with the following notice of an electric telegraph, which I should think was the first that occurs The title of the work is "Joseph Mariani Parthenu Electricorum, libri vi., Romæ 1767." I may mention that Mr Sidgwick Pr *Deperdi Fugasi non-macula peccati originans concepta.*" The part to which I refer occurs in a note at the bottom of page 34 After showing that the electric current would proceed through a long metallic wire, rather than through a shorter but less perfect conductor, the writer goes on to say: "Plura autem ita sub terram demergatur, ut aliqua sui parte, ingua ri modico interrupto, emergat in domo amici. Hoc peracto, si exornentur tabula, vagor, nun via brevi ores per parimentum, in quo est conclusus, sed per longissimum filum ferrum, et apparebit sumilla in domo amici inter duas partes fil metallici eo usque percurgentia. Jam nullo negotio potent quoddam velut. alphabetum cum amico ex scintillis componi, et inquas loquendi ratio condici," &c. The author of this experiment was Joseph Bozolus, a Jesuit lecturer on natural philosophy at Rome. If you think this worth a place in your "Memorabilia," I shall be glad to learn whether this is the earliest hint which occurs regarding an invention which has become so greatly developed at the present day, and which gives promise of a still wider circle of usefulness. BIBLIOPHILE, Aberdeen.

### QUERIES.

DESCENDANTS OF BRUCE AND WALLACE.—Can you or any of your numerous correspondents inform me of the direct descendants of Wallace or Bruce, or of the descendants of the Royal house of Stuart?—S. STUART.

[Robert Bruce left an only son, who reigned in Scotland as David II., and a daughter, Margery, who married Walter, the High Steward of Scotland. On the death of David, without issue, the Scottish throne was occupied by Robert II., son of Lady Margery and Walter the Steward. From him the crown descended regularly by inheritance until it came to our James I., the family being called Steward, or Stuart, from the office above named. The present representative of the Stuarts, and also of Bruce, is our Gracious Sovereign Victoria. There are, of course, many collateral relations, but her Majesty is the true and lineal descendant of the Royal house. The Pretender's family ended in an illegitimate child. We are not acquainted with any descendants of Wallace; indeed, there appears no mention in ordinary histories of his having had children.]

CUSTOM AT PRESTON.—Will any of your readers inform me of the custom of placing the halberts at the door of the Mayor of the borough which is observed at Preston, in Lancashire, is common in any other place, and what is its origin and meaning?—F. G. B.

[Preston is one of the most ancient places in England, and probably occupies the site of the Roman station called Coccium, on the river Ribble, and the custom described perhaps dates back as far as the Roman lictor and fasces. The charter granted to the town by Henry II. confirms certain "unwritten privileges" then existing; and the "customals," supposed to date as far back as Henry I., enacts that "no sheriff shall intermeddle with any burgess of Preston," otherwise than in a plea of the Crown. Dr. Knerdon, in his MSS history of Preston, written in 1682, and now in Heralds' College, says, "they had likewise as other cities of note have in the borough, then styled Prestores, a title or office no doubt derived from the Roman time." The halberts are placed on each side of the principal doorway of the townhouse of the Mayor for the time being. We have a Sketch of one, the upper part being of brass, finely polished, decorated with the arms of Preston—a lamp, with the initials P. P., which means Prince of Peace; but are translated by the *mobile vulgus*

Proud Preston, poor people,
Low Church and high steeple.

This custom has been imitated by the modern Corporation of Blackburn, and it exists also at Lancaster. We understand a history of Preston, containing a full description of its ancient institutions, is in course of preparation by an accomplished local antiquary.]

ROUSSEAU'S DREAM.—Can you inform me, through your valuable paper, whether the air called "Rousseau's Dream" was composed by Rousseau or some other person? Also, who composed the words, if there were any?—H. W. P.

["Rousseau's Dream" is an air extracted from Jean Jacques Rousseau's opera, "Le Devin du Village." In the original it is a pantomime tune, without words, and the name of "Rousseau's Dream" was first given to it in print, by J. B. Cramer. The English words, "Now, while eve's soft shadows blend ng," were written to the air by Wm. Hall. Some organists of the Church of England (acting upon the old Puritan principle of "not letting the Devil have all the pretty tunes") occasionally employ it as a psalm or hymn tune.—WILLIAM CHAPPELL.]

### ANSWERS TO QUERIES.

THE LAST PERSON BURNT IN ENGLAND.—It may be useful to mention that a woman was burnt to death at Exeter in the latter part of the last century, for an attempt to poison her master's family. A near relative of mine was present at the scene after the execution, and saw the soap-boilers collecting the ashes of the pile for use in their manufacture. He was accustomed to say, in telling this story, that she was the last sacrifice of the kind in England. There was a so preserved, still more recently, in the cathedral of the same town, the skeleton of a woman who had murdered her child, the flesh being left in a dry state on the hand that did the deed. It tells a probable tale of our fathers' horror of such crimes, and of their comparative unfrequency in those days. What became of this skeleton? I have the above from a person who saw it."—W. C., Bristol.

THE MONA OF THE ANCIENTS.—Although it is scarcely fair to trespass again on your valuable space, I would reply to your correspondent Conway Lodrim that I am quite aware of the opinion of commentators on Cæsar and Tacitus; but, as neither of the latter mentions two Monas, I still think that Tacitus believed Suetonius and Agricola to have invaded the Mona of which Cæsar had heard. The existence of two islands identica. in name in the same sea seems improbable. Welsey reads it Monodis; may not this be the Gaelic Monadh—a mountain, as mountains appear to form a feature of the island. The derivation of Caernarvon seems very probable, but should it not be read Caer-yn-yr-Ynys—the City over against Mon (not Mona, for oh may have been an error of the printer)? But aware of the Runic inscription of Kirk Braddyn?—FORDINGTON

HOOKE THE ROMAN HISTORIAN.—In answer to the query of your correspondent, N. H. M., I am able to state that I possess the only known portrait of the historian. It is a three-quarters length, and well painted. He is drawn standing with one hand on a volume of his Roman History, Hooke was a zealous Roman Catholic He resided for some years and died at Cookham, near my residence, Hedsor His remains were interred in Hedsor Church without any sort of monument, until my grandmother, Frederica, second Lord Boston, erected a marble tablet to him and his daughter. This tablet, with an honorary inscription, may be seen on the wall of the belfry of Hedsor Church outside. It is very possible that a copy of the contract may be found amongst the large number of books at Hedsor, which have not yet been accurately catalogued.—BOSTON.

### TO CORRESPONDENTS.

A. M. R.—*The Unicorn in the Arms of England*—The Unicorn, an imaginary animal, supposed to have the head, neck, and body of a horse, the legs of a buck, the tail of a lion, and a long horn growing out of the middle of its forehead, was introduced into the Royal arms of England by James I. That Monarch adopted, as the supporters of his shield, the lion of England and the unicorn of Scotland, emblems of the union he brought about —*Henricus rosas regnat Jacobus*

* I subjoin an abridged translation:—Bury a wire under the ground and let part of it appear in the house of your friend with a small division in it. If you discharge a jar the fluid will proceed along the wire and a spark will be seen between the divided parts by your friend. An alphabet can easily be composed from these sparks, &c.

A. M.—For the origin of "April-Fool Day" consult Brand's "Popular Antiquities" and Leigh's "Every Day Book."

E. S., Tunbridge Wells, who has been polite enough to send Lord Pembroke's receipt to make port wine, alluded to lately by Lord Palmerston, should have forwarded his name and address.

BIBLIOTES.—The extracts from Britton are in type, but to avoid errors in the very old French words it is desirable to compare them with the original Why did you not send your address?

SIGMA, Oxford Have the goodness to forward your name and address, and always head your communications "Memorabilia."

J., Dictionary Use of the word "I shall." "Can any inferior in position be said to be kind to his superior?"—Kindness means benevolence, and it implies a quality which can be manifested in any relation of rank either by a superior to an inferior, or t ce versâ. The humblest can exhibit kindness in their way The very

Daisy, by the shadow which it casts,
Protects the lingering dewdrop from the sun

RECEIVED.—Lord Boston, D.D., J. M. P., Dr Kennedy, F. R. S., J. D., Mayo, A Subscriber, Quebec; R. F. L., Dublin, E. T., Reigate; R. G. B., Southampton; Rev. G. C., Sudbury, A Lover of Genealogy, H. G., Polwhele Hicks, Richmond, T. B., Upton House, Abergavenny; Viscount De Roudray, A. H. W. Hancock, C. J., Raymond Beaumont, G. F. M., W. Boucher, W. P., J. T., J. W., C. S. N., Scrutator, A. M.

## CHESS.

### TO CORRESPONDENTS.

SIGMA.—If, in Problem No. 635, Black for his first move play P to K B 5th, the mate is so obvious that the merest beginner, we should have thought, could hardly fail to find it. White, of course, takes P with Q, and mates next move

CORNA.—Upon no opening probably has so much been written as on the Bishop's Gambit, and at the present moment the opinions of the best authorities differ as to the validity of the received defence. Mr. Jaenisch and Mr Lange say now that the check with the Queen is not so fatal as Mr Deluce of Some one of the best players of the day, thinks the check may be given, if followed by the sacrifice of the Q Kt Pawn, as recommended by Kieseritzky. When doctors differ, who shall decide?

DUBNEY.—You are quite wrong

J. W. Gosport.—The games shall be examined. 2. There ought to be no difficulty in establishing a good Chess-club for Portsmouth and Gosport

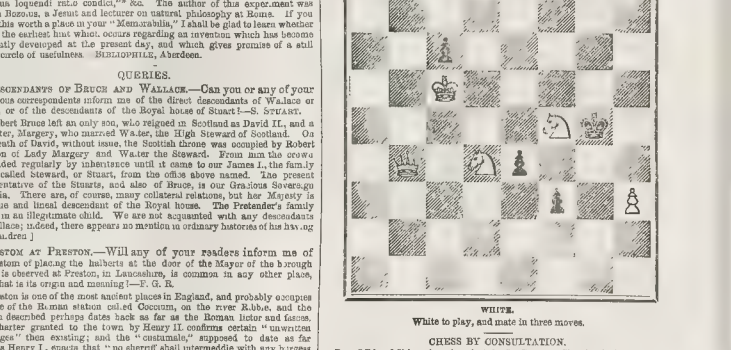
SOLUTIONS OF PROBLEM No 636, by Asbestos, T. Simpson, D. T., W. T. B., Mrs. Peabody, J. P., Rebiros, E. B. of Manchester, Hum-Dum, C. L., Manning, W. H. Moss, P. S., C. A., R. E. F., Norwood, Lover, Robert Blizard, Exeter, are correct

Any Amateur desirous of playing a Game by Correspondence may meet with a correspondent by addressing a note to "John de Blaton," Wevendon's Coffee-house, Market-street, Manchester

*** The mo, sity of our answers to Chess Correspondents are postponed till next week.

### PROBLEM No. 640
By J. B., of Bridport.

BLACK.



WHITE.

White to play, and mate in three moves.

### CHESS BY CONSULTATION.

Two Off-hand Skirmishes played at the St. George's Club by the Rev. J. O. and Mr. BARNES consulting together, against Mr. STAUNTON.

*(King's Knight's Opening)*

| WHITE (Mr. S.) | BLACK (The Allies.) | WHITE (Mr. S.) | BLACK (The Allies.) |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 19. Q to Q B 2nd | P to Q Kt 3rd |
| 2. K Kt to K B 3rd | Q Kt to Q B 3rd | 20. P to Q B 5th (c) | B takes Kt |
| 3. K B to Q B 4th | K Kt to K B 3rd | 21. P takes B (d) | P takes Q R P |
| 4. P to Q Kt 4th | K B to Q B 4th | 22. Kt to K 4th (e) | P to K R 4th |
| 5. P to Q Kt 4th | B takes Q Kt P | 23. Kt to K Kt 3rd | Q to K Kt 4th |
| 6. P to Q B 3rd | K B to K 2nd | 24. Kt to R sq | Q to K B 5th |
| 7. P to Q 4th | P to Q 3rd | 25. P to Q B 5th (f) | Q takes P (ch) |
| 8. P to B 4th (a) | Castles | 26. K to Kt sq | P to K B 5th |
| 9. Q to her 3rd | P to Q 4th (b) | 27. Kt to K 4th | B to K 2nd |
| 10. B takes P | K Kt takes B | 28. Q to Q 6th | Q to K Kt5th |
| 11. P takes Kt | Q takes P | 29. Q to Q Kt 5th | Q to K Kt5th (ch) |
| 12. P to Q B 4th | Q to her sq | 30. K to Kt sq | P to K B 6th |
| 13. P to Q 5th | Q B to K Kt 5th | 31. Q B to K Kt 3rd | Q to Q 5th |
| 14. Q Kt to Q 2nd | Kt to Q K 5th | 32. Q to Q 7th (g) | Q takes K B P (h) |
| 15. Q to her Kt sq | K B to Q 3rd | 33. K R to K Kt sq | Q takes Q B P (i) |
| 16. B to Q R 3rd | P to Q R 4th | 34. K to K 4th | Q to Q 5th |
| 17. B takes K t | P takes B | 35. Q takes B | P to K Kt 3rd |
| 18. K R to K sq | P to K B 3rd | 36. Kt to K Kt 5th, and wins (k). | |

(a) The opening on White's side is evidently played without much reflection. He has already sacrificed one valuable Pawn without any prospect of re ovn, and we are no. at all sure that his adversaries might not now have safely taken another

(b) Very well played.

(c) This seems paying dear indeed to establish two Pawns in the centre.

(d) Incontrite; but surely this exposure of the King was too reckless

(e) Bold, perhaps, to have played P to Q B 5th, before moving the Kt to K 4th.

(f) White has given up so much that his only chance consists in maintaining an attack at whatever cost.

(g) Fearful, but his only hope

(h) This move looked so good as to be irresistible; yet we believe it lost Black the game. I saw error

(i) For if Black play Q to K B 5th, they lose her; and if R to K B 3rd Mate follows in four moves.

BETWEEN THE SAME OPPONENTS.

*(Irregular Opening)*

| BLACK (The Allies.) | WHITE (Mr. S.) | BLACK (The Allies.) | WHITE (Mr. S.) |
|---|---|---|---|
| 1. P to Q 4th | P to K 3rd | 17. B takes B | Q to K Kt 3rd |
| 2. P to K 4th | P takes P | 18. Kt to K B 4th | Q to K Kt 4th |
| 3. P takes P | P takes P | 19. R to K sq | Kt to Q 4th |
| 4. K B to Q 3rd | P to Q B 4th | 20. K to R sq | Kt to Q 6th (f) |
| 5. Q Kt to K 2nd | K B takes P | 21. R K takes P | P to K B 4th |
| 6. K Kt to K B 3rd | K Kt to K B 3rd | 22. R to K B 6th (c) | Q takes B (d) |
| 7. Castles | Castles | 23. K R takes B | Kt takes Q Kt P |
| 8. Q B to K Kt 5th | Q B to K 3rd | 24. Q to K 2nd | K B to K sq |
| 9. Q Kt to Q B 3rd | Q Kt to Q 2nd | 25. Q to K B 3rd | Kt to Q B 3rd |
| 10. Q to her 2nd | P to Q R 3rd (e) | 26. Q R to Q sq (e) | Kt to K 4th |
| 11. Q B to K 2nd | Q to Q Kt 2nd | 27. R takes R | Q takes R |
| 12. P to Q B 3rd | K Kt to K 5th | 28. Q to K 2nd | Kt takes R |
| 13. B takes Kt | P takes B | 29. Q take Kt (ch) | K to R sq |
| 14. P to Q 4th | P to K B 3rd | 30. P to K B 3rd | B to K 6th |
| 15. B to K 3rd | Q R to Q sq | 31. Q to Q | Q takes Q |
| 16. P to Q Kt 4th | B takes Kt | 32. K to Kt | R to K 7th |

(a) White plays this opening much more correctly in the last, and the game altogether is better and more interesting. Only say that P to Q 4th closes Chess

(b) To be sustained here is not wanting energy and deserves a little attention.

(c) The best move. Any other would have cost of more serious loss

(d) Much better than taking with the R Rook, as the student will soon find out looking well through the variations consequent on the move.

(e) This does not look very promising, but after all they could at the point the game was gone. If K R to Q B 5th to avoid the fork of the Kt, then White would have won by moving Q to K 3rd. If they had moved the Rook to Q B 6th, White would first have played his Queen to K 6th, threatening mate, and Q to K 6th &c.

(f) And Black

(g) White plays this opening much more correctly in the last, and the game altogether is better and more interesting. Only say that P to Q 4th closes Chess

(h) To be sustained here is not wanting energy and deserves a little attention.

(i) The best move. Any other would have cost of more serious loss

(k) Much better than taking with the R Rook, as the student will soon find out looking well through the variations consequent on the move.

(l) This does not look very promising, but after all they could at the point the game was gone. If K R to Q B 5th to avoid the fork of the Kt, then White would have won by moving Q to K 3rd. If they had moved the Rook to Q B 6th, White would first have played his Queen to K 6th, threatening mate, and Q to K 6th &c.

(m) And Black

CHESS MATCH BETWEEN BIRMINGHAM AND WORCESTER.—On Tuesday week a deputation of five players from the Worcester Club played a match, of three games each, against the same number of Birmingham players. The result of the score was that Birmingham won twelve games, Worcester four, and one was unfinished for want of time, the Birmingham players being a pawn ahead when it was abandoned. Worcester was represented by Messrs. Fanning, Gillam, Nicol, Wood, and Zachary; Birmingham by Messrs. Avery, Blyth, Freeman, and Tonks. Messrs. Avery, Blyth, and Shore won their three games, without losing one, against Messrs. Gillam, Wood, and Zachary. Mr. Freeman won two and lost one, playing against Mr Fanning. Mr. Tonks, playing with Mr. Nicol, won a game, lost a game, and left one unfinished. We understand that arrangements are likely to be made for a return match at Worcester shortly; and it ought to be added, that one or two very strong Worcester players were unable to attend. The party met at the residence of Mr. Avery, where they were hospitably entertained. Several visitors were present during the day, which passed off in a most agreeable manner. The approaching anniversary of the Northern and Midland Counties Chess Association, which is to be held in Birmingham this year, gives an unusual local interest to the game at the present time. The President is Lord Ward; the Vice-President, Lord Lyttelton; and the Secretary, Mr. James Freeman, of 20, Temple-street.

ENGLISHWOMAN'S DOMESTIC MAGAZINE. Twopence Monthly. Written by Accomplished Authors. Illustrated by Famous Artists. The May Number of this Magazine commences a new volume; and its past success has enabled the Proprietors to make such arrangements with Authors, Artists, and Printers as will ensure it unrivalled. It will be printed on superior paper and with increased care The illustrations (always many and good) will really be the best obtainable. Thus the Proprietors have already obtained the services of Birket Foster, John Leech, and Sir Hiimphreys. Extensive preparations have also been made to illustrate a Tale by the Editor the "Path of Roses," commencing in the May number. Other eminent Artists will illustrate shorter Stories Poems, &c., and the Publishers have, at immense cost, secured a series of "Tales of the Operas." Articles on subjects peculiarly interesting to Women will frequently appear—Fashion, Needlework. The Magazine will also press ve its reputation for usefulness as well as interest. A Member of the Royal College of Surgeons—A man of large experience in Public Hospitals—will contribute a series of articles for general readers on Medical and Sanitary subjects. These papers will be found under the head "The Doctor." Valuable Notices on the Habits and Diseases of Animals, by Mrs. Loudon, are supplied. The Work-table Department is now placed in the experienced hands of Mrs. Pullan. And the Proprietors feel confident that the result of these arrangements will be, a Magazine unsurpassed in its class. A Specimen Number will be sent by the Publisher, D. BOGUE, 86, Fleet-street, London, on receipt of three stamps. Or order of any Bookseller.

Fifth Edition, price 2s., entered at Stationers' Hall, of

London: ROBERT COCKS and Co., New Burlington-street.

JULLIEN and CO.'S MUSICAL PRESENTATION and CIRCULATING LIBRARY combined. Subscribers to this Library are presented with £3 3s. worth of music every year. Prospectuses forwarded on application to JULLIEN and CO., 214, Regent-street.

MR. CRIVELLI begs to inform his Friends and the Public that a Third Edition of the ART of SINGING, enlarged and newly arranged in the form of a grammatical system of rules for the cultivation of the voice, may be had at his residence, 71, Upper Norton-street, and at all the principal Musicsellers.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, Price Fifty Guineas.—This Instrument has (unlike the ordinary Cottage Pianoforte) Three Strings, and the Most Grand compass of Seven Octaves. It is strengthened by very possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description, the tone is round, full, and rich, and the power equal to that of a Bedroom Grand. Chappell has also the most elegant construction, in rosewood the touch elastic, and the repetition very rapid. Every possible regulation has been taken to secure its standing in tune, and Chappell and Co. especially invite the attention of the public, the profession and the nobility to this Foreign Model Cottage Pianoforte. For elegance, in all respects comparable, has hitherto been made in England in the same price. Every instrument will be warranted, and if desired exchanged within twelve months of the purchase.—50, New Bond-street, London

JULLIEN and CO.'S CORNET-à-PISTONS, Approved and tried by HERR KOENIG.

No. 1.—The Training-room Cornet-à-Pistons (Soprano) ... ... ... £5 5 0

used by Herr Koenig ... ... ...

THE FLEET AT THE GREAT NAVAL REVIEW, AT SPITHEAD APRIL [illegible] 1856.—DRAWN BY [illegible] DUNCAN

# THE ILLUSTRATED LONDON NEWS

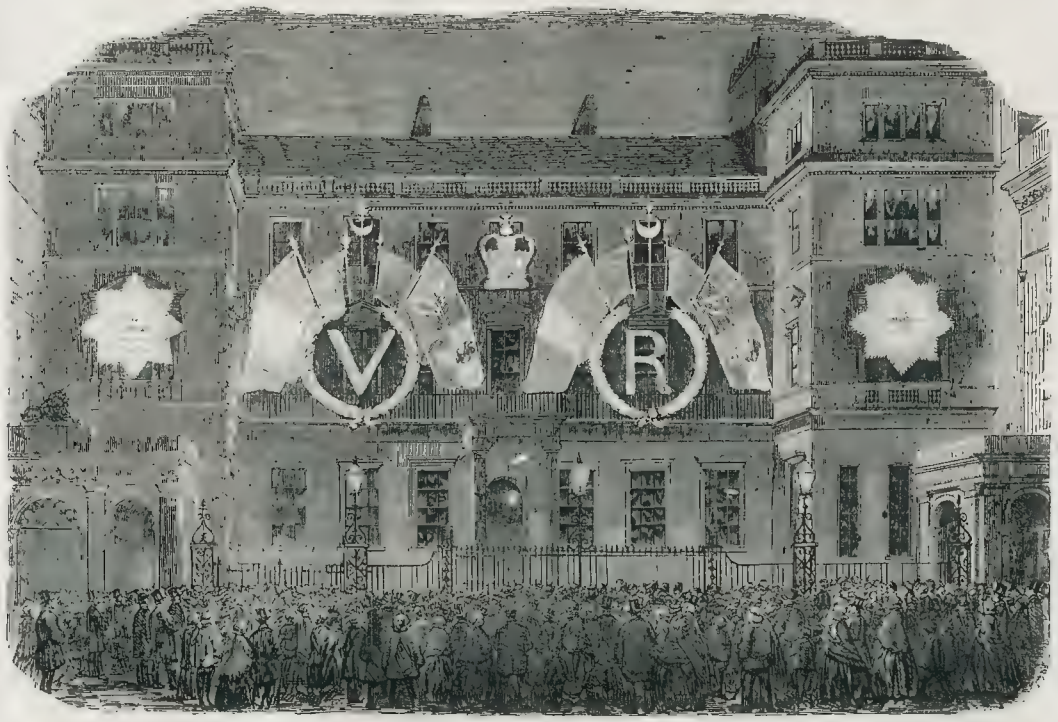
No. 802.—VOL. XXVIII.] SATURDAY, MAY 31, 1856. [WITH TWO SUPPLEMENTS, TENPENCE.

## THE PEACE REJOICINGS, AND THEIR LESSON.

LONDON has had its illuminations and its fireworks, and has been witness of a scene which is fortunately as rare as it is absurd and barbarous. The little boys of England delight in the annual immolation of Guy Faux. The old gentlemen of England—or that small and select circle of them who are privileged by right of birth and relationship to govern us—have similar tastes. In a fit of old-boyish excitement—very unusual with such solemn personages—they determined to make the people "jolly," to give them a grand spectacle, such as children and savages love, and to immolate the War-demon in the several parks of the metropolis in a shower of rockets and Roman candles, and amid a gush of blue and crimson flame. Ten, or probably twenty, thousand pounds' worth of gunpowder and other combustibles was thus expended on Thursday night—to teach the people, we suppose, how much more rational and pleasant it is to put gunpowder to such uses than to employ it in the demolition of Russian fortresses, or in the restoration of the equilibrium of Europe. Let no man say for the future that the official mind is insusceptible of enthusiasm, or that Red-Tapeism is incapable of a "lark." Staid, decorous, and stupid as it is generally considered to be, it proved by the spectacle of Thursday evening that it can *dissipere in loco* as recklessly as its less pretentious neighbours. If it could have gone up amid its own rockets, and celebrated its own extinction as well as that of the Russian war, the nation would have had less reason than at present to begrudge the cost of the powder and the paraphernalia which were let off on the occasion.

The Government, having made up its mind for the celebration, managed the business with much tact and skill. It was necessary that the people should share, or appear to share, in the joy felt by the official mind that diplomacy had put an end to that very inconvenient and very troublesome war in which Great Britain was incurring such large expense, and reaping such small satisfaction. For, if the War were unpopular in official circles, the Peace was undoubtedly unpopular in those wider circles that form the nation. Hence it was resolved to celebrate the auspicious birthday of the Queen, and the inauspicious Treaty of Peace on the same evening. Thus loyalty was pressed into the service, and the illuminations that are customary to express the love and respect of the people for the person of the Sovereign did duty in another cause, and assisted the Government in celebrating its own triumphs. Whatever foreign nations may believe in this matter, when they read or hear of the pyrotechny of this brilliant occasion, the people at home will not be deceived. They know that they accepted the Peace because they had no alternative. They know that they expected it to rest on a broader and more solid basis, and to offer them a more valid security that the repose of the nations would not again be disturbed for a quarter of a century; and they feel that the rejoicings, of which they were partially made the instruments, were Ministerial, and not popular; that the whole celebration, though it amused the multitude, edified no one; and that the expenditure which it cost was alike useless and extravagant, and unworthy of a sensible, hard-working, and earnest-minded nation.

But, the Government having thus glorified itself, the people, during the leisure that peace will afford them, and quickened in apprehension by the pressure of that war taxation which is to pinch them for at least two years, and to add £100,000,000 to the National Debt, will inquire into the character of the modern statesmanship of which Thursday was the apotheosis. Statesmanship has concluded peace, but it has not entirely consigned the war into the domain of the past, or removed its burdens from the every-day life of all classes of the community. It will be remembered to the condemnation of our statesmen that the people made the war for a noble and disinterested purpose; that they bled in it, and paid for it; and would have bled and paid more freely still if a doubt had remained upon the honour of England, or duty and justice had required the sacrifice. They will remember that, when war became imperative, statesmanship was unprepared for and unwilling to undertake it; that, when every rational man foresaw the necessity of immediate action, statesmanship was deaf, and blind, and obstinate; that when the people offered the blood of their sons, and the hard-earned treasures of their laborious days, as sacrifices to the peace of Europe, statesmanship wasted both by stupid and cruel mismanagement; that, when decision was more than half the victory, statesmanship was dilatory, irresolute, and slow; and that, after two years of unparalleled exertion to which it had been forced by the unmistakable determination of the whole people, the Government had got together the finest fleet that ever sailed



THE PEACE ILLUMINATIONS.—THE ORDNANCE-OFFICE, PALL-MALL.—(SEE PAGE 589.)

or steamed upon the seas, and the noblest and best-conditioned army that Great Britain ever possessed—both fleet and army, which had become mere auxiliaries of the French, were discovered to be of no further use; that the one made holiday in the Solent, and that the other was ordered home, to be disbanded with its work unperformed, and the Crimea still in the possession of the aggressive Power that had wrested it from its lawful owners. Nor will the incidents of the War and the Peace be the only circumstances that will bring our statesmanship to trial before the great tribunal of the nation. There was a time when our Governments and our Prime Ministers held decided opinions upon every single point of their policy, and upon their policy as one consistent whole. But all this has been changed. The Government is true to no one principle, except the principle of keeping itself in office—a principle upon which the country does not set a higher value than upon one of the rockets or sticks of the day before yesterday. A refined poco-curantism has taken the place of conscientious earnestness. Troublesome or inconvenient opposition is laughed or joked away. The gravest subjects are frittered into jests; and principles are taken on and abandoned with as much ease as his Lordship's silk stockings. The gravest questions of social and political advancement are treated as if they were of no concern; and, in a House of Commons where parties are too evenly balanced for Ministerial comfort, the Ministerial mind cares for nothing but the neutralisation of hostile influences, and the retention of a majority sufficient for existence, if not for strength and respect—for place and power, if not for the dignity which should attend them.

But the Peace will bring a thousand questions into importance that slumbered during the war, and such statesmanship as the country now possesses will be put to a severe trial in dealing with them. It will not do for Prime Ministers to play fast and loose, either with great or with small questions. Reform in Parliament, National Education, our financial system; the Sunday question in London, as distinguished from the Sunday question in the provinces; the extension of Free Trade; the proper government of our Colonies; the removal of the impediments in the path of the men of genius who do not happen to be connected with the half-dozen reigning families who share between their sons, their nephews, and their servants, the great and little emoluments of the State—these are but a few of the questions upon which our present race of statesmen will have to take a side during the peace, or give way to honester and more vigorous men. A spirit of persiflage and jesting is not the spirit with which the affairs of a great nation can be conducted. Public men must learn to be in earnest. They must not only have convictions, but they must act up to them, or they will bring all government into contempt amongst us. How perilous a condition of society this would be they must have sufficient knowledge of the world and of history to be fully aware. A truly honest Government would not degrade itself by remaining in office for a day after it had adopted a course of policy upon any subject whatsoever, great or small, and been compelled to abandon it. A weak Government, that cannot carry out its own intentions, that asks for the support of a mob, that yields to one influence to-day and to a contrary influence on the morrow, is a national evil. A Parliament that keeps such a Government in a state of suspended animation, and that would do anything rather than be sent about its business, is a Parliament alike incompetent and mischievous powerless for any good purpose, and fit for nothing but to bring into contempt the representative system of which it is the creature. The time is fast coming when this collapse of public virtue must be brought to an end. The insufficient Peace, and the burdensome taxation which accompanies it, will have their advantages, if they lead, as they promise to do, to the regeneration of the public spirit, and to a reconstitution of parties. What with so-called Conservatives who are not conservative; Liberals who are not liberal; and Reformers who systematically shirk the discussion of all questions of Reform, and the growth and extension of a spirit of easy, nonchalant conformity to anything and everything that will save the trouble either of thought or of action to those whose especial business it ought to be both to think and to act, the Government of this country threatens to become a mere farce. It is more than time that this state of things should be abrogated. If our old statesmen are too old to mend, it will fare ill with the country if the new generation do not produce better and more earnest politicians.

Electricity, powerful and negative, on 22nd to 24th. Solar halo on 21st. On 24th, hawthorn, lilac, and Cheiranthus alpinus in flower.

E. J. LOWE.

FATAL COLLIERY EXPLOSION.—A colliery explosion occurred in the works of the Governor and Company of Copperminers, in Glamorganshire, on Saturday last, by which twelve men were killed or died before they reached their homes, and two more are since dead; several others were slightly burned or injured.

A DESTRUCTIVE THUNDERSTORM.—During a thunderstorm which passed over the West Riding a few days ago a man was killed by the electric fluid on Bradford-moor. The shock apparently passed down from the breast to the right thigh, where it left a slight aperture. The chimney of the cottage in which he was standing was struck, the chamber floor torn up, and the plaster ripped off the wall in several places. Nearly all the panes of glass in the windows of the house opposite were blown out, and several persons in the street were severely stunned. At Leeds the river Aire became much swollen. Two youths, the one aged fifteen, the other ten years, got into a raft which was moored at one of the wharfs, loosened it, and floated down the stream upon it. When they had got a little distance they found themselves in a perilous position, and a person on board a vessel threw a rope to them. One of the lads seized the line, but the sudden jerk upset the raft, and they were both thrown into the river and drowned.

CELTIC REMAINS.—Several curious relics have been recently found within the town walls of ancient Dublin, including many singularly ornamented combs, bronze and iron fibulæ, and implements used in the manufacture of curiously-constructed wooden houses erected in that locality at a very remote era. Among the articles enumerated is an antique-shaped signet seal, supposed by a distinguished heraldic authority to have belonged to the Lord-Deputy Essex, time of Elizabeth.—*Dublin Paper.*

## *FOREIGN AND COLONIAL NEWS.*

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday

WE are happy to announce that since the arrival of the Empress at St. Cloud, and especially within the last few days, the improvement in her Majesty's health has been marked and rapid; and her strength is so much restored, that on the occasion of the late ball, at the summer palace, she was able to walk about the apartments, and take part in the entertainments of the evening, though she did not dance. Her Majesty's appearance bore little or no trace of her long confinement and sufferings, and, contrary to her usual custom of retiring early, she did not leave the ball till near four o'clock in the morning.

The Grand Duke Maximilian has left Paris; the Prince Oscar of Sweden, who is much liked, prolongs his stay. The representation at St. Cloud before these princes, and a variety of other foreign and native guests of distinction, of one of the Palais Royal pieces, "Il jamais je te place," seemed somewhat singularly selected for the dignity of the occasion, and its unsuitableness was rendered doubly evident by the coldness of its reception: the soirée proved, in short, a failure, as might very reasonably have been expected.

The improvement in the Empress's health renders it probable that the period of the christening will soon be fixed. The ceremony will not take place before five o'clock in the afternoon, so as not to make the fatigues of the day too long for her strength; and it is hoped that she, as well as the Emperor, may be able to attend at the grand banquet of the Hôtel de Ville. It seems decided that the Prince Napoleon will go in person, on board the *Duchayla*, to Civita Vecchia, to meet the Cardinal Patrizi, charged by the Pope to perform the baptismal ceremony. The voyage of the Prince to the north is postponed till after the christening, and must, in consequence of the short period of the navigation being open later in the season, be abridged from the length of time it was originally intended to occupy.

The fêtes attendant on the baptism concluded, it is probable the Emperor and Empress will proceed to Plombières—or the Emperor alone as he is ordered to take the waters for a rheumatic affection in the legs; after which he purposes to conduct the Empress to Biarritz, where the Imperial residence is now being completed for their reception. It is said that their Majesties will not confine themselves to these excursions, but will visit Canterets, Barèges, Bagnières de Bigorre, and Tarbes. The company of the Orleans Railroad have been making a trial of the carriages fitted up as apartments in which the Emperor, the Empress, and the Prince Imperial are to proceed to Biarritz.

The expedition of the Emperor to Algeria is vaguely talked of for September.

The arrangements in the Champs Elysées, in and about the Palais d'Industrie, for the approaching cattle-show, advance rapidly, and the forage even is being got in in considerable quantities. So much interest and curiosity is attached to this peaceful rivalry, that numbers of persons daily visit the constructions, which are airy and commodious, and afford opportunities of seeing the animals at all sides.

Happily a great improvement has taken place in the weather, and the news from the provinces announces the disappearance of the inundations, and leads to a hope that the injury done to agricultural produce is, in many parts, less serious than was at first believed.

It appears certain that the plan talked of for building in the Champs Elysées is likely to be gradually carried into effect; and that very shortly a commencement will be made, by constructing on the right-hand side, looking on the Place de la Concorde and facing the Tuileries, two immense buildings, in the same style of architecture as the Ministère de la Marine. In this case the Palais d'Industrie, purchased by the State, will be demolished. The Municipal Council has, moreover, taken into consideration a plan for the establishment of a public garden on the ground formerly occupied by the convent and the market of the Temple. The plan being submitted to the Emperor, his Majesty, in returning it, is said to have replied to the Préfet: "Say to the Municipal Council that I wish to have a monument erected in the middle to the memories of Louis XVI. and Marie Antoinette, and that I desire personally to examine and correct the plan for this monument, as I am particularly anxious (*Je veux, je tiens*) that my name shall be attached to this work of expiation.

The desire on the part of the Emperor that none of the functionaries of State shall take any part in industrial speculations even extends to the husbands and immediate relatives of the ladies who hold places in the household of the Empress. M. de Morny, who was largely engaged in such affairs, has sold out of them; and one of the principal chateaux of Chaillot, has, it is said, been purchased by M. Véron.

At the review of the troops held on Tuesday at the Champ de Mars, the Empress made her appearance in a low, open carriage, attended only by one lady. Her Majesty was received with great and prolonged enthusiasm: she wore a dress of green silk, with a shawl of black lace intermixed with gold, and a bonnet of a delicate blush-rose colour.

The subscriptions made among the different arrondissemens, of sums from one to five sous, intended to be presented to the Empress and the Prince Imperial, having amounted to 80,000 francs, the offering has been accepted with the announcement that her Majesty proposes to devote it to a charitable purpose. With this view the Emperor proposes to add annually the sum of 80,000 from his own coffer, and to establish with the sum thus united a fund for the support and education of the orphans of the poor adopted by poor families without children of their own; an arrangement by which both will profit equally.

A few days since the Maréchal Bosquet took in his carriage to St. Cloud two private soldiers of the Crimean army, in order that they might in person proffer a petition to the Emperor. One, an Arab negro, having seen a shell fall in the trenches at Sebastopol, took up the missile and was in the act of flinging it beyond the reach of mischief, when it burst, and carried away both his arms. The other is a Breton soldier, without family, who ever since the misfortune of his comrade has attended him night and day, fed, dressed, and accompanied him wherever he has gone. The petition of the Arab (who has been décoré) is to be permitted to return to his tribe, that of his self-constituted attendant, to be allowed to accompany him, promising that, should his services ever be required, he will return to his post. It is almost needless to say that the request of both

The Théâtre Français has given a *reprise* of the "Cid," for the début of Lafontaine, late of the Gymnase. We regret, for the sake of one of the first comedians of the day, to say that this first attempt in classical tragedy has proved the reverse of successful, which result might very well have been foreseen. The Gymnase has "Les Fanfarons du Vice," a piece of most improbable plot and indifferent execution. The Bouffes Parisiens has dug out of the library of Vienna an operette of Mozart, to which MM. Léon Battu and Ludovic Halévy have arranged a charming little poem: it has obtained Success.

### EXCITEMENT IN ITALY.

The Italian journals give a recital of some disturbances which have just taken place at Genoa and Turin. The *Cattolico* of Genoa states that at a grand banquet of the students, which was held on the occasion of the anniversary of the proclamation of the constitutional statute, a toast to the "Unity of Italy" was drunk with loud applause. On the following morning the same words were raised as a rallying cry among a numerous crowd in the street, and also at the theatre. The *Movimento*, another Genoa journal, states that the police had torn down a placard affixed to one of the pillars of the Carlo Felice Theatre which contained menaces against the Austrian Consul.

A letter in the *Echo du Mont Blanc*, in mentioning the subject, says:—

Placards containing insults and threats against the Austrian Consul have been posted on the corners of several streets, and torn down by the police. In the evening several persons assembled under the windows of the Consul, threw stones against the door and at the Austrian arms over it, and uttered cries of "Down with the Consul—war against Austria!" The walls of Turin are covered with the words, "Death to Austria. Long live Victor Emmanuel, King of Italy!"

The *Risorgimento* of Turin of the 21st says:—

The constitution which Austria promises to her populations, the sending of an Archduke to Paris, the Concordat with Rome, the Council of Bishops at Vienna, are indeed significant facts which do not announce great confidence on the part of Austria. The fruits of the Paris Conference are not quite ripened as yet, but some of them are ripening. It is now the duty of Italy to show herself patient, moderate, and prudent: and then we shall soon see that the benefits accruing to us from the Anglo-French alliance are more tangible than was at first believed. According to letters from Rome the Austrian and French notes have already been presented to the Pope. It is believed that Cardinal Antonelli will resign, and that he will be succeeded by Cardinal Viale Prela, now Papal Nuncio at Vienna.

A letter from Milan in the *Corriere Mercantile* of Genoa says:—"The agitation of 1847 and 1848 is reviving. Revolutionary inscriptions are making their appearance on the walls, such as the following:—'Victor Emmanuel, our King, for ever! Long live Cavour, the Italian Minister!'"

Signor D. Manin has addressed to one of the Turin papers a letter on what he calls the "theory of the poniard," denouncing the doctrine of assassination for political purposes as the great enemy of Italy whilst the national party must combat. He says:

The great national party in Italy invites, and hopes to keep to itself, the whole of the people who really love their country, and especially the most judicious, the most worthy, and the most respected for the sustained honour of their lives. But these men will never answer to that appeal unless the national party separate itself solemnly, absolutely, and irrevocably from assassins. That absolute separation is necessary to conciliate the sympathies of Europe, and to gain to our national cause the respect, the veneration, and the affection which it merits. * * * By exposing to the world our foul and fatal ulcer, I know I perform an act of courage. Italians, now is the time to efface that shameful stigma, to purify ourselves from that enormity. Our hands must be without stain. Let our purity from crime be the mark which shall distinguish the noble defenders of our country from the suicidal instruments of the enemies of all law. Ours shall be the honourable weapons which become noble and truly courageous men, and our duty is to profess and propagate the doctrines of pure and indisputable morality. Let the theory of assassination be left to the Jesuits, and let us abandon the poniard to the Sanfedesti.

### AMERICA.

The steam-ship *Persia*, which left New York on the 14th inst., arrived at Liverpool on Saturday last.

The *New York Herald* Washington correspondent pretends to know that a serious disagreement has occurred in the Cabinet between the President and Secretary Marcy with regard to Nicaraguan affairs. It is said that Mr Marcy threatens to resign if General Walker's Government is recognised.

The Committee appointed by Congress to investigate the state of affairs in Kansas has been at work since the end of April, adjourning from one locality to another, for the convenience of taking evidence on the spot. The arrangement was—firstly, to inquire into the election frauds, and then into the Missouri aggression committed in December. Governor Reeder made the examination of the witnesses. Messrs. Howard, Sherman, and Oliver are his colleagues, and their conduct is described as very candid and impartial. They are said to have remarked emphatically that the actual state of Kansas, as they find it, is far worse than any one at Washington could have expected. The case of the "Border Ruffians," so called, is conducted by General Whitfield, the assistant of Colonel Woodson, of Independence. A letter from Laurence, in Kansas, expresses some apprehension lest, notwithstanding the presence of the Committee of Congress, the slavery party should force on a violent struggle. The Sheriff of Douglass county, Mr. Jones, has adopted a course which is likely to irritate the Free-state men, and, if it does not involve them in actual conflict with the federal authority, must embarrass the progress of the investigations now pending. A regiment of four hundred men from Alabama, each furnished with "a Bible and a rifle," has come into Kansas, under the orders of Major Buford: its banners are inscribed "The Supremacy of the White Race," and "Kansas, the Outpost of Slavery." The men were feasted on their way, and treated with exciting orations by the slaveholding party; but their discipline is said to be so bad as to render them a not very formidable military force.

The Washington correspondent of the *New York Tribune*, writing on May 19, says:—

The President is decided in his purpose to receive Padre Vijil, the Minister sent to represent Walker's government in Nicaragua. This purpose may be communicated in the message answering the resolution of inquiry into Central American affairs. The opposition in the Cabinet seems not to have affected the President's inclination. This step, if taken in connection with the dismissal of Mr. Crampton, the British representative here—which dismissal is now determined upon—it is believed by sagacious statesmen, will have the effect of reviving Lord Palmerston's power, which is tottering to its fall, and of seriously complicate our relations with all the European Governments. Indeed, it cannot be disguised that the most momentous consequences may ensue, involving the peace of the country in various quarters, and inviting entanglements and disputes which cannot at this time be appreciated by the public. A profound sensation will necessarily be created throughout Europe, leading to new and formidable combinations against the United States. It is by far the gravest complication since the Oregon difficulty.

The last direct accounts from Honduras stated that Cabanas, the former President of that province and a federalist, had been driven out by a sudden revolution, at the head of which was General Guardiola, who is named President. Cabanas fled to General Walker, and, with the aid of several hundred of his men and about fifteen hundred of his own countrymen, marched towards Honduras. On his arrival at the frontier he made a pause, having become disgusted with the conduct of his new allies, and, with the patriotic remark that he would not be instrumental in bringing such misery upon his country, he suddenly left, and is now in San Salvador.

The question whether or no Honduras will join in the league against Walker is not yet definitively settled. The President and his Cabinet are in favour of the measure. In case of their joining, they could, perhaps, bring into the field 1600 men. With the exception of this the province of Honduras is now much quieter than it has been for a number of years.

The Liverpool and Philadelphia steam ship *City of Baltimore* arrived at Liverpool on Wednesday. Her advices are two days later than the *Persia*. The papers furnish little news, however, except the Indian squabbles in Oregon and Washington territories. A body of regulars had been defeated by the Indians, with the loss of 28 killed. It is also reported that 1000 Indians were approaching the Dallas from the north. Several other fights had occurred, in which the whites were generally victorious. In Washington territory the Indians were attacking the settlements in every direction.

There was nothing new from Nicaragua, except a report at Aspinwall that Colonel Schlessinger had been recaptured, and would be shot.

A despatch from Washington, dated March 16, states that Secretary Marcy had sent for M. Marcoleta, the resident Minister from Nicaragua, on that day, and informed him of the determination of the Administration to recognise the Padre Vijil as the Minister from the new Government. [illegible] Nicaraguan Minister protested against it.

## THE PEACE REJOICINGS.

THE manner in which the industrious millions of the metropolis left their ordinary occupations on Thursday last and poured into the streets must have satisfied any person as to the heartiness with which they were resolved to make a holiday, whatever their private opinions may be about the Treaty of Paris. From an early hour in the morning the streets were densely crowded; while every few minutes the various railways, omnibuses, and steam boats poured in additions to the busy throng. As a general rule business was not suspended before the middle of the day, but tradesmen were closing up one after another in rapid succession, having resolved that all in their employment should, as far as possible, have an opportunity of bearing a part in the demonstrations consequent upon the celebration of peace.

From Hyde Park-corner to Mile-end, and for miles west and east of those points respectively, the inhabitants had made the most extensive preparations for the due observance of the day; while from north to south the same eager anxiety prevailed to take a part in the proceedings of the day which will form so prominent a part in the history of the country. In the various fashionable squares, in Park-lane and Piccadilly, the nobility had made extensive preparations for witnessing the fireworks in the parks. At the mansion of Lord Ward, in Park-lane, a gallery (the interior and seats of which were covered with crimson cloth) was erected, as well as a gas illumination, surrounding the whole of the first pillars and windows, exactly fronting the firework repository in Hyde-park. From his Lordship's residence, both north and south, similar preparations had been made, the principal being those of the Marquis of Breadalbane, the Marquis of Westminster, Mr. Dudley Coutts Marjoribanks, and Mr. Donald Nicoll (opposite the Duchess of Gloucester's). No less galleries were not constructed, the balconies were rendered perfectly safe by means of strong wooden shores with iron bindings. Devonshire House was covered with galleries, from which a large number of the nobility were enabled to view the fireworks. Similar arrangements were made at the Duke of Sutherland's, and at most of the houses of the nobility from which a sight of the fireworks could be obtained.

In the morning the pensioners of Greenwich Hospital, amounting to nearly 2800 were marshalled in the great square of the College by the senior Lieutenants and Adjutants of the establishment, and were inspected by the Governor, Lieut.-Governor, and a brilliant staff of naval and military officers. After the inspection they were regaled in the spacious dining-halls with an excellent dinner of roast beef, each man receiving one pound of it, besides an extra, as a commutation in money was paid for the orange [illegible] and half a gallon of ale to drink [illegible]. In the evening the officers gave a banquet [illegible]

In the Horse Guards Parade Ground [illegible] composed of the Grenadier Guards, the Coldstream Guards, and the Scots Fusilier Guards, with the band of the several regiments, took place on the parade of St. James's-park. His Royal Highness Prince Albert, his Royal Highness Prince Frederick William of Prussia, his Highness the Reigning Prince of Baden, his Royal Highness the Duke of Cambridge, the Commander-in-Chief (Lord Viscount Hardinge), Lord Cardigan, and a brilliant staff of officers entered the ground and took up their position in front of the Guards. The troops were formed in line, presenting arms, the united bands playing "God Save the Queen." The infantry commenced evolutions by opening in single and double columns, and marching in quick and slow time round the ground, when, having taken up their original position, his Royal Highness Prince Albert, the illustrious visitors, and staff, passed through the line, inspecting the various companies. At the conclusion his Royal Highness Prince Albert complimented the officers for their strict attention to the important branch of the service, and left the parade for Buckingham Palace, amidst the most enthusiastic cheering.

At twelve o'clock the guns at the Tower and in St. James's-park were fired. Several thousands of persons assembled in the Park to witness this simple ceremony.

As the Government did not accede to the request of the managers to throw open the theatres to the public free on the night of rejoicing, the managers determined to close them, and dramatic performances were consequently given at two and three o'clock in the afternoon, in order that the large concourse of strangers in London might without difficulty have an opportunity of visiting the theatres before the illuminations commenced.

The brilliancy of the display on Thursday night is, in great measure, accounted for by being the first fine night subsequent to the introduction of gas for this purpose; and those persons who remember the illuminations of 1814 and 1816, with streets of houses lighted by a tallow candle to each window pane, can best appreciate the splendour we have gained by the application of gas to public illumination.

### PUBLIC BUILDINGS.

THE HORSE GUARDS, and the ORDNANCE-OFFICE, Pall-mall, engraved and described at pp. 577 and 580.

THE ADMIRALTY.—The entire length of the architectural line of this building was illuminated with lamps. A large central device represented the Admiralty anchor, surmounted by the Royal crown. At the extremities were festoons of lamps; and on each side of the central entrance the initials V. R. We have engraved it at p. 580.

WAR DEPARTMENT.—A crown, surrounded by two six-feet stars, all in gas jets, with coloured reflectors, and lined with illuminated gas brackets, in colours.

HOME OFFICE, TREASURY, AND BOARD OF TRADE.—This was a very splendid affair, extending the entire length of the above buildings. It consisted of the banners suspended from a continuous cable, each banner bearing the component letter of the word PEACE; and the cable loops, by which the banners were suspended, formed medallions, containing the initial letters of the different Sovereigns in the alliance. At the extreme right and left of the composition were placed the letters V. and N., encircled by a similar cable of laurel wreaths. The whole was in beautifully-coloured lamps, and prepared by Messrs. Grant Hanson, Cockspur-street.

GENERAL POST-OFFICE.—In the centre a pair of very elaborate laurel wreaths, surmounted by flags of England, France, Sardinia, and Turkey, with a brilliant crescent in the centre, supported on the dexter side by a star, and on the sinister, beneath it the star of Brunswick, with the initials V. R., on the sinister side by the crown of France, beneath was the star of the Legion of Honour, with the initials L. N., all in gas, executed by Messrs. Huxley and Heriot. Engraved at p. 593.

STATIONERY-OFFICE.—A large star in the centre, with right the letter V., surmounted by the British crown; and on the left the letter N., surmounted by the French crown. The whole in coloured lamps, by Henke, of Great Portland-street.

THE ROYAL EXCHANGE.—The magnificent portico was brilliantly lighted; the columns were covered with lamps, which also extended throughout the outlines of the frieze and pediment, including the inscription, "The earth is the Lord's and the fulness thereof," being in large transparent capitals. There were festoons of lamps at the sides, and devices on the other fronts of the building.

THE BANK OF ENGLAND.—Brilliant stars affixed to the lamps along the front. We have engraved these illuminations at page 592.

EAST INDIA HOUSE, Leadenhall-street.—The entire front was lighted with festoons, stars, and pendents, of graceful design; the tympanum was filled with laurel, scrollwork, and stars; and the frieze bore in large letters "PEACE." From its great extent, and the lightness and elegance of the design, this illumination was one of the most successful displays. We have engraved it at page 592.

NATIONAL GALLERY.—This splendid illumination, which we have engraved at page 593, was formed of the flags of England and France, with those of Turkey and Sardinia occupying the centre, with a large star above and the crescent beneath; on the right were placed the letter V. A., surmounted by the British crown, and a military cross beneath the letters joined by the left were the letters N. B., surmounted by the French crown, and a military cross beneath the letters. The whole of the composition was supported on each flank by laurel branches. These several devices were "picked out" in parties of five and coloured reflecting glass drops, lighted with gas, and had a very novel and sparkling effect. This new mode of illumination, the devices of which are registered, is by Defries and Sons, Houndsditch.

SOMERSET HOUSE was very brilliantly illuminated, the entire front facing the Strand being covered. In the centre was a large anchor, representing the naval power of England; crossed and above which were placed the standards of England, France, and Sardinia supporting that of Turkey; the whole surrounded by wreaths of laurel. On one side of the device was the initial of her Majesty, and on the other that of the Emperor of the French, surrounded by brilliant stars, all in variegated lamps. At each extremity of the building were large transparencies displaying the combination of England, France, Sardinia, and Turkey, by groups of flags. Immediately under the centre device, and extending along the front of the building, was a lengthened scroll, on which was written "Peace and concord unite the letters N. B., surmounted by the word Will to all Nations." This design was 185 feet in length and 50 feet in height. The roof and cornice were illuminated with flambeaux. Messrs. Gardner, of West Strand, were intrusted by the Government to design and carry out this splendid work.

THE MANSION-HOUSE.—A star of Brunswick ten feet in diameter; V. R., peculiarly constructed of laurel-leaves, in the centre, with an endless knot, emblematical of lasting peace.

GUILDHALL (City).—A brilliant crown, with the initials V. R.

BRITISH MUSEUM.—The railings of the ornamental fence brilliantly illuminated with gas-flames issuing from a large number of candelabras, and from urns on the entrance-gates. The four large stone pedestals are surmounted by double rows of brilliant jets. This was a most classic design, and had a very imposing effect.

CUSTOM-HOUSE.—A magnificent British crown in oil lamps. The entablature and edges of the façade hung with oil buckets. Around each pillar of the chief entrance were wreaths of oil buckets, which made the columns appear as if entwined with snakes. Supports—two stars of Brunswick, with branches of laurel. Initials—V. R. Motto—"Peace and Commerce." The side of the building facing the Thames was similarly decorated.

THE ROYAL MINT.—A large crown, elaborately enriched, surmounting a brilliant star; on one side V. R., on the other Napoleon III. and the Turkish crescent.

FISHMONGERS' HALL, London-bridge.—Two radiated gas stars, 11 feet diameter; a 9-feet gas crown. The word "Peace" in 5-feet letters. By Stevens and Sons.

### CLUB HOUSES.

ARMY AND NAVY CLUB.—A medallion eleven feet in diameter, with a sword and anchor crossed in the centre. The medallion was surmounted by a six-foot crown, and surrounded by laurel-leaves, with the union-jack and ensign on each side, and a large scroll, with the name of Victoria. By Stevens and Sons, Southwark-bridge-road.

THE GUARDS.—A star, crown, and wreath of laurels.

CARLTON.—Large gas flambeaux on the pillars in front of the building.

CONSERVATIVE.—A large crown, with laurel wreaths: the initials V. R., in a peculiarly shaded letter, supported by the rose, shamrock, and thistle. Made by Messrs. Greenhill, Ryder-street.

ATHENÆUM.—Large round wreaths, with her Majesty's initials. By Farrady, of Wardour-street.

SENIOR UNITED SERVICE.—Mr. Dethridge, of Gerrard-street, Soho, prepared the following device, which was greatly admired:—Scrolls of laurel surrounding a medallion, enclosing the rose and thistle, surmounted by a large crown and two flags: on each side, two large stars, with thistle and shamrock in the centre. Underneath, wreaths of laurel and a star, and the rose in the centre. The initials V. R., and the word "Peace" in very large letters.

THE REFORM.—A large crown, surrounded by a lion; two military flags: a large anchor; the letters V. R. on each side of the crown; a wreath of rose, shamrock, and thistle ribbon, with motto, "Cor unum via una." Along the top, "The Wellington," in four-foot letters. By Hedge and Co.

BOODLE'S.—Large wreath of laurels, with crown in centre; letters V. R.; the star of Brunswick.

THE EAST INDIA UNITED SERVICE, St. James's-square.—V. R. in centre of a brilliant star, surmounted by the Imperial crown, the whole resting on laurel and festoons in gas. From the Albion Works, Willoughby, Pimlico.

### RESIDENCES OF THE NOBILITY AND GENTRY.

In the various fashionable squares, in Park-lane, Piccadilly, and aristocratic regions northward of that thoroughfare, the brilliant illuminations of every description were kept up until midnight. The favourite device with many of the nobility and gentry was a star formed of gas jets At Lady Peel's, Whitehall; Mr. Disraeli's, Grosvenor-gate; Lord Calthorpe's, Lord Sondes's, and the Marquis of Exeter's, Grosvenor-square; and the Earl of Yarborough's, Arlington-street, there was only a plain star. At Lord Palmerston's, Piccadilly, there was not only a star, but a crown, and the initials V. R., encircled with a wreath of laurel. At the Duke of Northumberland's, Charing-cross, there was a large star, with a crown in the centre. The same combination was chosen by the Earl of Bradford, Belgrave-square. The Duke of Buccleuch, Montague-house, had a crown with variegated lamps.

Apsley House (Duke of Wellington's), Hyde-park-corner On the parapet of the mansion large triple jets of gas; and beneath the central portico in large gas capitals "Long Live the Queen."

The Marquis of Lansdowne's, Berkeley-square.—The initials V.R., crown, gas.

The Earl Granville's, Bruton-street.—The initials V.R., and a brilliant gas star.

The Earl of Harrowby's, Grosvenor-square.—Star and variegated lamps

Lord Ward's, Park-lane.—Coat of arms encircled with jets of gas; the eighteen columns of the house decorated with spiral twists and flags of all nations. A most magnificent device.

Lord Palmerston's, Grosvenor-square.—V.R., star, gas jets.

The Earl of Shaftesbury, Grosvenor-square.—V.R., star, gas jets.

The Dowager Duchess of Cleveland's, Grosvenor-square.—The initials V.R., encircled with laurels and variegated lamps.

The Brazilian Minister's, Cavendish-square.—The Brazilian coat of arms, with the globe of paint on one side and the tobacco plant on the other, with lamps, and a crown.

The French Ambassador's, Knightsbridge.—The Imperial arms, with flags of England and France.

The Duke of Somerset's, Park-lane.—A crown and flags, with variegated lamps, the letters V. A. and N. E.

The Earl of Norfolk's, St. James's-square.—Crown and cushion, V. R., encircled with laurel-leaves.

The Duke of Sutherland's, Stable-yard.—Two crossed swords, variegated lamps, and the word "Peace" in large gas capitals.

Lambeth Palace.—A crown, V. R., and "Peace," in variegated lamps

Bishop of London's, St. James's-square.—Emblem (in gas), a dove descending with the olive branch of peace, supported by wreaths of laurel. Motto, "Esto perpetua."

Bishop of Winchester's, St. James's-square.—A large crown in variegated lamps, with the letters V. R.

Sir Robert Peel's, Prince's-gate, Hyde park—A large crescent and cross, in refulgent gas.

Westminster Hospital, 140. A transparency. The Angel of Peace, supported by the shields and banners of England, France, Sardinia, and Turkey; a ribbon bearing the names of St. Arnaud, Raglan, Canrobert, Cambridge, Pelissier, Simpson, Bosquet, Brown, &c., &c motto, "Honour to our Heroes." "Peace to all Nations."

### TRADESMEN'S HOUSES AND PRIVATE DWELLINGS.

Pellatt and Co.'s, Baker-street, Portman-square.—The centre was a crystal chandelier, of richly-cut glass spangle drops, around which were suspended the flags of Turkey, France, Sardinia, and the union jack of England. The patterns of the flags were shown in coloured lamps. On each side of the chandelier were richly-cut spangle stars, three feet high, the garter and cross in their proper colours; one the star of the Order of the Garter, and the other that of the Thistle. Beneath were the letters V. R., three feet high, surrounded with green-stinted laurel leaves, tied up with ormeson and blue ribbon, all formed of richly-cut and reflective spangle work. An arch connected the two sides, formed of reflective angle drops; above which was the well-timed family motto of the Pellatts; "Veritas vincit" (Truth conquers). In front were four glass pillars, surmounted with crystal spears, and connected with chains of crystal. The whole of this costly and elaborate design was lighted with gas from the back

St. John's Gate, Clerkenwell.—On each tow r of the ancient portal of St. John were beacon fires, as in "ye olden tyme." This is in keeping with the historical and chivalric association of the place, and also novel—the only place in England where a standard beacon now exists being on Hadley Church tower, Middlesex.

St. Katharine Docks.—Large crown, V.R., English and French naval flags crossed, encircled with laurels of variegated lamps.

Moses', corner of Minories and Aldgate.—A massive crown, more than nine feet high, with the letters V. R., and two laurel-sprays extending forty feet. In the Minories, two notice in very large letters, "Don't Save the Queen," and "God Bless the People;" with this was incorporated the Vitruvian scroll, lighted by twenty thousand jets. The large windows were entirely filled with three gorgeous emblematic transparencies.

Shoolbred and Co.'s, Tottenham-court-road.—Very large crown, laurel branches, and two stars in gas.

Webber, Baker-street.—A large brilliantly-illuminated transparency of the Royal star, encircled with the Order of the Garter and laurel, surmounted with the Imperial crown. Motto: "Peace, long may it reign."

Day and Son's, Gate-street, Lincoln's inn-fields.—Three large transparencies, vigorously painted by a distinguished artist, and very effectively lighted. 1. War—The Allies attacking Sebastopol. 2. Peace—The Star of the same Spot—groups of the Allies fraternising with Russian soldiers in the foreground disabled cannon overgrown with lilies. The rainbow introduced emblematic of the covenant. 3. The Arms of England and the Allies

Davis's Floorcloth Works, Mile-end-gate.—A seven-feet gas star, with a crown projecting some twelve inches from the centre, resting on a bed of laurels; on either side the V. and R., five feet in height; and several small emblems, such as shamrocks, thistles, &c., encircled, and occupying the space of about 16 feet by 10.

Howell and Co.'s, Regent-street.—A large and elaborate device, with stars, surmounted by a crown, and encircled with laurel.

Medwin and Co.'s, 36, Regent-street.—Amidst flags, a large transparency. The subject: A centre figure of Victory, twice life-size, crowned with laurel, and seated upon a lion. By her side a funeral-urn, with a ribbon inscribed "To the Departed Brave." In her right hand an olive-branch; on her left the French eagle. The rocky base inscribed "Alma, Inkerman, Balaclava, Malakoff, Sebastopol," &c. Also life-size figures of a grenadier and French soldier on the right line. Sardinian, and a Turk. In the right and left corners of the tableau are sections of the Exhibition of 1851, and Palais de l'Industrie of 1855. Inscription: "England and France with Victory give hope to Hungary, unity to Italy, freedom to Poland, and peace to the world."

Cramer, Beale, and Co.'s, Regent-street.—A large transparency, painted by John Absolon, and rising above the second-floor windows; the subject allegorical of the union of France and England, Britannia, and two French and British soldiers and sailors; with brilliant sunlight, and other vivid effects, cleverly painted.

Mr. R. Ackermann's, 191, Regent-street.—A large Brunswick star, with initials V. R. in brilliant jets of gas, surmounted with the national flags of England and France.

County Fire-office, Regent-street.—Wreaths of laurel surrounding the initials V R., and surmounted by a crown.

Office of the ILLUSTRATED LONDON NEWS, 198, Strand.—V.R., surmounted by a laurel, in gas; crystal star of gas jets, by Defries and Son, Houndsditch.

Unity Banking Association.—The illumination upon the Unity Buildings, in Cannon-street, City, of the word "Unity" in letters ten feet high, and upon the branch offices, at No. 1, Coventry-street, Leicester-square, the same word in letters seven feet high, all in gas.

Dakin and Co.'s, 1, St. Paul's churchyard. Pillars of jets along the whole front of the building facing St. Paul's, and a large star.

Sovereign Insurance Office, St. James's-street.—An immense crown surrounded by a laurel wreath. Motto, "Long live the Sovereigns"

Lambert and Rawling's, Coventry-street.—Large star, with Brunswick cross in the centre. Letters V. R.

London Tavern.—A brilliant star in gas, supported by the initials V R.

Goadwinters'-hall.—A large crown, with the initials V. R. on either side

Scott's Bank, Cavendish-square.—A magnificent star of Brunswick, 17 feet in diameter, encircled by laurel.

Old Hummums, Covent-garden.—A star, with V. R. in the centre.

Deane and Dray's, London-bridge, gas-fitters.—A brilliant star; scroll, with part of the initials V. N., supported by long branches of laurel and scrollwork. Motto "Allied, irresistible."

Burgess', 107, Strand.—The entire front wreathed and festooned with fresh laurel leaves, bearing a white banner of Peace, and large imperial crown in coloured lamps.

The Conservative Land Society, No. 33, Norfolk-street, Strand.—The St. George's star of the Order of the Garter, with motto, "Honi soit," &c., composed of nearly 12,000 crystal drops, and the letters in bold relief, projecting from the balcony, "Conservative Land Society," also in crystal with coloured glass. This brilliant and novel mode of lighting was accomplished by placing the gas jets four inches behind the zinc plates and glass. It was the invention of Mr. Palmer, of the Royal Italian Opera.

Hunt and Roskell's, 156, New Bond-street.—Illumination in gas, covering the front of the house; beneath wreaths of laurel "Welcome Peace," and the cipher V. R.; a large star; the whole surmounted by an Imperial crown.

Bingley and Metcalf's, Oxford-street. A very large star of Brunswick, Royal Arms of England in burnished gold, and a halo of surpassing brilliancy

Messrs. Wakeling and Sons', Gerrard-street, Soho in gas, a foul anchor and cable, surrounded by an enormous ring of brilliant stars.

Swan and Edgar's, Regent-street and Piccadilly.—Three brilliant stars.

Hodge and Lowman's, Argyle House, Regent-street.—A brilliant crown, laurel wreath, flags of England, France, Sardinia, and Turkey, supported by two stars of Brunswick; initials, V. A., N. E., A.M., V. R.; motto, "Alma—Balaclava Inkerman—Sebastopol."

H. J. Smith, Regent-street.—A large, revolving star, and pillars of fire, two crowns, and the Order of the Garter surmounting the Royal arms in a halo of light, motto, "God Save the Queen," and "Peace for ever."

Mr. W. Smith's, 5 and 6, Margaret-street, Cavendish square.—A ship in full sail on a sea of gas, with star and garter; motto, "Peace and Commerce."

Golden Cross, Charing-cross.—The initials of the Queen of England and the Emperor of the French, with the word "Peace" between them, inclosed by a brilliant star on each side, and surmounted by a crown.

London General Omnibus Company, Charing-cross.—A large transparency: the standard of England, encircled by laurel branches, and supported by the flags of France, Sardinia, and Turkey. Motto: "Union is strength"—"Welcome to peace"

Prater's, Army Clothier, Charing-cross.—A beautiful transparency. The Angel of Peace, descending with a palm and wreath in her wand, supports the shields and flags of England, France, Sardinia, and Turkey.

Pritchett's, St. James's-street.—The front of the house covered with about eight stars of nine feet each. These were a novel kind of burner, recently introduced from Germany.

Messrs. Defries', 147, Houndsditch.—This firm illuminated the following:—National Gallery; Pantheon, Oxford-street; Carlton Club; Lord Stamford and Warrington's; Carlin's, Regent-street; Simpson's, Regent-street; *Illustrated London News* and *Sunday Times* Offices, Fenton's hotel, and Jullien's, Regent-street, with their newly-registered devices, formed of crystal spangles, of various colours, so as to illustrate the true national emblematical designs.

W. G. Bubb, 456, West Strand.—A handsome transparency, representing Peace resuming the sovereignty of Europe, surrounded by a motto: "In Times of Peace the Arts and Commerce Flourish."

THE RAILWAY STATIONS.—The platform facing the Strand, the leading of gas running along the top and sides of the principal face of the building, with a monster reflecting star in the centre. The South-Eastern office had a star. The Blackwall terminus, in Fenchurch-street; the top and sides had beadings of gas, and on the front of the building four medallions, also in gas, containing the names of the Allies—England, France, Sardinia, and Turkey. The Great Western terminus—more than 46,000 jets of gas required to give effect to the devices. The South-Western station, Waterloo road—a magnificent British crown, fifteen feet in height, supported by the flags of England and France, Sardinia and Turkey, interspersed with festoons. The initials V. R.

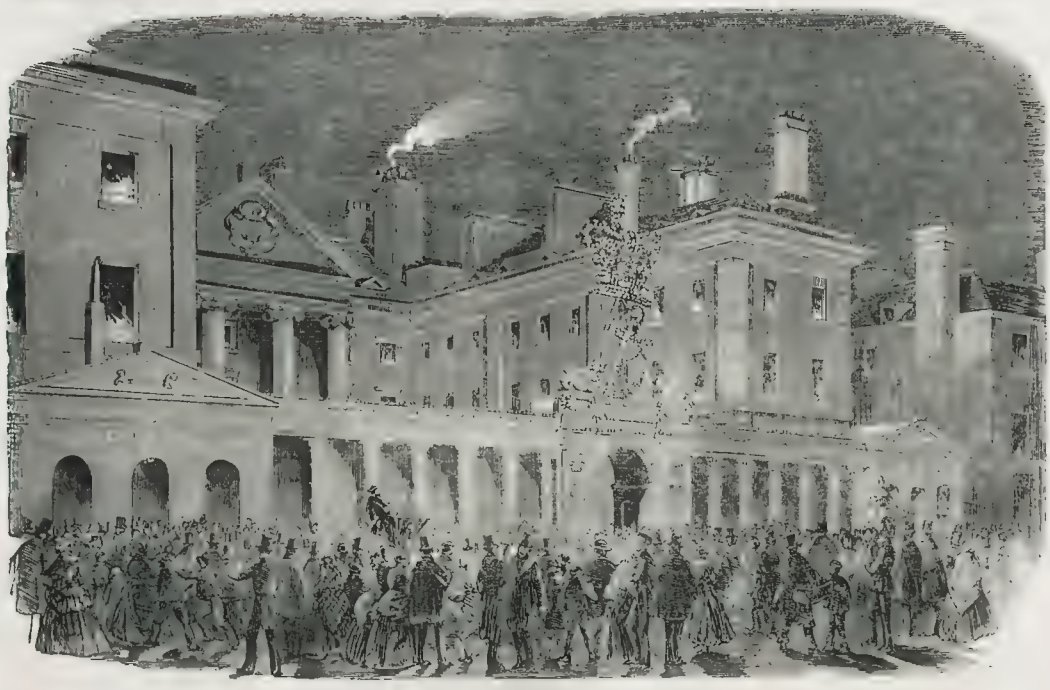
### THE FIREWORKS.

FROM an early hour in the evening the movement towards Primrose-hill and the various parks showed that the great mass of the people were more bent on having a look at the fireworks than at the illumination. The latter part of the show they trusted to being able to see at a later hour. The distribution of the fireworks at different places, though it prevented the display from being so grand and imposing as it might otherwise have been, had the excellent effect of preventing the crowds in any part of the town from becoming dangerously large, as they otherwise would have been. Even in spite of the distributions any one who saw the immense crowds that congregated in Piccadilly, Hyde-park, Regent's-park, Victoria-park, and in a hundred different localities round Primrose-hill, must have felt some alarm at the thought of so many hundred thousands of people being collected together in the streets, as the crowds poured dangerously large, as they otherwise would have been. Even in spite of the distributions any one who saw the immense crowds that congregated in Piccadilly, Hyde-park, Regent's-park, Victoria-park, and in a hundred different localities round Primrose-hill, must have felt some alarm at the thought of so many hundred thousands of people being collected together in the streets, as the crowds poured dangerously after the fireworks were over. The crush of cabs, carriages, pleasure-vans and omnibuses at the corner of Tottenham-court-road was quite equal to what usually takes place in Cheapside during the afternoon of a Bank dividend-day. Of course, the fares of omnibuses and other vehicles rose in proportion to the demand. The increase on those occasions was from sixpence to a shilling each. Camden town, to Oxford-road, at one o'clock on Friday morning was only three hundred per cent. This will give some notion of the rate which had assembled on the heights of the vicinity of Primrose-hill, that being the best quarter of the town for obtaining a view of the whole of the fireworks

The general feeling with regard to the pyrotechnic display was highly favourable, only there seemed an impression that it had fallen short of the mark in some points. At Primrose-hill, for example, where the brilliant spectacle was seen to great advantage, the first two or three pieces were highly successful. Then came a long succession of rockets, parachute shells, and streamers, with very little variation. But the chief disappointment was felt at the close of the exhibition. In the programme it was stated that there would be a great flight of rockets, —some 10,000 altogether. Instead of that, the concluding piece was one of the least effective things of the whole evening.

At Hyde-park the same disappointment took place. The grand battean, by some strange arrangement, instead of coming as a grand finale to the whole, was discharged almost in the middle of the proceedings, its effect was exceedingly brilliant, but it rendered the pieces that followed less imposing. In spite of this drawback, however, the display was really splendid. The close of the evening, the burning of fire, the bold careering of the rockets, the graceful curves of the gerbs falling over like sheaves of wheat, formed a scene such as was never witnessed before by the majority of the spectators. Then came wheel-pieces and gold streamers, and blue and yellow rockets, and serpents and yellow shells, and pearl streamers, blue and yellow rockets, and serpents and yellow shells, and golden rain, and tailed stars and rocket wheels, and Scotch stars, and parachutes, and pearl rain, and twelve-pointed stars and crackers, and Saxon hoops, and silver rain, and diamond stars, and looking-glasses, and kaleidoscopes, and Maltese crosses, and running rockets, and bourbillons, and five-pointed lances, and ten stars, and a variety of other things known only to the initiated in the mystery of the pyrotechnic art. Altogether it was a display of fireworks such as probably had never before been seen in London, and the people seemed to enjoy it with thorough good humour.

Much praise is due to the police force for the admirable manner in which they performed their arduous duties throughout the whole of Thursday night. To them is due, in no small degree, the credit of having preserved such excellent order in all the principal thoroughfares that even the most helpless "unprotected female" found no difficulty in passing along or crossing the Strand, Piccadilly, or Oxford-street, in spite of the thousands of vehicles by which all the main streets were occupied till late hour in the morning of Friday,



THE PEACE ILLUMINATIONS.—THE ADMIRALTY.

## THE PEACE ILLUMINATIONS.

THE following splendid Illuminations were designed and executed by Messrs. Stevens and Sons, Darlington Works, Southwark, gas engineers to the Admiralty and the War Department. The following are the details:—

THE HORSE GUARDS (Whitehall front).—A garter, twelve feet in diameter, in gas glass bucket-lamps; the motto, "HONI . SOIT . QUI . MAL . Y . PENSE," in gas jets; and in the centre a brilliant radiated star, five feet six inches in diameter; two large flags, English and French; and two smaller ditto, Turkish and Sardinian. The flag-staffs had glass bucket-lamps. The crown, nine feet high, surmounted the garter; and the two radiated stars were eleven feet in diameter, with reflecting rays and gas jets. The outline of the centre compartment of the building, and two windows to the right and two windows to the left of the centre, were surrounded with gas in glass bucket-lamps. The Park front of the Horse Guards had the garter, star, and crown, and the flags and stars right and left, the same as the Whitehall front. The outline of the building was also surrounded with gas in glass bucket-lamps.

THE ORDNANCE-OFFICE (*see Engraving on the front page of the present Number*).—Two wreaths, 13 feet diameter, in gas jets; one encircling V, and the other R, in the centre, in gas glass buckets. With each wreath were displayed two large flags, English and French, and two smaller flags, Sardinian and Turkish; and in the centre of each was a Turkish standard, with half-moon and spear-head. The flagstaffs had gas glass bucket-lamps. In the centre was a nine foot crown in gas jets, and in each of the wings was an eleven-foot radiated star.

It may be worthy of notice, respecting the amount of work in one of the large gas stars, at the Horse Guards and the Ordnance Department, Pall-mall—upwards of 2000 jets complete each star, and 2500 each crown—the whole work was executed within a fortnight, the workmen being occupied from six in the morning until twelve at night.

## THE PEACE REJOICINGS.

Having been enabled to illustrate only a portion of the PEACE REJOICINGS this week, we are compelled to announce for Saturday next, JUNE 7th, another

MAGNIFICENT DOUBLE NUMBER

OF

THE ILLUSTRATED LONDON NEWS,

INCLUDING

TWO-PAGE ENGRAVINGS

OF THE

FIREWORKS IN HYDE AND GREEN PARKS,

AND ON PRIMROSE HILL;

And a General View of London during the Illuminations, as seen from Hampstead Heath; also, a continuation of the Illuminations, Transparencies, &c.
Scenes from the Peace Commemorations in Dublin, Edinburgh, Portsmouth, Plymouth, &c.
Epsom Races:—Portraits of the Winners of the Derby and Oaks.
Ball to Her Majesty at the Turkish Embassy, &c.,
The Foundation Ceremonies of the Strangers' Home.

WITH

A FINE-ARTS SUPPLEMENT,

CONTAINING

Beautiful Engravings of the following Pictures from the Exhibitions:—"Ante-chamber of the Tribunal of the Inquisition." Painted by L. Haghe. "A Neapolitan Peasant Boy." By F. Y. Hurlstone. "Funeral in the Vosges Mountains." By Brion. "Fête Champêtre." By G. Dodgson. "Wotton, Surrey." By G. Barnard. "Maidenhood." Painted by G. E. Hicks.

Price of the DOUBLE NUMBER and SUPPLEMENT, 10d.; Stamped, 1s.

## THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, MAY 31, 1856.*

EVERY day's experience illustrates more and more forcibly the inconveniences and anomalies which attend our present system of diplomacy, and the fallacy of the theory upon which the conduct of our international relations—whether of peace or war—depends. The theory of the Constitution is that to make war and to make peace is the exclusive prerogative of the Crown, to be exercised irrespectively of all control or interference on the part of its subjects. In practice, however, the people, being called upon to supply the means for making war, virtually have a controlling voice as to the expediency of the war before it is undertaken, and as to its conduct during all its continuance. The practice, further, is that when peace is made, or so soon after as the cumbrous and dilatory forms of "ratification" have been gone through, the Crown informs its subjects of the fact, by messages to both Houses of Parliament, and by proclamation to the sound of trumpets; and calls upon the country to offer up thanksgiving, and to rejoice amid the blaze of fire works and illuminations. Both in the case of war and peace, therefore, the Royal prerogative defers to the popular opinion; but with a difference. In the initiating and throughout the conduct of war the popular will possesses the power of a direct veto upon the exercise of the Royal prerogative, inasmuch as the supplies must be of its giving; on the contrary, when peace is to be made, the Royal prerogative is free to act unchecked by the popular will, inasmuch as the Crown has no need to call for additional grants of money to effect its purpose. What is the result? That the country is called upon publicly to sanction and to support a war the issues of which are to be regulated privately and irresponsibly by the Royal prerogative—to carry on a contest at great expense of blood and treasure, having approved the purposes with which it was undertaken, but without the faintest pretence at a voice in adjusting the conditions upon which it may be terminated. A precisely parallel case would be that of giving a solicitor unlimited means to conduct a suit who should have authority to compromise it at any moment upon terms that might not be to the interest of his client.

Secret diplomacy, the bane and curse of all international relations, is a relic of the ancient theory of absolute monarchy, which admitted of no will, no interests, in the State but those of the Sovereign. This theory, we all know, has long been exploded in this country, and therefore, whilst secret diplomacy may still be very applicable to despotic States, where there is only one will to consult and satisfy, it is both absurd and hurtful in a constitutional State, where the ultimate power and charge rest with the people. In the United States of America and other Republics this anomaly does not exist. In such Governments the sanction of all diplomatic relations is with the Senate, or representative body; and, consequently, secret diplomacy is impossible among them.

These remarks might be supported by copious references to all periods of history; but we shall be satisfied with one or two illustrations suggested in the progress of the Eastern question, now amicably, we would hope also happily, terminated. We all recollect the communication made by the late Emperor Nicholas to our Ambassador, Sir H. Seymour, in the early part of the spring of 1853, unfolding his designs upon the Ottoman territories, and by Sir Hamilton communicated to his Government at home. Does any one doubt that if those communications, in place of being buried in the archives of the Foreign-office, had been published to the country, the British people would not have risen as a man to oppose this scheme of monstrous iniquity before it became too late? And can any one doubt that by such prompt and timely action we should have secured an earlier and a cheaper victory than that which we are now called upon to celebrate? Again. We very recently called attention, in an article of some length, to the extraordinary manner in which, by a note appended to the Treaty of Paris, a new principle of maritime law—or rather not a new principle, but a principle invented by Russia in 1780, and for fifty years resisted by the British nation—had been solemnly sanctioned; in other words, how our maritime supremacy the only real supremacy this country can ever claim in European affairs—had been signed away, by an act of secret diplomacy, without a word of reference to the nation so deeply interested in the question. True that this transaction led to some angry comments in Parliament, and that Lord Colchester brought it before the Peers as a substantive motion, when Lord Clarendon naïvely admitted that, in the face of public opinion and the Press, the diplomatists could never have carried their point in this matter. But what avail these discussions when the deed is done?

Our last illustration is of an equally important character. It appears after all the negotiations at Paris had been gone through to the satisfaction of the Plenipotentiaries of all the Powers, and when, amidst a mutual exchange of compliments, the treaty had been signed which was to restore peace to Europe, to guarantee the territories of the Porte, and effectually limit and restrain the dangerous propensities attributed to Russia, the Plenipotentiaries of Great Britain, France, and Austria—had, so poor a notion of its efficacy, and of the *bona fides* with which Russia had made profession of good conduct for the future, that they signed a secret tripartite treaty of defensive alliance, for mutual co-operation, in the eventuality of Russia breaking her engagements, and threatening the peace of Europe. Russia was naturally annoyed, hurt, and offended; and in the twinkling of an eye all the fine compliments and professions lavished at Paris were forgotten, and the peace of Europe well nigh again imperilled. As to the fact, however, the treaty is still matter only of surmise and mystery—thanks to secret diplomacy. In the House of Commons the Marquis of Granby endeavoured to unravel the mystery, but in vain. He asked Lord Palmerston "whether any secret treaty had been entered into between France, Austria, and England;" in replying to which the noble Premier commenced by ridiculing the notion that "if there were a secret treaty" he should confess it "to make it public;" at which the House laughed, the joke being with the noble Premier to which he added, "However, I have no hesitation in saying that the only treaty *concluded* is that which has been laid on the table." The first obvious meaning of these words would be that the rumour of a secret tripartite treaty was all a mistake—a myth. But will it prove to be so in the end? Lord Palmerston's joke about "public secrets" was probably not without meaning. Nor must we omit to attach due weight to the word "concluded" employed in the revelation finally vouchsafed by him. We need hardly suggest that a treaty is not "concluded" until the ratifications are exchanged; and we may judge, therefore, that no ratifications have been exchanged of any secret tripartite treaty between France, Austria, and England. But have we any reasonable ground to believe that any day they may not be? There was a very similar secret tripartite treaty, and between the same parties, and against apprehended danger from the same quarter, at the early sittings of the Congress of Vienna; and every one knows how it was afterwards used against this country. Such are a few specimens of the inevitable confusion and mistrust which of necessity attend all secret diplomacy

---

AT length, after a trial of unexampled duration, one of the most inhuman wretches that ever darkened the annals of crime has been found guilty, and condemned to an ignominious death. That John Parsons Cook is the only victim of Palmer's murderous hand is more than doubtful—or, rather, the reverse can hardly be doubted. Lord Campbell, in passing sentence on Tuesday last, intimated as much; and the intricacies of the convict's iniquitous career are such that it was hardly possible, in unravelling the evidence bearing upon this individual charge, to disassociate it from others of a similar character, as well as from a series of offences second only to murder itself in heinousness. If he had been acquitted on the indictment as regards Cook, he would afterwards have been tried for the murder of his wife and, if he had escaped upon this indictment, there would still have remained numerous charges of forgery, upon conviction for which he would have been transported for life. These were circumstances which, whilst they added the deeper dye to the prisoner's infamy, to some extent, in the minds of the many, weakened the chances of his conviction upon the particular case now so satisfactorily disposed of. It was surmised by those who thought and talked idly about the matter that the very fact that Palmer was amenable to a succession of indictments would, in a case of doubtful or conflicting evidence, induce a timid or unscrupulous jury to escape from the responsibility of their oath, by allowing an undue latitude to that wholesome, but sometimes much-abused, maxim as to giving the "prisoner the benefit of the doubt." Those who have watched the history of judicial proceedings will have no hesitation in agreeing that, if the jury had so acted in this case, the very fact of the prisoner's acquittal on Tuesday last would have weakened the chances of his conviction on the second charge; and thus a course would have been accepted which would have robbed the law of a victim most righteously its due, cast a scandal upon our criminal jurisprudence, and outraged and alarmed the feelings of society. As it is, the law has but one life in return for many supposed to be sacrificed; but that one life, ignominiously forfeited, may serve as sufficient atonement for the past, and as a solemn warning that the sanctity of the mortal tabernacle shall not be invaded with impunity, and that the cunning wiles and contrivances of crime must, sooner or later, be brought to light.

Too much honour cannot be given to all engaged in carrying out this prosecution; to the learned Judge, who, with untiring patience, dignified calmness, and impartiality above suspicion, presided during twelve long sittings over revelations of most painful, and often disgusting, character; to the counsel for the prosecution, who boldly grappled with a case of purely circumstantial evidence, and stated it so elaborately, so emphatically, but withal so temperately, that his opening narrative was not left unsupported in a single particular by the evidence; and, lastly, to the jury, who, kept from their homes at great inconvenience to themselves and their families, paid unremitting attention to every feature of the evidence, and to every suggestion both of the prosecution and defence. We wish that in this honourable commendation we could include all who acted as advocates and witnesses—sometimes advocates, sometimes witnesses, sometimes both—for the defence; but truth forbids it. All who respect the bar of this country as a noble institution, the palladium of our rights and liberties, will regret that, in his eagerness to achieve success, Mr. Serjeant Shee should have so far forgotten his province, and what was due to the jury and to himself, as to declare upon his conscience (or, as a contemporary suggests, on "his fee") that he believed truer words were never spoken than when the prisoner at the bar pleaded "not guilty" to this indictment; and few will dispute that when Lord Campbell, in summing up, reminded the jury that such a protestation on the part of a prisoner's counsel was "analogous to the mere form by which a prisoner pleads 'Not guilty,' and should go for nothing more," he administered a very mild but a very significant rebuke to the learned gentleman. As for the medical witnesses called for the defence, it must be admitted that too many of them, in the excitement of polemical display, forgot that the more sacred province of science consists in ascertaining, not in mystifying, the truth; in enlightening, confirming, and sustaining those who seek its aid—not in perplexing with conflicting assertions of irreconcilable experience and opinions, and a parade of unintelligible technicalities. That the sophisms of Serjeant Shee's medical witnesses did not in the end succeed any better than his own gratuitous declaration of belief in his client's innocence, in diverting the jury from the dispassionate and fearless performance of their duty, is owing partly to the too palpable fact that both the learned Serjeant and his witnesses overplayed their part, but mainly to the character of the jurymen, whose conduct throughout this painful and exciting case was such as fully to merit the warm encomiums passed upon them by the learned Lord Chief Justice.

We have no wish to add one word in aggravation of the enormity of guilt weighing down the soul of the miserable wretch whose life is shortly to be sacrificed to the outraged laws of God and man; one word to inflict an additional pang upon surviving relatives, whose name he has stained with everlasting infamy; but we cannot quit the subject without remarking that both in the individual bearing of the prisoner, and in that of those who have conducted his defence, there has been much to create a vulgar prejudice in his favour—so far as the issues of the trial were concerned; to exaggerate assumed discrepancies between what some people have termed "moral guilt," as distinguished from "legal guilt," and to lead to a suggestion that by any amount of technical ingenuity, engaged at enormous pecuniary outlay, it was possible in this country to defeat the ends of justice. The passing of a special Act of Parliament for the purpose of removing the trial from the Stafford Assizes to the Central Criminal Court, on the ground that an impartial decision could not be come to at the former, was alone, *pro tanto*, calculated to prejudice in his favour; and the enormous array of medical evidence brought to bear against the Crown was a significant illustration of what can be done by money in the most desperate emergencies. William Palmer's demeanour in Court was that of one who was aware of the importance of these favourable circumstances; and the command of nerve which he assumed, and the coolness with which he took occasional memoranda, and addressed notes and verbal comments to his professional friends, were well calculated to impose upon a less intelligent and less conscientious jury than that assembled on this occasion.

---

The programme for next week at Her Majesty's Theatre includes an unusual number of extraordinary attractions. There is to be an extra night on Monday for the début of Albertini. The opera will be the "Trovatore," in which the new prima donna will be the principal soprano, and Madame Alboni will appear once more in a true contralto part. We are rejoiced to find that her recent triumphs will not deprive us of the pleasure of occasionally refreshing our earlier recollections of her marvellous contralto voice. Bauscardé will also make his appearance on the same occasion; and, if only one-half of what is said about Albertini prove true, the opera will be given with a cast perfect at all points. The addition of Monday to the open nights will not interfere with the regular performances, and Tuesday will, as usual, be an opera evening. On Thursday Mdlle. Piccolomini will repeat her personation of *Violetta*, in "La Traviata." The judgment of her own country, which recognised in the noble vocalist an actress equal to Rachel, has already been confirmed. The reckless gaiety of the earlier scenes and the utter collapse of the despairing penitent under the burden of her shame and sorrow are both portrayed with a power that leaves it doubtful whether comedy or tragedy be her forte. But the promise of the week does not end here. Marie Taglioni has arrived, and her appearance may be looked for on Wednesday.

## THE COURT.

Her Majesty and his Royal Highness the Prince Consort returned to Buckingham Palace from Osborne on Monday afternoon accompanied by the Prince of Wales, Prince Alfred, the Princess Royal Prince Arthur, Prince Leopold, the Princesses Alice, Helena, and Louisa, and his Royal Highness Prince Frederick William of Prussia. The Royal party crossed in the *Fairy* to Gosport, where the Queen inspected the 4th Light Dragoons and the 13th Light Dragoons, recently returned from the Crimea. After the inspection, the Queen, the Prince, the Royal family, and Prince Frederick William of Prussia, quitted Gosport by a special train for London, and arrived at Buckingham Palace at ten minutes past six o'clock. On the same evening the Queen and Prince Albert, accompanied by Prince Frederick William of Prussia, honoured the Olympic Theatre with their presence.

On Tuesday the Queen held a Court, at which Count Appony had his first audience of the Queen, and presented his credentials as Envoy Extraordinary and Minister Plenipotentiary from his Imperial Majesty the Emperor of Austria. After the Court the Queen, accompanied by the Princess Royal and the Princess Alice, and attended by the Hon. Lucy Kerr, took a drive in an open carriage and four. Prince Albert rode on horseback with the Regent of Baden, and Prince Frederick William of Prussia. In the evening the Queen received his Excellency M. Wasurus, the Turkish Ambassador, with a visit, at the residence of the Embassy in Bryanston-square. The complete report of this superb fête will be given, with illustrations, in our next Number.

The Prince Consort went to Epsom races on Wednesday, accompanied by their Royal Highnesses the Regent of Baden and Prince Frederick William of Prussia. The Royal party left Buckingham Palace at twelve, and returned shortly after six o'clock. The Queen had a dinner party in the evening.

On Thursday the Queen held a Drawingroom.

The Lord Chamberlain has given notice that the state apartments of Windsor Castle would be closed from Friday, the 30th inst., till further orders.

THE DRAWINGROOM.

The Queen held a Drawingroom in celebration of her birthday on Thursday afternoon, in St. James's Palace. The Court was very numerously attended.

Her Majesty and Prince Albert, with the Princess Royal, arrived from Buckingham Palace about two o'clock, escorted by a detachment of the Royal Horse Guards.

The Regent of Baden, Prince Frederick William of Prussia, the Duke of Cambridge, Count Alexander Mensdorff, the Duchess of Cambridge and the Princess Mary, Prince Edward of Saxe-Weimar, and the Maharajah Duleep Singh, were received by the Vice-Chamberlain.

After the Queen had received from the Archbishops and Bishops an address of congratulation, her Majesty and his Royal Highness entered the Throne-room, accompanied by the Princess Royal, the Duchess of Cambridge and the Princess Mary, the Regent of Baden, Prince Frederick William of Prussia, the Duke of Cambridge, Prince Edward of Saxe Weimar, and Count Alexander Mensdorff.

The Queen wore a train of light-blue silk, embroidered all over with a palm pattern in gold, silver, and red, trimmed with silver blonde and bunches of orchidean flowers; the petticoat white satin, with an affluant of white tulle, and bunches of orchidean flowers to correspond to the train. Her Majesty wore a diadem of diamonds and opals.

The Princess Royal wore a train of rich pink glacé silk, trimmed with Newport lace and ribbon, the dress of Newport lace over a rich pink glacé silk petticoat, trimmed with ribbon and bunches of lily of the valley. Her Royal Highness's head-dress was formed of feathers, lappets, and lilies of the valley.

The Duchess of Cambridge wore a train of white silk and gold, trimmed with gold lace and gold ribbon, interspersed with heart's-ease and white roses. The petticoat white glacé silk, trimmed with three flounces of point d'Alencon. The stomacher of diamonds and sapphires. The necklace, diamonds. Her Royal Highness wore a pearl tiara over her forehead, and had a gold-lace veil pendent from the back of the head.

The Princess Mary of Cambridge wore a rich white glacé silk train, trimmed with tulle, inter-persed with bouquets of corn-flowers, field daisies, and wheat-ears. The stomacher of diamonds. The petticoat the same as the train, and trimmed to correspond. The necklace pearls. The Princess wore round her head a diamond circlet, surmounted in front by a row of diamond stars.

After the diplomatic circle had been introduced the general company passed before her Majesty. The costumes worn by several of the ladies were especially remarkable on this occasion.

The Court returned to Buckingham Palace after the Drawingroom.

H.R.H. THE REGENT OF BADEN.

His Royal Highness the Regent of Baden arrived at Buckingham Palace at eleven o'clock on Monday morning, on a visit to the Queen. In the afternoon the Prince Regent, attended by the Hon. Mortimer S. West and the gentlemen of his suite, paid visits to their Royal Highnesses the Duchess of Kent, the Duchess of Gloucester, the Duchess of Cambridge, and the Duke of Cambridge.

His Royal Highness Prince Frederick William of Prussia, attended by Lieutenant-General Baron de Schreckenstein, Baron Moltke, and Captain Heinz, visited the members of the Royal family at their residences on Tuesday afternoon.

The Countess of Derby had a very brilliant assembly on Saturday evening, at the family mansion in St. James's-square.

Lord Lyndhurst attained his eighty-fourth year on Wednesday last. The noble and learned Lord and Lady Lyndhurst had a dinner-party on the same evening at his mansion in George-street.

## THE BIRTHDAY DRAWINGROOM.—COURT DRESSES.

The gorgeous appearance presented at the Queen's Drawingroom depends not only on the richness and beauty of the ladies' dresses, but on that variety in their costume which prevents the eye from becoming fatigued by the picture like sameness which passes before it. We have already passed the fabricate trimmings which are so generally adopted; but one of the Court dresses which attracted particular attention on the 29th inst. presented a contrast to the prevailing mode, and was distinguished by its simple elegance. The skirt was of white tarlatan trimmed with rose-colour ribbon, black velvet, and lace embroidered in black. The train of rose-colour, trimmed with black velvet, was ornamented with the lace already mentioned, which is a novel manufacture.

Another remarkable dress worn by a recognised leader of fashion, owed much of its effect to the brilliant and peculiar colour, *vert d'Azoff*, of which it was composed. The skirt was of tulle, trimmed with broad white blonde and bands of ribbon and flowers; and the train, of moiré gothique, was ornamented in a similar manner with ribbon and dew-dropped roses. This dress reminded one of the figures Watteau loved to paint.

White dresses generally preponderate at the Birthday Drawingroom, and the present occasion formed no exception to the rule. We must particularly mention the dresses worn by three sisters, which were composed of white tulle with trains of white moiré antique; the only distinction between them consisting in the different flowers chosen for trimmings. One had blue corn-flowers and silver wheat, the second water-lilies with green leaves, and the third mixed geraniums.

A very stylish dress was of white tulle, having three blonde flounces, the basin of white silk, and train and skirt trimmed to correspond, with blue flowers and white ribbon.

Another white dress was trimmed almost entirely with ribbon and rosebuds; and a white dress of a new and striking character was only relieved by green, having for its chief ornament a peculiar grass-like fringe.

A dress worn by a young married lady was composed of three flounces of point lace, looped up with garlands of variegated heath; the train was of terry velvet, inwoven in a beautiful pattern with bouquets of variegated heath and point lace. The richness of this dress was only surpassed by the exquisite taste which pervaded it.

Among the coloured dresses we must notice one of blue tulle, trimmed with bouquets of pink roses and feathers. The train was of rich blue moiré gothique, worked in a feather pattern, and ornamented with pink roses and white feathers.

A rather more quiet costume was of grey glacé silk, with deep flounces bordered by a feather fringe. The train was of grey moiré antique, made to correspond.

Purple seems just now a very favourite colour: a Court dress trimmed with this shade was chosen by a lady of the highest rank. The skirt, of white tulle, had innumerable flounces ornamented with rows of gros-grain velvet, feather fringe, and bouquets of poppies and white pinks each bouquet being fastened with an agrafe of diamonds. The train of white moiré antique was trimmed in the same manner.

A dress of maize-colour silk, trimmed with purple heartsease and white blonde, had a very rich effect; and another, not less admired, was of silver and green tissue, having a skirt of tulle spotted with silver, and both train and skirt being ornamented with bouquets and variegated foliage.

We must not forget to mention that the corsage of these dresses is usually so arranged that it may either be finished with a stomacher of jewels or with bouquets of flowers, which are now brought to an astonishing degree of perfection.

Flowers are universally adopted for coiffures in Court dress; and the wreaths now worn are much more becoming than the *coche peigne* so long in favour. The flowers must always harmonise with those on the dress; and the double violet wreath is so pretty that it might tempt one to give the preference to this flower whenever it is available. The Court plume of feathers should be small and graceful; and for young ladies the lappets should be added. More matronly ladies may prefer the small veil with the circlet wreath, or the veil with only feathers and a diadem of jewels.

[For the above information we are indebted to the courtesy of Madame EINSTEIN DEVY, 73, Grosvenor-stre t, Grosvenor-square.]

## THE PRINCESS ROYAL OF ENGLAND.

CHILDHOOD.

THERE rang an echo through her childhood's ear
Voicing the deeds of a now silent age—
Silent, but O not dead! Her hearted tear
Did generous drop upon the heroic page
Of England's story. Touched with each great line,
Mid the proud freedom which her sires inherit
Soared day by day the young ennobled spirit
Thrilled by the soul of chivalry divine.
So grew she, strong yet tender, as a flower
Reared 'neath the shelter of her native oak,
That country's memories her richest dower
Which never forged a chain or brooked a yoke.
So thrilled she to the music of her land
Like some fine lyre touched by a master-hand.

GIRLHOOD.

There is a spirit looking from her eyes
Which speaks her still a daughter of her clime:
For her, like sweetest incenses, shall arise
These newer glories born to later time.
For her, and for her Royal house—nay, more,
For each dear hearth and altar of her land,
As in the old heroic age of yore,
The lances of the free are laid in rest.
Britain's true sons, the self-same hero-band,
Mute-standing round the footsteps of the throne,
Wait but her call; and to her least behest
Would legions spring. It may be there is one
True knight who bears the colours on his breast
Of this "fair vestal throned in the west."

BRIDEHOOD.

There is a voice shall speak unto her soul
Before whose might even glory's self grows dim;
Dear as to soldier is the trumpet-roll,
Dear as to mariner the home sung hymn
Across the waste of waters. May it dawn
For her like morning on some upland lawn
Of her own English pastures! None the less
Her native seas shall in her heart be shrined,
With all their glorious histories entwined,
Though alien shores her plighted foot shall press:
Passing from clime to clime, like some bright bird,
Whose radiant wing blest airs from heaven have stirred;
The summer of the heart goes with her—but, still true,
Memory shall haunt the region whence she flew.

E. L. HERVEY

## PRINCE FREDERIC WILLIAM OF PRUSSIA.*

BOYHOOD.

LET us behold with what unshaken mien
Thou look'st thy life and fortunes in the face.
Not all the hoarded wealth which misers glean
And garner in the heart's most secret place
Can match thy sum. Before thee looms a throne,
Rising serene from out the balanced days
Of equal peace: like to some altar-stone
Reared unto Greatness 'mid the Roman ways;
On either side twin angels of the soul,
Justice and Mercy, crowne', uphold the shrine
Built up and dedicate to the divine;
While Love stands silent watcher o'er the whole,
Up-pointing with celestial finger fair
To paths of glory midst the viewless air.

MANHOOD.

Thine eager foot is on the upward ground;
Even now thou lookest Greatness in the eyes.
A little while we wait: one forward bound
Shall plant thee foremost where the nations rise.
Thine be the task to root this tree of Peace,
New planted, deeper in the grateful soil,
That never shall those home-born blessings cease
For which we late did bleed, and thirst, and toil.
This is thine her tage: we look to thee
To ransom hopes which in our hearts we fold
By deeds that shall exalt thee with the free;
For us, a tender hostage shalt thou hold
Of that clear faith which never knew a stain,
Binding our fealty by a twofold chain.

KINGHOOD.

O lightly fall the years on him whose head
Shall bear the weight of all his country's weal,—
The father of his people! Slowly shed,
May the ripe days fall round him: softly steal
For him the shadowy fingers of the hours
Along the dial of an honoured reign,
Tracing the record of ennobling powers
In Freedom's sacred cause roused not in vain
Thrice-blessed is he who to his country brings
Such wealth as only noblest natures give:
Then, shows become realities, and live;
And wisdom bows before the pomps of Kings.
Beyond are they or earth's or time's control
Whose sovereignty lies all within the soul.

E. L. HERVEY

* The accompanying Portrait of His Royal Highness is engraved from a Picture by Winterhalter, lithographed and published by Alexander Duncker, of Berlin; and sold in London by Mr. Albert Schloss (who has been honoured with the Gold Medal of the Queen of Prussia), 10, Portman-street, Portman-square.

TESTIMONIALS.—The Rev. Brymer Belcher, B.A., Incumbent of St. Gabriel's, Pimlico, has been presented with a massive silver salver and candelabrum for six lights by his parishioners, as testimonial tokens of their esteem of his career as their pastor, and of their admiration of his conduct in defraying, at his own expense, the cost of the painted east window and of the new organ in the church of St. Gabriel. To Mrs. Brymer Belcher was also, at the same time, given a miniature portrait of her husband; and the balance of the amount subscribed was expended in the purchase of a most elegant perambulator which was given to the reverend gentleman's infant child. To the Rev. R. J. Cuppage, B.A., a silver inkstand, presented by members of the congregation who for eight months have attended his Sunday evening lecture at New Springs, Haigh, Wigan, and also with an address expressive of their deep regret upon his resigning the charge.

## THOUGHTS IN THOROUGHFARES.

If he is the truest patriot who sympathises most sincerely with the joy of the nation to which he belongs, the real lovers of their country, during the present week at least, will be the gas-fitters. Whatever doubt there may be as to the genuineness of the joy felt by those who have paid for having their houses lighted up, there can be no question as to the quality of the pleasure experienced by those who have made large profits by the general illumination. While the gas-fitters must occupy the first place as patriots, the oilmen may be supposed to take the second rank; and, after them, as lovers of their country—for this night only—may be classed those persons who have been fortunate in the speculation of "seats to let," to view the fireworks. The peace derives a small accession of popularity from the jobmasters, who patriotically saw the propriety of public rejoicings, when carriages to view the illuminations began to rise to a high premium. This may be taking a very low estimate of the national joy; but it is to be feared that, if strict inquiries were to be made, the result would prove that the peace celebration is chiefly welcome to those who have been able to make a good profit out of it.

Many thoughts might occur to the philosopher if he reflected on the various designs for illumination that were to be observed in passing along the public thoroughfares. In the first place, he would begin to think upon the splendour of the designs on the front of many insurance and other companies, which could not bear to have as much light thrown on the doings inside as the exterior exhibited. The numerous transparencies might have been very suggestive if the real meaning of a transparency—something that can be seen through—had been generally carried out in the illuminating arrangements. If the dealer in adulterated articles had exhibited a picture representing some of his wares in the guise under which he sells them, and if, when lighted up, the transparency had shown them as they really are, the effect would have been novel and instructive.

The painter's art, as applied to illuminations, does not seem to have made much advance; for Britannia still looks as awkward as ever in her uncomfortable seat on a shield; and the British lion continues to wear that tameness of aspect for which, when appearing on a transparency, he has always been remarkable; the artists have, perhaps, shown some improvement in their ironmongery, for the trident of Britannia is handled with an accuracy which seems to show some familiarity with the instrument.

A contemplation of the extensive arrangements made for the illumination of all the public departments, as well as for the pyrotechnic displays in various parts of London, suggests the doubt whether eight thousand pounds—the sum named as that which the peace celebration would cost—will be the extent of the bill the public will be called on to pay for the privilege of rejoicing, in which the metropolis has been allowed to luxuriate. Whether the *jeu* will prove to have been worth the *chandelle* may be a matter of doubt; but it is almost certain that, in setting eight thousand pounds against so much gas and gunpowder, the money will be found incapable of going so far as the fireworks. Amidst the precautions taken by the authorities to guide the public on the eventful night was a recommendation to leave everything in the shape of valuables at home, and to go into the parks and streets with as little jewellery and money about the person as possible. This advice was, no doubt, well meant, though its publicity might furnish a hint to housebreakers to turn their attention from the empty pockets of the inhabitants, who would be all abroad, to the empty houses, where the Londoners would probably have left their cash and other effects to take care of themselves, while the owners and their families and servants were looking on at the fireworks. It must be admitted that, on the whole, the precautions taken to guard against accident were judicious, though Primrose-hill seems to be a spot where the public had something to fear from water as well as from fire, for they were at the same time warned to keep at a safe distance from the pyrotechnic display, and from an adjoining reservoir to which an almost fabulous power of inundation was attributed.

Notwithstanding the removal of Smithfield Market the equanimity of the Walking Philosopher is liable to occasional disturbance by the vagaries of oxen, that are sometimes seized with fits of eccentricity in the thoroughfares. It was hoped that the abolition of a cattle-market in the heart of London would render it unnecessary for droves of beasts to be promenaded through the principal streets; but that objectionable article, an infuriated ox, still gambols occasionally about town, and finds a place in the columns of the London newspapers. A few days ago one of these excited brutes visited the neighbourhood of the clubs, and made an obstinate attempt to enter the United Service, where it would have been necessary to blackball him on the spot with a bullet, if a butcher had not arrived, who slaughtered the animal at the door in the usual manner. It is rather inconvenient that Fall-mall should be turned at any time into an abattoir, or that any part of the metropolis should be converted, for however brief a period, into an arena for a sort of bullfight, in which butchers' boys act as the toreadors to worry the animals, while the public, in their own defence, are compelled to turn picadores, as well as they can, with their umbrellas and walking-sticks. If it is true that the control of the metropolis is entirely in the hands of the Metropolitan Board of Works, it is to be hoped that the body in question will regard an infuriated ox as an evil to which the inhabitants of London should not be exposed, and as a bull that ought to be taken by the horns at the very earliest opportunity.

The lover of excitement must have had during the present week a delightful time of it, between the peace rejoicings, the Derby day, and the trial of Palmer. It is satisfactory to feel that there is an end of the last-named affair, which has been a source of anything but wholesome curiosity during the last fortnight. Every day we have been told with great minuteness how Palmer continued to evince confidence in the result of the trial. Though many were under the impression that his coolness was a sign of innocence, it would naturally occur to any one acquainted with human nature that this apparent insensibility arose from a hardihood quite compatible with guilt; for no one possessed of proper feeling could have remained without anxiety under such a charge as that which impended over the now convicted murderer. The verdict has relieved the minds of many who felt assured of Palmer's guilt, but who feared that the imperfections of science and the quibbles of the law might leave a loophole for the escape of the secret poisoner. The jury have had the difficult task of deciding where doctors have disagreed; but, happily, there have been other lights besides the luminaries of the medical profession to dispel the darkness in which the truth was shrouded; and the voice of the country concurs in the justice of the conclusion that has been arrived at.

It is a strange coincidence that the Derby Day should have been that upon which Palmer, the sporting character, the betting-man, and the votary of the turf, was proclaimed to the world as guilty of murder. It is to be hoped that there are few, if any, of those present at Epsom whose nature might be perverted to the commission of such crimes as were now perpetrated. But, even amid the excitement of the Derby, the result of his trial was a general subject of conversation, and one which might have some effect on those standing on the verge of the gambler's career, or in danger of being drawn within its vortex. It is a judicious arrangement to have reviewed the metropolis of the disgusting spectacle of an execution, by the removal of the murderer to his own county, where, as far as human law can avail, one of his numerous crimes will be expiated. Thus the metropolis will be saved from the demoralising scenes to which a public execution always gives rise, and which will happily not on this occasion fall under the notice of the WALKING PHILOSOPHER.

HER ROYAL HIGHNESS THE PRINCESS ROYAL OF ENGLAND.—FROM A PHOTOGRAPH BY MAYALL

(SEE PRECEDING PAGE.)

HIS ROYAL HIGHNESS PRINCE FREDERIC WILLIAM OF PRUSSIA.—PAINTED BY WINTERHALTER

(SEE PAGE 588.)

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—MONDAY.

INDIA.

The Earl of ALBEMARLE briefly moved for a series of returns, ten in number, of the expenditure of the Indian Government under different heads, Civil and Military.—Lord GRANVILLE objected to the motion. The returns would entail great expense and immense labour without effecting the purpose the Earl of Albemarle had in view.—The Earl of ELLENBOROUGH believed that the Indian House would not be able to furnish four-fifths of the returns.—After a suggestion from Earl GRANVILLE that the Earl of Albemarle should withdraw all the returns, and apply to the Board of Control for the information which might be given as to some of them, the Earl of ALBEMARLE assented to this course, and the motion was withdrawn

APPELLATE JURISDICTION BILL.—The LORD CHANCELLOR laid on the table a bill, founded on the report of the recently-appointed Committee, effecting certain improvements in the appellate jurisdiction of the House.

### HOUSE OF COMMONS.—MONDAY.

JOINT STOCK COMPANIES BILL.—In the House of Commons, on the order for going into Committee upon the Joint-Stock Companies Bill, Mr. SPOONER inquired the nature of the alterations made in the bill and the reasons for them. He objected to its principle, which was contrary, he said, to the commercial policy of this country, and moved to defer the Committee for six months.—Mr. LOWE said he had made no alteration affecting the principle of the bill, which had been affirmed by the House; and it would be wasting time to discuss its details, which must be reconsidered in Committee. The amendment was negatived, and the House went into Committee upon the bill, the clauses of which, upwards of 100 in number, were under discussion for several hours.

PARTNERSHIP AMENDMENT BILL.

Mr. LOWE moved the second reading of the Partnership Amendment (No 2) Bill.

Mr. S. HASTIE said it was incumbent upon Mr Lowe, in order to make out the necessity for this measure, to show that there was a want of capital in the country; but he had not done so, and could not do so, inasmuch as capital was not beyond the wants of commerce. After urging specific objections to the bill which, instead of destroying, would, he said, create a monopoly of capital, he moved to defer the second reading for six months

This amendment was seconded by Mr. GREGSON, who appealed to many testimonies by eminent commercial men against limited liability, which, he contended, would encourage carelessness and ruinous speculation.

Mr. CARDWELL said he hoped the bill would pass the second reading without a division, although the bill would require to be altered in the Committee The measure which had just passed that stage gave great powers of limited liability to bodies of not less than seven persons, and this was a strong reason why analogous provisions should be made for smaller associations. He pointed out the particulars in which he thought the bill required changes; but these were for consideration in Committee.

Mr. T. BARING was opposed to the second reading of the bill, which wanted the necessary safeguards against fraud, and which could not, in his opinion, be so modified in Committee as to cure its imperfections. The Joint-Stock Companies Bill would give sufficient scope to the principle of limited liability. This bill carried out a peculiar theory not recognised by the law of any other country.

Mr. BAXTER spoke in favour of the principle of limited liability. Unlimited liability, he observed, compelled a retiring partner to withdraw his capital, whereas limited liability would induce him to leave it, at least for a time. The bill, however, in his opinion, went too far, and was too theoretical: but he agreed with Mr. Cardwell that it could be amended in Committee.

Mr. MASTERMAN strongly opposed the bill.

Mr KIRK moved that the debate be adjourned.

Upon a division this motion was negatived by 116 to 75.

Mr LOWE shortly defended the bill, which did not, he said, alter the law of partnership properly so called; its object was to get rid of a liability which a perverse ingenuity had unjustly attached to a contract which was not a real partnership; to restrict partnership within its proper limits; and to relieve parties who were not joint-stock contractors, but lenders of money.

After some remarks by Mr Hindley, Mr. Kirk, and Mr. Horsfall, the second reading was carried, after a division, by 97 to 66.

The bill was accordingly read a second time.

### HOUSE OF LORDS. TUESDAY.

THE DANUBIAN PRINCIPALITIES.—Lord LYNDHURST made an inquiry respecting the commission for remodelling the Government of the Principalities, and the reform of the so-called Divan. The object of the commission, as he understood, was to obtain a knowledge of the wishes of the inhabitants as to the proposed alterations. Such a course of proceeding would have been satisfactory. But he heard, with surprise, that at two recent councils held at Constantinople it had been resolved to depart from those conditions. He would inquire whether there was any foundation for these reports?—The Earl of CLARENDON said an assertion of the kind had appeared in a newspaper, but the Government had no such information, neither had the Turkish Ambassador Lord Stratford de Redcliffe would be prepared to declare any intrigue of such a tendency. The Earl of MALMESBURY called attention to the proposed union of two provinces of Roumania to Moldavia, and asked whether those two strong fortresses that were in a part of the ceded territory would be preserved in their original state, or would be dismantled.—The Earl of CLARENDON said that the fortresses would be maintained in their original state

The Oxford University Bill was committed, and ordered to stand for third reading

The Fire Insurances Bill was read a second time, after some considerable discussion

OUR RELATIONS WITH AMERICA. The Earl of ELGIN moved for a series of returns of the forces now in Canada. He did so on account of an impression that had gone abroad that the British Government intended to send part of the troops direct from the Crimea to Canada, in defiance of the United States Government. After adverting to the importance of more friendly relations between England and America, and declaring, from his own experience, that it was quite a mistake to suppose that the Americans as a people had any hostile feelings towards ourselves, he said that there would be great risk of the interruption of those friendly feelings if these impressions were allowed to continue without contradiction. It was of the utmost importance that the independence of Central America should be preserved. Lord Clarendon and Mr Marcy could settle the question in twenty minutes, if they came together. The sending of troops to the British possessions in North America was a mischievous step—injurious to the Colonies, and threatening to the United States. Lord CLARENDON said nothing had been done to infringe the neutrality of the United States. It would be better not to touch on the Central question until more despatches arrived. Her Majesty's Ministers did not contain the meaning of the nations. Lord PANMURE said the transport of troops to the Colonies was an imperial, not a colonial, act. The increase of regiments to North America did not exceed five regiments, not more than ten each. There was nothing to strike terror in such a force. That force would be used to garrison Quebec, and to collect the British army in Canada into one focus, so as to teach them to act in battle. Earl GREY was perfectly satisfied with the assurance. The war was over. There was nothing to quarrel about. In Central America the interest of other countries was trivial

### HOUSE OF COMMONS. TUESDAY.

PEACE AND GOOD WILL.

Lord PALMERSTON having moved that the House at its rising do adjourn till Friday, it was agreed to.

Mr. STAFFORD rose and adverted to the festivities which were about to be enjoyed in honour of the peace, and hoped that on the eve of those festivities the country should at least show that it was at peace with itself. Anxious that this should be the case, and fearing that Mr. Miall's motion, which stood next on the paper, would not conduce to good humour and peace, he would move that the House do now adjourn.

Mr. MIALL complained that this motion took him entirely by surprise. He had already lost one day by the adjournment of the House, and if this motion were agreed to, it would show that the enemies of the motion would spare no means of avoiding the exposure which this motion would introduce.

After some remarks from Mr. Moore, Mr. Hadfield, and others,

Lord PALMERSTON said he could not support the motion for adjournment, as he thought it was not decorous to get rid of the motion in this manner.

Mr. NAPIER hoped Mr. Stafford would not persist in his motion.

Mr. STAFFORD, in deference to the appeals, withdrew his motion

THE IRISH CHURCH.

Mr. MIALL then moved, "That this House resolve itself into Committee to consider the temporalities of the Irish Church, and other pecuniary provisions made by law for religious teaching and worship in Ireland." His chief reason for submitting this motion was the fact that, although the Roman Catholics were willing to allow the Irish Church to remain as it was, the Protestants of Great Britain were not. This had been abundantly shown by divisions which had taken place in that House on the subject of votes for sectarian purposes, and particularly by the success of Mr. Spooner's motion for the disendowment of Maynooth College. The future was pregnant with great practical changes, and he thought it would be well to begin early and deal with vital questions when the public mind was calm, instead of waiting till society was convulsed. The Irish Church, like all other State Churches, had been distinguished by persecution and the exercise of tyrannical ascendency An anomalous state of things had sprung up in Ireland, and the only cure was to withdraw State support from all sects alike, and he thought this could be done with the most scrupulous regard to the equitable rights of religious communities and the just claims of individuals. All that he wished to pledge the House to by his vote was the complete religious equality of all sects in Ireland. The claim of the Irish Church to its property depended upon the will of the Legislature. State policy was the parent of that Church, and State policy might disinherit its own offspring. He had faith in the Church of Ireland, in the machinery of its bishops and clergy; but he had no faith in the preposterous arrangements made by the State for its wealth Mr. Miall mentioned that his plan for carrying out his equitable adjustment scheme would be to transfer the Church property to the Landed Estates Court, and that he would find good use for his surplus funds in the construction of piers, and harbours, and other purposes, in the benefit of which the Irish people would participate.

After a pause, Mr. KIRK opposed the motion, and expressed a hope that the House would not be led away by fallacious representations about the efficacy of the voluntary principle, and by this means take the foolish course of abandoning certainty for hope.

Mr. W. S. LINDSAY adduced statistics to show that the unendowed Presbyterians of Scotland collected more money for religious purposes than the endowed Presbyterians of Ireland.

Mr. NEWDEGATE expressed a hope that the House would mark Mr. Miall's attempt with reprobation, coming as it did at a time when Protestantism was making great progress in Ireland. Mr. Miall was acting a jesuitical part. He professed to be the friend of the Irish Church, and, under that disguise, he was ready to stab her in a vital part.

Mr. P URQUHART supported the motion. He could not see the justice of diverting funds, in the advantage of which all the Irish people should participate, to supporting the Church of a small minority.

Mr. G. A. HAMILTON complained that the Secretary for Ireland had not stated the views of the Government on Mr. Miall's proposal for confiscating the property of the Irish Church. Mr. Hamilton expressed his belief that it was the duty of the State to establish and support a Church which taught doctrines believed to be true.

Mr. W. J. FOX could not see how it could be the "duty" of the State to endow a particular sect, seeing that the performance of that duty involved injustice to all other sects.

Mr. STAFFORD condemned with severity upon the circumstance that Ministers should have allowed the debate to go on for upwards of four hours without stating their opinion. Whatever difference of opinion might exist upon the proposal to abolish the revenues of the Irish Church among members of that House, at all events the people had a right to know whether any difference of opinion existed amongst Ministers themselves.

Mr. HADFIELD maintained that the withdrawal of one or both of the grants to Maynooth College and the Regium Donum would inevitably lead to the fall of the Irish Church, and with that fall would come peace to Ireland.

Mr. NAPIER could assure Mr. Miall that his project of confiscation could not be carried out without a struggle, the consequences of which he was afraid to contemplate.

Lord PALMERSTON jocularly expressed his gratification to find that honourable gentlemen opposite were so anxious to know what were the opinions of the Government, being unable as it appeared, to make up their own minds till they had her Majesty's Government to guide them. He regretted much the recurrence of such discussions as the present, calculated as they were to fan the flame of religious discord. It would be far better that such debates should dwell upon points upon which they were in unison than upon matters on which they differed. As to the question at issue he could not agree with those who maintained that no value was to be attached to the fifth article of the Act of Union. If that article meant anything it was that the Church of Ireland in harmony with the Church of England, was to be maintained, but without precluding the right of Parliament to deal with either Church as it deemed best, with the view of rendering it more efficient. He could not concur in the motion, seeing that he could not consent to substitute the voluntary principle for a church establishment He deemed a church establishment essential to the right organisation of every civilised country

Mr J. MACGREGOR supported the motion.

The House divided—For the motion, 33; Against it, 163: majority against, 70

## METROPOLITAN NEWS.

DINNER TO THE JUDGES AT THE MANSION-HOUSE.—On Wednesday night the Lord Mayor and Lady Mayoress entertained her Majesty's Judges and many distinguished members of the bar at the Mansion-house. Among the company were—Lord Campbell and Lady Stratheden, the Lord Chief Justice and Lady Jervis, the Chief Baron and Lady Pollock the Lord Justice and Lady Turner, Vice-Chancellor and Lady Sir Lindley, Vice Chancellor and Lady Stuart, Mr. Justice and Lady Wightman, Mr. Justice and Lady Erle, Mr. Justice Vaughan, Mr Justice Crowder, Baron and Lady Martin, Baron and Miss Bramwell, the collector-General and Lady Bethell, the Queen's Advocate, the Right Hon Sir Fitzroy Kelly, the Solicitor-General, Mr. Serjeant Gibson, Mr. Napier, M.P., Mrs. and Miss Napier, Mr. Commissioner Fane, Sir F. Thesiger, M.P., and Lady Thesiger, Mr. Roebuck, M.P., &c.

REMOVAL OF PALMER FROM NEWGATE.—Contrary to general expectation, Palmer was removed from Newgate prison on Tuesday night At twenty minutes to eight a cab and pair drove up to Newgate, one of them entering the gaol gates, and the other remaining outside the governor's entrance. In a few minutes after wards Palmer was brought out of the governor's house, by the back way, which, after the entrance of Mr. Wembelsbach (the governor) and two officers, drove off as rapidly as possible, scarcely being noticed. A great crowd, however, had collected round the gaol gates, a few seconds afterwards, the second cab was brought out empty, they saw that they had been deceived, and immediately ran after the first cab, which, owing to the crowded state of the City of Newgate street at the time it started, they succeeded in overtaking opposite Hatton garden. Several hundred persons collected here, and hooted the prisoner in the most excited manner. The prisoner sat in the centre compartment of a four-wheel carriage, and the blinds were at once drawn across the windows Palmer was dressed in convict's costume (having been divested of his own clothes until an hour after he left the prison) was given, his feet were ironed, and he was handcuffed, a cloak covering the whole

ASSOCIATION OF THE FRIENDS OF POLAND. The twenty-fourth anniversary of the London Association of the Friends of Poland took place at Portman Rooms last night, Mr. Marquis Wyse, M.P., in the chair. The chairman expressed his regret that the events of the year did not appear to afford any prospect of the restoration to the throne of Poland of a Polish sovereign. He, however, had hopes that our relations, although somewhat changed as to their form of the great Polish question, while considering the peaceful commerce of the present period, the association does not consider it expedient to take any course or pronounce any opinion which might in the least prejudice the cause of Poland in the opinion of any of his friends. Its determination, therefore, is to wait events, in the anxious hope that something may be done for the Polish nation, if not restored to some measure with its wants and wishes, yet permanently conducive to its external prosperity, and not inconsistent with its national honour." Mr. Ferguson, M.P., seconded the resolution, and it was carried unanimously. The report was then read. It stated that the total income of the association for the current year had amounted to £739 14s 6d, and the expenditure to £801, of which £318 11s. had been expended in relieving 353 cases of distress. The report noticed in detail the proceedings of the association during the year, and, in conclusion, expressed its determination to fulfil its primary duty of proclaiming the truth respecting Poland. The Earl of Harrington said he had hoped that the late war with Russia would have led to some advantages for, if not to the restoration of, Poland. He confessed, therefore, that he was much disappointed with the terms of the conclusion of peace. After some further proceedings, the Marquis of Breadalbane was appointed president for the ensuing year, and thanks were voted to him for presiding at the meeting

HEALTH OF LONDON DURING THE WEEK.—In the week that ended on Saturday the deaths of 1,586 males and 476 females, in all 1061 persons, were registered in London. In the corresponding weeks of the ten years 1846-5 the average number of deaths was 988. If this is raised in a certain proportion for comparison with the deaths of last week, which occurred in an increased population, it becomes 1087. The figures show that the rate of mortality last week was slightly below the average. It plus continues to be more fatal than any other epidemic; but the mortality under any head in this class is not excessive. Last week the births of 802 boys and 885 girls, in all 1765 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1442.—*Registrar-General's Return.*

A MYSTERIOUS AFFAIR.—About twenty minutes past three o'clock on Wednesday morning, as the lamplighter was turning off the gas on London-bridge, he saw a girl on the footpath-side of the bridge, alone. He passed her; and in about five minutes afterwards, on returning over the bridge towards the City, he saw the same girl standing outside on the ledge below the railing; and a man, standing on the seat of the recess, holding her by the wrist. The man said to her, "Jump in!" and, letting go her wrist, said, "Go on, and I'll follow you." She directly jumped from the bridge into the water. He then said, "My God! I did not think she'd do it!" The man, who appeared excited, as if he had been drinking, was taken into custody, and brought up at the Mansion House on Wednesday, but was remanded till further information could be obtained.

## EPITOME OF NEWS.—FOREIGN AND DOMESTIC.

The Queen and Prince Albert have made a joint contribution of £300 to the fund for the erection of the "Memorial Church" at Constantinople.

Lord Cowley, as usual, invited about a hundred persons to dine at the British Embassy. The company consisted of the Ministers of State and the Foreign Ambassadors, including Count Orloff.

The Prince of Prussia will not go to the coronation of the Czar. He will remain at Berlin during the stay of his sister, the Empress Dowager; and, after accompanying her to the waters at Wildbad, will join his son, Prince Frederick William, in England.

It is said that the Duke of Cambridge is to represent her Majesty at the approaching coronation of the Emperor of Russia.

The health of the Empress Eugenie has improved so much that the visit to her marine villa is certainly put off till after the baptism of the Prince Imperial. The preparations for her reception at Biarritz are ordered for the middle of July

Prince Frederick William of Prussia, it is said, will probably make a five weeks' stay in England.

The King of Prussia and his sister, the Empress Dowager of Russia, with her son, the Grand Duke Michael, arrived at Potsdam on Monday last.

His Royal Highness the reigning Prince of Baden, with suite, arrived at Buckingham Palace shortly before eleven o'clock on Wednesday, from Dover. The Prince has come on a visit to her Majesty.

The Emperor of the French left St. Cloud on Saturday morning, at half-past nine, and drove himself to Paris in a low phaeton and pair, and presided at the Council of Ministers. His Majesty, who was accompanied by General Fleury, returned to St. Cloud at five o'clock.

The King of Belgium has selected the Prince de Ligne, now Freeedent of the Senate, to represent the Belgian Crown at the Coronation of the Emperor Alexander II. The Prince, who performed the same expensive functions at the Coronation of Queen Victoria, has accepted the mission, and already selected the principal persons whom he purposes to take in his suite.

The Emperor of Russia made his entry into Warsaw on the evening of the 22nd instant. Count Nesselrode, Baron de Meyendorff, Prince Worenzeff, and the Prussian Ambassador, Baron Werther, left St. Petersburg for Stettin, on the 24th, in a steamer. The Emperor of Russia was expected in Berlin this week.

The Marquis Alfieri, President of the Senate, has refused the mission of representing the King of Sardinia at the coronation of the Emperor of Russia.

Sir Henry Bulwer has been selected to proceed to Bucharest, for the purpose of representing Great Britain in the Special Commission for deliberating upon the future organisation of the Principalities

Queen Marie Amélie and the Duc d'Aumale arrived at Milan on the 17th, and left on the 20th for England, by way of Switzerland.

The funeral of the late Lord Adolphus Fitzclarence took place on Saturday last. His Lordship was buried in the family vault of the Wombwells in Yorkshire. The Duke of Cambridge and several relatives of the deceased attended the obsequies.

The Pope is anxious to have a Congress of the Italian Sovereigns and Princes at Rome, with the addition of representatives of France and Austria. He is perfectly disposed to make concessions to the spirit of the times, but demands material support for a period, to resist tumult and outbreak

A new "hymn" for three voices, by Cardinal Wiseman, and called "God bless our Pope," has just made its appearance.

The Crown Prince of Wurtemberg and the Grand Duchess Olga, his consort, passed through Dresden last week on their way to Warsaw, to pay their respects to the Czar

Lord Holland, who has lately been suffering from severe indisposition, is now out of danger, and rapidly recovering.

The Emperor of the French has intimated his intention of presenting his portrait and that of the Empress to the Court of Directors of the East India Company

The Queen Dowager of Denmark, Caroline Amalia, who arrived at Hamburg from Copenhagen last week, has left that city for Hanover, en route to the baths at Ems, at which place she intends remaining some time for the benefit of her health.

The Highland Society of Newcastle have resolved to present Sir Colin Campbell with a silver snuff-box, inlaid with gold, as a mark of their high estimation for his services in the Crimea.

It is said that the King of Sweden has accepted an offer of the British Admiralty to present Sweden with some of the newly-built gun and mortar boats, as models for similar construction in the Swedish dockyards

The Hon. Edwin Berkeley Portman, son of Lord Portman, has been appointed private secretary to the Right Hon Sir Benjamin Hall, Chief Commissioner of Public Works, in the room of Mr. A. D. Berrington, resigned.

The Pope has inaugurated the repaired Palace of the Quirinal by a dejeûner given to the Grand Duke of Tuscany and his family. It was the first visit paid to the Quirinal since the flight in 1848.

The Printers' Almshouses at Wood-green, Tottenham, will be inaugurated there by public breakfast on the 11th June next, at which Earl Stanhope has expressed his intention of presiding.

The King of Oude has got as far as Benares, on his way to England, in quest of the redress of his wrongs, urged to the measure, much against his inclinations, by a band of grievance-mongers proposing to plunder him.

The First Lord of the Admiralty will receive officers on the several Thursdays of June and July, at two o'clock; and any officers wishing to see Sir Charles Wood are requested to enter their names in a book kept for that purpose in the hall, stating their Christian names in full, and their rank in the service

The King of Prussia intends to erect a monument to the late M. Hinckeldey, opposite the police hotel at Berlin.

Mr. Bright, M.P., arrived at Inveraray on Monday week, where he intends to remain for a short time,

The Archbishop of Munich has been placed, by Pio IX., at the head of the College of the Propaganda. The Archbishop was confessor of the Princess Elizabeth, now Empress of Austria, and has recently been made a cardinal, through the interest of the Empress Frances Joseph.

Mr. J. C. Deane, who was assistant secretary at the Dublin Exhibition of 1853, and has more recently directed the exhibitors' department at the Crystal Palace, has been appointed general manager of the Exhibition of Art Treasures to be held at Manchester next year.

Baron Werner, Under Secretary of State for Foreign Affairs, has left Vienna for Rome on a political mission.

The Rev. Henry Brooks christened no fewer than 111 children on Sunday, at his church, St. Nicholas, Liverpool.

Austria has been obliged to send a diplomatist to Rome to obtain a milder interpretation of some of the clauses of the Concordat than the Austrian clergy seem inclined to give

A grand dinner was given by Prince Jerome on the 23rd inst. at the Palais Royal, at which the Archduke Maximilian and the persons of his suite, and Prince Napoleon, were present.

Professor Frederick Raumer, who entered his seventy-sixth year a short time ago, is on the eve of starting upon a scientific tour through Denmark, Sweden, and Norway

On Monday evening a public meeting, under the auspices of the British Anti-tobacco Society, was held in the Corn Exchange, Manchester, which was filled The Rev. Canon Stowell presided.

The Sultan has sent the Order of Medjidié to the Emperor of Austria

Baron Sina, the well-known banker of Vienna, has left a fortune of nearly 80,000,000 of francs.

France and Austria have sent circulars to their diplomatic agents throughout Italy announcing their determination to afford assistance against insurrectional movements, but, at the same time, urging certain reforms as indispensable,

The ship-building trade is at present unusually active on the Wear. There were six vessels launched last week, with a total tonnage of 2,097—this being about the average tonnage launched every fortnight during the last four months.

A Berlin despatch states that the United States have declared that they will consent provisionally to allow the Sound dues to continue, but that they cannot recognise them in principle.

The total quantity of proof spirits charged with duty in Ireland last year amounted to 7,054,504 gallons, of which 836,846 were for exportation.

In consequence of the extension of the murrain among cattle in Poland, a sanitary committee of twelve members, one of whom is a veterinary surgeon of eminence, has been appointed to each of the five governments. They are ordered to adopt the most active measures to investigate causes, and apply remedies.

## NOTES OF THE WEEK.

THE race and the rejoicings are the popular topics of the week; even the interest of the great trial, which closed with so righteous a verdict on Tuesday, being speedily subordinated to that of the national holidays. The Prince Consort, with his intended son-in-law, once more witnessed the Derby, and the assemblage of some quarter of a million of people, of every conceivable class, all in good humour and eager to enjoy themselves. Did it suit the Prince's engagements to attend this English holiday more frequently, he would always be welcome. The day was propitious until the latter part of the afternoon—the sun shone brightly upon the course during the "clearing," and Ellington won and society laughed in perfectly fine weather; but a little later a dense leaden canopy was thrown over the Downs, and the rain descended with a sort of fury, as it by raging itself for the previous enjoyment it had abstained from spoiling. But the people's good firm, carriages drew down their vizors, thousands of umbrellas flew open, while the unarmed dived under the vehicles, or stood shoulder to shoulder; and the other races were run in defiance of the tempest. The road from the course to the rail was certainly a bad one; the Epsom mud is easily made, and is very slippery, and the long procession was occasionally checked by the fall of some unlucky stumbler, who was but slightly consoled in his miseries by the roar of his neighbours, and their compliments upon the elegant way in which he relieved the scavenger of the duty of removing the Surrey mud. Let us add that the railway arrangements were very good: the double barriers lightened the crush and preserved order, and the means of return were constant and rapid. It is to be regretted that the morning was marked by one fatal accident at the station, caused entirely by the reckless impatience of the unfortunate victim, so eager for a place that he could not wait until the arriving train had stopped. There is no providing against the result of wilful folly. The Derby of 1856, regarded in a sporting light, will be remembered by the sufferers of misplaced confidence, who have lost tremendously. The "Blue Ribbon of the Turf" seemed all but in the grasp of the adventurous Earl of Derby; but Fortune was again coy, and would not allow his Lordship, like a Sultan, to throw his *Jazzoletto* to her.

The fireworks will have ample record elsewhere. Here it may be enough to record, at present, that his Grace the Archbishop of Canterbury has got the word "Peace" in the front of his palace, as a text, and a sermon upon it in the boarded and tarpaulined window of his library. The hurricane-like rains of the first Sunday after the music had been prohibited prevented disturbance or demonstration on that day. The people very wisely saved the "Sunday finery," which gives such offence to Mr. Baines, from the pitiless storms, and the good-humoured antics of some of the comparatively few persons present are scarcely worth chronicling. There was a body of pickpockets in attendance, who rushed about and tried to get up a scene for the purpose of plunder, but they had no material to work upon, and it seems a pity that the police did not inflict chastisement upon them, the opportunity being so favourable for a *razzia*. The people had recourse to an orderly and rational mode of expressing their dissatisfaction with what has been done, and Sir B. Hall attended public meetings and gave explanations which show how utterly anything like principle has been absent from the conduct of the Government on this question.

The great poison case is over, after twelve days of investigation, and William Palmer, the prisoner, lies in Stafford gaol under sentence of death. We adverted to the ability with which the Attorney-General opened. The case for the Crown closed on the sixth day, and then came the speech of the eminent Irish advocate, Serjeant Shee, for the defence. It lasted eight hours, and its forensic ingenuity is questionless, though the expected eloquence was in some degree missed—the subject, perhaps, hardly justified the anticipations that had been formed. The broad basis of the defence was the effort to overthrow, by medical testimony, the evidence of the professional witnesses for the Crown. Some persons think that the Serjeant exceeded the advocate's license in trying to produce an impression by his own assurance that he believed his client innocent, and Lord Campbell distinctly declared that such a statement was valueless—a mere form. The Attorney-General replied in one of the most powerful speeches ever delivered, and the Judge occupied nearly two days in summing up. An hour and a half, a period taken probably as matter of decorum rather than because a doubt existed in a juror's mind brought the verdict, which in half an hour was telegraphed to every part of the kingdom. It has been received, as it should have been, as the result of a calm, complete investigation into a terrible case. Every one feels that justice is in course of fulfilment. Yet it is possible that petitions may be got up for sparing the life of this miscreant poisoner.

Some of the American papers, and some of the noisier American politicians, continue to bluster against this country, but the chances of a rupture are not felt to be thereby increased, at least in the minds of those who can distinguish between the demonstrations of trading statesmen and their tools, and the deliberate expression of a people's sentiments. There cannot be the least question that upon all the matters in dispute the English Government have behaved in the spirit of gentlemen, and the American Government in that of attorneys; but there is every reason to believe that the vulgar "smartness" in which President Pierce's Administration piques itself is distasteful to the good and true men in the States. The worst of it is that these men cannot always make their voices heard, and coerser lungs carry it; but, after all, bawling goes for nothing. The fighting with the Costa Ricans seems to be proceeding, but the utter untruthfulness of a great part of the American journalists makes it difficult to say what is the state of the contest. Walker would appear to have suffered heavy losses, and some of his people have been taken prisoners and shot. It would bring a disagreeable subject to a satisfactory conclusion if this man who has been denounced in the American Parliament as "a buccaneer and a ruffian," should fall into the hands of those whom he has enraged, and should follow the pathulary fortunes of his prototype, Lopez. From the latest news, if it can be believed, the prospects of such a termination to his career were not altogether remote. In reply to an inquiry, Lord Clarendon has explained that the Costa Ricans had asked that English weapons might be supplied to them, and that this was assented to on certain terms, but that nothing further had been done. The position of parties is simply this—a man who happens to have several pairs of good pistols is applied to by a neighbour who expects to be robbed, and who wants a pair to arm himself and his servant. The reply is that he may have a pair for about the cost price. And it seems a pity that he does not take them.

PARIS IMPROVEMENTS.—All English visitors to Paris have not, probably, visited the *Marché du Temple*. It is an old clothes-mart, erected on the site of the famous convent of that name, and much resorted to by workmen, grisettes, and the shabby-genteel class, who are at constituting daedjeun with economy. The convent was formerly that of the Knights Templars, and its history is curious. Philip the Fourth of France, one of the most unpopular Monarchs that ever sat on the French throne, was riding outside the city one fine morning towards the close of the thirteenth century, when, being perceived by some of his loyal subjects, he was set upon with staffs and stones, and only saved his life by the proximity of the Templars' convent, where he found a ready refuge. The magnificence of these military knights so inflamed his avarice that he repaid their hospitality by abolishing the order, putting them to death, and by flouting their goods. In one of the towers which was left standing, his descendant, Louis XVI., was imprisoned by King Mob—a kind of retributive justice for the murder of Jacques de Molay and his companions. This market is to be swept away, and in its place a public garden planted. This garden, by the Emperor's special desire, is to contain a monument to the memory of Louis XVI. and Marie Antoinette, the plans for which, it is said, have been drawn under his Majesty's personal inspection, as he is understood to have expressed a wish to have his name associated with the tribute of respect it is thus intended to pay to the memory of those illustrious victims of a revolution brought on by the faults of their own race.—*Letter from Paris.*

On Saturday last a young man threw himself from the top of the Column of July at Paris, and was killed on the spot.

## THE FRENCH UNIVERSAL EXHIBITION OF AGRICULTURE.

THIS Exhibition, by far the most important that has ever been held in any city, opens to-morrow (according to the French custom, on Sunday) the 1st June, and will continue open until the 7th. On the 8th, Thursday, it will be open free; and at two o'clock the distribution of prizes will take place—a most picture-sque and imposing ceremony.

When we say that it is the most important agricultural exhibition that has ever taken place, we are not forgetting the annual gatherings of the English, Scotch, and Irish societies, which have been as it were the parents of the French Exhibition. But the agricultural display at the Palace of Industry is the first in which all Europe has been permitted and enabled to take part. Until the reign of the present Emperor it has been the policy of France to exclude every kind of competition an comparison. Now, the necessity of agricultural improvement, proved by repeated short harvests, and by the annually-increasing deficiency of butcher's meat in the principal French markets, has been met by a rational remedy, by an invitation to an Agricultural Peace Congress, in which the best men and the best produce of every country will be represented. It may be observed, in passing, that, until the execution of the great lines of railway connecting Paris with the remoter provinces of Germany, such a live-stock show as opens to-morrow was impossible. And few except the owners of English live stock could either offer or have any commercial temptation to risk the dangers and incur the expenses of a sea voyage.

Last year the Paris Agricultural Exhibition was lost amid the glories of the Manufacturing Exhibition, and received little notice from the English press. Indeed, one agricultural editor so far mistook the temper of the times as to sneer at the whole attempt; thinking, perhaps, that such a tone would be gratifying to the ancient prejudices of his numerous farmer-readers. He has since found out his mistake, for the kindly reception given to, and the splendid prizes gained by our English and Irish exhibitors were soon noised through the rural districts; and this year the specimens from the United Kingdom are extraordinary both in number and in quality.

From England alone there are 29 exhibitors of 289 implements and machines, including all out best men. The Association of English Agricultural implement-makers number about 55 members.

In Live Stock there are 52 exhibitors, sending 90 cattle, 132 sheep, and 36 pigs, besides 198 poultry.

The Stock exhibitors represent Shorthorns, Devons, and Southdowns well. Of Herefords there are very few specimens.

Among the exhibitors are some of our best breeders, but we miss some first-rate breeders, and the list is singularly unaristocratic. Southdowns come out strong, and so do Cotswolds. In produce our turnips will be the most remarkable.

The Scotch share of the Exhibition has been remarkably well arranged, and includes about 300 head, from which, both in Highland cattle and sheep, the owners of the great herds of beef-producing animals in Galicia, Hungary, and other regions of steppes, will be able to select bulls with great advantage. We are glad to see that the Austrian Government has sent not less than 337 head of stock—some of which have travelled, by land and rail, from 1500 to 2000 miles.

Ireland will do her fertile soil and fine climate—so peculiarly adapted for breeding stock—full honour. The Irish Committee sends fifty-four Lots, including some magnificent specimens of Shorthorns, a class of cattle in which Ireland bids fair to excel every other country.

So much for a preliminary notice. We have taken measures for giving a complete account, with illustrations, of this most interesting and important Agricultural Feast and Tournament.

CRYSTAL PALACE FLOWER SHOW.—The largest number of visitors that have visited the Crystal Palace this year were attracted here on Saturday last by the first flower show of the season. The arrangements evinced great judgment and good taste. Upon a cruciform stand in the centre of the building was placed a very charming collection of stove and green house plants. In the class Messrs. Veitch and Sons gained the first prize of £25. Other stands extended as far as the East India Court in one direction, and the basin in the other. The collection of azaleas excited considerable attention. One of the finest plants, grown by Mr. James May, took the first prize of £20. A prize of the same value was awarded to Mr. Gibbs, gardener to Mr. Avery, for a very fine orchid. The £20 prize of class 4 of Orchids fell to a fine young plant, the property of Mr. Cuthbert, the eminent florist. Mr C. Turner's display of pelargoniums justly obtained a prize. The display of fruit was very good. The Royal National Tulip Society exhibited a fine show of our tulips. In a word, the entire fête was arranged in a most admirable manner, and far surpassed any similar exhibition the neighbourhood of the metropolis has witnessed. The fountains played at four o'clock. The bands of the Life Guards and the Crystal Palace Company played alternately during the day, and added much to the gaiety of the entire scene.

INSTITUTION OF CIVIL ENGINEERS.—On Tuesday evening Mr. Robert Stephenson, M.P., as president of this institution, gave the annual conversazione in Great George street, Westminster. The company numbered 1200 guests, the majority of whom were ladies, and a brilliant, the arts, and the sciences, and rarely have we witnessed so large an assemblage of persons of eminence. The suite of rooms was hung with some choice paintings by living artists; and there was exhibited some fine sculpture, and articles of rare art and virtu. In the theatre of the institution a large collection of working models of new scientific inventions proved very attractive; and the arrangements made by Mr. Charles Manby, the able secretary of the institution, are entitled to special commendation.

Accounts from Oporto state that the prospects in the Douro wine districts are extremely bad, and that the ages of the progress of the oidium threaten a worse vintage even than that of last year.

## MUSIC.

ITALIAN OPERA AT THE SURREY THEATRE.—The series of Italian operas announced for performance at this theatre give so much promise of excellence in regard to the artistic arrangements, that the undertaking, though a bold one, bids fair to be most successful

reality loves her, and who inspires her with a similar attachment. Actuated by a pure and mutual passion, they retire to the country, where they live together in happy seclusion. One day, in *Alfred's* absence, *Violetta* receives a visit from a venerable old gentleman, who announces himself as the father of her lover. He represents to her the ruinous consequences of his son's present course of life, and urges her to save him, by consenting to leave him. Resolving to sacrifice her own happiness for the sake of his welfare, she departs on the instant for Paris, leaving him in the belief that she is faithless, and has forsaken him for another. She returns to her former life, and afterwards meets her lost lover at a party given by one of her friends. *Alfred* is furious at the sight of her, insults her grossly, challenges the man whom he considers his successful rival, and the poor girl is carried fainting from the apartment. Her heart is now broken, and nothing remains for her but to die. In the last scene she is in her bedchamber, reduced to the extremity of weakness, but sustained by newly-awakened hope; for she has received a letter from her lover's father, telling her that, moved by her noble self-sacrifice, of the extent of which he was not at first aware, he cannot resist her sufferings, and is about to bring his son again to her feet. While this prospect is keeping up the dying flame of her life, the father and son suddenly arrive. Her lover flies to her—the first moment is rapture—but the shock is fatal, and she dies of joy in his arms.

Such is the part in which the young actress first appeared before the English public; and nothing could be more charming than her whole performance of it. It embraces the most brilliant gaiety and the deepest pathos; and it is difficult to decide in which phase of the character she was most successful. Signora Piccolomini is not above one or two and twenty, and looks still younger. She is small and slight, but exquisitely formed, and full of grace. Her features are instinct with intelligence and feeling. In the first scene, where she appears as the sprightly hostess of a gay party, nothing could be more attractive than her exuberant but perfectly elegant vivacity. In this scene there is a little Anacreontic song, sung by her with Calzolari (in the part of the lover), and accompanied by the chorus. This air, so pretty that it raised expectations as to the general quality of music which were disappointed, was sung so delightfully, with such fire and *abandon*, that it threw the audience into a transport of enthusiasm which did not subside during the whole performance. In the great scene of the second act, between *Violetta* and *Alfred's* father, where the girl, after a fearful struggle, resolves to sacrifice herself for her lover's welfare, Mdlle. Piccolomini showed still higher powers. The tumult of contending passions, ending in a noble and dignified resolution, was painted with a truth and beauty not to be surpassed. As to the closing scene of the whole, we cannot attempt to describe it, made up as it was of a thousand minute traits of nature and feeling which went at once to the heart of every one, suffusing many bright eyes with tears, and moving even the most "unused to the melting mood." Rachel's dying scene in *Adrienne Lecouvreur* is the only thing to which we can compare it.

Mdlle. Piccolomini, young though she be, is already an actress of the highest class. We cannot as yet say the same thing of her as a singer; though we have no doubt that in this respect, too, she will reach the summit of her art. With the most precious endowments of nature she is profusely gifted. She has a lovely voice, a pure soprano, of a sympathetic quality, and great power and compass. The beauty of its tone, too, is heightened by the sensibility they express, and she sings with great refinement and delicacy. One thing only she has yet to learn—that finished execution which is the result of consummate art, and of which the finest specimen is to be found in the singing of Alboni. But this is a defect which time and study will be sure to remove; and it is but a slight spot amid the blaze of so many beauties.

The opera, in its *ensemble*, is admirably performed. Calzolari supports his well-merited reputation; and Beneventano, a stranger, has gained golden opinions as a singer by his fine voice and pure style, and as an actor by his dignity and feeling.

MDLLE. PICCOLOMINI, OF HER MAJESTY'S THEATRE.

## MARIA PICCOLOMINI.

NATURE waives ceremony with certain beings. Great musicians are recognised in the first tones, and noble minds declare themselves by an impulse. This was the case with Maria Piccolomini, who made her first appearance at Her Majesty's Theatre on Saturday last. Descended from one of the most ancient and most illustrious patrician families of Rome, this gifted girl, urged on by an invincible impulse—with that confidence of success which is so often the companion of real genius—cast aside all the prerogatives of her high station, and, despite the tears and the entreaties of her noble relations of the houses of the Piccolomini and the Amalfi,* she made her début at Rome to earn the laurels and the fame of Corinne.

Rank, position, fortune, family traditions, even the grim portraits of her mail-clad ancestors, were of no avail against the mighty tide of song that surged within the gentle breast of this girl of seventeen summers.

She made her début at Rome in 1852, at the Argentine Theatre, in Donizetti's opera of "Polinto."

It is only those who have witnessed an Italian audience on a "first night"—whether the début of a new singer or the production of a new opera—that can know the ordeal which has to be gone through. Debarred from taking any part in politics, unaddicted to the manly sports of more northern nations, the voluptuous yet intelligent Italian courts the Muses; the pit of the Opera House is his arena, it is the touchstone upon which the true gold of a prima donna is tried beyond appeal. The scene at the Café Martini at Milan, half an hour before the Opera on a first night, is a scene as unique as it is curious. The glories, alas! of the Scala have passed away. The 3rd November, 1852, was such a night in Rome.

We cannot do better than quote the passage of a letter written under the impression of the scene:—

A new prima donna (says the writer) has appeared at the Argentine Theatre, in Donizetti's opera of "Polinto." Her success has been most brilliant. Her voice is exquisitely sweet—full of liquid birdlike notes—and is, moreover, of considerable power and compass. She is little more than seventeen years of age, and of considerable personal attractions. With such advantages as these, the success of any prima donna would be tolerably certain. But what has raised the enthusiasm of the Roman public to an unusual height is the fact that the young débutante is niece to one of the Cardinals, and a member of the historical family of the Piccolomini. So great is her enthusiasm for music, and so strong is her passion for the exciting triumphs of the theatre, that her venerable relative, fearing the young girl's health might suffer in case of a refusal, at length yielded his consent to her appearance before the public. It is said that the Grand Duchess of Tuscany, with whom Mdlle. Piccolomini is a particular favourite, used her influence in bringing about this result. It is only under the sky of Italy that one sees the passion for art so strong as to induce a young girl, rich and beautiful, and a member of an illustrious family, to appear upon the stage, and it is among the Italians that such an act has more than the colouring of romance, and is

* The Dukedom of Amalfi was conferred upon Antonio Piccolomini, the nephew of Pope Pius II. Octavio Piccolomini, Duke of Amalfi, is one of the principal characters in Schiller's "Wallenstein."

SCENE FROM VERDI'S OPERA, "LA TRAVIATA," AT HER MAJESTY'S THEATRE.

EPSOM RACES, 1856.

"GOING TO THE DERBY."

looked upon by this music-loving people as something heroic and sublime. As may be supposed, the young prima donna's singing and acting bear the impress of that enthusiasm before which the will of the Cardinal yielded, and at times, during the performance, so great was the effect of the something like inspiration displayed that the whole audience simultaneously rose and thundered forth their applause.

Success followed success. Her appearance in the different theatres of Italy was a series of triumphs; but it was at Sienna where the greatest triumph awaited her—

Hic illius arma
Hic currus fuit. * * *

Her family had for many years settled here, and the Palazzo Piccolomini was the scene of her childish gambols. Sienna is now connected by a railway with Florence; and on the night of her benefit half Florence, armed with monster bouquets of camellias, started for Sienna. The theatre was densely crowded; every passage was choked by people who could not find standing-room in the pit. The opera was Verdi's "Trovatore." After the first act the people lost all control over their feelings; they continued applauding their favourite before the curtain, and showering bouquets at her feet. This was repeated at the conclusion of each act, and at the finale it appeared as if they would never cease. When she left the theatre the gentlemen of Sienna and Florence formed a voluntary escort, each carrying a blazing torch, and accompanied her to her home, preceded by a band of music.

In Italy—that warm and sunny clime—such ovations are in keeping In England, though not less hearty, our applause is more subdued.

## EPSOM RACES.

NOTWITHSTANDING the many inducements which the railway presents to visitors eager to reach the scene of action—the racecourse—the journey to Epsom by road is still preferred by thousands who aim at the thorough enjoyment of the day. The railway, it must be confessed, is monotonous in comparison with charming roadside scenery, to say nothing of the characteristic incidents to be witnessed at every turn. Thus the old mode of reaching Epsom Races presents many such gay and sparkling scenes as our Artist has depicted, with the spanking pride of the team and the minor accompaniments of the life of the road.

The races commenced well on Tuesday. The prelude to the great event of the Derby was played with, perhaps, unusual success. Although the attendance of general company did not exceed an Opening Day's average, yet the sport was of the most interesting and attractive character. For the principal events the fields were numerically important, and in certain instances speculation was briskly pursued.

The weather was warm and genial, and, in fact, throughout the day there was neither let nor hindrance to the full enjoyment of the sport.

Still, by mere pleasure-folk the Opening Day at Epsom is invariably disregarded; and, perhaps, a large majority of the people who visit the Downs on the Derby Day scarcely recollect, until they see the result of the races in print, that there was anything to excite the curiosity or attract the attention of sporting men on the day before. To speculators the first day presents attractions independent of its racing, for certain movements of deep significance with reference to the Derby are generally made. On this occasion, although the betting was brisk and important with regard to certain horses only, yet the operations were particularly interesting.

Prior to the race for the Craven Stakes, Wentworth was backed freely at 3 to 1. On the success of his stable companion—Kalipyge, however, 5 to 2 was taken to a large amount, and afterwards 2 to 1 was booked to nearly £3000 about him. At last, however, the current offer on the field was 9 to 4. Cannobie and Pazzoletto were both well supported at 5 to 1 each; the former, perhaps, being the better favourite of the two.

A violent opposition set in against Vandermeulin, who was reported "shin-sore," and about whom, in fact, the most unfavourable rumours were circulated. After 15 to 1 had been laid to £300, and to several minor sums, he receded to 20 to 1 (offered). *Apropos* of Vandermeulin, we may state that his owner claimed the services of Bartholomew, who was also under an engagement to Mr Bowes. After hearing evidence on both sides, it was decided that Bartholomew's engagement to Mr. Bowes was fully proved.

Fly-by-Night was in considerable demand. At first 15 to 1 was booked about him to several hundred pounds. The last bet which came under our notice was 12 to 1 to £100

About Ellington 1000 to 60 was taken twelve times.

The running of The Coroner, who has always been reported many pounds inferior to Yellow Jack, seemingly convinced those who had discredited the rumour that the owner of the two horses was after all best acquainted with their relative merits; 40 to 1 was offered against The

THE WINNER, AFTER THE RACE.

Coroner, while his stable companion, Yellow Jack, was advanced to 100 to 6 (taken).

TUESDAY.

Craven Stakes.—Kalipygæ, 1. Coroner, 2.
Woodcote Stakes.—Commotion, 1. Lambourn, 2.
Horton Stakes.—Eardrop, 1. Consternation, 2.
Epsom Summer Handicap.—Flatterer, 1. Viudex, 2.
Heathcote Plate.—Arrow, 1. Cæca, 2.
Maiden Plate.—Rip Van Winkle, 1. Tom Burke, 2.

WEDNESDAY.

Epsom Town Plate.—Weathercock, 1. Vulcan, 2.
Derby Stakes.—Ellington, 1. Yellow Jack, 2. Cannobie, 3.
Bentinck Plate.—Rip Van Winkle, 1. Tom Burke, 2.
Epsom Cup.—Typee, 1. Saucebox, 2
Durdan Stakes.—Bobby B, 1. Flambeau, 2

THURSDAY.

Four-Year-Old Stakes.—Vandal 1. Exchange, 2.
Two-Year-Old Stakes.—Tournament, 1. Queen of the East, 2.
Ditto 'n Guineas.—Comedy, 1. Hon ly, 2.
Grand Stand Plate.—Mission, 1.

BETTING ON THE CORONER.—Jack Spa—2 to 1 against Mincepie (offered), 3 to 1 against Marmaid (taken freely)

## *NATIONAL SPORTS.*

THE interregnum between Epsom and Ascot will be occupied by two days of racing, at Beverley, on Wednesday and Thursday; one at Wye on Wednesday, and one at Hawick on Friday. The Boston Regatta is on "the water list" for Thursday, and the Glasgow Flag Regatta for the following day. Tattersall's will be busy with sales, as nine of the Maresfield yearlings come to the hammer on Monday, an thirteen of the Middle Park ones on Thursday. Several of Mr Richard Sutton's hunters will also be sold on the latter day, and curiosity will be rife to compare their prices with those they fetched at the memorable Quorn sale in December. With the return of peace the market for hunters is remarkably brisk, and eight of Lord Hopetoun's averaged between 200 and 300 guineas. Palmer's case so completely engrossed all the conversation, and in many instances the speculation, of the afternoon, till a telegraph announcement of the verdict reached the course, that during the races at Epsom on Tuesday comparatively little was discussed on the Derby, and the defeat of Lambourne—who is not a little stale after five races, three of which were severe, at four different places within three weeks, through the agency of an Alarm colt, who was purchased as a yearling at the hammer cy, we believe, an ex-grocer of Epsom for £25—did not create any sensation. Kalipygæ's running with Coroner in the Craven Stakes strengthened the hopes of Danebury, and depressed those of Findon, but still Wentworth was not backed in a very determined winning style. The rain set steadily in with darkness, and there was a complete pour-down for fully twelve hours. As morning drew on the sun showed gloriously, and tempted out hundreds of wavering Holiday-makers, and, with the exception of the merest sprinkling, the weather was most sunny and beautiful till about four o'clock. The mass of the visitors had, however, scarcely time to exchange minds on the solution of the great problem, to pack up their hampers, and get their horses' heads turned homewards, than the gathering storm burst forth, and the rain and thunder continued for nearly an hour and a half with scarcely any cessation. Such a pour-down we hardly ever remember; and the position of the pedestrians, so ecstatically many of whom had come armed with a great coat or macintosh, was piteous in the extreme, as they vainly endeavoured to elude the gigantic drops under any tree they could find.

Although the assemblage was quite as great as in the Exhibition year, we have seldom seen a crowd take so little interest in a race. Illuminations and the late trial completely absorbed them; these seemed to be no "horse of the million" as the Dutchman and Voltigeur were; and the great majority seemed to doubt Wentworth, and fancy that the winner would turn up on the outside. Fly-by-Night seemed nevertheless to be rapidly coming into favour, and his position hardened as a triple-headed rumour gained ground. Bathe had not been tried with Barbolemo, that Barbolemo had had his choice of the two, and selected him, and that Mr. Bowes had that very morning taken eleven thousand to a thousand about him. Vandermelin, it was also said, had been tried to the top of Epsom hill by Topps and 8lb. to Bracken; but still he rather receded from his high estate of Monday. Yellow Jack, led by the Coroner, and followed by Verdant Green and Pretty Boy, were the first Derby nags that appeared. Prince Albert, who bred the former, and sold the latter to Mr Bowes, was present at the Grand Stand with the Prince of Prussia, but did not come to the saddling paddock. This chestnut is a rather leggy narrow horse, with a very bicoilike head, and good back; and his stable declare that he could trot the bottom of him. His stable companion, Coroner, has, on the contrary, no lasting powers about him, and is quite small, and not the less improved since last year. Although his trial horse, Tester, was only fifth in the first race, and from 40 to 100 to 1 had been offered about him, Verdant Green had still a very fond Newmarket party. He is rather high on the leg and not large boned; but his back, head, and shoulders were unexceptionable, although some did not altogether like his loins, and predicted that he was a nailer. Pretty Boy is a large, light-barrelled horse, and we saw little more of Puck than that he had very heavy clothes on him and two white heels. Mr. Gratwicke's two in their chocolate sheets, trimmed with red, were a good deal looked at, and formed a considerable contrast to each other—the one bony, short, and sherry-bay horse, and the other stout, leggy, and, idle-looking. Tom Taylor arrived next on his pony with Forio Rico, looking sadly wasted, and Peter Wilkins, or Draxentist (the card and one recollections and the former, but the return like the latter), and Bay Ellington in his train. A low and lengthy, short-legged, dark chestnut proved to be Astrologus, brother to Augur; and then an enormous rush announced the advent of John Scott's three. First came Forbidden Fruit, and then Fazzoletto, the winner of the two thousand, who was wonderfully admired. All trace of the coach-horse has gone, and he bears the fine stamp of his dam Cameron on every inch. Fly-by-Night has not grown an inch, but is simply a beautiful bone pony with rather a droop in his back, as so many of His Dutchness's have: and the opponents shook their heads, and vowed he could not carry the weight by the side of his muscular companion. Colsterdale would win a smart, lengthy, and stout-looked animal; but his saddling ring was only composed of six, and about the same number congregated round Ellington, who is not much grown, but as fresh as a hawk, and with his muscle brought out by the magic art of training to a degree we have seldom seen. About the head especially he bears a most striking resemblance to his dam, Ellerdale. Except in Vandermelin, whose satin coat made him a perfect picture, we saw no horse more completely "fit" than Ellington; but the way in which he stuck his toes into the ground, and let fly with his heels after Dawson let go his head, suggested in us a notion that it was to be another of his temper days. Cannobie has improved since the Metropolitan, but still he has the lengthy raw look of most of the Melbournes, and at the last moment his jockey was changed. Artillery was handsome, but far too flashy for the serious work before him; and Bird-in-Hand looked, and no doubt was, dull—both in the eye and the coat. As the time drew on it became more and more evident that Wentworth was "going," and as soon as he was stripped Mr. Davi opened his fire on ti him, and Fazzoletto soon came in the lore. A second sight of him more than ever convinced us of the truth of the opinion we have our readers after Newmarkets, that "the stable had made a gigantic mistake, and that what they called his lameness would shoot him out of the Derby before they got to the distance." He is a fine, shaking-looking horse, but like Orvah, a very small skewer would go through him behind the saddle, and he thus tells his own "mile tale" the instant you look him over. The loins cannot carry the limbs. Alcroft brought smart and well, but Job Marson evidently expected him to be a little warmer, and kept him well to himself in the paddock.

At last the third bell rang, and the whole two dozen slowly wound their way into "the fatal glen." A false start was rectified in a minute, and then they rose the hill at a tremendous pace, which Coroner forced from the first, to serve Yellow Jack. For the first quarter of a mile the little horse was leading two lengths, and on they went for another quarter of a mile, when Job Marson, finding Coroner begin to slacken, carried out his Danebury orders, and went to the front, bringing the lot, as he had told Wadlow of yore, round Tattenham-corner, and half-way up the straight at his best pace, before he was headed. Near the distance Vandermelin shewed very prominently about a neck in front, and then Yellow Jack went to his head and raced with him. Ellington coming on the top side, and Wentworth, Cannobie, and Fazzoletto—the former decidedly uncomfortable—in a ruck behind. Half way up the distance the hill told upon Vandermelin, and he began to compound, much by inch. The unresting Yellow Jack strode gallantly on, running as stout as a lion; and for a moment we thought it was all over, when Alcroft brought out Ellington, caught him at the corner of the stand, beat him for pace, and finished a gallant winner by half a length. Cannobie was only beaten half a length, and then came Fazzoletto, a length behind, Vandermelin struggling in fifth; while Job Marson after getting his pull, came again with him, and had the pleasure of actually beating the reputed crack of the Danebury stable, with their despised Aleppo for sixth place! This was the great practical joke of the day; and, if his positive orders had not been to sacrifice his horse to make a pace for Wentworth, Job's fine riding would most probably have secured this son of Alarm a place. Strange that two such skilful brothers as John and Alfred Day should have tried it between them so badly. Bird in-Hand pulled up dreadfully lame; and Artillery, about whom the Yorkshire men have been in ecstasies for months past, was last but one, kept well in countenance by the three "mystery men," Mr Gratwicke's pair and Mr. Verdant Green! The stakes amounted to about £6625; and the pace, thanks to Coroner, perhaps one of the most tremendous ever known. The winner is the property of Admiral O Harcourt, and is the first of the Flying Dutchman stock—which beat that of Birdcatcher, Melbourne, and Orlando in their places—that ever ran for the Derby; and the second foal of the Admiral's celebrated mare Ellerdale, whose first foal, Ellermire, by Chanticleer, is also well known on the turf The Admiral's present two year old out of her is a Birdcatcher, and he has also a yearling sister to Ellington nearly ready for Doncaster, and has now trained the winners of the three great events Ellington's career has been rather chequered, as he won twice and was beaten once last year. This year he was beaten, after a false-run race, by Sherman at York, and again very nearly by Bird-in-Hand at Chester. He showed so much temper in this last defeat that the public gave him up; but still Messrs. Jackson and Hargreaves, and his trainer, stuck stoutly by him, and 1000 to 60 was taken twelve times over that morning Many won on him because they had backed him after the Champagne Stakes and during the winter, and could not get out. His immense feet were exactly suited to the deep ground, whereas Yellow Jack has rather small ones. The latter has as completely overthrown the 2000 guineas running with Fazzoletto as Ellington has done that with Bird-in-Hand, who is, however, so unsound that his form cannot be depended on for a day. In five of his engagements Ellington has penalties, at all figures, from 10 lb to 5 lb.; and Vandermelin, Kalipygæ, and Pazzoletto, are at present his only 3 year old superiors in any mark in the St. Leger. His jockey, Alcroft, is one of the most rising lads of the day; and it is truer remarkable that the luck of the elder jockeys seemed to desert when the late Frank Butler won the St. Leger in 1853—as six of the great races since that date have been taken by Alfred Day, Charlton, Basham, Richarlson, Wells, and the hero of this week.

## *NAVAL AND MILITARY INTELLIGENCE.*

AT ten o'clock on Monday morning the draught of the 4th Light Dragoons from the Crimea disembarked from the *Assistance* troop-ship, in order to prepare for their departure from Portsmouth for Brighton, in which town the head quarters are stationed. As her Majesty had, however, expressed a wish to inspect the cavalry brought home by this ship, he she had done with regard to those in other ships, they did not immediately leave the ship. At one o'clock the 4th and 13th Light Dragoons were seen eyed over to Clarence-yard in two dockyard steamers, mustered together 650 strong, and looked exceedingly well in their equipment, and healthy. At a little past three o'clock the *Fairy* came into Portsmouth, having the Royal standard flying at her main, the Prussian standard at her fore, and the Union Jack at the mizen. On landing, her Majesty was received by the officials, and proceeded with Prince Albert, accompanied by the Princess Royal and Prince Frederick William of Prussia, the other members of the Royal family, and a brilliant cortège of ladies and lords in waiting. The Royal party passed first along the front lines of the three sides of the troops, and then along the rear line, her Majesty taking much notice of the troops as she did so. Her Majesty then took up a position in front of the troops, and they defiled past in admirable order.

On Tuesday last the Duke of Cambridge inspected the cavalry and infantry of the British German Legion at Shorncliffe. The Royal Duke, attended by Colonel Tyrwhitt, and accompanied by Colonel Kinloch, the Inspector-General of the Legion, and Colonel Darby Griffith, of the Scots Greys, arrived at the camp shortly after nine o'clock, where the Royal Duke was received by Colonel Du Plat, Commandant Power and other officers, and by the two regiments of cavalry, under the command of Lieut.-Colonel Perceval and Lieut.-Colonel Fleming. The Duke and staff rode slowly down the lines of the troops, and then up the line in the rear; and subsequently, for two hours, the two regiments, separately and collectively, were put through all the variety of cavalry manœuvres, in the course of which they formed a most splendid charges. They then marched and galloped past in review order. After the cavalry operations were over, the order was given for the infantry to turn out, when the Royal Duke inspected the battalions under arms and drawn up in line. These also were inspected by the Duke, and Colonel Du Plat's regiment was put through a series of manœuvres The whole of the infantry marched past and received the commendations of the Royal and gallant General.

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

ALTHOUGH the amount of money stock purchased this week has been very moderate, and the jobbers, almost generally, hold more than their usual supplies, the market is in a healthy condition, and we should predict that the improvement has taken place in the quotations—Consols, for Transfer, have touched 95¾; and for the Account, 95¾. These are the highest figures quoted during the present year. The reduction in the rate of interest by the Bank Directors on long-dated bills, to which we alluded in our last, has been followed by great ease in the Money Market. No doubt, the late heavy imports of gold—especially as they have been mostly purchased by the Bank—have had considerable influence upon private bankers in making advances; but it is evident that a lower range in the value of money has been pretty generally anticipated. This impression was confirmed on Thursday, on a direct question that the Directors of the Bank of England had reduced the minimum rate of discount both long and short dated paper to 5 per cent (as have been framed within the last few days at from 5 to 5½ per cent) generally, however, at the latter than the former figure; and very few applicants have been made in any quarter respecting the rate of discount at the Stock Exchange it is quite abundant, and may be obtained at 4 per cent. shipments of gold have been small; and it is stated that the whole of the Turkish loan has now been liquidated by means of draughts upon our Continental chest in the Crimea. The imports have been over half a million sterling, chiefly from Australia. The favourable nature of the Bank of England returns is a pretty convincing proof that we shall have a steady influx of gold for a considerable year!

There was a steady business done in Consols on Monday:—The Transfer Consols Reduced marked 93¾ up to 93⅞; Consols, for Money, 94¼ to 94⅝; New Three per Cents, 93½; and Consols for Account, 94¾ to 95. The Consols was 94¾ prem. Bank Stock realized 216½ to 216; Long Annuities, 1860, 3-16 16ths, 1885, 17⅛; India Stock, 263 to 266, Exchequer Bills (March), 4s. prem. Ditto (June), 3s. 6d. prem. Exchequer Bonds were 98⅛ for both series. Very little change took place in the transactions on Tuesday, and the business doing was very moderate:—The Reduced Threes were 93¾⅞; Consols, 95⅛; New Three per Cents, 94⅜; New Two and-a-Half per Cents, 79⅛; Long Annuities, 1860, 3⅛; Ditto, 1885, 17⅛; Bank Stock marked 218 to 217; India Bonds, 4s dis. to par; Consol Scrip, 2⅜ prem.; Exchequer Bills, 3s. dis. to 5s. prem.; Ditto New, 98⅛ ⅜. On the following day prices advanced an advance, notwithstanding the absence of many large jobbing firms on the rounding for the Derby:—The Reduced Three per Cents marked 93¾; Consols for Transfer, 94⅝ to 95; Ditto for Account, 95¼; New Three per Cents, 94½; New Two-and-a-Half per Cents, 79⅛ to 79⅜; Long Annuities, 1860, 3 3-16; Ditto, 1885, 17⅛; India Bonds, 2s. dis. Bank Stock marked 217; Consols Scrip, 2⅝ prem.; Exchequer Bills 8s. dis. to 4s. prem.; Ditto Bonds, 98. On Thursday, in consequence of the New York advices with regard to the Central American question being considered unfavourable, the Funds were flat, and prices were rather drooping:—The Reduced were done at 94⅛ to 94⅜; and for the Account, 94⅝, 95 to 95⅛. The New Scrip was 2⅝ prem., Reduced Three per Cents marked 93⅝; and the New Threes per Cents, 94½. Long Annuities, 1860, 3⅛; Ditto, 1885, 17⅛; India Stock, 264; Exchequer Bills, 5s. dis. to par.

Great firmness has prevailed in the transactions in all Foreign Bonds, and prices almost generally have shown some improvement:—Sales of Brazilian Five per Cents have been recorded at 100; Ditto, New, 98; Buenos Ayres Six per Cents, 77; Granada, Two-and-a-Quarter per Cents Deferred, 22; Mexican Three per Cents, 23¾; Portuguese Four per Cents, 48, ex. all overdue coupons; Peruvian Three per Cents, 58; Russian Four-and-a-Half per Cents, 95½ to 96¼; Russian Five per Cents, 106 to 107; Sardinian Five per Cents, 94¾. Spanish Three per Cents, 46¾ to ⅝; Ditto New Deferred, 25⅜; Ditto, Committee's Certificates (Coupon, not funded), 6¾ per cent; Turkish Six per Cents, 99⅜; Ditto Four per Cents guaranteed, 103¾ ¾; Dutch Two-and-a-Half per Cents, 64¾; Dutch Four per Cents, 95½; Belgian Four-and-a-Half per Cents 95¾.

The market for Joint-stock Bank Shares has been very firm, as follows:—Australasia, 96½; Bank of Egypt, 5¾; Bank of London, 66½; London and County, 33¾; South Australian, 25½; Union of Australia, 79½ Ditto, New, 78; Union of London, 33¾; Bank of Australasia, 45. Commercial of London, 52; English, Scottish, and Australian Chartered, 17; National Provincial of England, 30; Ditto, New, 23.

There has been a much better feeling in the demand for Miscellaneous Securities, and prices have some what advanced:—Australian Agricultural marked 33¾; Canada Company's Bonds, 136; Ditto, Government Six per Cents, 112½; Crystal Palace, 2⅞; Ditto, Preference, 6⅞; English and Australian Copper Smelting Company, 1⅞; General Iron Screw Collier, 5; General Screw Steam Shipping Company, 13⅜, ex £2 returned; London General Omnibus, 3⅞; National Discount Company, 4¾; North of Europe Steam, 14; Peel River Land and Mineral, 5⅞; Peninsular and Oriental Steam, 67¾; Ditto, New, 14½; Scottish Australian Investment, 1⅞; South Australian Land, 37⅛; Victoria Dock, 10⅞; London, 101; St. Katharine, 84; Hertford Waterworks Shares have been 6; East London, 120; Kent, 80; West Middlesex, 100; Southwark and Vauxhall, 89½; Hungerford Bridge, 8; and Vauxhall, 20¾.

A much better feeling has prevailed in the demand for nearly all Railway Shares, and prices have steadily advanced. The following are the official closing money quotations on Thursday:—

ORDINARY SHARES AND STOCKS.—Bristol and Exeter, 89; Chester and Holyhead, 12¾; Eastern Counties, 10¾; Edinburgh, Perth, and Dundee, 30¾; Great Northern, 98; Ditto 'A' Stock, 129; Great Southern and Western (Ireland), 107¾; Great Western, 60¾; Lancashire and Yorkshire, 93½; London and Brighton, 103¾; London and North-Western, 102; London and South-Western, 98¾; London, Tilbury, and Southend (Barking Shares) 2; Manchester, Sheffield, and Lincolnshire, 29½; Midland, 75¾; North British, 35½; North-Eastern (Berwick Extension), 10¾; Ditto, G. N. E. Purchase, 3½; Ditto, York, 59; North Staffordshire, 11⅝; South-Eastern, 72¾.

LINE LEASED AT FIXED RENTAL.—Midland (Bradford Preferred Stock), 94.

PREFERENCE SHARES.—Eastern Counties Extension, ¼ prem.; Great Northern Five per Cents, 7⅛; Great Western (Birmingham Stock), 74½; North-Eastern, York H. and S. Purchase, 9⅛; North Staffordshire, 21⅛.

FOREIGN.—East Indian Extension, B, 22¼; Great Indian Peninsula, 23; Great Luxembourg Shares, 5⅛; Great Western of Canada, 26½; Ditto New, 9; Madras, New, 17½; Sambre and Meuse, 12; Ditto, Five-and-a-Half per Cent, 9¾.

Mining Shares have been very firm. Cobre Copper has marked 64; the St. John del Rey, 25⅞; Linares, 8. Sartridge Mining Company, 7.

*Friday Afternoon.*

The dealings in National Stocks to-day are very moderate, at about yesterday's closing prices The Three per Cents, both for Money and the Account, are 94⅝ ⅞. The Reduced are 93¾ ⅞; and the New Three per Cents, 94 to 94⅛. Barbequee Bills rule heavy; but Foreign Bonds and Railway Shares are firm.

## *THE MARKETS.*

CORN EXCHANGE (Friday).—The arrivals of English wheat fresh up to day were very moderate, but several of Monday's unsold samples were on offer For all kinds we had a very slow inquiry, and prices were supported. The month of the supply was tolerably good The imports of foreign wheat are only 2160 quarters The business doing in that grain was but dull, the average took place in the morning. Barley changed hands slowly, and no decline took place in its value. The malt trade was dull, on former terms. The show of oats was limited, and all kinds sold readily. Fine samples beans rather dearer than on Monday, peas and peas were very firm. In the flour trade was in a sluggish state

*Arrivals this Week.*—English: wheat, 18 0 [illegible] qrs.; barley, 20; oats, 760; beans, 760. Irish: oats 2700. Foreign: wheat, 3,310 qrs.; barley, 3,200; oats, 1,070 barrels 1810 sacks.

*England.*—Wheat: Essex and Kent, [illegible] fresh and Suffolk red, 69s. to 69s.; ditto white, 70s. to 73s.; grinding barley, 35s to 36s.; malting ditto, 38s. to 39s.; malting ditto, 39s. to 40s.; Lincoln and Norfolk, 73s to 80s.; brown ditto, 65s. to 68s.; Kingston and Ware, 75s. to 80s; Chevalier, 80s to 81s.; Yorkshire and Lincolnshire feed oats, 23s. to 25s.; potato ditto, 27s.; Youghal and Cork, black, 26s. to 28s.; white, 29s. to 32s.; Sligo, brown, 32s. to 34s.; ditto new, 25s. to 27s.; maple, 36s to 38s.; white, 34s. to 35s.; rollers, 34s. to 40s. per quarter. Town-made flour, 42s. to 45s.; Stockton and Yorkshire, 40s. to 42s. per 280 lbs.; American flour, 33s. to 39s. per barrel

*Foreign.*—Large parcels of wheat have been taken on speculation in other agricultural ports very little is doing. Linseed and rapeseed are tolerably firm

*Mark Lane.*—Mediterranean, 58s. to 67s.; Rapeseed, 46s to 48s. per cwt. English rapeseed, 38s. to 40s per last; Baltic, 36s. to 38s. per cwt. Cakes, ditto, foreign, £10 0s. to £10 0s.; rape cakes, £6 0s. to £6 5s. per ton. Canary, 44s to 50s. per quarter.

*Bread.*—The prices of wheaten bread in the metropolis are from 8d. to 9½d.; of household ditto, 7½d. to 8½d. per 4 lbs. loaf

*Imperial Weekly Average.*—Wheat, 69s. 2d.; barley, 32s. 6d.; oats, 23s. 10d.; rye, 42s. 6d.; beans, 41s. 6d.; peas, 40s. 3d

*The Six Weeks' Average.*—Wheat, 68s. 2d.; barley, 32s. 11d.; oats, 24s. 6d.; rye, 42s. 3d.; beans, 41s. 6d.; peas, 39s. 9d

*English Grain sold last week:* Wheat, 112,32[illegible]; barley, 12,17[illegible]; oats, 16,259; rye, 32[illegible]; beans, 478[illegible]; peas, 286 quarters

*Flour.*—We have to report only a moderate demand for all kinds. Prices, however, are supported. Consumers purchase sound sorts only, at 42s. to 45s. per sack.

*Sugar.*—There has been more business done in raw sugar this week, at full prices to 6d. per cwt over our last quotations. Barbadoes has realised 44s. to 45s. 6d. Grocery, 48s. 6d. to 49s. 6d. Vincent, 45s. 6d. to 47s. 6d.; Mauritius, 47s. to 48s.; and Bengal, 42s. to 45s. per cwt. Refined goods are firm, at 53s. 6d. to 54s. per cwt for lumps.

*Coffee.*—Our market, though by no means heavily supplied, is still in a sluggish state. In prices, however, we have no actual change to notice Good ordinary native Ceylon is selling at 50s to 51s. 6d. per cwt

*Tea.*—The public sales have been on a moderate scale during the week, and the quotations generally are well supported

*Provisions.*—There is only a moderate demand for butter, both home and foreign, yet we have no actual change to notice in prices. The bacon market is firm, and prices have an upward tendency. Hams and sides are to a trifle firm

*Spirits.*—The value of rum is steady. Fine, on the spot, 4s. 9d. to 4s.; and for the last three months, 4s. 6d. per gal.

*Oils.*—Linseed oil, on the spot, is dull, at 31s. 6d. per cwt. Most other oils are lower to purchase. Some rather large occasions have taken place in turpentine—spirits at 31s. 6d. to 32s.; and rosin, 7s. to 7s. 3d.

*Tallow.*—The demand is heavy at about stationary prices Prime Londons, 3s. 1d. to 3s. 2d. per 8 lbs. Town tallow, 3s. per 8 lbs. net cash. Rough fat, 1s. 10d. per 8 lbs.

*Seeds.*—Linseed cakes are 2s. per ton lower, and the quotations generally are weaker. We have a quiet demand for home-made spirits Gin, 17 under-proof, 19s. 6d. to 20s.; ditto, 25 ditto, 21s. 6d. to 22s.; Hollands, 25 ditto, 22s. 6d. per gal.

*Hay and Straw.*—Meadow hay, £3 3s. to £6 0s.; clover ditto, £4 15s. to £6 10s.; and straw, £1 8s. to £1 9s. per load.

*Wool.*—The public sales have been heavy, owing to the late unusual imports of wool from our colonies, and the opening prices are not supported.

*Hops* (Friday) The supplies of most kinds of hops continue tolerably good, and a fair amount of business is doing in most kinds, at full prices Mid and East Kent pockets, £3 3s. to £5 5s.; Weald of Kents, £3 3s. to £5 5s.; Sussex, £3 10s. to £4 4s.; sundries

*Coals* (Friday).—Stewart's, 18s.; Hartlepool, 17s. 6d.; Kellos, 17s.; Lambton, 17s.; Russell's, 16s. 6d.; Hetton, 16s. 6d.; Tanfield, 16s.; Hutton, 16s. 6d. per ton

*Metropolitan Cattle Market* (Friday).—The supply of beasts here to-day was limited, and in very middling condition. All breeds sold somewhat dearer. Sheep were in moderate were scanty, and the quotations generally are 2s. per 8 lbs. more money. We were scanty supplied with sheep, which moved off freely, and the quotations advanced 4d. per 8 lbs. The few calves on sale were realised to 4s. per 8 lbs. out of the wood. Lambs were in good supply, and heavy request. At Monday's currency. About 120 came to hand from the Isle of Wight. The show of calves was good, and the veal trade ruled heavy, at 4d. per lb. less money. Pigs were very dear, and sold slowly. Bacon sorts were tolerably firm, at from 41s to 42s each, including the [illegible]

*Newgate and Leadenhall* (Friday).—The trade was [illegible] For Monday's currency, per 8 lbs. the carcase—inferior beast, 3s. 8d. to 3s. 10d.; second quality ditto, 3s. 8d. to 3s. 10d.; prime large oxen, 4s. 0d. to 4s. 4d.; prime Scots, &c., 4s. 4d. to 4s. 6d.; coarse and inferior sheep, 3s. 10 to 4s. 0d.; second quality ditto, 4s. 2d. to 4s. 4d.; prime coarse-woolled sheep, 4s. 6d to 4s. 8d.; prime [illegible] 4s. 8d. to 4s. 10d.; coarse calves, 3s. 8d. to 4s. 4d.; prime small ditto, 4s. 6d. to 4s. 8d.; large coarse pigs, 3s. 4d. to 3s. 6d.; small ditto, 3s. 8d. to 4s. 0d.; neat small porkers, 4s. 4d. to 4s. 8d.; lambs, 5s. 6d. to 6s. 6d.

*Leadenhall Market* (Friday).—Moderate supplies of meat have been on sale to-day, at full prices. Beef and lambs, 4[illegible], calves, 4[illegible], pigs, 4[illegible]. THE NEW NOVEL.
Just published, and to be had at all Libraries
PERVERSION; or, The Causes and Consequences. A Tale for the Times. In 3 vols.
"The work is extremely clever. It is intended to show the different phases that individual assume, and to trace the practical result in their different social manifestations. The book is well, and in many cases powerfully, written. The story has a sustaining interest which the reader after he has closed the book. There is no lingers with the author never flags, never tires. Rightly applied, the lesson is a most salutary one."—Sunday Times.
"There are entertaining scenes of life at school, in barracks, at college, among the Methodists, and in what is called the fashionable world. It can by reserves to be called 'A Tale for the Times,' and a the ablest novel that has appeared for many a day."—Literary Gazette
"'Perversion' is powerful as a composition. The thoughts of the writer are well presented, with the power of unconscious mastery which his will only gives to those who are undergoing strong sensations the writer from first to last."—Spectator.

WINE DUTIES REDUCTION COMMITTEE.—The Committee beg to solicit the support and co-operation of the friends of a reduction of the duty in favour of the measure. Considerations of increased revenue, an improved moral and social condition of the people, and the commercial and agricultural relations with the foreign countries, encourage the Committee to promote this object. The duty is a tax upon consumption, and falls successive and impolitic tax upon one of the "great gifts of Providence to man," will be carried.
With regard to the use of wine and spirits, the great abstract principle is—"To drink, by their action on the nerves, exalts a man to make him a brute, debases him to a demon." The body, the mind, the soul, and the future life, are all affected by the use of alcohol. Science has proved, beyond the possibility of doubt, that it is a poison, and common sense has explicit instead of his interest, and the result is the inevitable ruin of the body.
"Wine, as a nourishment, as a means of refreshment, when the system is exhausted by fatigue, is a mockery. What a mockery must that man has to struggle with days of sorrow, as a means of nutrition and comfort, when he has no appetite, when his digestive functions are the organism is deranged in its operations, and as a means of protection against transient organic disturbance, when it is known to be a poison."
The public wines of the Rhine, and many of those of Bordeaux, are distinguished above all others, by producing a minimum of the effects after-effects. In no part of Germany do the Apothecaries' establishments bring so true a price as in the vicinities on the Rhine, for the wine is the universal medicine for the baths as well as the cloak; it is considered as milk for the babes of Germany, and is given to the sick. The properties blessed to its immediate effects, and invariably proportioned to its disagreeable after-effects.
The Committee forward for this purpose beg to impress the importance of the subject upon the Government. With the termination of the war it is thought that the time is peculiarly opportune to induce the Government to give this practical proof of their desire to unite in peaceful and commercial ties England and France to extend our relations with Portugal, Spain, Germany, and other countries, and to increase the revenue by an enlarged importation of pure wines.
Committees are requested to call their members to support Mr. Oliveira, M.P., who will bring the whole subject before the House of Commons whenever the state of the country will admit of it.
JOHN M. DERBY, Secretary to the Committee.
London, April, 1856.

PRESIDENT.
Benjamin Oliveira, Esq., M.P., F.R.S.
VICE-PRESIDENTS.
Jas. Heywood, Esq., M.P., F.R.S. | Apsley Pellatt, Esq., M.P.
John M'Gregor, Esq., M.P. | Thomas Barnes, Esq., M.P.
BANKERS.
London and Westminster Bank, St James's-square Branch.
SECRETARY.
John Morgan Derby, Esq., 35, Lincoln's-inn-fields.
GENERAL COMMITTEE.
Composed of upwards of ninety Members of Parliament and 1127 gentlemen of the highest influence in the country, favourable to a reduction of duty upon foreign and colonial wines.

## NEW MUSIC, &c.

D'ALBERT'S TRAVIATA QUADRILLES, just published. Price 3s. net postage-free.
CHAPPELL, 50, New Bond-street.

D'ALBERT'S New Waltz LA TRAVIATA, from Verdi's celebrated Opera, just published. Price 4s. Sent postage-free.
CHAPPELL and Co., 50, New Bond-street.

D'ALBERT'S TRAVIATA POLKA, just published Price 3s. Sent post-free.
CHAPPELL and Co., 50, New Bond-street.

NEW BASS SONG, THE ROBBER'S LEGAL. Composed by H. L. HIME. Price 2s. (postage-free). This song sung by Mr. Thomas is highly effective, and will be a valuable acquisition to bass-singers.
DUFF and HODGSON, 65, Oxford-street.

BRISSAC.—FANTASIES for the PIANOFORTE, in a brilliant style, on favourite airs from La Traviata, Il Trovatore, Les Huguenots, and Lucia di Lammermoor, by JULES BRISSAC, and just published, price 3s. each.
DUFF and HODGSON, 65, Oxford-street.

THE PICCOLOMINI VALSE, by ALBERT WAGNER Composer of the Ophelia Valse, is published this day, illustrated with a superb Portrait of Mdlle. Piccolomini, and seen painted with a short sketch of her celebrated career, printed on the best paper. Price 4s.
BOOSEY and SONS, Musical Library 28, Holles-street.

LA TRAVIATA, complete edition, 5s., IL TROVATORE, 5s.; Lucia di Lammermoor, 5s.; Les Huguenots, 5s.; Sonnambula, 4s.; Norma, 5s.; Puritani, 5s.; Don Pasquale, 5s.; Elisir d'Amore, 4s.; Lucrezia Borgia, 4s. Boosey and Sons' cheap pianoforte editions of these operas are the handiest and most perfect of any extant. They are bound in strong cloth covers, gilt lettered.
BOOSEY and SONS, Musical Library, 28, Holles-street.

VERDI'S LA TRAVIATA and IL TROVATORE. The Vocal Music and Pianoforte Arrangements, Solos and Duets, by W. HUTCHINS CALLCOTT, from both of these admired Operas.
CRAMER, BEALE, and Co., 201, Regent-street.

OH AND HE LOVED ME DEARLY.—KESIA WILCOCKS' Song, sung by Miss P. Horton (Mrs. Rose) in her Benefit Ballad Concert at Bristol.
CRAMER BEALE, and Co., 201, Regent-street.

MISS P. HORTON'S POPULAR ENTERTAINMENT. The favourite song "Cousin Lucy," The Farmer's Daughter," "Sally in our Alley," and Last Man," with the new Comic Song "Peter Simmons," Popular Illustrations, are published by CRAMER, BEALE, and Co., 201 Regent-street.

THE META WALTZ. By the Composer of "Meta's Bouquet Polka." Elegantly illustrated and played by the Coldstream Guards. Price 3s., postage free.
ADDISON, HOLLIER, and LUCAS, 210, Regent-street.

BARNEY RICHARDS' NATIONAL AIRS for the Pianoforte. No. 1. Paddy Carey. No. 2. Irish Washerwoman. No. 3. The Irish Jaunting Car. No. 4. The British Grenadiers. No. 5. My Lodging is on the Cold Ground. No. 6. The Irish Ass.—No. 7. St. Patrick's Day. No. 8. Oh on the Sunny Side. No. 9. Fly not yet. No. 10. Rory O'More. No. 11. The Bay Hills of Scotland. No. 12. Auld Lang Syne. And 12 more in the press. Each of all airs of the most favourite airs brilliant and effective arrangements for the Pianoforte. Review. Price 2s. nett, or 3d. each.
CHAPPELL and Co., 50, New Bond-street.

Just published,
FLOATING on the WIND.—STEPHEN GLOVER'S most charm ng ballad. "This song will become an universal favourite." Musical Review Post-free, 1s.
CHAPPELL and Co., 50, New Bond-street.

ROSE of ENGLAND, HERALD of PEACE POLKA as danced at the State Balls, composed by VAN NOORDEN, with Grand National Chorus, beautifully illustrated in colours by Brandard. This charming Polka is free from the extraordinary movement the whole of the company joining in the chorus produces a brilliant effect. Sent free, 24 stamps.—LEVEY, Metropolitan Music Repository, 48, Albemarle-street, where may be had the national song, "Rose of England," the words by Mrs. Crosland. Price 2s.; sung at the ball by Miss Poole with great success.

SIX SONGS from IL TROVATORE are in the PIANISTA, No. 191. Price 2s. English and Italian words, with Translations, for Soprano, Mezzo Soprano, and Tenor. These operas, 2s. each, overtures and airs.—GAY and Co., 67, Paternoster-row. All post-free.

LINE of AUXILIARY SCREW STEAM PACKETS between LONDON, CAPE of GOOD HOPE, and CALCUTTA (to land in the Port Elizabeth Bay—The Natal Coast), first-rated auxiliary steam-ships with entire similar vessels, to be put on the line. The first vessel will be ready and will commence her regular sailings from London, and on the 8th from Plymouth, where passengers will embark.

| | Cuddy. | Second Cabin. | Steerage. | Intermediate. |
|---|---|---|---|---|
| England | £150 | £80 | £40 | A. D. Dundas, R.N. |
| Madeira | 150 | 80 | 40 | J. D. Bain. |
| Ireland | 150 | 80 | 40 | W. C. Perry. |
| Plymouth | 150 | 80 | 40 | F. Y. Stewart. |
| Robert Lowe | 100 | 120 | 60 | W. Cooper. |

The Barque will sail punctually on the 1st of each month, calling at Dartmouth, and sailing from thence on the 8th August. It is on account that this ship will be for the passage from the latter port to the Cape of Good Hope in thirty five days, and to Calcutta in seventy to seventy-five days. She has never more than 2 passengers, and has first-class accommodation. Each ship carries a duly qualified and experienced surgeon. For passage, and freight of small parcels apply to CORNELIUS and Co., 65, Cornhill; and to Messrs. Hinde, replying Chatham-street; and for freight to goods and luggage, to Messrs. Smith, Knight, and Co., 3, Great Winchester-street.

Important to Tourists.—Denmark, Norway, Sweden, St. Petersburgh, and Prussia, at Pauses in the Baltic and North Seas of Europe.
THE NORTH of EUROPE STEAM NAVIGATION COMPANY (Limited) THROUGH, RETURN, and EXPEDITION TICKETS, at fixed and very moderate fares, enabling Tourists to visit the following places by any of the Company's Steamers which run regularly every Saturday, at 8 a.m., from Hull:—

| From London, viâ North Western Railway, to Hull, for CHRISTIANSAND and CHRISTIANIA (Royal Mail Steamers) | 1st. | 2nd. |
|---|---|---|
| Friday, 13th inst. | £ 4 10 | £ 3 0 |
| London, viâ Great Eastern Railway, to Grimsby, for GOTHENBURG (mail), every Friday | 4 0 | 2 10 |
| [illegible] | [illegible] | [illegible] |
| [illegible] | [illegible] | [illegible] |
| Railways between Tonning and Flensburg saving 200 miles of sea passage, calling Leith, June 19, 27 | 7 7 | 5 0 |
| London to COPENHAGEN, and principal places in Denmark, every Saturday | 3 0 | 2 0 |
| London to ST. PETERSBURGH, every Saturday | 4 4 | 2 0 |
| London to RIGA, direct, every Saturday | 4 4 | 2 0 |
| London to DANTZIC and KONIGSBERG, June 5, 19, from Irongate-wharf, Tower | 5 5 | 3 10 |

£20 Season Excursion Tickets are issued by the holder to travel (first-class) by any of the Company's ships, and on the Royal Danish Railway, during the season.
These ships, well-equipped, and carrying experienced servants, are fitted up for the purpose of conveying with the greatest safety the Baltic and North Seas. Provisions, wines, &c. of best quality, on board at moderate charges. Tickets and berths may be secured at the Company's Office, 84, King William-street; or to J. E. Paddock, 24a, Oxford-street.
W. S. ANDREWS, Managing Director.

TUITION on the SOUTH COAST of DEVON. The principles of a Finishing Seminary, which is attended by Miss Parker and Miss Bowyer, are OPEN for INSPECTION. An Articled Pupil—address L. S., care of Mr. Martin, 9, King-street, Snow-hill—is wanted.

A SUPERIOR SUITE of fine WALNUT and WOOD DRAWING-ROOM FURNITURE (second-hand) in first-rate condition, consists of eight excellent Chairs, Settee, and Couch, covered in rich silk; also a set of Chintz and lace Curtains for drawing-room. Cheffonier with carved back and doors fitted with plate glass and lined silk; a handsome Chimney-glass in carved wood and gilt frame. Price for the lot, 40 Guineas. To be seen at 1, EWIN GRANGER and Co.'s, Upholsterers, 7, Queen's-buildings, Knightsbridge (seven doors west of Sloane-street).

CABINET FURNITURE, CARPETS, and BEDDING. See our new ILLUSTRATED ESTIMATES and FURNITURE CATALOGUE, containing nearly 200 designs and prices of fashionable and elegant cabinet and upholstery furniture, &c., sent free by post on application. Orders can be executed with equal despatch and economy from any part of the country on receipt of a remittance. Upholstery orders carefully attended to.—LEWIN CRAWCOUR and CO., Cabinet Manufacturers, &c., 7, Queen's-buildings, Knightsbridge, seven doors west of Sloane-street.

THE PEACE ILLUMINATIONS—THE ROYAL EXCHANGE.

"PEACE" AND "WAR."—JOHN BELL, SCULPTOR.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

THE two colossal statues of "Peace" and "War" which we engrave as appropriate to the doings of the week are copied from two of the contributions made by Mr. Bell to the Sculpture Room of the Royal Academy. They will form, when in marble, appropriate parts of the monument to the Duke of Wellington, on which Mr. Bell has been for some time engaged for the Guildhall of the city of London. Peace hath her victories, the poet tells us, no less renowned than War. Here, as in life, we prefer Peace to War. To erect his great colossal monument to the great Duke, the citizens are about to remove the monument to their patriotic Lord Mayor, Beckford—the father of "Vathek" and Fonthill Beckford. Mr. Bell, we are told, is advancing rapidly with his work.

THE PEACE ILLUMINATIONS.—THE GENERAL POST-OFFICE.

## PARIS FASHIONS FOR JUNE.

THE unfavourable weather in Paris since the commencement of the month has prevented the display of the Spring fashions, which have only been at the theatres, and a few days ago upon the race-course at Chantilly. In consequence of the continuance of very wet and chilly weather, the majority of our fashionable ladies still wear dresses such as have been in vogue

during the latter part of winter. People of high fashion, as well as the public generally, are now directing their attention to the approaching ceremony of the christening of the Imperial Prince, which will present an opportunity for a display in Paris of magnificence and luxurious elegance not often to be witnessed in any capital.

Another occasion of interest to the fashionable world is the approaching ceremony of the coronation of the Emperor of Russia—on account of its being customary at the great northern Court that on great occasions there should be, first, a blaze of diamonds; and, next, an admirable display of lace; and fashion and etiquette require that no other description of lace should be worn at Court but Alençon point, English point, and Venetian point.

At one of the recent grand representations at the Odéon Theatre we particularly remarked a dress of rose-coloured China gauze, with volants of white and lilac in the pattern of material; the braces were composed of a ribbon to match the volants. A charming bonnet of white *tulle bouillonné*, with pink ribbons, white blonde, and black lace, mixed and ornamented with bunches of pink feathers, completed this elegant costume. We must also notice another dress of taffetas, pearl grey, with four pink and white volants, and at foot of each small black lace placed very low. The bonnet was of rice-straw, ornamented with red service-berry: which ornament is also much worn for head-dresses for balls, mixed with trellis-work of velvet, pearls, and gold braids; it forms a graceful accompaniment in head-dresses to the parures, very much in favour at present, composed of rather small coral pearls or beads, mixed with diamond-beads, which are also worn in ear-rings or trimming of corsages.

For evening parties the most remarkable costumes are a dress of white tarlatan, with three volants, decorated with an embroidery-work of straw, having at the edge a cherry-coloured velvet and black lace. This dress had a low body, and had Neapolitan braces trimmed to match with velvet and lace. Another dress consisted of a petticoat of cherry-coloured taffetas, a tunic of open guipure, rounded in front, and descending only to the knee; then five bouillons of white tulle, separated by small plaits of straw, and forming the head of a volant of similar guipure. This entirely new dress cannot fail to be very successful for full ball dress.

We must mention a charming new article—a pocket-handkerchief, embroidered all round with plumetis until it reaches a festoon, from which springs a small volant in cambric, similarly embroidered, but smaller; thus extending the taste for volants even to the trimming a pocket-handkerchief. As we are on the subject of fine linen we may speak of a new collar and sleeves, which have attracted much attention. They are in embroidery of Nancy, trimmed with Valenciennes lace, beneath which is black lace, which reaches beyond it. A bow in pink or blue ribbon, with a black stripe at the edge, finishes the collar, and the sleeves are ornamented with similar ribbon. Points or lappets (*barbes*) of lace are much in fashion for head-dresses for balls; they are mixed with réseaux of flowers, silk chenille, and they make charming head-dresses mixed with gold passementeries, or white pearls of Venice. The most fashionable flowers for spring bonnets are roses of all varieties—amaranths, pinks or carnations, violets, paquerettes, and the red service-berry.

## THE ILLUSTRATIONS.

Taffetas bonnet, with two bunches of rhododendrons; mantle made close to the shape, of black imperial cloth, embroidered on the sleeves, which are moreover ornamented with a double silk galoon following the two seams of the sleeves inside and outside, or rather the front and back seams. The same galoon continues on the front of the body of the mantle, and finishes near the edge of the mantelet to go round it, and forms the head of a first range of fringe, beneath which it makes a second line, which has below it a second fringe similar to the first. This

mantle fits closely to the shape. Dress of pearl-grey taffetas with Grecian pattern, which covers entirely the petticoat.

Bonnet of rice-straw, trimmed with black velvet, cactus flower, of a rich brown or pomegranate colour. Mantle of black taffetas, trimmed at the height of the shoulders with a ruche *a la vielle*; at the height of the waist are placed five rows of narrow velvet *Tom Pouce* below a wider velvet, which serves for the head of a trimming quilled on flat, forming a large volant. Dress of barège, with volants, the pattern worked on the stuff.

Bonnet of taffetas, sprinkled with small embroidery, with two bunches of paquerettes on each side *tour de tête* blonde and tulle. Bonnet of Italian straw or Leghorn, with a double dark velvet; on the side a bunch of red fuchsias. Bonnet of white tulle, with poke trimmed with *passe-poils* in white taffetas; two rows of Valenciennes lace fall over the unstiffened crown of the bonnet on the side; and, starting from the edge of the poke, is a feather laid on flat. Bonnet of rice straw; the crown trimmed with brown velvet ribbon; a double row, a bunch of field flowers on each side, the ends joining on the top of the poke. Bonnet of white tulle, *bouillonné*, with flowers on each side; the poke is trimmed on the edge with a bouillon, forming a ruche alternately with blonde and tulle.

## EXHIBITION OF MANCHESTER MANUFACTURES IN PARIS.

IN 1854 the French Government announced that in the following year a Universal Exhibition of Industrial Products would be held in Paris, and foreigners were invited, by liberal overtures, to take part in the friendly competition. Manchester at once prepared itself to reap laurels in the amicable passage at arms; and on the 3rd July, 1854, a public meeting was assembled in the Townhall to co-operate in the movement to organise a plan for securing a complete and systematised display of the industrial products of the district, and raise funds to defray expenses. Manchester energy ever surmounts all difficulties; and a guarantee amounting to £6995 was soon placed at the disposal of the Committee. Some obstructions, however, arose from the Board of Trade, who proposed to distribute the Manchester products around the goods furnished from the Staffordshire Potteries, Sheffield, and other places; but to this the Committee objected, desiring for themselves a distinct and separate block or space, to "give to their assortment that united and concentrated character which was so necessary for the force of its effect."* This remonstrance produced its proper effect, and finally a space was allotted and accepted, forming a parallelogram of about 105 feet in length and 72 in breadth. On the 2nd of February Mr. James Oswald Murray, who had been appointed Secretary to the Committee, was instructed to proceed to Paris and apportion the area of the Manchester and Salford Court, and complete all necessary arrangements for the convenient display of the articles that were to be exhibited. This gentleman encountered some hindrances, but it is only justice to state that he executed his difficult and delicate task with great tact and discretion, and received a most flattering testimonial, voluntarily offered, from the 19th class of the International Jury. These particulars are due to the occasion, which will assuredly form an epoch in the history of free-trade and of the useful arts of peace. It is the duty of statesmen to avail themselves of the opportunity thus afforded, and by the reciprocation of commercial advantages to cement that alliance between France and England which is the brightest feature in the reign of Napoleon III.

In the Report before us we have minute and very interesting details of the Manchester and Salford contributions to the Exhibition; but, to prevent any mistake, it may be well to observe that the fabrics sent to Paris were the products of what is known in Lancashire as the Manchester District. Sixty-eight firms contested for the palm of excellence; 7700 pieces, valued at £6600, were displayed; and, for the first time in the annals of manufacturing industry, an assortment of the varied skill and wealth of the cotton trade, as complete as possible in all its branches, was unrolled before the eyes of astonished and delighted Europe in a vast industrial panorama. "A range of yarns from the lowest and coarsest numbers to the highest usually known in the market, as well as samples of coloured yarns, was exhibited by the Committee, with prices. A range of yarns of the higher numbers, from 100 to 700, with a sample even of the extreme number 2150, was exhibited in their own names by Messrs. Houldsworth and Co., it being the *first* time in the history of the trade that a *hank* of so high a number as 700 had been shown." In calicoes the prices ranged from a penny a yard in the grey to one shilling in the white. Plain and fancy ginghams ruled from 3d. to 6d. a yard. The plain and fancy ticks were suited to almost every market; the display of cotton drills was satisfactory; but, with the exception of gambroons, contributed by Messrs. Phibbs, Rowbotham, and Co., "the mixed woollen and cotton, and especially the mixed linen and cotton drills, were almost totally unrepresented, notwithstanding the efforts made in the proper directions to obtain samples." Fustians were favourably represented. Dyed, printed, and embossed linings, and dyed linings printed in silver, are much commended. The small wares department, comprising such articles as sewing and darning cottons, cotton and mixed tapes, webs, cords and laces, and similar articles, were amply furnished by Messrs. J. P. and E. Westhead. The print trade was chiefly represented by houses exhibiting in their own names. Though the woollen trade was not exhibited through the Committee, private firms brought forward their flannels, blankets, railway wrappers, and druggets; and Messrs. Bright and Co. displayed their carpets in a space contiguous to the Manchester and Salford Court.

In the arrangement of the goods every care was taken to classify them into trades, the principal among them having a table or division to itself. Some of the articles—as muslins and toilet quilts—were placed under glass. Visitors were freely allowed to test the quality of the various fabrics by touch, which was not permitted in the French, Belgian, and German Courts. It was evident that the French Protectionists did not relish the competition, for it opened the eyes of native consumers both to quality and price. The Manchester Court was the special object of their dread, and they determined to resist any change in the law. We quote the following sensible remarks from the Report:—

On the one hand, they urged the peculiar difficulties of their position, with a heavy duty on raw cotton, on coal, and on iron and machinery, as reducing them, to a certain extent, to an absolute impossibility of competition with the English cotton trade, standing, as it does, totally unfettered in these respects. On the other hand, it was stated that, while it must be admitted that these difficulties embarrassed their proceedings, and rendered absolute free trade impossible, so long as they shall exist, they only did exist because the manufacturing party, turned aside from its true interests by the influence of the coal and iron owners, as was so long the case of the tenant-farmers in this country, did not yet see that its true policy was to emancipate industry from such impediments, and thus enable its products to enter into the markets of the world, in place of hemming it in by a complication of unnatural burdens and supports, thus confining its vent to their home market alone, and at a great cost to the consumer; that the silk trade, the freest and least protected industry in France, should, by its remarkable contrast, present them with an example of their true course.

Among special points of comparison between British and French industry, the article yarn has been selected. In the most current numbers the French twist is equal, and in some respects superior, to our own; but their process is much more expensive, as they use a higher-priced cotton. In the art of bleaching and finishing they are far behind us. Under the French system, owing to the narrowness of their manufacture market, their division of labour is very incomplete, and the same firms commence and complete many and distinct processes. In the finer qualities of quilting we are decidedly superior to our neighbours; but in fancy ginghams, "where resort must be had to hand labour and artistic combination of colours, and to superior dyes, the Swiss and French rather distanced the English manufacturer." Manchester fustians excelled those of France and Germany. "In expensive blocked prints and muslins there was, of course, no attempt in the Manchester Department to dispute the unrivalled superiority of Mulhouse;" but this branch of trade is not followed at all in the Lancashire district.

Prince Napoleon purchased some trouserings for his household; and the Spanish Government ordered samples of moles, to see if they were suitable for their army. The Emperor and Empress made frequent visits to the Manchester Court; and the latter made a purchase of some fine wadding from Mr. Spencer, to whom the Empress sent an elegant gold medal.

A short article on machinery is appended to the Report, written by Mr. Fairbairn, of Manchester, but the engineers of that city seem to have been remiss on the occasion:—

Messrs. Robert Stephenson, of Newcastle-on-Tyne, exhibited a locomotive with the latest improvements, but of the ordinary construction; and Messrs. W. Fairbairn and Sons, of Manchester, exhibited an engine built on an entirely new principle, as patented by Mr. J. E. M'Connell, of Wolverton, and according to that gentleman's designs. The French machine-makers (from Alsace) and the Belgium (from Liége) were well represented; but their productions would not bear comparison with those of our countrymen—Messrs. Platt, of Oldham; Messrs. Mason, of Rochdale; and Messrs. Rise, Cottam, and Co., of this city.

It is acknowledged that our Continental neighbours have made great progress during the last ten years in the manufacture of stationary and locomotive engines; but they are still inferior to our own in "careful proportion of the parts and simplicity of construction." Tool-making has made a very marked advance on the Continent, and the Americans stand prominent "in machines and tools for cutting and shaping wood." In automatic or self-acting tools we have attained to the highest degree of exactitude; but that system, according to Mr. Fairbairn, "must not only be encouraged, but extended, if we are to retain our prosperity, and maintain the undoubted superiority we now enjoy in this particular branch of constructive mechanics."

We have given a pretty complete analysis of the Report, which is not only due to its intrinsic merits, but also to the memorable occasion which has called it forth. The Paris Exhibition forms a grand epoch in the history of international industry; and we trust it may be the precursor of a state of things in which the only rivalry among nations may be one of art and science, and good will to man.

---

Amongst the reforms suggested by the Law Amendment Society is that of the establishment of courts of reconcilement, which will put an end to suits that never ought to have been instituted, and defences that never ought to have been attempted.

A little boy, seven years old, was brought before the Croydon magistrates on Saturday last, charged with shooting his cousin, a boy of five, with a bow and arrow.

It is now positively asserted that the plan of St. James's-hall, the new concert-rooms, close to Piccadilly, is to be put into execution forthwith.

* "Report of the Manchester and Salford District Executive Committee for the Paris Universal Exhibition."

## THE BALTIC AND THE NORTHERN STATES.

*See the Large Picture Map of the Baltic, published with the present Number.*

ALTHOUGH the signature of a treaty of peace has suspended the contemplated operations in the Baltic, and for which such stupendous preparations had, however tardily, been made by this country, the historic interest of this portion of the map of Europe—both the sea and the States which border it—has by no means diminished. Indeed circumstances point to the probability of this being on some future day the battle-field of Europe whereon the pretensions of the Eastern and Western Powers will have to be settled. The treaty lately executed between Sweden and Norway on the one part, and France and England on the other, by which the integrity of the territories of the first-named kingdoms is guaranteed, is a most important document—and one which, when circumstances occur to test its powers, will prove something more than a mere matter of form. By this treaty Sweden and Norway become members of the European family, with those mutual guards and checks which such relationship imposes. That Denmark has not thought proper to adopt a similar line of conduct, though to be regretted, is owing to peculiar circumstances of which she may be allowed to be the best judge; but the very fact of her not accepting proposals which would put her under European protection gives additional weight and importance to Sweden and Norway having done so.

In presenting our readers with a grand Illustrated Map of the Baltic and the Baltic States we propose to take a hasty survey of the more prominent features in their history.

Comparatively speaking, it was but yesterday that the Northern Powers maintained their existence in reference to the European system, and hitherto their relations, both with that system and amongst themselves, have been subject to great uncertainty, and more than the ordinary share of national vicissitudes. It must be admitted, however, that on the few occasions when they have taken an active part in European struggles their influence has been by no means unimportant; whilst their performances have been such as to confer historic distinction upon their leaders. In the Thirty Years' War, after the discomfiture of the Elector Palatine, Christian of Denmark stood forward as the champion of the Protestant cause; and he was followed, but in a more brilliant manner, by Gustavus Adolphus of Sweden (the grandson of Gustavus Vasa, founder of the nation's independence), who overran all Germany, from the Elbe to the Rhine, and as far south as Munich, and died gloriously at Lutzen, 1632, in the midst of a victory which was not fruitless or transitory in its influence;—inasmuch as, sixteen years afterwards, his daughter and successor, Christina, almost dictated the terms of the Treaty of Westphalia (1648), by which peace was restored to Europe, new-modelled in its territorial arrangements, and Sweden obtained important accessions, including Upper and part of Lower Pomerania, the isles of Rugen, &c., and became a member of the German empire. Twelve years afterwards, by the Treaty of Oliva, she obtained from Poland the provinces of Livonia, Esthonia, and the Isle of Oesel, whilst by that of Copenhagen she obtained from Denmark several important provinces, all territories of Sweden now almost surrounded by the Baltic; and she was recognised as the first power of the North. Her alliance was courted and paid for by Southern States; and in this foreign influence lay the secret of her subsequent weakness.

But the culminating point of her greatness was not yet. For about sixty years she held supremacy over the North; and under the boy King Charles XII. threatened to assume universal dominion. Driving the Muscovite, the Pole, and the Saxon before him like chaff before the wind, nothing resisted his impetuous attacks. His misfortune was that he did not know where to stop. "I will treat at Moscow!" was Charles's contemptuous reply when Peter sued for peace. But the scene of Pultawa nipped the flower of his greatness in its bloom, and that Moscow which he already looked upon as his own, he never reached. Nay more, whilst he was sacrificing his magnificent army on the rock of the ancient capital of Muscovy, Peter the Great was compiling his conquest of the province of Ingria, and laying the foundation of the future capital of the Russian empire. The sun of Sweden had now set. Her political greatness was inseparably attached to the Baltic, which surround the Baltic; but was a nation of not quite three millions population, capable of maintaining the extensive frontiers of such an empire; and can we wonder that she had to give way before the settled purpose of the Russian Czars, supported by innumerable hordes of obedient slaves? The same remark in a certain extent applies to Poland also: her greatness was seriously impaired when she made her first cessions to Sweden and Prussia at Oliva; by the Treaty of Moscow, 1686, she gave up Smolensko, Belaia, and other places, including Little Russia; by Charles XII.'s return for his assistance against the Turks; and the subsequent loss of Livonia and Courland, by subjecting her out from the Baltic, was the prelude to her political extinction.

Meantime another new empire—Prussia—was springing up on the shores of the Baltic, an empire partly constructed out of the spoils of Sweden and Poland.

To return to Sweden. After the death of Charles XII. she still struggled for awhile, vainly, against her doom. At first she adhered to the alliance with Russia, which of late had become the ruling policy; but eventually French money turned the scale the other way, and, on its breaking out of the war of the Austrian succession, the "Hat" party prevailed against that of the "Bonnets," and war was declared against Russia. Count de Hordt (who, as well as his father, held a high office at the Swedish Court), in his "Memoires Historiques"—a work not very generally met with—deeply deplores this step, and denounces the intrigues which led to it; he even goes so far as to insinuate that the venal Senate, bribed with French gold, "dressed up reports from the Swedish Minister at St. Petersburg in such wise as to induce people to believe that the Russian army had been almost totally destroyed in the recent wars with the Turks," at the same time that Baron de Buddenbrock, who had been sent into Finland to see to its condition of defence, reported nothing but what was favourable to the views of the Government." The war, hastily undertaken, was prosecuted into a second campaign; but nothing but disaster or disgrace attended it. "In this war," says Count de Hordt, "Sweden, in addition to her previous loss, sacrificed a great part of Finland. Thousands of her soldiers perished—not by the sword, but of hunger and disease; and, notwithstanding the subsidies of France, the finances of the kingdom became entirely exhausted." By the Treaty of Abo (1743) Sweden retained Finland only as far as the river Kymen; the three important towns of Friedrichsham, Willmanstrand, and Nyslott, with their territories, being surrendered to Russia; Petersburg being thus made secure. In addition, it was stipulated that upon the death of the reigning King, Frederick I., the crown should go to Prince Adolphus Frederick of Holstein-Gotterp, nephew of the Empress of Russia. Lest Denmark might take umbrage at this arrangement, and to avert popular commotion, it was further provided that an auxiliary Russian force of 10,000 men should be sent to Stockholm and its neighbourhood for the protection of that capital. De Hordt bitterly laments the humiliating condition:—"What would have been the reflection of Charles XII.," he says, "if he had come to life at this unhappy conjuncture, to witness the disastrous fruits of his ambition? What would he have said of those ten thousand Russian auxiliaries defending the Swedes against the Danes—that valorous and intrepid Prince who, with a mere handful of his subjects, had so often beaten one and other of those nations?"

With the internal revolutions which have taken place in somewhat rapid succession in the Governments both of Sweden and Denmark it is not our province now to speak; our present purpose is chiefly with geographical divisions and international relations. We may remark, however, that perhaps no race has been subject to more frequent and violent revolutions in the course of a short series of years than the Scandinavian—revolutions in which the extreme of monarchical despotism on the one side, and the democratic element on the other, showed a habit (particularly in Sweden) with [illegible] extraordinary instances. But if these struggles undoubtedly weakened [illegible] and habit the resources, they are at any rate indications of a national mind and national will, from which in the growth and experience of ages national greatness may spring—greatness of character and of purpose in harmony with surrounding civilisation. How much more may be hoped for from such a people, however inferior in numbers and immediate national resource, than from a nation of serfs who know not of liberty even by name, and who are exempt from the very rarest notions of polity which might enable them to misgovern themselves? The right of electing their Sovereigns is one which the Scandinavian nations have always insisted upon, and pretty frequently exercised. The last occasion was in 1809, when Gustavus IV. was compelled to abdicate, and the crown (to the exclusion of his children) conferred upon his uncle Charles, with remainder to Bernadotte, one of Napoleon's Generals, whose son now reigns.

Some important changes in the Baltic States remain to be spoken of. At Tilsit Napoleon abandoned Sweden to the aggressive views of Alexander, in return for the latter's complacent acquiescence in his own projects of conquest in another quarter; and the Russians took possession of Finland about the same time that the armies of the French marched into Spain. A few years later, shortly before the accession of Bernadotte to the throne, a secret understanding was come to between him and Alexander whereby Finland was to be abandoned in perpetuity to the latter, in exchange for Norway, to be separated from Denmark and the friendship of the Muscovite Court.

As for Denmark, she has never recovered from the shock she experienced in her short participation in the Thirty Years' War. She has always held the position of a second or third rate Power; her chief source of income being one of somewhat dubious authority—viz., that of the Sound dues. In her external relations she has been a passive victim rather than an active agent—the twice-bombarded Copenhagen offering a remarkable illustration of the impossibility of a weak State, in an important geographical position, maintaining its neutrality amidst the turmoil of a general war. But Denmark, weak and power-less, will in course of years be absolved from this anomalous and thankless position. The Royal house is on the eve of failing of male successors; and by a recent treaty, agreed to with wondrous unanimity by the other European Powers, the female heirs are to be excluded, and the throne to go to the successors of the principality of Holstein—in other words, to the Imperial house of Russia. This consideration alone would render the alliance of Sweden with the Western Powers of paramount importance in the interests of Europe.

As for the project of a restoration of the Scandinavian unity, we have always considered it chimerical; and our view is supported by some of the ablest native authorities. The horrors which Sweden suffered during the period of the Union of Calmar are not, after a lapse of four centuries, obliterated from the memory; and the jealousies and animosities which have ever since existed between the Swede and the Dane have been such as to preclude the idea of a voluntary and hearty concurrence in a common government. If it were only for the question which nation should be the seat of government, and which should give the King to the other, it would be sufficient as a stumbling-block at the very threshold of such a project. It has only been by the most guarded and conciliatory conduct on the part of the new Swedish dynasty that it has been permitted to hold the crown of Norway also, and that as an altogether independent kingdom. The attempt to incorporate a third nation, and to blend the three into a happy family, would, from the very nature of things, prove an utter failure. In addition to these considerations, the German relations of Denmark, and her prospective relations with or dependency upon Russia, would render her amalgamation with Sweden, even if it were possible, a political crime, against which all Europe ought to protest.

## REFERENCES TO PRINCIPAL TOWNS.

### DENMARK AND NORTHERN GERMANY.

LUBECK, in Holstein, one of the Hanse Towns, is situated at the confluence of three rivers, the largest of which is the Trave. The Exchange and churches are magnificent.

KIEL, in Holstein, and one of the Hanse Towns, is situated in a bay in the Baltic, which forms a good harbour.

HAMBURG, in Holstein, situated on the Elbe and the Alster, is one of the most commercial cities in the world. Population 110,000, of whom nearly 10,000 are Jews.

COPENHAGEN, the capital of Denmark, is situated on a small promontory on the east of the island of Zealand. It is strongly fortified. Copenhagen was twice besieged by the Swedes—in 1658 and 1700. It was bombarded by the English in 1801 and in 1807; the whole of the navy on the latter occasion being surrendered to our custody, and thus rescued from the French, who would have driven the Danes into hostility. Population about 127,000.

CRONBORG CASTLE is upon the north of the town of Copenhagen, and close to the shores of the Sound, which its guns command in all directions. Built by Frederick II. about 1585, at the time of Tycho Brahe. Here Queen Matilda (sister of George III.) was imprisoned by her mad husband until permitted to retire to Zell, where she died in 1776.

FREDERICKSBURG is about 4½ Danish miles north of Copenhagen—the site of a Royal Castle, built by Christian IV., 1606.

FLENSBURG, situated on the Flensburg Fiord, is a flourishing commercial town.

DANTZIC, the capital of Western Prussia, stands on a branch of the Vistula, about four miles from the Baltic. One of the richest cities in Europe: a great corn trade carried on.

### IN NORWAY.

CHRISTIANSAND is the capital of the diocese of that name, and ranks as the fourth city in Norway. Exports lobsters largely. Population about 12,000.

ARENDAL is a small but pretty town, built on the rocks projecting into the channel, a short distance south of Christiansand.

LANDRAI, a small town to the east of Arendal.

KONIGSBERG, beautifully situated on the river Laurvan. Rich silver mines, belonging to the State, are about a mile from the town. Population 5000.

CHRISTIANIA, the modern capital of Norway, was founded by Christian IV. in the seventeenth century. The streets are broad, and laid out at right angles. The town has been frequently visited by fires. The public buildings are handsome. Population, in 1835, 23,000.

FREDERIKSTAD is a fortified town, formerly of considerable strength, but has been neglected of late years.

FREDERICKSHALL is a seaport town, with an excellent harbour. It was formerly called Hadden, but Frederick III., in 1665, prefixed his own name to it. Population upwards of 4000. The fortress of Frederikstein, south-east of the town, is built upon a perpendicular rock, 400 feet high.

### IN SWEDEN.

CALMAR, a strong seaport town, exporting planks, alum, and hemp; its castle, which was the residence of the celebrated Queen Margaret, and in which the Union of Calmar (1397) was formed (for uniting Sweden, Norway, and Denmark under one crown), has been converted into a distillery.

BORGHOLM, on the west side of the island of Oland, is a small place overshadowed by a ruinous castle. Population about 600.

WISBY, the only town on the island of Gothland, is of ancient historical interest. Population upwards of 4000.

GOTTENBURG, the second city of Sweden, is situated on the Göta river, about five miles east from the sea. It was founded by Gustavus Adolphus in 1611, and then built of wood; has suffered frequent ravages from fire; since the middle of last century most of the new buildings have been constructed of brick or stone. The trade is considerable in iron, steel, and deals. Population, in 1833, nearly 19,000.

STOCKHOLM, the capital of Sweden, on an inlet of the Baltic, so deep that ships of the largest burden can come up to the quay. Founded by Birjer Jarl, father of Valdemar I., about 1260. A canal (completed 1802) connects the harbour with Gothenburg. Stockholm has justly been called the Venice of the north. Population, in 1840, 84,000.

UPSALA, the site of a university (founded 1477), and of an archbishop's see, is a town of the hilliest antiquity. It was here that the great annual [illegible] to Odin took place. Upsala was for many centuries the capital of Sweden.

### IN RUSSIA.

FRIEDRICHSHAM, on the island of the Gulf of Bothnia, are most important in point of situation, as commanding the approaches to the capital of Sweden. They were strongly fortified by the Russians; but the chief stronghold, Bomarsund, was destroyed by the Allies in 1854; and an agreement has been entered into by the Treaty of Paris that they shall not be again fortified.

ABO, once the capital of Swedish Finland, but now belonging to Russia; since which, Helsingfors has been raised into the capital of the province, upon the ruins of Abo, nearly destroyed by fire in 1827.

NY KARLEBY is a small town on the road from Abo to Tornea, along the eastern coast of the Gulf of Bothnia.

BJORNEBORG, a small miserable-looking town in Russian Finland, but still the seat of a bishop.

LOVISA, a beautifully-situated town, was once a frontier post of the Swedes; and some remains of ancient fortifications are still to be seen.

FREDERICKSHAM, once a frontier town in Swedish Finland; but surrendered, together with Viborg and others, by the Treaty of Abo, 1743. Originally it was a place of considerable strength, but has long been suffered to fall into decay. It was here that the treaty was signed, September, 1809, by which Sweden surrendered Finland to Russia.

VIBORG, on the north of the Gulf of Finland, is a bishop's see, and a place of considerable commerce. Under the Swedes it was one of the principal places in Finland. The fortifications date from the fifteenth century.

SCHLUSSELBURG, a strong fortress on an island at the point of junction of the Neva with Lake Ladoga. Formerly belonged to Sweden, by whom it was called Notesborg. Peter I. gave it its present name, indicating that it was the key (*schlussel*) to his new city.

PETERSBURG, the metropolis of Russia, on the Neva, near the Gulf of Finland. Peter the Great began this city in 1703. The streets in general are broad and spacious, but the buildings are irregular. The inhabitants are computed at 356,000 persons, consisting of different nations. The opposite divisions of Petersburg, situate on each side of the Neva, are connected by a bridge on pontoons, which, on account of the large masses of ice driven down the stream from the Lake Ladoga, is usually removed when they first make their appearance. Among the noblest ornaments of Petersburg is an equestrian statue of Peter the Great in bronze, of a colossal size; the pedestal of which is a huge rock. It was erected on the pedestal, by the Empress, in 1782. Peter the Great and Catherine I. were publicly married in 1712, in this city. The former died here in 1725, and the latter in 1727. Count Panin, who had been one of the most active persons in placing Catherine II. on the throne, died here in 1783. Within the walls of the fortress is the cathedral of St. Peter and St. Paul, in which are deposited the remains of Peter the Great, and of all the successive Sovereigns, excepting Peter II., buried at Moscow. Catherine II. died at Petersburg, Nov. 17, 1796. The Emperor Paul was murdered here in 1801. Alexander, the last King of Poland, died at St. Petersburg in 1798.

PETERHOFF, a village about twenty miles from Petersburg, where there is a palace. There are stone-cutting works remarkable for the mechanism employed.

GRENDAGT, a town, and formidable fortification on the island of Retusari, in the Gulf of Finland. It is the usual station of the Russian navy, and defends the approaches to Petersburg, from which it is distant about twenty miles.

RIGA, a strongly-fortified town in the ancient Duchy of Livonia, was taken from the Swedes by the Russians in 1710. It is, next to Petersburg, the most important city in the Russian empire. Population, 60,000.

## GRAND TRUNK RAILWAY IN CANADA.

A SERIOUS disaster has befallen Canada, threatening to retard her industrial progress. The completion of the Grand Trunk Railway is suspended, owing to want of funds, the company alleging that the heavy rates of discount in the London Money Market during the last six months have rendered it impossible to raise money except on ruinous terms, even on the best securities. The consequence is, that the interest due and coming due on the bonds issued by the Canadian Government to the company cannot be paid; and the company have called upon the Canadian Government to enable the London agent of the province to provide the means for meeting the liabilities. In a matter so delicate it is our duty to quote official communications, that no possible doubt may arise upon any reason to be assigned for the following facts. In the Legislative Assembly of Canada, Mr. Cayley, the Inspector-General, or, as he would be called in England, the Chancellor of the Exchequer, read the following resolution drawn up in London, and forwarded to him for his consideration:—

RESOLVED, That, inasmuch as the embarrassed position of the company's financial affairs has compelled the necessity of their having recourse to advances from its bankers, to sustain the credit both of the province and of the company, by the prompt payment of the interest due upon the provincial bonds, and in view also of its continued inability to meet those future payments until the completion of the whole line, including the Victoria-bridge, it is ordered that the vice-president address a communication to the Hon. Inspector-General, urging that instructions be forwarded to the London agent, to enable him to provide for the interest for the half-year due last January and for the present half-year, coming due in July next, on the debentures issued by the province on behalf of this company, and amounting in the whole to £3,111,400 sterling.

Mr. Brassey, the vice-president, who was instructed to forward this resolution, proposes that the Canadian Government, for the benefit of the company, should, on the completion of this line of railway, should guarantee five per cent on the shares. Mr. Cayley states that the amount of the estimate for this guarantee, if the £3,000,000 necessary to complete the line be included, will not be less than £6,000,000, and that if, upon the completion of the whole line, the receipts should not amount to the guarantee, according to Mr. Caley's figures, would be £486,000 sterling, equal to about £581,000 Canadian currency. However, as matters now stand, the total amount of annual liability involved is £200,000. In asking for a vote of the Legislature to sanction this expenditure Mr. Cayley said:—

I desire strongly to impress upon the House that it is no longer a question of aid to the Grand Trunk Company. It is a question of fulfilling our own engagements—our own pledges to the public, which we are bound, come weal or woe, to maintain inviolate. The total amount of liability involved is £200,000; and it is perfectly clear from any revenue, past or expected, we can in no way anticipate, we have not the opportunity of meeting the engagements of the province or of the company, because these debentures have fallen into the hands of parties who have no connection with our country, and who look to Canada, and Canada alone, for the payments of the interest and the fulfilment of all other engagements.

The Inspector-General then estimated the ordinary revenue of the province, in round numbers, at £900,000; nor did he think it would exceed that figure, because, in the course of last year, by the operations of the Reciprocity Treaty and the free list, a permanent reduction had been made on former revenues, such as any mere extra importations will not cover. He then suggested three modes of meeting the deficiency—firstly, by direct taxation; secondly, by the issue of debentures to raise enough to pay the interest which the Grand Trunk Company cannot pay; and, thirdly, by the increase of customs duties. The two former schemes he rejected, and recommended the third, proposing an addition of twenty-five per cent on the entire customs' revenue to realise the deficiency. He then proposed to submit resolutions on an early day. What adds to the embarrassing part of these transactions is the fact that the contractors for the railway are also part of the company. The Government has rejected Mr. Cayley's proposition, but will pay the interest of £200,000 per annum.

THE PHILANTHROPIC SOCIETY.—The late Henry Dover, Esq., of Caston, Norfolk, bequeathed £3000, free of legacy duty, to the Philanthropic Society's farm school, Redhill. By a slight informality in the will, the executors would have been unable to pay more than two-thirds of the legacy, had not the residuary legatee, the Rev. Charles Stansfeld, of Sunningdale, desired that the deficiency should be made up, and the amount paid in full—an act of generous liberality which the committee of the farm-school propose to commemorate, by building an additional house to accommodate about forty boys, and to be called by Mr. Dover's name.

BELGIAN ANTIQUITIES.—A letter from the president of the committee appointed to organise the fêtes of 21st, 22nd, and 23rd July, and addressed to the provincial committees, recommends that the intended grand processions should represent a succession of episodes, by groups and so forth, touching the special history of each province. Thus, for instance, Namur, its Counts and its [illegible] celebrating Cæsar. Louvain, its fêtes to King and the race that drove out the [illegible] many and introduced the Salic law; Luxembourg [illegible] Count [illegible] Limburg, its first Latin Emperor of Constantinople; [illegible] Antwerp, not forgetting a cavalcade of knights of the Golden Fleece under [illegible] established at Bruges, in East Flanders, or the famous "*Horum omnium fortissimi sunt Belgæ*" of Cæsar.—*Letter from Brussels.*

THE PEACE REJOICINGS.—HOISTING THE ROYAL STANDARD AT THE TOWER OF LONDON.

## PE CE.

oare, let us twine our laurel leaves
With cypress for the heroes dead,
While Peace her greenest olive weaves,
Bedewed with tears round Victory's head:
For deeply we their loss deplore
Who sleep by the Crimean shore.

Let lamb and lion side by side
By the dumb rusted cannon lie,
And Alma's heights, with slaughter dyed,
Bask peaceful 'neath the summer sky:
Where late the battle-trumpet rung
Let harvest carols now be sung.

As from the ark went forth the dove,
When the wild waters were assuaged,
And heaven's own bow spanned out above
The plains, o'er which the Deluge raged,
So may the War from which we cease
Bring back the branch and bow of Peace.

And those the dead have with us left,
(The brave whom they no more will see!)
Who are of those they loved bereft,
England's adopted heirs should be:
Not fed by Charity's cold hand,
But led with honour through the land.

Had they not bravely fought and fall,
Who left their loved ones to our care,
We should have heard War's fiery knell
Still ringing on the troubled air:
The Peace that in its place doth reign
Was purchased by those myriads slain.

We cannot give them back their dead
Restore the love they held so dear;
But we can raise the mournful head
And wipe away the falling tear;
Their poverty and want relieve,
And show we feel for those who grieve.

Let these, while Victory's voices sounds high,
Be cared for with a parent's care;
Let us with one another vie
Their heartfelt losses to repair;
Point to the sacred trust with pride,
As all that's left of those who died.

Alma and Inkerman proclaim
The deeds our valiant dead achieved,
Enough for sorrow, honour, fame,
For though we triumphed we have grieved;
And tears will fall the while we tell
How the great Russian stronghold fell.

Let there be Peace! The armed town
But built to make oppression strong,
The Allied armies battered down,
Revenging thereby many a wrong;
Bured the great Idol to the day,
And showed the world its feet of clay.

Let there be Peace! Though in the strife
We scarce were warm, while he was worn,
For England's pulse beat with new life,
But the Great Boaster's strength was shorn;
He raised his nerveless arms for Peace,
We sheathed the sword and bade War cease.

We never struck a foe when down—
Alas! He cannot say the same;
We never tarnished our renown
With deeds at which the World cried "Shame!"—
Deeds which in History's page will stand
Red-written in a bloody hand.

Let's hope in vain we have not fought,
Let's trust the savage work is done—
The victory we've so dearly bought!
Let's pray the last aggressive gun
Is fired—and that we now may rest,
And the whole world with Peace be blest.

Deluge the huge round earth with gore,
Pile up the dead like mountains strong;
Right will be what it was before,
And Wrong will ever still be Wrong.
War is an error, and the cause
Will not be seen by blinded foes.

Against this evil let's unite
As neighbours do to quell a brawl;
If reason fails, and we must fight,
Then let it be the act of all;
And so united stand arrayed
Until e'en submission made.

War then would cease. The mighty
Upon whose word we all rely,
Has said "He who first draws the sword
Shall by the sword assuredly die!"
Does He His Holy Word maintain
Let Russia numbered up her slain!

Low in dishonour has he laid
Who first "unloosed the dogs of War:
With hands before his cold face spread
He's been called to the Eternal Bar:
Where myriads of accusers stood,
The silent Witnesses of Blood.

He's gone where all things are revealed,
Where Justice ever judges right,
Where thought nor act can be concealed
Before God's never-erring sight;
dreadful thought! oh, sight of fear
If all he's slain are mustered there!

If all those children desolate,
Those wives and mothers left to mourn,
Are entered in the Book of Fate,
And he asked when they will return
Who now sleep by the Black Sea shore!
How will he answer, "Never more"!

The reek of carnage from the slain,
The wild sky filled with dying cries,
Which through the vaulted heaven complain,
Must be a hateful sacrifice
To Him the Giver of all Good,
Who "taketh no delight in blood."

The hungry sea will have its prey;
All "ills unto which flesh is heir,"
Plague, fire, old age, and slow decay,
Are of themselves enough to bear,
Without man raising up his hand
To Murder—and break God's command.

In a just cause we never quailed;
Look at the Navy round our shore!
The mightiest fleet that ever sailed;
Our Army's such as no'er before
Round England's banner stood arrayed.
Yet the word Peace their strength has stayed.

Then let the deep-mouthed bugles blar
Tidings of Peace to all the world;
And while ten thousand bonfires glare,
And, crackling through the air, are hurled
Strange flames that redden dusky night,
Let tyrants tremble at the light.

Tremble, and know we so dispel
Night's Ignorance, and clear a way
Where Freedom's sons have room to dwell
In the full light of glorious day
Know where the English tongue is spoken
The chains of slavery must be broken;

Know that, however strong the power,
England Oppression will oppose;
Will come at her allotted hour,
And stand majestic mid her foes.
Such Destiny she must fulfil,
Obeying but a Higher Will.

And ages yet to come shall find
Her acts in History's page enroll'd;
The lasting Landmarks of the Mind,
Which will endure, however old—
Deeds which no ruin can efface,
Nor Time, with all his strength, erase.

Yet we have had our troubled days,
Our sleepless nights of doubts and fears;
Erred in ten thousand different ways,
And drawn unnecessary tears:
Routine has been our deadly bane.
God grant it be not so again!

Hearts that were never known to blench,
That fearless into battle went,
Sank when they changed the deadly trench
For scant raw meals and fireless tent.
Neglect, by her unmanaged reign,
Has slaughtered more than War has slain.

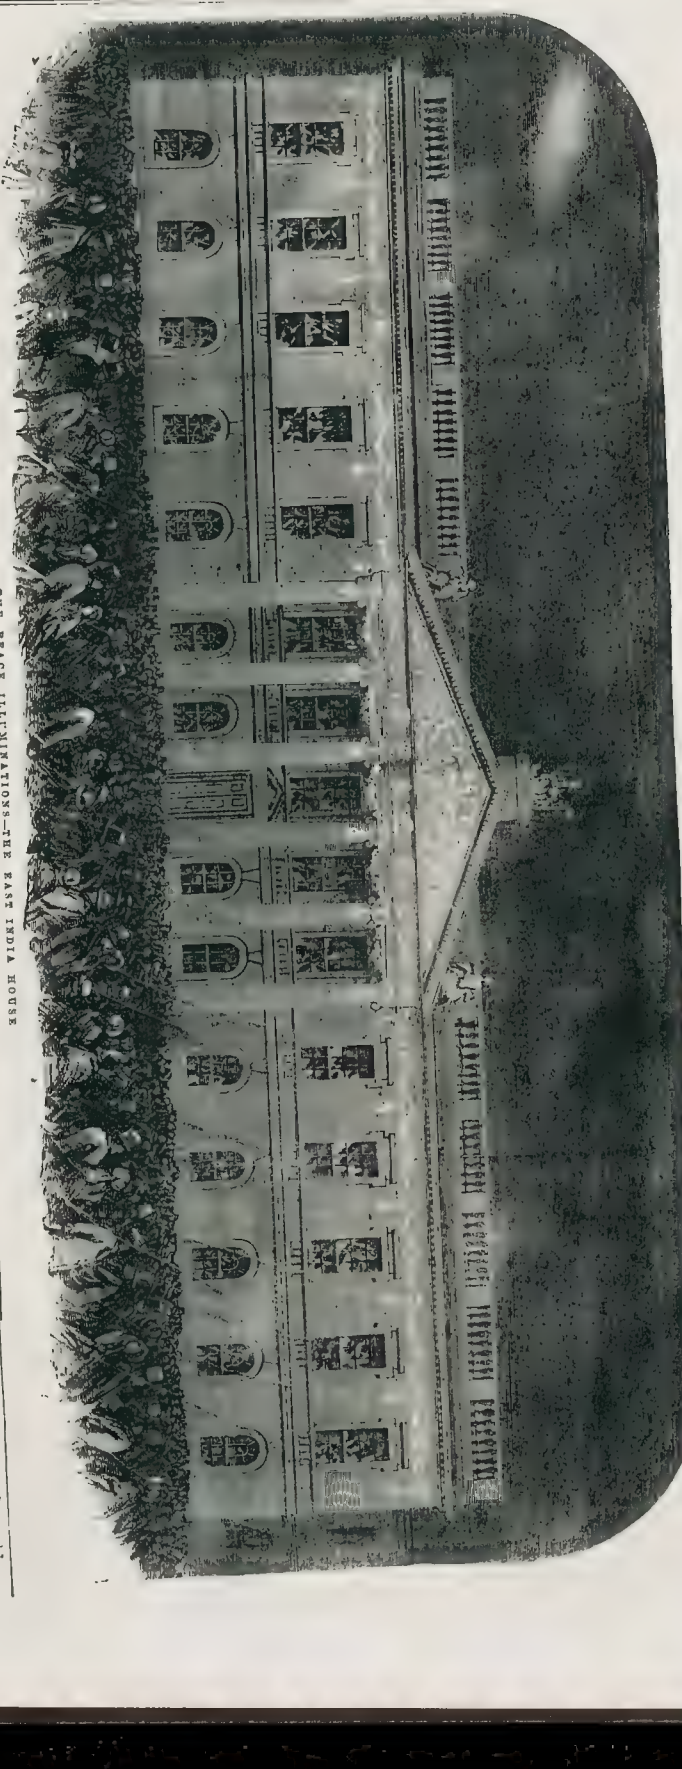
Oh, England! be no more allured
By empty show and useless form;
Think what those noble hearts endured,
Through hail and snow, through frost and storm;
While Indecision stood aside,
Halting and talking till they died.

Give honour only where 'tis due;
Let that be the distinction made:
Trust not unto the favoured few,
But banish from us "The Cold Shade."
Dearly have we experience bought
How Freedom's battles should be fought.

And now, while round the bonfires' blaze
Triumphant swells a nation's voice,
Let's think of those whom blame or praise
Can neither sadden nor rejoice.
Then to their memory drop a tear,
And cherish all they've left us here.

Above their graves sweet flowers now rise,
Where late the fiery war-horse trod;
And throw their incense to the skies
Beneath the great blue eye of God.
Oh let them consecrated be
Throughout all time to Liberty!

THOMAS MILLER.



# TRIAL OF WILLIAM PALMER.

## THE EVIDENCE FOR THE DEFENCE.

### EIGHTH DAY.—THURSDAY.

The Judges—Lord Campbell, Mr. Baron Alderson, and Mr. Justice Cresswell—again entered the court precisely at ten o'clock. His Royal Highness the Duke of Cambridge occupied a seat on the bench during nearly the whole of the day.

The following evidence was adduced for the defence:—

*Dr. Thomas Bevan* sworn, examined by Mr. Grove, Q.C.: I am a Fellow of the College of Surgeons, and Professor of Surgery in the Leeds School of Medicine. I have been in practice twenty or thirty years, and am a member of several learned societies, both English and foreign. I have seen many cases of tetanus, both traumatic and idiopathic. I have seen four of the latter class. They did not all commence with the symptoms of lockjaw. One did not so commence. I have been present during the evidence of the symptoms of Mr. Cook, and have also previously read the deposition relating to that part of the case. I am of opinion, from all the facts thus brought to my knowledge, that Cook died of some convulsive disease.

Examination continued by Serjeant Shee: I have paid attention to the evidence that has been given as to the previous state of health of the deceased, the symptoms at the time of his death, and the particulars of the *post-mortem* examination. I also heard the evidence relating to the state of his throat. I assume the deceased to have been a man of very delicate constitution; that for a long period he felt himself to be ailing, for which he had been under medical treatment, that he had suffered from syphilis; that he had disease of the lungs, and long-standing disease of the throat; that he led an irregular life; that he was subject to mental excitement; and that other death appearances were found on his body which showed this to be the case. There was found an unusual appearance within the stomach, the throat was in an unnatural condition, and the back of the tongue showed similar indications. The lungs were in a diseased condition, and the air-cells dilated. There was an unnatural deposit in the aorta, and there was a very unusual deposit in the membranes of the spinal marrow. These were all unnatural indications upon the *post-mortem* examination. I am also of opinion that one of the scars mentioned could only have resulted from a venereal ulcer. In cases of this kind I infer that the convulsive action arises from some irritation of the brain or disease of the spinal cord; but it frequently happens in those cases that after a *post-mortem* examination no trace of disease can be found. I am not aware of the existence of granules in the dura mater being common at any age, and I should not draw any particular inference from their appearance. The nervous structure undergoes a complete change very shortly after death. I consider it would be necessary to use a microscope to examine the nervous structure to ascertain whether it was diseased. I have seen a good many cases of traumatic tetanus. Three of the cases of idiopathic tetanus that I attended were accompanied by lockjaw as the first symptom. The fourth case began in the body, the facility of swallowing remaining. I have made the *post-mortem* examination of two persons who died from poison by strychnine within the last twelve months, and I have seen the effects of an overdose of strychnine. I did not see either of the patients before death. I ascertained, by chemical analysis in both cases, that the death arose from strychnia. The particulars of the *post-mortem* examination of Cook differ materially from all the cases where I have made the examination after a death by strychnine. The heart of Mr. Cook was stated to be empty and uncontracted.

The Lord Chief Justice said the word made use of was "contracted," and not "uncontracted."

Examination continued: The state of the lungs and their not being congested was also a different symptom—and also the non-congestion of the brain. I have examined the blood as of dead animals poisoned by strychnine at different periods, from a few hours to forty-three days, and when the body has become quite putrid, and I have never failed to discover the presence of the poison by the tests I have applied in any one case. I have experimented for this purpose in fifteen cases. In the case of Mrs. Cook, if strychnine had been in his stomach, and he had died of it, I should have expected to find the strychnine in the stomach. In the case of a minimum dose of strychnine to destroy life being administered, I do not believe that it would be entirely absorbed in the system, and I should still expect to find it.

Cross-examined by the Attorney-General: I will not swear that there is no diversity in the symptoms exhibited by animals of the same species where strychnia has been administered. Some animals exhibit a greater number of convulsions, and I have known one instance where an animal died after one convulsion. This has occurred when a similar dose has been given in another case where the period has been much more protracted. I do not consider there is any peculiar rigidity after death by strychnine. I cannot account for the emptiness of the heart in Cook's case. The lungs of the deceased were congested. The state of the heart, the lungs, and the brain were the points upon which I form my opinion that Cook did not die from the administration of strychnia. I do not ascribe the convulsions of which the deceased died to any particular symptom of delicate health.

The Attorney-General: Then you set up the opinion of this old gentleman, who ascribed that the deceased died of apoplexy, against the evidence of Dr Harland and Dr. Jones!

Cross-examination continued: I am of opinion from the evidence that the brain of the deceased was not healthy, and that in the condition it was in he was extremely susceptible to an attack of convulsions. In the state of excitement in which the deceased was, the administration of a grain of morphia would have been injurious. I do not think the deceased was in convulsions on the Sunday night. The witness afterwards said he thought he was, but in a slight degree. I never saw a case of tetanus where the stiffness continued up to the moment of death and afterwards. I know of no case where, in the instance of convulsions, the patient has been sensible to the moment of his death.

The Attorney-General: Do you agree with Sir Benjamin Brodie, that the symptoms of tetanus, whether arising from strychnine or natural tetanus, are the same except in the course that they run?

Witness: In my opinion the symptoms are less severe in the case of ordinary tetanus than in tetanus from strychnia. In the latter case I should expect to find the hands more firmly clenched than in the other. In the case at Leeds that has been alluded to, I had no doubt from the symptoms that strychnia had been administered. I stated in my evidence in that case that tetanus was a disease of days, and that strychnia poison causing the same symptoms was one of hours and minutes. I found my opinion that this was not a case of strychnia poison on the fact of Mr. Cook being able to speak.

The Attorney-General: Did you not hear it proved in the melancholy case of Mrs. Smythe that she asked for water to be thrown over her, and to be turned on her side just before she died?

Witness: I did not hear that. But, if it is true, and you say so, it would shake my opinion.

*Mr. W. Herapath*, examined by Mr. Grove, Q.C.: I am professor of chemistry and toxicology at the Bristol Medical School. I have experimented upon the poison of strychnia, but I have never seen a living case in the human subject, but I have examined a case after death from strychnia, and I found the poison in the contents of the stomach made the examination three days after death. I have experimented on strychnia purposely mixed with organic matter, and I detected it in every case. In my opinion, as a chemist, where strychnia has been the means of poisoning an individual, it must be found in the stomach, unless it is completely decomposed or reduced to a dry powder. I do not consider, in this case, that the condition in which the stomach and its contents were sent in the jars presented any difficulty in analysing them or in the discovery of strychnia if there had been any concealed in them.

By the Attorney-General: I have never been in medical practice. My profession is that of a chemist. I made an experiment on the 8th of May. It was not particularly in reference to this case, but for the purpose generally of acquiring information. I found strychnia in the liver, blood, and urine. In one of the cases where I discovered the strychnia in those tissues, a grain of strychnia had been administered. That is a large dose. I may have expressed a strong opinion that strychnia had been taken in this case, and that Dr. Taylor had not taken the proper means to find it out.

Re-examined: If the strychnine is pure and unmixed with organic matter in the stomach, I believe that the fifty thousandth part of a grain could be discovered. I have placed two grains in a gallon of water, which is one in seventy thousand parts, and from one-tenth part of a drop of the water the presence of the strychnia may be ascertained.

*Mr. W. E. Rogers*, professor of chemistry at St. George's School of Medicine, London, examined by Mr. Gray, had also made experiments of a similar kind, and had found strychnia. In his opinion, if strychnia had been administered to John Parsons Cook, it must have been discovered in the contents of the stomach.

*Dr Henry Letheby*, examined by Mr. Kennaly: I am a bachelor of medicine and professor of chemistry at the London Hospital. I am also medical officer of health to the city of London. I have been engaged for a considerable time in the study of poisons, and have often been engaged for the Crown in cases of this description. I have been present during the examination of the medical witnesses in this trial, and have heard the symptoms described by them at the death of Mr. Cook. I have been present at several experiments made with nux vomica, one of which was fatal, and I have seen several cases in front strychnia. The symptoms in my opinion, do not accord with those spoken to in this case. I have never witnessed so long an interval between the administration of the poison and the coming on of the symptoms as in this case. In the case of administration of strychnine that I have seen the patient has always been in such a state that its slightest excitement—any effort to breathe, a slight touch, a noise, or a breath of air—will set him off into convulsions. I do not think it probable that a person to whom strychnia had been administered could get out of bed and ring a bell violently. The slightest movement would excite the nervous system and bring on a spasm. I do not think it likely that a person in that condition could bear to have his neck rubbed. I consider that strychnia is the easiest of all poisons to detect. I have discovered it in the blood and in the tissues of animals. The longest period I have examined a body after death has been one month. The animal was in a state of decomposition. I have succeeded in detecting very minute portions of strychnia. When pure it can be detected in so small a quantity as the twenty-thousandth part of a grain.

By the Attorney-General: I heard the evidence in the case of Mrs. Smythe, and that struck me as being inconsistent with death from strychnia, but I have no doubt that in that case strychnia was the cause of death. It is probable, therefore, that when Mr. Cook felt the symptoms coming on, he might have at once got up and rung the bell. Besides the facts of the sitting up in the bed and the long interval before the commencement of the paroxysm, there is nothing that occurred on the Tuesday night that would not be consistent with the fact that the symptoms were those of tetanus from strychnia. The symptoms connected with the death of Mr. Cook are irreconcilable with everything that I have ever heard of. They are not reconcilable with any known disease with which I am acquainted.

By Mr. Serjeant Shee: New fits in medicine are becoming known every day, and I do not consider it impossible that some peculiar formation or malady of the spinal cord, not discoverable except immediately after death, may have produced some such symptoms as those described in the case of Mr. Cook. I allude equally to strychnia poison when I say the symptoms are irreconcilable with everything I have heard of, or am acquainted with, in the nature of disease or poison. In every case the touching of the animal immediately produced the paroxysm, and in the case of the lady referred to I think it was likely that her dragging of the bell when she first began to feel the symptoms of uneasiness immediately produced the paroxysm in which she was subsequently found to be labouring.

*Dr. R. E. Guy*, examined by Mr. Serjeant Shee: I am a member of the Royal College of Surgeons. I attended upon a person named Foster who was suffering from tetanus in October, 1855. I found he had a sore throat, muscular pains of the neck and the upper cervical vertebræ. On the fourth day of my attendance the jaw became completely locked, and muscular pains came on in the bowels and the legs and arms, and the patient was very much convulsed throughout the entire muscular system, and he had frequent violent contractions of the arms and hands, and afterwards the legs. On the twelfth day he became insensible, and continued in that state until the fourteenth day, when he died. This man was an omnibus-driver, and had had a sore throat for a few days, or perhaps a week, when I first saw him. He had no hurt or injury of any kind that would account for these symptoms. The body was not examined after death, but I call his disease inflammatory sore throat, from cold and exposure to the weather, and I consider it became tetanus on account of the patient being a very nervous, anxious man.

By the Attorney-General: This I consider to be an ordinary case of idiopathic tetanus, and it is the only one of the kind I ever had to deal with. The disease was altogether progressive in its character, and although there was occasionally a remission of the symptoms, they invariably recurred. The locking of the jaw was among the very first symptoms that made their appearance.

Lord Campbell asked Mr. Serjeant Shee when he thought it likely the evidence for the defence would be brought to a close?

Mr Serjeant Shee said he hoped to close his evidence next day; but he could not speak positively upon the point.

Lord Campbell said that there was no hurry in the matter, and that he did not wish any pressure should be put upon the counsel for the defence.

The Court adjourned at a quarter before six o'clock.

### NINTH DAY.—FRIDAY.

The prisoner, on being placed at the bar this morning, made his usual bow to the Court, and evinced the same composure which he has almost uniformly shown since the commencement of the case.

The first witness called was *Mr. Smith* and Mantell, of the London Hospital, who described the symptoms of a fatal case of tetanus resulting from chronic sores on the elbows which had come under their notice.

*Francis Wrightson* examined by Mr. Kenealy: I was a pupil of Liebig, and am a teacher of chemistry at the Royal Polytechnic Institution. In my chemical pursuits I have studied the nature and acquired the knowledge of poisons. I have been engaged for the Crown, and employed in a case to detect poison. I have made experiments upon various poisons, and amongst the rest strychnia.

Have you found any extraordinary difficulties in detecting strychnia? I have found no extraordinary difficulties. It is a poison that may be detected by the ordinary tests. I have discovered strychnia in pure water, and also discovered it when mixed with organic matter, after decomposition had set in. I have detected it in a mixture of bile and bilious matter, purposely so mixed. I have turned my attention as to whether strychnia can be discovered in the tissues, and I say it can.

Cross-examined by the Attorney-General: Suppose the whole dose absorbed into the system I should expect to find it in the blood. It passes from the blood into the solid parts of the body. Allow me to explain: I should rather think it would be left in the solid parts of the body. In its progress towards its final elimination it must pass from it either as a portion of life, I cannot tell at what point it passes from the blood into the solid parts of the body.

Will you undertake to say that if the whole dose was absorbed, and passed into the circulation, you could expect to find it? I should, because I have it still exists. I should find only that portion which remained in a particular place. If the whole had been eliminated from the system, I could not, of course, expect to find it. Supposing it to have been absorbed into the circulation, and thence into the tissues, I should search for it in the blood and also in the tissues.

Re-examined by Serjeant Shee: Supposing you knew a man to be killed by strychnia administered to him an hour and a half before he died, can that certainly be detected in the stomach? In my judgment it would. In such a case it would not all be absorbed. If it were, however, I think we should find it in the blood.

Do you think it might be detected in the coats of the stomach? Not knowing the dose, I cannot say. I should think it probable that it would.

*Mr. Partridge*, examined by Mr. Grove: I am in practice as a surgeon, and professor of anatomy at King's College. I have heard the evidence in this case as to the symptoms of Cook, and as to the *post-mortem* examination, including that portion relative to the examination of the spine. I think it very proper that the spine should be examined. I heard the statement as to the little granules that were found. Such granules would be very likely to cause inflammation. If there had been inflammation of the spinal cord, it could have been detected after death, but I do not think it could have been discovered after so long a period as nine weeks. I have not seen such a case myself; but such cases have occurred that such inflammation has produced tetanic convulsions. From what I have heard of Cook's case I cannot form any opinion as to the cause of death. Every variety of contraction takes place after death, and no conclusion can solely be drawn from that. I was speaking then merely of particular symptoms I have heard described in this case. If, however, I found the head thrown back in the way described I should infer that death occurred from that form of tetanic convulsion which produces contraction of the muscles of the back. Every variety of contraction is shown in a death from natural causes.

Cross-examined by the Attorney-General: Did you ever read of a case in which the patient died after a single convulsion of the nature?

Witness: Yes. There are concomitant symptoms, and a man could not have twenty-four hours of complete repose. There would be great pain and spasms. These are concomitant symptoms.

Attorney-General: You have heard the symptoms stated, I presume, of Cook's state from midnight on Monday to Tuesday night. Now, I ask you, as a medical man, whether you believe, under the circumstances, that he died from tetanus.

Witness: I should think not, my Lord.

Attorney-General: Are you acknowledge to having heard and attended to the description given by Mr. Jones from the moment the paroxysms set in up to the time that Cook died? Is it clear to you that those symptoms are not those of death by strychnia?

The Witness: Some are consistent, others are inconsistent, with ordinary tetanus.

Attorney-General: The question I ask you is this, whether the symptoms (describing them) whether these symptoms are not in accordance with what you know of death by strychnia?

The Witness: Decidedly. (Sensation.)

Attorney-General: You have known, of your own experience, cases of traumatic tetanus? Do you not know that the symptoms are progressive and gradual, and never wholly cease until death?

The Witness: I do. Traumatic tetanus does not produce death for three or four days. If death resulted in two hours, I should consider it probable that there was a pre-monitory symptoms. I have never witnessed a death from strychnia. In all my experience I have never known such symptoms as Cook's are described to have been arise from natural causes.

*Dr John Gay*, surgeon to the Royal Free Hospital, gave evidence as to the death of a boy from tetanus.

*Dr. M'Donald*, of Edinburgh, considered the decomposition of strychnine, as propounded by Dr. Taylor, to be quite new. In witness's opinion, Cook's death arose from epileptic convulsions with tetanic complication.

*Dr. Bainbridge* and *Dr. Steady* gave some unimportant evidence as to tetanic convulsions.

*Dr. Robinson*, of Newcastle-on-Tyne Hospital, expressed his belief that Cook died of convulsions resembling tetanus. The symptoms in Cook's case were consistent with poisoning by strychnine, but they were common in other diseases.

*Dr. Richardson*, of London, had seen cases of convulsions with symptoms similar to those of Cook's. He had known persons to die of angina pectoris, and the symptoms of that disease and of strychnine were precisely similar, and he should say that Cook's symptoms were more those of the former than those of the latter.

*Dr. Wrightson* was recalled, and gave some further evidence as to the absorption of strychnine in different parts of the body.

*Catherine Watson* gave evidence as to her symptoms when suffering from tetanus.

No other witness being ready, the Court adjourned till next day.

### TENTH DAY.—SATURDAY.

Lord Chief Justice Campbell, Mr. Baron Alderson, and Mr. Justice Cresswell took their seats on the bench precisely at ten o'clock. Crowds were collected outside the court throughout the day, and all the space inside available for the accommodation of the general mass of visitors was filled by nine o'clock. Among the more distinguished persons present on the occasion were General Fox, Colonel Cecil Forester, Mr. Harcourt Vernon, and Mr. Monnerton Milnes. The prisoner's face seemed to bear traces of increased thoughtfulness, or, it may be, of growing fatigue. He still remained standing throughout the day, but he leant for the most part with one or both arms on the dock.

Mr Oliver Pemberton, lecturer on anatomy, of Queen's College, Birmingham, stated that he had been present at the examination of the body of Cook after its exhumation in January, but that he was unable from its appearance to draw any opinion as to the state of the brain immediately after death.

Mr. Serjeant Shee said that this witness brought to a conclusion the medical evidence on the part of Palmer.

The following general evidence was then brought forward on behalf of the prisoner:—

*Joseph Foster*, farmer and grazier at Sibbertoft, in Northamptonshire, gave evidence as to Cook's health. He last knew him to have a bilious sick headache about six weeks and a half ago (Laughter). He never saw Cook sick on any other occasion, except about eight years previously at Market Harborough, at the cricket match, after dinner.

*George Myatt*, saddler, who was at Shrewsbury races on the day when Polestar won, gave evidence as to Cook's illness at Shrewsbury. He returned to Rugeley with him and Palmer. While in the train Palmer was sick, and both Cook and he said they could not account for the circumstance of their being sick.

*Jeremiah Smith*, attorney at Rugeley, gave evidence as to certain money transactions with Cook and Palmer.

Cross-examined by the Attorney-General: I am the person who took Mr. Myatt to Stafford gaol. I have known Palmer long and intimately, and have been employed a good deal as attorney for him and his family. I cannot recollect that he applied to me in December, 1854, to attend a proposal for insurance on the life of Walter Palmer for £13,000 in the Solicitors' and General Assurance Office. I will not swear that I was not applied to on the subject. I do not remember that an application was made to me to attest a proposal for £13,000 in the Prince of Wales on Walter Palmer's life in January, 1855. I knew that Walter Palmer had been a bankrupt, but not that he was an incertificated bankrupt. His bankruptcy took place at least six years ago. He had been in the business and that period to the time of his death. I knew that Walter had an allowance from his mother, and he had also money at various times from his brother William. In the years 1854 and 1855 I lived at Rugeley, sometimes at Palmer's house and sometimes at his mother's. There was no improper intimacy between myself and Palmer's mother. I slept at her house frequently—perhaps two or three times a week—having my own place of abode at Rugeley.

How often did the habit continue of sleeping two or three times a week at Mrs. Palmer's house?—Several years.

Had you your own lodgings and chambers at Rugeley?—Yes.

You own bed-room?—Yes.

How far was your lodging from Mrs. Palmer's house?—Nearly a quarter of a mile.

Will you be so good as to explain why, having your own place of abode, and your own bed-room, so near to Mrs. Palmer's, you were still in the habit of sleeping two or three times a week for several years at the house of Mrs Palmer?—Yes; sometimes there were members of Mrs. Palmer's family present.

Who were they?—There was Mr. Joseph Palmer, who resides at Liverpool; Mr. Walter Palmer, too; and sometimes William Palmer.

When you went to see the members of Palmer's family, was it too late when you separated to return to your own lodgings?—We used to stop very late drinking gin-and-water, smoking, and sometimes afterwards playing at cards.

Then you did not go to your own lodgings?—No.

And this continued several years, two or three times a week?—Yes.

Did you ever stay at Mrs. Palmer's house all night when there were no members of the family visiting?—Yes, frequently.

How often?—As many as two or three times a week.

When there were none of Mrs. Palmer's sons there?—Yes.

And when the practice was?—Yes.

How often did that happen?—I cannot say. Sometimes two or three times a week.

When there was no one else in the house but the lady?—There were the mother, daughter, and servants.

You might have gone to your own home, then, for there was no one to drink brandy-and-water with, or to smoke with?—I might have done so; but I did not.

Do you mean, then, to swear solemnly that no improper intimacy subsisted between you and Palmer's mother?—I do (Sensation.).

Now I will turn to another subject. Do you remember being applied to by Palmer to attest a proposal for an insurance of £10,000 on the life of Walter Palmer in the Universal Life Office?—I do not remember; if you have any document which will show it I shall be able to recollect, perhaps.

Now, do you remember getting a £5 note for attesting the signature of Walter Palmer's assignment of his policy to his brother?—I do not.

Is that your signature (handing a document to witness)?—It is very similar to it.

Is it not yours?—I do not know (Sensation).

Upon your oath, sir, is not that your signature?—(Witness here hesitated.) Examine the document and then tell me, on your oath, whether that is not your signature. (Witness examined the document.)

Now you have pursued it, tell me, is not that your signature?—Witness (hesitating): I have some doubts whether this is my handwriting (Sensation).

Have you read the whole of the document?—I have not.

Then do so. (Witness perused the whole of the paper.) Now, was that document prepared in your office?—It was not.

Have you ever seen it before?—It is very much like my handwriting.

That is not what I asked you. Upon your oath have you ever seen that document before?—Witness (with hesitation): It is very much like my handwriting (Sensation).

I will have an answer to my question. Upon your oath, sir, is not that your handwriting?—I think it is not in my handwriting. I think it is a very clever imitation of it (Sensation).

Will you swear it is not your handwriting?—I will swear it is not my handwriting (Renewed sensation).

The Attorney-General: Will your Lordship please to take a note of that answer?

Mr Baron Alderson: Did you ever make such an attestation as that in your hand?—I do not remember.

The Attorney-General: Now, is that the signature of Walter Palmer (handing a paper to witness)?—I believe it to be.

Is that the signature of Pratt?—I do not know.

Did you not receive that paper from Pratt?—I believe I did not. I think William Palmer gave it me.

When did he give it you?—I do not recollect.

I repeat my question. Did William Palmer give you that document?—Most likely he did.

Did he, I ask again?—It was not signed at the time.

But did he give it you?—I will have an answer—I have no doubt he did.

Well, then, if that document bears the signature of Walter Palmer, and was given to you by William Palmer, cannot you tell whether it bears your own signature or not?—Mr. Attorney——

Do not "Mr. Attorney" me—answer my question. Upon your oath, is not that your handwriting?—I believe it not to be.

Will you swear it is not?—I believe it not to be (Sensation).

Now, did you apply to the Midland Counties Insurance Office to be appointed agent to the company at Rugeley?—I did.

When was it?—I should like to fetch my documents and papers; I should then be able to answer you accurately.

Oh, never mind the papers. Was it in October, 1853? I think it was.

D.d you send up a proposal for an insurance of £10,000 on the life of Bates?—I did.

D.d William Palmer ask you to make that proposal?—Bates and Palmer came together to my office with a prospectus, and asked me if I knew whether there was an agent for the Midland Counties Office in Rugeley. I told him I never heard of one. He asked me afterwards if I would write to get the appointment, because Bates wanted to raise some money.

Did you send to the Midland Counties Office to get the appointment of agent, in order that you might be enabled to effect this insurance on Bates's life?—I did.

Did you make the application in order to get the insurance effected?—I did.

Upon the life of Bates for £10,000?—I did (Sensation). Bates was at that time superintending William Palmer's stud and stables. I do not know at what salary. I afterwards went to the widow of Walter Palmer to get her to give up her claim on the policy of her husband. She was then at Liverpool, to give up her claim on the policy of her husband. She was then at Liverpool, William Palmer gave me a letter for Pearl to take to her to sign. Mrs. Palmer said she would like to see her solicitor about it. I brought the document back with me because she did not sign it. I had no instructions to leave it.

Did she give any reason for not signing it?

Mr. Serjeant Shee objected to the question.

Lord Campbell decided that it could not be put.

The Attorney-General: Do you know whether Walter Palmer received anything on executing the assignment of his policy to William Palmer?—I believe he did receive something.

Did he not get a bill for £200?—I believe he di and he also got a house furnished for him.

Was that bill paid?—I do not remember.

Is that document in your handwriting (Document handed in.)—It is.

Now, having seen that document with your signature, I ask you whether you were applied to, to effect an insurance on the life of Walter Palmer?—I do not recollect.

Not recollect when your own signature is staring you in the face?—No, I do not.

You are an attorney, and accustomed to business transactions?—I am.

Now, I ask again, were you applied to on the subject?—I may have been. I ask again, were you applied to on the subject?—I may have been. It is from my memory I am speaking, and I wish, therefore, to speak as accurately as possible (Laughter)

I don't ask you as to your memory in the abstract, but your memory now that it is refreshed by that document. Is that your signature?—Witness (hesitating)- I have no doubt it may be.

Look at that document and see whether you were not applied to to effect the insurance I have named?—That is my signature.

I ask you have you any doubt that in the month of January, 1855, you were called upon to attest another proposal for £13,000 on the life of Walter Palmer?—Witness (with hesitation): I may have signed that paper in blank.

Did you sign this proposal in blank?—I might have done.

But did you, I ask again?—I cannot swear I did or did not. I have some doubt whether I did not sign several of these proposals in blank (Sensation)

Upon your oath do you not know that William Palmer applied to you to effect an insurance for £18,000 on the life of his brother?—I do not remember.

Why, this is a very large sum! surely you must remember such a transaction as that!—I may have been applied to on the subject.

Were you applied to to attest another proposal for an assurance with the Universal Life Office?—I cannot say that I was.

Will you swear that when Walter Palmer executed the deed of assignment of his policy to William Palmer you were not present? Now, be careful, for you will certainly hear of this on some future day if you are not careful!—I cannot say that I was.

Upon your oath, did you not attest the deed of assignment of Walter to his brother of his interest in a policy of insurance for £13,000?—I cannot say. I believe the signature "Jeremiah Smith" is very much like my handwriting.

I repeat the question!—I cannot say.

Why, did you not receive a cheque for £5 for attesting it?—I think I did receive a cheque for £5.

Did you not see William Palmer write upon the counterfoil of his cheque-book? (Cheque-book handed to witness.)—Witness (with hesitation): I cannot positively swear that I did.

Did you not, sir, see him write it?—That is William Palmer's handwriting (referring to the cheque-book).

Do you not know that the sum of a £5 cheque for attesting that signature!—I may have had a cheque for £5, but I may not have got it for attesting the signature of the document.

Why, you hold that piece of paper in your hand as though it burnt you.—Upon my honour it does not (A laugh).

You say you got £200 for Cook—£100 from Mrs. Palmer, and £100 from William Palmer!—Yes, and he gave me £10 for the accommodation.

To whom!—To William Palmer.

Do you not know that the £200 bill was given for the purpose of enabling William Palmer to make up a sum of £500!—I believe it was not, for Cook received absolutely from me £200

Did he not have the money from you in order to take it up to London to pay Pratt?—No; he took it with him, I think, to Shrewsbury, to the races.

Who was the bill drawn in favour of!—I think William Palmer.

What became of the bill!—I do not know.

Witness: I was not present at the inquest on Cook. I can't say who saw me with Palmer when we went to the Talbot Arms on the Monday night and went into Cook's room. One of the servants gave me a candle—either Bond, Mills, or Lavinia Barnes.

Re-examined by Mr. Serjeant Shee: I have known Mrs. Palmer twenty years.

I knew her before her husband's death. I should say she is sixty years of age. William Palmer is not her eldest son; Joseph is the eldest. He resides at Liverpool. He is forty-five or forty-six years of age. I think George is the next son. He lives at Rugeley. He was frequently at his mother's house. There is another son, a clergyman of the Church of England. He resided with his mother until within the last two years, except when he was at college. There is a daughter; she lives with her mother There are three servants. Mrs. Palmer's family does not visit much in the neighbourhood of Rugeley. Her house is a large one. I slept in a room nearest the old church.

Is there any pretence for saying you have ever been charged with any improper intimacy with Mrs. Palmer!—Witness: I hope not.

Is there any pretence for saying so!—Witness: There ought not to be.

Is there any truth in the statement or suggestion that you have had any improper intimacy with Mrs. Palmer!—They might have said so; but there is no reason.

Is there any truth in the statement!—I should say not.

When did it come to your knowledge that there was a proposal for Walter's life!—I never heard of it until the inquest.

Mr. Serjeant Shee submitted that he was entitled to reply on a part of the evidence, but the Court decided against the application.

The case for the defence was here brought to a close.

## THE ATTORNEY-GENERAL'S REPLY.

The Attorney-General commenced his reply on behalf of the Crown, at ten minutes before three o'clock. In the mass of evidence which had been brought before them two main questions presented themselves. Did the deceased man die a natural death, or was he taken off by the foul means of poison? Did poison, then come the still more important question, whether the prisoner at the bar was the author of the death? The case submitted on behalf of the Crown was this—that, having been first practised upon by antimony, Cook was at last killed by strychnine. The witnesses for the prosecution had stated, one and all, that, in their judgment, he died of tetanus, which signifies a convulsive spasmodic action of the muscles of the body. Could there be any doubt that their opinion was correct? Of course it did not follow that, because he died of tetanus, it must have been the tetanus of strychnia. That was a matter for after consideration. He had listened with great attention to every form in which that disease had been brought under their consideration—whether by the positive evidence of witnesses, or whether by reference to the works of scientific writers; and he asserted decisively that no case, either in the human subject or in the animal, had been brought under notice, in which the symptoms of tetanus were so marked as in this case. From the moment the paroxysms came on of which the unhappy man died, the symptoms were of the most-marked and striking character. Every muscle, says the witness—the medical man who was present at the time—every muscle of his body was convulsed—he expressed the most intense dread of suffocation—he entreated those about him to lift him up lest he should be suffocated—every muscle of his body, from the crown of his head to the soles of his feet, was stricken—the flexibility of the trunk and the limbs was gone, and you could have only raised him up as you would have raised a corpse In order that he might escape from the dread of suffocation they turned him over, and then, in the midst of that fearful paroxysm one mighty spasm seemed to have seized his heart, to have pressed it from its life blood, and the result was—death And when he died his body exhibited the most marked symptoms of this fearful disease. He was convulsed from head to foot. You could have rested him on his head and heels—his hands were clasped with a grasp that it required force to overcome, and his whole form assumed an arched appearance. But tetanus may proceed from natural causes as well as from the administration of poisons, and while the symptoms last they are the same in each case. In the course of the symptoms, however, and before the disease reaches its consummation in the death of the patient, the distinction between the two is marked by characteristics which enable any one conversant with the subject to distinguish between them. Natural tetanus is a not disease of minutes, not of hours, but of days. It takes, say several witnesses, from three to four days; and will extend to a period of even three weeks before the patient dies. And that the point there was the most abundant and conclusive evidence. They had the evidence of Mr. Curling; of Sir Benjamin Brodie, one of the most eminent men that ever adorned his profession, in this or any other country; of Dr. Daniel, a gentleman who had seen something like twenty-five or thirty cases of the disease. They had the evidence of a gentleman who had practised twenty-five years in India, where these cases arising from natural causes, were infinitely more frequent than in England; and he gave exactly none of whom could give more than suppositions as to the cause of the fatal symptoms in Cook's case He went on to show that no explanation had been given as to many suspicious circumstances in the chain of evidence against the prisoner. It had been proved, for example, that Palmer obtained strychnia on the Monday, and again on the Tuesday. That had been done with its On Tuesday he had again purchased a dose of that poison, and yet there had been no attempt on the part of the defence to show what Palmer had done with the strychnia in either case. After going rapidly over the various circumstances tending to prove the guilt of the prisoner, he wound up in the following terms:—

It is for you to say, under these circumstances, whether or not the death of the deceased was caused by the prisoner at the bar. You have, indeed had introduced into this case one other element which I cannot help thinking might well have been omitted. You have heard from my learned friend as unusual, I think I may even say an unprecedented, expression of his conviction of the innocence of his client. I can only say upon my own part that I believe my learned friend might have abstained from any such statement. What would he think of me if, imitating his example, I should at this moment declare to you, on my honour as he did, what is the internal conviction which has followed on my conscientious consideration of this case My learned friend has, with a full display of his great ability, also adopted another course which, although sometimes resorted to by members of our profession, involves, in my mind, a species of insult to the good sense and the good feeling of the jury: he has endeavoured to intimidate you by evoking your own conscientious scruples for the purpose of preventing you from discharging the only honest mode of discharging the great duty you are called upon to perform. My learned friend told you that, if your verdict in this case should be "guilty" the innocence of the prisoner would on that day or other be made manifest, and you would never cease to regret the verdict you had given. If my learned friend was sincere in that—and I know that he was, for there is no man who is more alive than he is to the claims of truth and honour—but if he said what he believed, all I can state in answer is that I can only attribute the conviction he has expressed to that strong bias which his mind—nearly, perhaps—received in directing all its energies to the defence of a man charged with this frightful crime. But I still think he would have done well to have abstained from any assurance of the innocence of the prisoner at the bar. I go further, and say that I think he ought, in justice and in consideration to you, to have abstained from telling you that the voice of the country would not sanction the verdict which you might give. I say nothing of the inconsistency which is involved in such a statement, coming from one who but a short time before had complained in eloquent terms of the universal torrent of passion and of prejudice by which, he said, his client was borne down. In answer to my learned friend I have only this to say to you:—Pay no regard to the voice of the country, whether it be for condemnation or for acquittal; pay no regard to anything but the voice of your own consciences; trust to your own sense of that duty to God and man, which you are about to discharge upon this occasion, seeking no reward except the comforting assurance that, when you shall look at the events of this trial, you have discharged to the best of your ability, and to the utmost of your power, the duty you have been called upon to fulfil. If, on a review of the whole case, comparing the evidence on one side and on the other, and weighing it in the even scales of justice, you can come to the conclusion that the prisoner is innocent, or even entertain that fair and honest doubt of his guilt which he is entitled to the benefit, in God's name give to him that benefit. But if, on the other hand, all the facts and circumstances of the evidence lead your minds with satisfaction to the conclusion of his guilt, then—but then only—I ask for a verdict of "Guilty" at your hands. For the protection of the good, for the repression of the wicked, I humbly ask for that verdict by which alone—as it seems to me—the safety of society can be secured, and the demands—the imperious demands—of public justice can be satisfied.

The hon. and learned gentleman concluded his address shortly after half-past six o'clock, after having occupied the breathless attention of his audience during a period of three hours and three-quarters.

Lord Campbell then addressed the jury as follows:—The cause of public justice imperatively requires that the Court should now adjourn. I shall feel no duty. In the important case, to bring before you the whole of the evidence on the one side and on the other, accompanying the reading of it with such remarks as I may think it proper to make. It is impossible for me to enter on that duty at this hour, and I am, therefore, under the painful necessity of ordering that you be kept sequestered from your families and friends during another Sunday.

The Court then adjourned at twenty-five minutes to seven o'clock until ten o'clock on Monday.

## THE JUDGE'S CHARGE.

### ELEVENTH DAY.—MONDAY.

Lord Chief Justice Campbell, Mr. Baron Alderson, and Mr. Justice Cresswell entered the court at ten o'clock. The same counsel were again present, both for the prosecution and for the defence, with the exception of the Attorney-General, who did not make his appearance in the court during any part of the day.

Lord Chief Justice Campbell then proceeded to deliver his charge to the jury. He commenced by expressing how well satisfied he was with the manner in which the case had been laid before them. Everything that could be accomplished for the purpose of assisting them in coming to a right conclusion upon the point at issue. The prosecution had been taken up by the Government of the country, so that justice might with the certainty be done to the prisoner at the bar. The Attorney-General, the first law officer of the Crown, had conducted the prosecution as a minister of justice. On the other hand, he was much pleased to know that the prisoner had had ample means of preparing for and of conducting his defence. Witnesses had been brought from far and of conducting his defence. Witnesses had been brought from all parts of the kingdom, to give evidence on his behalf; and he had had the advantage of having his case conducted by one of the most distinguished advocates at the English bar:—

Gentlemen, I must strongly recommend you to attend to everything that fell from that advocate, so eloquently, so ably, and so impressively—with the exception of that portion of his address in which he expressed his own private, personal conviction of the innocence of the prisoner. Gentlemen, it is my duty to tell you that that ought to form no ingredient in your verdict. You are to try the prisoner for the offence with which he is charged on the evidence which was laid before you on the one side or on the other, and not on the opinion which may have been formed by the able advocates that are guilt or of his innocence. I must say that I think it would have been better if the learned counsel had abstained from that attempt to influence your judgment. An advocate ought to press his arguments on the jury, but his personal opinion can form no legitimate ingredient in the conclusion at which the jury arrive; and the most disastrous consequences might follow if statements of the individual convictions of counsel were allowed to influence the course of public justice.

He then proceeded to give a summary of the allegations on the side of the prosecution and of the defence with respect to the charges against the prisoner. On the part of the prosecution it was alleged that the deceased, John Parsons Cook, was first tampered with by the prisoner with antimony; that he was afterwards killed by the poison of strychnia; that the symptoms accompanying his death were the symptoms of poisoning by strychnia; that the prisoner had a motive for making away with him; that he had an opportunity of administering the poison; that suspicion could fall on no one else; that he actually purchased strychnia on each of the two days preceding the night of Cook's death; that his conduct before and after that event was that of a guilty man. It was contended on the other side—and it was for them to decide how far it was truly contended—that the prisoner at the bar did not commit this crime; that he had no interest in the death of Cook; that Cook's death only precipitated and completed his own ruin; that Cook died the death of the effects of poison, but of natural disease; that there was nothing in any part of the evidence for the prosecution which was at all inconsistent with the innocence of the prisoner. It was for them to decide between these allegations on the one side and on the other:—

You have now to discharge a sacred duty in deciding on the conflicting evidence which has been brought under your consideration. If he is guilty of this crime the safety of society requires that he should not escape his merited doom; but if you are not convinced of his guilt it is your duty not to destroy the life of one who for all you know may be an innocent man. But in cases of this sort you cannot expect that witnesses should be called to state that they saw the deadly poison mixed and administered to the deceased. Circumstantial evidence is all that can be given in a case of this kind; and, if there be a series of circumstances leading to the conclusion of the guilt of the prisoner, then a verdict of guilty may be satisfactorily pronounced by the jury.

The learned Judge went over the whole of the evidence relating to the pecuniary transactions. He then passed on to that of the witnesses who had given testimony regarding Cook's illness and Palmer's medical attendance on him. The evidence of Newton as to the purchase of strychnine by Palmer on the Monday night was most important. It was, no doubt, true that this witness had been absent on the matter at the coroner's inquest, but a reason had been given for his keeping it back then, while no motive had been assigned for his swearing falsely to criminate a life against a man towards whom he had no ill-will. Then there was the uncontradicted evidence of Roberts as to the purchase of strychnine by Palmer on Tuesday evening, and the very remarkable circumstance that no attempt had been made to show what the prisoner had done, or intended to do with the poison. The learned counsel for the defence had said nothing as to the theory he might have formed with respect to the mode in which the strychnia purchased by the prisoner was disposed of; and upon that point not a syllable of evidence had been brought before them. There was no proof, and even no suggestion, how it was applied. That circumstance would not at all influence their judgment, unless they believed that the symptoms of Cook were consistent with death by strychnia; but if they came to the conclusion that his death was caused by strychnia, and if they believed the witnesses Newton and Roberts, then he should be shrinking from his duty, and should be unworthy to sit there, if he did not call their attention to the important inference that if Cook died by strychnia that strychnia was administered by the prisoner at the bar (Sensation).

Having called attention to the medical evidence respecting the symptoms of death from strychnia, his Lordship said the great question which they would have to consider was whether there might not be cases in which, although death was the result of strychnia, yet that strychnia could not be discovered. One portion of the evidence given by Dr. Taylor was very important. It was relied upon for the prisoner that there was no strychnine found in the body of the deceased upon the analysis by Dr. Taylor and Dr. Rees; but, according to the evidence of those gentlemen, in two cases at least, where death was undoubtedly the result of strychnia, they could not, by all the skill they possessed, discover the presence of strychnia in the body of the animal after death. Whether that might be the value of the different theories that had been propounded upon this subject, it was perfectly clear, upon the evidence, that in two cases at least, where the poison had been administered to the animal, and death was the result, no strychnine was discovered in the bodies after death. His Lordship then called the attention of the jury to the fact of the discovery of antimony in the liver and spleen and blood of the deceased, and to the evidence of Dr. Taylor, that the antimony had, in all probability, been administered very shortly before the death of the deceased, and also to his opinion, that, if it was administered in any considerable quantity at one time, it might have the effect of causing a constricting sensation in the throat, similar to that described by Cook on the night of his illness at Shrewsbury. The jury would judge from all the facts whether antimony was not administered at Shrewsbury and again at Rugeley; and although antimony was not the cause of the death, yet it was undoubtedly a most important ingredient of the charge against the prisoner, and of the evidence by which it was sought to be supported. Professor Brande also confirmed the evidence as to the discovery of antimony. With regard to the point of the interval that elapsed between the administration of the strychnia and its effects becoming apparent, there was the important evidence that, if the poison had been mixed up with any resinous or insoluble material, its action would be very much retarded, and the symptoms would not come on so quickly; and Professor Christison also stated his opinion that there was no natural disease to which the symptoms exhibited by Mr. Cook could be referred. His Lordship then directed the attention of the jury to the evidence of Dr. Jackson, and this concluded the summing up so far as regarded the evidence for the prosecution.

The Court was then—it being eight o'clock—adjourned until ten o'clock next morning.

### TWELFTH DAY.—TUESDAY.

The learned Judges took their seats on the bench precisely at ten o'clock. There were present the Marquis of Anglesey, the Earl of Denbigh, Mr. Milnes Gaskell, M.P., Lord Denman, Mr. G. Vernon, M.P., Mr. C. Forster, M.P., Mr. C. P. Villiers, M.P., and other gentlemen. Palmer had not changed in appearance, and this morning was perfectly cool and self-possessed.

Lord Campbell continued his charge to the jury. He said that at the adjournment of the court on the previous evening he had gone over all the evidence of the prosecution, and it certainly did present a serious case against the prisoner at the bar. It appeared that in the middle of November last he was most seriously embarrassed, and that he had to make payments for which the amounts in hand were quite inadequate. Cook, on the races at Shrewsbury, became master of £1000, and the inference had been drawn that Palmer formed a design of appropriating it to his own purposes, in order to relieve himself from his embarrassments. It was proved that the privilege of the survival of Cook, which was a forgery, for the purpose of appropriating to himself Cook's property. What would have been the effect of the survival of Cook under those circumstances it would be for the jury to consider. No doubt, if Cook had lived, the charge would have been brought against him, and would have led to an exposure of all Palmer's delinquencies. With respect to the joint liability of Cook and Palmer, it was said that it was disadvantageous to Palmer that Cook should die; but there seemed to be some doubt whether it was not the intention of Palmer to possess himself of the whole of Cook's property, and in that case he had a direct interest in his death. Then, as to the medical evidence which had been adduced for the prosecution. The jury had heard the evidence of able and honourable men, who said that the deceased did not die a natural death, and that the symptoms were consistent with death by strychnine, and not consistent with death by ordinary tetanus. There was no point of law requiring that the strychnine should be found in the body of the deceased, and it was not, therefore, for the jury on this point to consider whether the evidence of the prosecution was sufficient, or whether they could rely upon the answer which had been put in by the defence. There was direct evidence that the deceased took the poison of strychnine on Monday and Tuesday. What he prisoner procured the poison of strychnine on Monday and Tuesday. What he did with it was not for him in that place to affirm. It was impossible for the jury not to pay attention to the conduct of the prisoner both before and after the death of Cook, and they would not fail to consider, as part of the circumstances, his very remarkable proceedings in reference to the betting-book, which had never been discovered.

The learned Judge then read *in extenso* the evidence of Mr. Nunneley, of Leeds, pointing out wherein it differed from that of other witnesses regarding the symptoms produced by strychnia. After having in the same careful manner gone over his notes of what had been stated by Mr Herapath, Dr. Letheby, Mr. Gay, Dr. Wrightson (of Birmingham), and the other witnesses, he said that was all the medical evidence that had been adduced by the counsel for the defence on the part of the prisoner, and this, therefore, might be a convenient period for the Court to adjourn.

The Court, therefore, at ten minutes before one adjourned.

As Lord Campbell disposed of case after case brought forward by the defence, and allowed how they failed to tend in any respect to the prisoner's advantage, Palmer buried his face in his hands, and when he resumed his original position his countenance bore strong indications of the violent emotions with which he was contending. He seemed to be labouring under the impression—an opinion, indeed, which was shared by every one in the Court—that the observations of the Judge were producing a marked effect upon the jury, and lessening every moment the chance of the prisoner's acquittal. Strange as it may appear in the face of this statement, it is perfectly true that, as Palmer was stepping out of the dock on the adjournment of the Court, he dropped a note to Mr. Smith, his solicitor, stating that he felt perfectly certain of an acquittal.

At a quarter-past one the learned Judge returned into Court.

Lord Campbell then pointed out the discrepancies between the evidence for the prosecution and that for the defence on several points, leaving it with the jury to decide which witnesses were and were not to be believed. The case was now before them. They must not act upon suspicion or even upon strong suspicion, and they must only pronounce a verdict of guilty if their minds were fully made up. If, however, they could come to the conclusion that the prisoner was guilty, they would return such a verdict unfettered and undeterred by any intimidation.

Serjeant Shee objected to the question which his Lordship had put to the jury. He submitted that the question, whether the symptoms of those death were consistent with death by strychnia, was a wrong question, unless coupled with the words, "and inconsistent with death from natural causes;" and that the question should then be, whether the medical evidence established beyond all reasonable doubt that the death of Cook was attributable to strychnia.

Baron Alderson: That is the question which has been put.

Lord Campbell (to the jury) was understood to say he did not submit to them the question whether the symptoms of Cook's death were those of strychnine without going into the other points of the case. If they believed that those symptoms were consistent with death by strychnine, they would, God willing, return a verdict of guilty.

The jury returned at twenty minutes past two; and, after an absence of an hour and seventeen minutes, returned into court with the

VERDICT—GUILTY.

Sentence of death was then passed in the usual form.

THE PEACE REJOICINGS.—RINGING THE BELLS.

THE PRIZE ILLUMINATIONS.—A STREET SCENE.—DRAWN BY GEORGE THOMAS.

## PICTURE SALES AT MESSRS. CHRISTIE AND MANSON'S, KING-STREET, ST. JAMES'S.

To the man of art, letters, and leisure, "Christie's" is as much a national establishment and favourite metropolitan lounge as the Royal Academy or the Opera. The cast of the company is unvarietable; and in those *habitués* in the prime of life, or gentlemanly past it, with rosy gills, whitening hair, or well oiled Bond street peruke, one cannot fail to recognise the eye practised in matters of art, and divine the progression of a handsome balance in the account at Coutts' or Drummond's, a house in the most irreproachable streets of Mayfair or Belgravia which is a perfect cabinet of curiosities, to kill the ennui inseparable from a large rental, or charm the leisure subtracted from successful City money-getting. His effigy drawn by Mr. Solomon Hawkseye, who is "in the trade," or, as the phrase now goes in Wardour street, "a gentleman of the profession," who knows to a nicety the value of every Rubl cabinet or ornament of porcelain, from a Watteau group that might have belonged to Augustus the Strong to a cracked piece of Faenza. In short, who does not know Christie's sky-lit room, with its dissolving views of one celebrated picture-gallery after another, and its Jew and Gentile frequenters?

Rome was not built in a day, and it is nearly a century since the now prosperous establishment of Messrs. Christie and Manson was founded by the grandfather of Mr Christie, sen., so that with old and young we see four generations of Christie in connection with the transfer of our artstreasures from hand to hand. James Christie, the first auctioneer of that name, was born in the neighbourhood of Perth, in the year 1735. Like many of his countrymen, he came south at an early age, and commenced his career by obtaining a commission in the Navy, in which he served several years, at a period depicted with such an inimitable drollery by his fellow-countryman Smollett. But it was not fated that Mr. Christie should settle down as a gouty incumbent. Finding he had not interest to push himself on, he became an assistant to Mr. Annesley, an auctioneer in Covent-garden, then the centre of art, wit, and the quintessence of town life. About the year 1763 Mr. Christie, after having been for some years the partner of Mr. Annesley, established himself as an auctioneer in Pall mall, in the gallery previously occupied by the Royal Academy, which stood opposite the present Colonnade.

About the year 1770 Mr. Christie removed to the great room joining the Ordnance-office, and soon succeeded in obtaining the position of the first auctioneer of the day. Up to that period the English public, immersed in party dissensions, rural pursuits, and the coarse vices of the turf and the tavern, had not become the picture-buying and the picture-selling nation that it now is; but the great convulsion of the French Revolution, and its effects over the whole of the Continent in dispersing art-treasures, combined with the steady and culminating commercial wealth of England, contributed to pour a large mass of valuable pictures into this country. The Houghton Collection of Sir Robert Walpole, and some few others of the older-formed collections, left the shores of England: but this was nothing compared with the prodigious influx of valuable pictures of every school, and from almost every part of the Continent, out of which our Staffords, Grosvenors, and a multitude of other amateurs, have formed, or at least increased, the noble picture-galleries of England.

Mr Christie (we are still speaking of the patriarch of that name) was of a tall and commanding person, graceful in manner, fluent and witty in speech, and enjoyed the friendship of the distinguished men of the day; among whom we may mention Richard Brinsley Sheridan, David Garrick, and Gainsborough, who painted a fine portrait of him leaning on a pile of books representing a landscape,—so that this represents this eminent Britain's use in the felicity of his double function as a landscape and portrait painter.

On one occasion Mr. Christie was conspicuously connected with the political passions of the war, when the popular fury was directed against Sir Hugh Palliser by a public that, in naval operations, would tolerate nothing short of the most brilliant and daredevil successes, and which, little more than a generation before, had delivered Byng to the executioner. The mob, hearing that the mob was attacking Sir Hugh's house in Pall-mall, sallied out, attended by his porters, and, resolutely and successfully driving back the assailants, preserved his house from pillage.

The sales conducted by Mr. Christie were numerous and important, comprising the pictures, jewels, and effects of many persons illustrious for their adventitious rank and their genius in arts and in arms. Of the effects of Royal personages we find in the list those of the Princess Dowager of Wales, the mother of George III and protector of Bute, the music of the old Duke of Cumberland, and the effects of the Duke of Cumberland at Peterham in 1794.

Foreign illustrations and notabilities we find the pictures of Count Bruhl, "one of the most splendid and munificent Ministers of the King of Poland," and Alexander Iskrefeus said that Louis Quinze could learn kingcraft from him. Unfortunately, Frederic the Great had damned him by saying, "Iskrefeus wears his head on his shoulders as well as any of my wigs for a man who has no head." Then we have the effects of Paoli, twice refugee on our shores, and much straitened in his pecuniary circumstances, notwithstanding his British pension; and in 1808 the pictures of Calonne, who, fortunately for himself, had been expatriated before the guillotine had begun to open its fearful maw, and whose name we well recollect as a constant opera-box subscriber in the early years of last century.

Of the effects of those illustrious by service to the State we have those of Lord Heathfield, the gallant Elliot in 1794—that is four years after the death of the immortal defender of Gibraltar. In 1808 those of the accomplished Sir William Hamilton, the husband of the notoriously fascinating "Emma." In 1796 the effects of the gallant Rodney came to the hammer, four years after his death and fourteen after his brilliant West Indian victory.

Of the effects of persons who have figured in the fine arts the sales are numerous and important. In 1779 we have the music of Dr. Boyce, that sound English organist and composer of the last century. The effects of Dr. Samuel Johnson, that gigantic moral figure so much better known in the undress of Boswell than in the ruffles and starch of the *Rambler*. The works of Cipriani in 1786, the year after the death of this "original Academician," but most unoriginal and hyper-Academical painter. Just ten years later we have the sale of the collection of his patron and friend, Sir William Chambers, the architect of Somerset House, and whom Cipriani accompanied from Italy to London. In the previous year, were sold those of another Italian whose name is associated with more than one of our fine arts—Bartolozzi, that eminent engraver and Royal Academician whose works are still so prized. About the same time we also note the sale of the effects and pictures of Gainsborough, by the hand of his friend and favourite, Dr. Ford.

1793 we have the sale of the pictures of Morland, the Adrian Brower of British art—bankrupt in health, fortune, and reputation when still in the prime of life. But probably the most important and interesting of all these sales was that of the pictures and effects of Romney. The effects of 1795, three years after the death of the artist. This, however, has been so frequently described in various publications illustrative of the age—and life of the great artist, as to render it superfluous to say anything more, as we deem it more expedient to dedicate the space at our disposal to making additions to the history of the transfer of works of art rather than a reiteration of materials already familiar to the student of the social history of the last century.

As in the world of fashion the names are almost endless—from the real and veritable Lord Chesterfield himself to the Yarmouths and Queensberrys of the Regency—the latter as inferior to the former as a Lazzaroni to a Ligue. However, as a sort of contribution to fashionable obituary, we give a list of Christie's sales of effects, which as an Irish friend would say, is to be an indispensable contribution to the archives of [illegible]

Mr. Christie continued to devote himself to business until a year before his death, which took place in 1808; and we here insert an extract from the *Public Journal* of that period which shows the estimation in which he was held by those with whom he came in contact:—

"On Monday last the remains of Mr. Christie, of Pall-mall, were deposited in St. James's Cemetery. We cannot suffer this very respectable character to drop into the grave without paying a small tribute to his memory. His understanding was excellent, his heart truly benevolent, his talent in his profession unrivalled; he possessed a warmth of imagination and a flow of eloquence highly gratifying, with a strong sense of humour; he had equability of temper, and the most conciliating urbanity of manner: he might be said to come into the world with the mind and feelings of a gentleman, and the character he supported upon all occasions. No man could be more firm as a friend, and none could discharge the duties of kindred with more endearing kindness. In his profession, zeal, knowledge, talent, and rectitude uniformly marked his conduct. The deep regret of a numerous family and circle of friends will justified the opinion we have given of this highly-respectable character. For upwards of a twe.vemonth before his decease illness had prevented his active attention to business, when he was assisted by his eldest son, the present head of eight children. There is a fine portrait of the late Mr Christie, by Gainsborough. Of Mr Christie's three remaining sons, we may testify that each bears a high and honourable character."

Mr. Christie left four sons and four daughters. The eldest son, Charles, rose to the rank of Major, and greatly distinguished himself; Edward, the second son, followed the naval profession, and died of yellow fever, as Lieutenant; one followed the law; and the management of the business in Pall-mall devolved on the other son, Mr. James Christie, who, by his taste for art and antiquity, seems to have been eminently fitted for his profession. He was educated at Eton, and intended for the Church; and this sound classical basis proved of great use to him in his multifarious relations with proprietors and acquisitors of objects of art, virtu, and antiquity. The transport of the Elgin marbles to England, the importation of Etruscan vases, the adoption of the classical models in furniture through the patronage of Mr. Hope and others, and subsequently the poetry of Byron and the enthusiasm for Greek liberation, all conspired to raise the classical enthusiasm of our fathers to the highest pitch.

In pursuing the analysis of the sales of the second of the Christie dynasty, we find in 1806 the pictures of the Prince of Wales at that gay period of life when he enchanted his cronies by the charms of his manner, but when his household gods were rather shaky on their pedestal. In the same year were sold the books of Lord Thurlow, just after the decease of this great lawyer, so grave on the bench, and so gay at the convivial table. In 1810 the pictures of Hoppner were brought to the hammer, this sound English artist having died in that year; and in the following year the effects of the Duke of Queensberry almost the last of the Caledonian tribe of the eighteenth century, as depicted by the Richardsons, Fieldings, and Smolletts.

In April, 1811, was sold the collection of Henry Hope, one of those Caledonian mercantant-princes so long settled in the commercial capital of Holland, whose prodigious wealth, and let us add taste, had enabled them to become possessors of noble works of art. Mr. Christie of that day announces it as an assemblage of capital Flemish and Dutch pictures, the genuine property and a part of the magnificent collection of that distinguished connoisseur and patron of the arts, Henry Hope, Esq.: among which will be found the "Village Feast," a grand chef-d'œuvre by Teniers—an unrivalled performance for spirit of execution and fine tone of colour; the very celebrated "Cabinet" by Mr. Hope and others, and subsequently five pictures by Poelemberg—one of which, a most prec ous gem, was formerly in the private collection of Rubens; and an original portrait of "Mary Queen of Scots," by Jamieson, &c. The Teniers was knocked down to Lord Yarmouth, subsequently Marquis of Hertford, for 1000 guineas; the "King William" fetched the same sum. The best pictures of the Hope collection were not sold.

In 1814 and 1815 there were large sales of the Prince Regent's pictures under the anonymous title of "A Distinguished Cabinet," at which one flower-piece by Ruysch fetched £367.

In June, 1820, the sale of President West's collection took place—the gem of which was Titian's "Death of Actæon," knocked down at £1785. The erudite President knew say critics, as well as in Art, and in the Academic style of painting—traced the picture to the collection of Charles I. He bought it at a sale that took place after a fire in Covent Garden for £25, and no doubt did his best in retouching it. Christie catalogues it "The Death of Actæon—a good sketch for the picture in the Bridgewater collection, on the bank of a river, &c. This prodigy of art was painted by Titian for the King of Spain, by whom it was presented to Charles I. of England."

In May, 1821, the celebrated Thomond Gallery was sold, comprising many of the finest works of Sir Joshua. "The Piping Shepherd boy" went for £430 10s. The original designs for the compartments of a window in Oxford New College fetched long prices for that day. "Charity" was knocked down to Lord Normanton for £1575, and "Justice" for £1155. The easel of the artist was also sold on this occasion.

But the most renowned of all the sales of this period was that of the contents of Mr. Beckford's Fonthill, which was catalogued by Christie, but, by intervening changes, sold by Phillips. Seven thousand two hundred copies of the *guinea catalogue* were sold a sufficient indication of the public curiosity as to the collection of "England's wealthiest son," who was then rather accounted, from Chancery suits and West Indian property fluctuations. A condensation of the introduction to this world-renowned catalogue will not, we hope, be deemed superfluous in relation to one of the most notable dispersions of art-treasures on record, £270,000 having been expended on the edifice alone.

After alluding to the curiosity regarding the throwing open the arcana of Fonthill, we are told the collection comprises the "Laughing Boy" of Leonardo da Vinci, which belonged to the Earl of Arundel; and the gems of the Cracherode and Praslin cabinets.

"The assemblage of porcelain," says Mr. Christie, "will surprise by the quantity as well as the beauty of the specimens, which are of the finest Oriental, and of the old Sèvres and other European manufactures; that of the old Japan lacquer upon wood is without rival in this or any other country. It will exhibit unexpected examples of the ingenuity and taste of the Japanese in this very delicate and admirable branch of manufacture; especially a cabinet of Japan incrusted with gems of solid gold and silver, formerly the property of Cardinal Mazarin, and a casket of extreme beauty which formed a principal ornament of the collection of Madame de Pompadour.

"The sculptured vessels of topaz, sardonyx, agate, and crystal are numerous. One of them in particular is presumed to be from the tool of some Asiatic Greek artist, of the times of classic antiquity; others are sculptured by Benvenuto Cellini, or mounted with his exquisite jewellery and chasings.

"Among the ivory carvings will be found undoubted specimens by Flamingo, Magnus Berg, Strous, and other great artists in that line.

"The armouries contain a sumptuous display of ancient silver-gilt vessels, such as sideboard dishes, ewers, and salvers, one of which belonged to King Charles I.; others are of Persian and Moorish chasing. A great number of rich and massive silver-gilt candlesticks were designed by Moette and executed by Auguste.

"The furniture comprises cabinets of buhl and ebony, with the finest Florentine mosaic; of Japan and other costly mate ials, including one, very beautiful, designed by Berolni, and another, by Holbein, from the Palace at Whitehall: as also a set of ebony chairs, from Esher, which belonged to Cardinal Wolsey; and, above all, a magnificent table of extreme mosaic, of extraordinary dimension, inlaid with marbles, of the time of the Medici, formerly preserved in the Borghese Palace—the finest in Europe for size and the disposition of its valuable materials.

"An inspection only of the vast assemblage of articles of taste and magnificence can convey a true notion of their splendour and beauty. They derive interest, many of them, from historical anecdote, and all from the enchanting effect of the building in which they are contained. Every article will be found worthy of the fine taste which projected and reared the very beautiful Abbey of Fonthill."

When, in consequence of the sale en masse of Fonthill to Farquharson, who thenceforth employed another auctioneer, Mr. Beckford called on Mr. Christie, and heard the amount of how much he would have pocketed if he had sold the contents of Fonthill, one on learning the sum, with princely liberality, gave Mr. Christie a cheque for the amount. Waggonloads of articles from London were sold at the same time with Mr Beckford's collection, and the abbey itself, at Fonthill, and stated as "from Fonthill," were not of the Fonthill collection.

There was rather a collapse in the fortunes of the once princely West Indian proprietors about this time; for we find the following year (1823) a sale of the effects of Mr. Warren Haylor in Cavendish-square, comprising one of the most interesting and valuable galleries ever collected by commercial wealth. The celebrated portrait of Dr Johnson, painted by Sir Joshua Reynolds for Mr. Thrale, and purchased at the sale of Mrs. Piozzi's pictures at Streatham, fetched £493; and the grand picture, by the same artist, of Mrs. Siddons, as the Tragic Muse, which had been bought by M. de Calonne, was knocked down to Earl Grosvenor for £1837; but the highest prices fetched at Watson Taylor's sale were those of Rubens' celebrated "Rainbow Landscape," from the Balbi Palace at Genoa, which was knocked down to Lord Oxford for £2730, said to be the masterpiece of Rubens in his landscape line; and the "Vision of St. Jerome," by Parmegiano, which was acquired by that highly-accomplished amateur, the late Mr Holwell Carr, for £3200; and by him most munificently transferred to the walls of the National Collection.

In the same year (1823) the effects of the widow of Garrick were brought to the hammer, comprising the curiosities of her house in the Adelphi and the villa at Hampton Court. In this sale was Lely's portrait of the Duke of Monmouth that had been presented by the artist to Mrs. Bracegirdle, and by this celebrated actress to Congreve, by the latter to Wilks (the comedian), and by his relation, Thomas Wilks of Dublin, to Garrick. "A View of an Eruption of Mount Vesuvius," presented to Mr Garrick by Sir William Hamilton; and a letter from sir William, descriptive of a mechanical contrivance to heighten the effect of the irruption, which, says the catalogue, will be given to the purchaser.

The theatrical odds and ends of this sale were curious, and among them we hear of Shakspeare relics: an inkstand of the Stratford mulberry-tree, a salt-cellar made of deif ware, which formerly belonged to Shak-peare, as well as a pair of gloves and a dagger belonging to the same genius, pronounced "authentic." But the gems of this collection were Hogarth's four election subjects:—"The Canvassing." "The Poll," "The Chairing," and "The Election Feast." When the hammer fell Mr Christie said "I am the returning officer on this occasion, and declare Sir John Soane duly elected to become the possessor of these pictures."

The commercial crisis of 1825 now followed—the year marked by the sale of the effects of the banker, Fauntleroy, who expiated his forgeries on the gallows; the notoriety of the man, rather than the intrinsic value of the articles, attracting a densely packed crowd.

Two art-sales now followed—those of Weil and Nollekens the sculptor; the latter of whom had, by the exercise of his profession, accumulated a fortune of not less than £200,000. But the most important of this class was Sir Thomas Lawrence's, in 1830 and 1831. The prices were not high, considering the judgment of the collector. Rembrandt's "Wife of Potiphar Accusing Joseph," a picture of great power, was knocked down to Mr. Joseph Neeld, for £598. A fine "Canal Scene" by Turner fetched only £196, not one-fourth of what the same picture would now sell for.

The Royal sales during this period, had been those of Queen Charlotte, in 1819, and the Duke of York, in 1827; the former in point of amount the greatest ever known, with the exception of the Stowe collection. But during the same period both the Royal and Stowe collection, and that of the nation, had been growing into the first rank. The Schmidt collection of Amsterdam had furnished to George IV.'s private collection Rembrandt's "Master Shipbuilder," for £2950, and at the Gwydr collection, sold in 1829, by Messrs. Phillips, Gainsborough's "Market-cart" was secured for the nation for £1100—one of the most interesting works of this free, masterly, and thoroughly English artist.

Such was the career of the second of the Christie dynasty, who continued to occupy the gallery in Pall mall until 1836, when, the premises being required by the Ordnance-office, he was compelled to seek a new field of operations, and he removed to King-street, where he remained until his death in 1831. With regard to his attainments, a brief necrological notice in the *Morning Post* of 8th Feb., 1831, which we extract, illustrates his position as an interesting link between the world of art and that of trade. And we may add that his literary works on the "Chinese Worship of the Elements," on the "Game of Palamedes," and his disquisition on "Painted Greek Vases," show the curious variety of his tastes:—

"The excellent and accomplished scholar was educated for the Church, to which his character and feelings were devoted, but, when considered at Eton sufficiently advanced for the University, as his father's health began to fail, it was thought advisable, with so large a family, for the elder son to enter the business of his father. In new announcing the death of this excellent person we should ill discharge our feelings of respect to his memory were we not to offer a few words of honest praise and the feeble tribute of our unqualified esteem for his exemplary character. His learning was deep and varied, his mind richly stored with the finest models of classical literature. He was conversant with the best writers of modern times and languages; a first-rate Greek and Latin scholar. In his profession (to which circumstances rather than choice directed him), as he was never equalled in the attainments he brought to bear upon it, so he never can be surpassed; but amid these intellectual gifts he was of all men, the most unassuming, gentle, and genuine—his learning was the accessory, his piety the principle—the latter was his duty, the former the embellishment, of his life. He was a member of several literary societies, and his published works are distinguished by their masterly scholarship and exquisite taste. We need only mention his "Essay on the Worship of the Elements" and his disquisition on Etruscan vases.

At his death, in 1831, he left two sons—Stirling, who died; and George, the present head of the house. They associated with themselves the late Mr. Manson, who had been for many years their father's assistant, and who died in 1852, much esteemed for his practical capacity, his pleasing disposition, and integrity of conduct. The firm now consists of Mr. George Christie and the brother of the late Mr. Manson, assisted by a junior of the fourth generation, dating from the respectable person whom we have first noticed.

ROYAL MARRIAGE PROSPECTS.—PRINCE FREDERIC OF PRUSSIA.—The Palace which was at the time of his coming of age assigned to Prince Frederic William of Prussia as his future residence, is now being got ready for him. Hitherto his time has been too assiduously devoted to the acquisition of practical information in the performance of his ministerial duties, in attending the sittings of various governmental boards, in journeys to different spots of interest, &c., for him to have much leisure for a settled residence. The prospect for the next year or two, however, hold out the expectation of a change in this respect, and render an independent establishment necessary for him. The Palace which is destined to receive the Princess Victoria as consort of the future Crown Princess of Prussia is best known here under the name of the "Old King's Palace," being that in which the late King lived and died. The painful associations of the dark days of the disastrous war had rendered our royal family and capital made it repugnant to the King to inhabit the Schloss of his ancestors that had been profaned by foreign occupation, and after his return to his capital and throne he preferred to occupy the palace opposite the Zeug Haus rather than enter on the more imposing habitation that forms the Royal residence at present. The palace was originally built for the Commandant of Berlin; but in 1734 was occupied by Frederick William I. in his son, subsequently known to the world as Frederick the Great. On his mounting the throne he destined it to be the residence of all future Crown Princes, and had the inscription affixed to the front, "Palais Royal de Prusse," in the family with this destination his next oldest brother, Prince August Wilhelm, occupied it at his residence. The late King, also, Friedrich Wilhelm III., as Crown Prince, took possession of it on the occasion of his marriage, in 1793, and, with the exception of the years of disaster to Prussia, never quitted it till the time of his death. It is connected by an archway, which supports a suite of rooms, with the mansion known as the "Princesses' Palace, still inhabited by the Princess Leguitz, the wife of the late King by a morganatic marriage.—*Letter from Berlin.*

EMIGRATION-OFFICE. Since the peace, and with the opening of the season, the department of the Government has been very busily engaged in the despatch of emigrants, and the following vessels have lately sailed for one or other of the Australian colonies:—the *Herald*, from Liverpool, with 300 emigrants; the *Hooghley*, 218; the *Bermondsey*, 192; the *Omeya*, 279; the *Alpusia*, 384; the *Lloyds*, 372; and the *Stanghae*, 80. Nearly all these belong to London owners, and took their passengers on board at Southampton or Plymouth. With the benevolent intention of adopting every precaution for the lives of the hundreds whose lot in this clime, for the time, cast upon the waters, the Commissioners have had two boats of each of these ships fitted with Clifford's new plan, for instantly lowering and detaching them from the ship, in the event of emergency. We are glad to find that one department of her Maj sty's Government is alive to the utility of an invention tending so materially to the salvation of life and property as the one here shown to be adopted by the Emigration Commissioners.

THE DUTCH BIT.—A Dutch journal contains the following singular account of the escape of a woman of Zevenhuizen from being poisoned by her husband, and of the prompt chastisement of the latter. A man, whose name is not given, availed himself of the opportunity of his wife quitting the dining-table for some domestic purpose, and rapidly mixed poison in the plate of soup which she had commenced eating. At the moment the wife returned and resumed herself the basin of rose and quitted the apartment under pretext of having forgotten something necessary. The wife, upon this, was about to recommence eating, but on so doing, she discovered a spider on her plate; and, having great repugnance to these insects, she changed her plate for that of her husband, which remained untouched before her. She then sat down, and, seeing that [illegible] more him. In the [illegible] of a few hours [illegible] and, although medical aid was [illegible] the dining party, confessing that he was justly punished for his own intended crime.

GENERAL WILLIAMS AT ST. PETERSBURG.—A letter from St. Petersburg says:—"A brave and valiant warrior, like General Williams, would doubtless be well received in England, but we may be permitted to doubt whether the first ladies of the English aristocracy would hasten, as I observed ours do at the Princess Lowenwoldi's ball the other night, to present themselves to the stranger, in order that he might feel as much at home as possible, and receive the tribute which was his due."

# Memorabilia,

LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*"A little chink may let in much light."*—OLD PROVERB.

## EXTRACTS FROM THE DIARY OF THE FIRST EARL OF LUMONT.

Thursday 23 [Jan. 1738 9]. Visited Cousin Southwell and Br. Percival. Did not go to the play-house. At night a great assembly at our house, of cards and masquerades. The Prince came in a mask, and also many of ye highest quality; others were out of mask, as ye D. of Norfolk, &c. There were computed 300 or 400. The Prince was in a rich Hungarian dress. He told my wife they had no such fine houses as hers in Hungary She said she could not believe it since she saw such rich and fine Hungarian gentlemen. The goodness of ye company was remarked, and no impertinencys happen'd She had ordered the servants to desire every one who came in mask to show their masquerade ticket, or that one of ye company they came with would be pleased to tell his or her name, which none but five or six refused.

Saturday, 25th.—Visited Dr. Courage, at whose lodgings is a young Frenchman who draws finely, and came lately from France to copy ye Duke of Devonshire's Intaglios and Cameos, of which there are about 400 Da Bosc another Frenchman established here is destined to engrave them. This limner show'd me several he had finished which are very like, and performed with the utmost neatness; the outline is by a pen, and afterwards he faintly shades it in the proper places. He finishes a head in one day one with another, and draws them all of an equall size about the bigness of a crown-piece oval ways. The Duke of Devonshire has the finest collection of intaglios and medalls of any man in England, and scruples not any price for such as are curious, the his judgment in them is very indifferent. Ld Pembroke's taste is in ancient busts, statues, and curious drawings, the he hasalikewise medals; but these last are only curious for the perfection of the heads. The Duke's is preferable for the number and rarity of the reverses. The Duke has also a large collection of original drawings and some very fine paintings. It were to be wished that both these Lords' collections were published: it would do honour to them and to the nation, and be a wonderfull satisfaction to curious men.

From thence I went to ye House where we voted a supply, and then I went to the Queen's Court. Several there told me they had been at my house, and wondered they did not see me. I said I did not like masquerades. The Queen was told I was not there because I go to bed at ten o clock and rise at four.

* * * * * * *

Negus knows many modern anecdotes. He told me that when my L. Galloway fought that unfortunate battle during the last war in Spain, for which he was censured in ye House of Lords on a turn of the Ministry, he had express orders to do it, whatever condition he found himself in for that the then Ministry were determined to put an end to the war, either by beating or being beat. That he saw the very order sent; and General Shrimpton, who was then in service with my L. Galoway, told him my Ld Galloway said, before he went to battle, "God forgive them, they will have me fight against all reason, when I could make a successfull though defensive campaign. I must fight, but God forgive them." If he would have produced these orders he had not been censured, but then he had ruined the reputation of those who gave him those orders, which was what ye E of Oxford and Ld Bollingbroke, now got into the Ministry, wanted, and perhaps their heads

He told me that what broke ye union between the Earl of Oxford and Ld Bollingbroke a little before ye Queen's death was their differing in the means to bring ye Pretender over. Ld Bollingbroke was for doing it by force, and speedily, for fear of ye Queen's death, who was not healthy. Ld Oxford was for doing it by slow degrees, and by Parliament. Bollingbroke having gained Lady Masham, got the Queen to approve his scheme, and then proposed to Oxford the modelling the army. Oxford knew the impossibility of doing that suddenly, and opposed it; thereupon Bollingbroke complained of him to the Queen, and had she not died between, the Treasurer's staff was the next Monday to be taken from ye D. of Shrewsbury, and given Bollingbroke. However the D. of Ormond, who was Ld Bollingbroke's man, and Gen'l in pursuance of this scheme, began to debauch the officers. He thought himself sure of the Tory part, and undertook to debauch the Whigs among them. But he found a strong resolution in those last not to serve the Queen *her own way*, which was the expression used to them, and the touchstone of their inclinations. And many who yielded to keep their posts and military governments privately gave assurances to those who managed the interest of ye House of Hanover that they would never forsake it. Many of them even signed the association to rise and seize upon Oxford and Bollingbroke on a certain day agreed, and by a bold but necessary step preserve ye Hanoverian Succession. Gen'l Withers was one, and told it Negus. I have spoke of this design somewhere in my Journal, being fully informed of it by my Ld Cadogan himself, who was at the head of it.

*(To be Continued.)*

### NOTES.

A WILL IN RHYME.—The following will has been proved in the Consistory Court of Hereford:—

> I, A. B., of ——, parish of ——
> before I am all
> do make my will,
> in favour of my chi dren,
> The worldly trash that I possess I leave it all among them
> Commit me to my fellow clay,
> Be careful that my spirit stay,—
> Let no one say I wronged them.
> Houses and land I leave behind - what more I need not mention.
> My daughters three shall equal be.
> I know that they will cordially agree
> to divide without contention.
> To make them share and share alike, and each an equal dower,
> they may buy or sell —do what they will.—
> I leave it in their power.
> As is the custom in such case, and what the laws require,
> my hand and seal I here affix,
> and leave these my last Executrix
> of this my last desire.
>
> Dec. 16, 1842. (Signature.)

Signed, sealed, and publicly declared all in my own handwriting, in presence of two witnesses, that came at my inviting; who, in my presence, and also in presence of each other, have witnessed this, my only will. I never made no other. —C D E F

REMARKABLE MAY CUSTOM OF HELSTON, IN CORNWALL.—In the borough of Helston the 8th of May has from time immemorial been sacred to a singular custom, which is still observed with much ceremony. At a very early hour in the morning a party of men and boys go into the country, and return about seven o'clock, bearing green branches, and announcing in a very melancholy ditty that "Winter is gone; and that they have been to the merry green woods to fetch home summer in its place." Hav ng premises sited the town, and accepted money from all who wish give, they repire from the scene; and the town for the remainder of the morning is enlivened by the frequent arrival of carriages from the country and neighbouring towns, bearing visitors who intend to participate in the coming gaiety. At one o'clock a large party of ladies and gentlemen, wearing summer attire and profusely decorated with flowers, assemble oppos te the Townhall, and, preceded by a band of music, commence a peculiar kind of dance, called "The Furry." It at tripping on in a double row; and then, at a change in the time, wheel up round in couples. These evolutions are not confined to the street; for, here and there, where the doors are thrown open, the dancers enter the houses, bend and all, traverse the courts and gardens; and may presently be seen emerging by another doorway, if the house be furnished with two—otherwise, by that at which they entered. In this way they traverse the whole town, presenting an appearance as gay as it is unusual, especially when winding through some of the exceedingly beautiful gardens for which the town is remarkable, and which at this season (the laburnums and lilacs being in full bloom) are arrayed in their most showy livery. Later in the day, other parties go through the same manœuvres, and it is not till late at night that the at other times quiet little town returns to its propriety. The following is the doggerel sung by the revellers at eight o'clock on the morning of "Flora Day," when making their collections from house to house:—

> Robin Hood and Little John
> They both are gone to fair, O,
> And we will to the merry green wood,
> To see what they do there, O.
> And for to chase, O,
> To chase the buck and doe,
> With halantoro,
> Jolly rumble O.
> And we have come up, as soon as any day, O,
> And for to fetch the summer home,
>
> The summer and the May O;
> For summer is a-come, O,
> And winter is a-gone, O.
> Whereas those Spaniards
> That make so great a boast, O,
> They shall eat the grey goose feather,
> And we will eat the roast, O,
> With halantoro,
> &c., &c.

CURIOUS ANECDOTE OF SIR GODFREY KNELLER.—The following anecdote is copied from a MS. in the RAWLINSON Collection in the Bodleian Library. Dr RAWLINSON's note on the fly-leaf of this volume says, "This belonged to Mr. John Leak, formerly of Oriel, Oxford, and afterwards a Nonjuror, and died in that city." —H. S. H., Oxford.

A LETTER FROM OXON TO THE REVEREND MR. G——.

Revd. Sr,—A friend of ye this morning, F. V. by name, brought me the following account. A. Alsop has been with one of Corpus (College) who came from Dr. Wallis where had been some talk of the Kgs proclaiming ye P. of W. James ye 3d. And the Dr told this Gentleman how many original letters he had seen under the Queens own hand to ye Bricklayers Wife, and others concern'd in the matter, and a long letter also in Cypher wch cost him some Pains all wch made it out clear to him, and he thought 'twould to any Body, ye 'twas all cheats and Imposture. It chanced at this time, that Sr G. Kneller, coming down to draw ye Dre Picture by Sir Sam. Pepps' order, was present.—" Wat de divel (says he) de Prince Wales to son of a Brickbat Woman, he got it is a Liy. I am not of his party, nor shall not be for him, I am satisfiet wit wat de Parliament has done, but I must tell you wat I am sure of, and in wat I cannot be mistaken. His Fader and Moder have sate to me about 36 times a peice, and I know every line and bit in their Faces, Be got I could paint K. James just now by memory. I say the child is so like both, ye' these is not a Feature in his Face but wat belongs either to Fader or Moder, this I'm sure of and be got I cannot be mistaken; nay, ye nails of his Fingers are his Moders, ye Queen that was. Dr you may be out in your Letters, but be got, I cannot be out in my Lines."

## QUERIES.

WITCH-ELMS.—Having often met with the epithet "Witch" applied to the name of a tree in my poetical researches, I should be extremely glad if any of your readers would kindly inform me of the meaning of the term when so applied; also, if they would add to the quotations I subjoin of passages in which the epithet is found. In the first stanza of the introduction to Scott's "Lady of the Lake":—

> Harp of the North, that mouldering long has hung
> On the *witch-elm* that shades St. Fillan's spring—

the term is applied to the elm-tree; as also in the line commencing the well-known verses in Tennyson's "In Memoriam":—

> *Witch-elms* that counterchange the floor.

While in the fine lines of Longfellow upon "Autumn," we have it connected with the hazel-tree:—

> The purple finch
> That on wild cherry and red cedar feeds,
> A winter bird, comes with its plaintive whistle,
> And pecks by the *witch-hazel*.

Can any of your readers tell me whether the term "witch" is met with applied to other trees than the elm and hazel?—OLDINIENSIS.

WHIP-DOG DAY.—Thirty years ago there was a day annually observed at York, and known from time immemorial by the above name, when every urchin armed himself with a whip, and the whole canine race were expelled the city. The legend was that on that day a dog had stolen the consecrated wafers from the altar of the Minster, and that the sin of the father had been visited upon the children ever since. Will any of your readers kindly inform a distant subscriber if the custom is continued, and if the true origin of it is known?—ÆGIDIUS, Fonthill, Canada West.

CLEANING OLD COINS.—Will any of your numerous readers kindly furnish an inexpiest Numismatist with a simple recipe for the cleansing of old, or partially defaced, copper coins, &c., without corroding or otherwise injuring them? R. C.

ROSLIN CHAPEL.—In Roslin Chapel (near Edinburgh) there is a curiously-carved pillar, said to be the workmanship of the apprentice of the architect who built the chapel. The man who describes the chapel gives a curious account of it. The architect sent his apprentice to Rome to bring some specimens of art to him. While there he carved a beautiful pillar and brought it home. The architect was so enraged at the apprentice for working better than himself, that he struck him a blow on the forehead which killed him. A statue of the apprentice's head, with the impression of the blow in red paint, is in another part of the chapel. Further information on the subject would be received with thanks.—W. J. HAINING.

### ANSWERS TO QUERIES

TITLES OF THE OLD FRENCH NOBLESSE.—There is no French Peerage to be had now (save a very old work that existed prior to the Great Revolution), as it would be a difficult matter to put in due order the titles of the *ancienne Noblesse*, which were almost all destroyed at that period, or to draw up an accurate list of those that were re-assumed and many created on the restoration of the Kings of France in 1814, or to wade through the great number invented by the first Napoleon, and those granted by Louis Philippe. The chaos might be brought into order, but would require an immensity of labour and patience to do so. And should the Napoleon issue out, as it is said he purposes, another batch of titles, the confusion will be still greater. An alphabetical catalogue alone of names can be achieved. The rules that regulated the titles of the old Noblesse were arbitrary and irregular, for the son of a Duke would be sometimes called Prince, whilst the son of a Marquis was as often plain Monsieur.—AZURE.

THORNTON ABBEY.—In reply to your correspondent, G. S. Thornton's inquiry relative to the early history of Thornton Abbey, in Lincolnshire, I beg to state that it was founded by William le Gros, Earl of Albemarle (or Aumale), in Normandy, and Lord of Holderness, on the Feast of St. Hilary, A.D. 1139, for Augustin or black monks; and that it was suppressed in 1541, and a portion of its revenues applied to the endowment of a college, which on the accession of Edward VI. shared the fate of other Abbey. King Henry VIII., and his Queen, were entertained at Thornton, in October, 1541, a few months after the Dissolution, and the foundation of the college. The most perfect of the buildings now remaining is the entrance gatehouse, one of the finest in England. It was built *circa* 1382, in the Perpendicular style: it presents some remarkable features, and many of the details are extremely beautiful. The detailed history of the Abbey is found in Dugdale's "Monasticon," Tanner's "Manuscripts," in the Bodleian Library, the "Journal of the Archeological Institute," vol. i.; and a little in Archdeacon Walters to Thornton Abbey," alike creditable to the author and to the publisher.

THE LAST PERSON BURNT IN ENGLAND.—The statement of one of your correspondents that a woman was *burnt* to death, for coining, between 1760 and 1790 is perfectly correct, as will be seen by the following extract from the work of the illustrious John Howard on "Lazzaretto," p. 265, table 13.:—"1788. June 25. Three men hung and one woman *burnt* for coining." There is no doubt that this is the last instance of a woman being burnt to death in England, as by a statute, passed two years afterwards (30 Geo. III., c. 48), the ancient punishment of burning women to death for coining and other treason was abolished, and the punishment of death by hanging substituted: and by the 3rd section it was enacted that if on June 5, 1790, any woman should be under sentence to be burnt her Majesty might order her to be hanged, "any law to the contrary thereof notwithstanding."—S. A. R., Inner Temple.

SUZERAINE AND SOVEREIGN.—I frequently see the word "Suzeraine" used to denote the superiority of the Porte over the Principalities. I have seen it so used in the *Times*, and in print over a dinner. It is an entire misuse. I have before me at this moment "The Revolution of the Germanic Empire" of the late Charles Butler, the celebrated editor of "Coke upon Littleton." He writes as follows (p. 82, ed. 1807):—"The King was called the Sovereign Lord; his immediate vassal was called the *suzerain*: and the tenants holding of him were called the *arrere (sic)* vassals." On reference to French feudalists it will be found that Princes Suzerein were those from whose court the appeal to the Parliament was immediate. The Dukes of Normandy and Burgundy and Counts of Champagne and Toulouse were *Suzerains*. The Hospodars are the *Suzereins*; the Sultan is Sovereign, or *Lord Paramount*.

U. A. EDMUNDS.

### TO CORRESPONDENTS.

S. W. J.—Jernagan's medal ticket for the sale of his famous cistern.

NUMISMATICUS.—You must send a drawing or sketch of the coin mentioned.

M C M.—I found wax or gut a perfect impression of the coins. 9. You are correct regarding the medal each subscriber takes.

M. C. S.—1. A medal of the Prince Alexander VIII., of no value. 2 William and Mary half-crowns, of no value. 3. Edward III., great seal, no fortune, of no value. 4. Denarius of Tiberius.

J. HODGSON.—A peppercorn rent, if demanded, for so the reservation almost invariably runs, serves to mark that the lessee who is bound to pay it is not in fact the owner of the fee of the land, although his term may be created for 500 or 1000 years.

E. G. H.—"Commentaries upon Apollinaris Sidonius." Optician differs as to the merits of those published. Sun Vox Brunck is generally thought the best.

W. C—l.—"Mr. Stanley's birthplace." Mr. M ansley is understood to have been born Rothley Temple, Leicestershire. 2 "A Rec e and a Vicar." The main difference appears to be this. The Rector is entitled to the large and the latter only to the small tithes of his parish.

HOWDALE.—The words and music of "How stands the glass around?" will be found in Chappell's National English Airs.

J. JAMIESON.—"The Lass of Gowrie" was written neither by Burns nor Allan Ramsay. It appeared about 1730 and is supposed to have been written by Mr W Reid

JOHN N. CHALWICH.—You can hardly have a more appropriate motto for your purpose than—

"Order gave all things view."—SHAKSPEARE.

DAGELIS.—If such similarities were to be admitted as evid nce of plagiarism, originality would be at an end. The universal mind or soul or genius of Shakspeare, though, like most poets, he often reiterates what others have said, and said better.

J. HENRY BROWNE.—No battle was fought between the Swale, or, in fact, in any part of Yorkshire, while Mary was confined in Bolton Castle. The armour found at "Bloody Wall" was of totally a later date and consequence of the Roses.

RACHEL.—E. J. Buckton, H. L. J. Dan ns, R. N. Phillips, Dublin, Inquirer, Rev. J. Bates, John Lockhart Ross, M.A., Kel-hal. Mr. Parkinson, J. T., C. S. S., Pim st. Owen of Deenbigh, R. N., Inquirer, R. J. V., Fanny, Laurence Brown, E. Thurnam, R. G. B., Bristol, surveyor, J. D., Mayo, R. F. L., J. A., Paris, G. F. M., H. D. Y. P., Dulcake; F. M. W., Hutchinson, C. B. Brougham, T. Williams, Mrs. Keith, J. A., J. W. Salisbury, A. B., Vincent De Beudry, Raymond, Delaware, C. J., J. W. J. H. H., T. B., Aberavenny, E. S., John Nicholson, Clarissa, Rev. G. C. Stephen, J. Morgan.

## CHESS.

### TO CORRESPONDENTS.

GIBRALTAR. The "Chessplayers' Handbook," published by Bohn of Covent-garden.

C. F. SMITH. To your first question—Yes. Your second is answered in the affirmative.

F. R. LEON Lancashire. We shall be pleased to hear further account of the Club's progress. As regards the game for a stake, it is not defeated in so close, but both players require a good drilling with practised opponents. They have not yet learned the first principles of the game. Time they should, and as a consequence they throw away opportunities which would win over and over again.

J. A. MANNING. If you will specify the Religuas to which you require solutions, we will furnish you with the key-moves.

PERSEUS.—We must first relieve his King from check.

J. M. W., Brixton.—Look again at Problem 638. You labour at present under a misconception regarding it.

G. T., Brighton; Ch rarg. Rur s, H. B., Sigma. Now in the examiner's hands.

DISCIPULUS.—The key-moves required shall be given in our next Number.

P. S—Death of Signor Testaferri. We regret to say that the report of this gentleman's sudden death, which appeared in the last number of *La Régence*, has been confirmed.

B. J., Tower street.—There is no rule which prevents a player casting after having been in check.

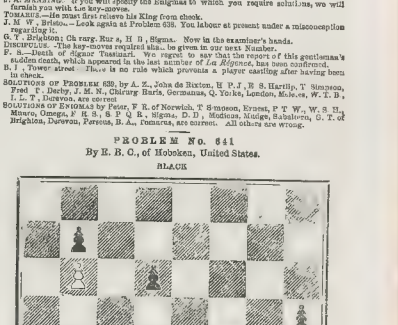
SOLUTIONS OF PROBLEM 639, by A. E., John de Bixton, H. P. J., R. S. Hartley, T. Simpson, Fred T., Derby, J. M. N., Chirurg Baris, Germanus, Q. Yorke, London, Miles, Mrs., W. B. B., L. L. T., Dartford, are correct.

SOLUTIONS OF ENIGMAS by Peter, F. R. of Norwich, T. Simpson, Ernest, P. T. W., W. S. H., Minero, Omega, F. K. S., S. P. Q. R., Sigma, D. D., Medicus, Madge, Sabulero, G. T. of Brighton, Darevon, Perseus, B. A., Damerel, are correct. All others are wrong.

### PROBLEM No. 641

By E. B. C., of Hoboken, United States.

BLACK



WHITE.

White to play, and mate in five moves.

### CONTINUATION OF THE CONSULTATION GAMES IN THE ST. GEORGE'S CLUB.

Game between Messrs STAUNTON, DE RIVIERE, and WAYTH on one side; Messrs LOWENTHAL, BARNES, and OWEN on the other.

*(Scotch Gambit.)*

| WHITE (S and Co.) | BLACK (L. and Co.) | WHITE (S. and Co.) | BLACK (L. and Co.) |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 19. Kt to K 5th (h) | Q to K 3rd (i) |
| 2. K Kt to K B 3rd | Q Kt to Q B 3rd | 20. Q to K 4th | Q to K 2nd |
| 3. P to Q 4th | P takes P | 21. K Kt to Q 6 2nd | K R to K B 2nd |
| 4. K B to Q B 4th | K B to Q B 4th | 22. P to K Kt 5th | P takes P |
| 5. P to Q B 3rd | K Kt to K B 3rd | 23. P to Q B 5th (d) | K B to Q B 2nd |
| 6. Castles | P to Q 3rd | 24. P takes P | K to R 2 sq (e) |
| 7. P takes P | K B to Q Kt 3rd | 25. Q to K 2nd | Q R to K B sq (f) |
| 8. Q Kt to Q B 3rd | P to K R 3rd (a) | 26. Q to K R 5th (ch) | K to R sq |
| 9. P to K R 3rd | Castles. | 27. Q takes Kt (g) | K Kt to K B sq |
| 10. Q to her 3rd | Q Kt to K 2nd | 28. Kt to K 4th (ch) | P takes Kt |
| 11. P to Q R 4th | P to Q B 3rd | 29. R takes R (ch) | K takes R |
| 12. K Kt to Q Kt 3rd (b) | P to Q 4th | 30. R to K B sq (ch) | K to Kt sq |
| 13. P to K 5th | P to K B 4th | 31. Kt to K R 6th (ch) | K to R 2nd |
| 14. Q to K 2nd | K Kt to K 5th | 32. Q to K B 5th | R takes K B P |
| 15. Q B to K 3rd | Q Kt to K Kt 3rd | 33. Q takes K Kt P (ch) | K takes R |
| 16. P to K Kt 4th | P takes Kt | 34. R takes B (k) | Q takes R |
| 17. Q Kt P takes Kt | Q R to K 3rd | 35. Q to Q B 8th (ch) | Q to K B sq |
| 18. K Kt to K B 2nd | P to K B 4th | 36. B to K B 7th (ch) | K to B 2nd |

The game was carried on for a few more moves, when White resigned.

(a) Better to have Castled. This move enables White to maintain their centre unbroken.

(b) The opening is very well played by the White side.

(c) This was very ill-judged. Their game was anything but promising before, but this utterly useless move made it much worse.

(d) Indispensable, before taking the Pawn, or Black could have taken the K P with his Kt safely

(e) Two on each side in a consultation game is a better number than three or more, especially if there should be a change up in the strength of the partners. Not to speak of the probability of the best paper being cut voted and obliged to give up an important train of play, when the less powerful club, from the more than ample responsibility is divided among a number the talent of it is not disturbed by a variety of suggestions, and their time is not consumed in enforcing their own views or in pointing out the fallacies in the views of colleagues. The Leader made by Black at this moment with loses a Pawn in the most simple manner, and the still more serious error of their opponents subsequently, were mainly owing to the discussion arising from a conflict of opinions.

(f) Black could not help it, loss of a piece.

(g) Black's game is now, of course, lost by its nature, and the leading player on that side seems to have given up in despair, as far as he was concerned, but his copartners determined, luckily for them, to play out the game.

(h) A sacrifice was quit unc alled for, but it rendered the shortest road to victory, though Kt to K 4th would have been a safer one In that case the game would probably have been pursued as follows:

| | |
|---|---|
| 19. K to Kt 2nd | R to Q 2nd |
| 20. R takes P | R takes R |
| 21. Q takes R | And Black has no resource. |

(i) Quite sound, we believe and the best move.

(k) The object in leading the Bishop to be taken was to get the Queen's move to K Rook's 4th, and thereby obtain a check at K Kt's 5th, which would have been irresistible. Had Black's Rook at K Kt's 3rd been readily removed, such an overwhelming attack, as there would be speedily be left against the King, that extraordinary there was no time for defence to. To avoid the ruinous of a prolonged contest, it was agreed that each side should have two hours more over the usual time for the game. And White having easily established their position, had reached even thirty moves, when compelled to play without proper consideration. Mr. Staunton proposed playing the game to a finish, but eventually getting it up, a good move later and Mr. de Riviere recommended P to K Kt 6th, which we apprehend would not have been prudent in the hurry of the moment an intermediate course, that of taking the Pawn, was adopted, and White lost a dead won game.

(l) Much better, as powerful was the attack obtained by White in the early part of the game we are not sure but by the adoption of a move proposed by Mr. S., P to Q 6 th, they might not be reviewed the game Let us suppose—

| | |
|---|---|
| 34. P to Q 6th | P takes P |
| | Have Black any better move? |
| 35. R takes B | K takes R, or * |
| 36. Q to K B 4th (ch)— | |

They win the Rook, and have the advantage of position.

| | |
|---|---|
| 35. | Q takes B |
| 36. Q to Q B 8th (ch) | Q to K B sq |
| 37. B to K 7th (ch) | K to it 2nd |
| 38. B to K 6th (ch) | K to Kt sq |

(If they play their King to his second square, mate follows in three or four moves.)

* R. B to K R 7th (ch)—and the game must be drawn.

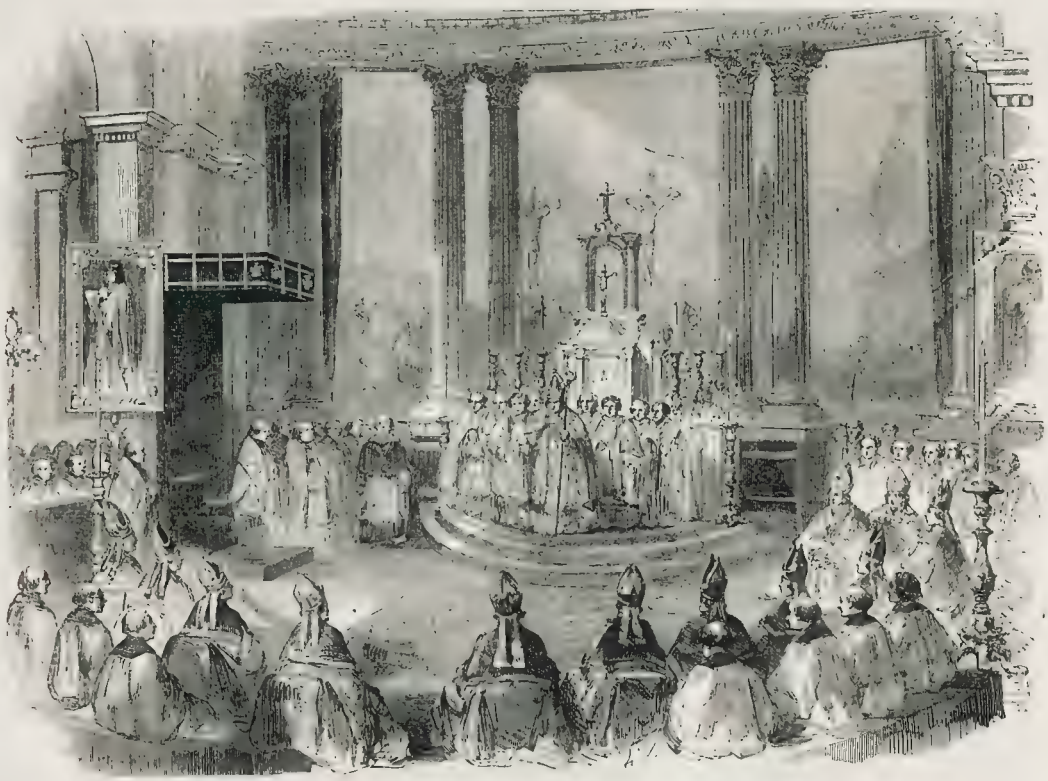
## THE PEACE.

On Sunday, April 6th, a "solemn thanksgiving" for the return of Peace took place at the Roman Catholic Church, Moorfields, at which Cardinal Wiseman and all the other Bishops of that religion in England officiated. The church was thronged in all parts. The choir was on the most extensive scale, several instrumental performers being added to the vocalists.

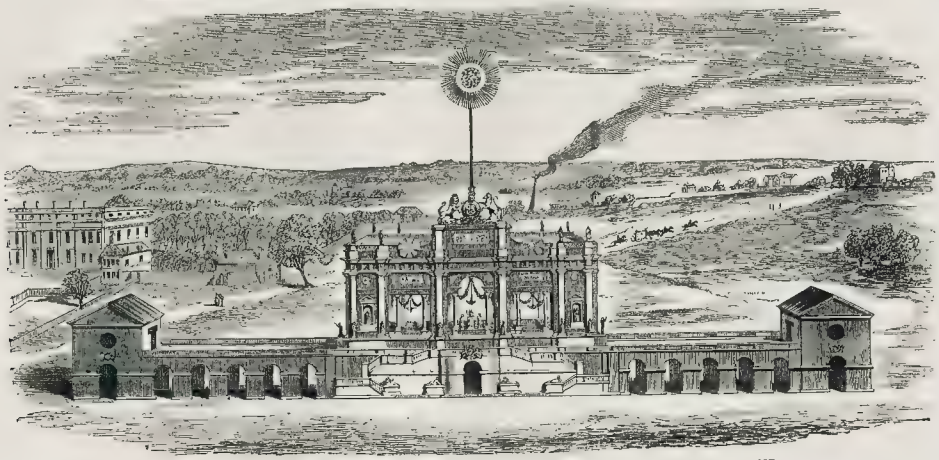
After the Gospel of the day was chanted, Cardinal Wiseman proceeded to address the congregation on the subject of the peace. He commenced by drawing a picture of the beauty of peace, and the contrast which it presented to the horrors of war. He pointed out that if we at home, thousands of miles from the theatre of war, felt the influence of peace, how would it be welcomed by those who dwelt upon the spot which had been the scene of sorrow and desolation. He stated that it was not, however, his intention to descant upon the utility of peace in the abstract, but to direct his observations to the consideration of some of the peculiar circumstances which contributed to render the present peace so happy. Peace was at all times a delightful theme, and it was with peace that the greatest and most enduring glories of the human family were linked. All those periods upon which the mind of man loved to rest with pleasure and with pride were periods of peace. In sacred history, the most honourable period in the life of Solomon, the time when he literally was "in all his glory," was when he encouraged the peaceful arts amongst the Jews. In Roman story the brightest moment was the Augustan age, when the clang of war had become silent, when the doors of the temple of Janus were closed, and when brilliant literary glory shone forth. And that was the moment chosen by the "Prince of Peace" to visit earth, and to redeem man. To come to the annals of England, he would observe that the periods to which the people of this country looked back with most national pride were periods not of war but of peaceful development and social amelioration. The memory of an Alfred was cherished by Englishmen with pride, not so much for his military success, but because he had laid the foundation of some of the noblest parts of the Constitution; and King Edward the Confessor was for ages spoken of by the people by no other title than as the promulgator of "the laws of good King Edward." But, to come to the subject which had caused them to assemble in so special a manner, he would observe that there were three points to be taken into consideration. In the first place, it was a happy circumstance that the peace came upon them to add to the happiness of the Easter season; and thus, while the Church was still celebrating the Resurrection, they were assembled to add the expression of gratitude for what was in one sense a matter of earthly interest to the glad recognition of a great and sublime mystery of faith. The second peculiar cause of the beauty of the present peace was that it came at a time when there was every reason to hope that France had cause to look forward to the peaceful perpetuation of the present Imperial dynasty. Our brave ally was now rejoicing in the constant expectation of internal and enduring peace, after many changes. He knew that the heart of the good and amiable Empress would not be complete in its joy if she had not the consciousness that peace had returned to the world. The third reason why the peace should be warmly welcomed was that there was every ground for supposing that, after the peace had caused the return of the army, there would not be any recurrence of those unhappy feelings of religious discord which some years ago had been so rife in the land. Thousands and tens of thousands of gallant men would soon tread again their native land, and they would never forget the devotedness with which the Catholic clergy had faced all the dangers of pestilence, and even of the field; for instances had occurred of their remaining beside the wounded soldier, heedless of the balls that, winged with death, were whistling around them. He believed that there was now an end for ever to the cry of Catholic disloyalty. If ever that imputation were repeated, let the red graves of the Crimea be appealed to. In those graves the Protestant and the Catholic soldier lay in that long rest never to be disturbed till the last trumpet shall waken all to judgment. Both had received their mortal wounds in the same cause, and the keenest bigotry could detect no difference in the colour of that life-blood which both had shed. The preacher concluded by calling on all to join in returning thanks to God for that he had been pleased to restore to the world the inestimable blessing of peace.

At the termination of Cardinal Wiseman's sermon the ceremonies were resumed, and when they concluded the hymn "Te Deum" was sung by the choir (with instrumental accompaniment), and immediately afterwards the congregation separated.

THE PEACE ILLUMINATIONS—THE GREEN PARK.



THE "TE DEUM" FOR PEACE, AT ST. MARY'S ROMAN CATHOLIC CHURCH, MOORFIELDS.—CARDINAL WISEMAN PREACHING BEFORE THE BISHOPS.



TEMPLE ERECTED FOR THE DISPLAY OF FIREWORKS IN THE GREEN-PARK, TO CELEBRATE THE PEACE OF AIX-LA-CHAPELLE.

## COMMEMORATION
OF THE
## PEACE OF AIX-LA-CHAPELLE,
1748.

*(From a Print of the time.)*

By way of comparison it may be interesting to take a retrospective glance into the last century, and at the artistic taste of its festivities in commemoration of an event similar to that which we have just celebrated.

The General Peace concluded at Aix-la-Chapelle, on November 7th, 1748, was commemorated on the 27th of April, in the following year, by a magnificent display of "Public Fire works," for which purpose a Temple was erected in the Green-park, the classic character of which has altogether been disregarded by the authorities in our day; for the engineers'-shed, and its appurtenances whence the Fireworks were displayed on Thursday night last, is but a mean erection in comparison with the design of 1749. Its basement included pavilions or storehouses for the engineers, arcades for planting the cannon, and a flight of steps ascending to the music-gallery.

The temple was 144 feet high to the top of his Majesty's arms, and 410 feet long. The ornaments were all in relief, and it was adorned with frets, gildings, lustres, artificial owers, inscriptions, statues, emblematical pictures, &c.

The pictures were in number eighteen in front, each painted ouble; so that, though at first they appeared as marble basso-relievos, they, after the fireworks were played off, being moved by machinery, discovered the same pictures in colours, and were rendered transparent by a great number of lamptons.

The bas-relief over the cornice in the centre was 28 feet by 10, and represented his Majesty giving Peace to Britannia. The attendants on Peace were Plenty, Riches, Happiness, Trade, and Commerce. The attendants on Britannia were Liberty, Husbandry, Arts, and Sciences.

On the right of this, below the Entablature, was a picture of 18 feet by 81, representing the return of Neptune, drawn by sea-horses, conducted by the Genius of Peace, and attended by Tritons, Sea Nymphs, &c. On the left of the central arch was the return of Mars, drawn with lions, the arms of England, and conducted by Fame, with an olive branch, proclaiming peace.

On each side of these pictures was a festoon of arms and military instruments.

The evening began with a grand concert of warlike instruments, and the disposition of fireworks was in the following order:—

They were opened by a Royal salute of 101 brass ordnance, which was immediately followed by a display of rockets of different sorts, air balloons (sic), &c., in eleven courses, to the number of 32,684, viz.:—

PEACE COMMEMORATION, 1814.—TEMPLE OF CONCORD IN THE GREEN-PARK.

PEACE COMMEMORATION, 1814.—CHINESE PAGODA AND BRIDGE, IN ST. JAMES'S-PARK.

After all these had been displayed in the XII. place, followed a grand pyramidic from the top of the temple, consisting of 6000 rockets, headed with stars, rains, and serpents all at once. Then the erection, cleared of its combustibles, became illuminated so as to show the emblematical figures; and the front was beautifully illuminated with a variety of designs, which burnt for a considerable time.

The following was the order of the arrangements of the statues in the façade:—

| | | |
|---|---|---|
| Diana, Jupiter, Monarchs of Great Britain and France embracing. | King's Arms, A Grand Basso-Relievo, representing the revival of Commerce and other effects of Peace. GEORGIUS II. REX | Apollo, Ceres. Monarchs of Great Britain and Spain embracing. |

Peace sitting on a pedestal, a tended by

| | | |
|---|---|---|
| Prudence, Justice, | Liberty, Neptune, | Mars, Fortitude, Plenty, Temperance. |

On the right side of steps on each side was a figure denoting the return of trade and affairs to their former uninterrupted course: they represented the Rivers Thames and Isis.

| | |
|---|---|
| At the right end were | At the left end were |
| Mercury, Constancy, Religion, and a Latin inscription. | Honour, Minerva, Clemency, and a Latin inscription. |

On the back were the statues of Faith and Vigilance, and a Latin inscription.

## TREATY OF AMIENS, 1802.

SOUTHEY, in his "Letters of Espriella," after some sarcastic remarks on the ridiculous manner in which peace was proclaimed, gives the following account of the illumination by which the Treaty of Amiens was celebrated:—

If, however, the ceremony of the morning disappointed me, I was amply rewarded by the illuminations at night. This token of national joy is not, as with us, regulated by law: the people or the mob, as they are called—take the law into their own hands on these occasions, and when they choose to have an illumination the citizens must illuminate to please them, or be content to have their windows broken—a violence which is winked at by the police, as it falls only upon persons whose politics are obnoxious. During many days preparations had been making for the festivity, so that it was already known what houses and what public buildings would exhibit the most splendid appearance. M. Otto's, the French Ambassador, surpassed all others, and the great object of desire was to see this. Between eight and nine the lighting up began; and about ten we sallied out on our way to Portman Square, where M. Otto resided.

For the private streets there was nothing to be remarked except the singular effect of walking at night in as broad a light as that of noonday, every window being filled with candles, arranged either in straight lines or in arches, at the fancy of the owner, which nobody stopped to admire. None, indeed, were walking in these streets except persons whose way lay through them; yet, had there been a single house unlighted, a mob would have been collected in five minutes at the first outcry. When we drew near Pall-mall the crowd, both of carriages and of people, thickened; still there was no inconvenience, and no difficulty in walking, or in crossing the carriage-road. Greater expense had been bestowed here. The gaming-houses in St. James's-street were magnificent, as they always are on such occasions. In one place you saw the crown and the G. R. in coloured lamps; in another the word "Peace" in letters of light; in another some transparent picture emblematic of Peace and Plenty. Some score years ago a woman in the country asked a higher price than she had used to do for a basket of mushrooms, and, when she was asked the reason, said it was because of the American war. As war thus advances the price of everything, peace and plenty are supposed to be inseparably connected;—and well may the poor think them so. There was a transparency exhibited this night at a potthouse in the City which represented a loaf of bread saying to a pot of porter, "I am coming down;" to which the porter-pot made answer, "So am I."

The nearer we drew the greater was the throng. It was a night truly surprising to behold all the inhabitants of this immense city walking abroad at midnight, and distinctly seen by the light of ten thousand candles. This was particularly striking in Oxford-street, which is nearly half a league in length. As far as the eye could reach, either way, the parallel lines of light were seen narrowing towards each other. Soon, however, we could still advance without difficulty, and the carriages rattled along unobstructed. But in the immediate vicinity of Portman-square it was very different. Never before had I beheld such multitudes assembled. The middle of the street was completely filled with coaches, so immovably locked together that many persons who wish-d to cross passed under the horses' bellies, without fear and without danger. The unfortunate persons with a had no such means of escape. They had no possible way of extricating themselves, unless they could crawl out of the window of one coach into the window of another. There was no room to open a door. There they were, and there they must remain, patiently or impatiently; and there, in fact, they did remain the greater part of the night, till the lights were burnt out, and the crowd clearing away left them at liberty.

We who were on foot had better fortune, but we laboured hard for it. There were two ranks of people—one returning from the square, the other pressing on to it. Exertion was necessary to make any headway at all; he who was behind you pressed you against him who was before. I had nothing to do but to work out elbow-room that I might not be squeezed to death, and to float on with the tide. But this tide rose frequently as a stop; some obstacle at the further end of the street checked it; and still the crowd behind was increasing in depth. We tried the first entrance to the square in vain; it was utterly impossible to get in; and, finding this, we crossed into the counter-current, and were carried out with the stream. A second and a third entrance we tried with no better fortune; at the fourth, the only remaining avenue, we were more successful. To this, which is at the outskirts of the town, there was one way inaccessible by carriages, and it was not crowded by waiters, because the road was bad: there were no lamps; and the way was not known. By this route, however, we entered the square from directly opposite to M. Otto's; and, raising ourselves by the help of a garden wall, overlooked the crowd, and thus obtained a full and uninterrupted sight of what thousands and tens of thousands were vainly struggling to see. To describe it, splendid as it was, is impossible: the whole building presented a front of light. The inscription was "Peace and Amity." It had been "Peace and Concord;" but a party of sailors in the morning, whose honest patriotism did not regard trifling differences of orthography, insisted upon it that they were not *conquered*, and that no Frenchman should say so: and so the word "Amity," which can hardly be regarded as English, was substituted in its stead.

Having effected our object, meaner sights had no temptation for us, and we returned. It was three in the morning before we reached home, and we extinguished our lights and were retiring to bed, believing ourselves at liberty to do so. But it did not please the mob to be of the same opinion; they insisted that the house should be lit up again, and John Bull was forced to be obeyed. Except a few such instances of unreasonableness, it is surprising how peaceably the whole passed off. The pickpockets have probably made a good harvest; but we had no quarrelling, no drunkenness, and not a single more extraordinary, prodigious as the crowd was, have heard of no accident.

So famous is the illumination of M. Otto, that one of the minor theatres has given notice to all such persons as were not fortunate enough to obtain sight of it that it will be exactly represented upon the stage for their accommodation, and that the same number of lamps will be arranged precisely in the same manner, the same person being employed to suspend them. Hundreds will go to this, not recollecting that it is as impossible to do it upon a stage of that size as it is to put a part of water into a wine cup.

## THE PEACE CELEBRATIONS OF 1814.

THESE festivities, which took place on the 1st of August, were described in the *Evening Mail* of the following day as "a sort of general celebration of War, of Peace, and of the Accession of the House of Brunswick"—of War, it being the anniversary of the battle of the Nile.

The three Parks were properly chosen for the scene of this jubilee. In that of St. James's the principal attraction was a Chinese bridge thrown over the canal, upon the centre of which was erected a lofty pagoda, while the other parts were decorated with pillars and boxes, for the exhibition of fireworks. The Pavilions at the east and west ends were hung with Chinese lanterns. In the Green-park, on the edge of the Mall, was placed the Royal booth, of a circular form, with a gallery attached to it, for the [illegible] of State, Foreign Ministers, and other distinguished persons. [illegible] in the same park, was erected the edifice entitled the [illegible] Council, the general design of which was the invention of Sir [illegible], and the external decorations were by Greenwood and [illegible]. From the Queen's Palace a bridge of communication to the Green-park was thrown over the road of Constitution-hill, and in Hyde-park the Serpentine river was allotted for the spectacle of a *naumachia*, in which a British and French fleet, represented by barges brought from Woolwich, and fitted up to resemble men-of-war of the line and frigates, were to exhibit the manœuvres and circumstances of a naval fight. The park itself was covered with a multitude of booths, erected by permission, and fraught with all the variety of amusement and recreation belonging to a [illegible].

The weather of the [illegible] had been announced that in the event of [illegible] postponement would be necessary [illegible] sky, turned out perfectly fine. A [illegible] and room kept by the [illegible] crowds of every rank which thronged the parks, the exhibitions began with the ascent of Mr. Sadler, jun., in a balloon, from the Green-park, about six in the evening. He rose almost perpendicularly till nearly out of view, when the machine gently moved in the direction of Kent. About eight the naval action in the Serpentine river commenced; and by a judicious variety of action, and the grand display of a ship on fire, this spectacle afforded more pleasure than might have been supposed from the rituals attached to it. But the great object of general expectation was the fireworks, of which the centre was the magnificent edifice in the Green-park. This erection at first exhibited the appearance of a fortified castle, from the battlements of which the most brilliant showers of rockets were thrown, whilst the walls disclosed every curious and complicated contrivance of the pyrotechnic art. After every eye had been astonished and delighted for two hours with these display, the metamorphosis took place of the castle into the Temple of Concord, richly illuminated with coloured lamps, and adorned with suitable emblems and devices.

By some authorities it has been stated that the Temple was designed by Smirke, and that Hilton and Stothard painted the transparencies.

The road across the canal from Queen-square, Westminster, was first opened on this day. The illumination of the Chinese bridge across the canal, with the seven-storied pagoda, was very brilliant; but a sad disaster happened during the fête, when the fireworks ignited: the pagoda, and two of the men employed in its superintendence, were so severely injured that they died on the following day; and five stories of the pagoda were destroyed ere the fire could be distinguished.

Canova, when asked what struck him most forcibly during his visit to England, is said to have replied, "that the trumpery Chinese bridge in St. James's Park should be the production of the Government, whilst that of Waterloo was the work of a private company."

## OUR INSTITUTIONS.

### THE HANGMAN.

AVAILING himself of the public excitement occasioned by the horrible circumstances attending a recent execution, the Bishop of Oxford, in an admirable speech, has asked for a Select Committee of the House of Lords to consider the present mode of carrying capital punishments into effect. As the inquiry thus instituted is likely to open up to general discussion, not only in Parliament, but throughout the country, the whole subject of extreme punishment, a short sketch at this moment of the public executioner and his duties in olden time may be neither unseasonable nor uninstructive. To some, possibly, the topic may appear forbidding; but a narrative of the executioner's office has more interest, although of a painful kind, than any one would conceive who is imperfectly informed respecting it. The changes it has undergone, both in the nature of its duties and in the manner and occasion of performing them, are peculiarly illustrative of the political and social progress which this country has made. In the "good old times" (all times are good, Lord [illegible] tells us, when they are old), when travelling was tedious and expensive, every county town, and many minor boroughs, had their own especial hangman, and were able to provide him with tolerably regular employment. This official—generally some convicted criminal who had purchased the integrity of his own neck by undertaking the repulsive, though necessary, duty of finisher of the law—was in former days a far more conspicuous and important functionary than his degenerate representative in the present age. What with whippings, the pillory, brandings, burning publications, and his more terrible employment on the scaffold, at the gibbet, and the stake, the hangman of a century back must, in London at least, have been constantly before the public. Now, however, that travelling is cheap and expeditious, and that the sentiments of the people, as to capital punishment, have undergone a great and salutary change, one official is found to be sufficient to perform all the "Tyburn business," from John o' Groat's to the Land's End.

A search through the records of county prisons would probably bring to light many curious anecdotes of provincial hangmen—fellows whose names have long been forgotten, but who may once have enjoyed an odious notoriety in the locality, and at the period of their exploits. For such an investigation we have neither time nor taste, and must confine ourselves to a few scanty memorials here and there concerning three or four of those eminent metropolitan practitioners whose names have been handed down to posterity.

The ordinary place of execution, as early as 1219, was a spot known as *the Elms** in Smithfield (though Execution-dock, near where the Thames Tunnel now is at Wapping, was used for pirates); and we have evidence that capital punishment for treason took place in 1330 at Tyburn). From Smithfield the gibbe appears to have been removed about 1413 to St. Giles's-in-the-Fields (see "Maitland's London," vol. ii. p. 1363); and thence, though at what date is now uncertain, to Tyburn.

To this dismal destination the condemned were usually drawn on a hurdle, a sledge, or in a cart, stopping in the way to take their last earthly refreshment in the shape of a bowl of ale at the Hospital of St. Giles, and, after the suppression of monastic houses by Henry VIII., at the hostel erected upon its site. The fatal procession was made with all possible publicity and deliberation, and many striking scenes are recorded to have happened between certain criminals and their friends, or the populace, on the way. In some instances, under these sorrowful circumstances, we read of affectionate and heartrending greetings in the open road between husband and wife, parent and child, chieftain and retainer, and kinsmen of various degree. Some of the descriptions supply examples of piety, eloquence, and constancy, which reflect honour upon human nature, and prove, alas! beyond question, that the country had many a magnanimous citizen upon the scaffold as well as at the stake. In other cases we find the unthinking and ignoble multitude reviling some hapless victim whose crime had offended the religious or political prejudices of the time, or had displayed a more than ordinary degree of atrocity, magnitude, or rarity. In these instances again we not infrequently discover in the sufferer an invincibility of courage and a contempt for death, with all its exaggerated horrors, which tempt us almost to forget the crime in our admiration of the heroism of the criminal.

As we before remarked, there were other circumstances, besides the too common "dead march" between the prison and the scaffold, which rendered the executioner and his hateful office more familiar to the public in past ages than they are now, or, we hope, will ever be again. Not to speak of that chance array of aged, helpless victims, the so-called witches, who were butchered by thousands to appease a bloodthirsty superstition, the ordinary execution was occasionally prolonged by the cruelness of the apparatus—by maledictions between the sufferer and his friends—the address to the people, and too often by the incredible barbarities, such as drawing, quartering, and embowelling, to which some miserable wretches were subjected. Among the duties appertaining to the hangman's occupation there were also his whipping culprits through the public streets, or at the whipping-posts, his branding with a hot iron, shearing off ears, slitting noses, and his superintendence of the pillory. This last punishment, which was originally intended merely as a disgrace, was sometimes converted by the mob into a frightful torture. We read of cases at which the Sheriffs were obliged to be personally in attendance to save the victim of popular indignation from the ferocity of the rabble—of others where men in the pillory were actually killed by missiles thrown at them. In one instance, recorded in the State Trials, two men were tried and executed for murdering a fellow-creature in the pillory, by assailing him with cabbage stalks and oyster-shells! These sanguinary exhibitions were peculiarly calculated to interest the vulgar multitude; and those concerned to be the object of them, it must be remembered, were oftentimes gentlemen of education, or talent, and high public spirit, but who had incurred the penalties of savage and vindictive laws by using their gifts in a manner that was thought dangerous to the ruling powers. The last sad passage of men such as these was attended [illegible] incidents eminently dramatic and exciting [illegible]

* This place was in use for executions in the year 1219, and, as it seems, long before, by a clause Roll. 4 Henry III., wherein mention is made of *Farca facta apud Almelles com. Middlesex ubi prius facte fuerunt.*—Stow.

lated, for instance, of the indomitable regicide Harrison, that he not only defied every effort to intimidate him in his way to the fatal tree, but that, after hanging the appointed time, and having been embowelled, such was his enduring vitality that the semi-inanimate corpse sprang up with a galvanic convulsion and struck the astounded executioner a blow on the face!

The infliction of what is called "the last punishment of the law" was in former times, too, much more frequent than now. Few assizes were wont to terminate without leaving some unfortunates to be dealt with at the gallows. Townsend, the High-street officer, in his evidence before the House of Commons in 1816, says, speaking of the early part of his career, so late even as 1781 ?:—"We never had an execution that we did not grace that unfortunate gibbet (at the Old Bailey) with ten, twelve, to thirteen, six ten, and twenty. I remember, in 1783, when Serjeant Adair was Recorder, there were forty hung at two executions." Such is the effect of familiarity in lessening the sense of horror, that the people contemplated executions without repugnance; and Judges would often indulge in the coarsest observations while presiding over a trial which was to have this dreadful termination. It is even recorded of a monarch, Charles II., that when Lord Russell was condemned to be hanged, and the sentence was changed by Royal authority to the less-degrading form of decapitation, the King humorously remarked that his Lordship would now find that the Crown possessed a power which he had previously called in question—alluding to a case in which Lord Russell and other "patriots" had disputed the assertion of the same contumelancy to a victim of opposite politics. In this case, as Blackstone observes, we scarcely know whether most to condemn the heartless levity of the Monarch, or the preceding brutality of the Peer which had provoked it. In both cases the fault was that of the time rather than of the men, and they are mentioned only to illustrate the observation before made, that the frequency of executions destroys their terror.

When we consider the state of things thus briefly described with that existing in the present day a marked and gratifying contrast is observable. It is sufficient to reconcile the public mind to the execution of even a deliberate murderer now, and the idea of adding additional cruelty to the mere extinction of life would be scouted with universal execration.

The first regularly-appointed hangman of whom we have gathered any authentic information is William Derrick, who flourished in the early part of the seventeenth century. Everybody is familiar with Master Scott's allusions to Derrick and to his successor Gregory—of whom we shall speak presently—in Sir Mungo Malagrowther's inimitable description of the mutilation of Stubbs and Page for the publication of a violent book against the match of Elizabeth with the Duke of Alençon. (See the "Fortunes of Nigel.") He appears to have gained an extensive reputation, and to have been frequently alluded to in the publications of the day as a well-known character. But whether this arose from his skill as an operator, or the playfulness of his wit and affability of his manners, or to a union of the two, we are not in a position to decide. In Dekker's "Belman of London," under the article "Prigging Law," we find the following notices of this worthy:—

For he rides his circuit with the Devil, and Derrick must be his host, and Tyburne the inne at which he will lighte.

At the gallows, where I leave them as to the haven at which they must all cast anchor, if Derrick's cables do but hold.

So, also, in his "Gull's Horn-Book," p. 58, Dekker mentions him:—

Salerno stands in the luxurious country of Naples, and who knows not that the Neapolitan will, like Derrick, the hangman, embrace you with one arm, &c., &c.

Again, at the end of his "Wonderful Year," is this passage:—

But by these tricks, imagining that many thousand have been turned wrongfully off the ladder of life: and praying that Derrick or his successors may live to do those a good turn that have done so to others. *Hic finis Priami!* Here is an end of my song.

After Derrick had had his day, he was succeeded immediately, or at a very short interval, by Gregory Brandon, whose celebrity was such as almost to eclipse the reputation of his more illustrious predecessor. We find this functionary or his successors in the calling—for every hangman for many years after him, and even the gallows itself, was dignified by his Christian name—frequently alluded to by writers of the middle of the seventeenth century.

In "Mercurius Pragmaticus," a tragi-comedy, acted at Paris in 1641, is the following:—

> The trembles under the Black Rod, and he
> Doth fear his fate from the *Gregorian* tree.

And in a paper called "The Parliament Kite," 1648:—

> What would you say, to see them fall,
> With both their houses vote;
> Because they have deposed us all,
> Now *Gregory*, they'll beguile!

In connection with this man a remarkable trick was played off in 1616, by Ralph Brooke, or Brokesmouth, at that period York Herald, upon Sir William Segar, Garter King of Arms, as related in the life of Camden, prefixed to the "Britannia," and whence has originated the strange notion, so currently entertained, that an executioner who had beheaded any State criminal for high treason was advanced to the rank of Esquire!‡ The story goes that this Ralph Brooke employed a person to carry a coat of arms, ready drawn, to Garter King of Arms, and to present it belonged to one Gregory Brandon, a gentleman who had formerly lived in London, but then resided in Spain, and to desire Garter to set his hand to it. To prevent deliberation the messenger was instructed to pretend that the vessel which was to carry the confirmation into Spain, when it had received the seal of Lee [illegible] and Garter's hand, was just ready to sail. This being done, and the fees paid, Brooke went to Thomas, Earl of Arundel, then one of the Commissioners for executing the office of Earl Marshal, and, in order to detain Garter, assures his Lordship that those were the arms of Arragon with a Canton for Brabant, and that Gregory Brandon was a gentleman and accomplished person. Which was true enough, he being the common hangman for London and Middlesex. Ralph Brandon afterwards contested the circumstances to the Commissioners who represented the Earl Marshal; the consequence of which was, that Garter was, by order of the King when he heard the case, committed to prison for his negligence, and the Herald for treachery. In this wise it happened that Brandon became a *gentleman*, which the mob in joke soon elevated into Esquire, a title by which he was known for the rest of his life, and which was afterwards transferred to his successors in office.

*(To be continued.)*

* The practice of chaining last dying speeches in the vicinity of the scaffold is of great antiquity. From the notes on a fine solemn air, *temp* Elizabeth, called "Fortune my Foe," published by W. Chappell, "Popular Music of the Olden Time," we learn that this tune (which, by the way, is immortalised by being mentioned by Shakspeare, and is alluded to by Ben Jonson, Beaumont and Fletcher, Lilly, Cheetle, and Burton, &c.), was the one to which "the unnatural mother of two dainty damsels" were chanted century ago. In proof of this the following passage is cited from Rowley's "Noble Soldier," 1634:—

> "The King. Shall I be bitter 'gainst the King!
> I shall have sorry ballads made of me.
> Sing to *the hanging tune.*"

And another from "The Penitent Traytor, the humble petition of a Devonshire gentleman, who was condemned for treason, and executed for the same, anno 1641," the last verse of two more than twenty:—

> "How could I bless thee, comfort thou take away
> My life and infamy both in one day.
> But this in bands will survive, I know,
> Sung to *that preaching tune*: *Fortune my foe!*"

† Some have surmised, plausibly enough, that the extempore crane, gibbet-shaped, and called a *derrick*, which seems rig to hoist freight on board, derives its name from this truculent personage.

‡ He was seconded by Gregory Brandon, who, it is said, had arms confirmed to him by the College of Heralds, and became an Esquire by virtue of his office.—Cunningham's "Handbook of London." Art. Tyburn.

§ In Peggé's "Curialia Miscellanea," whence we have abridged the above, it is [illegible] hangman to any appear in Lemon's Roll of Heraldry, annexed to the name of Brandon, viz., the arms of Arragon with a difference, and the arms of Brabant in a canton."

CITY of LONDON HOSPITAL for DISEASES of the CHEST, Victoria-park.

Out-patients relieved week ending 17th May ... ...
Now Cases admitted as Out-patients, ditto ... ...
In-door Patients ... ... ... ... ...

It was only on the personal responsibility of some members of the Committee that the means were provided for opening an In-patient side to the Hospital, and though the contributions received at the Anniversary will, to a considerable extent, meet the expenditure, the sanction of the Committee is required for the amount that there is still a large debt upon the building, and that the annual income is altogether inadequate to defray the current expenses.

They therefore urgently appeal to them not to remain in debt, and to the friends of the Institution shall have been contributed, that a situation be provided with a permanent and sufficient income.

Treasurer, B. EDMUND GURNEY, Esq., 65, Lombard-street.

Bankers, Messrs. BARCLAY and Co., 54, Lombard-street.

THE PEACE ILLUMINATIONS—THE NATIONAL GALLERY

London: Printed and Published at the Offices, 198, Strand, and Milford House, in the Parish of St. Clement Danes, in the County of Middlesex, by WILLIAM LITTLE, 198, Strand, aforesaid.—SATURDAY, MAY 31, 1856.

# THE ILLUSTRATED LONDON NEWS

No. 804.—VOL. XXVIII.] SATURDAY, JUNE 7, 1856. [WITH TWO SUPPLEMENTS, TENPENCE.

## EUROPE AND AMERICA.

If ever there were a period in English history when England required a strong, honest, and wise Government, it is now. If ever there were a time when to support such a Government there needed a patriotic and united Parliament, it is the present. The nation stands in the midst of dangers. Fortunately there is neither incipient treason nor even strong disaffection on the part of the masses of the people to trammel the hands of the Executive, or to distract its resolves. Our statesmen have a fair field for the display of any high qualities of courage or of foresight which they may happen to possess. But unfortunately there is little or nothing in the character either of the heads of the present Administration or of the House of Commons to inspire much confidence. To temporise, to truckle, to procrastinate, to make any shift rather than to decide boldly upon principles—to accept a Truce when a Peace might have been commanded to patch up a difficulty rather than remove or destroy it—to do anything that may satisfy the pressing emergencies of to-day, leaving to-morrow to shift for itself;—such seems to be the only care and the highest policy of the men to whom the destinies of the greatest nation of the world are at this moment confided, and of the Parliamentary majority by whose favour they retain office. Yet it is abundantly evident to all whose mental perceptions are not bounded by the narrow circle of official life, and who can see into that great world which exists beyond the pale of the Treasury benches and the lobby of the House of Commons, that a day is near at hand when Great Britain may require all the patriotism of her people, and all the statesman-

THE PEACE COMMEMORATION.—COUNTRY VISITORS AT THE ILLUMINATION.—(SEE NEXT PAGE.)

ship of her foremost intellects, to steer clear of the many difficulties which menace her peace, and to maintain her rights intact, and her honour unsullied.

No one who has read the history of Europe with the least care and comprehension imagines that the peace of Paris has in reality settled anything beyond the temporary security of Turkey; that the affairs of Europe are not closely intermingled with those of America; that the revolutions of 1848 have run their course; that the complications which arise in the East may not be exasperated by the passions of the West; or that in these days of rapid locomotion, and of extended intercourse amongst all the civilised and semi-civilised nations of the globe, a war between Great Britain and the United States of America, if such a fratricidal and abominable contest ever arose, would, of necessity, be confined to the original belligerents. Those who imagine any of these things must have read history to little purpose, and must be but imperfectly acquainted with the wishes, the wants, and the passions of contemporary nations. Fortunately for England, the close of the war against Russia finds her in possession of a splendid army, and of a more magnificent and powerful fleet than was ever possessed by any nation in ancient or modern times. While she possesses that fleet and army, and while her people have the power to call for the dismissal of an incompetent Ministry or a time-serving Parliament, she stands upon a vantage-ground from which it will not be easy for any combination of enemies to displace her. The old Anglo-French alliance that confronted Russia falls into abeyance by the peace which it has concluded. France and England may or may not unite for other purposes than the safety of Turkey, but it is obvious that other alliances both for England and for France may evolve themselves out of the present condition of Europe, and of the equally ominous state of politics in America. Great Britain stands between two dangers. On the European continent—every one of whose Sovereigns dreads the renewal of the commotions of 1848—there is forming, or has already been formed, a League and Alliance of absolute Monarchs, of which the object is to repress all popular freedom. The Emperors of Russia and Austria, the King of Prussia, the Pope, the King of Naples, the petty Kings and Princes of all Germany and Italy, except Sardinia; and last, but by no means least, the Emperor of the French, desire to maintain the *status quo* in every part of Europe. They each and all dread Revolution. They each rule by the sword, and deny their subjects all right to the management of public affairs, and all voice in their discussion, unless the voice be employed to praise the acts of arbitrary power, and to counsel acquiescence in its decrees. Each of these Sovereigns dislikes or is afraid of the system of government which prevails in England. Each mistrusts his people, for the simple reason that the people desire the establishment of a political system incompatible with the arbitrary rule of the irresponsible individuals who have inherited or grasped it. We do not except the Emperor of the French, because neither that great Sovereign himself, nor any one of the obsequious instruments who surround him, can believe that the intelligent, refined, active, and generous French nation is always to be governed upon the Russian system of autocracy and officialism. England is the sole great power in Europe which can boast of any constitutional liberty; and for this reason England has no hearty allies among the European Governments. They seek her alliance, if they need it, for the purposes of the moment—and, that purpose served, they relapse into the quiescent antagonism of their opposite principles of action. But the nations themselves look to England as their model and their hope. Italians, Germans, Poles, Hungarians, Bohemians, Croatians, Roumans, all desire a change in the institutions under which they groan, and will not be satisfied to endure their present degradation merely because it has pleased the Governments of France and England to patch up the Turkish difficulty. Hence there is daily danger in Europe, and hence there will continue to be danger, till the great principles enunciated in England in the reigns of Charles I. and James II., and in France in the Revolutions of 1789, 1793, 1830, and 1848, work themselves out to their legitimate end—the consolidation in Europe of a system of rational government, such as the people require, and such as their intelligence, their civilisation, and their Christianity entitle them to expect.

The dangers that menace the tranquillity of the world from the Americau side of the Atlantic are scarcely less serious, and will, we are afraid, sorely try both the skill of our rulers and the mettle of our people. We have elsewhere entered at considerable length into the particulars of the Nicaraguan dispute, and will only say in this place that, if a war unluckily arise on this pretext, it will be a war of Governments in the first place—not a war of the nations. The British people desire no war with America. They would look upon such a war with disgust and horror, and would deplore it as the greatest calamity that could befal them. We hope that the American people entertain similar sentiments. Most cordially do we wish that the United States of America possessed the whole of the debatable ground of Central America; Nicaragua, Mosquitia, and the rest of it; that they would give us three farthings, or one farthing, for our rights;—keep civil tongues in the heads of their statesmen, and so end the business. But, if this is not to be, we must look to our own Government to do its utmost to keep us out of the unworthy quarrel. But if, because the Russian peace is unpopular, they seek to make amends to the wounded self-love of their countrymen, by meeting the American Government with braggadocio and menace—if they precipitate this quarrel because they have a mighty fleet that longs for an opportunity to show of what it is capable—they will err as greatly by their rashness, as they have recently done by their unreadiness and unwillingness. To end the dispute, and to preserve their country's honour, is the task expected of them. The task may be difficult; but in its prosecution they will have the cordial and unanimous support of the nation.

The Sultan has given Lord Stratford de Redcliffe a piece of land on which to build a Protestant church.

## *FOREIGN AND COLONIAL NEWS.*

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday.

THE great improvement produced in the health of the Empress leaves little doubt that the ceremony of the christening will take place on the day fixed, the 14th inst. The Legate charged by the Pope to perform the office is expected to arrive in Paris on the 8th or 9th; and it is now reported that it is probable, notwithstanding all the assertions to the contrary, that the Queen of Sweden will come to perform in person her part as godmother to the Prince Imperial. It was intended that on the night of the christening a magnificent ball should be given at the Hôtel de Ville; but, as the banquet cannot fail to occupy a considerable time, it was thought that such an arrangement would prolong the entertainment too much and prove too fatiguing for the Empress; the ball is therefore deferred till the following evening. The occasion of the baptismal ceremony will be attended with all the pomp and solemnity that can be given to it. Not a single guest admitted to the interior of Notre Dame is permitted to dispense with the rule of wearing uniform, even in the most remote and obscure parts of the building. The ladies of the Empress's household (with the exception of the Admiral-Brust, who carries the Prince), and, we believe, the wives of the chief dignitaries of State, are all to wear court dresses and trains, and no lady is to appear but in full dress. The preparations for the illuminations, especially that of the Hôtel de Ville, are on the most magnificent scale. In the Place de la Concorde splendid fireworks are to take place. At Anger's the foundry Guillaume Besson has been engaged in casting four superb bells to be hung in Notre Dame, and used for the first time in the approaching ceremony. The largest of these bells weighs nearly 4000 pounds, the smallest between fourteen and fifteen hundred. They are christened in due form, the largest having for sponsors M. Sibour, Bishop of Tripoli *in partibus infidelium*, and Mdlle de Talleyrand, Duchesse de Perigord; the second, the Comte Charles de Montalembert and the Marquise de Jumilhac; the third, the Comte de Tascher and the Vicomtesse de Queleu; and the fourth, the Marquis de Pastoret and Mdme. Affre. All the *marraines* have been chosen among the families of the last five or six Archbishops of Paris. The *grand bourdon* of Notre Dame is many centuries old: its weight is computed at 24,000 lb.

The fêtes of last week produced in many parts a terrible renewal of the preceding inundations, but the beautiful summer weather of the last few days has already done the country "a world of good," and it is hoped will, in various instances, go far to repair the damage caused, so that the mischief will be more local than general. Still, there is no denying the fact that where the inundations have occurred the loss and consequent distress must be terrible, and no doubt the Government will feel itself called upon to adopt some measures for the relief of the numerous sufferers.

In the gardens of the Tuileries on the terrace looking on the Seine (which, since the departure of the Empress has been reopened to the public) a number of workmen are employed in placing some specimens of Russian sculpture brought from Sebastopol. As trophies these works have considerable interest and attraction, but as products of art their value is very low. Among these objects are two gigantic sphinxes in white marble; a large bas-relief from the front of some public monument—a work of considerable magnitude and importance; two figures, which appear also to have been employed in the decoration of a public building; and a lion's head, injured by a ball. Nearly all these sculptures bear the date of 1845; they are for the most part wholly wanting in force, vigour, and breadth, and bear a considerable resemblance to the would-be Greek school, of which Canova was the best representative; though, while they possess the defects of the works of that skilful sculptor, they want the grace and delicacy which distinguished his productions.

The number of subscribers to the "Cours familier de Littérature" of M. de Lamartine increases considerably, but not, it appears, in a sufficient degree to relieve his difficulties very effectually. The cause of these difficulties, which, from the well-known fact that M. de Lamartine inherited large possessions in landed property, had money with his wife, and has made unusually large sums by his indefatigable literary labours, it seemed almost impossible to account for, may, we are assured on good authority, be chiefly explained from two circumstances. The property in question, which consisted in vines—M. de Lamartine being one of the largest vine-growers in France—was, at the time of his entering upon it, charged with debts of upwards of £40,000. Since 1848 the grape disease has nearly neutralised the products, while at the same time existed, during a period of extreme scarcity, the same necessity as before for paying and supporting some four or five hundred families employed in the vineyards. Thus explained, the distress—for it is nothing less—of the poet appeals to general sympathy more eloquently, as we think, than any personal address to the public; and it is earnestly to be hoped that the work on which M. de Lamartine is engaged—a work so replete with the most valuable information, conveyed in the most interesting and popular form that it constitutes a sort of royal road to the acquisition of ancient and modern literature—may be made to fulfil its aim, and save its illustrious author from the ruin which becomes daily more impending.

The tour which the Emperor is making in the localities that have suffered the most severely from the inundations, produces the best moral as well as material effect. It has been a happy and a noble inspiration, and one certain to bear good fruits to all parties concerned.

The death of the historian, Augustin Thierry, has been an event of universal interest and regret. Like Milton, Thierry paid the penalty of his indefatigable studies by the loss of sight, and for many years he had been entirely crippled. In this state he encountered Mdlle. de Quérangal, a young lady of a Breton family, herself a woman of remarkable talents and acquirements, who was so touched by the position of the illustrious sufferer as to determine to devote her life to him. They married; and up to the period of his death her noble devotion was the support and consolation of his existence. Thierry's "Récit des Temps Mérovingiens;" his "Dix Ans d'Etudes Historiques;" his "Histoire de la Conquête de l'Angleterre par les Normands," and his "Lettres sur l'Histoire de France," entitle him to one of the first places among modern historians.

We regret to announce the severe and even dangerous illness of Mdlle. Rachel.

### FRANCE AND BELGIUM.

The organs of the French Government appear to have received instructions to keep the question of the Belgian press before the public attention, and to lose no opportunity of reiterating complaints against it. Thus the *Constitutionnel* of Tuesday says:—

The portion of the Belgian press so justly stigmatised by the protocol of the 8th of May, and which, after the recent debate in the Belgian Chambers, found it prudent to maintain a relative moderation, has not persisted for long in its new course. We learn from Brussels that these incendiary journals publish an appeal to insurrection, addressed to the Italian nation by M. Victor Hugo; and do not conceal that they are indebted for the communication to M. Mazzini. We have to observe that these appeals to the most evil of passions are not published in clandestine papers, as was stated on a solemn occasion. These journals are printed and distributed like all others; they have their subscribers—not in great numbers it is true; they are received in public rooms—not in all, it is equally true, for in some they have been excluded by the subscribers. Therefore, if these papers are not prosecuted, it is because the existing law on the press is impotent. It is to be hoped, therefore, that the Belgian Government will consider the moment as arrived when it is necessary to demand of the Legislature that strength which is wanting in order to render Belgium really a neutral Power, and not a hotbed of incitement to insurrection and assassination.

The name of Mazzini is always used when people are to be frightened into repressive measures, or when Governments require an excuse for any arbitrary encroachment on a system usually liberal. It may be remarked, therefore, that just at the very juncture when the head of the late Roman Republic is said to be working at Brussels, the *Risorgimento* of Turin of the 30th states that he has issued a circular to his agents, declaring his intention of withdrawing entirely from politics, and leaving London for New York or some other city of the United States. His agent at Turin, Advocate Bettini, has been instructed to sell the property he possesses in Piedmont.

The Paris correspondent of the *Times* says:—"The project of law intended to be laid before the new Chambers in Belgium, in pursuance of the engagement given by the Government, applies to three things in particular, viz., the stamp, the signing the article with the author's name, and the power given to the law officers of the Crown to institute proceedings without the necessity of a previous demand from a foreign government."

### AMERICA—FRATERNISATION WITH THE FILIBUSTERS.

The Royal mail steam ship *America*, which sailed from New York on the 26th ult., arrived at Liverpool on Saturday last.

General Walker's Government in Nicaragua has at length been officially recognised by the United States. Padre Vijil, the Nicaraguan Envoy at Washington, on the 14th of April called at the State Department, when Mr. Marcy was duly received and conducted by it to the President, where he presented his credentials, and met with a cordial reception. The event created a great sensation.

The Washington correspondent of the *New York Herald* says:—

As I anticipated, Mr Marcy was overruled in his opposition to the recognition of Walker's Government. Nothing, I understand, was for the recognition as soon as the new Minister arrived. It is thought by Pierce's friends that the new move will strengthen him at Cincinnati, in the Democratic Convention.

It is highly probable that a resolution will be speedily introduced into Congress supporting the new Government. The *Orizaba*, which sailed from New York last Saturday, took out instructions, by advice from here, that, in case the English frigate *Jasper* should again attempt to stop her, to pay no attention to the demand until fired into, and then at once haul down her flag and surrender, as being unarmed and incapable of resistance. This will bring matters to a crisis.

In the Senate a message had been received from the President relative to the general condition of Central America, and the routes of transit between the Atlantic and Pacific Oceans. He says that a small body of individuals, invited to Nicaragua by the Democratic party in that country, had apparently put an end to the struggle which had existed there during the last twenty months. The present executive represents the actual power, and no force is behind the fact to investigate the question of legitimacy, nor do we inquire into the causes which led to the change of government. If, therefore, with the Nicaraguan Minister, Colonel Frisbie, and there is now no other, the Spanish portion of the population be not represented, he must have been received. Another has now presented himself and been received, satisfactory evidence existing that he represented a Government *de facto* and *de jure*. Numerous considerations of interest are advanced in the message with reference to the propriety of his reception. An animated debate ensued upon the reading of the message, in which Mr. Crittenden said that in one week more the country would be startled from one end to the other on this subject, and it might result in our being involved in a war.

Advices from Havannah, dated the 15th ult., announce that the Spanish Government is fitting out two maritime expeditions: one to assist the Costa Ricans against Walker, and the other to blockade Vera Cruz, in order to enforce payment of certain claims made by Spanish subjects.

QUEBEC, May 22.—The Canadian Ministry has resigned. The Assembly voted its confidence in the Ministers, but a majority of the Upper Canadian members was hostile to them. It is rumoured that Colonel Taché has been sent for by the Governor General.

ST. JOHN'S (NEW BRUNSWICK), MAY 22.—Lieut.-Governor Sutton has dissolved the Assembly, whereupon the members of his Council tendered their resignations, which were accepted.

### DISMISSAL OF MR. CRAMPTON.

The *Atlantic* steam-ship, with dates from New York to the 24th ult., arrived at Liverpool on Wednesday evening. It was not known when the steamer left whether Mr. Crampton had received his passport; but the following article, semi-official, from the *Morning Post* of Thursday, leaves no doubt as to the course which the American Government has taken:—

We said, in an article in which we treated of the relative position of America and England, a few days ago, that as Christians and friends of social progress we earnestly deprecated the outbreak of war, or even the cessation of peaceful relations, between two populations who, in their language, their mercantile transactions, and their relations of every-day life, are so interlaced as are the representatives of the Anglo-Saxon race upon this and the other side of the Atlantic.

We deeply regret to have to announce that since the publication of that article a course has been taken by the American Government which, although it is in no way equivalent to a declaration of war, evidently tends to diminish in a very serious degree the chances of preserving peace between the two nations. Our readers are aware that the Government of England, having first been tendered to the United States, in the most candid and unreserved manner, a frank and full apology for any infraction of the American neutrality laws which might, wittingly or unwittingly, have been committed by British agents during the late war, have not considered it consistent with justice to Mr. Crampton, or with a due regard for the position of this kingdom, to accede to the further demand preferred by President Pierce for the recall of our Minister.

The Cabinet of Lord Palmerston at this point, however unwillingly, felt themselves constrained by justice, and therefore by their duty, to stop short in the path of concession; and the United States' Government, on the receipt of this, the ultimatum of England, has directed Mr. Crampton to withdraw from the territory of the Union.

That this is a most rash and intemperate step, at the present juncture, be the original merits of the questions at issue what they may, cannot, and we are convinced will not, be denied by the better and more considerate even of the people who live under the Government that have taken it. It is not easy in a country where public policy is swayed by such singular agglomerations of parties, and determined by such exceptional circumstances, as it is in America to say what is the precise bent of public opinion; but, as far as it can be inferred, upon the present occasion, from the tone of the most influential of the journals of the United States, it is, with us, opposed to the violent and provocative policy to which the executive Government somewhat unfortunately, as it seems to us—seeks to commit the American people. Irritating as that policy unquestionably is, we shall, we doubt not, continue to maintain that conciliatory conduct, and, at the same time, firm and dignified attitude, which we have throughout this untoward affair exhibited, in the hope that we may yet be able to prevent a further development of the apparently hostile disposition of the Government of the United States; nor is it unreasonable to expect that the other great nations of the civilised world will bring the influence of their opinion to bear upon the mind of the American population in such a manner as to check any further progress in those ill-judged demonstrations of aggression and of tendencies to war.

### TURKEY.

*(From an Occasional Correspondent.)*

CONSTANTINOPLE, May 13, 1856.

The first bond fide step in token of the re-establishment of peace took place at Chek-Mege, about twenty miles from Constantinople, last Saturday, at one o'clock, when Lord Stratford de Redcliffe, accompanied by the Embassy, General Count Zamoisky and Major General Sir Stephen Lakeman, &c., &c., gave over to the Seraskier the Turkish Contingent Cavalry, commanded by General Shirley. At the brilliant review which then took place, graced as it was by the presence of Lady Stratford de Redcliffe and the Hon. Misses Canning, Mrs. Major Brett, and others of Elçi and's fair daughters, the greatest cordiality existed on all sides, and Lord Stratford expressed himself afterwards, at a sumptuous repast given by General Shirley in honour of the occasion, to be much gratified with the soldierly bearing of the men, and the evident accord between them and their officers. His Lordship also expressed satisfaction at the able manner in which General Shirley had carried on the organisation of his corps. The Seraskier, on his part, vouched for the efficiency of the body as also for the friendly disposition of the Turks to their English officers. The whole affair passed off with great éclat, and the number, although small (about 2000 regular cavalry), presented a fine effect mounted on their little wiry horses, with their colours flying from their lances. The troops composed a portion of Sir Stephen Lakeman's corps in the Principalities.

---

LOSS OF THE YACHT *ALMA*.—We have received a telegraphic despatch from Dover informing us that Lord Alfred Paget's yacht, the *Alma*, was run down three or four miles off the South Foreland, at a little before midnight yesterday, by the Belgian mail-packet *Diamond*, on her way to Ostend. His Lordship and crew were saved in the yacht's gig.

## THOUGHTS IN THOROUGHFARES.

I AM occasionally weak enough to buy off the opposition of the urchins who obstruct my passage through the London streets by the purchase of a penny newspaper. In glancing at its contents I have found that, in spite of its contracted space, ample room is afforded in its columns for the thy communications on a question which the established daily press seems to treat as finally decided—namely, the guilt or innocence of the convict Palmer. What may be the consideration (whether highly moral or otherwise) which induces the penny papers to open their columns to lengthy communications impugning the verdict of the jury, finding fault with the charge of the Judge, and asserting the prisoner's legal innocence, in spite of all reasonable presumption of his guilt, is a point on which I will not speculate. The country seems to be generally satisfied with the verdict that has been returned; but, if the press is to be turned into a Court of Criminal Appeal, we shall be establishing, in place of trial by jury, a system of trial by newspaper. Never were greater precautions taken to ensure fairness than in this remarkable case; and it is now somewhat late to print letters and articles commencing with the question "Is Palmer guilty?"—a question which the only tribunal competent to reply has, after a patient investigation of many days, answered in the affirmative. Trial by jury may as well be abandoned at once if verdicts are to be made liable to reversal on the demand of newspaper correspondents and editors, the value of whom may be personal friends of the condemned criminal. There is no more reason for putting to the country the question "Is Palmer guilty?" than there would be for asking whether Brown really owes Jones the fifty pounds for which a jury may have returned a verdict any day last term in the Court of Exchequer. There is a regularly constituted Court of Criminal Appeal; there is a tribunal for the consideration of what are called Crown cases reserved, to which the legal advisers of [illegible] would have recourse if there had been any grounds for their doing so; but the endeavouring by clamour to discredit the verdict of the jury is a course which, if permitted to succeed, would supply a most inconvenient precedent. The advocates for the abolition of capital punishment are always peculiarly active when a condemned criminal is in the hands of the law awaiting the extreme penalty. None will doubt the humanity of the motives of these reformers; but in their anxiety to save life they frequently damage their own credit, by arguing, in the face of all fact and probability, against the justice of the conviction of one whose guilt has been legally declared and is morally manifest. This course weakens our confidence in the judgment of those by whom it is pursued; and, though we might pay respect to an argument in favour of the abolition of the punishment of death, we cannot attach much weight to the reasoning powers of those who endeavour to persuade us of the innocence of a clearly-proved and deliberately-convicted criminal.

The night of the Peace Rejoicings was quite an Arabian night in London, or rather every street was a sort of last scene in a pantomime. The metropolis was a perfect "fairyland," according to theatrical notions of what fairyland is like, and every illuminated house was more or less "an abode of bliss" in proportion to the amount of glare that its exterior exhibited. Even the Government offices, to which darkness and obscurity are popularly attributed, which, pursuing the pantomime allegory, would be regarded generally as "caves of despair," "abodes of gnome kings," and other underground localities in which the characters are always groping about in dismal helplessness, or plotting mischief against all the good geniuses that come in contact with them—even the Government offices were brought within the "realms of light" on the occasion alluded to. London looked like an enchanted city in which millions of wonderful lamps had contrioated to the formation of an almost uninterrupted series of Aladdin's palaces. In the midst of such a scene the Imagination might have had unlimited away without fear of the intrusion of dull matter of fact, had it not been for the unfinished state of some of the illuminations, which caused the spectator to say to himself, "That work is not half done, and I must, therefore, be standing opposite one of the public offices." At the Treasury there was the framework of five gigantic letters, intended to spell the word PEACE; but at a late hour the illuminators had got no further than PE, and it seemed as if the authorities, however anxious they might have been to make PEACE, could only get within an ACE of it. To some who noticed the darkness in which the final letters were involved, the idea suggested itself which has already been put forward in some quarters, that the conclusion of Peace is not altogether so brilliant as it might have been, and that more light ought to be thrown upon it by the Government. The state of the Admiralty illumination was also characteristic of the department, for the designs were on a magnificent scale, but were only half executed when the public expectation was at its highest point, and the whole plan would probably have been carried out by the time that everybody had gone away, and the costly arrangements would be complete just as there was no further use for them. Somerset-house was dark, and would not light up at all, although the design was splendid. At the Horse Guards everything was in a backward condition on the Parliament-street side of the building, and for some time nothing more than the framework of the illumination was visible, until a ladder was placed upon a narrow ledge, and, sufficient "purchase" having been secured, a boy ascended to the top, a proceeding by which the system of promotion was, no doubt, unintentionally typified.

Here and there the idea of enchantment was dispelled by the puffing of the wind, which had blown out a portion of the Royal initials, and, in some instances, reduced the Imperial diadem to about half a crown, or deprived the Royal arms of one or more of the legs of its supporters; but the puffing of the wind was not so destructive to the fairy-like character of the scene as the puffing of some few tradesmen, who turned the illumination into the means of an advertisement; these, however, were very rare, and on the whole Fancy had her full fling in a series of random shots, some of which were most amusingly wide of the mark they were directed at. The figure of Peace was the aim of a great many, but nobody seems to have exactly hit it. In some designs she was distributing her blessings, which appeared to consist generally of very large apples, with which she was represented as pelting the Allied Sovereigns. The artistical idea of a blessing, as shown in the transparencies on the night of the illuminations, was, on the whole, remarkable for vagueness rather than variety. Peace appears to be considered as a kind of fruiterer, dealing in nothing but apples, though occasionally exhibiting in one hand a branch, which may be regarded as a branch of the business, in the form of an evergreen. In some few instances she was drawn in the character of a confectioner distributing biscuits to the nations of the earth, or throwing tea-cakes at another lady intended to represent Commerce. Britannia and the British Lion came in for their accustomed share of ill-treatment at the hands of the artists, some of whom had so roughly handled both the beauty and the beast as to have deserved six months' imprisonment for an aggravated assault on a female, as well as for cruelty to a noble animal.

That the whole of London might be a scene of enchantment, those who had no opportunity of getting into fairyland by way of the Strand or any of the streets were invited to visit the "Gardens of Light" into which the parks were converted by means of the fireworks. Here were to be seen "pearl streamers," such as were never before met with, except in the pages of romance, or within the gardens of Vauxhall and Cremorne; with Roman candles in greater abundance than ever Pusseyite churches can afford, and "six turning suns" all revolving at once with a brilliancy sufficient to throw the moon controversy into the shade for ever.

It is something new in this country for the public to rejoice at all, as a matter of business; but that the nation should show its joy with fireworks, or *avec explosion*, as the French would say, is an affair of still greater novelty. Notwithstanding the unprecedented nature of the occasion, and the rather startling strangeness of the proposition to get up a scene of enchantment in London, there was nothing so truly enchanting, and so appropriate to fairyland, as the good humour, good order, and good feeling which all classes exhibited. Everything passed off with smoothness, and very little of the "rough" element was visible.

A WALKING PHILOSOPHER.

*The range of temperature during the week* was 32.0° Showery on the 28th, fair on 29th and 30th, rain from 8 p.m. on the 31st, to June 1st rainy, 2nd and 3rd fine.

*The direction of the wind* was—on 28th S.W., became S. at 3½ a.m., passing through W. to N.W at 9 p.m., at 1a.m. moved to W., and then became N.N.W., 3h. 45m. p.m. passed through W. to S. 5 p.m. became S.S.E., 7 p.m. E.S.E., 4½ p.m. S., 4½ p.m. S.W., 4h. 35m. p.m. W., 9h. 45m. p.m. N.W., 10½ p.m. moved through N. to N.N.E.; became N.E. at 3½ a.m. on 29th, N.N.E. at 6½ a.m. N.E. at noon; was N.E. and N.N.E. all day on 30th, N.E. and E.N.E. on 31st, N.N.E and N.N.W. on 1st June, became N.W. at 5 p.m., W. at 3½ p.m., and S.W. from 4 p.m. Oscillated between W. and S.W. on the 2nd and 3rd.

Much electricity at 7 p.m. on the 29th.

29th Weigelia roseа in flower. 30th laburnum in full flower.

28th thunder in S. at 2½ p.m. E. J. LOWE.

THE ART TREASURES EXHIBITION.—On Monday a letter was received from the Lord Mayor of London (Mr. Alderman Salomons), requesting that he may be allowed to add his name as a subscriber of £500 to the guarantee fund—an act which we feel sure will be welcomed as a gratifying evidence of interest in the proposed exhibition.—*Manchester Guardian.*

FARMING ON DARTMOOR.—Mr. George Fowler, a gentleman who has successfully reclaimed a number of acres of waste land at Prince Hall, Dartmoor, is about to leave his farm. He started in that line and carried out entirely the course of improvements on which he originally entered, and has shown to the world what may be done on Dartmoor. Fields which in 1847 were worth no more than from 1s. 6d. to 2s. per acre fetched on the 19th of May nearly 60s. per acre.

PEACE FESTIVITIES AT PRESTON.—On the 29th ult. the Wesleyans of this town celebrated the return of peace by giving a substantial dinner of roast beef and plum-pudding to 1272 Sunday-school teachers and children in the Corn Exchange. The building was tastefully decorated for the occasion festoons of evergreens and flowers were suspended from the glass roof with very pretty effect; and war flags of all nations were intermingled with banners and a shield bearing inscriptions of Peace. The Wesleyan ministers of the circuit and their families occupied the cross table; the latter being occupied by the Rev. Wm. Jackson. At the opposite end an arbour of evergreens and flowers had been provided as a seat for the Rev. George Scott, who presided over the joyous party. The procession, each scholar carrying a nosegay concealing a knife and fork, reached the hall at two o'clock. Hymns and anthems were sung, and prayer and benediction pronounced, and the whole was a delightful scene of rational festivity. The provision for the great feast consisted of 2000 lb. of potatoes, 800 lb. of bread, 200lb of beef, and upwards of 108 plum-puddings, weighing from 4lb. to 16lb. each.

PHILANTHROPIC SOCIETY'S FARM.—On Saturday the first stone of a new school-house at the Farm School of the Philanthropic Society at Red-hill was laid by the Bishop of St. David's, in the absence of M. Demetz, of Metfray, who had been delayed by an accident. Among those present were the Dean of Salisbury, Mr. Adderley, M.P., Mr. H. T. Hope, Mr. A. Beresford Hope, Mr. W. Cotton, Mr Somers Cocks, M.P., and the Right Hon. W. E. Gladstone; the new school-house being the gift of the latter gentleman. After the foundation ceremony M. Demetz arrived, and addressed the company in French. (Of the very interesting proceedings we intend to give an Illustration and fuller report next week.)

THE EMPEROR AT LYONS.—The Emperor passed through all the places most visited by the inundation, and appeared greatly moved by the desolating spectacle. His Majesty did not say where night, and in many places passed through very deep and rapid currents. The difficulties and even the dangers of the passage were not, however, thought of, the Emperor's attention being devoted entirely to the heartrending scene around him. The salvation of present sufferings was, however, the immediate object of his attention; at every step the Imperial cortège was met by poor persons driven from their homes by the floods, and who pressed forward to implore relief. The police and the escort at first prevented their approach; but the Emperor ordered that they should be allowed to draw near, and not one of them went away without relief. General Niel, who rode by the side of his Majesty, had a bag filled with gold, which was liberally distributed. Everywhere during the passage of the Emperor, the cries of "Vive l'Empereur!" "Vive notre sauveur!" were raised with the greatest enthusiasm. Near the Pont de Serin and the Caisse bank, a poor woman approached in front of the rest, crying, "Vive l'Empereur!" when the Emperor gave her several pieces of gold, saying, "Here, my poor woman, is something for you to buy bread with." The acclamations and the acclamations raised by the people express but very feebly the deep feelings of gratitude and admiration excited in the breasts of the inhabitants of Lyons at the goodness of heart which dictated to his Majesty the noble idea of visiting the afflicted city. The Emperor returned to the hotel about two o'clock, and immediately a consultation was held with competent men on the measures which should be adopted to prevent a recurrence of this dreadful visitation.—*Galignani.*

THE ALSATIAN SINGERS.—The grand festival of the Alsatian singers at Strasburg commenced on Saturday last, with the arrival of thirty-nine singing societies, comprising 547 members, from various parts of France. Adding to these the 300 members of the three Strasburg societies, and the twenty members of the society of the Robertsau, the whole number of singers will be 767. To lodge the foreign singers, the committee has found 143 beds in private families, and the hotels have offered 376 more; the remainder stay with their private friends.

THE ROYAL FAMILY AT BERLIN.—The Queen of Bavaria, daughter to the late Prince William of Prussia, and first cousin to the Empress, has arrived to join the Royal party. There are also present the Duke of Oldenburg, Weimar, Nassau, Mecklenburg-Strelitz, and Duchess and Crown Prince and Princess of Wurtemberg. The Crown Princess of Hesse Darmstadt, likewise a daughter of the late Prince William, is also expected; so that the whole Prussian Royal family—with the exception of the Princess of Prussia, and her son and daughter—will then be assembled. The town bears an unusually animated appearance from this great influx of illustrious and distinguished strangers, whose passage to and fro, under the Linden, attracts crowds all day.

EAST INDIAN COLONY.—The Indian Government has recently had a project under consideration of some interest to seamen. To the south-east of the Bay of Bengal there a group of islands called the Andamans. They cover an area larger than that of Sicily, and are known to be fertile, well-wooded, and full of harbours. They belong to the British; but, for some unexplained reason, have never been occupied since they were abandoned in 1794. At present they are thinly populated by a tribe of degenerate negroes, or Malays, who are certainly wreckers, and are suspected to be cannibals. The crews of several vessels wrecked on the coast have been murdered, and the islands, which might be made ocean houses of refuge, are a nuisance in the bay. It was supposed that they were unhealthy, but the supposition has been disproved, and the Government has proposed to abate the nuisance. The matter has been referred to England; but we can scarcely imagine that the Court will refuse its consent to a measure demanded by the entire civilised world.

## MEMORIAL OF BRITISH SCULPTORS.

TO THE RIGHT HON. SIR BENJAMIN HALL, BART.

Sculptors' Institute, 32, Sackville-street.

We the undersigned, British sculptors, feel assured that we shall not be deemed intrusive or officious in addressing the following statement to a Minister of the Crown charged with the supervision of the public monuments of the country.

We have observed with regret that frequent attempts have been lately made by the most influential organ of the daily press to disparage the ability of British sculptors, and to defend as an inevitable necessity a recourse to foreign artists. It is, moreover, reported that a large sum of money is about to be devoted to a monument to the Duke of Wellington, and another sum to a memorial at Scutari to the brave men who have fallen in the late war, and in the present temper of the public mind, and in the disposition of some who exercise the patronage of the country, we are not without apprehension that due justice will fail to be done to the English sculptor.

We desire to guard ourselves against the imputation of an illiberal jealousy of the foreigner. Art is a universal language, and the artist should find himself a native of every great city of the world. There has never been a time when the English courts and the English people have not received with ready welcome the foreign painter, architect, and sculptor. May it be thus always. But we claim for native talent that it also should be sought for and appreciated. It is not true that there is a dearth of genius among the sculptors of England. There are works of indisputable excellence from the hands of living artists that attest the contrary. What is lamentably true is this, that means have rarely been adopted for communing public works to the men of the greatest merit amongst us. We would humbly suggest that if the patronage of the nation were exercised with more care and discrimination, and with a genuine desire to discover the worthiest on whom to bestow it, the public monuments of England would no longer be appealed to as displaying in so many instances a puerile mediocrity.

None can feel more deeply than ourselves the degradation which the sculpture of England has suffered during the last fifty years from the erection in our Metropolitan Cathedral, the Abbey, and Guildhall, of the huge puerilities and distressing allegories which deface the walls of those buildings. But it is borne in mind, that, while large sums were being lavished upon such productions as these, Examun and Banks were alive, needy and seeking employment? Men who were neglected year after year by the Government and the municipal authorities of that time are now the boast of every Englishman, and are acknowledged to have earned an European reputation.

To approach somewhat nearer to our own times, we would point to a fact of no little significance. A sculptor of the name of Watson recently died; he was an industrious artist, and a competitor for most of the public monuments executed in his day. He never obtained a commission; but the rejected models which he exhibited on such occasions are now sought for with avidity, and studied by living artists.

Whether the same unfortunate method of selection still attends upon us we must leave others to decide. We must observe, however, that there is an increasing independent amongst artists of acknowledged merit to enter into any public competition. It is felt that a proposal for a general competition is no security against an incompetent or partial judge.

To combat this independent, to foster the genius of the country, to secure for our generation monuments the artists of the greatest power, we would finally submit:—1. That in every competition a public exhibition of the models of all competitors should precede the selection of any one of them; and 2, That such selection should be made by a committee so constituted that the body of artists as well as the public in general may confide in them.

To a public competition so conducted we cheerfully invite every artist resident in the United Kingdom, and we rest confident that, patronage being liberally and wisely exercised, there will no longer be an impression abroad in the country that the English sculptor is unequal to the celebration of English heroism

We have the honour, with great respect, to subscribe ourselves:—E. H. Baily, R.A.; F. MacDowall, R.A.; W. Calder Marshall, R.A.; J. H. Foley, A.R.A.; H. Weeks, J. Evan Thomas, F. M. Miller, Thomas Thornycroft, Alfred Hone, Timothy Butler, William Behnes, Matthew Noble, John Hancock, Alex. Munro, Edward B. Stephens, J. Sherwood Westmacott, Joseph Durham, J. Edwards, Frederick Thrupp, Edward Davis, Thomas Earle, W. F. Woodington.

## GRAND TRUNK RAILWAY OF CANADA.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.)

MY attention has been called to an article in the ILLUSTRATED LONDON NEWS of Saturday last, headed "Grand Trunk Railway of Canada." It contains numerous inaccuracies, which I beg the favour of your correcting in your next publication.

The progress of the Grand Trunk Railway is not suspended, nor has it ever been suspended for a single day. The certificates for work done by Messrs. Peto, Brassey, Betts, and Jackson, from the commencement of this year to the 1st of last month (the latest period to which the returns have been received in England), amount to £520,748, and there only remain works representing £362,053 to complete the railway (with the exception of the Victoria-bridge), from St. Thomas, 40 miles below Quebec, to Stratford, a distance of 942 miles from Toronto, with 220 miles from the junction of the Quebec and Montreal line to Portland, makes a total mileage of 862 miles that will be in operation before the end of 1856

The interest on the bonds issued by the Canadian Government in aid of the Grand Trunk Company will be duly paid on the 1st proximo.

The resolution read in the Legislative Assembly of Canada, by Mr. Cayley, the Inspector-General, was not drawn up in London.

Mr. Brassey is not the Vice-President of the Company, nor has he any seat at the board, as he and his partners are the contractors for the construction of the railway, and of the Victoria-bridge.

The statement of figures attributed to Mr. Cayley would make it appear as if there would be an ever-ending liability to the provinces of Canada, if a guarantee of five per cent on the shares were given, of £486,000 a year. One half of this amount for the first four or five years, to be recouped by the future receipts of the line, would more correctly represent the actual liability from the proposed guarantee.

The ordinary annual revenue of the province of Canada is one million and a half, and not £900,000, as will be perceived by the subjoined extract from Mr. Cayley's estimate, submitted to the Legislative Assembly of Canada, between three and four weeks ago:—

| | |
|---|---|
| Customs .. .. .. .. .. .. .. .. | £1,300,000 |
| Excise .. .. .. .. .. .. .. .. | 31,000 |
| Public Works .. .. .. .. .. .. .. | 100,000 |

I remain, Sir, your most obedient servant,

CUBACK P. BONEY, Secretary.

[NOTE OF THE EDITOR.—The statement which our Correspondent characterises as replete with "numerous inaccuracies" is entirely based on the Parliamentary report of the speech of Mr. Cayley, Inspector-General of Canada, an office which corresponds to that of Chancellor of the Exchequer.]

## THE PEACE COMMEMORATION AT PLYMOUTH.

The celebration of peace on the 29th ult. was observed in the three sister towns of Plymouth, Devonport, and Stonehouse as a general holiday. Business of every description was suspended, all the shops and public establishments were closed, including, of course, the Government Arsenals, Custom-house, Dockyard, Royal William Victualling-yard, Gun-wharf, &c. The morning was ushered in by the ringing of merry peals from the various churches, and the public buildings and streets were gaily decorated with flags.

A meeting of the inhabitants took place about ten days previously at the Guildhall, John Kelly, Esq., the Right Worshipful the Mayor presiding; when it was determined that there should be a public display of fireworks on the Plymouth Hoe, and a subscription should be opened for defraying the cost of a Crimean Ward at the South Devon and East Cornwall Hospital; a committee was immediately formed, and the Mayor consented to be the chairman; and Mr. William E. Rendle was chosen as the secretary, and Mr. J. Skardon treasurer. The committee immediately set to work in good earnest, and a subscription was soon raised, amounting to from £300 to £400. All the money was subscribed and the arrangements completed in the short space of a week; and a regular holiday was enjoyed by the immense population of Plymouth and surrounding to vns and district.

The review of the troops took place at noon, and comprised the following regiments:—Royal Marines, Devon Artillery, Warwick Militia, Royal Artillery, Limerick County Militia, South Devon Militia, and the 94th Depôt. The number of men and officers assembled was about 2500.

THE PEACE COMMEMORATION AT PLYMOUTH.—ROCKETS AND GENERAL ILLUMINATION OF THE FLEET IN THE SOUND.—FROM A SKETCH BY H. A. LUSCOMBE.

Royal salutes were fired at noon by all the ships and gun-boats in commission in the Sound and harbour, and the effect was very grand.

The day was tolerably fine—there was no rain, but the sky was heavy. The town was filled with strangers, the trains were overcrowded, the river steamers were crammed with passengers, and the turnpike-roads were filled with vehicles of all descriptions Never was Plymouth so full, and never did such an immense concourse of people enjoy themselves so thoroughly.

But the great event of the day was yet to take place, namely, the illumination of the fleet. The Mayor had written to the Admiralty to ask them to grant an order for a grand review of the fleet to take place, but this could not be conceded; they promised, however, the chief magistrate that at nightfall the fleet should be illuminated, and there should be a display of rockets from the ships in commission and the gun-boats.

The Plymouth Hoe, of great celebrity, was the best place to see this grand sight, and it was here, too, that the fireworks were to be exhibited. Consequently, towards evening, the whole of the populace en masse made towards this beautiful spot; at nine o'clock, the time appointed for the illumination, there could not have been less than 60,000 or 70,000 persons present.

At nine o'clock to a minute, at one signal, the whole of the ships and gun-boats in the Sound and harbour were lighted up as if by magic, and the effect was of the most gorgeous description. It would be impossible to describe the extraordinary brilliancy of this display. The portholes were all lighted up, and blue lights were burnt at the fore, main, and cross jack yard arms, spanker, and jibboom ends At the conclusion of the illumination there was a simultaneous discharge of hundreds of rockets from all the vessels. this our Artist has attempted to portray as a record, however, of one of the finest sights ever witnessed in Plymouth.

The display of fireworks was by Mr. LANE—a very clever local pyrotechnist. The pieces were of a very grand description, and the last produced a most imposing effect. The word "Peace" was lighted up in coloured fire, with a V. R. and crown, and terminated with a grand discharge of shells, roman candles, and a flight of one hundred rockets at one instant.

The town was only partially illuminated. The Royal Hotel was brilliantly lighted with gas. The grounds of Mount Edgcumbe and its noble owner's yacht were brilliantly lighted up with coloured fires. Royal salutes were also fired from the Earl of Mount Edgcumbe's batteries at Wilderness Point, and a great number of sky-rockets were let off.

Mount View, the delightful residence of Mr. William E. Kendle, was also illuminated with brilliant lights, and a great number of rockets and other fireworks were discharged from the grounds.

Fireworks were also let off at Mannamead, accompanied by a bonfire.

Bovisand was also illuminated, and bonfires blazed away on many of the surrounding heights.

The whole passed off exceedingly well. There was not a single accident nor was there a single charge before the magistrates. Great credit is due to the worthy Mayor of Plymouth for carrying out all the various arrangements of the day.

THE PEACE COMMEMORATION AT PORTSMOUTH.—THE BONFIRE ON THE BEACH.

THE PEACE ILLUMINATION: THE FRENCH EMBASSY, ALBERT-GATE.

RIGHT HON. LORD PANMURE'S (MINISTER-AT-WAR), BELGRAVE-SQUARE.

THE PEACE ILLUMINATION: STRAND.

CALENDAR FOR THE WEEK.

SUNDAY, June 8.—3rd Sunday after Trinity.
MONDAY, 9.—St. Anthony. Jerusalem besieged, 1099.
TUESDAY, 10.—Oxford attempted to assassinate Queen Victoria, 1840.
WEDNESDAY, 11.—St. Barnabas. Roger Bacon died, 1294.
THURSDAY, 12.—Wat Tyler killed in Smithfield, 1381.
FRIDAY, 13.—Battles of Naseby, 1645; Marengo, 1800; Friedland, 1807.
SATURDAY, 14.—Battle of Saragossa, 1809

TIMES OF HIGH WATER AT LONDON-BRIDGE, FOR THE WEEK ENDING JUNE 14, 1856.

# THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, JUNE 7, 1856.*

For some weeks past our American difficulties, which many people thought so lightly of at first, have been assuming a more and more complicated and threatening aspect; and the latest accounts represent that the Government of Washington has dismissed the British Minister. We suppose that our Government will return the discourtesy by dismissing Mr. Dallas. But the mere fact of the suspension of diplomatic relations, though it generally precedes a war, does not of necessity create one. In the present state of the question the presence of Mr. Crampton at Washington served no good purpose. Too generally Ambassadors are expensive superfluities, if they are nothing worse; for it seems to be the fatality of our English diplomatic agents, if they rank higher than Consuls, to do more harm than good, and to stir up strife instead of preventing or allaying it. There scarcely needed this last act on the part of President Pierce to show that the American Government has resolved upon steps which will completely alter the conditions of the case upon which so much diplomatic ingenuity has been lavished to no purpose. The true construction of the Clayton-Bulwer Treaty, which we had offered to submit to arbitration, becomes unimportant in face of recent facts which utterly supersede that document. The recognition by President Pierce of Walker and his band of freebooters and "Filibusters," as rulers *de facto* in Nicaragua, and the reception of Padre Vijil as their envoy and representative, at once dispose of the question as to "occupying or colonising" in Central America. General Walker and his colleagues are North Americans, subjects of the United States, and their perquisition of territory in Nicaragua and Costa Rica can only end in one way to add, one day or other, to the stripes and stars of the Union flag. This consummation seems to be inevitable. The first irruption into the devoted territory has been successful; and under favour of the Presidential recognition the invading bands will swell to an irresistible amount—irresistible at any rate by any force which the present occupants may be able to bring against them. The population of all the Central American States does no. amount to two million souls; that of Nicaragua and Costa Rica combined reach but half a million. Is it to be supposed that such a small family can successfully maintain their ground against the tide of emigration setting in from the north and west, influenced by that doctrine of "manifest destiny" which, according to the treasured creed of the governing faction of America, assigns all the territories of the New World to the federal rule? The contest is too unequal to admit of an instant's doubt or a protracted solution; and the question now is, what her England, in her admitted rights and legitimacy, shall feel herself called upon to oppose with arms what she has vainly endeavoured to prevent by diplomacy? Should she do so the contest may be prolonged, but the ultimate issue will be the same.

It may be suggested that there is an intermediate course open to us which might make us participator in the fruits and advantages of the new movement, and, at the same time, moderators of the struggle and defenders of the interests of humanity; but to adopt this policy the Clayton-Bulwer Treaty must not only be abandoned, but its provisions must be reversed. But now again, the question arises whether the present or any future Government in America would consent to our participation in a policy which the Americans consider to be exclusively American? We think not; and for this, if for no other reason, that a careful consideration of the negotiations which led to the Clayton-Bulwer Treaty, and of the correspondence which has since taken place in reference to it, betrays a deliberate intention on the part of the American Government to exclude Great Britain from all pretence to such participation by the very operation of the treaty itself. What else is the meaning of Mr. Buchanan's pointed reference to the Munro doctrine—that "the American continents, by the free and independent condition which they have assumed and maintained, are henceforth not to be considered subjects for future colonisation *by any European Powers?*" It is true that Lord Clarendon retorted upon this declaration by stating that "it could only be viewed as the dictum of the distinguished personage who delivered it." It may be so viewed by European diplomatists; but on the other side of the Atlantic it is looked upon by a whole people as a religious ordonnance; and time may prove it to be "a great fact." Englishmen must be dull of comprehension, indeed, if they fail to perceive the drift of such a passage as the following, addressed by the same American Minister to the Foreign Secretary of her Majesty, explaining the secret motive with which the United States signed the Clayton-Bulwer Treaty.

Mr. Buchanan writes, May 2, 1851:—"The British statement seems to attach considerable importance to the fact—but why, it is difficult to conceive—that 'Mr. Buchanan, in his statement, observes that Ruatan was occupied in 1850 by Great Britain.' It was for the very reason that not only Ruatan but nearly the whole eastern coast of Central America, were occupied by Great Britain, *that the Government of the United States were so anxious to conclude a convention requiring her to withdraw from this occupation.*" In anticipation of the obvious objection that this policy ought to have been avowed, and the title of Great Britain to this island "formally contested" at the time of concluding the convention in 1850, he very candidly says:—"*Such a course could only have produced useless irritation. It was sufficient for them to know that Great Britain, being in occupation of it, no matter by what title, had agreed to withdraw from this occupation.*"

These circumstances, we think, should be sufficient to convince the people of England that if they are to maintain their own, or influence the destinies of others, in Central America, diplomacy is unequal to the task.

We are convinced that the Enlistment question was kept alive by the American Government, not for its independent merits, but in aid of the more important and ambitious schemes now in course of development in Nicaragua. We are not at all surprised, therefore, that General Pierce, having treated with neglect, almost contemptuous in character, the sundry and ample apologies which our Government has tendered for any unintentional breach, by any authorised or unauthorised agents of Great Britain, of the neutrality laws of the United States; should have expelled our Minister from American territory. Such a step, upon the whole, is not to be regretted. A total cessation of diplomatic relations is better than such relations continued in a disingenuous and unfriendly manner. Still the breach being thus once opened, though upon a comparatively indifferent matter, the quarrel may be improved at leisure, and the designs of the Monro-Walker party carried out with the less remorse or hesitation. Mr. Crampton, the latter part of whose mission has been carried out under difficulties and affronts of no ordinary character, has been charged by Mr. Clayton with misstatement as to certain admissions said to have been made by the latter in reference to our possession of the island of Ruatan, which, though we have no doubt it will eventually be satisfactorily met and refuted by our representative, adds painfully to the difficulties of the position.

In conclusion, we must warn our readers against attaching much importance to a suggestion industriously set up by a portion of the press, both in this country and in America, that these disputes are only electioneering "moves," to influence the Presidential election, and that when this is over General Pierce will silence the trumpets of alarm, cast aside his war paraphernalia as he would the "properties" of a theatre, adjudicate Enlistment quarrel, the Clayton-Bulwer differences, the Central America question, and all other subjects of dispute as mere "humbug," and, in the most amicable manner, according to accustomed diplomatic form. We are convinced that the matter is far more serious, and that even if this country should be drawn into war, and be the victor in it, as we are certain it would be, the United States would sooner or later possess all those territories in Central America which they covet. A bold assertion of such claims may avail the cause of General Pierce in the coming contest for the Presidency; but the aggression is too flagrant and the object pursued are none the less the acts of a lawless and dishonourable band of the American people.

It is an old complaint against the Court and aristocracy of England—a complaint as old as the days of the Stuarts—that they prefer foreign to native genius, that talent from agencies from the dispensers of patronage is to be German, Italian, the way to neglect to be an Englishman. The grievance is, in many instances, unfounded and unjust, it has too often been warmly and justly felt. Undue preference has repeatedly been given to men of inferior talent, for no other reason, that the world could discover, than the fact of their foreign birth, aided, perhaps, by their possession of some conversational abilities considered them welcome guests at the tables of leading aristocratic and courtly personages. There ought, in a great and free country like ours, to be no objection to a man because he is a foreigner. Such an objection would be a liberal and unworthy; but, for the very same reason, though perhaps with greater force, there ought to be no objection to a man because he *is not* a foreigner. At the present time we have many, both Britain, for the Bust in Marble, from Italian sculptor [illegible] the genius, into whose hands all the most valuable commissions are thrown, and a German intermediary for the Britannia. We [illegible] here, to be [illegible] Mr. Gibson, who has a reputation in his profession, a genius and talent to [illegible] instances; and to [illegible] the name of [illegible] became those who have the management; and [illegible] of literature are more [illegible] than [illegible] own countrymen. To be a celebrated Englishman is a needless passport to high society in England, but to be a celebrated foreigner—and conferred in a far less degree is an almost certain passport to the good graces of the tables, and to the patronage of the highly-born. The great body of English sculptors, conceiving [illegible] patronage ment has been thrown on their [illegible] and [illegible] have been deprived by favouritism of the fair opportunity of gaining their daily bread, have addressed a very temperate and dignified remonstrance on the subject to Sir Benjamin Hall in his capacity of Minister of Public Works. In this remonstrance, which we have elsewhere inserted, they state their case in a manner that is certain to enlist public sympathy and approval, though they may not convince the courtly or influential personages whose conduct is impugned; or those few journals which uniformly make success the test of merit, and write up the men whom fashion delights to honour. A dead man of genius is always highly esteemed by the English nation; but a living man of genius, unless he be a foreigner, stands a chance of being neglected, if not starved, unless he have a sufficient private fortune to raise him above the necessity of entering into the lists as a competitor in the keen struggle for subsistence. The evil is deeply rooted, and descends into lower strata of society than those which dispense patronage. It is difficult to remedy this state of things; but there is no difficulty in giving native genius an equal chance with the genius of Italy or Germany, in the manner suggested by the sculptors with reference to their own art. In addition to this, courtly and aristocratic example could do much to cure the evil which it originally caused; and it could not make a better beginning than by recognising the fact that England is not utterly devoid of painters, sculptors, and authors. The highest art never was, and never will be, recognised on commercial principles. It does not and cannot appeal to the taste of the multitude, but to something higher and better; and it is the duty of the Court and of the aristocracy, exercising the influence they do, to exercise it so as to improve, and not to degrade, the popular taste; to foster the merit which is beyond its age; and to seek out and encourage such men as only need to be sought out and properly rewarded to reflect honour on their age and country.

HER MAJESTY'S THEATRE.—The performances for the week are of a varied and interesting kind. To meet the great demand for places two additional nights have been added, so that performances will take place every night in the week except Wednesday. Monday, "Lucrezia Borgia," with Albertini and Baucardé; Tuesday, the fascinating Piccolomini; on Thursday, the united talents of Albertini and Alboni; on Friday the performance is to be of a varied character; and Saturday is reserved for an event replete with interest to the artistic world—for the first appearance of Mdlle. Johanna Wagner.

## *THE COURT.*

THE Court has been extremely gay during the week. The Drawingroom in celebration of her Majesty's birthday on the 29th ultimo was followed by a State concert on the succeeding day, to which the foreign ministers and the elite of the nobility were invited. On Saturday the Prince [illegible] the festive season of a "Stranger's Dinner to Africa [illegible] and East and Africa," about to be erected, under the patronage of the East India Company, in the West India Dock-road. The Regent of Baden, on the same day, visited the Crystal Palace, and Prince Frederick William of Prussia called on the Ambassador of France at Albert-gate House. In the evening the Queen and Prince Albert, with their illustrious guests, honoured the Royal Italian Opera (Lyceum) with a visit.

On Sunday the Queen [illegible] Princess, with the four elder of the Royal children, attended Divine service in the private chapel of Buckingham Palace. The Duke of Oldenburg, Prince Frederick William of Prussia, and the Regent of Baden were [illegible].

On Monday the Queen and [illegible] accompanied by their illustrious guests, held a Council of the College of Physicians. On Tuesday a Court, at which Lord Wodehouse, the Queen's [illegible] and Minister Plenipotentiary to the Imperial Court of [illegible] were presented to her Majesty and had an audience of her Majesty and [illegible]. In the evening the Queen and Prince Albert, with [illegible] Princess of Prussia, honoured the Princess [illegible] with their presence.

On Wednesday [illegible] Lady Macdonald and Major-General [illegible] had the honour of dining with the Queen and Prince Albert. The Duke of Gloucester, the Regent of Baden, and the Prince Frederick William of Prussia, visited the Royal Academy of Arts, and the Prince of Wales and the Princess Royal, accompanied by the Duchess of Sutherland, Lady Caroline Barrington, and Lieutenant-Colonel [illegible], visited the Polytechnic Institution. The Royal party returned to Buckingham Palace to dinner, at which the Queen had a small number of friends present.

On Thursday [illegible] the fancy dress ball of the Artists' Benevolent Fund was held at the Freemasons' Tavern, Great Queen-street, Lincoln's-inn-fields. The Queen and Prince Albert honoured the Royal Academy with their presence on the occasion of the annual banquet.

On Friday [illegible] Lady Augusta Stanley, Lady Caroline Barrington, and Lieutenant-Colonel [illegible] had the honour of dining with the Queen and Prince Albert at Windsor Castle.

Lady [illegible] and the Marchioness of Ailsa as Lady in Waiting to the Queen [illegible] Lieutenant-Colonel Bereseford, Dramatic Lieutenant-Colonel [illegible] Major-General Sir [illegible] Bart., and Lieutenant-Colonel [illegible] had the honour and Grand Dining with the Queen and Prince Albert.

On Saturday [illegible] Majesty's birthday was [illegible] postponed from Thursday, the 29th ult. to this day, in consequence of the [illegible] Prince of Wales. The [illegible] were [illegible] Majesty and Prince Albert, [illegible] Princess Royal, [illegible] Princess Alice, and Prince Alfred. The Queen and Prince Albert [illegible] with much enthusiasm.

The Marchioness of [illegible] Lady in Waiting to her Majesty, [illegible] Lieutenant-Colonel [illegible] Major-General Sir [illegible] Bart., and Lieutenant-Colonel [illegible] had the honour and place.

[illegible] Council was held [illegible] by the Queen at Buckingham Palace, on Monday, [illegible] Majesty [illegible] Council, [illegible] Royal Highness Prince Albert, [illegible] Royal Highness Prince [illegible] Royal Highness Prince [illegible] Royal Highness Prince

## NOTES OF THE WEEK.

LONDON—luckier than Lyons—finds that the floods are subsiding. The immense crowd which surged up to town for the festivities of last week has dispersed, and the English language is again the prevalent sound in our streets, where, up to Friday last, the ear was assailed by every dialect with which the provinces can afflict it. The fireworks might went off very passably; and Sir George Grey's obliging hope that the great mass of the people would be so much amused that they would do less damage to property than usual was realised. Windows were not broken, and wherever the "roughs" essayed to create a disturbance the people reduced them to order. Everybody admits that he was disappointed with the firework display, as a whole; although there were several beautiful specimens of rockets and other aerials, and although one burst was very imposing indeed. The spectacle was felt to be long and monotonous, and every one was glad when it was over. The illuminations were in many instances fine: people who had nothing to say for the peace lit up for the Queen, and did it well. One nobleman's house was a perfect blaze—the humour states that the gas was consumed there at the rate of nine shillings per minute. But there was little originality—the star of Brunswick was everywhere exhibited, chiefly, perhaps, because the design could not be construed into anything connected with the peace. We wish we could add that there had been no accidents; but the fall of the rocket-sticks caused death in one case and blindness in several; and two unfortunate children, whose brutal parents had fastened them to a bed-post, locked them up, and gone off to the show, were burned to death. The crowds behaved very well, and the crushes were exceptional and tolerably harmless. Unlucky people who intended "to see everything," and to that end got into vans and carriages, to ride about the metropolis, were in many instances bewalmed in a "jam" of other vehicles, and had excellent opportunity of seeing the effect of Friday's muster. But, as no one is advertised for in the second column of the *Times*, it is reasonable and satisfactory to hope that every one turned up at last. And so endeth the record of a not very satisfactory rejoicing for a very unsatisfactory pacification.

The news from America is of a mixed character. We are assured by the American press that General Pierce is a President so obstinately bent upon going wrong, for the sake of the elections, that he will do everything in his power to promote war. But, on the other hand, we are told that the real heart of American and all the mercantile influences are opposed to so wicked and ridiculous a course. And we are almost asked to keep our tempers, to let the General do his blatant canvassing, and to take as little notice as we can, for that, as soon as the fate of the elections is settled, all will be quiet again. We can perfectly well afford to take this course, if necessary; but even electioneering has its limits. Our representative, Mr. Crampton, is to be dismissed; and Walker, who has been solemnly denounced, by leading statesmen, in the American Congress, as "a buccaneer and a ruffian," has been recognised by General Pierce in a way whose hollow shuffling has called forth the derisive laughter of the whole Union. Well, we can bear even this; and unless the Costa Ricans catch Walker and hang him, which is a thing not to be hoped than expected, we can look calmly on, and see him elevated to the rank of a hero. If such forbearance will conduce to the preventing the crime as a civil war, in which light all who speak English must regard a war between England and America, most assuredly it is our duty to exercise it. We only hope we may be permitted to smile, should Mr. Pierce's unscrupulous manœuvres fail after all, and his party should be suddenly prostrated by an indignant exertion of the strength of the real American people.

The unanimity and rapidity with which Palmer's jury decided on his guilt has been made known. On retiring they agreed not to discuss the question, but each juror was to write his verdict separately. Every paper bore the fatal word. We regret to see that the Journals continue to pile little petty details of the miscreant's behaviour and conversation, which, like the words of a martyr, they could be edifying to the world. His execution is fixed for Saturday, the 14th. Hired advocacy clamours for delay and reprieve; and one or two of the new lights of journalism, who take the Manchester view of war and the maudlin view of crime, plead for the poisoner in verses so bad as to be almost worthy of the theme. There is not, however, the faintest probability of a righteous example being delayed an hour beyond the time fixed; and sentimentality must look out for another criminal object of its cares. The logic of such poetry as

> Why, if he is callous,
> Send him to the gallows!

(we imitate, in default of quite accurate memory of the original strain) will scarcely move Sir George Grey to outrage the instinct of the nation by sparing this villainous and cold blooded assassin. We may add that the correspondence between Dr. Alfred Taylor and Mr. Henry Mayhew, upon the subject of the charge brought by the former against the latter, at the trial, has ended, for the present, in Mr. Mayhew being referred to Dr. Taylor's solicitors. As Mr. Mayhew disclaimed all hostile intention to say duelling—intentions, and merely demanded the explanation not usually refused by gentlemen, the final step seems a little abrupt.

Parliament made holiday in the middle of last week, and has not done much since its reassembling. The Wensleydale Peerage affair has been settled by a compromise, which is designed to relieve the appellate jurisdiction of the Peers from some of the ridicule to which it is at present exposed. Two Peers for life are to be created, Lord Wensleydale being, of course, one, and they are to sit as Deputy Speakers of the Lords, and to hear appeals. Their salary is to be £6000 each, but they are to work for it, for the House is to be supposed to sit, in their venerable persons, at the time when the other peers are in the country or on the Continent. Some amusing discussions took place in reference to the Scotch appeals, Lord Aberdeen stating that English lawyers knew nothing of Scottish law, and among the replies being one to the effect that the Scotch knew this, but were perfectly satisfied with such a court of last resort, and, therefore, that alteration was unnecessary. Except that Lord Palmerston has indulged himself in an elaborate philippic against Greece, her King, and her people, whom he slashed into in a style that reminded one of the Don Pacifico days, and except that Mr. William Williams has been more than usually ridiculous in his cavils at expenditure, the Houses have not presented much matter for note. They counted out on Tuesday, and the list of those who were counted shows what a curious *residuum* it is that sticks to the benches on such occasions, and makes a grievance afterwards of the fact that practical men declined remaining to be unprofitably bored.

The remonstrances of the English sculptors against their expected exclusion from competition for the most important of our national memorials is at once liberal and dignified. They disclaim any of the cant about "native talent" and "foreign encroachment," upon which indignant "Englishmen," "Patriots," "British Lions," and other blockheads, descant in forcible feebleness; and they declare, at once, that art has no country, and that excellence is its test. But they aver that the excellence required in this particular department is close at hand; and that, when an English Government demands sculptural talent, it ought to ascertain whether it is not to be found in England, instead of ignoring the very existence of artists at home. This is surely sensible and reasonable. A national work should be thrown open to the competition of the whole world of art. Nothing can be better than the example that was set at Lille. A splendid new cathedral is to be erected there. The authorities drew out the most complete and workmanlike papers of instructions, in which all that an architect could require to know was stated, and they threw the thing open to the world. Designs, with sealed-up mottoes, were sent in from all parts, and the award was made in favour of an English architect, who is to build this Catholic cathedral; and the second award was a prize to the next best competitor, also an Englishman, a French architect coming in third. Let us adopt this course, and artists will no longer have reason to complain.

## *METROPOLITAN NEWS.*

THE STRANGERS' HOME.—On Saturday last his Royal Highness Prince Albert performed the ceremony of laying the foundation-stone of an institution, partially charitable in its object, for the reception of natives of India, Arabia, Africa, China, the Straits of Malacca, the Mozambique, and the islands of the South Sea. [We shall give an illustration of this ceremony next week.]

BANQUET AT THE MANSION-HOUSE.—The Lord Mayor and Lady Mayoress gave a grand banquet on Wednesday evening in the Egyptian-hall to the Archbishop of Canterbury, the bishops, several members of both Houses of Parliament, and a large number of the parochial clergy connected with the City. The Lord Mayor, in proposing "The health of Lord John Russell, and prosperity to the city of London," said there was no one who had done more service to the Church and State than the noble Lord; and he believed there was no public man who would hand down to posterity a purer name, or whose memory would be held in greater respect, as a statesman and a patriot (Applause). Lord J. Russell returned thanks; and, having referred to the great success which the city of London had conferred upon the commerce and civilisation of the country, he said that no one had ever filled the office of chief magistrate of the City with greater dignity, zeal, and efficiency than the present Lord Mayor. The city of London had enjoyed the privileges as a corporate body for many years, and there were those who thought that its rights and immunities ought to be swept away; but he ventured to express a hope that it would long remain the conservator of public liberty, and that it would show that, while it was not opposed to all needful reforms, such changes would only tend to make it more in bearing with the progress of the age.

ROYAL WESTMINSTER OPHTHALMIC HOSPITAL.—On Tuesday last the annual general meeting of the governors and friends of this institution was held at the hospital, Charing cross; the Marquis of Westminster in the chair. A resolution was proposed by Earl De Grey, and seconded by the Earl of Strafford, to the effect that a special fund be set apart for the perpetual maintenance of a ward to be called the Guthrie Ward, as a tribute to the memory of the late Mr Guthrie, the founder of the institution. After some little discussion relative to the mode, in detail, the resolution, which was supported by Colonel Wood, the Dean of Hereford, Major-General Brooke, and others, was agreed to. The annual report of the committee, which was then presented, stated that the hospital had still two wards closed, and the committee were therefore obliged in many cases to refuse patients from all parts of the country. The house had been supported at an expense of £821 12s. 3d. for the ending 31st December, 1855, leaving a deficiency of income for the current year amounting to £17 10s. 10d. From the year 1817 to the 1st of January, 1856, 110,641 persons had availed themselves of the benefits of this charity, 3298 had been restored to sight by operations for cataract, and the formation of an artificial pupil; the appearance of 4093 persons had been improved by the operation for the removal of opacities, and 1938 persons had been admitted to the benefits of the hospital during the past year, of whom 184 were in-patients.

THE ROYAL CALEDONIAN ASYLUM. The annual festival of the Royal Caledonian Asylum, at Holloway, was celebrated on Tuesday evening at the Freemasons' Tavern. The Duke of Cambridge occupied the chair; and the more select company at the upper end of the table included the Earl of Eglinton, the Duke of Wellington, Lord Colville, Lord Dalkeith, the Duke of Buccleuch, the Hon. Captain Murray, Colonel Matthison, Colonel Moncrieff, Sir A. Alison, Mr. P. Robertson, M.P., Mr. D. Baird, M.P., Sir G. Clerk, Bart, Sir C. Lyell, and a number of Highland gentlemen arrayed in their gay national costume. His Royal Highness, in proposing the "Army and Navy," bore a strong testimony to the great merits of Sir Colin Campbell as a warrior, and especially eulogised the gallantry of the Highland regiments in the Crimea, who marched up the heights of Alma as if merely going to parade. The Duke of Wellington returned thanks for this toast. The boys and girls of the asylum were then introduced amid a deafening flourish of bagpipes; they included the children of Alain Crimean soldiers (some of them born in the Duke's own regiment), and, on the entrance of the latter, a roll of muffled drums was very significantly commanded. His Royal Highness strongly urged the claims of the charity upon the public. The subscriptions amounted to about £800

THE PRINTERS' ALMSHOUSES.—The new Asylum at Wood-green, Tottenham, will be opened on the 11th instant, on which occasion there will be a public breakfast, at which Earl Stanhope, who laid the foundation-stone, will preside. We trust, however, that this much needed asylum has been completed, and the difficulties which have hitherto retarded its progress are all removed, that it may be vigorously supported.

THE ASHBURNHAM AMERICAN FLOWER SHOW.—The private view of the International collection of American plants took place on Wednesday, in the grounds of the Ashburnham-park, adjoining the Royal Pavilion, Chelsea, and, even in the cold sunless state of the atmosphere which prevailed, the numerous company assembled in the spacious tent evinced their appreciation of the beautiful display. The exhibited effort of Mr. Simpson, and of the Messrs. Veitch, of Exeter and Chelsea, consists of a fine display of rhododendrons and azaleas, of every variety of form and colour, arranged with great taste in a pavilion 300 feet long and 95 feet wide. Some of the standard plants are of great age and size, and such as are rarely to be seen. The late Mr. Michael Waterer was the first to introduce these beautiful plants, and, therefore, the perfection of the fully-developed plants in the collection of Mr. Waterer, of Knap-hill, must be pronounced unrivalled. The exhibition has been thrown open to the public, and the lovers of flowers will here find one of the greatest treats that has been afforded for many years. Among the more distinguished visitors at the private view were her Royal Highness the Duchess of Cambridge, the Princess Mary, the Duke and Duchess of Mecklenburg, the Duke of Sutherland, the Countess of Derby, the Countess Waldegrave, Lady Willoughby d'Eresby, Lady Belcher, Lady Overstone, Lady Mary Olive Lacy, Beauclerk, Lady Anstruther, &c.

ABOLITION OF CAPITAL PUNISHMENT.—A meeting, adjourned from Knight's-hall-Hotel, was held at the London Tavern on Monday last. Mr. David Chinn, J.P. in the chair, which was attended by some very stern advocates; and, after some deliberation, resolutions were passed, and a committee formed, for the formation of a National Society for Total Abolition of Capital Punishment by Death.

INSTIGATION TO SUICIDE.—An inquest was held on Tuesday at the Eight Bells, Cross-street, Blackfriars, respecting the death of a woman whose name was unknown. The particulars of the case appeared in our last publication. The deceased jumped from Londonbridge into the Thames on the morning of the 27th ult. She was with a man named William May, and one of the witnesses heard the man say, "Jump over, and I will follow you." The deceased did jump over and was drowned. She was intoxicated at the time, and May appears to have been also. The jury returned the following verdict:—"That the deceased woman committed suicide *felo de se*, and that William May was an aider and abettor to the act."

FIREWORKS AT WOOLWICH. The remnants of the fireworks exhibited in London are returning to Woolwich in waggon-loads night and day. As soon as the whole has been distributed, there will be a last interesting refitting for the entertainment to be given on Woolwich-common. The authorities have not yet fixed upon the day when the Woolwich festival will take place. The scale of proceedings will be equal to that exhibition in either of the London Parks, in all its variety, with the exception of an unimportant reduction in the standing pieces there exhibited. The laboratory departments will be reduced to the ordinary peace establishment. Consequently upwards of 300 men and boys have received notice of discharge.

THE PARKS ON SUNDAY.—In the Regent's-park last Sunday afternoon a band of military performers, conducted by Mr. F. Pierce, played from four to six o'clock p.m. From 20,000 to 40,000 people were present, among whom were Sir John Shelley, M.P., Sir Joshua Walmsley, M.P., Sir H. Hoghton, M.P., Mr. [illegible], &c. The greatest order and decorum prevailed. The [illegible] their arrival and departure were greatly facilitated by [illegible] public promenade in Hyde park and Kensington gardens [illegible] appearance on Sunday last. Sunday [illegible] by a private hand, as on the previous Sunday, nor any disturbance whatever. The weather was remarkably fine, and great numbers of people, including a large proportion of the higher classes, thronged the walks along the Serpentine and in the gardens, but no circumstance occurred to interrupt the common enjoyment, and the excitement consequent on the withdrawal of the music seemed, in Hyde-park at least, to have passed away.

STRAHAN, PAUL, AND BATES.—Some time since we took occasion to draw the attention of our readers to the difference in the crimes of three persons who had been convicted, and also to the unequal way in which Sir John Paul and Mr. Strahan were the actors in the disgraceful transaction. Not only are expectations of the profits, while Mr. Bates was absent during the time their crimes were committed, and also that, in point of fact, Mr. Bates was a salaried clerk, although nominally a partner. We suggested that there was a wide distinction between the parties. We are now happy to learn that this matter has been acknowledged by the Home-office, and that the memorial presented on behalf of Mr. Bates having been referred to the Judge who tried the case, Baron Alderson, it has been intimated to the friends of Mr Bates that the difference between his position and that of his partners has been recognised, and that a mitigation of punishment may be looked for in his case, although his immediate release from captivity cannot be expected. Sir J. Paul, together with Mr. Bates, is at Pentonville; Mr. Strahan in one of the convict prisons near London; and it is thought when these two are sent to their final destination, that the clemency of the Crown will be extended to Mr. Bates, and his liberation take place.—*Dublin Post.*

WATERLOO-BRIDGE COMPANY.—The half yearly assembly of the proprietors was held Thursday at the Freemasons' Tavern; William Anderson, Esq., in the chair. The report of the committee to the general assembly of proprietors stated that the amount of tolls received for the half year ending 23rd July last amounted to £9048 8s. 2d.; while for the corresponding year it amounted to £9134 2s. 11d., showing an increase of £421 5s. 9d. There had been a further increase both on horse and foot tolls since February last to the extent of £305 2s. 2d. At the last general assembly the committee had reported that after the payment of current charges and expenses, &c, and the payment of a dividend of 4s. in the pound, there remained a balance of £1639 8s. 4d., and they had now to report, that after payment of the disbursements, providing for the interest on the company's bond debts, and making a dividend of 4s. in the pound, in February last, there remained a balance of £1094 10s. 6d. The statement of accounts showed a nearly balance in reserve—a handsome one in favour of the company—of £1094 10s. 6d. The report having been agreed to unanimously, Mr James Bird rose, and, in allusion to a circular from the chairman, annexed to that by which the meeting was convened, on the subject of a proposal which was to be brought under consideration for offering some special mark of the sense entertained by the directors of Mr. Powell's long and meritorious services, said, that having regard to the limited interest which he had in this concern, when compared with that of many other gentlemen present, it might seem invidious on his part to introduce the subject matter to which the chairman had called the attention of the meeting; if he had not been otherwise qualified, from his knowledge of circumstances for the last twenty-four years, and having been a proprietor for the four years, and having attended every meeting except one. He, therefore, felt himself somewhat qualified to make a proposition to this meeting in which he felt they would be fully borne out. He felt assured the proprietors would readily assent to it. After some few introductory remarks explanatory of the commencement of Mr. Powell's services from the year 1806 to the present time, the hon. gentleman concluded by moving the following resolution, which being seconded by Mr John Rennie, who spoke of having known Mr. Powell since he (Sir Rennie) was a boy, was carried with acclamation:—"That the sum of 100 guineas be appropriated towards a subscription for the purchase of a piece of plate, to be presented to Mr. George Powell, as a mark of the high sense entertained by the proprietors for his able and valuable services as their chief clerk and surveyor, and for the indefatigable zeal and attention evinced by him on all occasions in promoting the interests of the company during the period of his term." Several of the directors and proprietors addressed the meeting, approving of the resolution, and spoke in high terms of the conduct of Mr Powell—Mr. Harper, Q.C., M.P., expressed himself dissatisfied with the smallness of the sum proposed to be contributed, having reference to the lengthened and important services rendered by that gentleman, and hoped that the subscriptions would amount to at least £1000—Mr. James Bird said he was equally alive to the fact of the smallness of the testimonial, but he would remind the meeting that it was the principle which was involved, and not the amount of value of the testimonial, which was issued, in which it was understood that the directors and proprietors in their individual capacities contemplated increasing the amount by private subscriptions.—Mr. Powell assured the gentlemen present that their kindness had overwhelmed him, and he deeply felt the force of the saying that gratitude required a language of its own. The common words and sentiments were not sufficiently adequate to convey the feelings of a heart like his own, which was overflowing with gratitude. He proceeded to give interesting details connected with the bridge, from the moment each bridge was commenced to that of its completion, when the company with Sir J. Yorke and the great Canova, on the bridge itself, Canova observed that whether he contemplated that bridge with reference to the boldness of its design, or the correctness of the work, the structure was one which was second to none in the world. For himself he observed that it was a matter of pride to him that during his long connexion of half a century with this company, he had never made a single enemy but had, on the contrary, made many valuable and influential friendships and acquaintances—more than commonly fell to the lot of any man in any sphere of life (Loud applause).—A vote of thanks to the chairman and directors was carried unanimously. Mr. Powell received the hearty congratulations of the gentlemen present; and the meeting then adjourned to the first Thursday in August.

PRESENTATION OF LIFE-BOAT.—On Thursday a meeting of the Royal National Institution was held at its house, Johnstreet, Adelphi; Thomas Chapman, Esq., F.R.S., in the chair. The silver medal of the institution was presented to Captain Norman, R.N., inspector and founder of the Coast Guard; and also to Thomas Henwood, Coast Guard man, and Richard Johns, seaman, in testimony of their very gallant conduct in putting off at the imminent risk of their own lives in a small punt to the rescue of one of the crew of the schooner *Endeavour*, of Ipswich, which, during a gale of wind, was wrecked near the Gribbon rocks, on the Cornish coast, on the 6th ult. A reward of £2 10s. was also voted to the crews of two boats for their praiseworthy conduct in rescuing four out of eight of the brig *Reform*, of Belfast, which, during equally gale of wind, was wrecked near Shark's-head, on the coast of Galway. A reward of £2 was voted to a boat's crew of four men in connexion with the [illegible] services to the crew of five men of the brig *Eagle*, which, during a gale of wind, was wrecked in the month of the River Dee. A reward of £2 was voted to the crews of two Margate boats for putting [illegible] of rescuing two men who were upset, by bring which [illegible] never, unhappily perished before assistance could reach them. [illegible] rewards were likewise voted. The institution had now about [illegible] life-boats on the coast, and ready for instantaneous service.

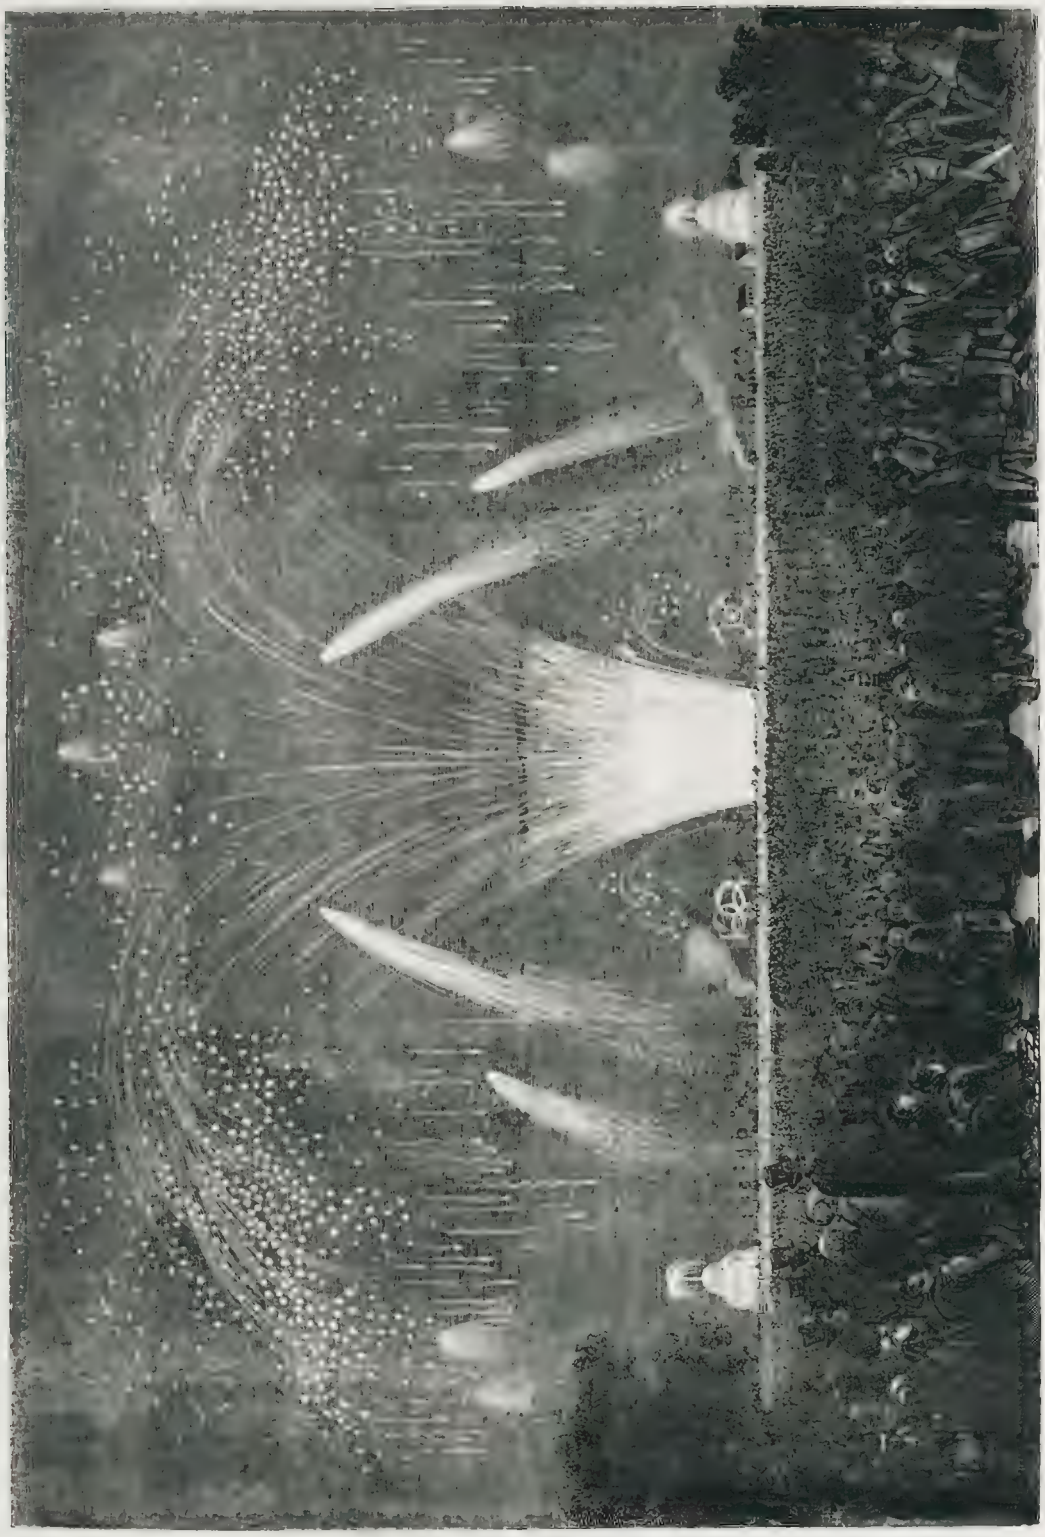
HEALTH OF LONDON.—In the first week in May the deaths registered [illegible] ing weeks they have [illegible] which shown a constant decrease, [illegible] of the week, which ended on Saturday, they [illegible] week preceding that on which the mortality rose to [illegible] to 1042 deg.; in three subsequent weeks [illegible] to 943 deg.; in the [illegible] preceding weeks of the last ten years, 1846-[illegible]

The number of deaths was 962, which, if raised in proportion to increase of population, becomes 1067. The number registered in the week was 1573; and there was an excess of 505 in the number of persons born so compared with those who died. The oldest person recorded in the returns of deaths is a widow who lived in Battersea, and had attained the age of ninety-four years.—*Registrar-General's Report.*

SATURDAY HALF-HOLIDAY AT THE POST-OFFICE.—The Postmaster-General having decided to [illegible] holiday on Saturdays to the officers of the General Post [illegible] the indulgence can be afforded without inconvenience to [illegible] which [illegible] of the metropolitan district [illegible] the [illegible] of the [illegible] will be closed [illegible] the money-order [illegible] will also be closed at the same hour [illegible] the 7th instant.

THE PROVINCIAL [illegible] ON Wednesday morning a gentleman named [illegible] Commissioners respecting the arrival of nearly the whole of the provincial swell mobsmen in London by the Great Northern and other railways during the last few days. It appeared that, acting upon information received from the Liverpool police, several of the most desperate of the gang were apprehended, and sent to gaol for long periods of imprisonment for their unlawful doings. This determination of the magistrates became known to the principal members of the fraternity, who called a meeting, at which it was unanimously agreed to proceed to London for a few months, for a change of air and scene. The chief portion of the fraternity [illegible] last in time to witness the illuminations and fireworks, where they reaped a rich harvest, and gave a fine account of their success.

MR. DUNN AGAIN.—Mr. Dunn, the person so well known to the public in connection with his perfunctorious pursuit of Miss Burdett Coutts, the wealthy heiress, made his appearance in Marlborough-street Police Court on Wednesday, and, addressed Mr. Bingham, the [illegible] magistrate, said he was [illegible] and [illegible] lengthened nature against a lady [illegible] court, Miss Burdett Coutts. His charge against the lady was, that for [illegible] years she had persecuted him in every conceivable way, had got him turned out of eleven different lodgings, and, lastly, had caused him to be arrested by a lunatic fresh from a lunatic asylum, and with a loaded blunderbuss, and, lastly, had entered into a conspiracy with his present landlord and landlady to get him turned out of his Pimlico lodgings. It was this last piece of persecution which had induced Mr. Dunn to come forward and to ask the magistrate to grant him a warrant or summons against the lady in question.—Mr. Bingham, who appeared to be quite aware of the antecedents of the unsuccessful fortune-hunter, said, as the alleged persecution had occurred in Pimlico, that place being out of his district, the application must be made to the Westminster Police Court.—Mr Dunn then stated that this court was the proper tribunal to apply to, as he was sure the lady resided within the jurisdiction of the court, and having argued the point at some length concluded by asking for a warrant or summons.—Mr. Bingham: I decline to issue either.—Mr. Dunn (angrily): Then I'll have a criminal information against you.—The applicant then quitted the court in high dudgeon.



THE PEACE COMMEMORATION—THE FIRE-WORKS IN VICTORIA PARK—SEE PAGE 611

THE HOUSE OF LORDS SITTING AS A COURT OF APPEAL

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—FRIDAY, MAY 30.

The motion for going into Committee on the Peace Preservation (Ireland) Bill gave rise to a preliminary conversation, in the course of which numerous comments and explanations touching the operation and working details of the measure were offered by Lord Donoughmore, the Earl of Beseborough, Lord Campbell, Lord Redesdale, the Earl of Wicklow, Lord St. Leonards, the Marquis of Clanricarde, and other Peers. The motion was then agreed to, and the bill passed through Committee, a provision being added limiting the duration of the measure to five years.

The Appellate Jurisdiction (House of Lords) Bill was read a second time, on the motion of the LORD CHANCELLOR, and after some considerable discussion.

### HOUSE OF COMMONS. FRIDAY, May 30.

THE MILITIA.—On the motion that the House on rising should adjourn until Monday, Colonel GILPIN called attention to the conditions under which the militia regiments were to be disembodied, and the various amounts of bounty, pay, and allowance which the Government had granted to the paymasters and non-commissioned officers of that service. He contrasted the conduct pursued towards the militia with the terms proposed to the men and officers of the several foreign legions, and complained that the former were treated much better than the Englishmen.—Complaints of similar tenor were urged by Colonel DUNNE and other members, and elicited a reply from Mr. F. PEEL, who explained in detail the [illegible] adjustments both of the disembodiment of militia regiments and the [illegible] of the principles on which the Government had acted in the several cases.—The subject was resumed, and pressed upon some [illegible], and after further explanation given by Lord PALMERSTON, the discussion ceased, and the motion was agreed to.

CANADIAN [illegible].—Mr. [illegible] moved for leave to bring in a Bill to amend the Constitution of the Province of Canada. Mr. BOUTBIER explained the nature and motive of the proposed measure, which he described to be [illegible] in the constitution of Canada. In [illegible] upon the system established by the [illegible] which would follow, and the consequent benefits which would result from the reforms which he proposed, which would [illegible] the wants and ideas of modern society. Private halls to which Dissenters were admissible were also sanctioned by the measure, but the establishment would be left to the discretion of the governing bodies.—Mr. WALPOLE, without opposing the measure, argued that the merits and deficiencies charged against Cambridge University were much exaggerated. Referring upon the great improvement accomplished during the last thirty years, by the internal action of the University itself, and citing many names of distinguished men who had received their education within its walls, he urged the expediency of leaving the colleges, as far as possible, unhampered by any interference, and free to carry out the reforms which had been so well begun. The bill, he argued, should be rendered permissive rather than coercive. Mr. POLLARD URQUHART supported the bill.—Mr. HEYWOOD remarked upon the antiquated and obsolete design of various collegiate endowments.—Mr. J. G. HUBBARD expressed a high admiration of the principles on which the existing system of university education was based.—After a few words from Mr. WIGRAM, the House resolved itself into Committee on the bill, and progressed to discuss the amendments proposed to various [illegible] clauses. Upon resuming [illegible] the House was [illegible] the Chairman [illegible] progress.

### HOUSE OF LORDS. MONDAY

The Fire Insurance Bill was read a third time and passed.
Several bills on the table were forwarded a stage.

### HOUSE OF COMMONS.—MONDAY.

MOLDAVIA AND WALLACHIA.—In reply to a question from Mr. Roebuck Lord PALMERSTON said that no commission had been appointed by the Porte, consisting of Russians, to fix the present position of Moldavia and Wallachia, but each of the Powers had appointed parties to make report for its own satisfaction; but he could not lay the report of the British Commissioners on the table, for it might never be acted upon in any way.

STATE OF GREECE.—On the order of the day for the House resolving itself into a Committee of Supply—Mr. [illegible] called attention to the state of Greece [illegible] to its debt, and to the system of brigandage [illegible] throughout the country, calling for the production of [illegible] and urging the necessity of immediate attention to the report to enforce [illegible], and said Kin[illegible] to his own disposition of a petty Government, and [illegible] to the people the benefits of an honest Government.—Lord PALMERSTON said he was sorry that brigandage was not put an end to by the occupation of Greece by French and English troops. The fact was that the executive Government, even since the accession of Prince Otho, had [illegible] to get rid of the check of constitutional [illegible] by indirect means. It was, nevertheless, difficult to [illegible] the subject, for the guarantees for the [illegible] being [illegible].

The House then went into Committee of Supply, and the Civil Service Estimates were proceeded with.

STATUTE LAW COMMISSION.—The vote of £1931 for the salaries and charges of the Statute Law Commission led to some considerable discussion, its mode of procedure having been impugned by Mr. WATSON and other learned members, who contended that its first duty should have been to repeal all obsolete and sleeping statutes; while it was, on the other hand, defended by Sir F. KELLY, who said that some of the results of its [illegible] had already been followed by others until the object in view should be secured. Ultimately the Committee divided, and the vote was carried by [illegible].

[illegible] session, the House resumed, and [illegible]

PRESENTATION.—Mr. J. FERGUSON [illegible] the adjourned [illegible], the Parochial Schoolmasters Bill, while he [illegible] of the bill of Lord Advocate was very much misunderstood in Scotland, or it would not have met with the opposition which it had experienced.—Mr. C. [illegible] said he would say [illegible] to the second reading of the bill, but he would not divide the House upon it at its present stage. Unless some very serious alteration was [illegible], however, made in its provisions he would oppose its going into Committee.—Mr. BLACK supported the bill. After some further discussion the bill was read a second time.

### HOUSE OF LORDS. TUESDAY.

ARTILLERY [illegible] going into Committee [illegible] the Earl of [illegible] made no proposition [illegible] Scotland. The [illegible] jurisdiction, [illegible] Scotland was [illegible] the bill [illegible] would have [illegible] Derby [illegible] and [illegible] Scotch [illegible] the bill [illegible] matters [illegible] as reported to the House.

### HOUSE OF COMMONS.—TUESDAY.

In the Commons there was no sitting, only thirty-eight members being present at four o'clock.

### HOUSE OF COMMONS. WEDNESDAY.

TENANT-RIGHT [illegible] second reading of the Tenant-Right [illegible] Moore, who briefly enforced the necessity [illegible] ans for interposing between the legal rights of landlords and tenants in the sister kingdom.—The motion was seconded by Mr. Maguire, and a division, being at once taken, the motion was carried by a majority of 88 to 59—29. The bill was then read a second time, and ordered for committal on Wednesday next. The Scientific and Literary Societies Bill was committed pro forma.

DISSENTERS' MARRIAGE BILL.—The Dissenters' Marriage Bill was passed [illegible] Moore, who briefly enforced some of the working clause by which it is [illegible] use by which it is [illegible] that notices of [illegible] registrar's office [illegible] The [illegible] ing into Committee on the [illegible] Mr. [illegible] but at quarter to six the [illegible] ny further observations, and the [illegible].

### HOUSE OF LORDS.—THURSDAY.

[illegible]

The Royal assent was [illegible] to the following bills, viz.—Militia Ballots Suspension, Fire Insurances, Lambeth Water, and [illegible].

The Earl of [illegible] reading of four bills recommended by the Select Committee on Railway Bills, and [illegible] the bills were read a first time.

The Earl of [illegible] announcement had been made by [illegible] supposed to be [illegible] residence of the Government to the effect that Mr. Crampton, [illegible] British Minister at Washington, had received his dismissal by the United States' Government. He wished to know whether Her Majesty's Ministers could give any information on the subject.—Earl GRANVILLE replied that the Government had not received any official communication respecting it.

The Hay and Straw Trade Bill was read a second time.

The Peace Preservation (Ireland) Bill was read a third time and passed.

The Appellate Jurisdiction Bill was reported with amendments.

AFFAIRS OF ITALY.—The Marquis of CLANRICARDE inquired whether it was intended to lay upon the table copies of the papers submitted by Sardinia to the late Paris Conference upon the affairs of Italy? Lord CLARENDON said the papers would be presented shortly, but at present discussion upon the subject would be premature. It would, however, be necessary before the close of the session to have a discussion upon the affairs of Italy. He might add that both France and Austria were willing to withdraw their forces from the Roman States.

### HOUSE OF COMMONS.—THURSDAY.

OUR RELATIONS WITH AMERICA.—Sir E. B. LYTTON gave notice that on the motion for adjournment to-morrow he should ask Lord Palmerston a question in reference to our present relations with America.

TENANT-RIGHT BILL.—Mr. STAFFORD asked the Chief Secretary for Ireland whether the Government intended to propose any amendments in the Tenant-right (Ireland) Bill; and, if so, whether they would place them on the notice paper before Wednesday next, on which day the bill stands for Committee?—Mr. HORSMAN said that Government thought it would be useless to go into Committee on the bill; and if no amendments were [illegible] the hon. member for Stafford would move that the House do go into Committee on the bill that day six months, he would have the [illegible] Government.

THE NEUTRAL POSITION.—Mr. DISRAELI asked the noble Lord at the head of the Government whether it was in that Majesty's Ministers' power to [illegible] that [illegible] at the request of the President of the United States, it was the intention of her Majesty's Government to make any statement as to the relations between the two countries?—Lord PALMERSTON said he had received information indirectly of the fact to which the right hon. gentleman referred. He believed that Mr. Crampton had received his passports, and had quitted Washington for Canada. There had been nothing received from him as yet, and he (the noble Lord) had no further statement at present to make.

EDUCATION AND INSTRUCTION OF OFFICERS IN THE ARMY.

On the motion for going into Committee of Supply, Mr. S. HERBERT called the attention of the House to the education and instruction of officers in the Army. He adverted to the statement just contradicted he had disappeared for the first time a charge for the purpose of the education [illegible]. He thought it highly desirable that officers, regimental and on the staff, should have an opportunity of improving themselves in the higher qualifications of their profession. The country had an opportunity of creating a peace establishment which would be free from the objections usually characterised as the peace establishment hastily formed at the close of the last great war. At that time there was great hostility to the Army, which had been used as a political [illegible]; and he [illegible] with the Duke of Cambridge, who said, "Depend upon it the only way to maintain an army in this country is to put it out of sight." At present we had great facilities of carrying out the object to which he had referred. The Army was [illegible] in consequence of the great popularity of the Army. He believed this country could never have a standing army so large as the military nations of Europe; and he never wished to see it; but he thought the country might make up for its numerical inferiority by high [illegible] attainments, and this could only be done by giving officers facilities for obtaining the highest order of instruction. He had complained of the omission of one thing: he now complained of the adoption of a regulation which he could not too strongly condemn—namely, that of making War-office clerks inspectors of regimental schools, instead of instructing that duty to military men (Hear, hear). The right hon. gentleman then proceeded at some length to describe the details of a plan for the instruction and examination of candidates both for commissions and promotion in the Army, which he was desirous of seeing adopted.

Mr. F. PEEL made a speech in favour of his improved system of education. A commission of three officers had been appointed by the War Department to inquire into the whole subject. They were to visit the different countries of Europe in pursuance of their inquiries. He, therefore, hoped that no plan would be adopted until that commission had made their report.

Sir ELLICE expressed his general concurrence with the views of Mr. Herbert.

Sir DE LACY EVANS said he thought that the tone of the Under Secretary for the War Department was not very cheering for the acceleration of an improved military education. He hoped that the Government would, before the close of the Session, would be prepared to [illegible] House.

Col. DUNNE spoke to the same effect, as did also Mr. B[illegible] and Lord Goderich.

Lord PALMERSTON admitted that the system of [illegible] in the Army was defective, and that it was both the duty and [illegible] of the Government to turn their attention to the subject. In doing so the proposals which had been put before the House by Mr. Herbert showed a very good spirit.

The subject then dropped, and the House went into Committee of Supply, and was occupied during the remainder of the night by the consideration of various civil service votes.

## CHURCH, UNIVERSITIES, &c.

APPOINTMENTS.—*Rectories.*—The Rev. C. [illegible] Barnet, rural dean of Barnet; Rev. J. W. Bampton, to Swaffield, Lincolnshire; Rev. W. Thomas to Redgrave; Rev. [illegible] R. G. Fisk to Great Malvern, Worcestershire; Rev. [illegible] Arthur to Kempston, Nottinghamshire (*Ironmonger*): The Rev. G. F. de Geux to Christ Church, Frampton.

THE OXFORD COMMEMORATION [illegible] Oxford on Wednesday last were of a more [illegible] than on most former occasions. His Royal Highness Prince [illegible] Prussia and the Prince Regent of Bavaria reached Oxford on Wednesday morning [illegible] the Prince was received at the residence of Dr [illegible] Vice-Chancellor, [illegible] order by the Lord Chancellor, [illegible] Bill of Worcester College, where [illegible] met by the Fellows and other dignitaries of the College. On entering [illegible] Chancellor opened the [illegible] first by [illegible] to the chair, [illegible] to [illegible] Prince, [illegible] and [illegible] degrees of Doctor in [illegible] various and noble Prince who had honoured the University [illegible] with [illegible] a very real compliment [illegible] the [illegible] distinguished individuals [illegible] John Pakington, Lord Stanley of Alderley, Lord Stratford, Prussian Minister; Lord Abercorn, the Earl of Clarendon, the Earl of Elgin, Lord Ashburton, Admiral Sir Edmund Lyons, Rear-Admiral Dundas, Sir Henry Holland, Dr. Lushington, General Sir Harry D'Ewes, Dr. Smith, Sir Bartle Frere, Sir Barth. All the names on the foregoing list were received with loud and lengthened cheers, especially those of the Earl of Clarendon, Sir Edmund Lyons, and Sir H. D'Ewes. The names of Sir Colin Campbell and Sir W. Williams of Kars were also received with [illegible] though, unfortunately, they had not returned to the seat of [illegible] in time for the ceremony.

THE CHARITY CHILDREN AT ST. PAUL'S.—Thursday morning, according to annual custom, the children connected with the various metropolitan charity schools assembled in [illegible] cathedral, when choral service was performed in the body of the cathedral, round which raised seats were erected, the general congregation occupying the floor. The sermon was preached by the Bishop of Lincoln.

TESTIMONIALS. We are requested by the Incumbent and Churchwardens of St. Gabriel's Church, Pimlico, to contradict the statement made in our last week's impression under this head in reference to the presentation of testimonials to the Rev. B. Belcher and Mrs. Belcher. The same being wholly untrue and without foundation.

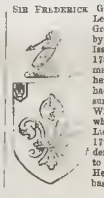
THE CLERMONT DESTITUTE CHILDREN'S SCHOOLS.—On Tuesday the 20th anniversary of this excellent [illegible] institution was held at Freemasons' Tavern; Mr. S. B. Twining in the chair. After the customary loyal toasts had been duly honoured, the children of the schools walked round Freemasons' Hall, when their neat and orderly appearance and demeanour elicited loud approbation; two addresses, written for the occasion, were then spoken by two of the male [illegible], and the company, separated after a very agreeable festival. In the course of the evening sub-scriptions and donations to the charity to a considerable amount were received. The musical arrangements, by Mr. Genge, gave great satisfaction.

CHARITABLE BEQUESTS.—The Reverend James Tyley, Rector of Great Addington, has left to the Society for the Widows and Orphans of the Clergy of Northampton, £200; to the poor of Great Addington, £200; to the poor of Ramsde and Stretchy, £100 to each parish. William Jones, Esq., formerly of Springhill, Stafford, late of Morfa Lodge, Flintshire, has bequeathed to the Wolverhampton Infirmary, £100; General Hospital, Birmingham, £100; and to the Deaf and Dumb Asylum, Edgbaston, £100.

## OBITUARY OF EMINENT PERSONS.

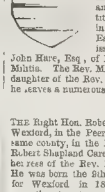
### SIR F. G. FOWKE, BART.

SIR FREDERICK GUSTAVUS FOWKE, Bart., of Lowesby, in the co. of Leicester, was the eldest son of Sir Thomas Fowke, Knt., Groom of the Bedchamber to Henry, Duke of Cumberland, by his wife Anne, second daughter and co-heiress of Sir Isaac Woolaston, Bart., of Lowesby. He was born in Jan., 1782, and was created a Baronet the 9th Feb., 1814. He married, in Oct., 1815, Mary Anne, only daughter and heiress of the late Anthony Henderson, Esq.; by whom he had issue five sons and two daughters. Of the sons four survive, and the elder daughter is the wife of the Rev. William Lancelot Rolleston. Sir Frederick Gustavus Fowke, who was a Gentleman of the Privy Chamber, and a Deputy Lieutenant of Leicestershire, died at Leamington on the 17th ult. He is succeeded by his eldest son, now Sir Frederick Thomas Fowke, the second Baronet, who is married to Sarah Mary, youngest daughter and coheiress of the late Henry Leigh Spencer, Esq., of Banstead Park, Surrey, and has issue



### THE REV. H. J. HARE.

THE Rev. Humphrey John Hare, of Docking Hall, in the county of Norfolk, was the eldest son of the Rev. Edward Hare, whose former name was Christian, but who assumed the surname of Hare, in compliance with the will of his kinswoman, Mrs. Catherine Henley, the only child of the Hon. and Rev. Hugh Charles Hare, younger son of Henry, second Lord Colerane. The Rev. Humphrey John Hare inherited the Docking estate on the death of his father, in 1807. He previously held a living in Cumberland. He was first cousin to the late John Christian, Esq., of Unerigg Castle, Cumberland, who was Dempster in the Isle of Man, an office which had been held by members of that family for more than 400 years. On his mother's side Mr. Hare was descended from the Bassets, and from this connexion his father had claim to the extinct title of Baron de Dunstanville. Mr. Hare married, first, in 1801, Mary, youngest daughter of Thomas Patteson, Esq., of Mecmerry Hall, Cumberland, by whom he has had issue a daughter, Frances Mary, and a son, Humphrey John Hare, Esq., of Ranmhope Hall, Yorkshire, Captain in the West York Militia. The Rev. Mr. Hare married, secondly, in 1818, Barbara, youngest daughter of the Rev. James Mayo, of Winbourne Minster, Dorset, by whom he leaves a numerous family. Mr. Hare died on the 30th April.



### LORD CAREW.

The Right Hon. Robert Shapland Carew, K.P., Baron Carew, in the county of Wexford, in the Peerage of Ireland, and Baron Carew of Castleboro', in the same county, in the Peerage of the United Kingdom, was the only son of Robert Shapland Carew, Esq., of Castleboro', by his wife, Anne, daughter and heiress of the Rev. Dr. Richard Pigott, of Dysart, in the Queen's County. He was born the 9th March, 1787. He was first returned to Parliament for Wexford in 1812, and he continued to represent that county for more than twenty years. He was raised to the peerage of Ireland the 13th June, 1834, and to that of the United Kingdom the 23rd June, 1838. He was made a Knight of St. Patrick in 1851. His Lordship was also Lord Lieutenant of the county of Wexford. He married, the 16th Nov., 1816, Jane Catherine, daughter of Major Anthony Cosby, of Ross, by whom he leaves issue two sons and two daughters: the latter, who are both married, are Mrs. Davies Gilbert, of Trelissick, Cornwall, and Mrs. Prideaux Brune. Lord Carew died at his seat, Castleboro', on the 2nd inst. He is succeeded by his elder son, Robert Shapland, now the second Baron, who was born the 28th June, 1818, and married, the 16th July, 1844, Emily Anne, second daughter of Sir G. R. Phillips, Bart., M.P. His Lordship is Colonel of the Wexford Militia.

### SIR E. TIERNEY, BART.

SIR EDWARD TIERNEY, second Baronet, of Brightholstone, was the third son of John Tierney, Esq., of Ballyseandlod, county Limerick, by his wife, Mary, daughter of James Gleeson, Esq., of Rath Kinnan, in the same county. He was born in 1780, and, having adopted the legal profession, became Clerk of the Errors in the Exchequer Chamber, and consequently Crown Solicitor for the North-West Circuit in Ireland. He succeeded as second Baronet, pursuant to the special limitation in the patent, on the death in 1845 of his eldest brother, Sir Matthew John Tierney, the distinguished physician ordinary to George IV. and William IV.

Sir Edward Tierney married, in 1812, Anna Maria, youngest daughter of Harry Dixie, Esq., and had issue one daughter, Harriet Mary, now the wife of the Rev. Sir W. L. Bagot, Bart., and one son, his successor, Lieut.-Colonel Matthew Edward Tierney, of the Coldstream Guards, now the third Baronet, who has married Mary, daughter of the late [illegible] F. G. S. Farrer, Esq., of Brafield House, Leeds.

Sir Edward Tierney died on the 11th ult. at his town residence, 16, Lower Fitzwilliam-street, Dublin

### SIR GEORGE BURRARD, BART.

THE Rev. Sir George Burrard, third Baronet, of Walhampton, Hants, Chaplain in Ordinary to the Queen, Rector of Burton Dassgles, Lincolnshire, and Vicar of Middleton Tyas, Yorkshire, died at his seat, Walhampton, near Lymington, on the 17th ult. He was the second son of Colonel William Burrard, by his wife Margaret, Mary, daughter of Joseph Pearce, Esq., nephew of Sir Harry Burrard, the first Baronet. He was born the 6th April, 1783, and succeeded to the Baronetcy the 7th Feb., 1840, on the death of his elder brother, the second Baronet, the distinguished Admiral Sir Harry Burrard, G.C.B., who afterwards assumed the additional surname of Neale. Sir George Burrard married, first, in 1804, Elizabeth Anne, daughter and heir of William Coppell, Esq., of Jamaica, and by that lady (who died the 11th April, 1815) left an only surviving child, George, born 13th Oct., 1805. Sir George Burrard married, secondly, the 1st May, 1816, Emma, daughter of Admiral Joseph Bingham, and by her had issue two sons and two daughters. One of these daughters, now Mrs. F. H. Crozier, is living; the other, Mrs. W. H. Cooper, of Farm-hill, died February 2nd, 1849. Sir George Burrard is succeeded by his eldest son, George, now the fourth Baronet, who was formerly M.P. for Lymington, and who married, the 3rd January, 1839, Isabella, only daughter of Sir G. Duckett, Bart.

### SIR W. E. ROUSE BOUGHTON, BART.

SIR WILLIAM EDWARD ROUSE BOUGHTON, Bart., of Lawford Hall, Warwickshire, and Downton Hall, Salop, was the only son of Sir Charles William Rouse Boughton, Bart., by his wife, Catharine, only daughter and heiress of William Pearce Hall, Esq., of Downton Hall. He was born the 14th Sept., 1788; was educated at Christ Church, Oxford, where he graduated in 1808, and, on the death of his father, the 26th February, 1821, he inherited the two Baronetcies of his family, of which he was the tenth in succession, having been created in 1641, and the other, of which he was the second in succession, having been created in 1791. Sir William Edward Rouse Boughton married, the 24th March, 1824, Charlotte, youngest daughter of Thomas Andrew Knight, Esq., of Wormsley Grange, President of the Horticultural Society, by which lady (who died the 14th May, 1842) he leaves issue two sons and five daughters. Sir William died on the 22nd ult., and is succeeded by his elder son, Charles Henry, an officer in the British Army, who married, the 23rd August, 1853, Mary Caroline, second daughter of John M. Severne, Esq., of Thenford, Northamptonshire, and Wallop Hall, Shropshire, and has issue.

It was the seventh Baronet of this house, Sir Theodosius Edward Allesley Boughton, whose death, in 1780, the supposed result of poison, gave rise to the celebrated trial which ended in the conviction and execution of Sir Theodosius's brother-in-law, Captain Donellan.

### JAMES LUMSDEN, ESQ., OF YOKER LODGE.

THIS gentleman died at his town residence in St. Vincent-street, Glasgow, on the 16th ult., at the age of seventy-eight. Mr. Lumsden began life as an engraver and stationer, and was very successful, but it would be difficult to say, from his enterprise of [illegible], what business he was not engaged in. He rose to be a leading, if not the most leading, man in Glasgow. After a long career of activity and usefulness, and after filling various public offices, he was elected Lord Provost of that city, and during his civic reign he [illegible] the inaugural Municipal Extension Bill. On the presentation of the freedom of Glasgow to Lord John Russel, Mr. Lumsden, at his own private expense, entertained his Lordship, the Corporation, and others, at a splendid banquet in the Townhall. Mr. Lumsden, whilst Provost, went with Dr. Strang, the Glasgow City Chamberlain, to congratulate Louis Philippe at Neuilly upon his escape from an assassin. The Provost and Dr. Strang in 1833 made a tour in Germany, the incidents of which Dr. Strang has graphically described in his volumes of travels. Mr. Lumsden was a man of great kindness of heart and generosity of disposition, but of somewhat eccentric manner. In private life he was distinguished by strong practical benevolence, and in public life by an honest and indefatigable energy.

WILLS.—The will of Rear-Admiral Sir William Symonds, K.C.B., was proved under £16,000; Capt. Sir Charles Hotham, R.N., K.C.B., Aide-de-Camp to the Queen, late of Melbourne, £20,000; Sir Edmund H. Loomore, Bart., £60,000; Francis Barchard, Esq., £250,000; Henry Hulbert, Esq., £45,000. Thomas Buckle Herring, Finchley, £70,000; Charles Walton, Gracechurch-street, £80,000; Richard Hodge, Regent-street, £45,000.

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

We are assured by a well-informed friend that Lord Fitzwilliam is not the last survivor of the sitters to Sir Joshua; that another remains in the grown-up person of the sitter for *Puck*; and that the merry boy, late a porter at Elliot's Brewery in Pimlico, was in Christie and Manson's rooms when, at Mr. Rogers's sale, that masterpiece of Sir Joshua's pencil was knocked down to Lord Fitzwilliam. The model for *Puck* and the ex-porter at the brewery was standing next to his Lordship at the time. Mr. Cotton (who is busy about Sir Joshua) will make a note of this.

The noble Annabale Caracci, "The Coronation of the Virgin by the Trinity," justly regarded as one of the jewels of Mr. Rogers's collection, has passed through Mr. Farrer's hands into the gallery of the Duke of Newcastle at Clumber. The "wherewithal" of a noble picture is what every lover of art is desirous to learn. Dr. Waagen, who is once more in England adding to his knowledge of our wealth in this way, will be glad to hear of this accession to the Clumber collection; and so will the Committee for the Exhibition at Manchester, in 1857, of the Art-treasures of the United Kingdom

That excellent engraver, Mr. Gruner, who has been a resident so long among us, is on the eve of quitting England for a settled residence at Dresden. He does not leave us, however, until he has completed (which he has just done) his engraving of the Blenheim Raphael. And a very noble accession to the portfolio of the collector has Mr. Gruner made in this engraving. The visitor to Blenheim cannot fail to recollect the fine picture by Raphael of "The Virgin Enthroned" in that grand collection The picture was painted by Raphael for the church of St. Florenzo, at Perugia, whence it passed, about the year 1780, direct to Lord Spencer, and from Lord Spencer to the then Duke of Marlborough.

Hogarth's tomb at Chiswick churchyard has just been restored, at the expense of an admirer bearing the name of the great painter The restoration has been made in exact accordance with the first design To secure the permanent safety of the tomb it was necessary to disturb the coffins beneath. Very few persons were present when this was done Those who were there saw the large coffin of his mother-in-law, Lady Thornhill, the still larger coffin of his widow, and the "little" coffin of the great painter of mankind. One who was present assured us that he saw the "torpid hand" of the painter of "Marriage à la Mode" and "The Harlot's Progress."

We have been to see the collection of pictures now open in the Pavilion on Monday last at the Crystal Palace. We went, wishing well to the scheme, but left with an unfavourable impression Much remained to be done. We shall, therefore, reserve our opinion of the ultimate success of the undertaking until we have made another visit Something of the same kind has been attempted before at the Pantheon in Oxford-street

Our best *line* engravers are not altogether idle. Mr. Doo is out in the last touches to a portrait of Wolfe for the long-promised edition of the poet's works by Mr. Richard Bell Cunninghame. The portrait is that at Hagley, by Rubridon, and is now engraved for the first time. Mr. J. H Robinson is stopping at Petworth, for the purpose of engraving that exquisite Vandyck of Ann Carr, Countess of Bedford, the daughter of Carr, Earl of Somerset, and of the famous Countess of Essex, and not less celebrated as the mother of William Lord Russell, the great Whig martyr of Muckintosh and Macaulay.

There is a talk of forming an "Old Mortality Club," for the purpose of recutting and preserving inscriptions on monuments to persons of eminence. The club will not come into existence too soon. Within the last five years we can recall many interesting tombstones, then barely legible, but now altogether effaced. Should a single tablet of this kind be marked by the grave of any person who must be *dear*, which will direct attention to the grave and in its turn render attend The club may begin with a plan, adopted by a monument in Covent-garden Churchyard, to the author of "Hudibras" his precise place of the poet's burial is known, but there is nothing to mark the spot

Among the many pictures now on view in London we have been particularly pleased with a "Madonna," by Carlo Dolce, at No. 26, Surrey-street, Strand. Very full indeed of the feeling and fine painting is this head of the "Madonna." It is also in excellent preservation. Her Majesty, if we remember right, has a room what similar head by the same artist in her private collection. There are other pictures of inferior merit in the room as well as the Carlo Dolce to be shown

We hear that the remarkable Original Society from Somerset-house to Burlington-house was this week finally determined. The Society of Antiquaries will remain from time in Somerset-house.

We observe with a most sincere satisfaction that our old friend Sylvanus Urban has removed his quarters from long street, Westminster, to Oxford and the Strand. After the close of the present month, Mr John Bowyer Nichols and Mr. John Bowyer Nichols have nothing whatever to do with the *Gentleman's Magazine*. Their names carried a look to St. John's Gate, to Cave, and to Dr Johnson Why have they old Sylvanus to Mr. Parker of Oxford? Mr. John Gough Nichols is an excellent antiquary and fond of associations — why has he ceased to look with reverence on Mr. Urban and St. John's Gate?

Mr. David Masson's excellent "Essay on Chatterton, a Story of the Year 1770" (part of a delightful volume just published of Essays chiefly on English poets), reminds us of an unpublished reference to Chatterton, that Mr. Masson and others will read with interest. It is part of a letter from George Steevens to Thomas Warton, and runs thus:—

Emmanuel College, Cambr dge, Oct 20th, 1778.

A few days ago a Mr Harford, a merchant of Bristol, came to this college, to admit a search and a warrant into the rooms of a poor young man, a plumber, painter, &c. by trade, of the name of Chatterton Greene, a serjeant at law, who collected books, partly through our piety and partly through hopes of gain, furnished Chatterton with most of the works he pretended to have found in an old chest. The Mr. Harford purchased the very copy of Oswyn Dougias's "Virgil" which our young poet had used, together with various Chaucers and some other manuscripts I should have said that this Greene kept a circulating library, of modern books, but preserved all his old ones in a seperate room, to which Chatterton had constant access Mr. Harford made several other observations in the conduct of the boy which I may tell you when we meet. And that Chatterton said relative to Mr Pelham is absolutely false: no such estate was in the hands of that family at the time described. The same gentleman remarked that of *Sir* before the name of a place (see some of Chatterton's verses in the "Battle of Hastings") there is no example.

The obituaries announce the death, on the 26th of last month, of John May, Esq., the friend and correspondent of Robert Southey. The Poet Laureate was particularly attached to Mr. May, and dedicated to him his poem on the "Battle of Waterloo." Mr. May was for many years a director of the Equitable Assurance Company. He died at Blackheath aged eighty-one.

One of the twin statues of Galileo and Newton, intended for presentation by her Majesty to the New Museum at Oxford, was fixed in the Museum on Wednesday in presence of a great attraction. The statue represents Galileo, and the artist is Mr. Munro, deservedly known by many fine works. The figure is well conceived, and the execution all that can be desired.

A CURIOUS FAILURE A meeting of M. Place's creditors took place at Paris on Monday, on the examination of his accounts The liabilities amount to rather more than 18,000,000 francs. The assets are estimated at about one-third of that sum, or 6,000,000f. The railway and financial speculations are heavy items. The Duke de Galliera is said to be down in M. Place's books for upwards of 5,000,000 f. (£200,000 sterling) M. de Morny loses 900,000 f.; and the railway King, Pereire, nearly 2,000,000. All the banking-houses in Paris are more or less involved. About a week ago it was apparent that M. Place must suspend his payments; but the principal creditors, who are, like himself, either directors or large shareholders of the Credit Mobilier, endeavoured to compromise the affair, fearing the effect of the failure on the securities in their hands—a reason which, doubtless, has likewise deterred the *agens de change* from coming forward and stating the extent of their losses; but it is understood that an exalted personage came forward and decided that the law must take its course.

## MUSIC.

ANOTHER prima donna, new to the public, has appeared at Her Majesty's Theatre. On Monday last Madame Albertini made her début, in the character of *Leonora*, in "Il Trovatore," with triumphant success. There were other novelties in the cast, which gave fresh interest to an opera already familiar to the musical public. Madame Alboni appeared, for the first time in this country, in the part of *Azucena*, the gipsy woman, who is really the heroine of the piece. The character of *Manrico* was performed by Baucardé, and that of the *Conte de Luna* by Beneventano. Madame Albertini is English by birth, but wholly Italian by education. She has been for a good many years, and has established her reputation as an accomplished singer and a powerful tragedian. Her figure is tall and commanding, and her features, though perhaps not regularly handsome, are striking and expressive. Her voice is a real soprano, of great power and compass, though it seems to have suffered a little in the highest part of the scale, probably in consequence of her being accustomed to sing the music of Verdi, which tries severely the strongest voice. Madame Albertini, in order to give her high notes sufficient power, is apt to force her voice too much, and make it somewhat shrill and piercing. Notwithstanding this defect, however, her voice is a superb organ, and she uses it like a most accomplished artist. Her execution is clear and brilliant, and her method of vocalisation is that of the best Italian school. She is peculiarly excellent in the delivery of recitative; and no native Italian could declaim that beautiful language with greater grace and purity. Every thing she does, both as an actress and a singer, is full of intelligence and feeling. On her very first appearance she made a strong impression on the audience. The fine air in the opening scene, "Tacea la notte placida," was given with such beautiful execution and such a warmth of expression that it was received with thunders of applause. Throughout the piece her success became more and more triumphant, and the curtain fell amid enthusiastic acclamations from all parts of the house. The part of *Azucena* is one which Alboni has only recently essayed, and in which she has had great success on the Parisian stage. It shows that she has powers as a tragedian which formerly she was not supposed to possess. The character is quite suitable to her personal appearance, and her performance of it on Monday was a display of high dramatic genius. This part contains some of the finest music in the opera; and her performance of it was a combination of vocal beauty and dramatic expression which could not be surpassed. Baucardé was decidedly successful in the character of *Manrico*. Since his appearance several years ago, at the same theatre, he has made great progress in his art. His voice is beautiful, and highly cultivated; he is an intelligent actor, and is well entitled to hold an important position in a great theatre. Beneventano makes progress in public favour. He appeared to great advantage in the character of the *Count de Luna*, and was warmly applauded, and his principal air, the beautiful "Il balen del suo sorriso," was loudly encored. As a whole this fine opera was admirably performed; and will, probably, be frequently repeated during the season.

THE principal concert of the week has been that of the NEW PHILHARMONIC SOCIETY, which took place at the Hanover-square Rooms on Wednesday evening. Its most remarkable feature was a pianoforte concerto, composed and performed by M. Otto Goldschmidt. It was a work of magnitude that has been heard in London, and did much honour to the talents of its composer. Without being marked with the strong and high genius, it showed the attainments of an accomplished artist, being skilfully constructed, clear, and melodious. He played his own music beautifully, and had a most cordial reception. There was another pianoforte piece, composed and performed by M. Silas; a work of much merit, and admirably executed by the author. The rest of the concert was made up of well-known pieces, including Mozart's symphony in E flat, and Beethoven's magnificent overture to "Leonora."

MR. HULLAH commenced his second series of Choral Concerts on Monday evening, at St Martin's Hall. We already mentioned the object of these concerts, which is to explain, by examples, orchestral music, the construction of a grand work. Except to professional men, Mr. Hullah has succeeded in drawing crowded audiences to Mr. Hullah's lectures; they hear the *chefs-d'œuvre* of the great masters illustrated by a concert composed of the best performers in London, and they have the additional advantage of hearing performances of Mozart's symphony in E flat (No. 4 in Mr. Hullah's catalogue), Beethoven's overture to "Prometheus," Weber's Jubilee Overture, the same composer's "Oberon" Overture, admirably played by Pauer, and vocal pieces sung by Madame Lascelles, Miss Dolby and Mr. Weiss.

PROFESSOR STERNDALE BENNETT has concluded the seventh season of his series of Concerts of Classical Chamber Music. The concerts given by the Harp-quartet Association, which have already maintained

EPSOM RACES.—H.R.H. PRINCE ALBERT AND H.I.H. PRINCE FREDERICK WILLIAM OF PRUSSIA AT THE GRAND STAND.

"ELLINGTON," WINNER OF THE DERBY, 1856.

## EPSOM RACES.

### THE ROYAL VISIT.

The intended Royal visit of Prince Albert and Prince Frederick-William of Prussia to the races on Wednesday was not known to Mr. Dorling until Tuesday afternoon, consequently little time was afforded for making the preparations for the accommodation of the distinguished visitors. Mr. Dorling at once prepared an apartment at the south end of the Grand Stand, adjoining the private saloon, which was filled with the leading female members of the aristocracy. The room was tastefully fitted up with crimson hangings and handsome lace curtains. On the table was a beautiful bust in Parian of the late Lord George Bentinck, and over the looking-glass hung the Royal arms, in needlework, executed by the Misses Dorling. The Royal party left Buckingham Palace in four carriages and four at twelve o'clock, and arrived at the Stand at about two, a few minutes before the first race, where they were received by Mr. Edward Dorling, and conducted by him to their apartment in the Stand. In attendance on the Prince were Lieut.-Gen. Baron Schreckenstein, Baron de Moltke, Baron Seatter de Lötzen, Baron de Gemmingen, Captain Du Plat, Captain Heinz, the Hon. Mortimer Sackville West, Lieut. Schreckenstein, Dr. Ullman, and Dr. Wegner. Although there was no cheering there was no lack of curiosity to obtain a glimpse of the future husband of the eldest daughter of our beloved Queen. The Royal visitors appeared to take great interest in the race for the Derby; but perhaps what astonished them the most was the excitement of the Betting Ring, and the extraordinary *coup-d'œil* presented by the immense numbers on the ground, amongst whom the utmost order everywhere prevailed. They left the course immediately after the great event was decided; and Prince Albert, before taking his departure, sent for Mr. Dorling, and personally expressed his obligation for the admirable arrangements made for the accommodation of his distinguished visitors.

In the accompanying Illustration the Artist has sketched their Royal Highnesses and their suites in the Grand Stand.

### "ELLINGTON," WINNER OF THE DERBY.

This horse is a remarkably fine brown colt, the property of Admiral Harcourt, and his genealogy is in every way an indication of good running; his sire being the Flying Dutchman, who, in 1849, accomplished the double feat of winning both Derby and St. Leger. His dam was the double feat of winning both Derby and St. Leger. His dam was Ellerdale, who was also the property of the gallant owner of the above celebrated winner of the Champagne Stakes at Doncaster. His victory is somewhat similar to that of Daniel O'Rourke's in 1853. Ellington, during the early part of the year, was a decided favourite: but he receded in the betting in consequence of two defeats he suffered at York and Chester. It would, however, appear from the result of the great race of Wednesday week that he has by no means disappointed the most sanguine expectations of his backers. Yellow Jack, who was second, has figured in the same position in no less than three events during the present season, a circumstance, probably, unprecedented in racing history.

Ellington is a dark brown horse, standing fifteen hands two and a half inches; a long, low animal with strong quarters, somewhat drooping towards the tail, good loins; deep brisket and shoulder; good neck, large and somewhat coarse head, with ears rather "lopped;" very good arms, large knees, hocks, and bone, and very large feet. The only white about him is on his off hind fetlock-joint.

### "MINCEPIE," WINNER OF THE OAKS.

Mincepie is a chestnut filly, bred by the Earl of Howth, and is now the property of H. Hill, Esq. Her sire was Sweetmeat, once celebrated on the turf, and her dam Foinnualla, by Irish Birdcatcher. This is the second time the above fortunate owner has won the Oaks; having accomplished the same feat in 1848 with Cymba. The winner, Mincepie, was trained by John Day and ridden by Alfred Day. The victory in this instance will, in some degree, compensate them for the defeat of Wentworth for the Derby.

We subjoin the particulars of the race:—

The Oaks Stakes of 50 sovs. each.

| | | |
|---|---|---|
| Mr. H. Hill's ch Mincepie, by Sweetmeat—Foinnualla | (A. Day) | 1 |
| Lord Clifden's ch Melissa, by Orlando .. .. .. | (Sly) | 2 |
| Mr. Bowes's b Victoria, by Melbourne .. | (Bartholomew) | 3 |

Betting: 5 to 2 agst Mincepie, 7 to 2 agst Mermaid, 7 to 1 agst Victoria, 8 to 1 agst Tyne, 10 to 1 each agst Secret and Comedy, 100 to 6 agst Fair Geraldine, and 20 to 1 agst Melissa. Secret pulled her way to the front the instant the flag fell, followed by Victoria, Melissa, and Comedy to the top of the hill, where Victoria took up the running, Secret going on second, Melissa third, Comedy fourth, and Tyne fifth; Mincepie and Mermaid lying next side by side, and Shot bringing up the rear. This order was maintained to the mile-post, after passing which Melissa headed Secret, and the latter dropping further back at the upper turn was passed by Comedy and Mincepie, the latter pulling tremendously, there parting with Mermaid, who became last but one or two. In descending the hill towards Tattenham Corner, Comedy joined Melissa, and they ran head and head to the road, where the Baron's filly dropped off, and Victoria giving way soon after crossing it, Melissa went on with a clear lead, followed for a few strides by Victoria, and afterwards by Mincepie, who, gradually drawing upon Melissa, got to her quarters inside the distance. Here Alfred Day quietly waited until opposite the upper end of the Stand, when he made his effort, and Mincepie getting her head first kept it there to the end, and won, after a fine struggle, by a neck. Victoria finished three lengths from Lord Clifden's mare, and Fair Geraldine, who passed the others in the straight, as far from her. The next two, at least a dozen lengths off, were Mermaid and Comedy, and separating them from the rear division was Shadow, Tyne being the "absolute last." Run in 3 min. 4 sec. Net value of the stakes £3600.

"MINCEPIE," WINNER OF THE OAKS, 1856.

## SPORTING SPORTS

THE settling for the recent Derby and Oaks has made considerable progress, and gone off smoothly so far, except as regards one "Captain P.," who to adopt the allegory of the report from the Corner, has "put off in his own canary barque, the *Hide and Seek*, for the Levant." The Ellington winnings are said to be nearly £80,000, of which about £30,000 goes to Mr Bargraves, and none to the owner, who never bets, and was, we believe, not even present to see the triumph of his "French-grey" jacket. It is rumoured that he refused 4000 guineas for his colt in the winter, and did not think it worth while starting him, after his double defeat. It is notorious that Ellington was not fit when he ran at York, and it would now seem that the finishing touches had not been given him when he came to Chester. The horologists make out that the Derby race was one of the fastest on record, and close it with the Oaks, which took 3 min. 4 sec. to run. Our eye tells us that they must have grossly mistaken the Derby time, as, independent of the comparison between the two races, it must be remembered that in the one case Secret, Victoria, Mundig, and all three very little beyond platers—did nothing but jog in front alternately. In the other, Coroner rattled the field as hard as he could go for more than a quarter of a mile, and stamped them the pace home for a hundred yards or so. Bill Abbs, of Fred's, in the straight, and Vandermolin and Yellow Jack on the [illegible] all the way home. The ground was not more heavy than it was on the Oaks day, and never expect to see the hill climbed so quick again as I [illegible] Or, never to Lege before run by the Derby, as Lootenant-Colonel Vandermolin was made fast to [illegible] and Kelipegawin he exceeded [illegible] The latter mare, to judge [illegible] should be a rare breeder, could no doubt have won the Oaks as well as two Derbys [illegible] ble policy to start Mincepie. As [illegible] Day brought her through [illegible] as nothing, but the [illegible] Day brought her through [illegible] no greater trouble than [illegible] to compensate him, no doubt [illegible] Mincepie must [illegible] "deserve to [illegible] Hermit [illegible] was a sad contest to [illegible] is certainly our impression that, with a severer jockey on her, who would have forced the pace earlier, and handled her more artistically at the finish, she would have just made Mincepie, who showed strong symptoms of it, "crack" in the last [illegible] [illegible] that their mare, who really [illegible] [illegible] [illegible] be below her form, but of course [illegible] [illegible] [illegible]

## AMUSEMENTS, &c.

HER MAJESTY'S THEATRE.—MADAME ALBERTINI.—First Night of Lucrezia Borgia. On MONDAY next, June 9th (a Subscription Night, in lieu of August 9th), will be performed Donizetti's Opera LUCREZIA BORGIA. Lucrezia, Madame Albertini (Ortoni, Middle Rizzi, Gennaro, Sig. Bartacchi, Gubetti, Sig. Beneltini, and Alfonso, Sig. Belletti. To conclude with the new Ballet Divertissement, in which Mdlle. Marie Taglioni and M. Charles will appear. Tuesday, June 10th—Mdlle PICCOLOMINI—LA SYLVIATA: Violetta, Mdlle. Piccolomini Thursday—June 12th Grand Extra Night—Various Entertainments, combining the talents of Albertini and Alboni. The Ballet Department will include Mdlles Marie Taglioni, Rosatti, Katrina, and Ballon. Friday, June 13th, Grand Extra Night. Saturday, June 14th, Mdlle. JOSEPHINA WAGNER will make her First Appearance as Romeo, in I CAPULETTI ED I MONTECCHI. Applications for Boxes, Stalls, and Tickets to be made at the Box-office of the Theatre, Colonnade, Haymarket.

ROYAL PRINCESS'S THEATRE.—On MONDAY and during the Week will be presented, Shakespeare's Play of THE WINTER'S TALE. Leontes, by Mr. C. Kean; Hermione by Mrs. C. Kean. Preceded by the VICTOR and JUSHED

THEATRE ROYAL HAYMARKET.—On MONDAY, JUNE 9th, and during the Week (with the exception of the Evening of Her Majesty's Birthday), will be performed LIFE, in which Mr. Buckstone will appear in his original character, and most of the principal performers of the Establishment will appear with the Spanish Dancers, Donna Maria Soto and the Infant Don Pedro, in EL FANDANGO; and the New Farce of THE MOTHER-IN-LAW OR WOMAN. The Dress CIRCLE will be reopened on Monday, June 9.

ROYAL SURREY THEATRE. ITALIAN OPERA and BALLET. First Night. On SUNDAY next will be performed, for the First Time, a New Grand Opera, ORELIA. New Scenery, Dresses, Appointments, and Decorations. After the Opera, the National Anthems, a Grand Tableau of the Queen and Prince Albert, surrounded by their children, principal ministers, and members of the Royal Family, and the Ballet Divertissement, in which Mdlle. Rosati, Mdlle. Katrina, and the Corps de Ballet will appear. On MONDAY, June 9th, the Ballet Divertissement will include Mdlle. Marie Taglioni, Rosatti, Katrina, and Ballon. Friday, June 13th, Grand Extra Night. Saturday, June 14th, Mdlle. JOSEPHINA WAGNER will make her First Appearance as Romeo, in I CAPULETTI ED I MONTECCHI. Applications for Boxes, Stalls, and Tickets to be made at the Box-office of the Theatre, Colonnade, Haymarket.

ROYAL PANOPTICON.—The WALPOLE GALLERY of 140 and 720 p.m. Admission to the Panopticon, 1s. Schools and Children half-price. Open from 10 a.m. to 10 p.m

## LAYING THE FOUNDATION-STONE OF WELLINGTON COLLEGE BY HER MAJESTY.

ON Monday last the long-deferred ceremony of laying the foundation-stone of this magnificent institution took place with great *éclat* at Sandhurst. Trains were dispatched by both the South-Western and South-Eastern Railways, and these were crowded with ladies and gentlemen, the governors and their friends. All were early on the ground, as it was particularly requested that the spectators should be seated and in order at least an hour before the time fixed for the commencement of the ceremony. The hours for starting the trains from London were also so arranged as to compel compliance with this regulation, and all went well. There was no hurry or confusion; the details were carried out perfectly. At one o'clock most of the chief personages connected with the College went down to the temporary station to receive her Majesty, and five minutes after the regular heavy reports of the Royal Artillery announced the arrival of the Royal party. The Earl of Derby, as Vice-President of the College, received her Majesty on alighting, and the whole party entered the Royal carriages in attendance, which conveyed them immediately to the site of the building. On descending from the carriages a procession was formed, and entered the quadrangle. Her Majesty wore a summer dress of white muslin, white visite, and white bonnet; Prince Albert walked on her left, and was attired in the full uniform of a Field-Marshal, with the ribbon and badge of the Garter, the Order of the Golden Fleece, the Prussian star of the Black Eagle, and the chief star of the Baden Order of Knighthood. Both her Majesty and Prince Albert looked remarkably well. On the right of her Majesty walked his Royal Highness Prince Frederick William of Prussia. He was dressed in the uniform of a Colonel of cavalry—dark blue, with silver appointments, with the insignia of the Black Eagle and a cross of the Saxon Order of Knighthood. His Royal Highness is a remarkably fine well-made young man, of fair complexion, with small regular features, and a frank open expression of countenance, which insensibly wins upon the spectator. Immediately behind them came the Prince of Wales, Prince Alfred, and Prince Arthur.

All the Princes were dressed in full Highland costume, in the Royal or Stuart tartan. It was Prince Arthur's first appearance in public, and he was present on this occasion as the godson of the illustrious Duke in whose honour the ceremony of the day took place. With the Princes were the Princess Royal and the Princesses Alice, Helena, and Louisa. The first named was dressed like the Queen, in white, and, of course, attracted the principal share of public admiration. The three younger Princesses wore white dresses over pink silk slips, with pink silk jackets and bonnets. The Regent of Baden, the Duchess of Cambridge, the Princess Mary of Cambridge, and the Duke of Cambridge followed the Royal family. The Regent wore the uniform of a Prussian General (dark blue and gold), with the grand cordon of Baden, and the stars of the Orders of Baden and Coburg. The Duke wore the uniform of a full General, with the ribbon and badge of the Garter.

Instantly on their entering the quadrangle the whole assemblage in the seats and galleries rose in one mass, the troops presented arms, the bands struck up the National Anthem, and the heavy salvoes of the Royal salute were almost drowned by the cheers which rang from every side. Her Majesty seemed much pleased and struck by the generous cordiality of her reception. The Royal party having taken their position round the stone,

The Earl of Derby, as vice-president of the hospital, advanced, and, in the name of the governors, read an address to the Queen, to which her Majesty made a reply. The Archbishop of Canterbury having delivered a solemn and impressive prayer, the ceremony of laying the stone commenced. The stone was a massive slab of solid polished granite. Beneath it was a deep recess, in which her Majesty placed a glass tube containing new specimens of all the current coins of the realm, with an elaborately-engrossed inscription on vellum recording the ceremony. Over this receptacle was placed a solid brass plate bearing the following inscription:—

The first stone of the Wellington College, founded in honour of the memory of the Great Duke, and for the education of the orphan sons of officers of the Royal Army, and of the Army of the Hon. East India Company, was laid by her Most Gracious Majesty Queen Victoria, Monday, June 2, 1856.

This plate, and the stone in which it was set, were then covered with cement; and her Majesty, taking an elaborate silver-gilt trowel, beautifully chased with a design of the building, spread it out smoothly. The upper stone was then lowered into its place; the Queen struck it three blows with an ebony and ivory mallet—then, taking the silver plumb and rule, tested its accuracy, and declared it "well and duly fixed." As the words were uttered, the guns of the artillery again broke forth, and Lord Derby, taking off his hat, gave the signal for the tremendous cheers which followed. Again the bands played—again the troops presented arms, and amid the most brilliant effects and spirit-stirring accessories, and the hearty expressions of exuberant loyalty, the foundation-stone of the great Wellington College was laid.

The Royal party then retired to the pavilion, where a sumptuous luncheon was prepared for them, of which they partook, together with the chief personages who had assisted at the ceremony. The military bands played during the time of luncheon; after which the Queen returned through the building to the Royal tent on the terrace at the north front, to review the troops. The troops on the ground amounted to 12,000 men, comprising two battalions of the Grenadier Guards, the Coldstream Guards, the Rifles, and other distinguished regiments, many of whom had served in the Crimea, and bore on their breasts the tokens of honourable distinction. The Queen and her party entered the tent which had been prepared for them shortly before three o'clock. The troops at that time were drawn up in contiguous columns before the Royal Pavilion, and covered an immense extent of ground. Upon the arrival of her Majesty they marched to the right; having advanced some distance in that direction, they wheeled about and passed close to the Queen's tent. The band of each regiment as it passed enlivened the scene by its martial strains. The number and appearance of the Foot Guards excited equal surprise and admiration. Certainly no finer body of men ever guarded the person of their Sovereign, or supported the honour of their country. When the several regiments had moved back into nearly their original position, the Rifles advanced into the front to skirmish, and kept up a constant discharge. Platoon and file firing were then practised by the other regiments of the line and the Guards. The review concluded by the officers and men along the whole line presenting arms to the Queen. Her Majesty seemed much pleased with the entire spectacle, and complimented the Duke of Cambridge, who was in command of the troops on the ground. The 3rd Light Dragoons was the only cavalry regiment present, and their duty was to assist in keeping the ground. The Queen and Prince Albert left for the railway station before five o'clock. Her Majesty was very warmly received, and seemed much pleased with the complete success which had attended the ceremony.

A large Engraving of the Wellington College, from the drawing of Mr. John Shaw, the architect, with plans and descriptions, and a general account of the Institution, appeared in the ILLUSTRATED LONDON NEWS, No. 765.

## MARRIAGE LAW PRINCIPLES.

*(From a Correspondent.)*

FAMILIAR as the [illegible] late become with many [illegible] imperfections [illegible] in our laws, it must nevertheless have been astonishing to [illegible] revelations lately made on authority concerning the marriage laws. A report, emanating from the late Archbishop of [illegible], when Lord Brougham is the president, states that the woman, [illegible] the man at the altar to the woman, according to the Church of England service for solemnising matrimony—"with all my worldly goods I thee endow"—"were not originally an [illegible] formula," though they are now directly at variance with the common law, which has been altered by insensible degrees to deprive [illegible] of all property, so that a worthless husband, after he has [illegible] can take away her earnings and bestow them on his mistress. The common law is at variance also with equity, as administered in Chancery. By the common law the wife has no property of her own, to equity every kind of property may be given to trustees for her separate use. By the common law she can make no contracts; by equity she may, and may be sued on her contracts, and may even sue her husband. By the common law marriage gives to the husband all the property which the wife possessed at the time of marriage, and all other goods that afterwards come to her; by equity personal property left to a married woman for her separate use is secured to her. By law a wife cannot dispose of her property by will; by equity she can. "Thus we have two distinct codes, says the report, "on the all-important subject of marriage, which is most discreditable to our system;" and, let us add, most injurious to public morality, by laying down with the highest authority opposite rules for the conduct of husbands and wives. The Church, the Law, and Equity are at variance; and their contradictions are more mischievous and more misleading than would be the absence of all rules.

Again, the Lord Chancellor has moved the second reading of a bill, recommended by a Commission of Inquiry, to establish a separate court for enabling man to get divorced, because at present the law—following the old Roman Catholic principle that marriage is a sacrament and is indissoluble—does not recognise divorce. It can only be obtained by a special Act of Parliament setting aside the general law. But, while the Peers were unanimous in condemning the law, they did not approve of the Lord Chancellor's bill. His measure, it was said, would take away from the wife the right which she now has, however rarely exercised, of bringing for a divorce. Lord Lyndhurst said the bill did not go far enough, that the marriage laws were in many cases terribly unjust, [illegible] vindicated on any principle of the system, humanity, or [illegible] husband to bring an action against another for *crim con.*—[illegible] mere a matter of money, for the wife a matter of life or death, and she could not be heard. She had everything to stake, and the law treated her as if she had nothing. On Lord Lyndhurst's motion, Lord Chancellor's bill, together with the law and practice of divorce, was referred to a select committee to inquire and report.

We have now then a general condemnation, by authority, of our marriage laws, and the public is invited to inquire what laws should regulate this most important of all institutions. In our country great disorders are now avowedly connected with it, and it has lately occasioned loud complaints. Though marriage is by no means to be lightly discussed, the many differences which prevail concerning the conditions of the contract in different Christian countries show that it is liable to doubt and needs examination. Like other imperative duties grown out of the natural condition of mankind, it was at first fulfilled from impulse, without any perception of its consequences or due appreciation of its hallowed character. As men grew enlightened, legislation, more zealous than wise, prescribed certain conditions. As [illegible] formalities, the sacerdotal was separated from the regal functions, churches took it under their care; some classed marriage as a sacrament which they alone could administer; others treated it wholly as a civil contract, and referred it exclusively to the jurisdiction of the magistrate. On almost all points the law of England differs from the law of Scotland; and our ancient laws differ essentially from the present common and statute law of Westminster Hall. Not long ago no marriage was legal in England unless contracted according to the conditions prescribed by the Church; in Scotland marriage was and is a civil contract. Now the Scotch principle is adopted in our laws, and a marriage contract entered into before a registrar is as valid as a contract which the priest has blessed. Parliaments describe these modes as contradictory; but our law, with its usual inconsistency, maintains and honours both. Under some regulations the wife is allowed to be mistress of her own property; under others she is treated as a chattel or slave, and can scarcely possess what her lord bestows on her, and cannot dispose of it. In some countries the law secures the wife a certain portion of the common property; in others it imposes on the husband only the obligation of finding her subsistence. We briefly advert to these differences and anomalies to show our need of how necessary it is that our statesmen, our lawgivers, our philosophers, and our people should inquire thoroughly into the principles on which the marriage contract should be regulated. The path of duty is narrow and straight; and all these deviations and wanderings teach us that in respect to the regulations of marriage a great deal has yet to be ascertained.

A relation coextensive with the whole human family, founded, indeed, on a principle of creation more diffused than man, for difference of sex pervades all life, must be at all times mainly determined by the laws of the creative Power which calls it into existence. In the long run these must override all temporary and local legislation, which can only modify them within narrow limits, or for short periods suspend their operation. Like prohibitory laws interfering with the progress of opulence, all our local and temporary legislation on the subject of marriage is demonstrated by present deplorable effects, to be evil.

Whether the hearty condemnation we pronounce of certain Mahome an laws be or be not founded on mere prejudice, it is intuitively certain that natural circumstances, at all times and places, influence conduct; and by their effects we test all regulations. It is now necessary, therefore, for society—since old regulations as to marriage are condemned, and it has to seek for just and proper regulations—to ascertain the conditions of the union prescribed by the Power which has created the human race, male and female.

Man and woman include and embrace, and are greater and grander than all regulations. The union of the sexes preceded and will outlive them, and is necessarily superior to them all. Marriage was ordained, according to the Church Service for the solemnisation of matrimony, first for the procreation of children, or the continuance of society. If society be not continued, all regulations come to an end; and to this great purpose, consequently, they must all be subordinate. Considering society abstractedly, without adverting to attractive details or local circumstances, we are at once impressed with the fact that the continuation of society is so all-important that the union of the sexes is a great duty imposed by nature on every generation. Like self-preservation, it is not left to be discovered or taught, but is provided for by an impulse or law, which, whatever may be the freedom or inclinations of individuals, is for the whole society irresistible. By the [illegible] existence [illegible] is pledged to continue society.

We speak of it [illegible] the [illegible] which laws are enforced, as it is the whole [illegible] [illegible] existing human beings, including the [illegible] of duty, is derived in part from men who have existed in previous ages. Still, by far the largest portion of the knowledge of every existing man has come to him from his predecessors, including his immediate ancestors—Normans, Saxons, Danes, Romans, Greeks, Egyptians—and so from the earliest races of men. From the combined influence of previous generations, and the influence of the mass of every community at the times over the individuals composing it—a notion of a shakspeare having more points of resemblance with the majority of his countrymen than points of difference—and from the mutual and equal dependence of all the members of a community on one another, the duties of each and all are, in the main, alike. These may be secular and spiritual atoms, but the mass of society is irresistibly commanded to continue society. The concrete fact, or union of the sexes, is so obviously indispensable to this end, that the argument might have been rested exclusively on its existence, were it not advisable, from other considerations, to state the great purpose which makes obedience to the irresistible command an imperative duty for every generation. The union being necessary, all discussion and all laws concerning it must be limited to the mode in which it should be formed and continued.

For this legislation has to provide. The union of the sexes, or the institution of marriage, is a great natural phenomenon, to promote the ends of which legislation must be directed. It cannot succeed by following the caprice of one man, or the arbitrary will of another; it must be dictated by observing the conditions prescribed by Nature's laws. At present this great question is forced on the attention of society; and all experience proves that society cannot trust its interests to one or a few persons, or leave to any man or men exclusively the task of deciding what is proper and just for all.

## THE NATIONAL EDUCATIONAL SYSTEMS OF ENGLAND AND SCOTLAND.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.*)*

As a regular subscriber to your valuable paper I am interested in the correctness of its statements, and as still further interested in the subject itself, I take the liberty of correcting a statement, which appeared in your impression of the 26th April last, in the article on "the National Educational Systems of England and Scotland" (p. 464). Your correspondent asserts that "There" (in Scotland), "however, Sunday and Infant, and what we understand as Country schools are almost entirely unknown." Now, as far as I can ascertain the object of your correspondent, he wishes to prove the position from which he starts, "that Englishmen have long been 'bunglers' in the matter of education," and, for this purpose, asserts that it has never been the case in Scotland as now and the nearest approach to a system to be found in England was the National Schools, at the pupils of which he endorses Pope's maxim. These are evidently to him the only classes worth educating, the "others," supported by individual benevolence, certainly existing in England, though, fortunately, "almost entirely unknown in Scotland." As your correspondent thought these last remarks necessary to enable your readers "properly to appreciate the difficulties in the way of any new educational system," it is clear that the Sunday, Infant, and other schools he refers to are considered as among these difficulties. But if, as I hope to show, he has greatly overrated the argument in this respect, I cannot but hope that your readers will be rather inclined to adopt the opinion which is gaining ground, that these are the kind of schools which, in part of fact, remove the obstacles to a national system of education being adopted in both countries.

Referring to your correspondent's remarks in order, I find that in regard to Sunday Schools in Scotland there were, at the last census, 3303 schools and 202,849 scholars—this, I am convinced, if corrected up to the present time, would be say 400,000. At the time the return was given the proportion to the population was 10·1 per cent; and as the proportion in England was only 13·4 per cent, the difference was so great as to warrant the assertion, that in Scotland such schools were "almost entirely unknown." I have no means of ascertaining the number of infant schools and scholars, but I have no hesitation in asserting that *if*, from the population not being so dense in Scotland, the Scholars are not so numerous as in England, there is a larger provision for teaching the infant population and in the large towns they are *by no means unknown*. Then, as to the third class of schools specified—"Charity Schools"—it would have been as well if your correspondent had defined what *he understood* as Charity schools. If simply what other people understand by the expression schools at which education is provided *to any extent* by the charity of their supporters for children who otherwise would not be educated at all, it is really difficult to believe that your correspondent had been rightly informed upon the subject when he made the assertion referred to. On this point also I can find no later aggregate returns than those of the Census for 1851. From them I find that there were then in Scotland—

| | Schools. | Scholars. |
|---|---|---|
| Supported by Endowments (i.e. as distinguished from those supported by Taxation) ... ... | 491 ... | 39,937 |
| Supported by religious bodies ... ... ... | 1930 ... | 114,739 |
| Other Public Schools, including Orphan, Deaf, Dumb, and Blind, and Ragged Schools, &c. ... ... | 434 ... | 36,369 |
| Total ... ... ... ... | 2816 ... | 191,065 |

But lest these definitions should be too vague, I subjoin, as a specimen of the *charity* schools of Scotland, a few of those institutions in Edinburgh, where children of ages from five to ten years are not only educated but supported and clothed for periods of of several years:—

| | |
|---|---|
| George Heriot's Hospital ... ... ... | 180 |
| George Watson's Hospital ... ... ... | 86 |
| John Watson's Institution ... ... ... | 120 |
| Orphan Hospital ... ... ... ... | 130 |
| Two "Maiden Hospitals" ... ... ... | 148 |
| Gillespie's Free School ... ... ... | 200 |
| Donaldson's Hospital ... ... ... | 360 |
| | 1124 |

In addition to Heriot's "Hospital" there are eight juvenile and four infant schools built by the Governors of that institution, out of the surplus funds under their control, in which gratuitous education is provided in eight districts of the city for 2000 children (I inclose the official return)

And Edinburgh is not alone in possessing these facilities for the "charitable" education and support of its youth. As might be expected in a country where education is so much prized, there are few towns, where they are necessary, that similar institutions are not to be found. I need not encroach further on your valuable space, by enumerating them, though this could easily be done. Indeed, I should not have noticed so palpable a mistake at all but for the credit of the ILLUSTRATED LONDON NEWS, which could not of course guarantee every fact or statement it inserts as being correct, though more times would certainly not render its statements more valuable, and consequently would tend to lessen its influence, a result that would be much regretted by a Londoner, though

A RESIDENT OF EDINBURGH.

THE STATUE OF THE REV. JOHN WESLEY.—(To the Editor of the ILLUSTRATED LONDON NEWS)—As your engraving last week of a statue proposed to be erected to the memory of the Rev. John Wesley represents that eminent divine with one hand elevated above his head, I beg to call attention to that attitude as being historically untrue. It is well known that Mr. Wesley used very little action in the pulpit; and I have myself heard from the lips of the Rev. Henry Moore, who was for many years his confidential friend, that the more important parts of his sermons were uttered with only a very moderate movement of the right hand. It was gently raised and depressed. Besides this we know that Mr Wesley's discourses were, above all things, remarkable for clearness and logic; qualities incompatible with the passionate attitude given to the statue. I remain, &c., R.H. May 27, 1856

THE FORTUNE OF THE HEAD OF THE BOURBONS.—The *Gazette de Lyon*, a Legitimist journal, in alluding to the late suit in which the Count de Chambord has been engaged, gives the following account of his property:—"The Count has not inherited altogether 50,000 f. of revenue from his aunt the Duchess d'Angoulême. She bequeathed to him the estate of Frohsdorf, worth about 30,000f. a year, and another estate in Hungary, of rather less value, besides some money, but the legacy is charged with more than 12,000f. a year of charitable legacies. As to the Countess of Chambord, her income is not 100,000 f. a year!" After giving the above, the journal adds:—"This certainly is not a fortune equal to the charges entailed on one who is the head of the House of Bourbon."

## THE FASHIONS.

Our recent description of Court Dresses may serve as a guide to the prevailing mode for evening dresses, although of course little varieties of [illegible] [illegible] among [illegible] [illegible] to prevent a [illegible] from [illegible] [illegible] [illegible]

## RESULTS OF THE GREAT EXHIBITION OF 1855 ON ENGLISH PRODUCE AND MANUFACTURES.

If there were ever any doubts that the consequences of the International Exhibitions of 1851 and 1855 would be to drive the great nation of Europe into a new career of industry, they do not now need to be applied by the considerable difference between the recent experiments made in London and in Paris. Gathering together in one vast space the labours of the industry and invention of men all over the world—bringing into close proximity the natural products of every state and climate—the Exhibition of 1851 introduced elements of comparison by which distance was annihilated, prejudices dispelled, and competition enlightened. This being successfully achieved, the Exhibition of 1855 took place, with this new feature of attraction in it, not only that distant nations could again compare their mutual products and industry, but note the progress which had been made by their rivals in the period which had elapsed since 1851. It is satisfactory to be able to affirm, on a perusal of the first report presented to Parliament by the judges appointed to weigh the important points we have referred to, that England has held her ground in most respects against her friendly antagonists, and in many has exceeded even that which her previous efforts had promised in the earlier trial of 1851. We shall not dwell here upon the statements made by Messrs. Cole and Redgrave on the general management, merely remarking that the former gentleman takes this opportunity of making some well-founded remarks on the inutility and inefficacy of juries as impartial, comprehensive, and correct judges of the matters brought under their notice—remarks which appear to find an echo in the minds of all the gentlemen who have been called upon to give their opinions on the special points referred to them.

The subjects treated in the first part of the report presented to Parliament are the linen trade by Messrs. Herdman, Grimshaw, jun., and Patterson, of the Belfast Chamber of Commerce; the worsted manufactures, by Messrs. Bottomley, Waud, and Child, of the Bradford Chamber of Commerce; wool and woollen manufactures, by Mr. Brook, President of the Huddersfield Chamber of Commerce; the woollen and worsted fabrics and iron manufactures, by a deputation from the Leeds Chamber of Commerce; the cotton and general produce, by Mr Cooke, of the Liverpool Chamber of Commerce; agricultural implements and produce, by Mr. Evelyn Denison; alimentary substances, by Professor Owen; Birmingham manufactures, by Mr. Wallis; silk, by Mr. Winkworth; furniture and decorations, by Mr. Digby Wyatt; drawing, modelling, and printing, by Mr. Charles Knight; and military art, by Captain Fowke, R.E. The names of those gentlemen will be guarantee for the remarks which follow:—

The linen trade of Ireland—ill represented, it must be admitted, in the Exhibition of 1855 was, nevertheless, the means of eliciting some very important facts with reference to the great question of foreign supply More slightly and better than the French, though not so fine or highly-finished as some specimens furnished by Germany, the Irish linens maintained their old reputation of excellence beyond all that are produced elsewhere. The enormous supply required for the internal consumption of France, and the great absorption of that country, amounting to 250,000,000 yards, valued at £12,500,000 sterling, renders it a formidable rival to Ireland, in case of a proximate opening of the French ports to the export of their produce. But at present it is calculated that the Irish and Scotch looms could undersell France by twenty per cent, in consequence of the comparative cheapness of yarns, now excluded from France by prohibition. Were this prohibition removed it would behove our manufacturers to be careful lest they should lose their superiority by failing to introduce all the improvements ensuring future economy and dispatch. At present, however, the real competitors of Ireland are not and land are Germany and Belgium, which are making great efforts to extend their export trade Their imitations of the Irish marks and form are a proof of the preference still existing for our manufacture; but as the Belgians can sell their imitations at a price as low as that which we put upon ours in Belfast, it behoves us again to strive for increased cheapness and perfection in manufacture. The greatest praise appears to have been elicited by the damasks of Dunfermline, which surpassed those of all competitors in finish and beauty of design.

In the manufacture of woollens England took the highest possible ground, having nothing to learn in the production of mixed woollen and cotton fabrics, but much of wool and silk mixed goods and merino proved the superiority not only of France, but of other Continental nations. Even in these, however, it seems as if there were no real obstacle to our improvement and final superiority. The deputation from Bradford scout the idea of the French system of drawbacks being really sufficient to account for our inferiority. They prove that if the French exporter, on the one hand, receives a bonus of 5½ to 8½ per cent on the exports ion, he pays very nearly the same price for the importation of the raw material. The fact appears to be that the English producers do not make fancy goods, all wool, or mixed wool and silk, because there is no demand for them in England. Their views are too much bounded by the horizon of Great Britain, and do not extend to foreign markets. There is room, in fact, for an increase in our production if we give ourselves to the making of these species of goods, of which the Continent has had the monopoly. There is no obstacle of machinery nor of raw material to render us inferior to our neighbours. At the same time the interest taken in those goods which England does produce was in 1855 greater than ever, and no doubt were France to lower her tariff the woollen trade of England would in that branch receive a great increase.

In the consideration of another branch of the woollen trade—that of cloths, more peculiar to Huddersfield—there was less reason for self-satisfaction. It was admitted that in England the same amount of mechanical ingenuity had not been extended to the woollen machinery as to that which the cotton and worsted trade had distinguished itself. This—in part apologised for by an allusion to the difficulties of our patent laws—is a marked instance of our inferiority, although less so than was noticeable thirty years ago. Still, it is not denied that the Continental manufacturers competes with us in many natural markets at this time in which of old we had almost the monopoly. Here again producers appear to have limited their views to the satisfaction of home wants, regardless of the importance of foreign supply. They have been backward in machinery, in general ideas of trade; and in the incentives to progress, such as the formation of weaving and industrial schools, they have been wanting in initiative and energy. It was urged, indeed, by the deputation from Leeds, that, as regards goods daily selling and producing in that neighbourhood, the comparison between them and those manufactured on the Continent led to the certainty that English prices were less, whilst the result was more adapted in quality to the great mass of the population of most countries; but this does not explain the reason why such goods have not a wider circulation and sale. As regards the question of machinery, and the lack of energy of our manufacturers, the Chamber of Commerce of Leeds agreed with that of Huddersfield. England in producing silks shone rather in the manufacture of goods suitable for the million than in that of fine or finished ones for the upper classes—intrinsic value being thought less important than a large supply. In this the producers appear to have been urged as much by the wants of the English market as by those of the consumers in the United States, with which we are now driving an increased trade. Of the vicissitudes through which the silk trade has passed an ample notice is given in the Report, with an account of the evils produced by the restrictions of the Customs It is pleasing to notice that with a more liberal tariff the exportation of silks has increased from £1,202,863 in 1851, to £2,310,171 in 1854. the augmentation progressing still further in 1855.

On the subject of agriculture it was remarkable how ably England took and maintained the lead in every improvement—a result so marked that it led Mr. Denison to say:—"it might be that France had relied on its natural gifts of soil and climate, while England, less favoured, had been urged by her necessities to increased exertions." Whatever the reason may have been, there was no doubt of the English superiority in all that related to agriculture; and, as the results of this superiority are very startling some facts in connection with it will be interesting. France has devoted herself too exclusively to the production of corn crops, which are the immediate food of man, without sufficiently considering the means necessary to uphold the fertility of the soil under the exhausting process. England, on the contrary, has found in the rearing of cattle and the supply of manure the restorative process which is necessary the remarkable fact being that, as the head of cattle increases, the quantity of corn increases also; thus, on a surface of 20,000,000 hectares, the British isles produce more food for animals than the entire surface of France of double the extent. Hence the supply of manure is in proportion three or four times greater. If we compare England alone, we find her, being not larger than one fourth of France, produce 38 000,000 of hectolitres of wheat, 76,000,000 of hectolitres of barley, 84,000,000 of hectolitres of oats. If France produced as much in proportion, she would produce, deducting seed, 150,000,000 hectolitres of wheat; 200,000,000 of oats and other grain—that is double her actual production. Taking all products into account, animal and vegetable, it appears that the produce of England per hectare nearly doubles that of France. The most remarkable feature of British farming, as compared with that of France, is the number and quality of sheep. The number of sheep in France and in England is about equal—35 000,000. These 35,000,000 in the United Kingdom live on 31,000 000 hectares of land, in France on 53 000,000 The great difference, however, is in the breed of sheep, the weight of an English sheep being on an average, double that of a French one The same features are found in the comparison of cattle in the two countries. In France, three products are demanded of cattle—labour, milk, and meat; in England, only two milk and meat. Inaction is the normal state with us, the contrary in France. If we look to labour, the ox is killed when he has finished his task. If we look to meat, the ox is killed when he yields the largest amount. In France the result is, that out of four million head killed, 400,000 000 kilogrammes of meat are taken; in the United Kingdom, two million heads produce 600 000,000 kilogrammes of meat: more than double the French result. France, however, is on the road to progress, and endeavours, by importation of our breeds, and other means, to commence a struggle of rivalry. One of the results of the Exhibition of 1855 was a representation to the Imperial Government of the heavy duties on agricultural machinery, followed shortly after by a large reduction highly favourable to English trade in this branch of manufactures

The close examination and comparison to which the ornamental Birmingham manufactures and British furniture and decorations were subjected, afforded unmistakable proof of the inferiority of England in all that has reference to true taste and artistic merit. Although it was gratifying to remark that our rivals had not given us the lesson of 1851 in vain. Progress, it was evident, had been made, but slowly and with effort. The Birmingham manufacturers, anxious, no doubt, for improvement, but impressed with the belief that they were still too far behind the world in progress, exhibited but little; and, where they did, still evidenced that hankering after French design which betrayed a desire to advance without the possession of originality. Excess of ornamentation, overprofusion of relief, design neither elaborate nor finished, are still our characteristics.

In furniture the French still carried off the palm of fertility of design and excellence of manipulation with a general freedom from over-ornamentation, a severe study of proportion, and a refined subordination of parts. We can only trust that in the new steps taken with such spirit by our Government to furnish means of study in every branch of ornamental art to young students the foundation has been laid of a better future; and that, fostered as ornamentation and design now are in every possible way in the country, we shall not long remain inferior to our neighbours in the struggle to produce works of taste unmarked by the stamp of vulgar imitation, or a spirit of artistic ignorance.

## LITERATURE.

JOHN HALIFAX, GENTLEMAN A Novel, in three vols. By the Author of the "Head of the Family," "Olive," &c. Hurst and Blackett.

A new novel by the author of the "Head of the Family" is a welcome announcement, on more accounts than one. Six or seven years have passed since the "Ogilvies" (the first work of this writer) was given to the public. In that period she has lost nothing of the graphic force and moral truth which—spite of something that was defective, and much that was superfluous in point of art—gave an irresistible charm to her initial story. In each succeeding work, while power has been more felt, effort has been less apparent. Those sins which the writer was once prone to disclaim have gradually ceased to be occasions for rhetoric, and assumed their proper function as springs of action and character.

It is a high merit of this lady that she has always felt the responsibility of her calling; and that, without slavish subservience to any small dogma, a moral ideal in its best sense has pervaded her creations. The hero in "Olive," a zeal tempered by intellect, yet won to faith by the loving heart and pure life of his betrothed, and the equally noble teaching, in the "Head of the Family," that the privilege of happy love can only be granted to hearts willing to sacrifice love itself to duty—are instances of our meaning. In the present novel of "John Halifax," this moral influence is constantly, but unobtrusively, at work. It threads the story like "a river wandering at its own sweet will." We are not compelled to look by its course, we often lose sight of it in the interest of the story from some commanding point of interest that it flashes upon us with its truth, and that we become aware of the source to which the tale owes its freshness and beauty.

Nothing can be more simple than the plot—John Halifax, an orphan lad, forced to earn his bread by any casual labour, enters by chance the town of Norton Bury. While there, he is employed one day to draw a certain Master Phineas Fletcher in a hand-carriage. Phineas is ailing and a cripple. His mother is dead, his father is of the strictest Quaker pattern, a man not without a kindly basis of character, but cold and rigid in his externals In conducting his charge home, John Halifax takes such tender care of the invalid boy that the heart of the latter—unaccustomed to gentle nurture—leaps to him. Abel Fletcher, the father of Phineas, is a tanner, and takes John into his service Notwithstanding the different position of the two boys, a friendship springs up between them. Their intimacy is at first unacceptable to the father; but John's proved worth triumphs in time over the old man's scruples. The orphan lad becomes first the apprentice and afterwards the partner of his employer, whom he survives. The bonds of affection between John and Phineas are knit so closely that through a long lifetime the two are scarcely ever separated. When John marries, his wife receives beneath the roof of the adopted brother, and it is Phineas himself, an old man, who, after the death of his beloved companion, relates his history in these pages

The events of this history, though they are numerous and possess great interest as successive phases of the hero's character, are yet such as might naturally happen to one in his lot, here of life Their chief romance is that which a true and loving heart casts upon all forms of experience. We have the long summer holiday so sweet when earned by labour—which the two lads share together in the fields; the plans and hopes which they mutually confide to each other; a joint expedition to the theatre which draws down the wrath of Abel Fletcher and issues in the temporary parting of the transgressors. John, to his honour, resolutely declines to see his friend by stealth and never again enters into Abel Fletcher's door until it opens to the claim of single-minded and devoted service. We then see the honest pride of Phineas his father's doubts gradually clear away, and he raises John to a position of trust.

Next comes a bread riot, very graphically told, in which young Halifax shows how well that trust was earned. By mingled firmness and kindness he conciliates the rioters whom Abel Fletcher's austere justice had infuriated. The rescued fortunes, if not the life, of his master are due to John. After this the two friends enjoy a short sojourn in the pure country, the closing days of their undivided affection, for it is here that John falls in love. She whom he loves is far superior in station to himself; and John, refined not only by nature, but self education, is only too sensible to the charm both in mind and manners of Ursula March. Circumstances throw them together while the lady is ignorant of his condition. She treats him as a friend, and already the dawn of hope gleams on the horizon, when the young man puts the lady on her guard by avowing his position, and parts, as it seems for ever, from the object of his secret worship. This, however, is not so to be. Fate again brings them into contact. In Ursula's presence John encounters from one of her relatives a marked indignity. True to his Christian belief he forbears to retaliate, a duty's restraint, which only a noble nature could understand, rivets Ursula's esteem. Still he gives no sign of his love. A wasting illness, the result of brave wrestling with his heart, reveals its secret to Phineas. Phineas reveals it to Ursula, and yields the one friend of his Lady life to a power mightier than friend-hip. John and Ursula marry. They are poor, for her fortune is withheld; but John resolutely makes way. Wealth follows respect; influence, wealth. Amongst his dependents he is the arbitrator of differences, the reconciler of feuds. He upholds rights of conscience, teaches them their social duties, lightens their burdens, bears with their misconstruction, and by the long witness of a noble life, their trust, and raises them to self-reliance. The good citizen is no less the good father. No pages in these volumes are more charming than those which describe family relations. The love that turns hardship into mirth; the yearnings of husband and wife over their firstborn—a blind girl who sheds an infinite grace and plaintive sweetness through the household, the jealous heartburnings of the two brothers, who are rival authors; many joys chastened by anxieties, and hallowed eventually by one sweet regret (for the blind girl dies early); sad partings and scarce hoped-for meetings; the vicissitudes of domestic life, marriages and births, with the calm influence of parental virtue over all; these are the materials from which the author has derived many pictures, animated and touching in themselves, but the enumeration of which would give little idea of the pathos and truth which they gain from her treatment. At last the husband dies, and the wife, endeared to him by the experience of age even more than by the trust of youth, bends over him and peacefully breathes her last. In the recital of this there may seem a tinge of melancholy. It is far otherwise in perusal. The pathos is that of autumn, not of winter—of fruition, not of decay: the harvest of life is fully ripe and reaped for immortality.

This book would, nevertheless, yield some fault to those who cared to seek them. The story moves slowly at the commencement, and unnecessary minuteness is sometimes lavished on details that scarcely repay it. In more than one case the writer exaggerates the direct power of pure appeal, and too freely sacrifices weighty results to mere looks and intonations. Again as to character, in which she is so felicitous in the whole, there are a few mistakes. The Richard Brithwood, the Jenkins's John Halifax, is a personage making every allowance for the state of manners fifty years since—equally insufferable and improbable. Lady Caroline Brithwood, whose episode has remarkable interest, is herself painted hardly. There are sad passages, too, in her story, which are told too abruptly; and in which John touching her errors with a roughness more honest than skilful makes the reader wince as well as the culprit.

We are, however, dissecting coldly a story which it is impossible to read so With such truth are the characters drawn that they produce all the effects of real persons. We are at first almost vexed with Phineas and Ursula for their constant enthusiasm about John; but as the end draws near we feel that they knew him better than ourselves, and we are disposed to apologise to them as to friends unwittingly wronged. The very exhortation, which is in one sense a fault, helps the feeling of reality. So do the occasional sharpnesses of the generous and true-hearted Ursula. When we close the volumes we miss the per-on of the story, as if we had lived with them. The writer's style is that excellent one for prose fiction which draws its motives from the purest ideal, and embodies them in the most familiar forms. While her power as an artist have never been more evident than in the present work, so also the end for which she has used them has never been worthier. Her faculty of transferring the value of things and principles from what is conventional to what is real is admirably shown. The story of "John Halifax" is the life of a Christian. The author might have appended "Christian" to his name with as fit propriety than "Gentleman," and we can give her no higher praise than to say that we rise from her work with a deepened sense of the identity between the two characters.

BECHSTEIN'S HANDBOOK OF CHAMBER AND CAGE BIRDS. Edited by H. G. ADAMS, Esq. Ward and Lock.

The first idea which would probably arise in the mind of a person not particularly interested in song birds, on looking at such a title as the above, would be that the book was one addressed to a particular class, and which was not likely to be of much use to any other. The reading of a few pages would, however, dispel this notion, and long before the book was finished the acknowledgment would be made that a most interesting lesson on natural history had been most captivatingly conveyed. The habits of birds are better worth studying than is generally imagined, and they display a far higher degree of instinct or what some writers call reason, than they usually get credit for The reader is not to expect many novelties of this kind in the book before us, as its object is to teach the best mode of treating and preserving the feathered pets, which are such general favourites; nevertheless, much interesting information as to the unusual history of birds is given. It is impossible to read these pages without acquiring additional interest in the delightful song-birds, and none who keep birds should neglect to study the precepts here laid down for their guidance: they will thus preserve their birds healthy, in good plumage, and in full song; they will be enabled to cure them of many ailments to which they are subject, and to repay them for their melody by as much happiness as, in a state of captivity, is attainable.

Bechstein, the German naturalist, is well known as the great authority on cage and aviary birds, and this little book appears to contain as it were the pith and essence of his many hefty and expensive works, with much information which is fresh and original.

THE DEPUTATION TO RUSSIA.—The arrangements for the embassy or deputation to Moscow on the occasion of the Emperor of Russia's coronation are said to be complete The Duke of Cambridge, whose acceptance of the office at the head of the embassy was held in certain, having unexpectedly declined, Lord Granville goes in his place. Lord Granville takes with him as attachés, among others, the Earl of Dalkeith, Lord Burghersh (eldest son of the Earl of Westmoreland), and Lord Cavendish (eldest son of the Earl of Burlington, and heir to the Dukedom of Devonshire) The following a so accompany the mission—the Marquis and Marchioness of Stafford, Sir Robert and Lady Penny Pea, and Mr. and Lady Margaret Lawson (sister Dr. Sandwith, one of the heroes of Kars, is appointed medical attaché—an appointment acceptable to the Russians, who have much regard for him in consequence of his treatment of their wounded after their repulse before the place last autumn. The voice for the mission is to be £10,000. The French Ambassador going on the same mission, M. de Morny, is to receive a million of francs, or about £40,000.

THE NEW RUSSIAN LOAN.—It is said that the new loan will amount to a hundred millions of silver roubles—equal to nearly fifteen millions sterling—which will be perhaps the greatest loan ever negotiated on the Continent at one time—at all events by Russia. The interest is fixed at four per-cent, and a portion of the bonds will be redeemed every year by means of a sinking fund formed by an additional one per cent reserved annually, with which will be combined a number of money prizes as in a lottery. The object of the loan is principally for the construction of railways in the interior of Russia, and partly for the indemnification to be paid to Denmark for giving up the Sound Dues, although it is whispered that a considerable part of it will be placed at the disposal of Admiral the Grand Duke Co nstantine for the purpose of accomplishing the great wish of his heart, of metamorphosing the whole of the Russian navy into screw-steamers as befitting requirements of the present day

A TURKISH PRAYER FOR THE ALLIES.—There is a good story of a Scottish minister, who being compelled to pray for Prince Charles in 1745, did it after this fashion—"As to this young man who has come among us seeking an earthly crown, we beseech Thee to take him to Thyself, and give him a crown of glory." We may cap the anecdote by one related in the interesting new work, "Lancet, or Smyrna and its British Hospital" The chief Imaum had been requested to offer up prayers for the Allies; he refused—he could not pray for unbelievers. The request then became a command; and he compromised the matter with his conscience thus: he thanked God that he set of infidels were killing another, and hoped they might extirpate each other.

LIVE FISH AT THE PARIS EXHIBITION.—The Strasbourg Railway has brought to Paris for the Exhibition in the Champs Elysées, about 3000 fish from the Artificial Fecundicultural establishment formed at Huningen by the French Government. They consist of salmon from the Danube, trout from the lakes of Switzerland, and grayling from the Lake of Constance These last-named have only been hatched this spring, the salmon trout are fourteen months old, and are 4½ to 6½ inches long There are two salmon three years old, one of which is nearly 19 inches long by 13 inches in circumference The fish were conveyed in cylindrical reservoirs made of tin, the water being renewed frequently.

## FINE ART EXHIBITIONS IN LONDON.

OUR SIX Fine Art Illustrations this week are taken from six different exhibitions in London now open to the public. Thus our first Illustration is from the New Society of Painters in Water Colours, and is justly looked upon as one of the best recent specimens of Mr. Louis Haghe's pencil. Mr. Haghe has found his subject in the "Statuts de l'Inquisition d'Etat." He calls it "Antechamber of the Tribunal of the Inquisition in the Ducal Palace, Venice," and the passage he appends to his picture is as follows –

Si un patricien non banni entrait au service d'un Prince étranger, a moins d'être prêtre ou religieux, domicilié à Rome; il sera sur-le-champ appelé, sans peine d'encourir la disgrace du gouvernement. S'il refuse de venir ses plus proches parens seront incarcerés deux mois après on avisera aux moyens de la faire tuer partout où il pourra se trouver; et si cela est impossible, il sera degradé de noblesse, par decret du conseil des Dix, après quoi, ses proches seront mis en liberté.

With what skill and character Mr. Haghe has told a touching story let our large Engraving tell.

Our second Illustration is from the Society of British Artists in Suffolk-street. It is by Mr. Hurlstone, the President of the Society, and represents "A Neapolitan Peasant Boy." There is a touch of Murillo in this picture—and it is as good an example of Mr. Hurlstone's style as this year's Exhibition will be found to supply.

Our third Illustration, "A Burial in the Vosges," forms No. 62 of the third Exhibition of the French School of Fine Arts now in London. The painter, Gustave Brion, was a pupil of Gabriel Guerin. He received the second-class medal (*peintre et paysage*) in 1853; and was honourably mentioned by the judges at the Universal Exhibition of 1855. He has told his story of a Funeral Procession in the Snow with equal pathos and skill.

Our fourth Illustration, in size a companion to Mr. Haghe's picture, is taken from the Old Society of Painters in Water Colours. The subject is "A Fête Champêtre," and the painter is Mr. G. Dodgson. It is a most able drawing, reminding us at every turn of Watteau and Stothard. In a certain theatric effect it recalls, and pleasantly recalls, some of the larger pictures of Paul Veronese. With Mr. Dodgson's water-colour drawing before us we can live at Versailles in the age of Louis Quartorze.

"A NEAPOLITAN PEASANT BOY."—PAINTED BY F. Y. HURLSTONE.—FROM THE EXHIBITION OF THE SOCIETY OF BRITISH ARTISTS.

Our fifth Illustration is from the National Institute of the Fine Arts, in Regent-street, Portland place. It is an English landscape, by G. Barnard. The view is in Surrey, in the grounds of John Evelyn, at Wootton—classic ground—trod in summer with reverent feet by the many admirers of the perfect model of an old English gentleman.

Our sixth Illustration is from the Royal Academy.—"Maidhood"—by Mr. G. E. Hicks.

Standing with reluctant feet,
Where the brook and river meet
Womanhood and childhood fleet

Gazing with a timid glance
On the brooklet's swift advance,
On the river's broad expanse.

Deep and still, that gliding stream,
Beautiful to thee must seem,
As the river of a dream.

So sings Mr. Longfellow, and Mr. Hicks has not unsuccessfully sought to embody.

THE EARL OF YARBOROUGH'S PRIZE WHIPS.—The Brocklesby foxhounds are well known as the oldest and one of the best-bred packs in the kingdom. The Brocklesby tenants contribute a greater number of well-mounted sportsmen to the hunting-field than any other estate. On the necessity of encouraging fox-hunting the Earl and his tenants are perfectly agreed. There is no trouble about preserving foxes on the wolds—the wives are as zealous as the farmers. In order to cultivate the good feeling so necessary in a hunting district, Lord Yarborough gives prizes every year for the best three-year-old hunter colt and filly in the possession of any of his tenants, two handsome well-mounted and suitably-engraved jockey whips; for the foxhound dog and bitch sent to the kennels in best condition from their walks, two hunting-whips. We may be allowed to explain, for the benefit of our non-hunting readers, that foxhound puppies are, after being weaned, distributed among certain tenants to dry-nurse, or, technically, "walk," until the time comes round for initiating them, in company with their elders, into the mysteries of hunting. This year, Callow, of Parklane, has manufactured two Malacca cane hunting-whips, appropriately ornamented in silver relief, with a representation of a pack in full cry down hill after a fox; the one inscribed:—"Presented by the Earl of Yarborough to Mr. Thomas Borman for the best dog in 1856." The other: "To Mr. Francis Newton for the best bitch." These prizes are handed down as a sort of heirloom among the Brocklesby tenants.

"FUNERAL IN THE VOSGES MOUNTAINS."—PAINTED BY BRION.—FROM THE LONDON EXHIBITION OF THE FRENCH SCHOOL OF THE FINE ARTS

A FETE CHAMPETRE.—[FROM A PICTURE BY DODGSON—FROM THE EXHIBITION OF THE OLD SOCIETY OF PAINTERS IN WATER COLOURS.]

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*" A little chink may let in much light"*—OLD PROVERB.

THE subjoined letter copied from the original now in the Bodleian Library will be everywhere read with interest. It has escaped the re-search of Cromwell's last and best biographer and establishes a fact which, so far as we are aware, has not been noticed by any historian, namely, that Oliver at one time contemplated, and was earnest in his endeavours to effect, a marriage between his son Henry and one of the daughters of Lord Wharton.

### OLIVER CROMWELL TO LORD WHARTON.

My deere Lord,—indeed I durst not suddenly make up any judgment what would be fitt for me to doe, or desire, in the businesse you knowe off, but belege engaged to give you an account upon our last conference, I shal be bould to doe that, and add a word or two therewith.

For the estate I mentioned I cannott now (by reason my steward is not heere) bee soe exact as I would, but the lands I designe for this occasion are Burlye, Oakam and two other little thinges not farr distant, in all about £1900 per annum. Moreover, Dalby Broughton, £1600 per annum. Burlye hath some charge upon itt, weh will in convenient tyme bee removed. This is neere twice as much as I intended my sonn, yet all is unworthye of the Honorable person.

My Lord, give mee leave to doubt that the Lady hath soe many just scruples weh, if not very freely reconciled, may bee too great a temtation to her spirit, and alsoe have after inconveniences. And although I knowe your Lordship reallilye, yet I beleive you may have your share of difficultyes to conflict with, which may make the businesse unease, wherfore good my Lord I begg itt (if there bee not freedom and cheerfulnesse in the Noble person), lett this affaire allide easilye off, and not a word more bee spoken about itt, as your Lordship's thoughts are, soe hushe all, and save the labor of little Mulls foolinge, least she incurr the losse of a good friend indeed. My Lord I write my hast plainlye to you as becomes, my Lord, your most affectionate servant.

June the 30th, 1653. O. CROMWELL.

For the Right honourable the Lord Wharton, theise.

Lord Wharton's endorsement—My Lord Generall to mee about his sonne.

### HOLLAR, THE ENGRAVER.

THE dispersion of Colonel Durrant's magnificent collection of Hollar's works this week, under the hammer of Messrs. Sotheby and Wilkinson, will render the following letter regarding the great artist of peculiar interest. It is a communication from Mr. Place, of York, in answer to one from Vertue, requesting some information as to Hollar's life, and has never, we believe, been printed —

COPY OF A LETTER FROM MR. F. PLACE.

From York, May 20, 1716.

SR,—By my neighbour Mr. Lumley I had he favour of yours, in which you are desirous to know some passages concerning Mr Hollar. He was a person I was intimately acquainted withal, but never his disciple, nor anybody's else, which was my misfortune. Mr. Winceslaus Hollar was born at Prague, in Bohemia, but I know not the year [1607], he was bred a clerk in some of the offices of that country; which he left when the other treasure troubles brake out there, occasioned by Gustavus Adolphus. After he left his native country he came into Flanders, and settled some years at Antwerp, where he did several plates, as you may see by the date of his works. He was a general master, so did not confine him-elf to any one studie but did everything not ill; but his most excellent performances are views, churches, &c., and varieties of the Aruudelian collection. He studied with one Merian, an artist of that country, who has likewise etch (*sic*) the most prints of views of places in Germany of any man that ever was; but Mr Hollar exceeded his master, he was the most indefatigable man that has been in any age, as his works will testifie. He had a defect in one of his eye, which was the left, so that he always laid his hand before it when he wrought. He never used spectacles. He was sent over by K. Charles 2nd to Tangier to make designs of the town and mole. I have, I believe, fifteen or sixteen drawings he made of that place; he published, I remember, a book of Views of Tangier, which may be had at Overtons for his father bought the plates. The King gave him but 100 pounds for all the trouble and hazzard he run, for in their passage they were attacked by 3 Turkish rovers, which after an obstinate fight they were forced to-shave off. There is a print with the relation, of his own doing in one part of Ogilby's Atlas.

He lived in Bloomsbury all the time of the Plague, but suffered extreamly for want of business, which oft Peter Pinet (*sic*) made an advantage of, purchasing several of his plates for a trifle. He told me he gave him but 80 shills. for the Long View of Greenwich which very well deserved 10 or fifteen pounds. He was always indigent, and had a method of working not very common. He did all by the hour, in which he was very exact, for if any body came in that kept him from his business, he alway laid by hour glass on one side, till they were gone. He always reccod 12d an hour. He carried arms in the militia in Germany, but was soon tird out. I believe his first coming into England was with Lord Arundel who was sent Ambassador to the Emperor, and he lighting of Mr. Hollar as they came down the Rhyne, took him into the boat. He drew several designs for his Lordsiup, who was the first nobleman in England that ever pretended to a collection in England. Mr. Hollar was a very passionate man, easily moved. He has often told me he was always uneasie if not at work. He was one of great temperance; I don't think he in all his lifetime was ever seen in drink; but would eat very heartily. He was near seventy when he died, about thirty-six or forty years ago in a house he had in Gardner's-lane, King Street, Westminster, of a Parralastick fit; and before his departure the Baptists came and seized all he had, which gave him a great disturbance, and he was heard to say they might have stayed till he was dead. He left a widow and two daughters, and had a son which was very promising in his way. He died young.

I rs.,

F. PLACE.

NOTE BY VERTUE.—"These is three prints of Hollar's own picture, etched by himself—one in *clebres* (?), "Lives of Painters." Two others alike—only one less than the other. The bigger of these two has etched on it 'Ætis 40, 1647, whereby he must be 71 years old if he died in 1678, as is said."

### NOTES.

ROBERT BURNS.—In corroboration of the note in your "Memorabilia" of the 3rd inst. regarding the early orthography of Burns's name, there is still to be seen a headstone in "Alloway's auld haunted kirk" wherein is inscribed—

William Burnes
Died
1784.

And I have an autograph letter of the poet's dated "Mossgavit, 11th Nov., 1783," in which he writes his name "Robt Burnes."—JAMES RUSSELL

SHAKESPEARE READINGS.—While reading with interest your Shakspearean Notes (p 287) in the ILLUSTRATED LONDON NEWS, I was struck for the first time by the resemblance of the sentence "turning your books to graves" to the words of Horace's Ode, lib. i. od. xxiv. 14-17. —

Quid dicendum oniquæ nobil.
Line Pan si Socratis ani et dicum
*Mistave lorna Horis*
Publicius meliora tendat?

If as a practice the passage was in Shakspeare's mind while he wrote the reproof of Westmoreland and to the Archbishop of York, one should be inclined to think that "turning your books to graves" is not to be taken literally of the transformation of leather book covers into leather leggings. But of course useful studies into warlike pursuits, by selling his library to buy his armour. I may be mistaken, but it looks to me as if the Bard of Avon had here, as often, had Lucan under contribution.—J. B., Ludlow.

THE WIFE OF ALLEN, FOUNDER OF DULWICH COLLEGE.—"CARRIED" THE LORD MAYOR'S OFFICERS. When Allen was on a hunting visit at Cashiobord, he heard that his wife, whom he had left in London, had been "carted," "and all her followers" (meaning by the latter, some persons who had left behind with her), for a disorderly house. For Lord Mayor's show, and great dramatic performances. Upon this, he wrote her a letter (addressed to himself), of which the following is a verbatim copy:—

"Mr. Allen, on the bore side

Mr. good wife, I hartle and loving mouse, I send you a thousand commendations, wishing thee as well as well may be, and hoping thou art in good health, with thy father, mother, and sister. I have no newes to send thee, but I thank God we are all well, and in health, which I pray god to continue with thee in every, and so I pray thee, good wife, be merry, for I hope I shall be with thee shortly. I pray you, if it is well known, that I am at Cashiobord, and that I send to and fro, you shall not have any Lord Mayor's men, nor any thing to trouble you, but they will come and carry me away, but lett you fall in the house and Tarmigants. But, mouse, wi. I from hom, I be revenged on them soe, when I come. I bid thee farewell. I pray to God to bless me how we meet, and my blessing and commendations to my father, mother, and sister, and all my cousins, and to all the rest that love thee. Thy lover, and no bodies els, by god's grace. Edward Allen. Farewell mucho mouses, and mouses, and farewell mouse comfortable Bess."

### QUERIES.

WHY IS A TAILOR SAID TO BE THE NINTH PART OF A MAN?—S. T. A.

[The contemptuous expression has been too long tolerated as an unfounded imputation on a respectable profession, from which it is not likely to have taken its origin. The English word coward is derived from the Italian *codardo*, which comes from *coda*—a tail—a codardo or coward being one who hangs behind. The literal meaning of coward is therefore a *tailer*, and hence it the proverbial vulgarism now connected with the trade tailor he traduced to a pun on the word? When we speak with contempt of a tailor, we really mean a poltroon of any kind, who is a codardo or tailer, and if we knew our etymology better, we should not regret it as an aspersion on the useful fraternity of the shears and thimble, although ignorant usage has for generations so perverted the term.]

GAUNTS' DEEDS.—What and where are the *Gaunts' deedes* so often mentioned in the Bristol Registres and Guidebooks?—EDWARD W. GODWIN.

[The Gaunts' deeds are the records of the ancient Hospital of St. Mark, at Bilswick, an institution founded by the great Gloucestershire family of Gaunt who endowed it with the manor of Gaunts' Court. The hospita, being suppressed, its possessions were sold by Henry VIII. to the city of Bristol for £1000. The building is now used as a blue-coat school. The deeds themselves are in the Record-office of the Crown.]

LEAP YEAR.—What is the origin of the custom of women making offers of marriage in leap year, and what has the scarlet petticoat to do with the matter, and also what does the gentleman forfeit by a refusal?—LA STELLA DI SPERANZA.

A QUAINT SAYING.—What is the origin of the saying "He caught him napping, as Morse caught his mare." Who was Morse? and when and where did he flourish?—JOB.

THE SHEPHERD OF BANBURY.—Can any subscriber tell me in what book can be found an account of "The Shepherd of Banbury"? It is a book or a personage learned on the subject of the weather and its changes.—D. C. L.

### ANSWERS TO QUERIES.

WHO WROTE "ROBINSON CRUSOE"? The letter of your correspondent, RAYMOND DELACOUR, recalls to my recollection Pope's indignant exclamation—"Garth did not write his own Dispensary!" If Mr. Delacour will try the very easy experiment of comparing all or any of the acknowledged productions of Robert Harley, Earl of Oxford, with "Robinson Crusoe" and then re-comparing "Robinson Crusoe" with all or any of the other acknowledged works of Daniel Defoe, he will, I think, be perfectly satisfied that it is to the literary "hose-factor," and not to the book-collector or the statesman, that we owe "The Life and Strange Surprizing Adventures of the Right Honourable Robert Harley, Earl of Oxford, when he had resigned his Employments, Written by Himself." It is nevertheless, probable that the well-known story to which Mr. Delacour refers, and whose appeared in the *Gentleman's Magazine* so long ago as March, 1788, is not absolutely void of all foundation. The late celebrated Caulfield, when he had concentrated all his pamphlet, or curious piece of bibliographical information to Sir Walter Scott, would in high glee perambulate his book shop, exclaiming "Mr. —— I am all but the author of the 'Waverley Novels.' That the Earl of Oxford wrote the first volume of "Robinson Crusoe" when he was a prisoner in the Tower of London" (June 1715 to July 1717) is quite incredible, but it is by no means unlikely that he orderly occasionally rendered to the historian, moralist, critic, theologist, and politician, pamphleteer Defoe some such trifling assistance as courtable and letter now and then afforded to Sir Walter. The first volume of "Robinson Crusoe" appeared in April, and the second in August 1719. Now it is unquestionable that "The Adventures of Alexander Selkirk" had been previously printed in eight-penny pamphlets. It is almost equally certain that Lord Oxford's very copious and extensive collection of pamphlets connected with English contemporary history and literature, contained many of "Providence displayed, or a very surprising account of one Mr. Alexander Selkirk" &c. It seems all unlikely that the Earl, in the course of their almost continual literary intercourse, drew Defoe's attention to this little tract, and no one, I believe, ever doubted that from it the first rude hint of "Robinson Crusoe" was derived. It is worth remarking that within a few months of the publication of his masterpiece Defoe was attacked by Gildon in a dull, malignant parody, entitled "The Life and Surprising Adventures of Mr. De F——, of London, hosier, who has lived above fifty years by himself in the kingdom of North and South Britain: the various scenes of his fortune, and the discoveries he has made for the benefit of his country. In a dialogue between him, Robinson Crusoe and his Man Friday." This trash, otherwise quite valueless, proves at all events that the contemporary enemy who denied the merit, never doubted the authorship of the most popular of our national romances. "Robinson Crusoe" was at one time attributed to the amiable and witty Dr. Arbuthnot; but that absurdity was speedily exploded, and has not been since, so far as I am aware, revived. The entire question is satisfactorily discussed by Mr. Walter Wilson in the seventeenth chapter of the third volume of his very valuable "Memoirs of the Life and Times of Daniel Defoe," and more concisely by the elder Disraeli in his "Curiosities of Literature," in the "Miscellany" (Vol. v., 8vo., p. 429) contains a reprint of "Providence Displayed," dated 1726, and probably the result of the then daily-increasing popularity of "Robinson Crusoe." and in the eighth volume of the same collection is a tract of extraordinary rarity professing to give the "Genuine Memoirs" of a sailor set on shore by his captain at the Isle of Ascension, where he is represented as having died of hunger in October, 1726, after a few months' hard struggle to prolong existence. This last-named appears to have appeared—was, with considerable subtlety, and a graphic power not unworthy of Defoe himself, from which great work, however, it is palpable but very clever plagiarism.—R. BRUNDELL, F.S.A., Temple.

LORD FLAME.—Samuel Johnson was a protégé of the Duke of Montague, and at the instigation of that nobleman he wrote the mock tragedy of "Irene," which was generally appropriated by the Duke and his friends in the newspapers of that day that it became the rage for some time. In his old age the Earl of Harrington, to whose family he had taught dancing, made him a present of a small mansion at Gainsworth, a romantic village near Macclesfield. Where on his death, he earnestly requested that his body might be buried in Gainsworth Wood, rather than in the churchyard. The reason he assigned for this strange request was that his bones might be undisturbed. A vault was accordingly made for him in the wood, near a spot which had been one of his favourite haunts. There his remains were laid, and the neighbouring gentlemen, wishing to preserve the memory of so eccentric a character, erected a tomb on the spot, with the inscription you published.—T. B.

ORIGIN OF SOME COMMON PHRASES.—The origin of the expression "to eat humble-pie" is, I believe, as follows:—When our forests were stocked with deer, and venison-pasty was commonly seen on the tables of the wealthy, the inferior and refuse portions of the deer (termed the "humbles" of the animal) were generally appropriated by the poor, who made them into a pie: hence "humble-pie" was at that time probably suggestive of extreme poverty, and was afterwards applied to degradation of other kinds. The slang expression for dining, "to kick the bookes," originated from the mode of satisfaction adopted by a suicide who stood with his neck in a halter on a bucket inverted, and then, kicking the article from him, remained in statu. The phrase "as fine as fivepence" seems to be used without any particular meaning, for the sake of the alliteration only. S. M. H., Brixton.

"Dear Dodpoll was his wife's sister

# The Peace Commemoration

AT DUBLIN.—FIREWORKS IN PHŒNIX PARK.—(SEE PAGE 635.)

## THE PEACE COMMEMORATION.

### THE GREEN-PARK.

The situation of this park is familiar to everybody. Spacious and elevated, with the ground gently sloping from Piccadilly to Buckingham Palace and the Mall, perhaps there are few sites better adapted to a pyrotechnic display in or near the metropolis. Hither, then, from an early hour in the evening, trooped large masses of the population, as to one of the chief centres of attraction. True, the weather was anything but auspicious, and involved some *desagrémens*. The sky was overcast, and although there was no rain the air was raw and cold, deprived of the genial warmth of spring verging upon summer, by a keen north-east wind. Cloaks, over-coats, and mufflers, warm dresses and wool en shawls, thick-soled boots and shoes were, therefore, the order of the day, and miserable were they who were without them. As the hour approached for the introductory discharge of fireworks, each minute added to the moving throng. Along every avenue leading to the park a living stream ceaselessly flowed with rapidly-increasing strength and velocity, and appeared powerful enough to bear down everything before it. If there had been no more than the usual means of ingress, serious accidents could scarcely have been avoided, but, happily, there had been opened six new entrances—two at the side of Piccadilly, two near the Wellington statue, one opposite Buckingham Palace, and another at the corner of Stafford-house—each of considerable width, and therefore not a single mishap occurred. Yet many thousands entered the park in an incredibly short space of time. Deepening and thickening with wonderful rapidity, the huge mass extended itself over the soft and verdant carpet beneath its feet, and even took possession of the trees. The effect upon the park was like that produced by the plague of locusts. The green patches of turf on which the eye rested at one moment were invisible the next; and for some time before the commencement of the fireworks not a blade of grass was to be seen. An immense multitude of human beings stretched far away on every hand, and was to be seen congregated together, especially towards the centre of attraction, that one might have walked on the heads and shoulders of the people with almost as firm and steady a tread as if his foot pressed the solid ground. Nor was that all. The large open space in front of Buckingham Palace, the Mall, Constitution-hill, and every point from which the fireworks could be seen, were crowded with spectators. Numerous parties of ladies and gentlemen occupied the balconies and roofs of Stafford House and the neighbouring mansions, while hundreds clung like bees to the projections of the houses in Piccadilly. There was little with which the crowd could amuse itself whilst it waited for the commencement of the fireworks. A number of wooden frames, painted black, and of all shapes and sizes, extended for between 200 and 300 yards along the front of the open space reserved for the exhibition. They were mounted with fireworks of different kinds; but, however curious or promising, they could not be gazed at for ever, and there was nothing else to attract the attention of the people. The air, too, was cold and raw, and perhaps it was not surprising, in such circumstances, that recourse should be had to some rather questionable means of whiling away the time. It was not the fault of the crowd that a gang of ruffians endeavoured to create a panic by rushing about armed with bundles which they had torn from the trees. But to throw 200,000 or 300,000 sensible, steady people into disorder would have required a force much larger in numbers than any these "roughs" could muster; and, in point of fact, a small body of policemen, aided by a portion of the respectable bystanders, sufficed to put an end to their hopes of plunder.

The scene was much enlivened by the appearance of the mansions on the east and north of the park. In most of these purses had been given for the occasion, and the brilliantly-lighted rooms, one after another, each one displaying the varied internal magnificence of an aristocratic saloon, presented a beautiful and peculiar appearance. In many of them the balustrades were lined with spectators, those of the lower rooms with guests in full dress, and in the upper departments with the domestics and their friends, altogether exhibiting a spectacle which could not easily be matched anywhere else. Many of the houses were brilliantly illuminated. Bridgewater-house in particular presented four long series of lamps arranged on pillars, with devices above, making one of the most tasteful illuminations in the metropolis.

A few minutes before the commencement of the fireworks the Queen, Prince Albert, the members of the Royal family, Prince William of Prussia and other personages of rank, were seen in a pavilion erected on the north end of Buckingham Palace, facing the park. Her Majesty was received with loud demonstrations of loyalty and enthusiasm. The Royal party had an admirable view of the fireworks, and seemed to participate in the universal delight which existed.

Punctually at the appointed hour the entertainments began with a series of illuminations and a discharge of maroons. The fires were white, red, green, and yellow, and the effect was something like that which would be produced by a number of mammoth Bengal lights. For upwards of an hour and a half the air above the park and for some distance around was luminous with the blaze of suns, stars, comets, and streamers—the flight of rockets, shells, and Roman candles—the descent of meteors, parachutes, and showers of pearl, silver, and golden rain. Shining serpents and fireflies chased each other through a sea of light resting on a bed of upturned human faces, and ingenious contrivances with hard celestial names flamed against and athwart the sky in every variety of movement, till the eye was dazzled and the brain bewildered by the sight, the brilliancy of the colours, and the complication of lines and curves described by the flying rockets; while the ear in turn was assailed by the whizzing of wheels and revolving stars, the bursting of shells, and the discharge of mines and batteries. The programme was a rather long one, consisting of no fewer than twenty-four "divisions," and was not exhausted till eleven o'clock. It comprised almost everything that is either new, curious, or beautiful in pyrotechny. Some of the fixed pieces were particularly superb. Set crowns, wreaths, and crosses elicited the most enthusiastic expressions of delight, and indeed, nothing could have been finer. These rockets which, exploding in the air, threw out clusters of coloured stars were also much admired; while showering down from all sides with a number of shells, discharged together, burst far above the heads of the spectators, changing into graceful and glittering forms which charmed the eye and filled the ear with light. Cascades, fountains, and trees were represented with wonderful exactness, and perhaps one of the most beautiful features of the display was the formation in the air of sheaves of yellow corn. But the great triumph of the night was that which concluded the exhibition. It consisted of five fixed pieces, all of the most ingenious and elaborate construction, (with the words "God Save the Queen" in large letters in the centre. At the same time there was a grand discharge from all the batteries of pearl streamers, tourbillons, and rockets in red, green, blue, and yellow. The effect was magnificent, almost magical; and when, in addition to the above, no fewer than 10,000 rockets were shot into the air, the scene was such as can be witnessed only once in a lifetime.

As a pyrotechnic display, then, nothing could have been more successful on the whole than the exhibition in the Green-park, although a number of the pieces failed to go off, and a large portion of the fireworks were not to be seen. Those which did go off were admirable, and it must be recollected that the time occupied was from half-past nine until eleven o'clock; during the whole of which period the ear was deafened by the constant detonations and reverberations, and the eye pained by the dazzling intensity and magnificence of the blaze of artificial light which filled the heavens and illumined the sea of upturned faces.

One word as to the demeanour of the people on the occasion. It was, in truth, deserving the highest credit, and calculated to make one proud of his country-men. Not a single case of misconduct or riotous behaviour did we hear of or observe. Sobriety marked the bearing of all those hundreds of thousands, and they separated, as they had assembled, in the most peaceable and orderly manner.

### HYDE-PARK.

The arrangements for the exhibition in Hyde-park stood on the open space between the Serpentine and the Marble Arch; the frames for the fixed pieces were ranged along two sides of a triangle, with the apex towards Grosvenor-gate. As early as seven o'clock an immense number of persons had collected. Several boys climbed up in trees near Park-lane, and after a time some of those below began playfully throwing sods of turf at them; the amusement soon became general, and lumps of earth were flying about in all directions. By the time these persons began to descend this fun had become quite dark, and general attention was attracted to the houses along the sides of the park, which commenced to illuminate. The balconies of all the houses fronting the park were crowded with persons, and crowded on the roofs of many of the houses. About half-past nine [illegible] the Lord Mayor [illegible] the commencement of the display [illegible] the signal for the commencement of the exhibition. The first display was a brilliant [illegible] white, red, and green fires, with a continuous [illegible] of rockets. The [illegible] as possible the same as in the Green-park. It [illegible] divisions. Each division commenced by a signal shell from the corner of the inclosure: this was followed by a shower of rockets either coloured or parachute. Two fixed pieces exactly similar were then exhibited at the opposite ends of the inclosure, and the division ended with a discharge of shells. Each division also included a battery of streamers or one of squibs or Roman candles. The rockets were magnificent. The colour varied in every discharge: some of them scattered stars of red, blue, and white; others, a shower of streamers or crackers. The shells were also varied: some scattered variegated stars; others, after rising to a great height, seemed to form into a species of incandescent "milky way," which dissolved in a shower of pearl rain. The fixed pieces were also of a very varied character—rocket-wheels, Scotch stars, pointed stars, Maltese crosses, Brunswick stars, and every variety of wheel, cross, and star that pyrotechnic ingenuity could devise. The exhibition concluded with some fixed pieces and two fire cascades. The grand discharge of rockets, shells, and stars, which to have formed the conclusion was given at a much earlier period. Nothing could be finer than the effect of this discharge; the whole sky was one mass of blazing stars; the tops of the trees were lit up, and the ladies on the houses beyond were distinctly visible. The bright green emerald, the pale sapphire, the gay amber, the pure topaz, the sweet-tinted amethyst, the rich garnet, the blue turquoise, the dark lapis lazuli, the rare jacinth, the elegant onyx, the delicate opal, the gaudy gold, and the brilliant diamond—all gay and glittering colours were there combined, presenting a dazzling profusion of tints such as the eye could never tire to look upon. The persons who visited Hyde-park had an advantage over those in other localities; in addition to the display immediately before them, the rockets and shells from Primrose-hill and the Green-park were seen to great advantage, both continued for some time after they had ceased in Hyde-park. Not a policeman was seen in the park. The crowd commenced moving off immediately on the close of the exhibition; and, notwithstanding the immense crowds, there was not much difficulty in effecting an exit.

### PRIMROSE-HILL.

It was generally rumoured throughout the metropolis that the fireworks on Primrose-hill would be on a scale of magnitude surpassing those of the other centres of attraction, and there was an immense concourse to witness the pyrotechnic display which was announced to take place. The persons assembled within the inclosure were mainly of the middle and lower classes, but there was a much larger collection of "roughs" than might have been anticipated. They did not, however, occasion any annoyance to the more respectable portion of the spectators; but, having secured early in the evening such positions as they deemed most favourable for viewing the fireworks, they amused themselves by singing in chorus the "Ratcatcher's Daughter," and other popular songs of the same class, and by "chaffing" one another. A large extent of ground occupying the crest of the hill was hoarded off for the purpose of enabling those engaged in preparing the fireworks to perform their duty unimpeded, and to prevent the possibility of accidents. Three frames were erected, two facing the south and one turned to the north side of the hill, for the purpose of giving elevation to the discharges, and large guard-rails were placed round, and between them were piles of little sticks, very much resembling small stacks of corn, which were to send off an unaccountable number of pyrotechnic devices. The boarding extended from St. Edmond's-terrace on the west, to St. George's on the east; and, the terraces on both sides being generally illuminated, an extensive and brilliant semicircle of lights was formed, which had a most pleasing effect from the hill. From a comparatively early part of the evening there was a surprising flow of population, some in carriages, many in cabs, omnibuses, and vans, and most on foot, towards the northern eminence. Along the road lining the northern side of Regent's-park, ranks of vehicles, three deep, were drawn up, and it required no small amount of patience, perseverance, and pilotage to steer through their perilous interstices. In hundreds of instances could be seen the wives of the working classes, with children in their arms, and children around them, seated along the rails which surround the hill, and well content, at the cost of personal toil, with the opportunity of witnessing the national display.

The time appointed for the commencement of the exhibition was half-past nine o'clock, and just previously the wind, which blew from the eastward, freshened into a gentle gale, threatening to mar very materially the effect of those specimens of the pyrotechnic art upon which so much labour had been expended. Fortunately, however, no wind arose, and the exhibition took place under the most favourable circumstances, for scarcely a breath of air influenced the flight of the aerial fireworks, while the darkness of the sky added greatly to their effect. From that moment, in quick and unremitting succession, showers of rockets, pearl streamers, parachute-shells, mines, squibs, tailed stars, and tourbillons, continued till a quarter past eleven o'clock. The people seemed highly delighted with the manner in which the display had been effected, and they gave expression to their satisfaction in the usual fervent applause. The houses around the hill and Regent's-park were for the most part illuminated with gas stars, variegated lamps, or Chinese lanterns. The crowd in the Regent's-park was also very comfortable, and from that point a good view was obtained not only of the fireworks on Primrose-hill, but of those in the Green and Hyde Parks, and in Victoria Park. There was also a considerable population on the tops of the houses. The fireworks here were [illegible] of the class termed "aerial;" there was consequently less pyrotechnic display, no devices which might afford some relief to an unintermitted shower of rockets and serpents. There was certainly an attempt at [illegible] fountains, but it was a failure, in consequence of the [illegible] of the composition

### VICTORIA PARK.

From about one in the afternoon all the [illegible] to the park, especially those from Hackney and the Mile-end [illegible] became densely thronged with well-dressed people of all ages and [illegible] wending their way towards the spot where the pyrotechnic building had been erected. To their credit be it recorded that many of our City employers allowed their workmen the use of the spring vans and other vehicles usually employed in the carriage of their merchandise, and in this way whole families were enabled to go to the [illegible] such long distance without fatigue, and to view the fireworks to much advantage, especially where there were children [illegible] could have done. Neither these nor any other [illegible] admitted to enter the park. They were detained [illegible] but from them an excellent view could be obtained [illegible] had been had. To at least a distance of half a mile [illegible] evening of the Victoria [illegible] presented a most animated [illegible] the passer-by was informed well nigh every [illegible] fireworks could be obtained, and houses fully and [illegible] the best windows for private parties, and [illegible] most of the public-houses [illegible] view. Platforms, formed of [illegible] were erected, commanding a high figure, "reserved seats" [illegible] and [illegible] as early as two o'clock in the day. [illegible] outside one of the Hackney [illegible] a band of music [illegible] and [illegible] at 5s. per head, according to the height of the [illegible]

The preparation for illumination in the neighbourhood of the [illegible] not very general, but when night came on there was a sufficient number of houses lighted up to give the localities around a very pretty appearance. One house on the Park-road was illuminated in a very novel mode of lighting that the [illegible] a gas palace on the Hackney-road had the name "Florence Nightingale" in letters of gas flame across the large front. Simple and pretty too was the [illegible] our illustrious country woman elicited repeated cheers from the inmates of the house on their way to the park. On the same road was a transparency representing the Queen and her Royal Consort bounding over the sea in a particularly cool sort of manner, the marine deity who did duty in the [illegible] of the chariot in which Queen Victoria was seated [illegible] Britannia Majesty's directions as to the course he should steer. The artist did not tell his story very clearly; but obscurity is a privilege of artists and poets, and in this case the [illegible] was [illegible] the [illegible] received with loud cheers from the crowds who viewed it on their way to the park.

By nine o'clock all eyes were directed to the inclosure within which the fireworks were to be discharged, every movement in that direction was watched with intense anxiety. [illegible] were there people—even thronging scaffoldings erected on [illegible] tops. The "signal-rocket" was awaited with great [illegible] by every eye [illegible] moments, and then followed the [illegible] the [illegible] tremendous fortifications inclosed [illegible] against the dense black sky was [illegible] of fire [illegible] wheels, it may be said that [illegible] by a judicious spreading out [illegible] scarcely time promised [illegible] very novel or very [illegible] aerial parts, namely, the [illegible] of one of their kind, a [illegible] which was not exactly what was expected. [illegible] and once or twice [illegible] ings" in [illegible]

wholly of one class; nothing could be more homogeneous. Everybody seemed at home; there was an air of confidence in themselves and each other as they wandered leisurely about at first, and finally settled quietly and orderly in places to witness the fireworks, and so continued during the whole time of the display. There was not a single drunken person, and but one policeman, who was stationed at one of the gates. In short, nothing could be more creditable to the inhabitants of this district than their conduct on this occasion. Of course, when the crowd was dispersing, there was some confusion, but nothing which was more disorderly than was inseparable from the breaking up of such a multitude.

### PORTSMOUTH.

The whole borough, port, and garrison presented a holiday appearance on the 29th ult. Every shop and establishment was closed, with two exceptions, the dockyard and gun-wharf, some men of each being engaged in expediting the fit out of the *Rhyders*, 91; *Cæsar*, 91; *Majestic*, 81; and *Sanspareil*, 81, screw-ships, in order to enable them to leave for the Crimea to bring home troops. All the ships in harbour and at Spithead were dressed in colours; and the Royal standard was hoisted at the dockyard, on the ramparts, at Hollingsworth's Rooms, the various piers, &c. Southsea Common was decked out, at the expense of the borough, with a vast number of flags of all nations, tastefully-constructed arches of evergreens, and one of the landmarks for ships entering the harbour had been turned into a triumphal pillar by means of suitable and ingenious additions and decorations. On the sides of the pillar were inscribed the names of the Allied Powers—England, France, Turkey, Sardinia—and the various engagements in which, during the late war, their armies had, either collectively or individually, distinguished themselves. On the summit of this pillar was the figure of Britannia, holding a flagstaff, from which waved the Royal standard. The Common, on that part of it not required for the movements of the troops, was covered with booths, &c. Thousands were at an early hour attracted here by the fineness of the weather, and ultimately there could hardly have been less than from 40,000 to 50,000 persons congregated together. On Southsea Common alone, too, thousands were assembled, as there the Royal Marines and Dorset Militia were to be stationed.

At about half-past eleven the troops began to meet on the Common, each regiment being preceded by its band; and before twelve o'clock they were arranged in line, two deep, in the following order, commencing from the right:—The pensioners of the district, 22nd and 69th Foot, Royal Surrey Militia, Staffordshire Militia, Armagh Militia, and the Royal Marine Artillery. The troops assembled on this and the Gosport shore would, with those forming the ground-line, be about 4000 men. Those on the common were under the command, for the day, of Colonel Bolleau, of the 22nd Regiment, the Lieutenant-Governor, Major-General Breton, being summoned to London. Colonel Bolleau was assisted by Captain A. A. Nelson, Deputy-Assistant-Adjutant-General, and Captain Breton, Town-Major.

At twelve o'clock the Royal Artillery, from the ramparts, commenced their royal salute of twenty-one guns, and after the third gun the troops fired the *feu-de-joie*, commencing from the right of the front line, and returning from the left of the rear. The troops on the Gosport shore then took up the fire, and about the same time the heavy guns of the ships at Spithead and in harbour joined in. The troops at intervals fired a second and a third time, the general effect being very fine; participated in as it was by the band of each regiment playing "God Save the Queen," and the bells of the parish church playing out in the distance. The *feu-de-joie* being finished, the officers and colours advancing a few paces in front, all the troops took off their caps and gave three hearty cheers. They were marched past before Colonel Bolleau and staff, headed by their bands, and afterwards left for barracks.

A storm now came on: the Common was soon cleared, and every booth and spot that afforded the least shelter was filled. There was every appearance of rain continuing all day; but about four o'clock it suddenly cleared up, and by degrees the promenade on the beach began again to throng with visitors. As soon as it was dusk the fleet at Spithead lighted up, but not so effectively as on the occasion of the late review.

The fireworks on the promenade, however, gave general satisfaction, and the amusements of the day were finished by the lighting up of a large bonfire on the beach. The latter scene our Artist has sketched.

### LYNN

The festivities in this town, although the Corporation declined to take the initiative in the preliminary arrangements, were upon a scale of considerable extent. It was resolved to celebrate the day (Wednesday), by a public dinner to the children of the various public schools in the town, and, neither the Town Hall nor the Exchange for the Athenæum being adequate for the occasion, as a *dernier ressort* it was decided to have recourse to the Public Walks, and to give there to the whole of the children a grand open-air festival. The scheme once [illegible] the requisite arrangements [illegible] committee, committee arrangements [illegible] were made in the most complete and expeditious manner for carrying it out with effect. Happily the weather was brilliant, and the result was a successful spectacle.

The day, by desire of the Mayor, was kept as a perfect holiday throughout the town. From an early hour the day was welcomed by the firing of guns and ringing of the church bells. Every available flag, banner, or other similar decoration was displayed on masts, on staffs projecting from the windows, or was suspended from house to house across the street. Where any special mottoes were exhibited they were, "Peace and Prosperity," "Peace and Plenty," "Glory to God, Peace on Earth, Good will to Men," &c. The shipping in the harbour also displayed their colours.

[illegible] Tuesday market-place was the centre of the population, in holiday guise, numbering many thousands: the centre of the square being kept clear, by the children [illegible] at twelve o'clock the school-boys of the age of seven years and upwards, to the number of 2000, [illegible] their respective [illegible] accompanied by their teachers and [illegible] attendants, and bearing [illegible] banners, proceeded to the market-place and arranged themselves [illegible] in order previously fixed. The children in the several ranks were placed four and four, the boys preceding the girls and, each school displaying flags inscribed with the name of the school, and in many cases with [illegible] and banners, mottoes, and emblems of peace, as on the large [illegible] Each child had been supplied with ribbons to the [illegible] of which was printed the following inscription, surmounted by a woodcut of a dove bearing an olive-branch, and followed by the child's name to fill

[illegible]

[illegible]

[illegible]

Grace after meat having been said, the Mayor gave "The Queen and the Royal Family," the toast being announced by the crier, and received by the children, all standing on the forms, with "three times three," the band playing "God Save the Queen." "The Peace and those who won it" was given and received in the same way, the band playing the national airs of Russia, France, and England. Three cheers, still louder, were given for the Mayor. The children were then again marshalled under their banners and led off (in as good order as possible through the immense crowd of town and country people who by this time filled the whole of the Walks) to Goodwin's fields. The pubdic, also, were admitted, and old and young quickly scattered themselves over the wide expanse of sweet grass to enjoy under the unclouded sky the rare treat of a *fête champêtre*

The event was also celebrated by a party of gentlemen dining at the Globe Inn, under the presidency of the Mayor; and the day's entertainments concluded with a display of fireworks on the Tuesday market-place.

DUBLIN.

The returns of peace and of the Queen's birthday were celebrated in this city, on the 29th ult., with a degree of enthusiasm and splendour not unworthy the happy occasions. The day was one of the finest of the season: the sun shone out warmly and brilliantly; and the night was calm and beautiful. All the public offices and most of the principal mercantile establishments and shops were closed; although the law courts continued their sittings. The programme of celebration comprised three parts—namely, a grand military display in the Phœnix-park, an exhibition of fireworks in the same place in the evening, and the illumination of all the chief public buildings, to which a great many private houses brilliantly contributed. The aspect of the streets during the day bespoke a cessation from business; the numerous flags of Great Britain, France, Sardinia, and Turkey, waved from the houses, and a great many of the vessels in the river. At ten o'clock the flags were raised simultaneously in the companies' steamers, when they fired a Royal salute of twenty-one guns each.

The review of 5000 men in Phœnix-park commenced at one o'clock. At half-past twelve his Excellency the Lord Lieutenant arrived, attended by the Military Staff, when the Royal salute of twenty one guns was fired, and, with musketry and salvoes of cannon, produced an impressive effect. The several manœuvres were executed in fine style. At the close of the evolutions the Lord Lieutenant and the Commander-in-Chief, General Lord Seaton, rode forward with their respective staffs, and received the grand salute from all the troops in line, with lowered standards, the bands playing the National Anthem. The Viceregal party, escorted by a squadron of lancers, returned to the Lodge, where a distinguished company partook of a sumptuous dejeûner. The troops commenced to march from the ground to their respective quarters, and the vast concourse of persons returned with the utmost order and propriety to the city, all highly gratified and pleased with the splendid exhibition they had just witnessed.

THE ILLUMINATIONS.

In addition to the public buildings, a considerable number of the mercantile and trading establishments and hotels were brilliantly and effectively illuminated. We can, of course, describe but a few of the more striking designs.

Sackville-street, as viewed from the centre of Carlisle-bridge, at about ten o'clock, presented a most imposing sight. From the foot of the bridge up to the Rotunde, vast masses of people of all classes might be seen moving in from every direction. Looking down Sackville street, the graceful projecting portico of the General Post-office stood out beautifully defined. To the south the splendid Corinthian portico of the Bank of Ireland presented an arcade of lights. On the left the gigantic proportions of the Custom-house and its stately dome rose in fine relief from the brilliant lights which surrounded the quadrangle which it surmounts. On the Burgh quay side of the river were the tasteful decorations of the Corn Exchange, the Corn Exchange Tavern, and those of the Fraser's Hotel. A display of the electric light was presented from the top of Nelson's Pillar. The General Post-office bore the words "Alliance," "Peace," with the crown surmounting an Irish harp, below which were placed the initials V. R., A. M., V. E. The decorations of the Sackville-street Club were V. R, a crown, a chastely-designed medallion, and two stars, in gas.

One of the most effective displays was at the Custom-house, which was lit up by rings and spokes of circular red lights at its base, which threw into bold relief and exhibited the massive proportions of the dome. "Peace," "Commerce," "Plenty," were on the frieze of the entablature, and the words "Long Live the Queen" on the western front. The northern portico lore between the emblematic statues of Europe, Asia, Africa, and America the letters V. A. and a crown.

Another public building entitled to special commendation was the National Education Board, Marlborough-street. The base was a ribbon scroll, with the words "England, France, Sardinia, and Turkey," in gas jets. Pendent from the centre were four Crimean clasps, bearing the names "Alma, Inkerman, Balaclava, Sebastopol," having attached a large medallion of her Majesty. Above the scroll were the letters V. A. ("Victoria" (Emanuel) and "Abdul" (Medjid), V. R. ("Victoria" and "Napoleon." The intervening space was occupied by laurel wreaths and a magnificent star, surmounted by a pyramid of cannon-balls capped by an inverted cannon, with the various arms of the service arranged around it. Above and the middle, and crowned by a crescent with the cross of the new "Order of Valour" dominant. The flags of Turkey, Sardinia, France, and England, filled up the vacancies over the initials.

The Four Courts had over the central building "Peace," and upon the entablature "Victoria," "Napoleon." The arches of the wings bore trophies and devices illustrative of the reign of the Allied Sovereigns, surmounted by the letters V. A. and R.

The front of Ireland's Royal Exchange was a large Irish harp and crown. "Peace, in plain characters, and A. at either end: the letters V. R., A. and M. appeared below, surrounded by a wreath of gas-jets. The entire surrounded by a brilliant glory of a vast number of gas jets. On the beautiful Corinthian portico were displayed the initials V. A., and the rose, shamrock, and thistle. The sombre outlines of Old Trinity," brought distinctly into view, contrasted much towards the picturesqueness of the whole scene. On the fine Corinthian portico blazed the letters V. A., and the rose, shamrock, and thistle.

Trinity College bore the arms of the institution, at each side, a rope of gas with a wreath of the Shamrock, and the letters V. R. under Her Majesty's crown, suspended from the roof.

The Hibernian Gas Company had a star of great magnitude with a cross of shamrocks, all in gas.

The City Hall was profusely illuminated, and two stars.

The Castle had on the upper portion of the wings "Peace and Victory." On the gates of the lower yard the Imperial Hanoverian crown, with a star in the centre.

Grafton-street.—The Royal Irish Yacht Club exhibited a crown in full, with an anchor and the letters V. A. The Alliance Gas Company's office displayed in large letters the words "God Save the Queen," above which was placed a brilliant star, entwined with shamrocks, and having on the sides the initials N. I.

Stephen's-green.—The three Clubhouses and the Royal College of Surgeons were brilliantly illuminated.

The Mansion house had the letters V. A., surrounded with the civic crown and emerald harp. The appearance of this old venerable edifice was very pleasing.

Kildare street.—The Conservative Club, the Dublin Society House bore the word "Peace," surrounded by stars, and the whole ornamented with evergreens.

The Railway terminii were splendidly lighted: that of the Kingstown Railway had a large crown over the centre.

The pest gas was exhibited in Jervis-street from ten to eleven p.m., and again at 11.45. The device was a shamrock, with the word "Turf" underneath.

The Lord Lieutenant and party proceeded in carriages through the city, in which they remained till an advanced hour viewing the illuminations, with which they were evidently much gratified.

THE FIREWORKS.

The scene selected for this display was the inclosed and partly intrenched tract of ground surrounding the tall and majestic obelisk, "Wellington Testimonial" in western line of the obelisk was selected for the display of the pyrotechnic devices. On one side of the parallelogram was displayed two large flags, the Union Jack, and the French tricolor, while underneath was the motto, "To the memory of the Brave," flanked on the sides by two vases with floral designs. An area of about eight acres in extent, including the site of the obelisk, was partly enclosed by strong barriers, and partly defended by a deep fosse or intrenchment filled by the waters of a neighbouring stream. This fosse, about twelve feet at a distance of some thirty or forty yards, was defended by a series of wooden frames, six feet in height, fitted up for the display of various devices, comprising circles, [illegible] The principal exhibition-ground was erected [illegible] inner brink of the fosse, was erected a strong and extensive platform, fronted in imitation of a Russian fort. Within this fort, which represented Sebastopol, a perfect magazine of fiery armament was placed. The battlements were lined with small iron mortars and cannon. At a distant part of the ground commanding the fort an intrenchment and barriers were thrown up for the besieging force. On a slight eminence backed by a clump of young trees was a handsome pavilion for the reception of his Excellency the Lord Lieutenant, his suite, and party, who arrived at half-past nine o'clock, when the fireworks then commenced.

In the programme the Sebastopol attack was described as follows:—"Grand pyrotechnic spectacle representing the last great attack on Sebastopol, with the blowing up of the magazines and works, &c., general conflagration, finishing with fountains of crystal fires and Roman candles, casting their dazzling balls in every direction, and a grand bombardment of aerial projectiles and fiery missiles, hand-grenades, pots de saucissons, and concluding with a magnificent flight of fiery rockets in the air at one o'clock. Then

THE PEACE COMMEMORATION AT LYNN—SCHOOL CHILDREN'S FESTIVAL, IN THE PUBLIC WA[illegible]

## THE UNIVERSAL AGRICULTURAL EXHIBITION IN PARIS, 1856.

*(From our Special Correspondent.)*

THIS Exhibition opened on Sunday (1st June) with great success. So numerous, so varied, so valuable a collection of animals has never before been made in any country; and never has any city possessed a building so well suited to such a purpose as the Palais de l'Industrie in the Champs Elysées. The Illustrations of the French Exhibition which appeared in the ILLUSTRATED LONDON NEWS last year will have given your readers a general idea of its form and arrangements. At present it consists of a hollow, glass-roofed square, which has been converted into a beautiful garden—an English garden they call it—with grass-plats of turf, tall evergreen trees, and beds of rhododendrons, roses, geraniums, and other brilliant-coloured flowers, partly growing, partly cut, and daily renewed, forming a horticultural and floricultural exhibition, with a very pretty general effect, although of no special importance, considered separately. The three well-known fountains are in full play, and their lower basins contain an exhibition of fish, some of considerable size, which are the result of the new process of artificially stocking rivers. Two lofty aviaries, filled with birds of the most gorgeous plumage, complete the ornamental part of the ground-floor. On each of the pillars supporting the nave the flags of the various nations exhibiting are arranged, each pair of pillars being connected with garlands of leaves and flowers; while from the roof trill tailed bannerets of red, blue, green, and peach colour, bordered with gold stripes and covered with golden bees, representing the Imperial author of the Exhibition. So much for the coup-d'œil, on entering the Palace, which can only be imagined by those who visited the Industrial Exhibition last year.

The hollow square, or garden-court, unlike our Sydenham Palace, is bordered on each side by solid galleries of considerable depth. Under these galleries the cattle are arranged in separate stalls, seven deep, with a broad passage covered with asphalte between each double row of tails, and a narrow passage between the heads.

The sheep, pigs, goats, poultry, and rabbits are arranged in temporary marquees outside, between the Palace and the river Seine, very much after the plan of the exhibitions of our Royal Agricultural Society.

The building is under a sort of military discipline, which has at any rate one advantage—the cleanliness is as perfect as in a London horse-dealer's stables, and that is perfection. It would be well if the public staircases of some of the Parisian mansions were as sweet and clean.

In the yard near the sheep are the heavy agricultural implements. In the galleries of the Palace the light ones, and also a collection of agricultural produce of many countries and climates—from Catalonia to Holstein—but of no great importance. At each end of the building upstairs are two refreshment-rooms, where eatables and drinkables are to be had on moderate terms of good quality; and on the ground-floor an establishment is open for the sale of the pure milk of the numerous cows exhibited.

The Palace contains, allowing for deaths and accidents, upwards of two thousand head of agricultural stock; exclusive of goats and poultry. In this gross number the cattle alone amount to thirteen hundred; the sheep to nearly six hundred; the rest are hogs—designated more scientifically in the French Catalogue as "race bovine, ovine, and porcine."

In cattle, England, Scotland, and Ireland, and the produce of British stock, occupy by far the largest and most important part of the bovine department. Of short-horns alone, British and foreign, there are one hundred and thirty-three. Among the owners some familiar names appear; as, for instance, Towuley, Stratton, Lord Feversham, Gunter, Lord Clancarty, Lord Monk, Lord Talbot de Malahide, Stewart Marjoribanks, Lord Hill, and others better known at the Highland Society's shows than in England. There are also a considerable number of French exhibitors of pure stock and some Belgians. The short-horns appear again largely in the classes for cross races. Of Herefords only five head were entered; three by Mr. Fisher Hobbes, but not one from the celebrated breeders of Shropshire and Herefordshire. Of Devons and Sussex there are only fifteen head, all but one shown by Englishmen. Among them the stereotyped names of Turner, Quartley, and Farthing appear.

The Scotch, who have organised their general representation with the talent they always display in agricultural affairs, have sent a splendid show of Ayrshires—upwards of ninety; of polled black Galloways forty; and thirty of the picturesque long-horned black and dun West Highlanders.

The Irish Society shines most in the short-horn department—indeed, Ireland seems the natural country of the short-horns—but also sends a large selection of the little Kerrys.

Indeed, the Paris Exhibition will afford many English farmers their first opportunity of seeing the breeding-stock of Scotland and the milking-stock of part of Ireland; for the polled and horned Highlanders only reach us as oxen, and the Kerry cows rarely come at all, as they cannot compete with the Alderney.

But, leaving utility on one side, by far the most interesting and picturesque part of the Exhibition commences when we leave the civilised and cultivated races, and wander among the rows of pure native breeds which have not been corrupted into plumpness at the sacrifice of native activity, by depending on fenced enclosures and careful herdsmen, instead of their own activity and instinct.

Among the curiosities of the Exhibition are three Hungarian buffalos, sent by Count Tesalio Festetics, of Vresztbely, one being dun, the others black, dangerous-looking animals, but showing more promise of beef about the rump than most of the Continental cattle of a more placid disposition. Still more curious than the buffalos are three Hungarian cattle (two oxen and one cow), with a calf a few days old. They are quite white, very large in the leg, without a place anywhere on which it would be possible to grow either fat or much meat, with horns pointing nearly straight up in the air, from four to five feet long, and very sharp. It is impossible to imagine anything more picturesque or unprofitable. Unfortunately, no bull was sent. I should like to have compared one with the wild white bulls in Lord Tankerville's park. There is a certain resemblance in the form, but the horns are more like those of an antelope than of any breed of cattle I have ever before seen. It seems that these cattle are from a herd formed from the original race of Lower Hungary, in 1803, by the father of Baron Ladislas Wenkheim, of Bekes (Hungary), who now sends them; and that they "have been improved by crossing with the beautiful race of the celebrated Baron Orizyche." For twenty years they have been treated as a distinct race; and is stated, as a proof of their value, that "they live in the open air all the winter with no other shelter than open sheds." They would be a valuable and attractive addition to our Zoological Gardens; but the proprietor would do well to substitute on its plains of grass the Wes...Highlander, which would be quite as hardy and many times more picturesque. The Hungarian herdsmen are not less remarkable than their cattle—fine, Oriental looking, hawk-eyed fellows, whom I shall have occasion to describe when the Illustrations now making (through the kindness of M. Saint Marie, the Director in Chief) are engraved. The building is much enlivened by the various costumes and singular physiognomies of the herdsmen and shepherds from Poland, also from Hungary; shepherds in white kilts and other costumes from Bohemia, the Tyrol, Switzerland, and Bretagne. One of the Tyrolese is about the size of Paul Bedford, with the corporation of an alderman;—of course his appearance in a short jacket is anything but poetical. On Friday, the 30th, the Emperor and Empress (in a Bath chair) inspected the Exhibition, and held a kind of levee of the more *costumed* herdsmen and shepherds. They sang their national songs and danced their national dances with a vigour that drew very hearty applause and laughter from the Imperial pair. One Tyrolese, or Swiss, very coolly rested his long horn on the Emperor's chair while blowing a final note.

But I shall return to these real originals in due season. It is worth noting that the Hungarian sheep with coarse wool and jet black deer-like heads have also, like the cattle, straight spiral horns.

So far the Exhibition is a great success, and must be of infinite benefit to France and the whole Continent. The building is admirably adapted for its purpose, and the persons in charge are most attentive and obliging. The prizes given are very liberal, and, although not yet formally announced, I know that the British Islands will carry off a large share in stock as well as implements; but, while doing full justice to the intentions of the French Government I am bound to say that "French administration," of which we have heard so much praise lately, has broken down and produced a perfect "Balaclava" of confusion in the whole of the machinery department, and part of the stock arrangements. There is no central authority, orders given on paper have never been published or put in force, and a perfect anarchy reigns between the chiefs of the innumerable subdivisions.

As for the trials of implements, they were a perfect farce in almost every section: half were not tried at all. Subsoil ploughs were made to follow each other in a line in the same trench! An oil-cake crusher was tried with oats, and steam-engines galloped thrashing-machines at the rate of forty miles an hour!

In the Short-horn Section the whole of the British jurors have refused to sign the award, having been outvoted by gentlemen who did not know a red short-horn from a red Alderney. But for these difficulties the French Government is not responsible. An order just published to prolong the Exhibition until the 14th has created both alarm and discontent among our exhibitors of stock. In other respects our countrymen have every reason to be satisfied: they cannot learn a single idea in implements or borrow a single cross in stock, but they sell plenty of both.

Paris, 2nd June, 1856. S. S.

## EXTRAORDINARY CHANGES IN THE WIND'S DIRECTION AT THE BEESTON OBSERVATORY.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.)

The following chart will show the great wind changes which occurred between 6h. 40m. a.m. and 6h. 45m p.m. on the 24th of May, as written by the "Atmospheric Recorder." Heavy thunder-showers occurred from noon till 6h. 30m. p.m., yet throughout the day the air was quite calm. The wind had been N.N.E. from 6h. 15m p.m. on the 23rd until 6½ a.m. on the 24th, when it moved through E. to S.S.E., at 10½ a.m. moved through S. to E., at 11½ a.m. became N.E., 11¾ a.m. N.N.E., then back to E., 12½ p.m. moved to S. by W., 12¾ p.m. back to E. by S., 4h. 6m. became S.S.W., 4¾ p.m. through S. to E., 4h. 36m. moved to N. by W., 4h. 45m. to N. by E., 6h. N.E., and at 6h. 40m. p.m. became E.N.E., in which quarter it remained till 8 a.m. on the 26th.

During the showers the electricity was powerful and *negative*, becoming *positive* on the cessation of rain. The electricity was most powerful at noon and at 6h. p.m.: at the latter hour two flashes of lightning were within 150 yards of the place. I am, &c., E. J. LOWE.

Observatory, Beeston, near Nottingham, May 26, 1856.

The dotted line A is the base line for an east wind

The dotted line B a north wind if the curved line passes in the direction towards 1 N, or a south wind if in the direction towards 1 S.

The dotted line C is the base line for a west wind.

Figure 1, the wind's direction at 6h. 45m. a.m.

" 3, " " at 12h. 30m. p.m.
" 4, " " at 11h. 45m. a.m.
" 5, " " at 4h. 0m. p.m.
" 6, " " at 5h. 30m. p.m.
" 7, " " at 4h 30m p.m.
" 8, " " at 6h. 45m p.m.

THE CZAR AT BERLIN.—There has been a very brilliant parade to-day (unter den Linden) in honour of the young Emperor. The whole party arrived here between nine and ten o'clock from Potsdam, and proceeded at once to the Schloss, whence, at the appointed time, they appeared on the grand balcony where the parade was held. The troops reviewed consisted of the entire garrison of Berlin, together with the 3rd Regiment of Lancers, which had been summoned to march up from their quarters as a surprise to their Imperial Colonel. About half-past ten o'clock the King came on the space in front of the *Zeughaus*, attended by all the Princes, and all the guests of distinction now here, after a few minutes of inspection and issuing of final orders, an adjutant was dispatched to the Schloss to inform the Emperor that all was in readiness. Upon which the King, attended by his staff and suite, took a few paces on the ground, and took up a position by the side of Count Brandenburg and Grand Frederic the Great. After a short time the Emperor appeared, followed by a brilliant suite, hardly less numerous than that attending the King, on this the latter advanced at the head of his staff in formal order, with sword drawn: so that the two Monarchs met and saluted two yards in front of the open space between the Opera-house and the University. After the exchange of a few words the two Monarchs turned their mounted heads the same way, and commenced their ride after the front of the troops drawn up by regiments, the infantry on the south side, the cavalry on the north side of the Linden, and the artillery on the Pariser Platz by the Brandenburg Thor. In all, that to the Grand Duke Michael and all the Royal Princes at present in Berlin, there were in the combined suite of the King and Emperor, as they moved along Unter den Linden to-day, the Crown Prince of Wurtemberg, the Grand Duke of Saxe Weimar, the two Monarchs met and saluted two yards in front of the open space between the Opera-house and the University. After the exchange of a few words the two Monarchs turned their mounted heads the same way, and commenced their ride after the front of the troops drawn up by regiments, the infantry on the south side, the cavalry on the north side of the Linden, and the artillery on the Pariser Platz by the Brandenburg Thor. In all, that to the Grand Duke Michael and all the Royal Princes at present in Berlin, there were in the combined suite of the King and Emperor, as they moved along Unter den Linden to-day, the Crown Prince of Wurtemberg, the Grand Duke of Saxe Weimar, the Princes of Mecklenburg-Schwerin and Strelitz, the Duke of Nassau, and Prince Frederick of Hesse. Every species of military display and pageantry appeared to have found a representative in the brilliant and many-coloured throng of horsemen who composed this cavalcade of about 130 to 150 persons. After the Emperor had returned with the King from riding along the whole length of his position in front of the houses of Humboldt, Savigny, and Ranke, the Opera-house, with all the combined suites grouped at each side in order of seniority, and the troops defiled before him. As soon as the mounted gentlemen had led the way the King put himself at the head of the regimental troops, and led them past in front of the Imperial group, formed at first in front by a whole regiment of young cadets of the military academy, whose 3rd Regiment of Lancers came up the Emperor placed himself at their head, and led them before and past the King, who had in the meantime taken up his place also in front of the above-mentioned armies. The Queen and the Princesses, attended by the ladies of their household, viewed the parade from the windows of the Princess' palace.—*Letter from Berlin, May 31.*

Mr. Layard, M.P., arrived at Constantinople on the 20th ult., and was received by Lord Stratford de Redcliffe.

## DESTRUCTIVE FLOODS IN FRANCE.

The French papers are filled with accounts of the floods in different parts of the country. At Lyons the Saone had not reached a greater height than it had done ten days ago, but the Rhone has risen above the level which it attained in 1840 and 1851. The Guillotière, the Brotteaux, as far as Villeurbane and La Mouche, were all under water, and could only be reached by boats or in carriages. In the city the gallery of the Hôtel Dieu, the Place Bellecour, a great part of the Place de la Charité, and all the adjoining streets, were completely flooded. At the Quai de la Charité two steamers were moored, with their steam up, ready for any emergency. All the line of the quays on the right bank, from the Pont Morand to that of the Hôtel Dieu, was covered with water. On the left bank, the top of the Quai d'Albret was only a few inches above the level of the river. A number of soldiers were at work at the head of this quay in throwing up embankments to protect the new works of defence in course of construction.

About half-past one on Saturday last the dyke of the Grand Champ gave way to the extent of 150 yards. Eleven hundred men belonging to the army of Lyons were at work near the fort which is being constructed there, and they were thus cut off, the water having formed a complete lake round the place. Information of the event was immediately sent to Marshal de Castellane, who immediately went towards the place, and gave orders for organising means for bringing them off by boats. Reports were at one time in circulation that a great number of soldiers had been drowned, but those rumours happily turned out to be unfounded. The fort of La Vitriolerie has been flooded, and has been evacuated by the soldiers. The traffic on the Mediterranean and St. Etienne Railways continues interrupted. The line of electric telegraph wires has been cut off. The road from Lyons to Geneva is broken up in several places. It was reported that the Lake of Geneva had overflowed its banks and caused considerable damage. At Rochecardon a mill has been carried away. At Valence the Rhone covers all the lower parts of the town. Vizille and Bourg d'Oisans are also inundated. At Vienne all the manufactories in the suburbs are stopped by the places being inundated. At Tournon most of the streets are impassable, except by boats. At Avignon the Ile de la Barthelasse, the quays, and the low streets are all under water. The river Romanesche has overflowed its banks and inundated all the plains; several bridges have been washed away. The Isère, the Gier, the Cher, the Loire, the Lozaret, and all the rivers leading into them, have also broken over their banks, and indeed the same account is given from almost every part of the country.

When the dyke of the Tête d'Or, near the Grand Champ, gave way, the water rushed with the east plains with great rapidity. The tocsin was sounded in all the surrounding villages to give the alarm. Many persons were surprised in their sleep, and could only save themselves, half-dressed, by wading through the water, leaving all their property at the mercy of the flood. Many were compelled to remain in their houses, and wait until assistance could be brought to them. The embankment thrown up to the north of the Brotteaux protected the *chemin de ronde* in that direction; but a little further to the east the water broke furiously through the breach into that part called La Petit Cantonne, behind the Pré aux Clercs, and through the Rue Massena the water rushed like a cataract. The establishment of the Petites Sœurs des Pauvres was inundated, and it was found necessary to remove all its inmates to the Hôtel Dieu in waggons. The directors of the Maison du Saint-Enfant Jesus brought out their children one by one on their backs, and the sick were laid on mattresses and placed on rafts hastily made for the purpose, and thus carried to a place of safety. At every moment boats and omnibuses might be seen setting down their freights at the Hôtel de Ville and in the Cours Morand, which remained clear of the water, and where an immense number of persons passed the remainder of the night. Some of them had been able to save a few clothes, but most of them had only what they stood in, and these were drenched with water. Cries and moans were heard in every direction, women seeking their husbands and their children, and the children calling for their mothers. Horses, cows, and sheep were also seen prowling about, and uttering cries of hunger and alarm. It appears impossible to form any correct idea of what accidents have taken place, nor can it be correctly ascertained until the water shall have subsided, and circulation be once more free. At the Brotteaux several houses were washed down before the inhabitants could be got out. At Charpennes a man, and wife, and their child were buried beneath the ruins of their house. A boat with several persons who had been saved from a house upset, and all were drowned. The Rhone is constantly bringing down furniture, cattle, and sheep. Many small houses, built of framework and brick, have been washed away bodily from their foundations at the Brotteaux, and are seen floating about with the current.

## A DAILY SCENE.

A DIM light in the window,
Deep straw around the gate,
And silence, lingering as in pain
Some closing breath to wait.

Is it a mother that departs?
A sire, whose course is o'er?—
A child, mid tears and breaking hearts,
That speeds to death's mutest shores?

Doth friend lose friend? Some comrade old
That early boyhood knew—
When, like a lamb from Nature's fold,
Life drank the morning dew.

We know not. This alone we know
There is no home but tells
Some sorrow in this world below
Of graves and funeral bells.

Some flower beloved that bloomed in vain,
Some joy that could not last;
Some hope that darken'd into pain;
Some grief that shrouds the past.

Another sun hath bathed the lawn
In light, and golden air;
The dead hath found another dawn,
dawn which Angels share.

Around the house a sadness steals,
A weight that palms the brow;
There is no fear of rolling wheels,
No need of caution now.

No need of blind-drawn windows,
Nor deep straw, borne aside,
To tell us in that darken'd home
Some heart hath loved—and died.

CHARLES SWAIN.

POPLAR AND BLACKWALL TRADE AND NAVIGATION SCHOOL.—This school has been founded by Mr. Green, in the Sailors' Home, East India-road, under the direction of the Board of Trade Department of Science and Art, and consists of two classes, viz., an evening trade school and a day navigation school. Although the trade school has not been opened more than three weeks it already numbers eighty pupils, and others are waiting for admission. No person is admitted into the trade school unless he can read and write tolerably, and has a correct knowledge of the first four rules of arithmetic. The main object of this school is to instruct workmen and others in the technical processes upon which our progress in the industrial arts chiefly depend. Great attention is paid to arithmetic, algebra, and practical geometry. To these subjects are added mechanics, chemistry, surveying, shipbuilding, and mechanical drawing. The lecturer of the Greenwich Trade school has been appointed one of the science masters of the trade division of the school. The navigation school is under the direction of Mr. Holt, a gentleman who was educated at the Royal Naval School, Greenwich, and is thoroughly conversant with all the details of nautical science. This school is intended for the professional education of masters, mates, and midshipmen in the merchant service. The school is well supplied with nautical and scientific instruments. Both departments of the school appear likely to be very successful. The general superintendence is intrusted to Captain Purnell and Mr. E. Higbes.

SHIPWRECKED MARINERS SOCIETY.—The seventeenth annual meeting of this institution was held on Friday, the 30th May, at Will's Rooms, King-street, St. James's, Lord Hatherton, M.P., in the chair. Mr. Francis Lean, R.N., the secretary, read the report, which stated that no less than 3085 vessels were wrecked, foundered at sea, or abandoned, and been reported at Lloyd's during the past year, and in consequence of which the society had relieved 5990 persons, including 2000 widows, orphans, belonged parents, and aged mariners and their families. He had been assisted to repair and refit 1000 of boats, lost or damaged, and had granted 28 pensions, and since the formation of the society in 1839 the average increase of subscribers amongst the seafaring classes at 2s. 6d. each has been 6000 annually, during the past year, making now a total of 42,000 subscribers. The Right hon. and Rev. the Lord Bishop of London, the Archbishop of Canterbury, and the Right hon. and Rev. the Lord Bishop of Winchester have become life governors of the institution. The Right hon. and Rev. the Lord Bishop of Winchester has become life governor

## THE EXTERNAL COMMERCE OF BRITISH INDIA.*

TOWARDS the close of the seventeenth century Dr. Davenant, an eminent political writer of the day, denounced the East India trade as detrimental to the mercantile interests of England and of all Europe. "If all Europe," he observed, "by common consent would agree to have no further dealings to those parts, this side of the world by such a resolution would certainly save a great and continual expense of treasure." He then estimated the amount of gold and silver brought into Europe during the two hundred years which preceded the year 1688 at eight hundred millions sterling, and concluded that, out of that immense sum, one hundred and fifty millions had been carried to the East Indies and there permanently detained. Eighteen centuries have elapsed since Pliny described India "as the sink of the precious metals." So early as the days of Tiberius the abstraction of the gold and silver currency of the empire, by the incessant drain of foreign commerce, was loudly complained of by the Roman writers; and it was the commerce of the East which first induced this destructive export of its metallic treasures.

"The objects," says Gibbon, "of Oriental traffic were splendid and trifling; silk—a pound of which was esteemed worth a pound of gold—precious stones, and a variety of aromatics, were the chief articles. The labour and risks of the voyage were rewarded with the incredible profit; but it was made on Roman subjects and at the expense of the public. As the nations of Arabia and India were contented with the produce and manufactures of their own country, silver, on the side of the Romans, was the principal, if not the only, instrument of commerce. It was a complaint worthy of the gravity of the Senate that, in the pursuit of female ornaments, the wealth of the State was irrecoverably given away to foreign and hostile nations. The annual loss is computed by a writer of an inquisitive but censorious temper (Pliny) at £800,000 sterling."

Eight hundred thousand pounds a year—equivalent to about two millions of modern money—must have been a severe drain upon the supply of the precious metals in the Roman empire, the metallic resources of which were far inferior to those of England even before the discovery of Australia. After the lapse of eighteen centuries, Colonel Sykes has proved the same tendency of bullion to escape from Europe to Asia. The Company's rupee was first issued from the Indian mints in the years 1835-36; and it appears from the official returns of the silver coinage that, from that date up to the years 1853-54—being a period of nineteen years individuals carried to the Indian mint, for the purpose of being coined into rupees, forty-two millions sterling in silver. Moreover, old coins were called in, or received from parties voluntarily offering them, to the value of more than twenty millions sterling: in the whole, sixty-six millions and a quarter have been coined in the nineteen years.

From copious and lucidly-arranged statistical tables, Colonel Sykes has shown that for the last twenty years the balance of trade has annually increased in favour of British India, and that such balance has been paid in bullion. This perennial drain he considers constant, the products of India being, from year to year, more and more actively in demand, while its foreign wants remain stationary; on which relation between exports and imports he makes the following reflections:—

It is of grave importance, therefore, to merchants trading with India that they should have a clear and comprehensive view of those normal conditions which indicate that their export trade in goods seems to have attained its maximum, while their import of Indian commodities has been annually increasing; and not less important is it that the bullionists and bankers of England, and of other countries, should be constantly and fully alive to the exhaustive process of the Indian trade.

That a drain of gold from this country, under our monetary system, paralyses trade by suspending industry, driving it into compulsory idleness, or at least relaxing its energies, is a lesson taught by frequent and painful experience; but to assert that a nation becomes richer or poorer by the export or import of bullion is a grave, but unhappily not yet an exploded, error. Surely none will affirm that Australia is impoverished by shipping her gold to England, or that England is enriched by its reception. All trade must resolve itself into the exchange of equivalents, or the trade would be discontinued. If we give the United States, in a season of scarcity, gold for wheat, we merely part with one commodity and obtain another; and the operation is no more that the barter of equal values for equal values. Regarded, then, simply, as a commercial process, and without any reference to our monetary system, the payment of any balance of trade due to British India in the precious metals is a matter of perfect indifference, since we get an equivalent under another form. We have no desire to misstate the views of Colonel Sykes; but the inference we deduce from his premises is that he considers a metallic liquidation of an adverse balance as a serious evil. This is merely to fall back on the old dogma of the mercantile system.

It is, however, most desirable that a taste for the consumption of British manufactures should be encouraged among the natives of India. If the consumption could be brought up to an average of only five shillings per head, it would create an export trade of forty millions sterling annually. In one sense it is true that the foreign wants of our Eastern population are very limited, and appear to be stationary at that contracted limit; but this is not in the order of nature: human wants are insatiable, and they seem to be so ordained to stimulate industry and invention. It is the craving after objects of gratification that creates markets. In fact, every man's mouth is a market, and every man's hand is a producer. An oriental sun and a tropical climate no doubt indispose men to that continuous and hard labour which the inhabitants of northern regions willingly undergo; but that reluctance to toil which many writers ascribe to Eastern indolence is really due to the insecurity of property, or to that rapacious taxation which leaves to the industrious classes no higher recompense than the means of a bare subsistance. Give the natives of India fair wages and constant employment, and they will soon aim at a higher standard of living, in their dwellings, their clothing, and their dietary, and as they are elevated in the scale the greater will be the prosperity of our manufacturing districts.

"The staple exports from Bengal (as stated by Colonel Sykes) are cotton, indigo, opium, silk piece goods, sugar, oil-seeds, saltpetre, raw silk, and grain. The great consumer of all these articles is the United Kingdom, excepting for cotton and opium, in which articles China precedes all other countries. China also takes a good deal of saltpetre. France follows the United Kingdom in indigo, but America precedes France in the consumption of silk goods, saltpetre, and sundries, but falls short in indigo. The Arabian and Persian Gulfs follow Great Britain in the import of sugar, and stand next below America in taking silk piece goods, and do not take saltpetre; but the Arabian and Persian Gulfs, and the Mauritius, precede all other countries in the import of grain. For the total value of the imports from Bengal the countries stand in the following order:—United Kingdom, China, Eastern Islands, France, America; in some years, though rarely, France and America precede the Eastern Islands."

Next in order to China, Penang and the Eastern Islands are the largest consumers of opium. The cotton piece goods of Madras find a market in the United Kingdom, Ceylon, the Straits of Malacca, and the Gulf of Persia. America takes little from Madras, and France scarcely anything but indigo. In aggregate value the United Kingdom purchases most of the products of Bombay, as cotton, coffee, ivory, pepper, raw silk, and shawls, but in separate articles the course of trade is various. Thus, shawls, and piece goods, and sugar chiefly command a sale in the Persian and Arabian Gulfs; opium entirely in China and the Eastern Islands. Such was the nature of the external commerce of India from 1834 to 1842; since that period there has been a considerable increase in the export of oil-seeds, cocoa-nut oil, lacdye, and shellac. "English manufacturers and merchants," writes Colonel Sykes, "are probably unaware that their interests are mixed up with this opium trade between India and China. Goods and treasure are sent to India to buy indigo, sugar, opium, cotton, &c. The opium and cotton are sent to China, where tea and silks are purchased, sent to England, sold, and with the money manufactures and bullion are sent out to India, or money is paid into the Company's treasury for bills on India, and sent to China for tea and silk, which are sold in England, and more manufactures or bullion are sold in England; and the round of trade through China is thus continued in endless succession, opium being one of the chief articles of the trade."

The United Kingdom sends to India cotton fabrics, cotton twist and thread, woollens, metals, hardware, glass, spirits, wine, malt liquors, and stationery. To these have been added in later years railway machinery and materials. It may also be observed that during the late war our merchants sought in India for the supply of some commodities which are usually obtained from Russia, and with success, particularly in fibrous substances, which have been tested and proved to be far stronger than Russian hemp. As railways are extended the general trade must expand, by the connection of the interior with the seaboard reducing the cost of carriage, and a profit will be derived from goods which are now profitless.

* "The External Commerce of British India during Two Periods of Years: namely, the Eight Years (ended 30th April) 1834-35 to 1841-42; and the Five Years 1849-50 to 1853-54. By Colonel Sykes, F.R.S., Chairman of the East India Company."

## MESSRS CHRISTIE AND MANSON'S SALES.

WE now proceed with a summary of the transfers of art treasures by the third of the Christies, who commenced his career in 1831, on the death of his father. This was a most inauspicious period for the venders of the articles of virtu. The Reform agitation had withdrawn the public attention from the culture of the beauti ful to the momentous changes then taking place in the depositories of Representative Government. The upper classes somewhat unphilosophically imagined that this cool-blooded Saxon nation was about to fall into all the excesses of the first French Revolution, and that their order was doomed. Vain apprehension! We showed ourselves as incapable of French Augusts and Septembers as the French have shown themselves incapable of realising British liberty or Saxon Representative and Municipal Government. But the agitation operated for years unfavourably on art sales; and these apprehensions, however chimerical, caused many fine collections to be sold greatly below the value of previous and subsequent years.

In illustration of this we may mention Lord Vernon's sale in 1831, at which Raphael's "Virgin and Child," from the collection of Philip Egalité, Duke of Orleans, went for only £304, considerably less than a third of what it lately sold for. In the following year, 1832, when it was seen that we were not going to have a 1793, the wealthier classes began slowly to open their purse-strings, and to laugh at the phantom of revolutionary confiscations. In this year was sold the collection of the Earl of Mulgrave, the early patron of Wilkie, comprising fourteen sketches of Wilkie's principal works. The prices showed the high estimation in which the great native Realist was held by his admiring fellow-countrymen. The celebrated "Rent-day" fetched close on £800, but this is certainly very far from what the same picture would fetch were it now brought to the hammer.

In 1833 there was a still further improvement in prices, and in this year were sold the pictures of Mr. Jeremiah Harman, consisting of most beautiful highly-finished Dutch pictures. There was also a subsequent sale, in 1844, of pictures collected by the same gentleman, comprising Gerard Dow's own portrait of himself, holding a pipe in his hand, painted on panel, which had formerly been in the Dijonval collection at Paris, and which is now in the National Gallery. Prince Talleyrand's pictures were sold in the same year, consisting of most elaborate Dutch pictures, which showed that he had taken no advantage of his numerous opportunities to mingle works of high *spiritual* beauty with the pleasing truth and reality of the Dutch translations of nature; but, as the French say, "rien ne vaut comme le succès"—the pictures of the successful man of the world fetched good prices.

In the following year (1834) were sold the remains of Slothard. This sale was assiduously attended by the late Mr. Rogers, who was a liberal buyer. The pictures of their contemporary, Romney, were also brought to the hammer in the same year; but they were not appreciated—in fact, they sold ill. At Sir Francis Chantrey's sale, in 1842, there were good books and fine old wine, but little or no sculpture. The most successful of all these posthumous artists' sales was Sir David Wilkie's, in 1842, when even the smallest scraps and sketches fetched good prices. The "Village School" was bought by a publisher for 700 guineas; and his Oriental Sketches—which were most unoriental in character, his Turks and Arabs being all Franks, with turbans on their heads—fetched extraordinary prices. At Etty's sale, in 1850, there was more of quantity than of quality; showing that an artist, for the sake of his own fame, would do well to destroy his superfluities before his death.

But to return from the artists to the amateurs. We find in this period many important sales: those of Lord Northwick, in 1838, at which Lord Ellesmere bought his fine "Giorgione;" Sir Simon Clarke's, in 1840, at which were sold Murillo's "Good Shepherd," for 2000 guineas; and the "St. John," to the Trustees of the National Gallery, for £1200. In this year we also find the sale of the incomparable "Francias," belonging to the Duke of Lucca, to Mr. Farrer, previously to their becoming the gems of the National Gallery. Talking of gems without metaphor, we come naturally to the great sale of Messrs. Rundell and Bridges, who had gained so high a reputation, and amassed such enormous wealth, by the liberality with which they employed artists of the highest standing to design for them. Another important plate sale was that of the Duke of Sussex, in 1843: the services of this high-minded Prince, who had been so frequently embarrassed through his own munificence, producing no less a sum than £24,000. Like the unfortunate Louis XVI. he was a great fancier of clocks and watches, and so renowned for his stock of cigars that they altogether fetched £3000, some selling at 2s. a piece. *Punch* said that "every one's mouth was full of the puffs of the Duke of Sussex." Another Prince, who has since encircled his brows with an Imperial crown, was at this time compelled by dire necessity to make a partial sale of his effects, Prince Louis Napoleon. The bust of his uncle the Emperor, by Canova, was knocked down to Mr. Farrer, for 300 guineas; and not one of the least interesting portions of the objects of this sale was the manuscript music of the Queen Hortense, the authoress of the celebrated "Partant pour la Syrie," as well as the plate of this accomplished Princess, which we imagine did not go without a filial pang.

The next fine collection sold by Messrs. Christie was that of Mr. Penrice, in 1844. The principal picture was Rubens' "Choice of Paris," which had formerly been in the Orleans collection, and was knocked down to the Trustees of the National Gallery for £4000. Rubens' "Lot and his Daughters" was sold for £1700 to the same parties. And the companion picture of "Susannah and the Elders," which had hung along with it on the walls of the Lancellotti Palace at Rome, was knocked down to Mr. Farrer, who resold it to the Trustees of the National Gallery in the following year.

But the greatest collection known to have been brought to the hammer was that of Stowe, in 1848; the sum total realised being £80,000. When we say the latest, we mean of private collections; for that of Queen Charlotte was larger. From the period of the Fonthill sale, in 1822, until that of Stowe, no one had excited so much interest and attention even with classes who regard unheeded the dispersion of good ordinary collections. The rank and vast possessions of the vender—or, to speak more correctly, of the vendee, or "*sold up*"—and the stores of articles of virtu which had descended by inheritance, so as to form a conflux of heirlooms, bearing an historical relation to many of the most eminent personages of modern times, elicited universal public interest, which was the theme of the journalist for weeks, and into which we would enter more fully were it not that this event is so fresh in the recollection of all. The plate produced £20,000; and Rembrandt's fine picture of the "Unjust Steward" was knocked down for £2800.

A still more awful reverse of fortune was that of Louis Philippe, who once more found an asylum on the banks of the Thames, and who brought to the hammer in 1853 his Spanish pictures, collected for him in the Peninsula by Baron Taylor, comprising 350 specimens of the Spanish school. The fine "Nativity" by Velasquez, which had been bought by Baron Taylor from the Count d'Aguilar, in whose family it had remained from the time of its being painted, and one of the most striking specimens of the naturalistic manner of Velasquez, more particularly in the male figures, was knocked down for £3000; and that fine Zurbaran, "The Franciscan Monk," plunged into the depths of devotional abstraction—a picture that combines in an extraordinary degree both spiritual power and naturalistic reality—went cheap at £660. Indeed, one of the signs of the times was a considerable curiosity about the Spanish school of painting, which had been generated in this country by the admirable work of that accomplished amateur, Mr. Stirling, of Keir. The Stanhope gallery, which had been presented to Louis Philippe, also contains some fine works of the Spanish school, the "Infanta" of Velasquez being knocked down to the Marquis of Hertford for £1600.

But our space is limited, and it only remains for us to allude to the Bernal collection of last year, consisting principally of porcelain; and that of Mr. Rogers of this year, which produced above £50,000 to the representatives of the deceased poet. As regards the sales, which we have no room to describe in detail, we content ourselves with a selection, specifying name and year, commencing where we left off, in the similar list of the previous article:—

| | |
|---|---|
| 1807. La Fontaine's Dutch pictures | 1836. The effects of Lord Chatham |
| " Lord Yarmouth's pictures | " Works of Sir William Beechey |
| 1808. Lord Whitworth's pictures | " Pictures of Lord Stowell |
| 1810. Lord Coventry's pictures | 1837. Sir George Warrender's pictures |
| " Lord Ranelagh's pictures | 1838. Princess Kazcunofsky's pictures |
| 1811. The Duke of Queensberry's effects | " Lord Northwick's pictures |
| " The Duke of Somerset's effects | 1839. Prince Poniatowski's pictures and gems |
| 1813. The Earl of Shaftesbury's books | 1840. Sir Herbert Taylor's books |
| 1816. The Duke of Norfolk's effects | " The library of Bishop Butler of Lichfield |
| " Lord Centenay's pictures | 1841. Lord Mark Ker's cabinet of coins |
| 1819. Queen Charlotte's collection | " Earl of Upper Ossory's pictures |
| " Sir Robert Strange's pictures | " Duchess of Canmarle's effects |
| 1820. Sir Richard Croston's pictures | " Effects of Princess Augusta |
| 1822. Joseph Scrogarer's effects | 1843. Sir Bethel Codrington's pictures |
| " Marquis of Bute's pictures | 1844. Effects of the Earl of Sussex |
| 1823. Earl of Essex's effects | 1845. Lord Forescourt's pictures |
| 1824. Sir William Temple's pictures | " Earl Granville's pictures, and Sir Augustus Calloott's drawings |
| " Sir Mark Sykes's pictures | 1846. The works of Hilton, R.A. |
| 1826. Lord Radstock's pictures | " Miss Linwood's works |
| " The Marchioness of Bath's engravings | 1847. Works of Collins, R.A. |
| " The Earl of Carlisle's Greek [illegible] | 1848. Library of Lord Dudley Stuart, and of Lord Gwydyr |
| 1827. Lord Wellesley's diamonds | " Earl of Rosborough's pictures |
| " Duke of York's effects | " Casimir Perier's pictures |
| 1828. Lord Rivers' effects | " Sir Thomas Baring's pictures |
| " Lady de Clifford's library | 1849. Mr. W. Hope's pictures |
| " Earl of Carysfort's pictures | " Count Orsini's pictures |
| " Earl of Guilford's plate | " Libraries of Princess Sophia and Earl of Abergavenny |
| " George Canning's library | 1850. The Earl of Ashburnham's pictures |
| 1829. Earl of Liverpool's pictures | " Library of Sir Gore Ouseley |
| 1830. General Stewart's museum | 1851. Lord Middleton's pictures |
| " Mr. Hope Ball's plate | " Earl of Pembroke's collection |
| 1832. Lord de Clifford's pictures | 1852. Earl of Liverpool's pictures |
| " Lady de Grey's pictures | 1853. Sir Thomas Walter's collection |
| " The works of Jackson, R.A. | 1854. The Duke of Hamilton's effects |
| 1834. Lady Hampden's pictures | 1855. The late Duke of Argyll's pictures |
| 1835. Lord Chas. Townshend's Dutch pictures | 1856. The Sibthorp collection. |
| " Effects of Prince Leopold, at Marlborough House | |
| " Pictures of the Marchioness of Lansdowne | |
| " Pictures of Mr. Nash, architect | |

On the subject of those fluctuations of taste, of which such sales are a sure barometer, we may remark:—

First, the increasing estimation in which the early Italian painters are held—those at least which, however deficient in mechanical means, evince a potent religious sentiment, and arrive at a high degree of spiritual beauty. A generation ago such pictures were scarcely looked at by even those who call themselves connoisseurs. The vigorous colour of the Netherland painters, and the academic elegance and correctness of the Bolognese eclectics, were preferred to the earlier Italian painters. A great change has taken place since then, and in no market of Europe would the prime works of a Perugino, a Fra Angelico, and a Francia excite a warmer competition than in the sale-rooms of London.

Secondly, we have to note the extraordinary rise in the value of Sèvres and other porcelains. The Bernal collection, which cost £18,000, sold for £62,000. At Lord Gwydr's sale, in 1829, George the Fourth paid £400 for a service of Sèvres, which is not more than one-tenth of what the same service would now realise. It is now not uncommon for the same sum to be paid for a single vase. There is also an extraordinary rise of the value of the French luxury pictures of the last century—Watteau, Lancrets, and Greuze.

As for the tribe of picture-dealers, who are the bane of second and third class auction-rooms, a curious revolution has taken place in their manœuvres. Instead of seeking out worm-eaten pieces of panel in order to copy a Teniers or a Wouvermans, they now direct all their industry to copying pictures of modern English artists. So far has this been carried, that we know of one English collection said to be worth £50,000 which is, in reality, not worth a tenth of that sum. Nor is the industry of these fabricators confined to a literal copy, which may be detected and counteracted with the original; it extends to pictures made up and compounded of details of different pictures, with a general and clever mimicry of manner. On another occasion we may enter more fully into this new branch of British manufacture.

THE RUSSIANS AT LARGE ONCE MORE.—Our city has recently, and since the reopening of the navigation between the German ports and those of the Baltic and Gulf of Finland, been somewhat enlivened by the presence of a number of Russian visitors, who, on account of the number of "golden imperials" they usually bring with them, and the liberal way in which they spend them, are much cherished by the hotel and shop keepers of the place, who seldom fail to reap rich harvests at such seasons. Many more are successively expected; as, from what some of them report, above 50,000 persons of all grades have applied for permission and passports to travel abroad. Most of them, after refreshing themselves with the good things that are placed before them here, and especially having fitted themselves out from head to foot with all that is fashionable in point of dress, pass on to Paris and Southern Germany, to spend the remainder of the time allowed them on leave of absence from their homes and families. It is truly astonishing to witness the great anxiety and avidity displayed by the various tradesmen, aided by the commissioners of the hotels, in looking after these travelling Russians, and the manner in which they are fleeced. Notwithstanding these drawbacks, they all appear, however, to feel extremely grateful to their Emperor for allowing them to enjoy the fresh air of the places in which they sojourn for the time being, and are especially glad that the war is at an end.—*Letter from Hamburg, May 26.*

THE PEACE COMMEMORATION.—THE FIREWORKS ON PRIMROSE

HE GRAND FINALE, AND SHOWER OF 10,000 ROCKETS.—(SEE PAGE 634.)

## MASKS AND FACES.

A WRITER in a French periodical has just had the audacity to publish a set of articles so defamatory of the Parisian ladies that we doubt not, if they can find him out, he will suffer the fate of Orpheus. The said articles are called "Studies on the Art of Painting the Face," and commence with the sweeping and uncompromising assertion—that at the present time all the women in Paris, more or less, regularly and systematically, touch up, alter, revise, correct, or altogether re-form the faces which they have received at the hands of Nature. The process by which this is accomplished, he asserts, with an air of candour and probability difficult to resist, is called to *repiquer*. After which he proceeds to give a most elaborate and philosophical disquisition into the causes which have led to the universality of the practice, the sects or schools into which the face-painters divide themselves, and the modes, processes, substances, and instruments employed by them.

What are we to say of this? We are unprepared to follow the course our instinctive gallantry would prompt—rebut the accusation as a malicious libel, and bury the slanderer in the ruins of the careful structure of evidence he has built up. Without full and minute instructions from the accused party, it would be impossible to answer successfully a charge so artfully concocted. In the mean time, until the Parisian ladies have chosen and armed a champion, *ex officio*, it is our duty to give the substance of the accusation for the benefit of our own ladies, lest there should be some truth in it, and among other importations of Parisian modes so detestable a practice should find its way across the Channel.

After deliberately, as has been said, lay ing down the charge, our censor tells us, by way of palliation for the offenders, that he believes they have been led away by a popular poet, novelist, and critic, who has been much praised for the "colouring" of his style, M. Theophile Gautier. The dazzling word-painting to which he has had recourse in depicting the charms of female beauty; the abuse he has made of swan's down, coral, ebony, &c.; has mainly contributed to erect a false standard of beauty in the minds of his fair readers, and rendered them dissatisfied with the comparatively meagre and colourless tone of their natural attractions. The errors of certain modern schools of painting and music—the one abounding in violent contrasts of prismatic colour, the other in noisy accumulations of instrumental effects—are also charged with assisting to bring about an unnatural hankering for vigour of tone and rich orchestral combination in the public taste; and thus the ladies, in their eagerness not to lag behind the advances of art, have been led to wind themselves up, as it were, to the general concert pitch by recourse to the various artifices which our author proceeds to detail. Once the movement had begun, all were necessarily carried along in the current; for, however unwilling some might be to add a touch or a tint to their natural favour, and however repulsive the self-daubing of the innovators might seem in their eyes, they could not resist the impression that the delicacy and freshness of their own native graces must fade into insignificance beside the coarsely-help htened tints of the leaders of the new school. Thus, then, what with the old women who wish to prolong the bloom of youth, and present the preposterous spectacle of stereotyped juvenility, the dashing originators of the new school, dissatisfied with Nature's first manner, which they consider slow and old-fashioned, resolved to bring the old style of face to the level of modern theories, and those who, though they do not altogether reject the original model, find occasion for improvement in some parts and give an effective touch here and there, we are led to the conclusion with which our author commenced, that all the Parisian ladies—that is, all who have any pretensions to making an elegant figure—go through, every evening at least, a tattooing process on their skins, varying in extent and manner according to the peculiar taste or intentions of the individual.

Entering seriously now into his subject, he tells us that the *repiquenses*, or face-menders, are divided into two large classes or schools—the fanciful and the sensible, rationalists and idealists. The idealist is she who considers it slow and humdrum to have a face like her mother's, or her grandmother's, or any other of her predecessors; Nature's productions are commonplace and mawkish, puppy and flunikin, her style is broad and telling—she aims at colour and effect.

The rationalist has a less lofty flight of imagination. She strives after the true and natural. In youth her style is correct and simple; she copies from acknowledged models, or from her own portrait, if it be tolerably like and flattering. In advanced years she is content to patch up and retouch where any part has faded—to fill up cracks, and restore the glazing where it has disappeared. Here is simply a work of restoration. To give an example—the classical face-painter is generally fond of rubbing in softly a light blue tinge under the eyes; the effect is to give an air of languor, as though ardent and impassioned thoughts had left their unmistakable traces on the visage of the too sensitive creature.

The idealist, on the other hand, boldly spreads beneath her eyes a broad flat tint, hard and dark, charcoally, and altogether improbable. The effect is to give that sort of expression which can only be described as *peculiar*. Again, the follower of the rational school gives herself arched, slender, brilliant eyebrows, care being taken to place them at a good height from the lids—eyebrows *à l'Impératrice* they are called under the present dynasty.

The idealist makes hers of a dull colour—thick, and turned up with a peremptory twist like the moustache of a Zouave. The object thus secured is a vivid, startling, ruthless grace, that demands your admiration as a footpad does your purse. To the idealist belongs the black line which is sometimes seen immediately under the eyelash, on the very edge of the lid, which is to give additional lustre to the glance, and likewise the prolongation of the said black line beyond the corner of the eye, supposed to increase the apparent size of the orbit.

To sum up—while the rationalist strives at a servile imitation of nature, constituting a sort of Dutch school characterised by simplicity and native grace, the idealist, less "of the earth earthy," rushes into the unexpected and startling, the original local tint, for which she hath small regard, may sometimes be taken by her as a sort of starting-point; but it is the first step in a scale of colouring which mounts up into the maddest play of tints, and excels in the wildest dreams even of the modern romantic landscape painter.

The thoroughgoing idealist does not, as may be imagined, rise to the fulness of her poetic frenzy at one flight. Her first essays are more timid and tentative, but gradually, as one bold effect is ventured upon, then another—like the tiger that has lapped blood—she is lashed to a furious thirst, and finally becomes desperate, swaying fearfully on the thin boundary that divides insanity from genius.

The origin of the moderate or rationalist school is beyond the memory of man. From all time women have used cosmetics; the angel Azaleel first taught them to paint their faces. But the rise of the school of idealists is of more recent date; it is, in fact, entirely modern, although many of its practices have been separately in use among various nations from an early period; for instance, among the American Indians, who paint their cheeks and forehead blue; the Greenlanders, who streak their faces with white and yellow; the women of the Deccan, who cut out flowers upon their own skins, and paint them various tints, &c., &c. From each of these the idealist borrows a little, a hint here, a notion there, but the complete system, as a whole, is entirely modern, and of the present day. Another characteristic difference between the two sects, and one which is extremely significative as respects the basis on which each proceeds, is this: the rationalist, when she has occasion to purchase the materials with which she manufactures her deceptive charms, drives stealthily in a hack carriage under cover of dusk to the shop of the fashionable dealer in the raw material of beauty, veiled and muffled up in sombre garments, as though she were stealing to some guilty rendezvous. Not so the follower of the fantastic and ideal school—boldly and openly her equipage in the full glare of day draws up before the door as though she were about to buy dresses at a linendraper's. In point of fact, the one practises the art as a piece of hypocrisy and a fraud, and the other as a part and parcel of her personal adornments—the necessary complement of her toilet. This latter was exactly the view in which rouge came to be held in the olden time—in the age of hoops, high-heeled shoes, and patches. It formed part of the complete toilet of a lady of fashion—it was one of the items of full dress—to be without it was to be *en negligé*. Unmarried girls were forbidden its use—to wear rouge and diamonds was among the privileges acquired by marriage.

Thus we now to the practical part of our author's treatise, the arcana of recipes and processes, the chemistry of artificial charms. The fundamental colours, red, black, and white, are of ancient usage; they were what is called pearl white, rouge or carmine, and talc, and lamp or smoke black. But these substances have been found to present many objectionable peculiarities—the pearl-white cracks and foliates, giving the face a surface like veined marble; the rouge, whatever price may be given for it—and as much as five pounds for a little pot is sometimes paid—is not a fast colour, runs, and forms a coating of visible thickness; moreover, it has the disadvantage of colouring not only the cheek but the down upon it, so that by a glancing light a scrutinising eye detects the blushing artifice, as for lamplight, it lacks consistency, and smudges too easily. In place of carmine, what was called *vinaigre de rouge* was invented—a liquid which dyes the epidermis, so that, when it has been laid on, a wet rag lightly passed over the down washes all colour away from it without affecting that on the cheek. This, however, is now classed among the coarser and more ancient processes; and, though together with them it is still used by a large number, the more refined compilers of complexions adopt the following methods. Those who are merely too pale, and have no other fault to find themselves than that they have a dull, lustreless look—those lucky enough, in short, to require only a touch of rouge, have an easy and short task of it. They have recourse neither to the rouge paste nor the rouge vinegar, but to the most enchanting tint of delicate rose—so conceivable a tint rarely equalled by Nature's purest and freshest hues, and which is derived from a composition called *rose de Chine*. It is a curious kind of preparation, laid upon paper, and forming a kind of pocket-book. The surface of the paper has a shiny emerald-green and gold tinge. You moisten the tip of your finger, rub it, and a rose-red colour comes off upon the finger, the which is immediately applied to the cheek, which it lights up with a pretty delicate rosy hue, strongly recommendable to the less robust. This process is far preferable to laying slices of raw veal on either cheek, as is known to be nightly practised by interesting females fluctuating about maturity.

As regards white, its use is not so simple, as it necessitates a preparatory process, analogous to that which painters called priming. The best white being in powder, the skin has to be prepared for its reception by a previous application of an unctuous and retentive character; this is generally cold cream, with which the visage is lightly anointed. The white is then laid on with the end of the finger, as with a stamp. The whole soon dries, and forms a compact surface, on which the rouge may then be applied. Great care is requisite to lay on the proper amount and thickness of white at once; any patching or retouching would produce a blotchy and unequal appearance; the only alternative is to begin again. Let it be observed that there are three orders of white, viz., pink white for the fair; yellow white for the dark, called Rachel's white, its invention being attributed to the great tragedian; and, lastly, white white, or ninny's white, for those who are weak-minded enough to bedaub their faces in emulation of the Clown in a pantomime. Formerly what was called an *œil de poudre* (a dash of powder) was an indispensable process as the finishing touch to the toilet. It consisted in one slight sprinkling from the powder-puff on the hair, and a similar light shower of pearl-white on the shoulders. Under this light and discreet veil disappeared any little accidental imperfections or blurs marring the uniform snowiness of the skin; it was a mask, too, concealing the alterations that might supervene from heat, cold, or unfashionable emotion. Now a days this imperceptible hoar frost is considered too evanescent and unstable; a more vigorous and permanent effect is desired, and arms, shoulders, neck, and bust are washed over with a preparation called liquid white. This process calls to mind that by which the spotless white of pantaloon and cross-belt is obtained by soldiers—a species of pipe-claying it is, undoubtedly. There is a dark side, moreover, to this liquid-white which by no means can we omit to mention; this basis is made up of silver, or bismuth these act as poisons, which corrode, discolour, and wrinkle up the skin and moreover, effect, by absorption, the constitution itself. Nor is this all: those whose skins are plastered with it must beware of all sulphurous emanations; a ride on a Thames steamer—a visit to Harrogate or Barege—would simply turn them black—convert them into Hottentot Venuses. We have now to mention the treatment of lips and eyebrows. For the lips and the nails rouge vinegar is the only thing that can be used, though no doubt injurious, especially to the former. As to the eyebrows, the subject is one on which much prose might be written as a counterbalance to the sonnets indited by lovers to those of their mistresses. Charcoal and burned cork, though used by not a few, should decidedly be left to the domain of theatrical "making up." The recipe in vogue among the most knowing is derived from an antiquarian discovery. In certain ancient sarcophagi have been found little boxes containing a black matter evidently destined for this purpose, together with the little wooden instrument which was used in applying it. The pigment is composed of two parts of lead and one of plumbago unpurified of the small quantity of iron found in it when native. The little instrument, which is either of wood or ivory, is about an inch long, and cut to a point like a pencil. The point is dipped into the preparation, which is laid on, not at one stroke, but in an infinity of little lines laid close to each other like veritable hairs. The general shape of the whole eyebrow varies according to the fashion of the month. The effect is perfect, and there is only one objection to the process—the very long time it takes up. When we have adverted to the penciling of veins, to give an air of transparency to the marble surface of the skin, which is simply done with a camel-hair brush and a little blue paint, as we trace the branchings of rivers on a map, and, secondly, to the fabrication of artificial moles or beauty spots, a substitute for the patches of the older time produced on the same principle as the eyebrow above, we shall have completed our review of the art and mystery of face-painting as set down forth by the daring hand of the French writer, for daring he must be, whether he be a libeller or a true man.

And now, will it not be said that, in common with some moralist against whom it has been urged that, while painting vice to make it hideous or ridiculous, they have initiated the ignorant and corrupted the innocent—will it not be said that we, too, in affecting to give a warning, are furnishing hints? Certainly it would not be an easy task to refute such a charge. There is a natural perverseness in the human heart from which the fair are by no means exempt; and whence it results that to lay down a law is to suggest a transgression. All have heard the famous instance of this inverse effect produced by an admonition in the days of patches and Court preachers in France, when Massillon, in a burst of indignation against the "low dresses" of that day, ironically suggested that the Court beauties should still further draw attention to their unveiled charms, and attract the eye by a patch. On the morrow, at the Regent's ball, the hint was adopted; all the ladies appeared with the suggested improvement, and, to give every one their due, the patch in its new place was called a *Massillonne*. But, if we are forced to admit that we may have retailed poison, we have done so in strict accordance with Lord Campbell's *Act*—our arsenic is accompanied with a detective admixture. For, as we trust the present article will find as many male readers as female, full as many pairs of watchful and wary eyes will be enlisted in the preventive service, as weak minds may have been seduced to smuggle contraband charms. But, as an additional safeguard, we will conclude by summing up in our author's own words or thereabouts the pains and penalties to which those are exposed who have been tempted to launch into the absurd artifices of which a sketch has been given.

Once the beauty is invested in her borrowed charms, farewell to all the graces of varied expression, ever changing with the movements of the soul—graces more precious than beauty itself. Beneath its crust of paint the face is fixed immovable, as though the head of Gorgon had stared upon it. If it have a smile, it must remain for ever a rigid grin, like that on the plaster cast of a hanged criminal—at the utmost a convulsive twitch may be permitted to the extent of the twentieth part of an inch. Joy anger, the passions generally—in all their shades, in all their gradations—are banished for ever from their natural appanage. They may rumble and agitate internally—not a trace can they be allowed to exhibit on the "dial of the soul." A moment's forgetfulness has been known to cause a woful wreck—instant dilapidation, as from an earthquake. Huge fissures athwart the features, or myriad crackings and exfoliations, shedding from time to time their scales. In polking or waltzing, shoulders, forehead, must be carefully withheld from all contact with the partner's coat. When resting the hand on his shoulder the arm must be painfully kept aloof from the partner's sleeve. A severe gymnastic exercise polking or waltzing under such restrictions!

Equally forbidden is any prolonged indulgence in the pleasures of the ball: the heat induced is fatal when it has reached a certain point. Neglect of this precaution has caused frightful disasters. After the thirteenth polka faces have been seen to present a variegated appearance—pink and red on one side, yellow and brown on the other.

Tears labour under the same interdiction, the penalty being streaks down the face as down a glazed gingham after the first shower; likewise the mechanical allaying of any sudden irritation of the skin called scratching, this interdiction implies sufferings unfelt by Tantalus.

We might swell the list at pleasure: sufficient, we trust, has been said, however, to deter the most intrepid from joining either sect of *repiquenses*, or in any the remotest degree sacrificing to Venus in plaster of Paris.

## THE SOLDIERS' WELCOME HOME.

BACK they come, like waves receding,
Where the storm no more is beating;
Hungry hope no longer cheating,
Back they come!
Since the brand of War is broken,
Since of Peace we hold the token,
Let at last the words be spoken—
Welcome home!

Trophies ask they not, nor booty;
Marching, with a spirit-beauty,
In the heavenly light of duty,
Back they come!
Soldiers, to your native sod,
Patriots, where your fathers trod,
Heroes, to each household god,
Welcome home!

Women are we, meek and lowly,
Striving ups and plainly, slowly;
To our home true and holy
Back they come!
Let no lagging steps defeat them,
Rise we and go forth to meet them,
Whispering, as we fondly greet them—
Welcome home!

Noon we clouded with our weeping,
Midnight held our eyes from sleeping;
Once more to our spirits' keeping,
Back they come!
Barren Spring was vain to cheer us,
Now it blossoms as they near us;
Let us cry until they hear us—
Welcome home!

With their parting bugles' play
All our music died away;
What doth sorrow here to day?
Back they come!
Glorious wreaths our hands shall sling them,
Songs of love our lips shall sing them,
Proudly to our hearths we'll bring them—
Welcome home!

Who shall hear the serpent hissing?
Who shall question of the missing?
When unto their children's kissing
Back they come!
Of the lost they'll whisper low:—
"Thus spake Glory's self but now,
As she kissed them on the brow,
'Welcome home!'"

These shall tell us, mid our yearning,
How they fell, for honour burning,
Till upon our souls returning
Back they come!
See we not the weapons gleaming,
Hear we not the war-horse screaming,
Smiling, sobbing, midst our dreaming—
Welcome home!

Suns, they made our pathway bright,
Shadows, passed they from our sight;
Robed once more in God's own light,
Back they come!
Death from spirit never rent us;
In the trust which Heaven sent us,
We will shout while life is lent us—
Welcome home!

E. L. HERVEY.

## SOLDIERS RETURNING HOME.

We talk of home who never knew its lose;
But these are like the blind restored to sight,
Who feel the priceless blessing of the light
To the very core of the thanksgiving heart,
And love the day still dearer for the night
Through which they passed to it.

Blessing of Home!

Into how many a drear and ghastly scene,
Where strife and carnage played their hideous part,
And War was *actual*—stripped of all its gloss;—
The thought of Thee, white-winged and pure, has come
And nestled in men's hearts, and made them clean
From the fierce passions rampant in the fight?
Home! Peace! My brethren, let our thanks be given
To God, for His best gifts this side of heaven.

M. J. J.

A GOLDEN FLUTE.—An article of considerable interest, as well in an artistic point of view as for its rarity and intrinsic value, has just been produced by Messrs. Rudall, Rose and Carte, the musical instrument-makers to the Queen, at No. 20, New Bond-street and at Charing-cross. It consists of a flute made entirely of the precious metal, with just so much alloy as was absolutely indispensable in the adaptation of the metal to such a purpose, and has been manufactured by them expressly for Mr. Gilbert Wright, eminent and amateur flute-player, resident in Sydney, who set over to this country the requisite quantity of Australian gold with that view. The instrument is finished state contains 16½ ounces of gold, beside the slight quantity of alloy, which makes the metal of the quality of 18½ carats, and its value is from 150 to 160 guineas. In the construction all the improvements of M. Boehm have been introduced which gained for him the council medal at the Exhibition of 1851, as well as the additional improvements as regards facility of fingering made by Messrs. Carte, and for which the firm obtained the prize medal on the same occasion.

SPAIN AND MEXICO.—The Spanish Cabinet has lately held several Councils to decide on the course to be pursued with respect to Mexico. The result of their deliberations is that Spain will declare war against that Republic, should the latter refuse to execute the stipulations of the treaty of 1853 in favour of the Spanish subjects whose claims had been solemnly recognised by the Mexican Government and confirmed by a legislative vote. Accounts from Madrid of the 28th state that at a Cabinet Council, held the day before, it was resolved to send to the Gulf of Mexico, independently of the naval forces detached from Cuba, two ships of the line, one frigate, and one corvette, which are to be placed under the command of a distinguished naval officer. One of those ships is now ready to put to sea, and the Government is ordered that the other should be fitted out with all possible despatch.

COST OF PAUPERISM.—The eighth annual report of the Poor-law Board, just published, shows that in the year 1855, £6,896,041 was expended on the relief of the poor, being an increase of £607,188, or upwards of half a million, as compared with 1854, and equivalent to an increase of 11.3 per cent, and to an increase of 1s. per head on the population of 78. The increase is attributed in a great measure to the severity of the winter. The increase extended to every county save Durham, where there was a decrease of 0.3 per cent.

## PUBLIC ART.

### ST. JAMES'S PALACE AND PARK.

SOME days ago a desultory conversation took place in the House of Peers (commenced by Lord Ravensworth), upon some of the more salient abominations in our street architecture, and other offences against good taste in matters of art, by which we as and our wealthy capital a laughing-stock amongst nations. The Marquis of Lansdowne, the Marquis of Clanricarde, the Earl of Malmesbury, the Earl of Aberdeen, and Lord St. Leonards, all took part in this discourse; and each had his little pet grievance—one an ugly stable or coal-shed built up against the new Houses of Parliament; another a stack of odious red chimneys obtruding in the neighbourhood of Somerset House; another denounced the wretched state of disorganisation of our public statues; and Lord Malmesbury complained of the dilapidated condition of the public offices—the Foreign-office having neither kitchens nor sleeping accommodations; his Lordship, apparently, forgetting that in these troublous time a sandwich and a nap on the sofa is all a Foreign Secretary ought to look for. But the principal topics of discourse, and those to which we shall restrict our attention in the present brief notice, were the proposed new approaches to St. James's-park, and the defective condition of the east front of St. James's Palace, as respects the accommodation afforded for her Majesty's State receptions. Upon these subjects we have also before us a pamphlet of "Suggestions," by Mr. Alfred Beaumont, architect, illustrated with plans and photographic views, which we shall refer to in the course of our remarks.

It is a subject of not unnatural wonderment that when building Buckingham Palace, or, at any rate, when making extensive additions to it from time to time, no provision should have been made for her Majesty's Levees and Drawingrooms, and that upon all such occasions the Court should have to adjourn to a dilapidated old palace in the vicinity. This, we think, was certainly a blunder, and one which sooner or later will call for remedy, the accommodation afforded by St. James's Palace being neither in nature nor extent adequate to the purpose, in consequence of the increased and increasing numbers which now flock to pay their respects to her Majesty on these occasions, compared with the average attendance during previous reigns. Mr. Beaumont proposes to build a new east wing to St. James's Palace, consisting of an extensive suite of apartments, and, as these would only be required for State ceremonial purposes a few times in the year, he proposes also that these rooms should be used as a picture gallery, for the reception of the Vernon or other public collections.

With regard to the new approaches to St. James's-park, Mr. Beaumont has a plan for widening the gateway in the old clock tower at the bottom of St. James's-street, and carrying a road right through into the park. He also proposes to enlarge the gateway at the Horse Guards; and, finally, to make a new carriage entrance from Charing-cross through Spring-gardens, nearly in a line with the Strand and the Mall. These suggestions, we consider, are in themselves well worthy of attention, but we should protest against them if they were attempted to be combined, as there appears some reason to apprehend, with any joint-stock company job for appropriating the site of the National Gallery to the uses of a hotel company; and we mention the subject now in order that the public, whatever occurs in this quarter, may be on their guard against what we must denounce as a most impertinent proposition.

Mr. Beaumont, when forming his new entrance into the park, would build a new wing to Carlton-terrace in the room of the old and incongruous buildings which now occupy this site. We think this would be an improvement. We also agree with these, including the Marquis of Clanricarde, who would oppose any plan for cutting a carriage entrance through the Duke of York's steps, in continuation of Waterloo-place. The column itself is undoubtedly an eyesore; but the terrace line, in our opinion, enhances the pictorial effect of the Abbey and Houses of Parliament in the distance, whilst it acts beneficially in shutting out intermediate buildings of a mean character. We could have wished that the terrace wall, next the park, had been thrown open to pedestrians—it would have formed one of the most charming promenades in the metropolis, perhaps in the world; but this was more than could be expected, when kitchen room and pantry room were wanted for Ministers of State and Lords of high degree.

There are some other suggestions in Mr. Beaumont's pamphlet, as to thoroughfares through the metropolis, and many other points for discussion in connection with the very large question thus incidentally touched upon, the consideration of which we must reserve for a future occasion.

M. SOYER.—A NARROW ESCAPE.—According to a letter from the Crimea, in the *Journal de Constantinople*, M. Soyer, the well-known culinary artiste, had a narrow escape for his life. Accompanied by two friends, he was walking near the Flagstaff Battery, when at about ten yards from him a loud explosion took place, and the splinters of a shell passed close to him and his friends. It appears that two English sailors who had been taking a stroll on that quarter had found a shell the fuse of which had gone out before it burst. Thinking to amuse themselves with it they lighted the end of the fuse with a chemical match, and were making off when it exploded, killing one of them, and severely wounding the other.

INTERESTING EXPERIMENT IN STEAM NAVIGATION.—A trial trip or statement of some what novel construction took place on the Thames on Saturday week. The *Hoyer*, a paddle-steamer of near 200 tons, and drawing only seven feet of water, has been constructed to navigate the shallow waters on the west coast of Denmark, between the islands and the mainland. A reference to the large Pictorial Map of the Baltic and North Sea will show the peculiar geographical position of the part of the coast. From the river Eider to the Horns Reef, a distance of eighty miles, the coast is bounded by a number of islands, varying in size, and situated from three to ten miles from the shore. These islands, which are rich in grain and cattle, are inhabited by a hardy and industrious race, who, from their peculiar position, enjoy little communication with the mainland; the space between being composed of a long, low, flat (partly dry at low water), and numerous small and intricate channels, difficult and tedious to navigate. Having perfect confidence in the safe navigation of the *Hoyer* in almost any kind of weather, the inhabitants are unable for weeks together to communicate with the coast. The *Hoyer* (so named after one of the towns) has been constructed to remedy this disadvantage, and, in conjunction with the Royal Danish Railway, to place the inhabitants of these hitherto isolated places in daily communication, not only with the coast, but with the whole north of Europe. From her very light draught of water she will pass easily over the flats at tide times; and from her size and strength can safely navigate the channels between the islands, conveying passengers, cattle, and goods, with speed and safety. The following are her dimensions:—Length, 120 feet; breadth, 18 feet 6 inches; depth, 7½ feet; gross tonnage, 199; horse-power, 40: with accommodation for eighty passengers and 100 tons of cargo. On her trial trip, though against the wind, and with a cumbrous hold of the water, she averaged twelve miles an hour, with scarcely any perceptible effort or vibration, and fully realised the expectations of her constructors. She has been built for the Husum and Hoyer Steam-packet Company (composed of Danish and English proprietors), to ply between those places and the islands in connection with the Royal Danish Railway, which connects the North Sea with the Baltic. This railway—the result of the skill and enterprise of Sir S. M. Peto and his friends—is now in full operation, and has opened not only a short and expeditious route to the Baltic, but has placed at the disposal of our markets an almost inexhaustible supply of cattle and grain. To the port of Tonning, on the Eider, the North Sea terminus of the railway (a place but little known a few years since), two large steamers belonging to the North of Europe Steam Navigation Company ply from London and Hull; whilst on the opposite side, at Flensburg, on the Baltic, a fleet of smaller steamers belonging to the same company carry on the communication with Copenhagen, Husum, Aarhus, Stettin, Dantzic, Konigsburg, and St. Petersburg.

The King of Prussia has appointed Prince Windischgratz to the titular colonelcy of the 2nd Dragoons, of which the late Prince William, uncle to his Majesty, was many years chief.

## CHESS.

### TO CORRESPONDENTS.

R. C., THEALE.—THE following is a list of the noblemen and gentlemen composing the Managing body of the St. George's Chess club:—

*President*—The Right Hon. the Earl of Eglinton

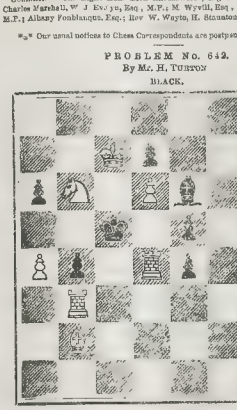
*Vice-Presidents*—The Right Hon. Lord Cremorne and C. S. M. Talbot, Esq., M.P.

*Committee*—The Right Hon. Lord Ravensworth, Right Hon. Lord Lyttelton, Sir Charles Marshall, W. J. Evelyn, Esq., M.P.; M. Wyvill, Esq., M.P.; J. M. Gaskell, Esq., M.P.; Albany Fonblanque, Esq.; Rev. W. Wayte, H. Staunton, Esq., J. Rutherfaud, Esq.

*** Our usual notices to Chess Correspondents are postponed for want of space.

PROBLEM No. 642.
By MR. H. TURTON

BLACK.



WHITE.

White, playing first, mates in three moves.

SOLUTION OF PROBLEM No 638.

| WHITE. | BLACK. |
|---|---|
| 1. Kt to K 5th | B to Q Kt 5th (best)* |
| 2. Kt to Q 7th | B to Q 3rd |
| 3. Kt to K 6th | B to K 2nd (best) |
| 4. Kt to Q B 7th | B to Q B 4th |
| 5. Kt to Q 5th | B anywhere |
| 6 K mates | |

* If B to K 2nd, White plays Kt to Q R 5th, &c

SOLUTION OF PROBLEM No. 639.

| WHITE. | BLACK. |
|---|---|
| 1. Q takes K Kt P | B takes Q |
| 2. Kt to K 6th | Anything |
| 3. R Mates | |

*** The First move in admits of a second Solution, beginning with Q to K B 7th, which is easily answered by playing a *White Pawn on White's K. R. 7th.*

SOLUTION OF PROBLEM No. 640.

| WHITE. | BLACK. | WHITE. | BLACK. |
|---|---|---|---|
| 1. Q to Q 5th | P takes Kt, or * | 3. Q mates. | |
| 2. Kt to K sq | K or P moves | | |
| * 1. | K to Q 4th † | † 1. | P to K B 4th |
| 2. Q checks at K R 4th, and mates next move. | | 2. Q takes P and mates next move. | |

SOLUTION OF PROBLEM No. 641.

| WHITE. | BLACK. | WHITE. | BLACK. |
|---|---|---|---|
| 1. Kt takes Q P | K to K 6th or (*) | 3. Q B 7th sq | K to K 4th |
| 2. Kt to K B 4th (dis ch) | K to Q 5th | 4 Q to Q B 3rd (ch) | K takes either Kt or Q mates |
| (*) 1. | K to Q B 7th | 2 Q to Q 3rd (ch) | K to K 3rd |
| 2. Q to Q R 3rd (or Kt to K 5th, &c.) | K to Q 8th, or K takes Kt | 3. Kt to K 3rd—Mate. | |

### CHESS IN SCOTLAND.

The brilliant game which follows was played some years ago between Mr. Harrwitz and one of the best players in Scotland, Mr. H. giving the odds of the Pawn and two moves.

(*Remove White's K B P from the Board.*)

| BLACK (Amateur). | WHITE (Mr. H.) | BLACK (Amateur). | WHITE (Mr. H.) |
|---|---|---|---|
| 1. P to K 4th | | 19. R takes Q | R takes R |
| 2. P to Q 4th | P to Q 3rd | 20. B to K 8th (ch) | Kt takes B |
| 3. K B to Q 3rd | Q Kt to Q B 3rd | 21. Q takes K Kt (ch) | K to B 2nd |
| 4. P to K 5th | P to K Kt 3rd | 22. Q to K B 4th (ch) | K B Kt 3rd |
| 5. P to K B 4th | P takes K P | 23. Q takes Q B P | Q B to K sq |
| 6. P to K B 5th | Q takes P | 24. Kt to Q 2nd | R to Q sq |
| 7. P takes K Kt P | P to K 5th | 25. Q to K 3rd | Kt to Q 5th |
| 8. R takes K K P (c) | P takes B | 26. Q to K Kt 6th | R to Q 4th |
| 9. B to K 3rd | Q to K 4th | 27. Q to K 4th | B to Q B 3rd |
| 10. Q takes P | K B to K Kt 2nd | 28. Q to K R 7th (ch) | K to his sq |
| 11. K Kt to K B 3rd | Q takes Q Kt P | 29. Q to K 8th (ch) | K to Q 2nd |
| 12. K takes R | B takes R | 30. Q to K 4th (ch) | K to Q B 2nd |
| 13. P to Q B 3rd | Q B to Q 2nd (*d*) | 31. Kt to K 4th | K to K 4th |
| 14. P to K Kt 5th | K B takes P | 32. P to K 6th | K B to Q 3rd |
| 15. Q to K Kt 4th (ch) | K to B sq | 33. Q to Q sq | K B takes P |
| 16. Kt to K Kt 5th | B takes P (ch) | 34. Kt to Q B 3rd | K B to K 6th (ch) |
| 17. K to B sq | Q to Q Kt 4th (ch) | 35. K to B sq | B to K 5th (ch) |
| | | 36. K to his sq | B takes K Kt P |
| 18. K to King | Q takes Kt (*e*) | And Black resigns. | |

* Kt to Kt 3rd would have been better. The sacrifice of a piece was not warranted by any special advantage in the shape of position or attack.

† Mr. Harrwitz has not to seek for a bit of brilliance whenever to White taking the Q's Rook with his Queen, and that is practicably easy, it surely have been of course and a much more steady road to victory than the one adopted.

### NOVEL VARIATION IN THE OPENING CALLED THE SCOTCH GAMBIT.—BY M. LAROCHE.

The encounter conducted with so much energy last season in Paris, between MM. Laroche and De Riviere, was resumed a few days back, and the course of it has been conducted in the main on an ingenious deviation from the ordinary manner of playing the Scotch Gambit. As the variation in question has scarcely been noticed at all, we print it in a position to produce definitively its merits and demerits, and in this case to the present simply giving the following moves from a game actually played, with very few comments upon their most striking features.

| WHITE (Mr. L.) | BLACK (M. de R.) | WHITE (Mr. L.) | BLACK (M. de R.) |
|---|---|---|---|
| 1. P to K 4th | P to K 4th | 6. P to Q 4th | Q Kt takes P |
| 2. K Kt to K B 3rd | Q Kt to Q B 3rd | 7. P to Q 5th | Q Kt to K 2nd |
| 3. P to K Kt 4th | P takes P | 8. Q B to Q 3rd | Q takes K P |
| 4. K Kt takes P | Q Kt to K B 3rd | 9. B to Q 3rd | Q takes K Kt P |
| 5. P to K 5th | Q to K Kt 3rd | 10. K R to K sq | And White should win. |

The customary move at this point for the first player is 5 K B to Q B 4th, but instead of so playing, M. Laroche proposes to move—

5. P to K B 4th

The effect of which, so far as we can judge from the first view, appears to be that while White obtains a fine, bold, open game, that of his adversary is severely cramped for many moves.

In reply to 5. P to K B 4th, the most likely moves for Black are 5. K to Q B 4th, or 5. Q to K B 3rd; and the result of these we may briefly indicate suppose then, in the first place—

5. P to Q B 4th

6. K Kt to K B 3rd

This is, perhaps, the most important feature in M. Laroche's variation, and it is certainly not easy to see in what way this move is to be best met. If 6. P to Q 3rd, then follows 7. P to K B 5th, and the Kt is forced to retire to very bad quarters. If 6. K Kt to K B 3rd White may play 7. P to K B 5th, and 8. P to Q 5th; and Black has a difficult position. Suppose, however, he play—

6. Q to K B 3rd

7. P to K 5th.

8. Q Kt to Q B 3rd

In the second place—

5. Q to K B 3rd

6. Kt to K B 3rd

7. Q Kt to Q B 3rd

And White has the advantage.

It is not precisely that the above are the best moves for either party; those time and rigid analysis can alone discover; but they are sufficient to indicate the bearing and resources of the variation.

### CHESS ENIGMAS

No. 988.—By E. B. C., of Hoboken, United States.

*White:* K at K R 2nd, K at K 5th, R at Q B 4th, Kt at K R 5th.
*Black:* K at K R 4th, Q at Q B 2nd, B at K 6th, Pns K B 3rd and 5th.
White, playing first, can draw the game.

No. 989.—By CAROLUS, of Dundee.

*White:* K at Q B 6th, Kts at Q 4th and 6th, B at Q 2nd, Pn at Q Kt 3rd and K B 3rd.
*Black:* K at K 4th, Pn at Q 6th and K B 5th.
White to play, and mate in three moves.

## THE QUEEN'S VISIT TO THE TURKISH EMBASSY.

ON Tuesday evening (last week) her Majesty and the Prince Consort honoured his Excellency Musurus Bey, the Ambassador of the Ottoman Porte, and Madame Musurus, with their presence, at a grand ball given in honour of her Majesty, at the residence of the Embassy in Bryanston-square.

Upon only one occasion has her Majesty conferred such a distinguished mark of honour as a visit to the representative of a foreign Power. This was the Queen's visit to the French Ambassador, at the close of the late war; and her Majesty's presence at the fête on Tuesday week, to congratulate the Turkish Ambassador on the return of peace, and the security which her own people have afforded to the Turkish dominions, was, indeed, a graceful act of loyal favour.

The exterior of the mansion in Bryanston-square was brilliantly illuminated with gas in coloured glasses. In the centre was the national emblem of Turkey—the Crescent and the Star; on the right V.R., and on the left the cipher of the Sultan. Above each column, on the principal cornice, was a vase from which issued a brilliant flame; and from the roof were suspended the flags of Turkey, England, and France. In front of the balconies were draperies on which were embroidered the arms of England, Turkey, and France.

The entrance in Bryanston-square was reserved exclusively for her Majesty and the Court, the general company entering from George-street. Opposite to the former the fine band of the Coldstream Guards was stationed, who, on the arrival of her Majesty, struck up "God Save the Queen," which was chorused loyally by the crowd.

The general company began to arrive about nine o'clock. His Highness the Grand Vizier was among the earliest visitors, having been invited by the Ambassador to take part in the honours of the reception. His Highness was attended by Mouredden Bey, Arifi Bey, Nazim Bey, Djélal Bey, M. Const. Adosides, M. Blacque, the Prince George Sturdy, and Khalil Bey.

Her Royal Highnesses the Duchess of Cambridge, the Princess Mary, and the Duke of Cambridge, arrived at half-past nine o'clock. Their Royal Highnesses were received in the entrance-hall by M. and Madame Musurus. The Duke of Cambridge was loudly cheered by the crowd, and greeted with "Rule Britannia" from the Coldstream band. His Serene Highness Prince Ernest of Leiningen and the Prince Lowenstein came next.

Her Majesty arrived at ten o'clock and was received by a guard of honour of the Coldstreams, and on alighting from the royal carriage M. and Madame Musurus advanced to welcome the Sovereign.

Her Majesty graciously acknowledged the attention of their Excellencies, and, preceded by the Lord Chamberlain and the Lord Steward with their wands of office, advanced through an avenue of flowering shrubs, and, turning to the left, she entered an apartment set aside as a retiring-room, and furnished in exquisite taste.

Her Majesty and the Prince Consort were accompanied by their illustrious guests the Prince Frederick William of Prussia and the Regent of Baden. A brilliant suite of ladies and gentlemen of the Royal household were in attendance.

On leaving the retiring-room her Majesty took the arm of the Ambassador, Prince Albert leading Madame Musurus, and thus the Royal party, ascending by the middle, entered the ball-room, fitted up in the Italian fashion. The floor was of exquisite Swiss parqueterie, introduced into this country by Messrs. Arrowsmith, of New Bond street. The walls were hung with a golden fabric, the draperies were of amber. On a dais, laid with crimson velvet and fringed with gold, was a throne with the regal crest curiously embroidered, and chairs of state in crimson velvet and gold. Here her Majesty took her seat to receive the assembled guests. At each end of the saloon was a vast mirror, extending from the roof to the floor. Behind the Royal throne and dais was a rich bank of flowers, flanking on a golden pillar on each side, supporting a porphyry vase filled with delicately-hued flowers.

Her Majesty was attired in a entire tartan dress, over white satin, and across her breast she wore the Star and Ribbon of the Order of the Garter. The Prince Consort wore the uniform of the Rifle Brigade.

After a short interval of repose the members of the *corps diplomatique*, headed by the Ambassador of Prussia and the Countess de Persigny, and followed by the other foreign Ministers in their order of seniority, were presented to the Queen, and then followed the same ceremonial with the general company.

The orchestra (that of M. Laurent) were placed in an ante-room opening upon the ball-room. The ball was opened by the Queen dancing with M. Musurus, Prince Albert taking the hand of Madame Musurus. In the same set the Princess Mary danced with the Prince Regent of Baden, the Prince Frederick William of Prussia with the Prussian Ambassadress, and the French Ambassador with the Duchess of Wellington. A waltz followed, in which Prince Frederick William danced with the Princess Mary; and then another quadrille, in which the Queen danced with the Prince Regent of Baden, the Prince Consort with the Princess Mary, the Duke of Cambridge with the French Ambassadress, and Prince Frederick William with Madame Musurus.

After this quadrille there was a waltz before the Queen; and then her Majesty was conducted by M. Musurus from the ball-room through a brilliant avenue, formed by the guests, to the suite of drawing-rooms. Presently returning to the ball-room, the dancing was resumed.

At midnight M. Musurus conducted her Majesty to the raised dais in the inner pavilion, where a most elegant supper was served. This was that of two pavilions opening into each other—the one of rose colour and white, the other of blue and white, draped and festooned with golden cords. The pillars of these pavilions were formed entirely of flowers clustering upon trellis-work, and reflected in one end by a parade of mirrors, of which the walls were entirely formed. In the centre and on each side were fountains of scents, throwing up jets of water. Upwards of 300 wax lights, in chandeliers, festooned with garlands of flowers, shed marvellous brilliancy upon the tables, which were of white plate and glass, and a service of exquisite porcelain, made expressly for the occasion, each plate of which contained a view in the royal park of the Sultan's dominions—the various hues of the beautiful fruit, peculiar to the country, greatly enhanced the splendour of the scene. A silver cornucopia, standing two feet in height, and covered by river gods in silver, and crowned with fruits, was much admired for its appropriateness as emblematic of Peace and Plenty. The piece of plate is the work of Mr. Garrard, and was designed by them expressly for Mr. Gunter in honour of the occasion.

The Queen, before leaving the pavilion, expressed to M. and Madame Musurus the high gratification her visit to the Embassy had afforded her, her Majesty shortly afterwards retired, conducted to her carriage as upon her arrival.

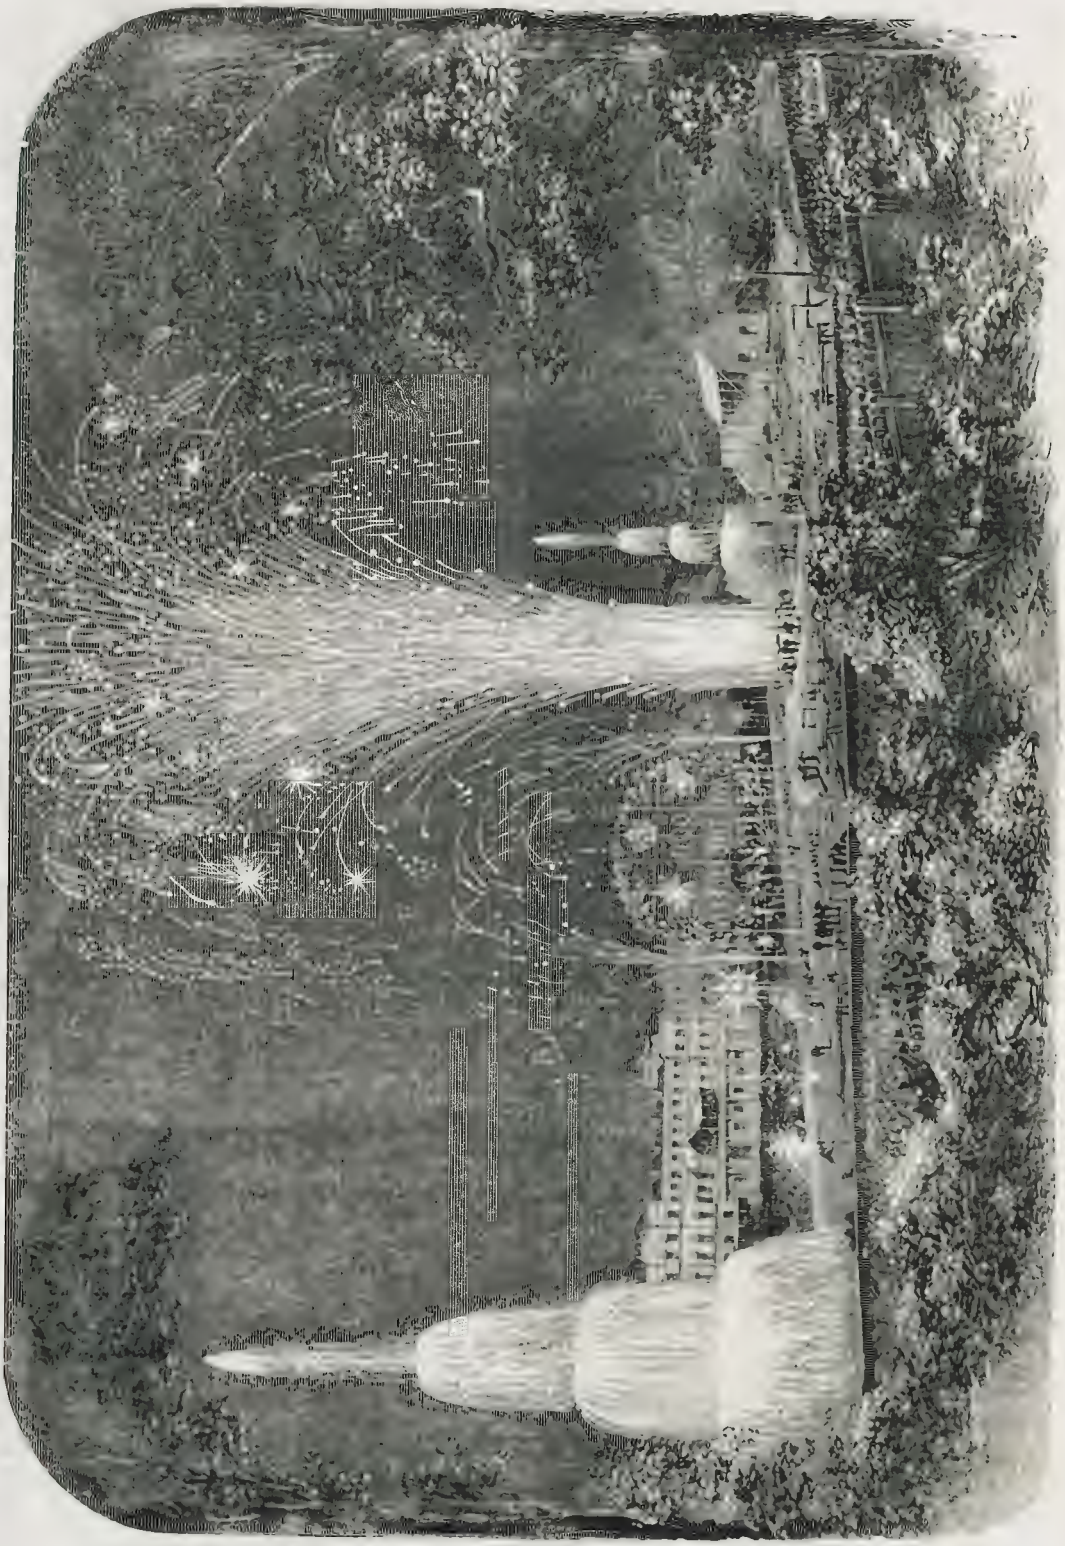
It is worthy of remark, as showing the great importance attached by the Sultan to her Majesty's visit to the Embassy, that some time ago the Sultan sent Madame Musurus a magnificent present of diamonds especially for this occasion.

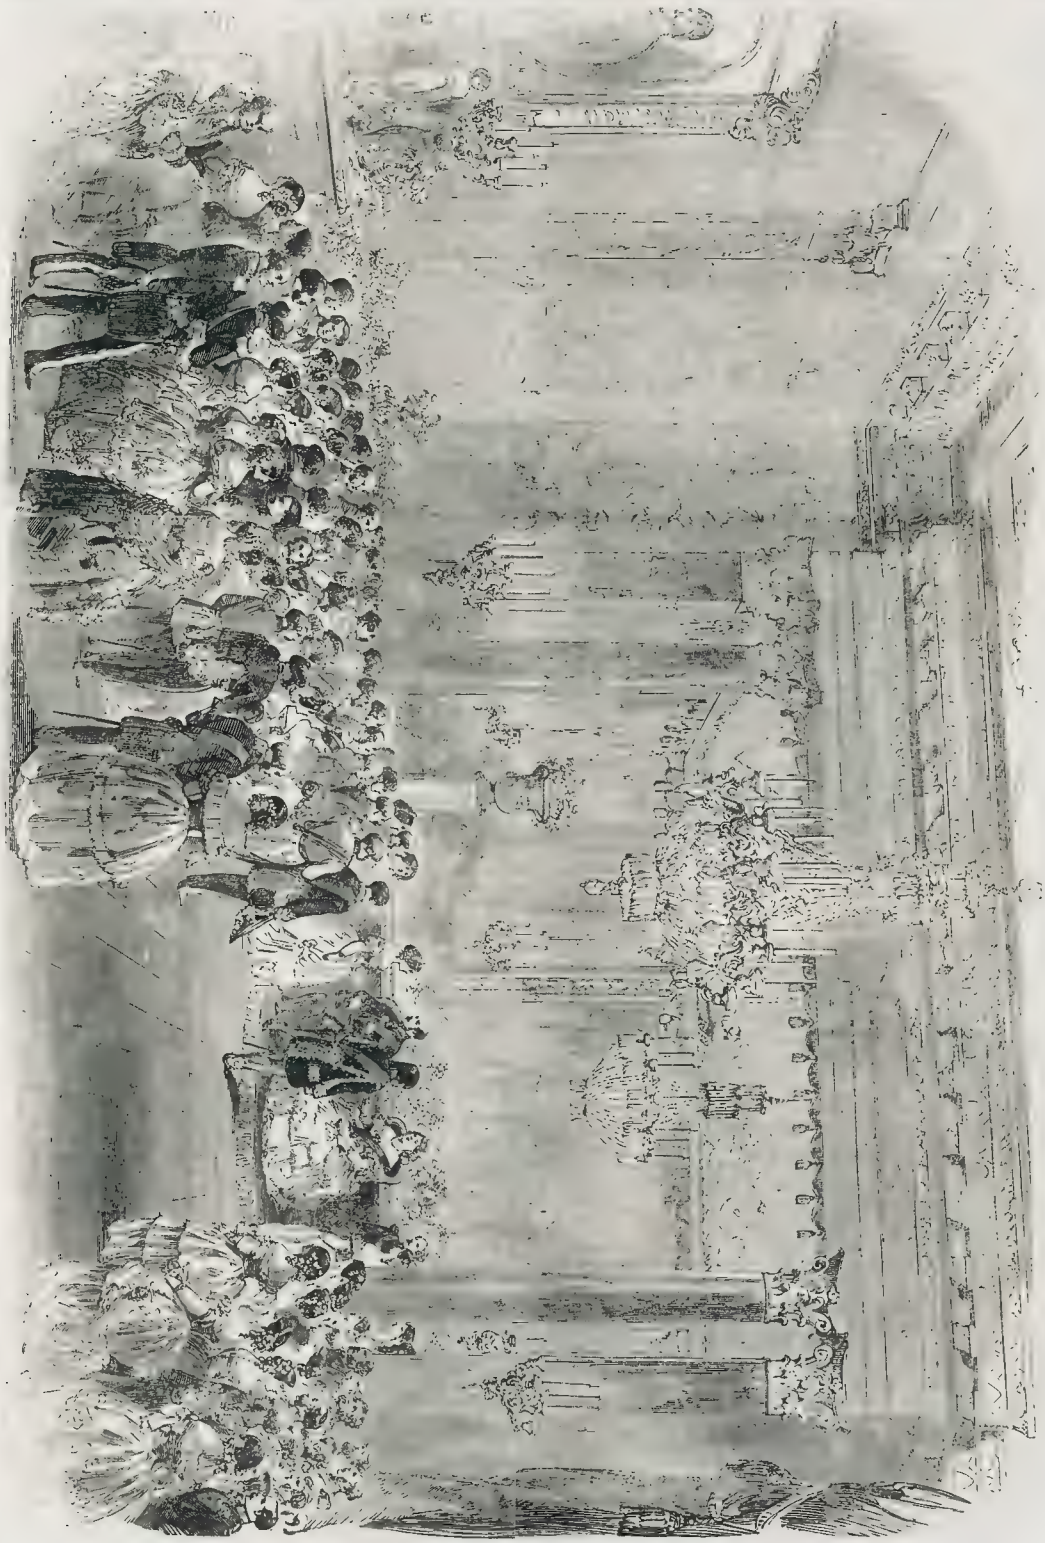
The general company protracted their enjoyment of the fête up to an advanced hour.

The decorations of the mansion were ably executed by Messrs. Coltman and Davis, whose skill and taste proved them worthy of the task.

SCOTTISH EMIGRATION TO TURKEY.—On Thursday about twenty-five agricultural labourers, with their wives and families, assembled, somewhat early, at the Caledonian-road station of the London and North-Western Railway, Glasgow, by the *Banner* steamer, en route for London, whence they sail on Saturday, for Turkey by the screw-steamer *Arno*. They are under the charge of, and are accompanied by, Mr. Gebbie, lately farm-overseer to Mr. Dixon, of Govan Iron Works, and are to be employed under him in introducing the Scotch system of farming amongst the Turks and Greeks, upon a beautiful and extensive estate acquired by Thomas Parry, Esq., situated about two miles from Constantinople. Mr. Parry has been long domiciled in that country, and, seeing the necessity and comparative paucity of agricultural implements, he resolved to offer the example of a better system, both for the improvement of his own property, and for the benefit of the ignorant Turkish cultivators in general. He accordingly sent a commission to Messrs. Edington and Mitchell, of Glasgow, to secure a competent overseer and a number of industrious and intelligent Scots peasants, and to order a supply of agricultural implements, &c., in Great Britain. The commission has been executed by our ingenious and enterprising townsmen, in addition to the human freight already despatched to the scene of agricultural implements of every variety and of the very best description, consisting of ploughs, harrows, spades, rollers, &c. They have also forwarded a large quantity of the most valued agricultural seeds. The success of the consignment of tools and seeds may be accordingly expected when we state that three spadesmen's barrows were filled by it to the roof. Another detachment of agricultural labourers is soon to follow. We have reason to believe that this consignment of men and material is likely, in due course, to be followed by others.—*Glasgow Herald*.

PRECAUTIONS TAKEN IN FRANCE TO PREVENT ACCIDENTS FROM POISONOUS SUBSTANCES.—The Dublin College of Physicians lately directed that all poisonous fluids or substances should be kept in square bottles, whilst all others might be placed in round ones. The authorities in France are also very anxious to prevent fatal mistakes, and, with this view, it has just been ordered that all poisonous substances or fluids which are disposed by pharmacists should be labels of a bright orange-red colour, so that even illiterate persons should once be made aware that caution is necessary respecting the contents of a bottle bearing, as it were, a conspicuous signal.





HER MAJESTY AT THE BALL . . . OF . . . IN HONOUR OF PRINCE FREDERICK WILLIAM—(See page 649.)

## CENTRAL AMERICA.

*(With a Map.)*

GENERAL REMARKS

In producing a Map of that portion of the New World generally known as Central America—that narrow and irregularly-shaped strip of land separating the northern from the southern continent—it is right to state at the outset that the matter is one surrounded by many difficulties in regard to the boundaries of particular States, and the names of some places. These difficulties arise out of the fact of disputed ownership as to some of these places, added to the circumstance, by no means unimportant in itself, that many of them have never, hitherto, been accurately laid down upon any maps of authority. Indeed, it was only recently—since the discovery of mineral wealth in California and in Australia, and the settlement of the former State and that of Oregon—that this part of the world appeared to be of any intrinsic value or political importance, and that chiefly as affording an eligible route between the Old World and the Eastern States of America, and the important interests thus newly developed in the Pacific.

The Map which accompanies the present article is based upon the most accurate authorities, having reference to recent and actual survey, including more particularly Bailey's Map, with additions from Admiralty charts, &c., as published by Sandford and Co., of Charing-cross, and Squier's Maps of Central American districts, published in various works.

The whole range of territories to which the term "Central America" applies once formed part of the Spanish empire in the New World, where they were classed as the Audiancia or Captaincy of Guatemala. It was the least explored, and always considered the least important, of the three Spanish governments in America (Mexico and Guadalajara being the other two); and there is no question that from a very early period England had obtained a footing, and even established settlements, in many parts falling within the range of the dominions claimed by the Spanish Crown, and that their so doing led to constant disputes and hostilities between the subjects of the two Crowns, and sometimes between the Crowns themselves. It is not going too far to say that this wild warfare in lands little known, and little valued by the home authorities, had been waged, with various fortunes, by enterprising and daring individuals from an early period after the first discovery of the New World, and had become a matter of European notoriety and interest from the sixteenth down to the middle of the eighteenth century. These disputes, and the pretensions of the subjects of the two Crowns in these regions, were eventually settled by treaty, as will presently be shown.

Of the general geographical and topographical features of Central America we cannot do better than quote a passage from Squier's "Notes on Central America,"* undoubtedly an able work, though throughout written in the spirit of a partisan, in hostility to the pretensions and policy of Great Britain:—

"Central America, in respect of geographical position, almost realises the ancient idea of the centre of the world. Not only does it connect the two grand divisions of the American continent, the northern and the southern hemispheres, but its ports open to Europe and Africa on the east, and to Polynesia, Asia, and Australia on the west.

"Looking at the map, we find, at the Isthmus of Tehuantepec, the Gulf of Mexico approaching to within 200 miles of the Western Ocean, the waters of the river Coatzacoalcos, which flows into the former, almost interlocking with those of the Chicapa, flowing into the latter. Below this point the continent widens, embracing the high table-lands of Guatemala upon the west, and the broad plains of Tabasco, Chiapa, and Yucatan upon the north and east. The Gulf or Bay of Honduras, however, closes around this section upon the south-east, and again narrows the continent to less than 150 miles. The country intervening between this bay and the Pacific is marked by a complete interruption of the Cordilleras, and is traversed by a great transverse valley, running due north and south, through which the large river Ulua finds its way to the Atlantic, and the smaller river Goascoran flows into the Bay of Fonseca, on the Pacific. Still lower down, and passing the grand transverse beam of Nicaragua, is the well-known narrow Isthmus of Panama or Darien, over which the tide of emigration has twice poured its floods—once upon Peru, and again upon the glittering shores of California.

"Nor are the topographical characteristics of Central America less remarkable than its geographical features. In its physical aspect and configuration of surface it has very justly been observed that it is an epitome of all other countries and climates of the globe. High mountain ranges, isolated volcanic peaks, elevated table-lands, deep valleys, broad and fertile plains, and extensive alluviums, are here found grouped together, relieved by large and beautiful lakes and majestic rivers, the whole teeming with animal and vegetable life, and possessing every variety of climate, from torrid heats to the cool and bracing temperature of elevated regions.

"To, geographically, Central America presents the remarkable choice of elevation, which have, to a certain degree, led to political divisions. The first is the great plain, or broken table-land, on which is situated the city of Guatemala, and which is upwards of four thousand feet above the sea. Here the large rivers Usumasinta and Tabasco, flowing northward through Chiapa and Tabasco into the Gulf of Mexico, take their rise. Their sources interlock with those of the Motagua or Guatimala, running eastward into the Gulf of Honduras and with those of the small streams which send their waters westward into the Pacific.

"A group of mountains occupies Honduras, presenting an almost mural front toward the Pacific, but sheltering our narrow spurs or subordinate branches, like the fingers of an outspread hand, toward the north and east. Between these ranges, and in some cases almost encircling by them, are several broad valleys or plains of limited extent, in which are gathered the waters of numerous minor and small streams, forming respectively considerable rivers, which run to the north and east into the Caribbean Sea, and others which run to the Southern Ocean. Among the most remarkable are the Chamelecon, the Ulua, Lean, Roman or Tinto, Patuca, Coco (Wanks or Segovia), upon the eastern slope; the Choluteca, Nacaome, Goascoran, San Miguel, and Lempa, upon the western.

"Intervening between this and the third great centre of elevation in Costa Rica is the basin of the Nicaraguan lakes, with its verdant slopes and gently undulating plains. The nucleus of the elevation in Costa Rica is the great volcano of Cartago, which towers in its midst. Here the Cordilleras assume their general character of a great unbroken mountain barrier, but not so as to begin in low ridges on the Isthmus of Panama."

The total area of Central America may be calculated at 155,000 square miles, and the population at about 2,000,000, of which Guatemala has 850,000; San Salvador, 394,000; Honduras, 350,000, Nicaragua 300,000; and Costa Rica, 125,000.

Before quitting these general topics it is necessary in order to guard against misconception to state that the term "Central America" is itself of doubtful origin and has been applied [illegible] no antiquity, and appears to have been first used in 1821, when the five provinces constituting the government of Guatemala—viz., Guatemala, San Salvador, Honduras, Nicaragua, and Costa Rica—formed themselves into the short-lived "Republic of Central America." This union has since been broken up, and the several provinces form distinct States—the boundaries of many of which are matter of dispute. These remarks are important when considering the Clayton-Bulwer Treaty, where the term "Central America" is used.

HISTORY OF BRITISH RELATIONS IN CENTRAL AMERICA.

In the ILLUSTRATED LONDON NEWS of May 10 we gave an abstract of the conflicting arguments of the British and American Governments as to the construction to be given to the Clayton-Bulwer Treaty. Referring to the correspondence on this subject, we pointed out, as a most important element in the dispute, that, when that treaty was in course of negotiation, it was distinctly agreed that it should not in any way prejudice the *status quo* of Great Britain in this region, many of whose pretensions had been openly contested by the American Government. This condition, however, the American Government has since sought to evade; and, in the correspondence which has taken place between the two Governments, Lord Clarendon has been led into a discussion as to the historical antecedents of our relations in this quarter, tending to involve the merits of our *status quo*, which he had a perfect right to decline entering upon, and which we think he would have done wisely to have avoided; as, from the terms of our agreement with America, these particulars had nothing whatever to do with the case upon which we are at issue. Nevertheless, as these circumstances have been broached in a manner which forces them upon the attention of the world, we propose to take them in review, having reference to the statements advanced respectively by the American and British Governments, as well as by other authorities.

The relations of Great Britain in Central America at the time of signing the Clayton-Bulwer Treaty may be classed under two heads—1. The settlement of British Honduras, with its dependencies, the Islands of Ruatan, Guanaja, or Bonacca, &c., since formed into the colony of "the Bay Islands"; 2. The protectorate of the Mosquito Territory.

With respect to our position in British Honduras, otherwise known as the Belize Settlement, from an early period British subjects had been allowed to settle and cut logwood in certain portions of the country on the west shore of Honduras Bay; and, doubts and disputes having arisen as to the extent of the privilege, the treaty of 1783 contained a clause restricting it within a district extending between the river Wallis, or Belize, on the north, and the Rio Hondo, on the south; and it was stipulated that "all English who may be employed in any other parts, whether on the Spanish continent or in any of the islands whatsoever dependent on the aforesaid Spanish continent, and for whatever reason it might be, without exception, shall retire within the district which has been above described in the space of eighteen months." It was further provided that the permission granted to cut logwood "shall not be considered as deroguting in any wise from the (King of Spain's) rights of sovereignty over the district in question. By the treaty of 1786 it was provided that British subjects should be allowed to cut mahogany-wood as well as logwood within the very district.

With respect to the Mosquito territory, and generally, the treaty of 1786 provides that "his Britannic Majesty's subjects, and the other colonists who have been accustomed to enjoy the protection of Britain, shall evacuate the country of the Mosquito coast as well as the establishment in general, and the islands adjacent, without exception;" but, on the other hand, precautions were taken to ensure the Mosquito people from persecution by the Spaniards. The 14th article of the Convention provides that "his Catholic Majesty, prompted solely by motives of humanity, promises to the King of England that he will not exercise any act of severity against the Mosquito inhabiting in part the countries which are to be evacuated by virtue of the present convention, on account of the connections which may have subsisted between the said Indians and the English; and his Britannic Majesty, on his part, will strictly prohibit all his subjects from furnishing arms or warlike stores to the Indians in general situated upon the frontiers of the Spanish possessions."

Mr. Buchanan insists that these treaties foreclose our claim for all time to any possession or protectorate in any part of what was once Spanish territory; and that all the several Republics and disjointed States which have sprung out of the ruins of that empire inherit all its rights upon their frontiers. Lord Clarendon disputes this position, and with justice on his side. Nothing is more clearly established in international law than that certain Powers or States only inures during the existence of the State in its then territorial conditions, and that it does not necessarily inure to the use of a new State or Government formed upon the subversion of the original State with which the treaty was made. In the case of a national revolution, as in France, it has been recently the custom to recognise the new order of things, and to confirm all existing treaties; and even in the cases of large republics dismembered from the mother country this has been done. The British Government directly recognised the independence of the Republic of Mexico, Columbia, and Buenos Ayres, and made commercial treaties with them in 1825, before "the Republic of Central America" is never to be disposed.

Lord Clarendon also maintains that, independently of these considerations, the two contracting powers were at war with Spain since 1786 did away with the treaty of that date, but this is an argument founded on the [illegible] very doubtful authority, and, moreover, not at all essential to our position. We think it sufficient to rest the case of the British Government upon these grounds—that after centuries of peace and open hostilities we have obtained, under certain possessions and certain political relations to the Spanish crown, [illegible] against force or fraud by the express guarantee of the only power that ever [illegible] Are the States which [illegible] supposing we were legally bound by our treaty relations [illegible] to them, which [illegible] Spanish empire in the [illegible] entire rights as to the control and dominance of that guarantee? Certainly not. In the first case, as we have shown, the British Government has renewed its protectorate of the Mosquito, and reasumed its former ancient possessions in British Honduras and Honduras Bay. What would follow if we were to abandon the Mosquito protectorate is too [illegible] to state by Mr. Buchanan to leave a doubt. After [illegible] even if there were [illegible] have never actually submitted to [illegible] would give them no title to rank as an independent State, without violating the [illegible] usage of every European nation without exception which has acquired territory on the continent of America." He says [illegible]:—

> The moment Great Britain shall withdraw her forces from Ruatan, whose sole object was to protect the Mosquito Indians, the Republic of Honduras will take possession of the island, and will maintain its sovereignty over it as against the United States, in the same manner as it does over the Mosquito territory, and over the other islands in the Bay of Honduras. The Indian tribes within their limits will not form the exception which Great Britain asserts in favour of the United States.

In short, they would be left to the tender mercies of Walker and his Filibusters to exterminate at their pleasure.

With regard to Ruatan and the adjoining islands, forming the colony of the Bay Islands, Lord Clarendon, in his reply to Mr. Buchanan's statement, observes:—

> As to Ruatan, and the adjoining islands, all that can be desirable as to them is, whether they are island dependencies of Belize or attached to some Central American State. Now, it cannot be disputed that, whenever Ruatan has been permanently occupied, either by one power or the other, it has been more than a military guard or fortress, the occupation having had objects

It is true that the Republic of Central America declared that it held a long string in that island from 1821 to 1839; but this fact merely rested on that Republic's declaration, and at that period [illegible] that the British Government were aware that a foreign flag flying at Ruatan [illegible] ship-of-war was sent to haul it down, and [illegible] time no attempt [illegible] made to re-establish it; but, on the contrary, when [illegible] overseer complained [illegible] been brought [illegible] Central [illegible] commandant has referred them to Belize, telling them that the island was British.

Assuming, as we think we have a right to do, that the old treaties with Spain do not now inure against us in their disabling character; that, in short, we are now, by the dissolution of the Spanish rule in these parts, left precisely on the footing that we were before the signing of those treaties, it becomes interesting to inquire a little what are our antecedents in Central America?

Squier, in his "Notes on Central America," speaking of the *Rio Tinto*, Negro or Black River, has the following:—

> It was on this river that the English had a fort and some settlements during the last century, which were, however, evacuated in 1786, in conformity with the treaty that year negotiated between England and Spain. Subsequent attempts were made to found permanent establishments there, one under the auspices of the Cazique of Poyas, Sir Gregor M'Gregor, and another, in 1839—41, by an English company, under the countenance of the British settlement at Belize; but all have proved signal failures. The last adventurers named the district the Province Victoria, and made an unimportant establishment, to which they gave the name of Fort Wellington.

Of this plan, however abortive, it is important to observe that amongst the territories included in the proposed Poyas kingdom were the islands of Ruatan and Guanaja (Bonacca).

Again he says, "The Black River Lagoon, called Criba by the Spaniards, according to Roberts, who visited it, is about fifteen miles long by seven wide. It contains several small islands, which were cultivated during the English occupation of Black River. At this period they erected considerable works of defence, which were enlarged by the Spaniards after the English evacuation, the ruins of which are still conspicuous."

Again, after denouncing the proceedings of the British freebooters of the seventeenth century, whom he calls "pirates," and with whom the Mosquito shore, and "that part of Guatemala now called Belize, were favourite localities," he tells us that in 1642 "an English detachment of this fraternity" captured Ruatan and the neighbouring islands, whose safe and excellent harbours, fine climate, and abundant supplies, had attracted their favourable notice. The Spaniards, after two battles, succeeded in driving them away, but apparently only for a time. Certain it is that they found the islands waste, and early abandoned them; that in 1742 the English were again in the ascendant in these parts, and "attempted the project of obtaining possession of the whole of the Atlantic coast in Central America," in furtherance of which they forcibly seized upon several important points of the main land, including Truxillo, and made establishments and erected forts at the mouth of the Black River; "they also occupied Ruatan, and fortified it with materials carried off from Honduras."

Brooks, in his "General Gazetteer," date 1853, states of the island of Ruatan, "This beautiful island, partially covered with wood, was once in possession of the English, who fortified its excellent harbour, but abandoned it when they withdrew from the Mosquito shore." To which he very properly adds, that they re-occupied it when they resumed [illegible] the Mosquito people.

To show that our occupation of these parts was not one of mere forcible [illegible] we may refer to a memorial laid before the British Government in 1757, entitled "Some Account of the British Settlements on Mosquito Shore," which, after adverting to the voluntary allegiance tendered by the inhabitants of that coast about the time of the conquest of Jamaica, says of the Mosquito Indians:—

> Their submission to the sovereignty of Great Britain was not only solemnly renewed by the Mosquito King in person to the Duke of Albemarle (son of General Monk), when Governor of Jamaica; but it is a fact not to be denied that they have made it a point to give to almost every succeeding Governor fresh assurances of their allegiance: in consequence of which Great Britain did, for upwards of a century, afford them protection, and has for many years constantly distributed annual presents among them, native chieftains.

We further find the Mosquitos described in Jeffrey's "Spanish West Indies," published, in 1762, as

> A small nation of Indians never conquered by the Spaniards, [illegible] being so situated as to render any attempts against them impracticable [illegible] they are surrounded on all sides by land with morasses or marshes [illegible] by a river on both sides, and rocks besides, they have such an [illegible] hatred to the Spaniards that they would never have any correspondence with them.

With respect to Greytown, formerly St. Juan de Nicaragua, although it was claimed and constituted a port of entry by the Spaniards in [illegible], Lord Palmerston in a despatch to Mr. Castillon, Minister of Nicaragua, dated July, 1849, states:—

> If it be established, as it clearly is, that the Mosquito territory is, and for centuries has been, a separate State, distinct from the American possessions of Spain, there cannot be a moment's doubt that the port of Greytown, at the mouth of the river San Juan, belongs to, and forms part of, the Mosquito territory. This can be shown by quotations from numerous authorities, public [illegible] treaties, and documents; and so far from there being any just ground to doubt that the southern extremity of the Mosquito territory includes the port of Greytown, there are, on the contrary, good and substantial reasons which can be alleged to show that the rights of the Mosquitos extend southwards as far as the Boca del Toro, at which place [illegible] Mosquito has at various times exercised rights by levying duties.

FORMALITIES, RIGHTS OF BRITISH HONDURAS AND THE MOSQUITO TERRITORY—PROPOSED INTEROCEANIC COMMUNICATION.

It remains to say something of the disputed boundaries to which we referred, at the opening of the present article, as a difficulty inherent to this subject. The settlement of British Honduras the American Government would restrict within the limits prescribed by the treaty with Spain of 1783; but, besides the Rio Hondo and the Siboon river (as [illegible] by the Spanish [illegible] Wyke), which, in reality, extends south [illegible] the Sarstoon river, [illegible] by the sea-coast, and with a breadth inland of about 10 miles. The "Mosquito shore" is described by the American authorities as a narrow strip of land along the coast, lying between Blue fields Lagoon and Cape Cameron; whereas the claim for its extreme southern limits Cape Honduras on the north, and the St. Juan river on the south, with a considerable extent of territory inland.

The value of the British Honduras settlement and its dependencies, [illegible] very much underrated by persons not aware of the real facts. We speak of its intrinsic commercial value, arising, as it [illegible] the chief depôt for the supply of the Central American States, and [illegible] irrespective of the political importance of the [illegible]. The Times [illegible] months ago, ridicule the [illegible] [illegible] [illegible]

## NEW BOOKS, &c.

BOOKS SUITABLE for PRIZES.—Illustrated with Wood Engravings. Handsomely done up in cloth gilt. Each volume complete in itself.
CHAMBERS'S MISCELLANY. 10 vols., each 2s 6d.
CHAMBERS'S EDUCATIONAL COURSE.
SELECTIONS FROM CHAMBERS'S REPOSITORY AND MISCELLANY.
TALES for ROAD and RAIL. 4 vols., each 2s. 6d.
SELECT POETRY. 1 vol., 2s 6d
HISTORY and ADVENTURE. 3 vols., each 2s 6d.
TRAVELS and SKETCHES of SCENERY. 1 vol., 2s. 6d.
ENTERTAINING BIOGRAPHY. 3 vols., each 2s 6d.
CHAMBERS'S POCKET MISCELLANY. 12 vols., each 2s.
Each of the above sets may be had neatly cased for 6d. less.
CHAMBERS'S LIBRARY for YOUNG PEOPLE. 10 vols. (2 vols. in one), cloth gilt, each 2s. 6d.
CHAMBERS'S LIBRARY for YOUNG PEOPLE. 20 vols., cloth lettered, each 1s.
CHAMBERS'S TALES for TRAVELLERS. 2 vols., cloth lettered, each 2s. 6d.
W. and R. CHAMBERS, London and Edinburgh.

Just published, demy 8vo, stitched, price 1s.,
MUSIC: a Practical Essay. Being an interesting and rational Introduction to the Study of the Art.
London: J. A. NOVELLO, 69, Dean-street, Soho.

With Numerous Illustrations.
RECREATIONS in PHYSICAL GEOGRAPHY; or, the Earth as It Is. By Miss H.M. ZORNLIN. Fcap. 5s. 6d.
The WORLD of WATERS; or, Recreations in Hydrology. By Miss M. M. ZORNLIN. (Deeper Editions, 4s. 6d.
RECREATIONS in ENTOMOLOGY. By Miss H. M. ZORNLIN. Third Edition. 4s. 6d.
RECREATIONS in CHEMISTRY. By THOMAS GRIFFITHS. Second Edition. 6s.
RECREATIONS in ANATOMY. By the Rev. LEWIS HOPE. Price 3s. 6d.
London: JOHN W. PARKER and SON, West Strand.

Eighth Edition, with 10 Woodcuts, 2s. 6d.,
THE HOUSE I LIVE IN; or, Popular Illustrations of the Structure and Functions of the Human Body.
London: JOHN W. PARKER and SON, West Strand.

Crown 8vo, cloth, price 7s. 6d., post-free 7s. 10d.,
LONDON AS IT IS TO-DAY; WHERE TO GO AND WHAT TO SEE: with Two Hundred Engravings.
London: H. G. CLARKE and Co., 86, Strand.

TO LADIES.—PRACTICAL DRESSMAKING. 2nd Edition. A Model, Book and Patterns, to Impart, without the aid of a teacher, perfect fit and elegance. Invaluable to ladies. Price 5s. HARTLEY'S Ladies' Practical Guide to the Art of Dressmaking. By the Author. Mrs. HARTLEY, 6, Upper Harley-street, Portland-place.

CASES of CONSUMPTION, BRONCHITIS, &c., SUCCESSFULLY TREATED. By Dr. MADDOCK, SIMPKIN, MARSHALL, and Co.; STANDAGE-street.

Just published, 12mo cloth, 5s., 5th and price 10s., post-free,
HOMŒOPATHIC TREATMENT of INDIGESTION, Constipation, and Hæmorrhoids (Piles). By W. MORGAN, M.D. Containing simple Directions for the Treatment of these Complaints, Receipts for Preparation of Indigestion, &c., may be safely taken by persons suffering from either of these Complaints. 8vo, bound, price 4s. 6d. Post Free, 5 Stamps. 8th Edition, enlarged, and 9, Vere-st., Oxford-st.

Just published, 12mo cloth, 5s., 5th and price 10s., post-free,
HOMŒOPATHIC DOMESTIC MEDICINE. By J. LAIDLAW, M.D. Decree of all technicality. No medicine is prescribed without the Instructions for its Administration, and every dose to be administered. An excellent work for families, emigrants, and manufacturers. A Medicine Chest for this Work, price 5os.
AN EPITOME of the ABOVE. Price 5s. A Guide to those commencing this treatment in family practice. Cases for this work, price 1os. 6d., 21s., and 42s. Pocket-Cases, Recorder, 5s. 6d. Case and Chronometer, and Pocket-Case, 42s.

## NEW MUSIC, &c.

IL TROVATORE, Sonnambula, Norma, Puritani; also L'Ecclair du Nord, Don Giovanni, Figaro, Linda, Don Pasquale, &c., with Portrait of Mdlle. Piccolomini, arranged by Nordmann, price 6s. in cloth. Il Trovatore in the same form, 5s.
BOOSEY and SONS, Musical Library, 28, Holles-street.

LA TRAVIATA VALSE, by MONTAGNE, on Verdi's New Opera, superbly illustrated in colours, price 4s. Traviata Quadrille, by Henri Laurent, price 3s.
BOOSEY and SONS, Musical Library, 28, Holles-street.

THE PICCOLOMINI VALSE, by ALBERT WAGNER, is published this day, illustrated with a superb Portrait of Mdlle. Piccolomini. Price 4s.
BOOSEY and SONS, Musical Library, 28, Holles-street.

A MUSICAL MIRACLE.—100 of HENRY RUSSELL'S SONGS (Words and Music), in Illustrated Wrapper, for 1s., free by post for 14 stamps, including all the copyright songs composed by Mr. Russell during the last eighteen years, with his Cheer, Boys, Cheer.—Far away the Sea. Long parted have we been.—Sparkling Star. Hard Times. Brothers, Leander.—To the Wars. Old Arm Chair.—Gambler's Wife, &c. Published only at the MUSICAL BOUQUET OFFICE, 192, High Holborn.

LA TRAVIATA for CORNET-à-PISTONS and PIANOFORTE. KOENIG'S JOURNAL for the Month contains a Selection from the Most Popular Opera. Also a Set of Waltzes, Polkas, &c. Price 1s. Post free on 2 stamps. Price of each Part, 6d.; Post free on 8 stamps.
JULLIEN and CO., 214, Regent-street.

ROSE of ENGLAND, HERALD of PEACE POLKA, composed by VAN NOORDEN, with grand National Chorus (words by Henry Lucas). Dedicated (by Command) to Her Majesty the Queen. This charming Polka is equally suitable for an ordinary occasion. The whole of the company joining in the chorus produces a most beautiful effect. Price 3s. 6d. Duff and Hodgson, Music Publishers to the Queen, Oxford-street, where may be had the national song "May Peace and Plenty continue to Bless our Land," price 2s., sung at the public dinners with acclamations of applause, and always encored.

MR. CRIVELLI begs to inform his Friends and the Public that a new Edition of the Art of SINGING, adapted for Schools, is in the press, in the form of a grammatical system of rules for the cultivation of the voice, may be had at his residence, 71, Upper Norton-street, and at all the principal Musicsellers.

HERR CARL A. LAUE, Professor of the ZITHER, begs to announce to his friends and pupils, that he will reside in London for the season on the 10th instant. All communications to be addressed to his residence, 17, Woburn-place, Russell-square.

THE PATENT CONCERT CONCERTINA, most valuable for the pianoforte or any other instrument, as manufactured for Signor Regondi and the most eminent professors. These instruments (which may also be had voiced, so as to produce the softest quality of tone) have a most vibration, and are not so liable to derangement, as objected to in those offered by other makers. Renewed concertinas, with fortes and brilliant tone (double action), may now be had from 25s. each. WHEATSTONE and CO., inventors and patentees, 20, Conduit-street, Regent-street.

PORTABLE FINGER ORGANS.—The Patent MELODEON, having obtained two first prizemedals, is recommended to the notice of persons who occasionally change their residence, as it is very light and having the bellows at the back, is well as an organ. Circulars sent on receipt of two stamps, by addressing Mr. HERBERT WEBB, Prince of Wales Harmer, 307, Regent-street, London, who will attend daily to show specimens.

A LADY, in every way qualified (and to whom references can be given), is desirous of meeting with a Gentleman or Lady who wishes to have instructed Waltzes, Polkas, &c., by the Lady. Address, M. A., 3, Bruce-road, Bow.

J. SMITH, 164, St. John-street-road, Dealer in Marine Living Animals, Seaweed, Artificial Sea-water, and Marine and Fresh-water Aquaria. Volumes Class's Anchoraria, and other Instruction Books. Insects, Mollusks, Fish, &c., &c. N.B. A large quantity of Minks now on hand.

CONSTANT EMPLOYMENT GUARANTEED to FITTERS. Wanted, Active, Intelligent Gentlemen to canvass an entirely new article, which will sell with the Crystal Palace. Instruments to fit quickly completed, by which the fitter can readily learn to apply the system. The art taught personally by experienced fitters. Established 1849. Address Mr. W., WHITE and Co., Show-room, 4, Cornhill.

MAYALL'S PHOTOGRAPHIC GALLERY, No. 224, REGENT-STREET, corner of Argyll-place. Photographic Stereoscopes, and Daguerreotypes taken daily. Mayall's Improved and Registered Stereoscopic Miniature Lockets to invite inspection of his new patented Ivory Photograph or Portable Picture.

PICCADILLY PHOTOGRAPHIC WAREHOUSE. Where may be seen Daguerreotype Apparatus and Well Rail Glass, Plates, and Cases, of every description, cheaper than possible to any other establishment. Apparatus for taking Portraits, with Instructions, complete, £5 5s. F. CLIFFORD, 5, Sloane-street, Chelsea.

AN EVERLASTING SOLID GOLD PEN of the finest quality, with Gold Holder, Case, and Pencil, complete, in a Silver Box, Warranted to last for Years, and to write as well as any Gold Pen ever made. Sent free by post for 30 Stamps.—J. MILES and CO., 18, Poultry, London.

ALLAGHAN'S CRYSTAL PALACE PERPETUAL GLASSES, through recommendation of numerous nobility, gentry, and others, to country residents, are the most powerful and perfect Glasses ever invented. May be had of the Inventor, Railway Stations, and Opticians, or sent post-free on receipt of P.O. order, payable to William Callaghan, Optician, 121, New Bond-street, corner of Conduit-street.
Sole Agents for the celebrated small and powerful Opera Glasses and Race Glasses, invented and made by Voigtländer, Vienna.

MICROSCOPES.—J. AMADIO'S BOTANICAL MICROSCOPE, magnifies 3 diameters, with Instruction Book, Case, Lens, &c., complete, 21s. Ditto, with Three Powers, 42s. Ditto, with Five Powers, 63s. Ditto, with Six Powers, 84s. Ditto, with Seven Powers, 105s. Ditto, with Eight Powers, 126s. Ditto, with Nine Powers, 147s. Ditto, with Ten Powers, 168s. Ditto, with Twelve Powers, 210s. ## THE AMERICAN QUESTION.

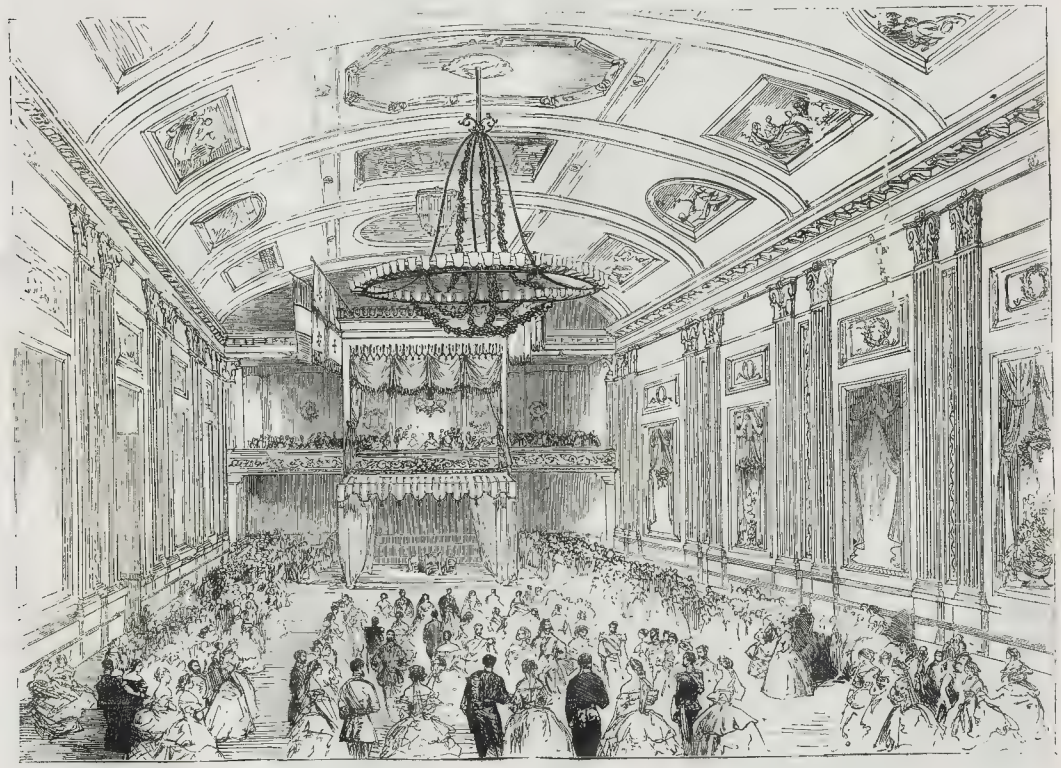
THE American journals assert that Mr. Crampton has been dismissed; the British Government, through its organs in Parliament, alleges that it has received no notification of the fact, either from Mr. Crampton or any other person authorised to communicate with it. But the probability is that the dismissal has taken place, and that ere this sheet reaches the eyes of our readers Lord Clarendon will have been officially informed of it. In this case what is the policy the British Government should pursue? Shall it retaliate by dismissing Mr. Dallas? We trust not. To every Government must be conceded the right of dismissing an Ambassador who, either from a real or an imaginary cause, becomes personally disagreeable or unacceptable to its chief. Mr. Crampton, from no fault of his own, has placed himself in this position towards Mr. Pierce, and the kindred bullies who surround him; and it is for his own advantage as well as that of England and America that he should retire from functions which he can no longer exercise with advantage. In the case of Mr. Dallas no such reasons or feelings exist; and we should be sorry to see the Ministers of Great Britain imitating the petty spite of Mr. Pierce and the Cabinet of Washington by retaliation. Great Britain, in the dignity of unquestioned strength and unsullied honour, can well afford to put up with an affront which neither disgraces nor injures, and scarcely need annoy, her. Perhaps the only way in which Lord Clarendon can properly signify to the American people the feeling of the British Government on the merely personal question will be to promote Mr. Crampton to some more distinguished Embassy. But, whatever may be done in this respect, it is clear that as long as Mr. Pierce is President it will be better for England to have no Ambassador in America.

Our American friends will perhaps think it very presumptuous in the people of England, and in the press which speaks their sentiments, to believe, notwithstanding all the bluster which comes from the American side of the Atlantic, that there will be no war between the nations. Such, however, is the opinion, based upon the great and satisfactory reason that England is prepared for war, and that America is not. Englishmen differ upon all questions. In fact, there is scarcely anything on which they are agreed. They live in a continual wrangle of theology and philanthropy. They dispute about Sabbaths and Sundays, about the policy of hanging notorious and justly-convicted murderers, about education, about surplices, about lights before the altar, about endowments and disendowments, about "isms" and "ologies" without end; about peace in the abstract, and war wherever it rages; about the ambition of Russia and the decadence of Turkey; about Pope and Kaiser, and systems of government; and they will continue to wrangle on all or most of these topics as long as they are a nation. But if there be one subject on which they do not differ it is that of a war with America. No one desires it. Every one condemns it. There is not a man amongst us who would not put up with thrice the insult from America that he would endure from France, from Russia, or from any other Power. There is no one who wishes to be the first to lift a hand against his brother over the water. The British people would look upon such a war as fratricidal; as a civil war of the worst kind—more dreadful and horrible than a war with any other nation of the earth. But if, in spite of remonstrance and forbearance, the wilful perversity of their unworthy Government, or any other cause, should drive America to strike the first blow, the feeling in England is equally strong to resist to the utmost extremity, and to teach America by the result that no State, great or small, shall inflict dishonour upon this nation while we have a soldier or a sailor left, or a shilling to pay him with. Let the Americans be assured of this. Let them not mistake a generous forbearance for pusillanimity, and a kindly feeling towards them for incapacity or unreadiness for the fight. Let them not miscalculate their own strength or ours; and, in spite of President Pierce and his reckless advisers, there will be no war between the nations. England does not want war, but England will accept it if driven into a position from which there is no escape without sacrifice of her self-respect. England is not yet in that position; and we trust,



THE FANCY DRESS BALL OF THE ROYAL ACADEMY OF MUSIC, AT THE HANOVER SQUARE ROOMS.—(SEE NEXT PAGE.)

for the sake of the freedom and civilisation of the world, as well as for the sake of America, that she never will be.

Every traveller has heard of the *cosas de Espana*—things peculiar to Spain, which no foreigner is supposed capable of understanding. The *cosas de America* promise to become equally mysterious and provoking. No Englishman is supposed to be competent to form a correct opinion of American politics. It is alleged that none but a native can appreciate them. They are *caviare* to Europe, and especially to England. To speak of them is to disparage and to offend America in one way or another. To praise the American Government is wrong; to dispraise it is insulting; to be silent about it is intolerable. To say that the worst men become Presidents and Ministers is to libel the whole people. To say that the best men are chosen is a libel that "rises" them still more, because it sounds like a sneer or an ill-natured jest; and to say that neither the best nor the worst are selected, but fair average men, is an affront equally unendurable. The press of England, which uniformly speaks of the American people with respect, but which does not speak of Mr. Pierce in the same style, is alleged to be utterly ignorant of American affairs, and accused of blowing up the embers of discord into a flame. But, after all, the English press and people are not quite so ill-informed upon America, as the Americans fancy. We know their strength and their weakness as well as, if not better than, themselves. We know their virtues and their vices; and we see the dangers, external and internal, which menace their tranquillity; and the rocks against which they threaten to wreck the future happiness of the most magnificent and most hopeful region under the sun. What is more, we can make allowance for their temptations. We can deplore the existence of the slavery question, which gnaws at their vitals; and can fully appreciate that great necessity of "annexation" which they will not always confess to be the guide of their political conduct, but which sits at the centre and moves the whole machinery of their public life. It is a grand idea that the North American Continent should be converted into one vast federation of free States—that the *débris* of the Spanish American Empire should be incorporated into the Union—and that all other races, Spanish and Indian, should retire before the all-conquering and all-pervading Anglo-Saxon. We believe that this great idea will ultimately be realised; and that not only Nicaragua, Costa Rica, Mosquitia, and the whole of Central America, but Mexico itself, will be successively conquered, *per fas aut nefas*, and swallowed up in the Union. By recognising this necessity the English people will have some clue to the mystery of American politics, and will neither wonder nor be annoyed at the gradual development of the plot, or its inevitable consummation. If, on the other hand, the Americans will content themselves with the chaotic or inchoate Spanish Republics, and the perishing empire of Montezuma, and avoid collision with the rights of Great Britain, they will work out the great problem with more rapidity and success than they can hope to do by any course of proceeding which would compel this country to resist them.

If England have rights in Central America, let the American Government purchase them, and not attempt either to bully or to coerce. With fair words England will sell at a cheap rate; but she will hold on if she be threatened, and stand upon her honour. The right that is not worth a sixpence in itself is of inestimable value the moment that it is unjustly and insultingly threatened.

Once for all let the American people understand that the British people desire to be not only their friends and customers, but their allies; that they have no inclination for a war; but that, even in the case of such near and dear relatives, they are prepared to stand upon their honour. The Americans have too many internal difficulties—that of Kansas is alone sufficient to make them keep the peace towards all Europe—to rush into war without necessity, merely to please the blustering and unprincipled persons to whom, in an evil hour, and by a combination of unhappy circumstances, they have temporarily confided the destinies of their great country. England could stand the shock of such a war—America could not. For this reason, if for no other—and there are many as good that might be cited—we believe that the difficulty will blow over. It is not always the man who talks most loudly of war who is the most anxious to embark in it; and President Pierce himself, reckless as he is, would perhaps regret more than any man in America to find the fortunes of his country involved in so scandalous and unjustifiable a war as that which he seems bent upon provoking. In the case of a war forced on by the ambition of an irresponsible autocrat there is no appeal to the nation. Fortunately, Mr. Pierce is not an autocrat; and the great nation which made, can unmake him.

## THE FANCY-DRESS BALL AT THE ROYAL ACADEMY OF MUSIC.

ONE of the great events of the season was the Ball given on Friday night (last week) at the Hanover-square Rooms in aid of the Royal Academy of Music, which her Majesty was graciously pleased to honour with her presence.

The upper seats of the orchestra, opposite to the Royal box, were reserved for an orchestra of nearly fifty musicians, under the direction of M. Laurent; the lower seats in this gallery being reserved for the friends of the ladies patronesses and more distinguished visitors.

Her Majesty, accompanied by the Prince Consort, the Prince Frederick William of Prussia, the Regent of Baden, the Princess Royal, and a brilliant suite of lords and ladies of the Royal household, arrived shortly before eleven o'clock.

The Queen was received by the Earl of Westmoreland and his co-directors, and, preceded by the Lord Chamberlain, the Vice-Chamberlain, the Master of the Horse, and the Lord Steward, entered the building.

The Queen and the illustrious visitors were at once conducted to the Royal box, on entering which the orchestra played the National Anthem; her Majesty remaining standing in the centre of the box, with the Duchess of Cambridge and the Princess Mary on her right hand, and the Princess Royal and the Duchess of Sutherland upon her left.

That portion of the saloon immediately in front of the Royal box was now cleared, and the Lord Chamberlain intimated her Majesty's desire that the ball should commence. The distinguished persons forming the two quadrilles, led by the Countess of Westmoreland and the Countess of Jersey, entered from an adjoining apartment, and, bowing as they passed the Royal box, ranged themselves in position for the dance.

The first quadrilla, organised by the Countess of Westmoreland, was supposed to represent the Elements—four groups of dancers being emblematically costumed so as to figure respectively as Fire, Air, Earth, and Water. The most picturesque and expressive of these costumes were those of Air and Water, which *rôles* were discreetly cast to the ladies who looked as aërial and limpid as could be desired. The other set of quadrilles, got up under the superintendence of Lady Jersey, was intended as a symbol of "Night and its surrounding Stars." This, if not so light and ethereal as the former, was equally pretty and suggestive. Two other "Illustrative" dances followed—one under the direction of the Countess of Harewood, entitled the "Siècle de Louis XIV.;" the other, under that of Mrs. Charles Mills, representing the "Alliance." The costumes of the first will suggest themselves at once to our readers. Those of the last are scarcely more in need of description, Zouaves, Turks, English, and Sardinians being conspicuous among the characters. The music performed to the "Elements," and "Night with its surrounding Stars," was from Adolphe Adam's new ballet of the "Corsaire;" that to "Louis XIV." and the "Alliance" was a quadrille by Bosquet, called "Une Fête à Versailles."

After the "Illustrative quadrilles" her Majesty descended into the room, where places were set apart for herself and suite underneath the gallery. Here the Queen remained conversing affably, not only with those immediately about her person, but with many others whom she recognised, with unusual condescension. Near her Majesty were the Duchess of Manchester and Lady Constance Grosvenor—who, the former as Cybele, the latter as Blanche of Castile, were the constant objects of comment and admiration.

When the Queen rose, she took the arm of the Earl of Westmoreland, and promenaded once round the room in the midst of the visitors, graciously saluting the various groups that stood apart to allow her freer circulation. The band continued playing the National Anthem until her Majesty had retired, having expressed to Lord Westmoreland how much gratification she had derived from her visit; and then the dancing was resumed with fresh energy.

Next week we shall engrave a few of the leading costumes

## FOREIGN AND COLONIAL NEWS.

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday.

AT last the arrival of seasonable and beautiful weather has begun to restore hope and courage to the country, so painfully and deeply affected by the dreadful calamities caused by the inundations. We have rarely seen any public affliction cause so marked and universal a sensation among the private circles of all classes as this has done: everywhere gloom and anxiety have prevailed; at every reunion this subject has been the one to which all conversation came round—this the topic in which the thoughts of all centred; and from every side poured in plans, not only for the relief of the sufferers, but for the prevention of such calamities in future Meantime the most strenuous and laudable exertions are being made among all classes of the population to lessen the terrible effects of this fearful visitation, the whole extent of which is not yet known. On all sides subscriptions, public and private, religious and official, are being collected, and already vast sums have been got together for the material relief of the sufferers. The Empress has given a donation of 20,000 francs for herself, and 10,000 for her son; and few of the persons about the Court, of the public functionaries or of the members of any of the State or official bodies, have failed to follow her example, and collections have been made and charity sermons preached at the churches of all denominations. A few days since a party of forty *ouvriers* in the Faubourg Montmartre made their repast on bread and water at a restaurant which they were in the habit of frequenting: by this means they each saved fifteen sous of their day's wages, which being collected, the sum was carried to the Commissaire de Police for the benefit of the *inondés* The most terrible anecdotes are everywhere being related of the results of the inundations, and some idea of the extent of the loss of property may be conceived by the fact that where, in one part of Lyons, a hundred and fifty houses stood, but eleven remain. The waters having invaded the graveyard of a convent, many of the graves were torn up, and, the waves and the mutual contact of the coffins having broken the latter, the bodies of the nuns were seen floating about among the rest of the ruins. Whole families have been destroyed, and as yet the number of the victims who have perished in the falling of the houses can hardly be guessed at.

Meanwhile the preparations for the fêtes attending the christening are going on. A report was current last week that, in consequence of the public distress caused by the inundation, these would be deferred until August; but it is thought, all things considered, more advisable that they should take place at present. The Emperor has sent to Nôtre Dame a set of the most costly and magnificent altar ornaments which are to serve for the baptism of the Prince Imperial, and to remain afterwards as the property of the church. The health of the Empress may be considered as quite re-established. Last week her Majesty visited the whole of the cattle and agricultural exhibition, and was, among other things, greatly amused by the performance of a duet between a Tyrolese herdsman and his cow—the animal replying, by lowing at certain intervals, to the notes of his bagpipe. The closing of this magnificent and eminently successful exhibition is a subject of general regret, and we believe the efforts made to prolong its duration have been very numerous; the more so that until within the last four or five days the state of the weather was such as to render visiting a large portion of it an occasion of too much inconvenience and discomfort to be encountered, more especially by women, who seem to have taken little less interest in the sight than men have done.

Considerable doubts seem to exist relative to the Empress's visit to Biarritz, the medical men being of opinion that the journey and the change of climate are not likely to prove favourable to the Prince Imperial. In this case it seems little probable that the Empress will carry out her plan; but whether she will, therefore, remain stationary all the summer at St. Cloud, or will take some shorter excursion, is not, of course, known.

The Emperor leaves Paris about the 25th for Plombières, where he counts upon remaining for a fortnight or three weeks. His Majesty is accompanied by four officers of his household, and about fifty servants. The Queen Dowager of Denmark, and the Grande Duchesse Stephanie of Baden, have arrived in Paris for the christening.

It seems quite decided that the expedition of the Emperor to Algeria is to take place in September. The fact of his Majesty heading the expedition to Kabyle seems, however, to be extremely doubtful; the risks, the difficulties, the defects of communication, and the prolonged absence such an undertaking must entail, presenting so many grave and important objections to the plan.

A trial little calculated to reassure the public with regard to the good faith of modern criticism has created a good deal of attention here. M. Gustave Planche, the well-known critic of art and literature, published in the "Revue des Deux Mondes" a most severe and detailed attack on the portraits of the King and Queen of Spain, in the Universal Exhibition, painted by a Spanish artist, Frederic Madrazo. So far so good. The critic has a right to express his opinion on such works as he has seen, and to make it public; but when he has *not seen them*—when, as is proved, the pictures never were in the Exhibition—when they can hardly be said, properly, to exist, one being merely in the state of a sketch in the artist's painting-room at Madrid what then? Why, M. Gustave Planche is found "to have exceeded the legitimate rights (!) of criticism," and is called upon to pay a fine of 300 francs. M. de Mars, the *gérant* of the publication, is also condemned to 200 francs, his share of the costs. "The conviction pronounced against M. Planche," says a Belgian paper, "seems severe!"—it adds that "Nevertheless the well-known system of attack and fault-finding adopted by M. Planche prevents his meeting with that sympathy which, under other circumstances, his brethren in art and literature would have felt for him"!

### THE CIVIL WAR IN KANSAS.

The "border ruffians" of Missouri, whom the imbecile Pierce Government has suffered to ride roughshod over the free settlers of Kansas, have carried out their threatened purpose to burn the town of Lawrence, the head quarters of the abolitionists. For the last few weeks the inhabitants of the devoted town have been living under continual apprehension of an attack. The last steamer from New York brings the news of its having taken place, as will be seen from the following telegraphic despatch:—

CHICAGO, Monday, May 26.—The *Chicago Tribune* publishes an extra, based upon intelligence brought by three men directly from Lawrence. They state that a company of mounted men made their appearance near Lawrence on Wednesday, the 21st ultimo, where they halted until reinforcements had increased their number to 400 men. They bore flags and banners, with various mottoes and devices, but no United States' flag. During the forenoon the committee of public safety of Lawrence dispatched a messenger with a note to Marshal Donaldson, who headed the force, assuring him that the citizens would make no resistance to any process he might wish to serve, and asking protection for their lives and property. The Marshal made no reply, but at eleven o'clock he sent a Deputy-Marshal with a posse of ten men into the town. The Deputy summoned four of the citizens to assist in making arrests, and took G. W. Deitzler and J. W. Smith prisoners. The Deputy-Marshal, having thus tested the willingness of the citizens to respect his authority, went with his posse to the Free-state Hotel and dined, after which they removed the prisoners without molestation. Soon after this Sheriff Jones made his appearance with eighteen men, and demanded that all the public and private arms in the town be given up, giving the people five minutes to accede to his demand, and threatening, in case of refusal, to storm the town. He did not attempt to make any arrests, but said he came for the purpose of obtaining the arms One field-piece was given up in answer to the demand, but the citizens refused to surrender their private arms. Jones then left, and in half an hour returned with an overwhelming force and two pieces of artillery, with which he commenced cannonading the Free-state Hotel and the *Herald of Freedom* printing-office. The inhabitants commenced leaving the town, and the informants of the *Chicago Tribune* also left before the work of destruction was complete; but the hotel was burned and the press and type of the *Herald of Freedom* destroyed before their departure; and they had proceeded but about fifteen miles when (at eight o'clock in the evening) they saw a large volume of smoke and a great light in the direction of Lawrence, and they have no doubt of the destruction of the town. Another messenger, who left Leavenworth just before the departure of the host, says that several men were killed by Jones's party. It is feared that General Lecompte has been hung by the mob. Governor Robinson is at Lecompton, in custody of the authorities. Ex-Governor Reeder is supposed to be in a place of safety, and is daily expected in Chicago, by way of Nebraska and Iowa. Threats have been made to hang Robinson, Brown, and Deitzler. The Free-state party will make a stand at Topeka, and are now gathering at that point. Ex-Senator Atchinson is in the territory. The United States' troops are not allowed to move from their quarters, many of the soldiers being anxious to protect the settlers

### NICARAGUA AND THE UNITED STATES.

Senor Marcoleta, the Minister of Nicaragua at Washington, has protested against the reception of Padre Vijil (Walker's emissary) as representative of that State. He quotes what Mr. Marcy himself wrote on the 21st of December, 1855:—"Those who destroyed the former Government of that State (Nicaragua)," said the Secretary, on the 21st of December, 1855, "were not citizens of that Republic; nor have those who really are so, or any considerable portion of them, manifested, as far as it is known here, their free approbation of, or consent to, the present state of political affairs in Nicaragua. Until this shall happen, the President does not deem it expedient to receive either you or any other person as Minister of the Government of the Republic of Nicaragua." Senor Marcoleta goes on to say:—"The reasons which, officially and officiously, are to-day alleged for the justification of the acknowledgment of a state of things created and maintained by American adventurers who, more than once, have been qualified by a highly-placed public functionary as pirates, robbers, and assassins, and as having dishonoured the Union, would, perhaps, have been more opportunely adduced at a former period; whereas they seem to ignore the treason perpetrated in Granada on the 12th of October, 1855, the circumstances which preceded, accompanied, and even nullified the capitulation of the 23rd of the same month, concluded and signed, not on a neutral territory, but under the terror of American bayonets and revolvers, not by legal and legitimate means, but by moral violence brought to bear upon General Corral, who was compelled to hasten to Granada, and who actually went there with the sole intention of saving the life of a considerable number of distinguished and distinguished Nicaraguan citizens, who had been inhumanly thrown into prison and threatened with death unless the General-in-Chief submitted within a fixed term to the unjust, Vandalic, and atrocious demands of the Filibuster chief. Never have there been taken into account the unpopularity and isolation of the Filibusters, nor the emigration of almost all the principal proprietors and merchants, the military chiefs and officers of inferior rank; nor the violence exercised over the population, who are impelled by bayonets to fill up the deficiency long to leave." The Minister formally makes his protest, which he has forwarded to the Ministers of the foreign Powers.

### CONSPIRACY TO ASSASSINATE THE QUEEN OF SPAIN.

The Madrid journals of the 4th inst. report that considerable sensation had been caused by the discovery of a conspiracy to assassinate the Queen. The following are some details of the affair given by the *Diario*:—

A man named Redondo Marquez organised a secret society three months ago, and a young carpenter was drawn into it. It having been resolved to kill the Queen, this young man was designated by lot to do the deed, and he was told that if he fired on her Majesty a sum of 2000 piastres should be given to him, and that if he failed to do so he should certainly be put to death by his fellow-conspirators. On the 28th ult., at the moment at which the carriage of the Princess of the Asturias approached the Calle del Arenal, a young man named Fuentes drew a pistol from his pocket, but a police agent seized his arm and prevented him from discharging the weapon. On being interrogated, he implicated Redondo in the facts above related. Just after his arrest Redondo Marquez went to the palace, on pretext of making revelations respecting the conspiracy. No arms have been found in any house of the Calle del Arenal. Marquez is a native of Almadenejos, in the province of Ciudad Real. His political opinions have always been Carlist. He is a bold, enterprising man, and has been imprisoned for forgery.

From the account given by the *Nacion*, it seems that the Government were made acquainted with what was to take place by a note, sent anonymously by the young man Marquez himself. The *Gazette* says nothing of the affair. In the Cortes, M. Torrecilla called on the Government to say if there were any truth in the statements of the newspapers; but the Minister of Finance said that, as the matter referred to was under investigation by the tribunals, he could not give any details, but that, for the satisfaction of the Cortes and the country, he would state that the precious life of the Queen had been in no danger.

THE STATUE OF THE REV. JOHN WESLEY.—(To the Editor of the ILLUSTRATED LONDON NEWS.)—Will you kindly allow me space for a few words in reply to B. H., in your last week's Paper, respecting the Wesleyan Monument? The attitude given to the figure is an exaggeration of the model. The hand in the model is not so elevated as the engraving would give the idea of. It is intended to represent Mr Wesley in middle life, just a century ago, preaching from his father's tomb in Epworth churchyard. The committee of management are carefully considering the points named by your correspondent—viz., the face, expression, position of hands, and general attitude These and other important points will be fully inquired into before the model is submitted to any sculptor. The engravings which have hitherto appeared of the proposed monument do not faithfully represent the artist's small model, arising from a license taken by the first copyist If your correspondent B. H. will send to, or call at, my address, I will furnish him with a small engraving of the monument, which more correctly represents the model than the engraving of which he complains. The committee of management will gladly consider any suggestions of persons favorable to the design, which may be addressed to, yours, &c., GEO. JNO. STEVENSON, Agent for London, 54, Paternoster-row.

TESTIMONIAL TO MR. GEORGE GODWIN, F.R.S.—In acknowledgment of the assistance rendered in architectural details in the representation of the "Winter's Tale," and other plays, at the Princess' Theatre, Mr. Kean has presented to Mr. Godwin an elegantly-designed claret-jug in silver, bearing the following inscription:—"To George Godwin, F.R.S., from Charles Kean, as a slight token of the high appreciation entertained for valuable assistance in architectural details, while carrying out the design of placing before the public correct historical illustrations of 'Macbeth,' 'Henry VIII.,' and the 'Winter's Tale,' produced in the years 1853, 1855, and 1856, at the Royal Princess's Theatre, under Mr. Charles Kean's management. May, 1856."

## THOUGHTS IN THOROUGHFARES.

THE eye of the philosopher has been offended during the present week by bills posted on the walls announcing the holding of a public meeting on the subject of the condemnation of Palmer. Free discussion is a right with which no reasonable person would interfere; but trial by jury may as well be superseded at once if a verdict delivered after a long inquiry, conducted with unusual care on all sides, is not to be regarded as final. Last week there seemed some danger of an attempt to set up a system of trial by newspaper; but within the last few days a disposition has been shown to take a step in the direction of trial by public clamour. This kind of thing, if yielded to, would form a precedent for Lynch law; for it must be remembered that, when once the principle is recognised of allowing clamour to supersede the verdict of a jury, there may be as much reason for reversing an unpopular acquittal as an unpalatable condemnation; and if the guilty are to be saved by a mistaken, or possibly a purchased, outcry, the innocent might by the same means be sacrificed. If verdicts are to be set aside at the will of public meetings, juries may be excused if they grow careless in the discharge of a duty which will lose much of its importance by the uncertainty that will be attached to its result, and jurymen will feel their responsibility materially diminished if their errors may be corrected by the press or on the platform. A great deal of nonsense appears to have been spoken at the meetings that have been held in the course of the week; and, among other absurd theories, it was laid down that "a man who is not fit to live is not fit to die." But, as everybody must do either one or the other, the position is rather untenable. Another philanthropist argued that "the greatest criminal required the longest interval for repentance"—a doctrine that would lead to the introduction of such sentiments as "Long life to the murderer."

If no other good was done by the debate on capital punishments the other night, in the House of Commons, the discussion was so far useful as to have elicited the fact, on the authority of the Home Secretary, that murder has not been on the increase, while other offences for which the punishment of death is no longer inflicted have become more numerous than they were formerly. By a popular error the reverse was supposed to have happened, and it was the strongest argument of the abolitionists that the mitigation of punishment caused a diminution of a particular crime; but it is far more satisfactory to be assured that the extreme penalty of the law is not needlessly enforced, and that executions are justified by the protection they afford to society.

What may be called the honours of crime have been already awarded to Palmer by his appearance in the wax collection of Madame Tussaud where he figures among crowned heads, "magnificent additions," and other notabilities. Those living celebrities who occupy a "position" at the Baker-street Bazaar must feel little flattered by a compliment which is shared by every remarkable malefactor; and it is certainly no honour to be placed in the same exhibition or classed in the same advertisement with those who are only distinguished by their atrocities. It is rather too bad to be forced into the society of a parcel of murderers, and it is possible that a respectable living celebrity might obtain an injunction to prohibit exhibition of himself in evil company, or his friends might perhaps apply with some chance of success for a habeas to get him out of it. If Madame Tussaud continues to add to her collection of culprits, she had better open a condemned cell in addition to her "Chamber of Horrors," for the accommodation of her gang of murderers.

The Ascot week has afforded the Londoners a glimpse of a class of beings who must be gradually dwindling away, but who are found in sufficient numbers to supply the demand for "postboys" to the various equipages required by those who still cling to the road in preference to the rail, when visiting the races. As the occupation is fast dying out, it is not likely to attract any new hands; and the remnant of existing "boys" must consist, therefore, chiefly of those who have long ago adopted the pursuit, and whose boyhood is of a normal character. Some of these veterans in jackets have a venerable look, which affords a somewhat melancholy contrast to the name by which they still call themselves.

It would be curious to trace the lives of those whose pursuits appear to bring them into prominence for a very small portion of the year, and who during the greater part of the twelve months have no ostensible object of existence. Postboys and pantomime performers present a subject of reflection to the inquiring mind, which will naturally ask how the former live, except during the racing season, and what becomes of the latter from the expiration of one Christmas holiday to the commencement of another. Harlequin cannot go about the world producing magical effects with his wand, nor can Clown and Pantaloon supply their wants in private life with the cool effrontery which characterises their proceedings in a pantomime. Now that amateurs have taken to jumping through windows, stealing tradesmen's goods, and performing other pantomime pranks on the stage, the resources of the regular Scaramonch will be still more limited than they have been hitherto. Though gentlemen may make themselves buffoons in the cause of charity, they should remember that rivalry may be death to some of those who are mountebanks, not from choice, but from necessity.

A stranger in London looking only at the playbills exposed in the streets might fancy himself walking in a city of Italy, for almost every place of public amusement is devoted just now to Italian performances. Of the many irons which the manager has in the fire, the Italian iron is undoubtedly the favourite. It is a curious fact that our most popular theatrical amusements are frequently those which are presented to us in any language but our own; and English performers sometimes find it desirable to de-nationalise themselves as it were, by appearing under foreign names, in foreign productions, in order to make themselves acceptable to an English audience. Everybody is delighted to find the Italian opera at home again in the Haymarket. But the performance of Italian operas in three or four different parts of the town seems rather superfluous; to devote so many English theatres to foreign opera is not only to offer the public more than is required of a particular kind of entertainment, but to throw a large number of persons out of their regular means of livelihood. The presentation of the "Trovatore" at four theatres at the same time is likely to cause a sudden demand for stage gipsies and chorus-singing "adherents," but the *Conte di Luna's* followers and *Azucena's* tribe will necessarily be thrown out of employ at the expiration of the brief period during which their services will have been required.

While Italian operas are being given in four places at once, there is a living to be got by four sets of nobles, conspirators, peasants, or bandits, as the case may be; but there will be no opening in every-day life for those who have been accustomed to quaff poison at so much per night in "Lucrezia Borgia," or sing "La la, la la," as the happy peasantry of "La Sonnambula." It seems to have been a fault with those connected with the amusements of the stage since the days of Sheridan never to have known how to give exactly enough of a good thing; for there has always been among theatrical managers a tendency to what is called overdoing it. Now that the great lyrical establishment in the Haymarket is again in full operation, it is better that the public patronage should not be frittered among a number of inferior projects which, without securing any success to themselves, might take away a small portion of that support which is necessary to establish an Italian opera in perfection at its legitimate home in Her Majesty's Theatre.

A WALKING PHILOSOPHER.

## EPITOME OF NEWS—FOREIGN AND DOMESTIC.

There were in the Clonmel Union workhouse on the 1st of June, 1853, no less than 3036 paupers. At the corresponding period in 1855 the number had sunk to 952.

The latest intelligence from Australia announces the produce of the gold-fields at the enormous amount of twenty millions sterling per annum, with such a prospect of increase that the deficiency of labourers is the sole limit to a much larger product.

The Archbishop of Lyons has issued a mandate in which he attributes the inundations to the violations in his diocese of the law of the Church respecting the observance of the Sabbath!

Not a single London paper of Monday was received in Dublin. A spark of fire from the engine got into the luggage-van of the express train somewhere between Bangor and Holyhead, and the newspaper parcels of all the Dublin agents were completely destroyed.

The *Nord*, which was established at Brussels to support the Russian interests, has just been prohibited entering the Austrian dominions.

The Russian Government has given orders for reducing the personnel of the Finland fleet. A ukase orders that the colours of the disbanded militia shall be hung up in the cathedrals of the empire.

Captain Sheehy, 31st Regiment, has been appointed to fill the only vacancy in the Senior Department of Sandhurst College, to enable him to complete his studies there which he had commenced previous to his servicely at the siege of Sebastopol, as Assistant Engineer.

There is some talk of a great extension of the banking system in Prussia. Each province is to have a bank, its said, independent of the Bank of Prussia, but connected with each other, and under the supervision of the Minister of Commerce.

The screw steam-ship *Gertrude*, built by Messrs. Martin Samuelson and Co., has accomplished the passage out to St. Petersburg in five days and nineteen hours, being the quickest run made to that port by any steamer this season.

The Supreme Court of Providence, Rhode Island, has returned a verdict of 27,000 dollars against an express company, for running over a little girl, and rendering her a cripple and idiot for life.

A plan of reform for the Federal Diet is to be laid before that body which has been agreed on by Austria, Prussia, and Bavaria.

Eupatoria has been completely given up to the Russians, who have hoisted their flag there. The 1200 Turks who remained there embarked for Constantinople on the same day that the town was restored.

Her Majesty's second state ball will take place on Tuesday next; her Majesty's last drawingroom for the season on Friday week, the 20th, and the last levee on the 25th inst.

Great activity is displayed at Plombières in preparing apartments for the French Emperor and his suite. The cost of the house to be occupied by the Emperor will be 10,000 francs for the season. Several superior officers have arrived in the town to superintend the preparations.

The Queen has been pleased to appoint Lady Codrington, wife of Lieutenant-General Sir William J. Codrington, K.C.B., to be one of the Bedchamber Women in Ordinary to her Majesty, in the room of Lady Digby, resigned.

The Prince and Princess of Prussia will leave Berlin for London in the beginning of July. It is expected that the betrothal of Prince Frederick William and the Princess Royal of England will take place during their stay.

The Emperor Alexander arrived at Konigsberg in the evening of the 3rd inst., and was received by the civil and military authorities. After dining at the palace, his Majesty left at seven o'clock for St. Petersburg in an open carriage and four.

Her Majesty intends to honour the Crystal Palace with her presence at the opening of the great waterworks on Wednesday next. It is understood that her Majesty will make the circuit of the basins in her pony carriage, in order that she may be enabled to witness the various effects produced by works covering so immense an area from all the most favourable points of view.

The Grand Duchess Stephanie of Baden arrived in Paris on Sunday. The Emperor received his aunt at the station of the Strasbourg Railway. The Duke and Duchess of Hamilton (daughter of the Grand Duchess) were likewise present at the station on her arrival. The Grand Duchess visits Paris for the baptismal fêtes of the Prince Imperial.

The Hon. and Right Rev. Dr. Montagu Villiers, recently appointed Bishop of Carlisle, will take his seat in the House of Lords, in consequence of the death of the Bishop of Gloucester and Bristol. The new Bishop of Gloucester will not be entitled to a seat until another vacancy occurs.

The proposed marriage of the Grand Duke Michael of Russia with the Princess Sidonia of Saxony has been broken off, in consequence of the Princess objecting to the difference of religion. The Princess Mary of the Netherlands is now spoken of for the Grand Duke.

Baron d'Offenbergh is to be the Russian Commissioner for the reorganisation of the Principalities. It is yet uncertain whether Prussia will not be allowed to nominate a representative on the occasion.

It is said that the under-secretaryship vacant by Lord Wodehouse having been appointed Minister Plenipotentiary to the Imperial Court of Russia has been offered to Mr. Layard, M.P. for Aylesbury, at present at Constantinople.

Prince Gortschakoff, the Russian Minister for Foreign Affairs, has received the investiture of the Prussian Order of the Black Eagle.

Lord Brougham arrived at Brougham Hall, from London, on Saturday evening last. We (*Westmorland Gazette*) are sorry to add that his Lordship looks very much indisposed.

Mr. Crampton, the British Ambassador in the United States, is a son of Sir Philip Crampton, Bart., M.D., Surgeon-General to the Forces in Ireland, and Surgeon in Ordinary to her Majesty in Ireland.

The mission of the Russian diplomatist, Kisseleff, to Rome, is not to conclude a Concordat, as was currently reported. His business is to make the final arrangements relative to the Catholic see vacant in Poland. It is understood that the Papal and the Russian Governments have agreed on the persons to be appointed to them.

The inhabitants of Ramsgate, of which place Colonel Lake is a native, have resolved to present that gallant officer with a sword of the value of 100 guineas for his distinguished services at Kars.

His Imperial Highness Prince Napoleon is about to visit Edinburgh with a numerous suite, on a scientific tour, and he may be expected in the course of the present month.

Marshal Pelissier is to leave Kamiesch to-morrow, the 15th of June. General Macmahon is to succeed him.

Dr. Kane has declined the request of Lady Franklin, that he would take charge of another expedition, in search of her long-lost husband, on the ground that his present pressing engagements would not permit him to leave.

Amongst the English visitors to the Paris Agricultural Exhibition, on the 9th inst., was Mr. Oliveira, M.P., who went specially to examine the collection of wines sent from Catalonia.

Rossini has received an ovation at Strasburg. All the performers of the theatre, recruited by a number of musicians, assembled under his windows by torchlight, and gave him a serenade.

Dr. Lankester has been appointed one of the Examiners in Natural Science of Candidates for the Civil Service of the East India Company.

Sir Colin Campbell arrived in town on Sunday evening last from the Crimea, after spending a few days in Paris. On the 30th of this month Sir Colin goes down to Glasgow, to receive the sword from the people of that city, which is to be presented by Sir Archibald Alison, the historian of the French Revolution, who has been selected to make the presentation.

The Polish refugees residing in Paris have been invited by Prince Adam Czartoryski to assemble at his mansion and sign a protest against the amnesty recently accorded by the Emperor of Russia.

The provision-merchants of Cork have voted a sum of £400 for a piece of plate to be presented to Mr I. Butt, M.P., as a recognition of his services in their differences with the Admiralty relative to the late provision contracts.

On Sunday last the bands provided by public subscription again played in the Regent's and Victoria Parks, in the presence of an immense concourse of persons, whose number in the two parks was estimated at nearly 200,000.

The opening of letters at the Post-office is persisted in at Parma, Modena, and Rome. They are re-sealed and delivered; but arrests are frequent.

Nine hundred and eighty workmen, employed at Price's Patent Candle Company, have signed a memorial to the directors of the Crystal Palace, praying them to make Saturday a shilling day; as on that day they and the workmen of several other factories get a half-holiday.

A new line of steamers is about to be established between Liverpool and America, a company having been formed under the law of Limited Liability in Canada and this country, with a capital of £300,000, to run to Portland, in Maine, calling at Newfoundland and Halifax.

*The direction of the wind* was—on 4th W., became N.W. at 10 A.M.; N. at 7 P.M. on 5th N.E. at 7 A.M., N.E. at 8 P.M., E.N.E. at 3 P.M.; N.W. at 9 P.M. on 6th, N.E. at 4 A.M., N.W. at 10 A.M., N.N.E. at 11 A.M., N.E. at 11 A.M., N.N.W. at 1½ P.M., N. at 12 P.M., N.E. at 2 P.M., E.N.E. at 4 P.M., N.E. at 6 P.M., moving to E.N.E. at 8 P.M., and to N.N.E. at 7 A.M. on 7th, 7th, and then to S.W. at 2h 30m A.M. to W.S.W. at 11 A.M., S.W. at 3 P.M., S. at 4 P.M., S.S.W. at 9 A.M., S.W. at 2 P.M., S.W. at 4 P.M., S.W. at 8 A.M. on 9th, W.S.W. at 1 P.M., S.W. at 4 P.M., S.S.W. at 9 A.M., S.W. at 2 P.M., W.S.W. at 5 P.M., W.S.W. at 8½ A.M. on 8th, S.W. at 2 P.M., W.S.W. at 5½ P.M., W. at 8 P.M., W.S.W. at 6½ P.M.; W. at 8 A.M. on 10th, W.S.W. at 7½ A.M., W. at 2½ P.M., in which quarter it remained.

On the 10th, from 4 till 7 p.m., solar halo.

On 4th Milkwort (*Polygala vulgaris*) in flower. On the 7th the Cockchafer (*Melolontha vulgaris*); and on the 10th the Brakenclock (*Grillus tessellatus*) arrived in numbers. E. J. LOWE.

PEACE COMMEMORATION AT NEWBURY.—This fête took place on Tuesday last, when Newbury was gaily decorated with flags and mottoes; wreaths of evergreens, may, laburnum, and lilac suspended from the windows; and triumphal arches erected in various parts of the town. A procession was formed of the children of the various schools, each child carrying a little flag, and each school [illegible] societies, with banners and music; next, the Mayor and Corporation; followed by the children and aged persons from the workhouse. About 5000 persons dined in the streets; then followed a variety of rustic sports; and the day concluded with a brilliant display of fireworks.

MORMON EMIGRATION FROM PRESTON.—The emigration of the inhabitants of our town, under the auspices of the Mormonites, is more extensive than we were led to imagine. We find it is not unusual for husbands to return home at night and find wife, daughter, and children fled, the house stripped, and a pretty long list of debts incurred on the eve of departure left unpaid. Tradesmen, too, in seeking after debtors, are astonished to find those who promised to pay off to the land of promise. A hard case has recently come under our notice. A labouring man took his wages home on Saturday evening, and returned to his work, which detained him until a late hour. When he had finished his labour he again returned home, but found his wife and family had fled, and his home stripped. Subsequently he ascertained that, instead of applying his wages to their proper use, they had run deeply in debt, and allowed the money to accumulate, to assist them in their flight.—*Preston Guardian.*

SUNDAY MUSIC IN LEEDS.—On Sunday last the band on Woodhouse Moor was again largely attended by the people of Leeds. Three o'clock, when the stream of people was at its greatest, there could not be less than 20,000 persons on the moor. In consequence of the rather high wind which prevailed, the orchestra had been fixed in a hollow near the cricket-ground, and the large audience dotted the hill-side in a very picturesque group. In the intervals between the playing of the band a general promenade was established. A band of fairings driven about in the line of the crowd, from the open windows of which a man distributed handbills by hundreds to the *gamins* who kept up with him in his progress. This plan was followed during the whole of the afternoon. The conduct of the people was exemplary.

THE TIPPERARY BANK. There was a meeting on Monday in Master Murphy's office for striking a call of £40 per share against all parties appearing on the list of contributories to the Tipperary Bank, save the English shareholders and Messrs. Vincent Scully and Wilson Kennedy, the former case standing over until judgment shall have been pronounced by the Master of the Rolls on the appeal now before him, and the cases of Mr. Scully and Mr. Kennedy being allowed to stand for a few days.

ALLEGED MURDER IN NOTTINGHAMSHIRE.—A farmer at Winkburn, near Southwell, Nottinghamshire, named Thomas Jonson, has been committed on a coroner's warrant for trial, upon the charge of poisoning Mary Clarke, his housekeeper, thirty-seven years of age, who since January last had lived with him as his wife; he is a widower with five children. She was addicted to drunkenness, and he had often beaten and kicked her in a very brutal manner. A *post-mortem* examination left no doubt as to the fact of her having been poisoned.

## OPENING OF NEW DOCKS AT WEST HARTLEPOOL

IN the ILLUSTRATED LONDON NEWS for June 12th, 1852 (No. 563), we gave an Illustration and description of the opening of the second dock at West Hartlepool. We now illustrate the opening of the third (to be called the Swainson Dock) on Tuesday last, which is of the utmost importance to the commerce of West Hartlepool, came off with appropriate ceremony on Tuesday, the 3rd June. These new docks complete the original plan of commercial accommodation in the rapidly-growing port, and the increase which has taken place in the commerce of the port will be apparent by a glance at the following short statement:—The revenue of the dock and railway for twelve months, ending with December, 1854, was £130,773 8s. 8d.; for twelve months, ending December, 1855, £146,252 10s. 1d. In the past year of 1855 the coal shipped and conveyed by the company was 1,196,358 tons, being an increase of nearly 200,000 tons over the coal tonnage of the preceding year, 1854.

The steam communication between West Hartlepool and Hamburg, though only of recent establishment, has produced a most encouraging result. Thus, the return to her Majesty's Customs of the value of merchandise (exclusive of coal) exported foreign from West Hartlepool, which during 1854 was £267,709 in the year 1855, has shown £738,240 in the year whilst giving £267,709 in the year 1854, has shown £738,240 in the year 1855—being an increase in 1855 over 1854 of £515,530, and the latter was a year of war. The return of peace with Russia will, no doubt, in due time, have its beneficial effect upon this undertaking; and already has the already been given to the early opening and development of trade between West Hartlepool, Russia, and the Baltic ports.

In the twelve months ending Dec., 1855, the number of ships entering the docks was 4316.

The Company's Harbour and Dock works now consist of—tidal harbour, 44 acres; first coal dock, 8 acres; second (timber and merchandise) dock, 14 acres; third (merchandise) dock, 10 acres; timber float and timber stone yards, 10 acres: total, 86 acres. The extent of available dock quay space is 4 miles 1 furlong 4 yards, or nearly two miles. The first graving dock is 250 feet long and 70 feet wide. The second dock is 350 feet long and 72 feet wide. Each is provided with large ship-building yards adjoining, which are complete with all requisite machinery and conveniences for extensive wood and iron ship-building. There is also a considerable range of bond and other warehouses, transit sheds, &c. In short, the harbour, docks, quays, staiths, and terminal dock arrangements of this company at West Hardepool occupy a space of 145 acres; and it must be ever remembered that these works were commenced on a nearly barren shore, backed by hills of blown sand, and are the entire production of little more than eight years, whilst the town surrounding them is increasing beyond all expectation. Its population, which eight years ago did not exceed 400, now numbers at least 8000 souls, and the land for building purposes continues in great demand at highly remunerative prices.

It was calculated by those accustomed to estimate numbers of people congregated together that 50,000 were present to witness the opening of the new dock. The steam and other vessels assembled in the beautiful bay of Hartlepool, whose the sea was perfectly calm, and the effect was very fine as the procession entered the docks. Two of the Company's steamers, the *Ward Jackson* (leading for St. Petersburg), and the *Zingara*, as commander Peacock, with yards manned, were received with enthusiastic cheering and salutes, whilst the procession was led by three life-boats, fully manned and equipped, two belonging to the dock company and one to the seamen; a finer, hardier set of men could not be seen together than the crews of these boats, who showed clearly their efforts would not be wanting to save life and property whenever required.

The Directors and their friends, to the number of about 800, sat down to dinner, by invitation of the company, in a spacious marquee, Ralph Ward Jackson, Esq., presiding; and, that the ceremonies might be appropriately concluded, the Company's workmen, the contractors' men, and others employed on the works, assembled the following evening in the same tent, to the number of nearly 1000, and partook of a substantial repast. The whole passed off not only without accident, but without confusion.

The accompanying View of the opening ceremony is from a sketch by Mr. J. W. Carmichael.

OPENING OF THE NEW DOCKS AT WEST HARTLEPOOL.—(SEE PRECEDING PAGE.)

# THE ASCOT RACE PLATE.

WE engrave the three elegant Prizes which have been run for at Ascot in the past week. In point of design and execution they are equal, if not superior, to any prizes contested for on former occasions; and the Ascot Plate, in classic character and perfection of working in metal, usually, to quote a sporting phrase, "bears away the bell."

The prizes, or "Cups," are three in number, viz., the "Ascot Cup," the "Gold Vase," and the "Royal Hunt Cup." The first two of these have been manufactured at the establishment of Messrs. Garrard, Jewellers to the Crown, in the Haymarket, from designs and models by Mr. Cotterill; the third has been manufactured at the establishment of Messrs. Hunt and Roskell, gold and silver smiths to her Majesty, in Bond-street, after a model and design by Mr. Alfred Brown.

The "Gold Vase" in its design illustrates the legend which Sir Walter Scott has made popular, in his account of the "Minstrelsy of the Scottish Border." It is a group representing the White Doe of Rilstone alluring Thomas the Rhymer into Fairyland. The story is thus told: The Rhymer, in his youth, was attracted by the Fairy Queen into Fairyland, from which, after a visit of seven years, he was allowed to return to Scotland, conditionally, that when sent for by her Majesty he should come back again to her abode. He is sent for; and he is, moreover, obliged, by the force of the fairy spells, to follow the White Doe. The artist represents his departure, the doe leading the way, and Thomas following on horseback:—

The elfin harp his neck around
In minstrel guise he hung,
And on the wind in doleful sound
Its dying accents rung.
Farewell, my father's ancient tower!
A long farewell, said he.

The scene of pleasure, pomp, or power
Thou never more shall be.
Some said to hill, and some to glen,
Their wondrous course had been;
But ne'er in haunts of living men
Again was Thomas seen.

The design and execution of this group are admirable.

The "Ascot Cup," which is nearly three feet in height, independently of the base, illustrates the mythological tale of Perseus and Andromeda. The serpent is twining round the rock, and making his way up to the spot on which Andromeda is fastened. Perseus, on his winged horse, is attacking the monster with the sword with which he slew the Gorgon, and a defending himself with the shield of Medusa. The artist has very properly not adhered too closely to the description of the poet Manilius,

THE GOLD VASE.—THE WHITE DOE OF RILSTONE ALLURING THOMAS THE RHYMER INTO FAIRYLAND.

THE ASCOT CUP.—PERSEUS AND ANDROMEDA.

THE ROYAL HUNT CUP.—DEATH OF THE BOAR, THE BUCK, AND THE FOX.

THE INUNDATION AT LYONS.—(SEE NEXT PAGE.)

which, indeed, it would be almost absurd, if not impossible, to represent in a group of silver statuettes. The execution of this piece of plate is very effective, and the outline very fine.

The "Royal Hunt Cup" is a tazza-shaped bowl, supported on a stem, around which are three distinct groups of figures, representing the death of the boar, the death of the buck, and the death of the fox, all admirably modelled, and of the most elaborate workmanship. The hunters, the dogs, and the animals of the chase, are distinct in character, but all unite to make a very perfect whole, full of vigorous truth. The brim is ornamented with stags' heads, which form what may be called its handles; and around the external part of it are represented, in bas-relief, a stag-hunt, and a herd of deer, in very good taste. This is, in all respects, a noble "Hunt Cup."

## THE INUNDATIONS IN FRANCE.

On Monday morning last the French Emperor again started on a long journey to inspect the inundations. It is said that when at Tours his Majesty desired to proceed further down the Loire, but was prevented by the flooded state of the roads. At all events, whether in pursuance of a previously-formed intention, or in consequence of news received in the course of the night, his Majesty left the Palace of St. Cloud shortly after six on Monday morning for the Western Railway station, whence, at seven, he started in a special train for Chartres and Le Mans, with the intention of going by that route to Angers. He arrived at Chartres at 8.30, at Le Mans at 11.7, and at 11 40 left the latter place in a travelling carriage with post horses for Angers. The alarming news relating to the latter town had probably a considerable effect upon his determination.

On the 6th inst. at noon the Trelazé road was cut through by the waters, and the village and slate quarries surrounded. A telegraphic despatch, dated five in the afternoon, stated that the waters were already up to the first-floor windows, and were rising with incredible rapidity. Part of the slate quarries were by that time under water.

It appears from later accounts that the workmen made immense efforts to save the quarries, which were the pride and glory of "Black Angers," but all without effect. Some of the principal ones are utterly destroyed. Local letters say that upwards of 20,000 men, women, and children are by this catastrophe thrown out of work, and not only so, but they are without house or home, and too probably without bread.

The Emperor reached Angers at half-past six p.m. on Monday, and proceeded immediately to inspect the slate quarries of Trelazé. His reception, both in the town and faubourgs, is represented as having been most enthusiastic. It will be remembered that the local insurrection which led to the notorious trials at Angers emanated in a great measure from the slate quarries of Trelazé.

The *Journal du Cher* of the 5th contains afflicting accounts of the disasters which have occurred by the inundations of the Cher, Allier, Yèvre, and Auron. A number of bridges have been carried away, and the railway has been intercepted at various points. The waters have, however, commenced declining and the communications are re-established. A temporary road has been constructed on piles between Bourges and Vierzon, and it was hoped that communications would soon be free between the former town and Orleans. St. Armand suffered severely, but the victims were received with warmth by both rich and poor. Count Jaubert has given shelter to many families in his château. The waters of the Allier resembled a vast lake, and committed innumerable ravages, but no loss of life is mentioned in its neighbourhood, though many unfortunate persons were in great danger. At a little village named Crévary three families were surprised by the rise of the Allier, and were only saved at the last moment by the devotedness of some boatmen; a few instants after they had been taken from the roofs of the houses on which they had sought refuge the waters swept over them. Another narrow escape took place near Vichy, where two children were surprised by the rise while fishing on a little island in the Allier. They had time only to climb into a high tree when the island was covered. They remained in that terrible position from Thursday evening to Saturday morning, and the provisions they had taken with them were exhausted. No one dared to render them assistance, as to approach the spot was to encounter almost certain death. Three sailors from the Crimea, however, placed themselves in a boat, and, with the father of the children, set off for the isle, followed by the prayers of all the inhabitants of the neighbourhood. These intrepid men succeeded in rescuing the two children, and on returning to Vichy they were welcomed with enthusiasm.

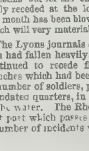
The *Courrier de Lyons* contains the following:—

Notwithstanding the torrents of rain which fell during the whole of Thursday the Rhone has not sensibly increased. All fears of further mischief are, for the present, at an end. The utmost activity prevails in the works necessary for removing the stagnant water which lays from the Tête d'Or to the Vitriolerie. All the Grand Rue of the Guillotière is now free from the bridge of fleet-nitre to the Place Saint Louis. This is the part which suffered most, and deep ravines are cut in many places by the torrent by which the houses were swept away. One house, two stories high, and built apparently with great solidity, was thrown down, and ten persons who were in it at the time perished. The Saone, which during the last day or two had risen, appears now to have reached its height, and, indeed, has slightly receded. In its present state it would have covered the whole of the Quais St. Antoine and des Celestins but for the embankments which were thrown up when the waters lately receded at the lowest parts of those quays. The wind, which for the last month has been blowing from the south, has now come round to the north, which will very materially tend to cause the rivers to empty themselves.

The Lyons journals of Saturday state that since the previous evening rain had fallen heavily, but the Saone had not risen, and that the water continued to recede from the inundated parts, in consequence of the trenches which had been cut by the water company having been opened. A number of soldiers, provided with pickaxes, had also been sent into the inundated quarters, in order to cut deep channels to facilitate the escape of the water. The Rhone has completely returned to its bed, at least in that part which passes through Lyons. The journals continue to mention a number of incidents which occurred during the late inundation.

## OBITUARY OF EMINENT PERSONS.

### THE BISHOP OF GLOUCESTER AND BRISTOL.



THE Right Rev. James Henry Monk, D.D., Bishop of the United Sees of Gloucester and Bristol, was the only son of Charles Monk, Esq., an officer in the 49th Regiment. He was born at Buntingford, Herts, in 1783. He was educated at Trinity College, Cambridge, and was seventh wrangler and junior Chancellor's medallist in 1804. He became a Fellow of his College in 1805, and in 1808 he was elected Regius Professor of Greek in the University. He was made a canon in 1815, and was appointed Dean of Peterborough in 1822. It was he who, in conjunction with Dr Kaye and Dr Lloyd, first urgently pushed forward the institution of Provincial Synods, although it was not until 1824 that their great desire was accomplished. After being chosen, in 1826, Prolocutor of the Lower House of Convocation, and named, in 1830, a Prebendary of Westminster, Dr. Monk was, in the July of the latter year, consecrated Bishop of Gloucester, to which see that of Bristol was united, in October, 1836. Dr. Monk owed his elevation to the Deanery, and afterwards to the Bishopric, to his high academical standing, his profound learning, his publications on classical literature, and his great eloquence as a preacher. Dr. Monk was the author of various erudite and religious works and essays. His most known productions were his "Life of Dr. Richard Bentley," and his several editions of the tragedies of "Euripides." Dr. Monk married, in 1822, Miss Hughes, only daughter of the Rev. Hugh Hughes, Rector of Hardwicke, Northamptonshire, and has had issue. The Right Rev. Bishop died of disease of the heart on the 6th inst., at Stapleton Palace, Bristol.

### MARIA THERESA, COUNTESS OF SHREWSBURY.

THE Right Hon. Maria Theresa, Countess of Shrewsbury and of Waterford, died rather suddenly at Paris on the 4th inst. after a short illness. Her Ladyship was the eldest daughter of William Talbot, Esq., of Castle Talbot, in the county of Wexford, by his first wife, Mary, daughter of Lawrence O'Toole, Esq., of Buxtown, in the same county. The Countess of Shrewsbury was born the 21st May, 1795, and was married at Bath on the 27th June, 1814, to John Talbot, Esq., who became seventeenth Earl of Shrewsbury on the demise of his uncle, Charles, the sixteenth Earl, in 1827, and who died at Naples suddenly, the 9th November, 1852. By this marriage her Ladyship had issue a son, who died in infancy, and two daughters, the elder of those is Maria Adalbea Beatrix, who was created a Princess by the King of Bavaria, and who is married to Prince Doria Pamphilj Landi, and has issue one son and four daughters. The Countess of Shrewsbury's younger daughter was Catherine Gwendaline, who was the first wife of Mark Antony, Prince de Borghese, who died in Italy on the 27th October, 1840, leaving an only daughter, now the wife of Rodolph, Prince de Piombino, Duke of Sora.

### CALENDAR FOR THE WEEK.

SUNDAY, June 15.—4th Sunday after Trinity.
MONDAY, 16.—Joseph Bonaparte proclaimed King of Spain, 1808.
TUESDAY, 17.—John Wesley born, 1703.
WEDNESDAY, 18.—Battle of Waterloo, 1815
THURSDAY, 19.—Inigo Jones died, 1652
FRIDAY, 20.—William IV. died, and Queen Victoria acceded, 1837.
SATURDAY, 21.—Income Tax imposed, 1842.

### TIMES OF HIGH WATER AT LONDON-BRIDGE.
FOR THE WEEK ENDING JUNE 21, 1856.

| Sunday. | Monday. | Tuesday. | Wednesday. | Thursday | Friday | Saturday. |
|---|---|---|---|---|---|---|
| M. A. h m h m (1125) — | M. A. h m h m 10 15 | M. A. h m h m 0 40 1 | M. A. h m h m 1 0 1 20 | M. A. h m h m 1 45 2 | M. A. h m h m 2 30 2 55 | M. A. h m h m 3 15 3 30 | M. A. h m h m 3 45 4 | M. A. h m h m 4 10 |

*** Next week we shall illustrate the Baptism of the Imperial Infant at Paris.

We are compelled, by pressure of other subjects, to defer until our next Engravings of the Bazaar at Wellington Barracks; characteristic Illustrations of the Royal Academy of Music Costume Ball; the Printers' Almshouses (opened on Wednesday); the proposed Road through St. James's-park; and the completion of our Illustration of the Paris Agricultural Show. Notices of the British Institution and Crystal Palace Picture Exhibition are unavoidably deferred; also, Illustrations (from our own Artists) of the Inundations at Lyons and the Valley of the Saone.

## THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, JUNE 14, 1856.*

THE news from Kansas this week, which we have given elsewhere, will show how powerful the motives were which inspired the foreign policy of President Pierce. The hope of creating a war mania, and thereby withdrawing public attention from the disgraceful conduct of the "border ruffians" of Missouri, and the still more disgraceful conduct of a Government which could lend its aid to such proceedings, has evidently been the object aimed at by the American Government in its attempt to pick a quarrel with England, and in its recognition of General Walker. To understand what is now going on in Kansas we must take a glance at the previous history of that territory. By the Nebraska Act, which received the signature of the President in 1854, it was enacted that each new State or territory should, through its Legislature, decide whether it should be free soil or slave soil, instead of leaving that question to the decision of Congress, as had been the case formerly. Under this act the election of the Kansas Legislature was appointed to take place in March, 1855, and, if the decision had been left to the *bonâ fide* inhabitants of the territory, there can be no doubt that they would have established freedom by a large majority. But this was what the slaveholders were determined to prevent at all hazards. Accordingly, when the day of election arrived, large bands of slavery men from Missouri, armed with bowie-knives and Colt's revolvers, passed over into Kansas, drove the free settlers from the polls by force and intimidation, and elected a slave legislature. This illegal parliament assembled shortly afterwards, and passed a number of laws for the maintenance of slavery.

The people of Kansas protested against this outrage, and, when the "border ruffians" had withdrawn, elected a legislature representing their own opinions on slavery. They also elected a delegate to the House of Representatives; and the Missourians, having invaded the territory once more, elected a delegate also. The free settlers applied for admission to Congress through their representative, but Congress was not able to make up its mind on the subject; all it could do was to appoint a committee of investigation, which commenced its sittings in the town of Lawrence last April. The evidence given before that committee leaves no room for doubt as to the systematic and extensive invasion of "border ruffians" from Missouri, at the election held in March, 1855. Evidence has been given that several members of the sham legislature, which President Pierce recognises as "the regularly constituted authority" in Kansas, have all along been residents of Missouri; indeed, so far as it has gone, the evidence is of the most conclusive character as to the violent and illegal conduct of the pro-slavery party. As the "border ruffians" were closely watching the progress of the inquiry, they felt alarmed at the startling disclosures made by the various witnesses, and resolved to exert their pretended authority with a view to quash the investigation. Having ascertained that the imbecile Government, in its anxiety to propitiate the slave power, was ready to back them to any extent, they established a complete reign of terror in Kansas. For several months past they have been sending bands of armed men into the territory, who have committed serious outrages against the peaceable settlers, under the pretence of enforcing the laws passed by the sham legislature; but the revelations brought to light by the committee of inquiry appear to have made them utterly reckless. A few weeks ago they attempted to arrest Governor Reeder, an anti-slavery member of the committee, on a charge of contempt of the authorities, with the evident intention of breaking up the inquiry. There has also been a systematic attempt to annoy and harass the free settlers in every possible way, in the hope of driving them out of the territory.

As the anti-slavery settlers in Kansas have stood firm to their principles, the "border ruffians" have found it necessary to resort to more violent measures to accomplish their purpose. A fortnight ago we were told that twelve hundred armed men from Missouri, with several pieces of artillery, had encamped near the town of Lawrence, their professed object being to arrest certain persons who were said to have broken the laws passed by the sham legislature of Kansas. On the 21st ult. these rebels, as they ought to be called, under the command of a Government official, approached the town of Lawrence, and, though no resistance was offered, the Free-state Hotel, the Governor's house, and two printing-offices were destroyed by fire, two Free-state men were shot, and from subsequent accounts there is reason to believe that the whole town was burnt by the armed mob of Missouri, acting under the authority of a United States' Marshal.

The news of this disgraceful outrage has raised a storm of indignation throughout the free states against Mr. Pierce. Everybody seems to feel that the crisis of the Union has come at last. Even the Government organ admits this. Speaking of Kansas, it says:—"Whatever other question may enter into the contest, the slavery issue, as included in the Kansas measure, must and will take precedence—in comparison with it all other questions are of minor importance." Most assuredly it will, in spite of all the attempts of the Pierce Cabinet to sink that subject in the excitement caused by a foreign war. The slavery question must be settled, even if it should lead to a dissolution of the Union. And will the American people go to war with England while such a contest is raging in their own territories? We think not.

---

Last week we published a few remarks on the subject of Public Art in this country, as suggested by the arrangement and adornment of our thoroughfares, and the State culture of Art generally. On Friday week, in Committee of Supply, the manner in which these affairs are regulated, or rather the wayward accidents to which they are subject, was strangely illustrated. It is impossible to read the proceedings in the House of Commons upon the two votes for £10,000 for "defraying the cost of removing the Science and Art Branch of the Educational Department of the Council-office from Marlborough House to Kensington Gore," and of £24,700 "for the purpose of constructing a road through St. James's-park from Pall-mall to Buckingham-gate, and for a foot-bridge over the ornamental water," without marvelling at the systematic jobbery and inscrutable influences which permeate all our public arrangements in their pettiest details, and which in despotic countries, unsupported by the sanction of legislative control, would be impossible. It is not going too far to say that, if our representative system is a noble palladium in the larger matters of policy, it leads to gross abuses and contemptible absurdities in the smaller interests of the community.

We will take the Park question first. Six months, or more, ago a loud burst of indignation ran through all Cockayne at the notion, obscurely bruited, that, in order to meet the requirements of Westminster and Pimlico, a public road and bridge were about to be thrown across St. James's-park and its ornamental water. The outcry was so loud and vehement that the competent official authorities, whoever they might be, who would have to carry out the plan, hesitated in the middle of their work; and the whole subject was referred to a Select Committee of the House of Commons, who, by a large majority, decided against the proposed work of disfigurement, and recommended as an alternative the opening of a public thoroughfare through the gate by Marlborough House, at the end of Pall-mall, and thence to Buckingham-gate. This report was received and approved by the House; and on Friday week only the simply formal proceeding remained to be gone through, of voting the sum of £24,700 for the expenses of carrying out the alteration so agreed upon. Under what inspiration the House acted we will not pretend to say; certainly a more absurd figure the legislative wisdom never cut than when, on the motion of Lord Robert Grosvenor, it reversed and stultified all its former labours in this matter, and refused the vote sought by a majority of 192 against 70. Even the members of the Government came forth in all their strength, from the Premier down to the Secretary of the Treasury, to support the Ministerial plan. The whipper-in, apparently, had lost the clue to the multitude of ordinary hangers-on, and a disgraceful defeat was the result. Those who feel interested, upon grounds of public convenience, in the realisation of the proposed plan for opening a thoroughfare across the park will doubtless feel aggrieved that a public question, affecting the personal comfort, as well as the time and money, of a large portion of the community, should have been sacrificed for the sake, or pretended sake, of a small pecuniary outlay, which if it had come to the push, they would gladly provide for by a street-to-street subscription in Belgravia. The dispassionate observer, when he considers these things, will recall the old saying, that there are "more ways than one of killing a cat," and more ways than one of getting out of an awkward dilemma. Foreigners, who know how jealously John Bull guards his rights and his purse will marvel that whilst the Government freely took upon itself to throw away some twenty or thirty thousand pounds for a three hours' display of stupid fireworks and gas illuminations, upon its own responsibility, without the slightest reference to Committee of Supply, it could not venture upon a similar outlay for an important work of public improvement.

With respect to the removal of the Science and Art Department from Marlborough House, we believe it to be a matter of inevitable necessity, as that mansion will, before long, be required as the residence of the Prince of Wales. Some people imagined that it might have been advantageously transferred to Burlington House, recently purchased by the Government, and very centrically and conveniently situated for such a purpose; but it appears that this new acquisition had been already appropriated to the use of the Council of the London University, and for other purposes, and, therefore, nothing remained but to build up something for the occasion—a temporary building, of course, for all

our public dispositions of this sort are temporary and fluctuating—an excellent arrangement in the interests of those who make a trade in public works. And in truth we can see no great objection to the erection of the proposed structure on the large vacant space of ground at Kensington Gore, purchased for some £250,000, partly out of the surplus funds in the hands of the Great Exhibition Commissioners, and partly out of the public funds. This joint estate has been lying waste for now some four years, and it is quite time that a portion of it should be put to account. But, whilst we concur in the modest vote of £10,000 in the interests of science in this particular disposition, we must not conceal the fact that we look forward with apprehension to what may possibly follow upon this very small beginning; what huge architectural abominations, what flagrant "jobs," may grow out of this first Commission. The story and process of public works in this country is a beaten track—a stereotyped page; one which excites the disgust and laughter of foreigners; and we much fear that, unless the public resolutely interpose, it will be adhered to to the end, and repeated in numberless editions, with copious additions, until, in disgust, all thought of honourable art-culture all public pride in art, is abandoned. Before another shilling is laid out upon public works for art or educational purposes—before a pretence at adding to the public buildings of the metropolis is sanctioned—the public have a right to know something of the whole scheme of works proposed, and of the talent to be employed upon them. It has a right, further, to know with what department of the Government the responsible charge of carrying out the works will rest; and it has a right to exercise a free judgment as to whether the talent proposed to be employed is such as shall do credit to the country, and whether the official at the head of the controlling department is a man competent to direct its labours. Notoriously none of these conditions exist at the present moment; and therefore, reserving our opinion upon many matters of detail, we, in the name of the arts and the public press of England, protest against further movement in this matter until desiderata so patent are supplied.

## *THE COURT.*

THE presence of the Queen and her illustrious visitors at Ascot on Thursday has been the leading feature in Court life during the week.

On Saturday the Queen and the Prince Consort rode on horseback. Afterwards her Majesty, accompanied by the Princess Royal, took a drive in an open landau; and in the evening the Court honoured the Haymarket Theatre with their presence.

On Monday the Queen visited her Royal Highness the Duchess of Gloucester, at Gloucester House, and afterwards, accompanied by Prince Albert, the Princess Royal, and Prince Frederick William of Prussia visited the exhibition of American plants at Cremorne Gardens. In the evening the Queen, the Prince Consort, the Princess Royal, and Prince Frederick William of Prussia, honoured the performance of Madame Ristori, in the tragedy of "Medea," at the Lyceum, with their presence.

On Tuesday the Queen and Prince Albert, accompanied by Prince Frederick William of Prussia, and by the Prince of Wales, the Princess Royal, Prince Arthur, Prince Leopold, the Princesses Alice, Helena, and Louisa, left Buckingham Palace for Windsor Castle, where they arrived shortly before two o'clock in the afternoon. In the evening the Queen gave a dinner party.

On Wednesday her Majesty was out walking early in the Home-park accompanied by the Prince Consort and Prince Frederick William of Prussia. In the course of the day the following distinguished company arrived at the Castle on a visit: The Duchess of Cambridge and the Princess Mary (attended by the Lady Geraldine Somerset and Major Horne Payne), the Duke of Cambridge, the French Ambassador and the Countess de Persigny, the Duke of Buccleuch, the Prussian Minister and Countess Bernstorff, Viscount Palmerston, the Earl and Countess of Clarendon, the Earl of Ilchester and the Countess of Beauborough, the Lord Steward and Lord Chamberlain. At five o'clock the Royal party went out in two carriages and four-horses. In the evening the Queen gave a dinner, and the party (as at St. George's Hall the previous Wednesday evening) sang part-songs.

On Thursday the Queen and the Prince Consort, with the Princess Royal, the Regent of Baden and Prince Frederick William of Prussia and the whole of the distinguished company staying at the Castle, went to the races at Ascot. The Royal party occupied several pony carriages and were preceded by the Master of the Buckhounds and the Lords and Gentlemen of the Household on horseback. In the evening the Queen gave another grand dinner in St. George's Hall.

The Court returned to London on Friday (yesterday).

His Royal Highness the Regent of Baden left Buckingham Palace on Saturday on a flying tour through England and a part of Scotland. His Royal Highness joined the Court at Windsor Castle on Wednesday.

The Countess of Wilton gave a very brilliant ball on Friday (yesterday), at the family mansion in Grosvenor-square.

## *NAVAL AND MILITARY INTELLIGENCE.*

HER Majesty's ships *Nile*, 91, *Shannon*, 51 (new screw-frigate), the *Pylades*, 21, and *Cossack*, 21, have been telegraphed to prepare for sea (foreign service) with all possible despatch. Their destination is believed and currently reported to be North America. The *Cossack* is said to have had orders to Dublin, and she is supposed to be the bearer of the despatches of the Admiralty now so unanimously ordered to prepare for active service. The *Leopard* had received instructions to fit out for the conveyance of the British Ambassador and staff from England to St. Petersburg; but she has now returned the fittings and supplied their places with something more substantial. On Tuesday evening, the 27th ult., the *Arrogant* steamed through Spithead, and down Channel under sealed orders. The *Shannon* is not yet commissioned, but was put in hand on Tuesday, to be prepared for a crew with the utmost despatch, and a great body of artificers were set upon her to expedite her readiness. All the commanders of the gun-boats at Portsmouth were also called to the Port Admiral's on Tuesday morning, it was rumoured, to receive instructions for having their respective vessels ready for active service at telegraph notice. When these vessels shall be commissioned, or on their way to the North American or West Indian stations, the following fleet will be in commission:—*Duncan*, 101 (flag); *Nile*, 91; *Trafalgar*, 91; *Hogue*, 60; *Immortalité*, 51; *Shannon*, 51; *Amphion*, 34; *Pestal*, 26; *Harpooner*, 6; *Tenasserim*, 24; *Cossack*, 21; *Pylades*, 21; *Leopard*, 21; *Monarch*, 17; *Racehorse*, 6; *Arrow*, 6; *Dart*, 6; *Lucifer*, 6; *Scourge*, 6; *Vesuvius*, 6; *Wasp*, 6; *Growler*, 6; *Snapper*, 6; *Espiegle*, 12; *Arab*, 6; *Daring*, 6; *Bustard*, 6; *Jason*, 6; *Leander*, 6; *Swinger*, 6; *Hermes*, 6. Only one-third of the above are sailing ships, the steamers, although mounting but few guns, mount the heaviest carriage and shortest screw. The *Nile*, *Pembroke*, and *Cornwallis* are screw line-of-battle ships, *Trafalgar* is the heaviest first-class frigate; *Pylades*, *Cossack*, *Espiegle*, and *Arrow* are the heaviest class of corvettes, carrying 68- and 32-pounders. The *Leopard* and *Racehorse* are heavily-armed 50-gun frigates, the *Amphion* a heavily-armed frigate. The 12-gun sloops are the newest and most efficient of their class, all carrying long 32's, and the 6-gun steamers are mounted with bow, stern, and broadside guns of the heaviest metal at the longest range; and, if a fleotilla of gun-boats be taken into consideration, about eighty of the heaviest and newest guns of the longest range may be added to the computation.

The light squadron of dispatch-boats and gun-boats, under the command of Captain Watson, C.B., in the *Impériense*, of 51 guns, and comprising, of the first-named class, the *Wanderer*, the *Victor*, the *Ringdove*, the *Lapwing*, the *Pioneer*, and the *Intrepid*, and, of the second class, the *Sterling*, the *Vienna*, the *Beaver*, and the *Drake*, all arrived in Falmouth on Sunday, and were ordered to fill up with coal and provisions immediately, in consequence of the receipt on that day of an Admiralty telegraphic despatch, which was communicated to the Commodore, then off the port, by one of the gun-boats. The evolutions of the past week have embraced sailing, steaming, gunnery, and various other exercises, which are now suspended, as it is surmised that these ships will all proceed to the American coast forthwith. The *Mohawk* and other steamers were expected to join at Falmouth.

GRAND military rejoicings took place at the camp at Shorncliffe on Saturday last, in honour of her Majesty's birthday. In the morning a review took place; the whole of the men, cavalry and infantry, under the command of Major-General Baron von Stutterheim, went through their evolutions, and presented a fine soldierly appearance. In the evening the whole of the camp was brilliantly illuminated.

## NOTES OF THE WEEK.

A FEW words which fell from Sir George Grey, in the course of his reply to Mr. Ewart's speech in favour of the abolition of capital punishments, must have been very significant to the comparatively few persons who hoped, or affected to hope, that the last sentence of the law would not be carried out in the case of the miscreant Palmer. Sir George observed that the motion of Mr. Ewart had been originally far more direct than on Tuesday night, when he only asked for inquiry, having previously moved the abolition of punishment by execution. "But within the last few days, influenced perhaps by circumstances which have occurred, inducing him to think that a motion pledging the House to the abolition of capital punishment was little likely to meet with acceptance, he changed his motion." These words contain the most satisfactory reply to all the clamour which has been got up by several sets of parties—viz., Palmer's highly-respectable relatives, his hired advisers, the medical men who hate Dr. Taylor, and the sentimental philo-murderers who object to the scaffold. The united body of sympathisers with Palmer is not very numerous, but it is very noisy, and might almost delude those who do not know, in the words of Sir George Grey, that "the silent opinion against remitting the sentence is that of the people of England." That this kind of agitation against the law, this struggle to teach the humbler classes that the doom of law is uncertain, and shall always be averted if lithographed petitions and persecution of the Home Secretary can manage it, proves unsuccessful, is nothing, the extreme cruelty and immorality of the proceeding is equally to be condemned. One would not say much even against the vulgar audacity of the pamphlet by the "Reverend" Thomas Palmer (who, for some reason, was not brought forward at the trial); for, improper and foolish as is his language, he may be in earnest in wishing to save his brother. Against hired advocacy, of course, it would be contrary to the principles of law to complain. But the men of science and the men of cant, who for different reasons seek to disturb this verdict, deserve every reprobation; and it is with some satisfaction that we learn that the humanity of Palmer's gaolers has excluded from his knowledge all information calculated to raise groundless hopes of a reprieve.

Last year her Majesty did not visit Ascot; and it was understood that the Queen felt that, at a time when the events of the war were carrying sorrow and mourning into so many households, her presence at a scene of public recreation might be less appropriate than when a happier state of things permitted all alike to enjoy the holiday. This year no such reason against her Majesty honouring the amusements at Ascot exists; and the Thursday of the 1856 meeting will long be remembered. The character of the attendance will probably alter to a certain extent, *mogenus* the rail-way, for the long journey used to keep the meeting somewhat exclusive; but visitors are now taken to the very course by the railway, and the journey is much easier than to Epsom.

Parliament has discussed a few questions of interest, but has done so languidly, and has cut talking short as early as was possible. There was very little debate on the third reading of the Jew Bill: Sir Frederic Thesiger's customary protest, and Lord John Russell's stereotype advocacy, were brought forward; and the House was a little impatient with Mr. Samuel Warren, who was moved to deliver a sermon against Judaism, but who obtained leave to finish it chiefly by promising not to spunk any more this Session. It would not be amiss, by the way, if this kind of bargain could be made with many more bores than Mr. Warren (who does not trouble the House much), and that on condition of being heard once at full length, for which purpose a House should be kept, some fifty troublesome orators should be bound over to keep the peace for the rest of the Session. But this *par parenthèse*. The Jew Bill passed by 49, and will probably be rejected by a proportionate majority elsewhere. The motion of Mr. Ewart, to which we have already referred, was made on Tuesday, and here, too, the speeches were few. Mr. Ewart's ordinarily weak address produced no effect, and Sir George's victory was an easy one. He clearly proved that the punishment of death is of great avail in repressing crime, and he showed that robberies, burglaries, and all the ills of the second class have increased (allowing for the increase of population) since the punishment was made lighter, while murder (even without making that allowance) has not increased. He intimated his intention to carry out the law with full vigour, and distinctly denied any intention of habitually reprieving on the first conviction of a murderer who was awarded. Somecommuting women from the last punishment that can be awarded. Somecrying to the Report of Baboo Rajah Radhakrishen Mullick, Will. m of Prussia and the whole of the distinguished company staying at the Castle, went to the races at Ascot. The Royal party occupied several pony carriages and were preceded by the Master of the Buckhounds and the Lords and Gentlemen of the Household on horseback. In the evening the Queen gave another grand dinner in St. George's Hall.

The Court returned to London on Friday (yesterday).

His Royal Highness the Regent of Baden left Buckingham Palace on Saturday on a flying tour through England and a part of Scotland. His Royal Highness joined the Court at Windsor Castle on Wednesday.

The Countess of Wilton gave a very brilliant ball on Friday (yesterday), at the family mansion in Grosvenor-square.

## *NAVAL AND MILITARY INTELLIGENCE.*

HER Majesty's ships *Nile*, 91, *Shannon*, 51 (new screw-frigate), the *Pylades*, 21, and *Cossack*, 21, have been telegraphed to prepare for sea (foreign service) with all possible despatch. Their destination is believed and currently reported to be North America. The *Cossack* is said to have had orders to Dublin, and she is supposed to be the bearer of the despatches of the Admiralty now so unanimously ordered to prepare for active service. The *Leopard* had received instructions to fit out for the conveyance of the British Ambassador and staff from England to St. Petersburg; but she has now returned the fittings and supplied their places with something more substantial. On Tuesday evening, the 27th ult., the *Arrogant* steamed through Spithead, and down Channel under sealed orders. The *Shannon* is not yet commissioned, but was put in hand on Tuesday, to be prepared for a crew with the utmost despatch, and a great body of artificers were set upon her to expedite her readiness. All the commanders of the gun-boats at Portsmouth were also called to the Port Admiral's on Tuesday morning, it was rumoured, to receive instructions for having their respective vessels ready for active service at telegraph notice. The *Mohawk* and other steamers were expected to join at Falmouth.

GRAND military rejoicings took place at the camp at Shorncliffe on Saturday last, in honour of her Majesty's birthday. In the morning a review took place; the whole of the men, cavalry and infantry, under the command of Major-General Baron von Stutterheim, went through their evolutions, and presented a fine soldierly appearance. In the evening the whole of the camp was brilliantly illuminated.

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

STRAWBERRY-HILL is about to be restored. That romance in lath and lime, so pleasantly situated on the banks of the Thames, at Twickenham, after standing or rather falling untenanted for some sixteen years, has met at last with an inhabitant anxious, if possible, to restore it to its true Horatian state. The Lord of Nuneham and the Lady of Strawberry have sent in a little army of plasterers, carpenters, gilders, and decorators to the fast-decaying castle of the prince of letter-writers. The battlements of which Walpole himself survived so many sets are about to be renewed. Everything is to be done in the true Walpolean spirit. Mr. George Granville Vernon Harcourt, M.P., and Frances Countess Waldegrave, are eager to replace the treasures scattered by the coarse hammer of the late George Robins. They dream of getting back the armour of Francis I., the hat of Cardinal Wolsey, the blue china vase in which the cat of Mr. Gray was drowned, the Benvenuto Cellini bell, the full-length portrait of Lord Deputy Falkland that suggested the "Castle of Otranto" to the builder of Strawberry, and a share of those rarities and nicknacks with which Walpole, in advance of his age, filled his Gothic villa, and we, as a nation so little in advance of our own age, suffered to pass into private hands without sending even an agent to purchase one lot for the British Museum or the National Gallery. Would that the sale could occur again! We are wiser now. All success to you, Mr. Vernon Harcourt and Frances Countess Waldegrave, and your praiseworthy endeavour to restore Strawberry-hill to the many and increasing admirers of Horace Walpole. We should be sorry to see that pastebord piece of Gothic disappear like Shakspeare's New Place, Bacon's Gorhambury, Bolingbroke's Dawley, Burke's Gregories, or Pope's Villa. As we pass Strawberry, even in its desolation, we have still the shadow of a pleasant thought. Very strangely, indeed, does this restoration of Strawberry sound when we couple it with another announcement—the immediate sale by auction of the pictures at Wolterton, in Norfolk, of Walpole Earl of Orford. Yes, the inevitable Christie, as he is called, is about to scatter the far-famed Wolterton Collection; and the Watson Taylor Rubens, "The Rainbow" (a noble landscape), will pass into other hands. The disposal of this collection is particularly suggestive of the decay of families and of things. In less than a century the Walpole family—little more than a century old—has scattered those very noble collections. The Houghton Gallery of the founder of the family, the Minister, Sir Robert Walpole, and first Earl of Orford, were sold to St. Petersburg because we, as a people, wanted the soul to spread the taste we affected. In our own time the Strawberry-hill Collection of Sir Robert's youngest son, the third Earl of Orford, was sold to pay the debts of a spendthrift Peer: and now we see announced the sale of the collection of a third Earl of Orford. Truly there is little that is permanent in collections made by a Walpole.

Oddly enough, as we were reminded the other day at the private view of the old masters, British Institution, one of the principal pictures in the collection (opened to the public on Monday last) is the famous Strawberry-hill picture, by Sir Joshua Reynolds, of Horace Walpole's three nieces, the Walpole Waldegraves. This fine picture belongs (we are glad to think) to Frances Countess Waldegrave. It attracted great attention (most deservedly) at the private view. "What would it sell for?" some one asked. "Two thousand guineas," was the prompt reply of one accomplished in art and skilled in appraisements of this kind. "What did Sir Joshua get for it?" asked another. The reply was equally prompt, "Eight hundred guineas." "A large sum for those days," muttered a collector who prides himself on obtaining bargains. "Are you certain of the sum?" another modestly asked. Nothing was equally prompt. The fact is told by Pinkerton. "Sir Joshua Reynolds," said Walpole to Pinkerton, "gets avaricious in his old age. My picture of the young Ladies Waldegrave is doubtless very fine and graceful, but it cost me 800 guineas." The sum is printed in figures. Mr. Cotton, who has access to Sir Joshua's book of prices, will, perhaps, inform us if the sum stated is correct.

The engraving of Mr. Millais' fine picture of "The Release" (one of the best productions of the modern English school, and one of the leading attractions of our island school of art at the Paris Exhibition of last year) has just been completed by Mr. Samuel Cousins in a manner superior to his wonted doings. The picture (we purposely skip its fine composition) was admirable in point of colour, and this colour Mr. Cousins has translated into black and white. A nobler example of the existing school of English engraving it would, indeed, be difficult to produce. Mr. Cousins has worked with the spirit of a line-engraver, and with the feeling that in his new honour as a full Royal Academician he has had to outstrip himself. Observe the dangling sleepy legs of the child in its mother's arms; above all, observe the mother's face. Both most admirable.

The tower-proper of the Great or Victoria Tower of the new Palace of Westminster is now complete, and the scaffolding is up for the four corner turrets. Every day adds to the picturesque beauty of the sky-line of this fine building. The river-front is still weak. It wants light and shade, and breadth and boldness. These defects are not to be seen in any other part of Barry's building.

Mr. David Roberts and Mr. E. W. Cooke—all, indeed, who paint or delight in Venetian scenes—should make a point of calling at No. 18, Golden-square, London, for the pleasure and profit of seeing two noble Venetian landscapes by Francesco Guardi, the scholar of Canaletto, and in many respects a superior artist to his master. They are very large, very fine, very true, very broad, very faithful, and very effective. Guardi cannot be seen to equal advantage in any other pictures in this country. They were painted for Louis XVI., for the purpose of presentation to Maréchal du Muit, from whose château, in the neighbourhood of Marseilles, they have been carried direct to England.

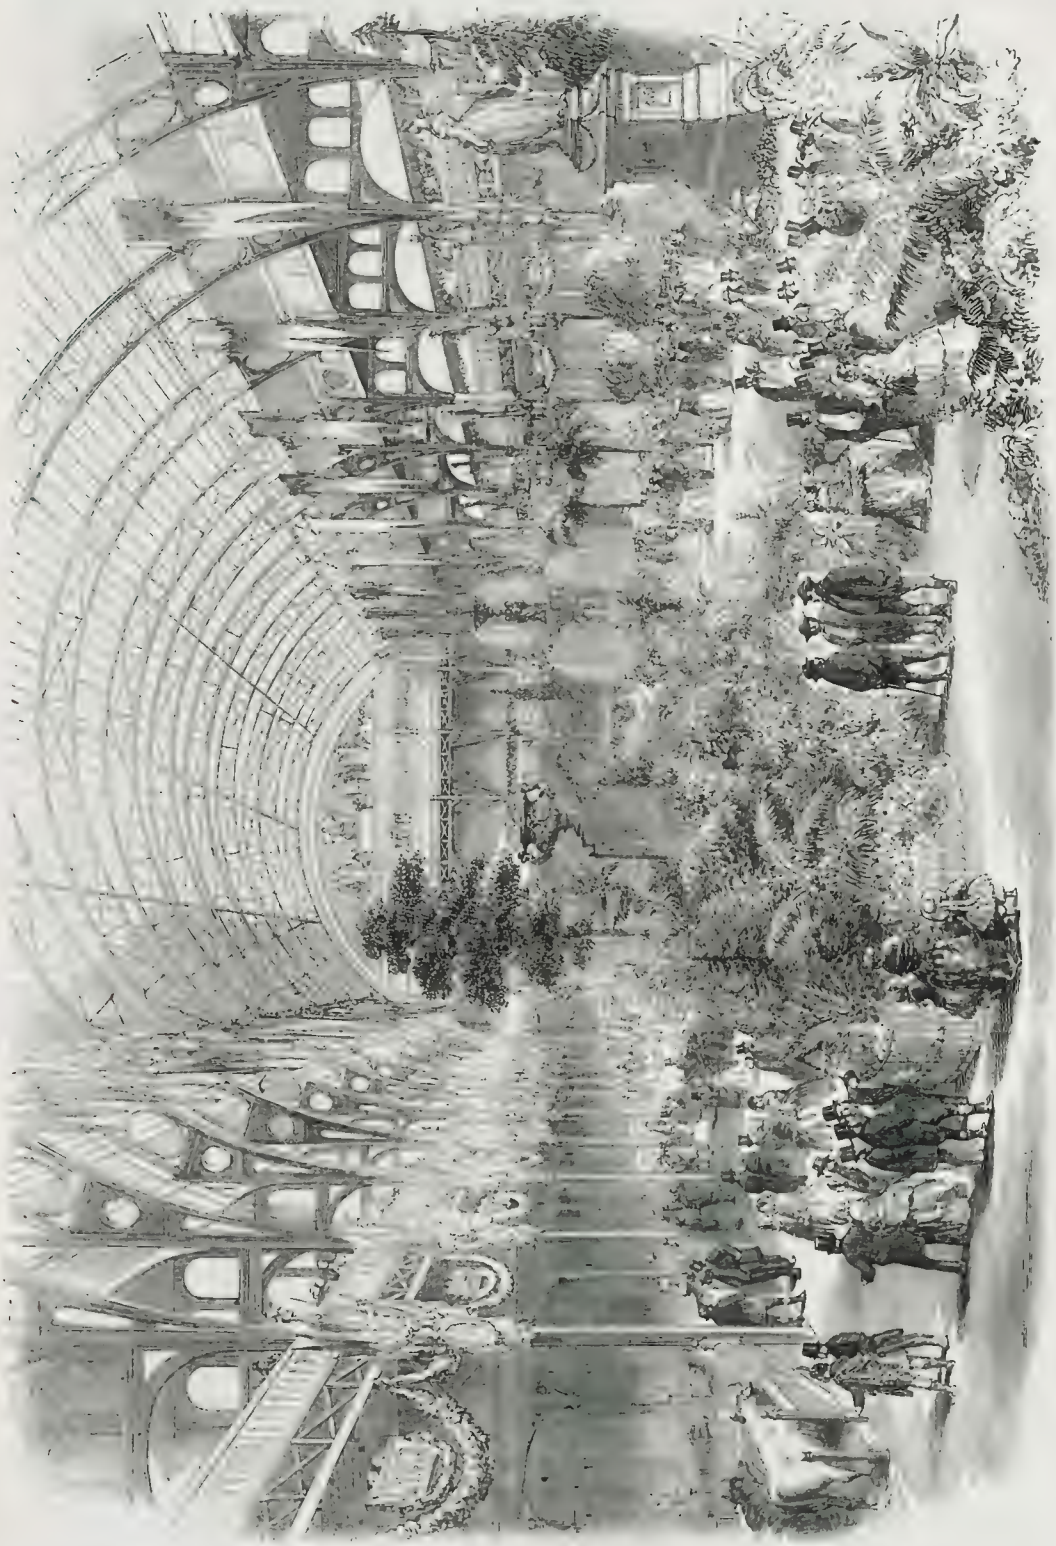
There is a good and characteristic Hogarth to be sold at Christie's on Saturday. It is part of Mr. Barwell Coles's collection, and is a true piece, with four figures life-size over a bowl of punch. The scene is evidently in Old Slaughter's Coffee-house, and the persons represented are Dr. Mounsey, Slaughter himself, and, it is said, Hogarth; but we do not see the likeness. The heads in this punch-and-conversation piece are well painted, and the whole picture is full of character.

The rebuilding of the Adelphi Theatre is intrusted to Mr. T. H. Wyatt, an able architect; and the Hall at Manchester for the Art-treasures of Great Britain has been confided (after competition, in which some Manchester architects showed well) to Mr. Owen Jones, whose design is, it is said, novel, graceful, and eminently what is wanted.

Collectors are giving the same outrageous prices for drawings by Mr. Turner. Witness the Dillon sale at Mr. Foster's the other day. But the fever is near at its height, and a reaction is at hand.

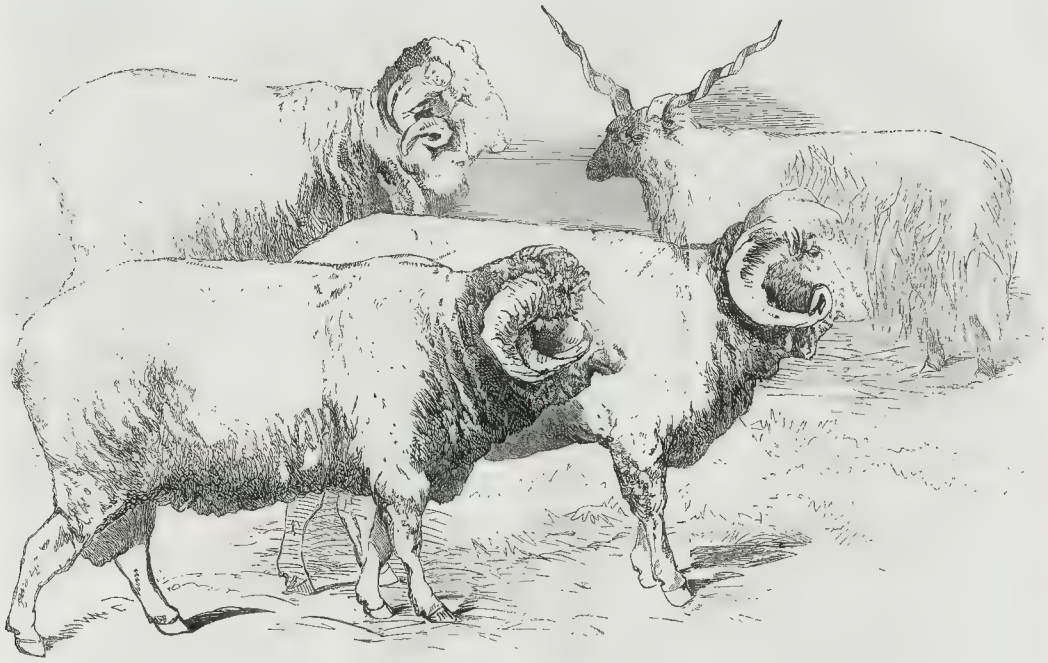
THE HOBBS LOCK PICKED.—The *Illion Independent* asserts that the Day and Newell Lock, manufactured at New York, commonly known as the "Hobbs lock," has at last been picked by Lyman Yale, jun., of the adjoining village of Newport. It says:—"The exact *modus operandi* of picking the lock, of course, is not expected to be made known to the public just at present; but it is sufficient to say that, by a singular and ingenious method, the action of the key upon the curve of the tumblers of the lock is mapped out, from which a wooden key is made, which unlocks and locks the lock, and in all respects operates on it as perfectly as the true key. In this manner the lock was opened in the presence of the cashier of the Dairyman's Bank, Newport, N.Y., and of the President of the Port Stanwick Bank, Dome, N.Y. And within a few weeks was so opened a 300 dollar lock on a jeweller's safe, in Wall-street, New York; from all of whom certificates to this effect have been taken. This statement, of course, will astound the world, but it is even true."

ORDERS have been received at Devonport to expedite the completion of the screw steam-frigates *Lifey* and *Tweed*, of 60 guns each.



THE UNIVERSAL CATTLE SHOW AND AGRICULTURAL EXHIBITION, PARIS

# PRIZE ANIMALS FROM THE CATTLE SHOW, AT PARIS.



SAXON MERINO SHEEP.—FIRST PRIZE.
MERINO SHEEP (PRINCE ESTERHAZY'S).—FIRST PRIZE.
AUSTRIAN SHEEP.—FIRST PRIZE.
HUNGARIAN RAM, NATIVE LONG-WOOLED BREED.—FIRST PRIZE.

## THE UNIVERSAL CATTLE SHOW AND AGRICULTURAL EXHIBITION, PARIS.

The Exhibition was opened at noon on Sunday with magnificent weather. We have engraved the gay scene upon the opposite page. "There can hardly," says a contemporary, "be cited a better example of the power of the French to give elegance and impart even poetry to subjects the most prosaic and the most ordinary than the Agricultural Show at the Palais de l'Industrie. Independently of the useful part, the exquisite taste with which the ground in the centre of the building, so lately appropriated to far different objects, has been transferred into a delicious garden, calls for the greatest admiration. Grassplats with their velvet verdure, graceful flower-beds, shrubs, fountains, groups or statuary—all, in fine, that could refresh the sight, and shed a charm over the whole place, has been got together. Standing, from the gallery, one may fancy he was looking over some fair valley, rich in verdure and fragrant in flowers, while the singing of birds from aviaries half concealed amid the trees and shrubs, the gushing of the cool waters as they flash in the stray sunbeam that shoots down through the crystal roof, and the occasional lowing of the cattle, complete the illusion. Never was it imagined that a cattle show could be made so interesting. This vast pasture, which has thus sprung up as if by enchantment, is flanked on both sides by the stalls in which the cattle, the nobler part of the Exhibition, are kept; and their occupants seem as if they were placed there on purpose to guard those fruits and flowers, those fresh and sparkling waters, and rich verdure from all unhallowed touch."

The entire space underneath the galleries is occupied by bulls and cows (the *espèce bovine*). The sheep, pigs, and poultry are outside, where indeed are a portion of the bovine species (including the Kerry cattle), for want of room in the interior. It is impossible not to admire the neatness of the arrangements for stalling the beasts. The state of their litter and the general cleanliness do the highest credit to the management of the Exhibition. There never was in the world before such an agglomeration of cattle of different races, and they are so disposed that every individual beast may be inspected with perfect comfort.

KERRY COW.
BRETONNE COW.
AYRSHIRE COW.

## DISTRIBUTION OF THE PRIZES.

The prizes were distributed on Tuesday and Wednesday. The business of distribution began at a meeting of the jurors in the *salon* of the Emperor at the Palace of Industry, where the Minister of Agriculture, M. Rouher, with M. Morny de Mornay, presided. One commissioner from each of the various States of Europe which had sent anything to the Exhibition received three medals, one of gold, one of silver, and one of bronze. Then every one of the jurors was similarly rewarded, two basketfuls of medals being in this manner distributed. The Minister and the jurors next proceeded to the "Salle de Distribution," to which the whole of the northern gallery has been appropriated, the interior being tastefully decorated and fitted up with seats for several thousand persons. These were already filled with spectators, the exhibitors and prize-winners being placed in the centre, opposite to the dais where the Minister and his Vice-Presidents took their seats. Near the Minister were M. Dupin, Mr. E. Denison, Baron Münnich of Austria, Baron Peers, the Earl of Elgin, M. de Morny, M. St. Marie, and M. Tisserand; while among the jurors and commissioners were Sir M. S. Stewart, Sir J. Forbes, Lord Dunlo, M. Lavergne, Count Kergorlay, and many others. The first distribution of prizes on Tuesday occupied nearly four continuous hours. Mr. Townley, Mr. Fisher Hobbs, Mr. George Turner, Sir M. S. Stewart, Mr. M'Combie, and Lord Talbot de Malahide, were the most successful of the English exhibitors of cattle. Mr Sandys, Mr. George Turner, Mr. John Brown, Mr. Jonas Webb, and Mr. John Carruthers, of English sheep; Messrs. Ransome, Howard, Hornsby, Dray, and Barrett were among the more prominent medallists for English implements. The foreigners came out strongest in the class of merino sheep, Prince Esterhazy, Count Münnich, Prince Schwarzenberg, Prince F. Kinski, and M. Gudegast being the most successful. A new class of prizes was distributed to the servants in charge of their masters' stocks. When called forward to receive either their own or their masters' prizes, we have to say it, that the English labourer was the poorest-looking man among them all. The easy and independent bearing and the picturesque dress of the Spanish peasant, the Hungarian shepherd, and the Swiss herdsman, contrasted most painfully with the best and slouching gait and slovenly fustian dress of the English cattle-man.

M. Rouher opened the proceedings by an address, of which the following are the principal portions:

Gentlemen,—I think I may without pride proclaim at the outset of this ceremony the full success of the Exhibition, and the definitive triumph of the cause of Universal Agricultural Competitions. This institution, very modest in its origin, was commenced in 1850; how rapid, therefore, has been its progress, and how much its circle has been increased even since last year! The vast palace erected for the Exhibition of Industry has not been large enough for this agricultural show. The bovine race alone almost equals in number that of all the animals exhibited in 1855. Independently of the races, the principal qualities of which I pointed out to you last year, there are now in this Exhibition, for the first time, the inhorned breed of Angus, those from the mountains of Scotland, the Irish breed from Kerry, that of Central and Eastern Switzerland, those of Denmark and Holstein, and, lastly, thanks to the enlightened zeal for which I thank its Government, the most highly-esteemed breeds from Austria. Near those noble animals are also ranged more than 3000 specimens of other races, which fill the farmers' stalls, animate his fields, or give life to the poultry-yard. Round them have been classified in immemorial order the most precious gifts of the soil, the most varied productions of cultivation, and the newest and most ingenious machines—those powerful and indispensable auxiliaries to human labour. The Imperial Horticultural Society, desirous of taking part in this festival, has improvised, in the centre of the building, a charming and truly universal garden. Sheltered under this gigantic glass roof, it has presented to public view flowers of all climates, vegetables and fruits of all seasons, roses by the side of cruciferæ, and the bananas of the intertropical regions, loaded with their luxuriant fruit, by the side of the green tree of our temperate climates. All these marvels, gentlemen, attest the greatest zeal and the most generous efforts. . . . . Examine the catalogue of our Exhibition; in addition to its agricultural value it has a great political signification. Have you not remarked with pleasure that names the most separated by civil dissensions have come together at this peaceful tournament? The reason is that agriculture has its rewards for every legitimate ambition, that all parties have an equally powerful interest in it, and that the prosperity of agriculture always gives the measure, and in certain respects the degree, of civilisation. . . . . Between us all there has been formed an additional bond, and you have just given a striking proof of it. During the course of this Exhibition devastation and mourning have fallen on our sister country. The Emperor, who is always the first to hear the cry of distress, was anxious in crossing over the inundated plains to give his assistance and his consolation to the sufferers, and to hold out to them the promises of France. You, without distinction of country and of origin, have shared in our sentiments of generous sympathy for the victims, and in admiration of our Sovereign. You have liberally united in our efforts to alleviate so many misfortunes. I thank you in the name of the Emperor and in the name of France. Before separating from you, gentlemen, I give you an invitation to meet here again next year; you may rely on the same kind hospitality, and allow us to hope that you will evince the same eagerness to attend here (Applause).

When the hon gentleman had concluded, M. Tisserand, and afterwards M. Madonet, called out the names of the persons to whom prizes had been awarded. The hon. Member for Cirencester, one of the successful candidates added great animation to the scene. We regret that we have not room for the list of prizes; but next week we shall engrave a few more groups of the prize animals.

## *METROPOLITAN NEWS.*

EXHIBITION OF AMERICAN PLANTS. Her Majesty, Prince Albert, the Princess Royal, and Prince Frederick William of Prussia honoured the exhibition of American plants, at Cremorne-gardens, with a visit on Monday. The Royal party arrived at the gardens about half past three o'clock, and were conducted by Mr. Simpson to the temporary building in Ashburnham-park, beneath which are displayed, in a charming artistic manner, several thousands of the richest specimens of rhododendrons, azalea, and other beautiful flowering plants. After promenading through the exhibition, her Majesty and the illustrious party ascended to the gallery at the north end, from which a magnificent view of one of the finest floricultural displays ever brought together may now be seen in full perfection. Her Majesty, having examined the collection, honoured Mr. Simpson by expressing the high gratification she had derived from her visit. The exhibition is daily attended by fashionable crowds.

INAUGURATION OF THE PRINTERS' ALMSHOUSES, TOTTENHAM.—On Wednesday last the almshouses for the reception of aged and infirm members of the London printing trade, which have just been erected in Wood-green, Tottenham, were formally inaugurated by a grand *déjeuner*, held in the grounds adjoining the building; the Earl Stanhope in the chair. The *déjeuner* was a splendid affair, which amounted to upwards of 200 guineas. In the evening a grand tea party, followed by a concert and a ball in celebration of the inauguration, took place at the Highbury Barn Tavern, at which upwards of 200 persons connected with the mechanical portion of the printing trade were present. William Clowes, Esq., treasurer, presided on the occasion. [We shall give a view of the building in our next number.]

HEALTH OF LONDON.—In the week ended on Saturday the deaths from all causes registered were 1063, of which 539 were deaths of males, 524 those of females. As the people of London the month of June is the healthiest in the year, and probably the mortality is now near its low as it will be this season. The average number of deaths in the first week of June during the ten years 1846-55 was 986; but, as the deaths of last week occurred in an increased population, it is necessary for comparison to apply a correction to the average, which makes it 1052. The present rate of mortality, therefore, exceeds the average, though only in a small degree. For six weeks, though the mean daily temperature has been occasionally above the average, the mean weekly temperature has been constantly below it. Last week the births of 866 boys and 831 girls, in all 1747 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1454.

ABOLITION OF CAPITAL PUNISHMENT.—On Monday night a public meeting was held at the London Tavern, convened by the Society for Promoting the Abolition of Capital Punishment, for the purpose of adopting a petition to the House of Commons in favour of Mr. Edwards's motion in Parliament on that subject. Edward Webster, Esq., barrister-at-law, was voted to the chair, and, in opening the proceedings, said they had lately had an extraordinary trial, and whether a righteous verdict had been delivered the intelligent public must determine. It was impossible, however, according to chemical laws, to say that Cook was murdered (Hear, hear). He contended that capital punishment was contrary to the law of God, did not prevent or diminish murder, but tended to increase it, and was unworthy of a civilised country. The Rev. Henry Christmas moved a resolution condemning capital punishments as unchristian, demoralising, and ineffective. Mr. Richards seconded the resolution, which was carried with two dissentients. A resolution against private executions was also agreed to.

## *IMPERIAL PARLIAMENT.*

### HOUSE OF LORDS.—MONDAY.

OUR RELATIONS WITH THE UNITED STATES.

Earl GRANVILLE, in reply to the Earl of CARNARVON, said he understood that Mr. Crampton had arrived, and that he brought some news of a private character, which was not very clear or intelligible. Her Majesty's Government had received no official communication. It was expected that letters from Mr. Crampton, to the 27th, would arrive that night or on the morning of the following day, and previous to receiving them they would have no further information to give.

The Mercantile Law Amendment Bill was recommitted, on the motion of the LORD CHANCELLOR, and, after some discussion, ordered to stand for third reading.

### HOUSE OF COMMONS.—MONDAY.

RELATIONS WITH THE UNITED STATES.

Major REID asked whether, after the intimation of opinion which had been given by the hon. member for Hertfordshire (Sir E. B. Lytton), the hon. member for Inverness-shire intended to persevere with the motion of which he had given notice, of his intention to move, upon the House entering on the consideration of the Army Estimates, with reference to the enlistment question?

Mr. H. BAILLIE: I beg to state in answer to the hon. member that it is my intention to call the attention of the House to the question adverted to as soon as official intelligence of what has taken place in the United States are received in this country. If that information should arrive before the Army Estimates come on I shall take the earliest opportunity of bringing the subject before the House.

THE OATH OF ABJURATION BILL.

The bill having been read a third time, on the question that the bill should pass,

Sir F. THESIGER moved the substitution of a new formula instead of the proposed modification in the oath of abjuration. In the formula the words "on the true faith of a Christian" were retained. Sir Frederic, in defending his amendment, avowed the intention of maintaining the barrier which excluded a Jew from taking his seat in Parliament. Consenting to remodel the oath of abjuration in all respects, so as to remove everything which was obsolete or had become useless from its tenor, he could not consent to un-Christianise the Legislature by an indirect process; and he called upon the advocates of Jewish emancipation to bring in a special bill for the accomplishment of their desired purpose.

Mr. BOWYER having briefly vindicated the loyalty of Dr. Cullen and other of the Roman Catholic subjects of the British Crown,

Lord J. RUSSELL opposed the amendment of Sir F. Thesiger. As a desirable change in the oath of abjuration was avowedly necessary, he saw no reason why every result of that oath which did not come within the original intention of the framers should not be obliterated. The words which now excluded the Jews from Parliament were originally directed only against the members of a political party and as its primary purpose involved no possibility to the Jews, so the existing character of the members of that faith showed that they did not deserve to undergo the penalty of exclusion which the oath accidentally and indirectly inflicted upon them. The formula as it stood, he objected, had not excluded Gibbon or Bolingbroke, and could not exclude avowed infidels, or any one whose conscience was easy enough to pronounce an affirmation which they did not believe to be binding.

Mr. WARREN could not consent to allow non-Christians to legislate for a Christian country. When a barrier which kept a Jew out of Parliament was once withdrawn, there could be no safeguard left against the entrance of Mahometans or Pagans.

Mr. BYNG supported the bill; as did Mr. T. DUNCOMBE, who enlarged upon the anomaly which resulted from the existing law, whereby a Jew was legally elected a member of Parliament, but prevented from fulfilling the legislative duties entrusted to him by his constituency.

The House then divided:—For the bill as it stood, 159; For the amendment, 110—49.

The bill was then passed.

CAMBRIDGE UNIVERSITY BILL.—The House, having gone into Committee, resumed the discussion of the Cambridge University Bill, and passed the remaining clauses of the measure, after a very prolonged conversation and several divisions on verbal amendments.

The Oxford University Bill was read a second time.

### HOUSE OF LORDS.—TUESDAY.

Mr. CRAMPTON.—The Earl of CARNARVON: I inquired last night of her Majesty's Government whether it was true, according to a rumour then in circulation, that a packet had within a few hours been received from the United States? My noble friend the President of the Council, who was then in the House, stated that the Government had at that time received no official information from America; but he added that they expected news either last night or this morning. I think if the noble Earl the Secretary for Foreign Affairs will state whether any important intelligence has been received from the United States, and—unless it be such as it would be unfit to communicate—inform your Lordships of its nature, it would be satisfactory to the House and the country.

Earl GRANVILLE: I have to state that I received last night a letter from Mr. Crampton, dated the 27th ult., and at the last moment saying that up to that hour he had received no intimation whatever of the intentions of the United States' Government (Hear, hear).

METROPOLITAN IMPROVEMENTS.—Lord RAVENSWORTH asked whether it was the intention of her Majesty's Government to introduce any new proposition for the accommodation of the public in this metropolis by improved facilities of communication, after the failure of the attempt to induce the House of Commons to entertain the estimate submitted to a Committee of the whole House for carrying out such a design?—The Marquis of LANSDOWNE stated that a modified and inexpensive plan for facilitating the communication between Regent's-park and Pall-mall was now under the consideration of the Government, and would in due time be submitted to the House of Commons.

### HOUSE OF COMMONS.—TUESDAY.

CAPITAL PUNISHMENT.

Mr. EWART moved for the appointment of a Select Committee to inquire into the operation of the law imposing the punishment of death. The main ground of his argument against capital punishment, he said, was its uncertainty. In all cases of infanticide by women a verdict of [illegible] was returned, and women generally were exempted from the punishment of death; while the leading ground in foreign countries for repeal, he contended, was strictly in conformity with the principles and precept of the Gospel. The question was one of expediency; punishment should be certain, criminal and repressive of crime; it should be as speedy as possible equal, not pressing with undue severity upon one while it was scarcely felt by another; it should be far as possible certain, and as mild as was consistent with safety, whereas, he maintained, experience had proved that capital punishment was ineffective, unequal, and uncertain.

The motion was seconded by Mr. HADFIELD.

Mr. DRUMMOND opposed the motion, observing that the precept contained in the words "Whoso sheddeth man's blood, by man shall his blood be shed," was too plain to be controverted.

Mr. BLACKMORE supported the motion.

Sir G. GREY said he had no other way expressed his opinion upon this question than that he could not offer anything new against the motion, which he hoped the House, for the sake of society, and not to lessen the protection thrown round human life, would not be induced to adopt. Sir Erskine not to press the adoption of the resolutions by the House, assuring him that the subject had received the attention of the Government, and that it was their intention to bring forward a measure upon the subject next session.—After a short discussion the motion was withdrawn.

### HOUSE OF COMMONS.—WEDNESDAY.

NAWAB OF SURAT BILL.—Mr. V. SMITH moved that the second reading of the Nawab of Surat Bill, which had been introduced as a private bill, should be postponed.—Sir F. KELLY moved as an amendment that the second reading should be taken forthwith.—A prolonged and miscellaneous discussion ensued, but ultimately Sir F. Kelly withdrew his amendment, and the further consideration of the bill was postponed to Wednesday next.

The Aldershott Camp Bill and the Oxford University Bill respectively passed through Committee.

The Insurance of Lives Bill was read a third time, and passed.

### HOUSE OF LORDS.—THURSDAY.

REFORMATORY AND INDUSTRIAL SCHOOLS BILL.—On the motion that the House go into Committee on this bill, Lord RAVENSWORTH said, that in consequence of some information which he had received within a very short time, he wished to postpone the further consideration of the question for the present.—Lord CLANCARTY expressed his hope that the operation of the measure would be extended to Ireland.—The Duke of ARGYLL wished to know whether it was also to extend to Scotland.—The Earl of HARDWICKE thought that so important a matter as the reformation of juvenile criminals should be taken up by the Government, and not left to the care of religious societies.—The Earl of HARROWBY said that this question had received the consideration of the Government, and they had come to the conclusion that reformatory institutions would be much better carried on under the supervision of private societies. He gave instances of several establishments of a similar nature successfully conducted without Government control.—Lord RAVENSWORTH said the bill could not apply to Ireland, for this reason, that it was designed merely to improve the management of establishments now existing, and there were no reformatories in Ireland. He agreed, however, with the noble Earl that it would be desirable to bring Ireland also under the beneficent operation of such institutions. It was intended to apply to Scotland.

### HOUSE OF COMMONS.—THURSDAY.

LOAN TO SARDINIA.—The CHANCELLOR of the EXCHEQUER brought up a message from the Queen informing the House that her Majesty had concluded a convention with the King of Sardinia for a loan of one million sterling on the same terms as the former loan.—It was agreed that her Majesty's message should be taken into consideration on Monday next.

OUR RELATIONS WITH AMERICA.

Mr. BAILLIE inquired when the Army Estimates would be taken, as he intended bringing on his resolution in reference to our relations with the United States of America, of which he had given notice?

Mr. WILSON said that it was proposed to take the Army Estimates to-morrow.

Mr. BAILLIE said that was scarcely a fair notice to him.

Mr. DISRAELI said that if the noble Lord at the head of the Government had been in his place, he should have asked him whether he had received any fresh information on this subject; for, although there had been no fresh arrivals, there was a general impression that a most important communication had been made to her Majesty's Government. He thought it was scarcely fair for the hon. gentleman (Mr. Baillie) to compel him to bring on his resolution to-morrow under such circumstances.

The CHANCELLOR of the EXCHEQUER said he had no objection to take the Army Estimates on Monday.

Mr. DISRAELI said the motion of his hon. friend would much depend upon the answer given by the noble Lord to the question he intended to propose to him.

The CHANCELLOR of the EXCHEQUER said that, at all events, he could undertake that the Army Estimates should not be taken to-morrow.

Mr. BAILLIE said that as circumstances had changed since he gave notice of his resolution, he should alter its terms before submitting it to the House.

SUPPLY.

The House went into Committee of Supply.

On £151,213 being proposed to make up the sum necessary for the purposes of education,

Sir G. GREY said that £300,000 had been already taken on account, leaving a balance upwards of £400,000. There had been a gradual increase to this vote since 1839, when it first appeared in the Estimates, being then only £30,000.

Sir J. PAKINGTON expressed his pleasure at the extension of the vote, and called attention to the present state and prospects of education in the country. He complained of the course taken by the House upon Lord J. Russell's resolutions.

Mr. BAINES supported the voluntary system, and moved that the vote be reduced to the amount of last year, namely, £839,000.

Mr. M. GIBSON and Sir S. NORTHCOTE opposed the amendment, but complained that the grant was not applied in such a way as to benefit the destitute classes.

Mr. ALCOCK called attention to the expediency of doubling the present rates of the capitation grants to schools, whether in parishes above or below 5000 population, and of reducing the minimum number of days of attendance from 176 to 168, in order to be entitled to capitation money; of increasing the grant to masters and mistresses on account of pupil teachers from £5 to £10 for the first pupil teachers; and of establishing a lower class of certificates of merit to teachers, in accordance with the suggestion of Archdeacon Allen.

Mr. HENLEY advocated the extension of the system of education so as to embrace the lowest and most destitute classes.

Mr. B. SMITH supported the amendment. He thought that the vote would have the effect of destroying all voluntary efforts for the promotion of education.

Mr. MILNES supported the original proposition.

After a lengthened discussion the amendment was negatived and the original vote agreed to.

### HOUSE OF LORDS. FRIDAY.

THE IRISH MILITIA.—The Earl of DONOUGHMORE inquired of the Secretary for War what the intention of the Government was with respect to the Irish Militia. He thought that, in the present state of affairs, it would be unwise to disembody all the Irish militia regiments. It was intended to send the German Legion to the Cape of Good Hope to colonies it. Now, he thought the Irish Militia were entitled to the first equal favour at the hands of the Government.—Lord PANMURE did not see what there was in the condition of Ireland which would render it necessary to take a different course with respect to the Irish militia from that of the English and Scotch. It was therefore the intention of the English and Scotch. It was therefore the intention of the Government to disband the Irish Militia as soon as they believed circumstances would admit of doing so; nor had he any apprehension that members of that force would be found in arms against their country.

OUR RELATIONS WITH AMERICA.

The Earl of DERBY inquired whether within the last two days her Majesty's Government had received official information from the United States' Government to the effect that Mr. Crampton and three British Consuls had been dismissed from the United States; and also, if so, what course it was intended by the Government to pursue in consequence?

The Earl of CLARENDON said that on the day before yesterday Mr. Dallas, the American Minister at this Court, communicated to him a despatch which he had received from his Government to the effect that the [illegible] of her Majesty's Government on the enlistment question was [illegible] by the United States Government. The despatch [illegible] Mr. Crampton and the Consuls was [illegible] the President had intended to [illegible] the three British Consuls. As to the steps which her Majesty's Government might pursue, he could not say at present to what extent that point. With regard to the [illegible] America Mr. Dallas informed him that the Government thought there were certain questions in connection with [illegible] which could be [illegible] arbitration [illegible] which the paper was [illegible].

### HOUSE OF COMMONS.—FRIDAY.

THE AMERICAN QUESTION.

Mr. DISRAELI asked the noble Lord at the head of the Government whether our relations with America had altered; and if so, what course the Government intended to pursue?

Lord PALMERSTON said that the Earl of Clarendon had received from Mr. Dallas a despatch to the effect that the American Government were satisfied with the explanations of the British Government, though not altogether satisfied with Mr. Crampton's conduct, to whom they intended to take with regard to Mr. Dallas, and he should put a question accordingly next Monday to that effect (Hear, hear).

The House then went into Committee of Supply.

ST. JAMES'S-PARK.—Lord PALMERSTON moved a grant of £4500 for making a carriage-road from the gate, near the German Chapel, to the Mall in St. James's-park. Also a further grant of £3500 for the erection of a suspension bridge for foot passengers over the water in the inclosure of St. James's-park.—Mr. L. DAVIES moved that the first vote should be reduced to £2000, on the ground that the proposed road could be made by a most eminent contractor for such a sum.—The amendment, however, was not pressed, and the first vote was agreed to. Upon the vote for the bridge being proposed, the Committee divided, when the vote was carried by a majority of 183 to 95.

The remainder of the night was occupied by a discussion on several other votes.

## MUSIC.

THE principal event of the week at Her Majesty's Theatre has been the appearance of Madame Albertini, on Monday night, in the character of *Lucrezia Borgia*. Her performance was highly successful, and justified the reputation she had gained by her début in the "Trovatore" as a powerful tragedian and an accomplished singer. But she experienced the disadvantage which, while Grisi remains on the stage, must be felt by every other performer who undertakes that part. Grisi has so completely embodied its dark and terrible grandeur that the character and the actress are actually identified: we are unable to dissociate them; and cannot help feeling that whoever is not Grisi is not *Lucrezia Borgia*. This feeling is at variance, it is true, with dispassionate criticism. But it is not to be resisted; and it would operate, we believe, even were we to suppose the appearance of an actress superior to Grisi herself. It is not surprising, therefore, that Madame Albertini's reception was somewhat less enthusiastic in *Lucrezia Borgia* than it had been in *Leonora*; but it was a warm and unanimous recognition of her great merits. She was highly applauded throughout; and at the conclusion of the final scene, when *Lucrezia* throws herself distractedly on the dead body of her son, the curtain fell amid acclamations from all parts of the house.

Piccolomini's triumphs go on increasing. Every repetition of the "Traviata" is a scene of greater and greater excitement. The theatre is uniformly crowded to the doors; the boxes are a blaze of rank and fashion; every night when the siren appears on the stage the house "rises at her;" even the ladies start to their feet and wave their handkerchiefs; and when she retires it is amidst thunders of applause and showers of bouquets. Nor is a jot of this admiration thrown away—it is wholly and justly due to a combination of loveliness and genius such as has rarely appeared on the boards of any theatre.

Another star of the first magnitude will rise on Saturday evening—Johanna Wagner. She is to appear as *Romeo*, in "I Capuletti ed i Montecchi." Many circumstances concur to make this lady's début in England an occurrence of most extraordinary interest.

LITTLE is doing at the Lyceum in a musical point of view; the attention of the management, as well as of the public, being seemingly engrossed by the splendid performances of Madame Ristori, which we notice elsewhere.

A THIRD Italian Opera has started into existence on the other side of the river. It is established at the Surrey Theatre, and is, we understand, an enterprise of the eminent house of Cramer and Beale. This house possesses, what has generally been wanting in the case, the means of carrying on the undertaking in a substantial manner; and the commencement indicates both liberality and judgment. There is obtained a most essential requisite of an opera house, an excellent orchestra and chorus, under the musical director is the able and experienced Mr. Alfred Mellon; and the company of performers is adequate to the production of any opera. The theatre opened on Monday evening, with "Norma," admirably performed in every respect. The Druid priestess was personated by Madame Lorini, an American lady, hitherto unknown to the English public even by name. She imitates Grisi, but successfully; and her performance is none the worse on that account. Her acting showed energy and feeling; and her vocal attainments are of a high order. The part of *Pollio* was sustained by her husband, Signor Lorini, a performer of considerable powers. Both of them were entirely successful. Mdlle. Sedlatzek (whose merits are known to the public) was an interesting *Adalgisa*; and the part of the chief priest, *Oroveso*, was effectively sustained by Signor Forini. In regard to the scenery, decorations, and *mise en scene*, every thing was worthy of the spirited *entrepreneurs*. We observe that the company is numerous and strong, including Madame Caradori, Monsieur and Madame Gassier, Madame Rudersdorff, and other eminent artists. The undertaking well deserves success, as it will furnish the Surrey public with an entertainment of a high class on very moderate terms; though we cannot help wishing that English, not Italian, Opera had been the object of the enterprise.

THE fifth PHILHARMONIC CONCERT, on Monday evening, was of even more than usual brilliancy. It embraced two of the finest symphonies extant: Mendelssohn's in A (the Italian Symphony) and Beethoven's in B flat; Weber's overture to "Oberon;" Mozart's scena, "Non so donde viene," and Haydn's "Spirito gentil," sung by Miss Dolby; and the air, "Vedrò mentrìo sospiri," from "Figaro," sung by Mr. Weiss. But the most remarkable features of the concert were the two concertos, the one on the piano, the other on the violin, performed by Miss Arabella Goddard and Signor Sivori. The first was Mr. Sterndale Bennett's, in C minor, a beautiful work, which our youthful pianist executed in a manner which transported the audience. She was applauded with the utmost vehemence, and recalled, after she had left the orchestra, to receive further tokens of admiration. Sivori played one of the concertos of his illustrious master, Paganini, and played it as no one save Paganini himself could have done. It was a combination of the most marvellous achievements with the most exquisite beauties, and excited mingled wonder and delight. The Philharmonic season terminates on the 23rd of this month, when Schumann's celebrated cantata, "Paradise and the Peri," is to occupy the whole evening. The principal soprano part is to be sung by Madame Goldschmidt Lind; and the Queen is to honour the concert with her presence.

MADAME GOLDSCHMIDT LIND has announced three farewell concerts at Exeter-hall before her final departure from England. The first, on Wednesday evening, was one of the most brilliant she has ever given—remarkable, not only for her own vocal performances, but for the richness and variety of the programme, and the completeness of the whole entertainment. Madame Goldschmidt was supported by Madame Viardot and Signor Belletti. With the former she sang the grand duet in "Semiramide;" with the latter, the comic duet, "Per pieare alla Signora," in the "Turco in Italia." She sang the brilliant finale to the "Sonnambula," a charming air from Gluck's "Armida," Spontini's "Morning Hymn" from "La Vestale," "John Anderson my Jo," and the Swedish Echo-Song. She never sang with greater splendour or more exquisite beauty; and her efforts were received by the immense assemblage with transports of enthusiasm. M. Otto Goldschmidt played Weber's "Concert-Stück" and the solo part in Beethoven's Choral Fantasia, maintaining his well-earned position as a pianist of the first class, and receiving his due meed of applause.

MDME. BASSANO and HERR KUHE'S ANNUAL CONCERT. This distinguished entertainment was held at the Hanover-square Rooms, on Monday last, at two o'clock in the afternoon. The programme, besides a variety of popular pieces, comprised those of two of the most celebrated vocalists of the day—Mdme. Viardot Garcia and Mr. Sims Reeves. In the final rondo from the "Sonnambula," Mdme. Viardot proved that Mdme. Alboni is not the only contralto who can render that difficult soprano song to perfection. In the comical duet, "Signor F. Lablache, mi dica," Mr. Leicine di Cianchi" she moved the audience to convulsions of laughter, and confirmed her claim to be considered the most artistic vocalist of her time. She had yet another great feat to prove and illustrate to her audience—her pre-eminence as a ballad singer. Meyerbeer's "Chanson d'Amour," "In my little native lake," gave occasion for this. Not only was every note of the charming melody clearly enunciated, but every word was pronounced with a freedom and distinctness which would certainly have delighted the poet had he been present. Vocalists we have in plenty; but true singers like Madame Viardot, who give a meaning and expression to what they sing, are scarce. Mr. Sims Reeves contributed two songs, "Della sua pace," by Mozart, and "Good night, beloved," by Balfe, both of which he delivered in his best style. The wonderful qualities of his singing are as well known as those of Madame Viardot, and his position is as secure and uncontested. When we say, therefore, that he was never in better voice than on this occasion we eulogise His performances in the strongest terms, and account for the enthusiastic reception which they received. Madame Bassano sang Handel's "Lascia chio pianza" with much power. In the duet with her sister she had great success; as well as in the little Scotch ballad which she declaimed in a manner to gladden the hearts of the "Northerners." Herr Pischek sang the "Kleine Recrut" exquisitely; it was unanimously and vociferously encored. Of the other vocalists, Miss Sherrington, Herr Reichardt, and Signor F. Lablache, made highly favourable impressions. Miss Arabella Goddard and Herr Kuhe performed several solos on the pianoforte, as well as a duet on two pianos—airs from the "Etoile du Nord." The admirers of prestidigitation had ample scope for enthusiasm on this occasion, and in a few instances the audience were favoured with some charming snatches played without affectation and with natural grace. The concert was fashionably and numerously attended, and concluded at a protracted hour.

A new musical society has been formed, called the VOCAL UNION, for the performance of English glees and madrigals. In plan and object it resembles the English Glee and Madrigal Union, which for a number of years gave such admirable performances, but which, we regret to hear, is now broken up. The members of this new society are Miss Marian Moss, Mr. Foster, Mr. Wilbye Cooper, Mr. Montem Smith, Mr. Winn, and Mr. Thomas; with Mr. J. L. Hatton for their accompanyist on the pianoforte. Their first concert, on Wednesday morning, at the Hanover-square Rooms, attracted a large audience, and was very successful. It consisted of an excellent selection of glees and madrigals, chiefly of the more modern masters, Webb, Horsley, Dr. Cooke, Goss, Elliot, Linley, and Bishop, all of which were sung with great purity, expression, and effect. We wish the Vocal Union all success, for its object is the cultivation of a beautiful and truly English class of music which is now-a-days too much neglected.

## THE THEATRES, &c.

LYCEUM.—The grandeur of Madame Ristori's style of art is indisputable. There is a largeness in her action, and a general breadth of manner, that especially harmonise with classic conceptions. She is decidedly great in the ideal. One of her important points in the "Medea" occurs in the third act, when she apostrophises the statue of Saturn, the child-eating, homicidal god, whose example appears to her excited imagination to consecrate the dreadful purpose of her vengeance. She requires opportunities of this sort to exhibit her genius in its full might. On Wednesday the tragedy of "Maria Stuarda" gave little scope to histrionic fancy. The Italian version of André Maffei spares nothing, but inflicts the whole tediousness of the German original. The historic play is subject to many difficulties, and under Schiller's treatment these difficulties are by no means diminished. He allows but little for the play of the poetical, and seeks rather in the page of the historian for his topics and his situations. We have in "Maria Stuarda" the political relations of the heroine set forth with technical precision; but little space is left for dramatic situation. Only one scene, therefore—that of the accidental meeting of the Queens at Fotheringay—exists in which the poet has contributed invention, and the actress has occasion for ideal action. This occasion Mdme. Ristori availed herself of to the full extent, and again we recognised the sublimity of the artist. The whole act is beautifully composed by Schiller. First, there are the lyric raptures with which the ill-starred heroine welcomes her temporary deliverance from her imprisonment:—

Oh, ch' io disseti l'affannata lena
Nell' aperta de' cieli aura serena!
O verdi amiche piante, io vi ringrazio!
Voi mi coprite colla fronde oscura
Le dolorose mura
Del mio carcere orrendo! Io vo sognarmi
E libera mi sento.
Perchè la dolce illusion rubarmi!

But the entire ode is exceedingly fine, and Mdme. Ristori revelled in its delicious diction, rhythm, and feeling. The building-up of the scene is most artistic. The reluctance of *Mary* to meet the shock of an interview so long desired, and the want of preparation and plan of which she becomes fatally conscious at the last moment, is well imagined. She cannot even go through with the ceremonial proprieties of the meeting; but betrays her natural mood when court etiquette and prudence would demand its repression. At length she bows at the feet of the indignant *Elizabeth*; but not submissively, but with an averted eye which furtively ascribes to the overhanging heavens the motives for the apparent homage. *Elizabeth*, on her part, cannot refrain from topics of insult; then, indeed, *Mary* attempts self-restraint, and for a time achieves it. This, however, suits not *Elizabeth's* design, and she goads on her victim to reprisals. Then the long pent-up indignation finds impetuous way, and *Mary* regains the sovereignty of her position, and exults over the tyrant whom circumstances and not right has invested with injurious power. This was magnificently executed, and at once places Madame Ristori on the same level with Rachel. The final scene of *Mary's* execution, with its religious pomp and preparations, is one of those situations which, on the English boards, are scarcely tolerable: but, if anything could have induced an English audience to be pleased with such a scene, the excellent arrangements with which the groupings were managed would certainly, in this instance, have succeeded. The most perverse to the recurring formulas of leave-taking, the eternal farewells, and the religious confession to which the Royal martyr is condemned. The grace, the dignity, the piety of the heroine was abundantly illustrated, and the truth of the picturesque and quietly preserved. Mdme. Ristori was supported was not exactly calculated to assist her materially. Mdme. Barsacani certainly did not shine as *Queen Elizabeth*, and Signor Gleck did not exactly please us as the *Earl of Leicester*. Nevertheless, the part will prove serviceable to Mdme. Ristori's fame, as proving that she can sustain a character, depending not on melodramatic action, but relying for its effect entirely on its historic and dramatic elaboration, requiring minute attention in the artist, together with all the resources of elocution, and all the nuances of impassioned attitude, to avoid the natural monotony of the same state of sentiment prolonged and repeated from scene to scene. In the "Medea" we have witnessed the artist in storm and whirlwind of emotion; but in "Maria Stuarda" we behold her in the calm and persistent energy of contiguous sufferings, and the dominance of principle overruling the issues of life and death—the sublime, not of action, but of thought and feeling. In Mdme. Ristori, accordingly, we saw the royal penitent atoning for her former guilt, by suffering for a crime of which she was innocent; and this blending of opposites bequeaths a quiet state of interest in which the great performer may triumphantly illustrate the crowning grace of all art—repose.

OLYMPIC.—A new piece, under the title of "The Fascinating Individual" was produced on Monday. Its merit consists only in the opportunity which it furnishes to Mr. Robson of impersonating an original character who believes himself to be such an individual as the title of the piece implies. A little man with a long aristocratic name, *Mr Adolphus Fortescue*, is in danger of an enforced marriage, from which he proposes to escape by rendering himself exceedingly disgusting to the lady and her family. Assuming an extravagant costume and affecting foppish manners and a habit of punning, he at first surprises his intended and her father, but is in danger of being considered amusing. This, of course, flatters his vanity, and accordingly his faith in his personal attractiveness grows stronger and stronger. To counteract the influence of the irresistible persons charm, he writes a pseudonymous letter, vilifying his own character, which his intended father in-law at once repudiates as a masterstroke invention of some enemy," so naturally does the self-traducer assume the appearance of innocence on being sorrowfully shown its contents. Other absurdities follow too numerous to detail; and the action is further complicated by the appearance on the scene of the lady's real lover and his own real mistress, and after some flirtation and jealousy, and a pretended duel, the parties get properly paired. The merit of these pieces in general, from which the present is not exempt, is that they proceed upon insufficient motives, and involve improbable conditions. If the spectator can reconcile himself to inconsistencies and circumstances which in actual society never can take place, then the humour of Mr. Robson's acting may be thoroughly relished. Fortunately the traits of character delineated are new in the main, so that we are not presented with a favourite actor in all phases of old parts somewhat differently combined: but there is sufficient sameness in the individuality portrayed, as well as in the piece, which was completely successful.

HAYMARKET.—Mr. Buckstone has revived one of the best of his own comedies, and the experiment has been so far successful that the piece is likely to have a considerable run. The drama of "Single Life" —the piece now revived—was written by Mr. Buckstone as a companion to that of "Married Life;" in the latter of which he was careful to introduce none but married persons, and in the former none but lovers. The characters of the present comedy are all bachelors and spinsters, the more prominent being a bashful lover, played by Mr. Buckstone; a singing lady, played by Miss Lavine; and a woman-hating bachelor, and a man-hating spinster, played respectively by Mr. Chippendale and Mrs. Poynter. The latter at length marry on the ground of mutual hatred, which promises fair to terminate in a softer sentiment on better acquaintance. The bickerings of the lovers are ingenious and amusing, and in the course of the three acts of which the play consists there are some good situations and much racy dialogue. Mr. Buckstone is fond of extravagance in his incidents, and this comedy is not exempt from the fault; but its literary tone is on the whole more elevated than usual, and the witty author has good reason to be proud of his bantling.

---

Melbourne having been deprived for 108 days of any advices from England, the Legislature of Victoria has been urged to take measures for the establishment of a regular and speedy steam-packet communication, and the sum of £75,000 has been voted for that purpose.

A Consistory will be held at Rome on the 16th inst. for the proclamation of five cardinals; two of them are Austrians and three Italians.

The Roman Government is trying to raise recruits in Switzerland, but the higher pay of England has monopolised all the available volunteers. The Papal Government requires 10,000 men to complete its musters.

## LATEST INTELLIGENCE.

### DISMISSAL OF MR. DALLAS.

The following ominous article appears in the *Morning Post* of yesterday morning:—

We have reason to believe that any doubt which remained upon the public mind as to the statement which we made ten days ago, of the approaching expulsion of Mr. Crampton from the territory of the United States, is now definitely removed. The United States' Minister in London has, we understand, communicated to her Majesty's Government the determination of the Cabinet of Washington to hold no further diplomatic intercourse with Mr. Crampton, and to withdraw the *exequatur* from the three Consuls who acolleged to have infringed the laws of the Union. This declaration, we believe we may state, is accompanied by offers ostensibly conciliatory, inasmuch as Mr. Dallas has received authority, if we retain him here, to treat with full powers concerning the questions at issue in Central America, and in case of non-agreement with Lord Clarendon to refer the matters to an arbitrator to be jointly agreed upon.

The American Government has thus, in the rash enforcement of its policy, taken the dangerous step of insulting England, accompanying the outrage by an offer which is intended to bribe us into quiet acquiescence.

This is the real purport of this act, so conciliatory in appearance, but in appearance only. Substantially it is of no value, because the American Government must be be well aware that it is impossible for the Cabinet of this country to discuss any matters with Mr. Dallas while Mr. Crampton is forcibly suspended from his functions in the United States.

We maintain that neither this country nor Mr. Crampton, in his capacity of representative of this country, has done anything to justify this extreme measure; and we cannot, consistently with what is due either to the country or to Mr. Crampton, consent to accept a specific and direct insult for the sake of a pretended equivalent in the shape of the concession of an arbitration of the Central American question, which is a matter standing entirely upon its merits, and totally unconnected with Mr. Crampton, or with the acts imputed to him.

Under these circumstances there is but one course which the country can expect from her Majesty's Government. The dismissal of Mr. Crampton must be followed by the dismissal of Mr. Dallas.

---

THE INUNDATIONS IN FRANCE. A public meeting was held yesterday at the Egyptian-hall, Mansion-house, for the purpose of expressing sympathy with the sufferers by the late inundations in France, and of aiding the subscriptions now being raised in Paris for their relief. The Lord Mayor presided; and on the platform were Mr. T. Baukey, M.P.; Mr. V. Scully, M.P.; Baron Rothschild, Sir F. Baring, M.P.; and other influential persons. Resolutions appointing a committee were adopted, Mr. J B Heath, Mr. Raikes Currie, Lord Ravensworth, and Sir Moses Montefiore being the principal speakers. The Lord Mayor announced that he had already received subscriptions to the amount of between £4000 and £5000 (Applause). A committee was then appointed, of which the Lord Mayor was nominated treasurer, to receive subscriptions.

SIR GEORGE GREY AND W. PALMER.—We reproduce in another column the letter which Sir George Grey has addressed to Mr. John Smith, stating that he had heard nothing to induce him to interfere with the fulfilment of the sentence of the law in the case of William Palmer. Sir G. Grey says he have every reason to believe, still adheres, in common with every one who regards the case though the medium of reason and common sense, to this determination. The execution of the convict will therefore take place at Stafford to-morrow morning. *Globe* of Friday.

---

### BOSTON YACHT-CLUB REGATTA.

THE first regatta for the season of this flourishing club took place on Thursday week. The respected representative for Boston, Mr. Herbert Ingram, presented to the club a very handsome fifty-guinea cup, leaving it to the members to dispose of as they thought proper. They judiciously determined to throw it open for competition among the yachts belonging to the club, charging it per contra with the money thus raised forming a second prize, to be contested for by yachts under five tons burden. There were eight entries for the Ingram Cup, and four for the smaller prize.

THE BOSTON YACHT-CLUB REGATTA PRIZE CUP.

Early on Thursday morning Skirbeck Quarter presented a very gay appearance, in its assemblage of steamers, sloops, yachts, and smacks waiting to take in passengers. About 8.30 a.m. the various trains having arrived, and each boat having received its fair number of passengers, the various craft moved down the river to Maudester Sluice, and rounding point On rounding the point near the Packhouse, the following yachts were observed lying off the Cut ready to start:—*Phœnix*, 6 tons, Mr. Bagg, Spalding; *Waterwitch*, 15 tons, Mr. Long, *Petrel*, 17 tons, Mr. W. H. Lewin (commodore); *Kestrel*, 7 tons, Mr. J. G. Marshall, *Magic*, 16 tons, Mr. C. Anderson (vice-commodore). Besides these, the following yachts were entered but did not start:—*Eugenie*, Mr. W. H. Green, *Peacock* (Mr. Anderson), and *Jenny* (Mr. J. S. Wilkinson, Lincoln).

Second Class. *Waterwitch*, 5 tons, Mr. J. Pilley; *Nautilus*, 5 tons, Mr. Plummer; *Arrow*, 3 tons, Mr. E. A. Hildred; *Widgeon*, 3 tons, Mr. J. C. Tomkin.

At starting the *Magic*, having the windward side, was the first to take the lead, followed in quick succession by the *Waterwitch* and other the yachts, the *Red Rover* bringing up the rear; this position she occupied while she was in the race, but at length her career was cut short by her running upon the Ants Sand, where she remained until the tide turned in the evening. A few minutes after the first yachts had started a third gun was fired, and the small yachts were off, the *Nautilus* leading the group. All the rest followed in a small, the steamers bringing up the rear. The river now presented a coup-d'œil of great beauty. Corporation Point and the New Cut were soon passed; and at length the open water in Hobhole was reached. Here the course was altered, and the remainder of the proposed new channel to Clayhole was pointed out, and the probability and desirability of this important improvement in the haven were discussed. In the meantime the yachts had reached Ribow Buoy, the *Waterwitch* leading, followed with scarcely the interval of a boat's length by the *Magic* and the *Kitten*. Up to this point it had all been plain sailing before the wind; now came the tug of work, the next twenty miles of the course being almost dead in the wind's eye. Squaresails, stunsails, and other fly-away gear were "doused," and each yacht was reduced to its legitimate canvas—mainsail, gib, foresail, and gaff. As the yachts neared the Skull Ridge the promise of more wind was fulfilled, and each vessel was obliged to reduce sail. Back again to the winning post (the upper sea-head buoy), there was a fair wind, and another change of sails was the consequence; the modest gear which had been used for beating down was discarded, and every stitch of canvas was again the order of the day (See the Illustration). While tacking, the *Red*

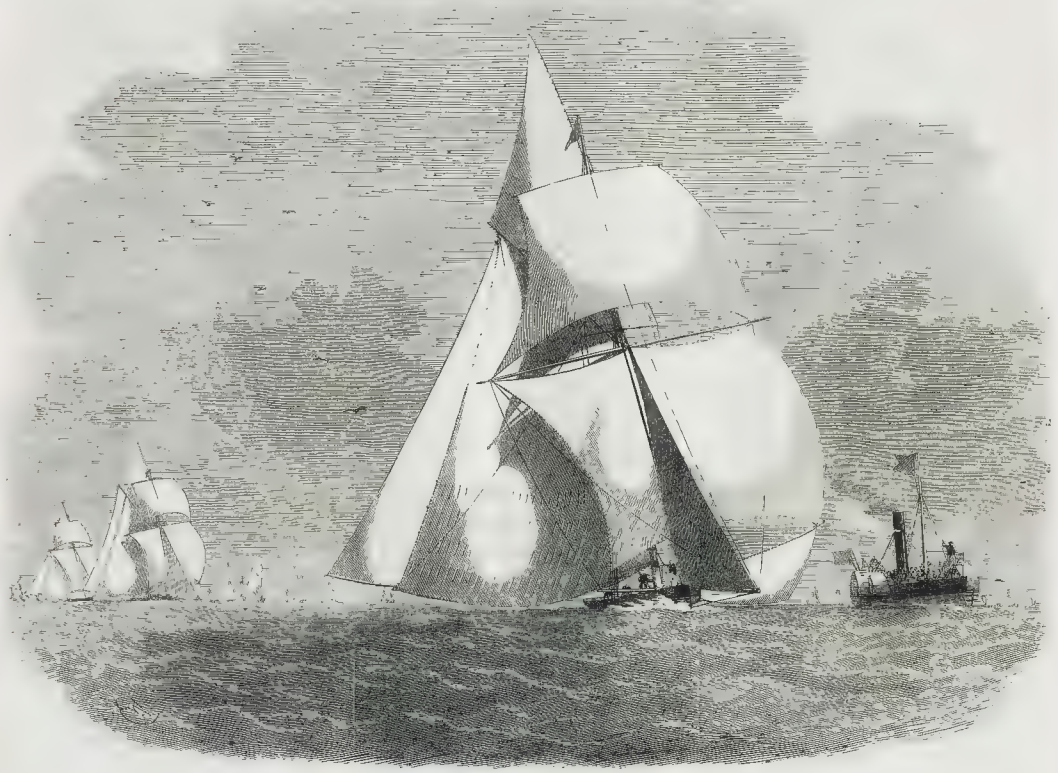
BOSTON REGATTA.—THE YACHTS STARTING FOR THE CUP.

*Rover* ran ashore, but at the time she was so far astern as to have almost lost sight of the other yachts. They rounded the winning-buoy in the following order:—*Waterwitch*, 2.12½; *Magic*, 2.21; *Fairy*, 2.27; *Kitten*, 4.2.

The second class, who ran a shorter course, arrived at the winning-buoy as under:—*Arrow*, 1.26; *Waterwitch*, 1.37; *Nautilus*, 1.39. In the evening the yacht squadron returned to Boston, when the banks, for a distance of four miles, were almost lined with spectators; it is calculated there were from 5000 to 6000 people present.

In the evening the members and friends assembled at the clubhouse, when the cup was presented to Mr. R. Thorpe, the owner of the *Waterwitch*. The health of Mr. Ingram was proposed by Mr Grant, one of the owners of the winning yacht; the toast was drunk with enthusiasm, and various other toasts followed.

We have engraved the Prize Cup, which is of tasteful design, from the establishment of Messrs. Elkington and Co.



BOSTON REGATTA.—THE "WATERWITCH," WINNER OF THE CUP, OFF PRINCTON SHORE.

## ST. ALBANS ABBEY.

THE restoration of St. Albans Abbey is the work upon which the religious as well as the archæological interest of the educated classes in England is now concentrated. Regarded as the proposed centre of a see whose creation is deemed most desirable by all who wish to behold the Established Church legitimately developing her energies, St. Albans may be considered as the nucleus of one of the most creditable efforts Churchmen have made for many a year. A yet more general but not less earnest desire has been manifested by the lovers of magnificent antiquity, of stately architecture, of edifices rich with the associations of past ages, that this noble fabric should be preserved to our successors in a condition which shall testify that our own age was neither unenlightened nor neglectful upon the subject of Christian art.

The Abbey is as well known as any of our cathedrals to the architect and the antiquary, but a few details of its history and character may not be useless to the general reader; for whose ben fit, also, we present two original Views of the building — one of them showing its peculiar external form, and immense extent of nave, and the other giving the chancel, pulpit, and some of that portion of the edifice used for the services of the Church.

A very numerous and influential meeting was held in the Townhall of St Albans early in April, when Lord Verulam, supported by a number of other noblemen and gentlemen, presided. The objects of this meeting were to consider the best means of restoring and upholding the Abbey Church, and obtaining for it the dignity of a cathedral. Among those who attended were the Marquis of Salisbury, Lord Robert Grosvenor, Lord Robert Cecil, Sir Edward Bulwer Lytton, the Rev. Dr. Nicholson (the Rector of St. Albans, and one of the ablest labourers in the good cause), Archdeacon Robinson, and Archdeacon Grant. The Bishop of the diocese (Rochester) would have been present but for domestic affliction. At this meeting a most interesting report by Mr. G. G. Scott, the eminent architect, was read, a document which we have taken previous occasion to commend to our readers, as embodying the whole case and claim of the Abbey.

The original church was founded on this site in memory of Alban, the first British martyr. This Christian hero was born at Verulam in the third century, and went to Rome, where he served for seven years as a soldier under Diocletian, and after his return and conversion was beheaded during the furious persecution waged by that Emperor against "the people called Christians." The place of the martyr's death was originally named Holmhurst, but the name was afterwards changed to St. Albans in his honour. The first church was erected in the days of Constantine, and, from its smallness, Mr. Scott suggests, escaped destruction at the hands of the Pagan Saxons, and was standing when they embraced Christianity. King Offa most probably rebuilt the church, and certainly did much for it, besides restoring to it the body of Alban, which had been removed during the Saxon invasion. The last two Saxon abbots of the monastery founded by Offa collected immense stores of materials for rebuilding the church, and the first two Norman abbots executed the work in a style of great magnificence. Brady's "Clavis" states that in 1257 some workmen repairing the building found the remains of some sheets of lead, containing relics, with a plate of lead over them, in which was cut the following inscription:— "In hoc mausoleo inveniuntur ossa venerabile corpus Sancti Albani protomartyris Anglorum." When King Henry the Eighth suppressed the monasteries, a rich clothier named Stump bought the church for £400, and made it a parish church for the inhabitants. Even when its most precious days were gone, the people who worshipped in it seem always to have retained an affectionate reverence for the glorious old pile, and to have exerted themselves to obtain the means of preserving it. Some Government assistance was once or twice obtained, but it is of late years only that the work has been done on a large scale; and to the present rector, Dr. Nicholson, it is due that the work of the *edax rerum* has been effectually delayed. The

ST. ALBANS ABBEY: THE CHOIR AND HIGH ALTAR.

ST. ALBANS ABBEY, FROM THE SOUTH-WEST.

grand effort now to be made would have been far more difficult and costly had he not been so sedulous—*vigilans in cede*.

A few words from Mr. Scott's report will convey an excellent idea of the edifice which it is now proposed to restore:—

The church, as built by the early Norman abbots, was as large probably as almost any abbey, church, or cathedral of that period: gigantic as many of them were. It was built on a beautifully symmetrical plan. The nave, or western arm of the cross, alone measured internally no less than 270 feet in length, and the total length of the church appears to have been as much as 450 feet. It had no less than six spidal chapels, besides the great apse containing the high altar and the shrine of St Alban: and its dignity externally was enhanced by three vast towers; one at the intersection of the cross, and two at the western facade. The whole edifice, in its perfect and unaltered state, must have been dignified and noble in the highest degree; though (being built entirely of Roman brick, and covered both within and without with an incrustation of plaster) its beauty was the result of its proportions, symmetry, and fitness, rather than of architectural detail: the stern severity of its interior was, however, relieved by costly accessories, and by the enrichment of every part of its surface with painted decorations, of which remains may still be traced, wherever the early surfaces remain. In the thirteenth and fourteenth centuries, however, great alterations were made in the architecture of the church. The western facade was rebuilt in the Early Pointed style, with three porches of great magnificence; the arcades of the nave were in part reconstructed in the Painted style, and on designs of extreme dignity and beauty: the eastern arm of the church was in great measure rebuilt on a design differing from that of the newer portions of the nave, but not falling short of them in beauty; while still further eastward the church was extended by the addition of a group of exquisite chapels, of which the Lady Chapel was the most conspicuous, and of which the architectural detail equals in beauty and refinement anything which can be found in England. The church, thus extended, exceeds in length any other church or cathedral in Great Britain—and though, in other dimensions, it falls short of York and some other of our greatest churches, it (as a whole) would rank in point of extent among our principal cathedrals. During its whole history as an abbey church, it was from time to time enriched by accessories, such as monuments, screens, &c., &c., so that, even in its present condition, it is a perfect study of the architecture of the Middle Ages, possessing specimens of the most remarkable kind of every period of English ecclesiastical architecture

This is the noble fane with which it is described to deal, not in an irreverent spirit, but for its conservation. Any attempt to "smarten up" the old pile is earnestly disclaimed. Repair what is venerable, "restore where beauty of form is needed," says Mr. Scott. And the heartiness with which the country is responding to the St. Albans appeal is most gratifying. Several thousands have already been raised, and it is felt that the case has but to be laid before open handed Englishmen to ensure their ready liberality. We desire to do all in our power to circulate that appeal. To those who know the work done, and how that work has stood for ages, and is still a thing of beauty. You will then need no further request for your aid, but will ask where it can be sent. We answer by anticipation, to Messrs. Hoare, in Fleet-street, or to any member of the committee, whose names may be procured by writing to Lord Robert Cecil, who has undertaken the honourable office of its secretary

"The blood of the martyr is the seed of the Church," saith, or we mistake, an inscription in the Roman arena where the old Christians died rather than sell the sacred books in the days of the wild beast. When Alban, the humble soldier, knelt to die at Holmhurst, fifteen hundred years ago, not even in "the last ecstasy of the martyr" could he have foreseen how long the memory of his noble example should be treasured by his countrymen. No memorial can take a nobler form than that of the house of prayer, and therefore, in memory of what Alban did, let us unite and preserve to our descendants the unrivalled "MAUSOLEUM PROTOMARTYRIS." SHIRLEY BROOKS.

## *NATIONAL SPORTS.*

ASCOT has been anything but "royal" in the tone of its meeting this year, as we rarely remember a duller one. Fly-by-Night, who was "not wanted" for the Derby, and had made the best use of his time at Leatherhead since his memorable "nowhere," boldly vindicated the Flying Dutchman *prestige*, and made perfect mincemeat of Canobie (Wood Hatstead's longer distance), Aleppo, and Bird-in-Hand, the third, sixth, and seventh horses in the Derby, over the New Mile. After his hour's rest, Yellow Jack, with 5 lb. extra, tried to cut him down over the Swinley course, which is just the Derby distance, but was caught at the Ditch and Stand and beaten cleverly. Taking into account the extra weight, and the fact of Yellow Jack having to make his own running, we may perhaps set down the chestnut as about 3lb. the better animal of the two, so that Fly-by-Night, even if he had been prepared for it, could not have won the Derby. Still, not a few of the Tykes, who are smarting from the effects of misplaced confidence, will persist in thinking so, and the raw will be quite as malignant as it was in the case of Songstress. Yellow Jack has thus run second four times this year in races whose value amounted to nearly £10,000. Fly-by-Night's off fore-leg gave way three strides beyond the post, after his second victory, and it was all he could do, aided by the after application of a pocket handkerchief bandage, to limp back to his stable. Luckily for John Scott, the St. Leger is at last within his grasp with Lazzoletto, or Fly-by-Night's breakdown would have been a heavy blow. The latter has only been beaten once in his five races, which have brought Mr. Rowes £2348. Shoreham and Claret made a splendid finish for the four-year-old Memorial. In which Aleppo, who was an immense favourite, and tempted Sam Rogers to reduce to 7st. 13 lb., cut up wretchedly. Although the morning papers numbered him with Fly-by-Night, we feel certain that Coreyra, who, like Bird-in-Hand, by no means ran his best on the hard, but ground did not break down. He was better liked than any Surplice yet out; and the way in which Aleppo slipped his horses nearly 150 yards in the Vase race, as they passed the Stand, elicited a roar of laughter from all parts of the course. Nothing daunted, Fisherman tolled patiently after him, and caught him half way up the distance, a feat which at one time seemed hopeless of accomplishment. Sultan, who won the Cambridgeshire last year, is a very beautiful horse to look at, but had not the ghost of a chance throughout; and it is rather remarkable that whereas the Ascot Cup has been only won seven times out of fifty by three-year olds, the Vase is hardly ever won by anything above that age.

Mr. Richard Sutton's hunters fetched very high prices at Tattersall's last week, and the 328 guineas average for five of them at Quorn, in December, was comparatively little reduced. The highest Middle Park yearling reached 390 guineas, but the young Orlandos have so far set somewhat down in 1856 as the Derby approaches. Honest Tom Cannon's Finch realised 310 guineas; and a chestnut filly out of Alkali 750 guineas! It is rumoured that Lord Londesborough bid Mr. Payson £3000 for Blink Bonny, but that he will not hear of anything under £8000, the prices which Manganese is said to be offered to Baron Rothschild. The Royal Yearling sale is fixed for Monday, which will consequently be a red-letter day at Tattersall's; and on Saturday Brocket, two two-year-olds, seven yearlings, and fourteen brood mares of Mr. R. Way's, come to the hammer at Denham place, Uxbridge, where Acrobat has now retired, after his remarkable public career.

Death has been busy during the last few weeks with men well known in the sporting world. Mr John Ruff, one of the editors of "The Guide," died of Champion Bitch

## AMUSEMENTS, &c.

## NEW BOOKS, &c.

BANK-NOTE FORGERY AND ITS PREVENTION. This Day is published, in 8vo, price 2s.

SECURITY and MANUFACTURE of BANK NOTES. Being the substance of a Lecture delivered at the Royal Institution, and Great Britain, on May 9th, 1856. With Explanatory Notes and Engraved Specimens. By HENRY BRADBURY, F.R.I.

"An interesting paper on the Manufacture of Bank Notes was recently read by Mr. Henry Bradbury at the Royal Institution He object was to enforce the necessity of employing the highest resources of the engraver's art. According to Mr. Bradbury, every means have been taken to bring bank-note paper to perfection, but similar attention has not been paid to bank-note engraving, although excellence in both is essential to a complete result. The general correctness of his theory will probably be admitted.—Athenæum.

BRADBURY and EVANS, 11, Bouverie-street.

Second Edition, with many additional Wood Cuts, price 7s. 6d.,

THE MICROSCOPE; its History, Construction, and Application. By JABEZ HOGG, Assistant-Surgeon, Royal Westminster Ophthalmic Hospital.

"This noble volume, which is published at a small price, should be in the hands of every person who possesses a microscope. It will infinitely enhance the interest which he will take in the use of the instrument that delights to list the wonders of the little world."—The Critic.

NAVAL EDUCATION.—Preparatory Royal Naval Establishment, Eastern Parade, Southsea. Conducted by Mr. THOMAS EASTMAN, R.N., nineteen years and a half Naval Instructor in H.M. Service, five of which were employed in the Professional Tuition of the Cadets appointed to H.M.S. Excellent.

Mr. Eastman served in the flag-ships Spartiate, Lord Vincent, Asia, and Vernon, under those distinguished officers, the late Admiral of the Red Sir Byam Martin, the late Lord Amelius Beauclerk, the late Admiral of the White Sir Thomas Foley, G.C.B.; Admiral of the White Sir William Parker, Bart., G.C.B.; and the late Rear-Admiral of the White Samuel Hood Inglefield, C.B

Mr. Eastman has had the honour of preparing for entry into the Royal Navy the sons and relatives of the following distinguished personages:—

The Right Hon. Sir Charles Wood, Bart., M.P., First Lord of the Admiralty

The late Marquis of Lothian

The Earl of Orkney

The late Earl of Sefton

The Earl of Dunmore

The Earl of Clanwilliam

The Earl of Eglinton

The Right Hon. Lord Cowley, G.C.B., Ambassador to the Court of France

The Right Hon Lord Howard de Walden, H.B.M Ambassador to the Court of Belgium

Lord Arthur Hervey

Lord Arthur Lennox

Lord Crofton

Admiral Sir Edmund Lyons, Bart., G.C.B., G.C.H., Commander-in-Chief of the Mediterranean Fleet

Vice-Admiral Sir George F. Seymour, K.C.B., G.C.H., Commander-in-Chief on the North American and West India Station

Rear-Admiral Sir Thos. Herbert, K.C.B

Captain the Hon. Henry Keppel, C.B., H.M.S. "Colossus"

Captain Charles Eden, C.B., Commander-in-Chief of the Coast Guard

Captain Edmund Lyons, Bart., G.C.H., C.B., Commander-in-Chief of the Coast Guard at Portsmouth

H. Redmond, Esq., H.B.M Ambassador to the Court of Denmark

Rear-Admiral Sir Thos. Herbert, K.C.B

Captain the Hon. Henry Keppel, C.B., H.M.S. "Colossus"

Captain Charles Eden, C.B., Commander-in-Chief of the Coast Guard

Admiral Sir Charles Adam, Bart., G.C.H., G.C.B., Commander-in-Chief of the Mediterranean Fleet

Vice-Admiral Sir George F. Seymour, K.C.B., G.C.H., Commander-in-Chief on the North American and West India Station

H. Redmond, Esq., H.B.M Ambassador to the Court of Denmark

Rear-Admiral Sir Thos. Herbert, K.C.B

Captain the Hon. Henry Keppel, C.B., H.M.S. "Colossus"

Captain Charles Eden, C.B., Commander-in-Chief of the Coast Guard

Since the foundation, in 1831, of this Preparatory Naval Establishment, 306 Young Gentlemen have been passed for Naval, and forwards of 150 during the same period for direct Commissions in the Royal Marine Corps, Royal Marine Cadets, Masters' Assistants, &c.; irrespective of a great number of Mates and Second Masters, who have been first for Promotion, on their own great proof of Assistant and Master, R.N.

Terms—80 Guineas per Annum, or 10 Guineas per Month.

Eastern Parade is situate a few yards from the Beach and Southsea Castle, whence there is a fine and uninterrupted View of the Channel, the Isle of Wight, and the Solent, and is the nearest house of the kind of position by any locality on the coast of Great Britain.

ILKLEY WELLS HYDROPATHIC ESTABLISHMENT and HOTEL, Wharfedale, Yorkshire. Physician, Dr. RICHARDS. This splendid Mansion is situated amidst Mountain Scenery in the finest part of Yorkshire, enjoys the most bracing air and the purest water, commands some magnificent views, and affords a delightful resort, with superior accommodation, for those who require it. Terms per Week, taking meals at the Table d'Hôte, £2 2s. Usual hotel charges for extras. Private Medical fees: Introductory, £1 1s.; Medical Attendance and Baths, per Week, £1 1s. For Prospectus containing a view of the Establishment, address the Manager, Mr. STRACHAN, Ilkley Wells, near Otley.

THE CONSERVATIVE LAND SOCIETY.—The unapplied Funds in the hands of the Bankers of the Society are as St. Margaret's, opposite Richmond and Kew Gardens, with seventeen acres of land is now for sale. Carts to view the estate may be had of the Secretary, No 33, Norfolk-street, Strand. Eligible plots on the Tunbridge Wells Estate (Woodbury-park), giving Votes for West Kent, are now on the Sale at Fifteenth Quarterly General Meeting will be held at Exeter-hall on Thursday, the 26th of June, at three o'clock, Viscount Ingestrie in the chair, when the Lettings for public drawing for Rights of Choice on the Society's Estates will take place. CHARLES LEWIS GRUNEISEN, Secretary.

AUSTRALIAN JOINT-STOCK BANK, Sydney, Melbourne.—LETTERS of CREDIT and DRAFTS are GRANTED at 25 per cent payable by Messrs. HEYWOOD, KENNARD, and CO., No. 4, Lombard-street, the agents of the Bank. They also undertake to negotiate Bills and to make advances on the pledge of the current rates

By order of the Court of Directors, Australian Joint-Stock Bank, Sydney. EDWARD WEBNUS, Manager

THE GENERAL APOTHECARIES' COMPANY.—(Limited) Capital, £10,000, with power to increase to £100,000, 49, BERNERS-STREET, LONDON.

Under the Superintendence of Medical Men and Scientific Chemists;

This Company prepares and supplies the Profession and the Public with every description of Medicines, Genuine and Unadulterated, exactly compounded in the intention of the Colleges Family Medicines. Pure Wines and Spirits for Invalids and Medicinal purposes.

Prescriptions sent from the country with a Post-office Order will be forwarded without delay

SMART'S WRITING INSTITUTION, 5, Piccadilly, between the Haymarket and Regent-circus.—Open from Ten till Nine o'clock daily. Persons of all ages received Separately and taught at any time, suiting their own convenience Lessons one hour each. Terms, 10s. 6d. quarter, no extras. Improvement guaranteed in a few lessons. Separate rooms for Ladies, to which department (if preferred) Mr. Smart will attend.—Apply to Mr Smart, as above.

Important to Tourists. Denmark, Norway, Sweden, St. Petersburg and the Gulf of Finland, Russia in the Baltic and North of Europe.

THE NORTH of EUROPE STEAM NAVIGATION COMPANY grant THROUGH, RETURN, and EXCURSION TICKETS (first class) at very moderate fares, available by travellers to visit the above romantic and interesting places by any of the Company's splendid Steam Ships running between them (carrying the Royal Mails), and by the various Railways.

| From | £. | s. | d. |
|---|---|---|---|
| London, viâ North Western Railway to Hull, for CHRISTIANSAND CHRISTIANIA (Royal mail), Friday, June 20, 27, July 4, and every Friday, and return | 4 | 10 | 0 |
| London, viâ Great Northern, to Grimsby, for GOTTENBURG (mail), every Friday and return | 4 | 0 | 0 |
| Tourists by this route may proceed to STOCKHOLM by steamer, through the Göta Canal and Lake Wenne. | | | |
| London to ST. PETERSBURG, viâ Royal Danish Railway, between Tonning and Flensburg, saving 100 miles of sea navigation, every Friday and return | 7 | 7 | 18 |
| London to COPENHAGEN, and principal places in Denmark, including the beautiful navigation of the Little Belt, every Tuesday, Thursday, and Saturday (Tower) | 3 | 0 | 0 |

| Children and Servants Half-fare. | | | |

£70 Season Excursion Tickets are granted to travel (first class) by any of the Company's ships, and on the Royal Danish Railway, during the season.

These ships, well equipped, and carrying experienced servants, are recommended by persons well acquainted with the navigation of the Baltic and North Seas, as the safest, most easy, and best passage to board at moderate charges. For tickets, plans of cabins, &c., apply at the Company's Office, 56, Lime-street, London, or to E. PEARCE, 91a4, Oxford-street.

W. S. ANDREWS, Managing Director.

TO TOURISTS AND OTHERS VISITING THE CRIMEA.

PASSAGES between CONSTANTINOPLE and BALAKLAVA may now be secured in the fine Screw-Steamer BOSPHORUS which leaves Constantinople every Saturday at 4 p.m., touching first at Baklava on Wednesday morning. By arrangement with the authorities, the steamer has free entry at Balaklava. Apply at Constantinople, to Mr. Wm. Hadfield; or, in London, at 9, New Palace-yard, Westminster.

SALT and CO.'S EAST INDIA PALE and BURTON ALES. BURTON-BREWERY, STAFFORDSHIRE. STORES—Bengal-wharf, Liverpool-st, Bishopsgate; 23, Henry-street, Manchester; 37, Bryom-street, Birmingham; 36a, Bull-street, Bristol; Beck-hall Hallfax-street, Dublin; 4, Queen's-place, Edinburgh; North-parade, Waterhouses, Glasgow; 16, Vincent-street, Leeds. The 6 Ales, in cases of eighteen gallons and upwards, and in bottle, may be obtained from all respectable Dealers.

SLEEPING PARTNER WANTED with a Capital of £2000, for which £400 per annum would be guaranteed preference bill given to any Lady or Gentleman who would assist with the Management of a Business in which large Incomes exchanged. Address A. M. Z., W Smith, 14, Great Carter-lane, Doctors'-commons.

BRIGHTON.—The WIDOW of a MEDICAL MAN residing on the WEST CLIFF, Brighton, received EIGHT LITTLE BOYS into her House Five Years ago, and CARE with her own Sons, assisted by a Tutor. References kindly permitted to clergymen and medical men of the first eminence, pupils, to A. A., at Mr. White's, Stationer, Western-road, Brighton.

ARTICLED PUPILS.—A firm of ARCHITECTS and CIVIL ENGINEERS are desirous of receiving TWO clever YOUTHS into their London Office as one door Articled Pupils. Address Messrs Lindsay and Flower, 2, Adamstreet, Adelphi, London; and Milford, Pembrokeshire.

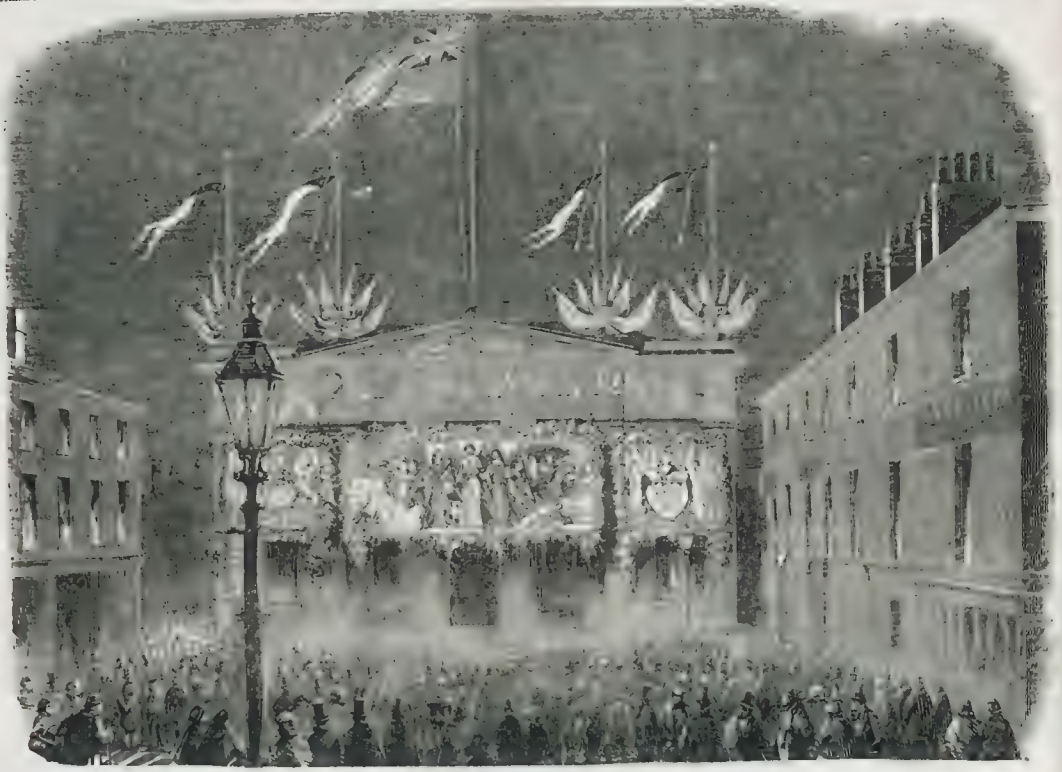
WANTED, by a Respectable Young Man, age Twenty-two Years, with Five Years good Character, a SITUATION as PRIVATE SERVANT to a TRAVELLING GENTLEMAN Address to R. L. COURTENAY, No. 59, Jermyn-street, London.

OFFICERS returning from the Crimea, or joining their regiments, will find the largest and best-assorted STOCK of KARRACK and CAMP FURNITURE in London at HALL and MILLARD'S portable military furniture and outfitting warehouse, 7, Duncannon-street, corner of Trafalgar-square. The New Illustrated Priced List post-free. Solo Agents for the Sea-Sickness Protector.

THE PEACE COMMEMORATION AT BRIGHTON.—FIREWORKS ON THE CHAIN PIER.

THE celebration at Brighton took place on the 4th inst. The great feature of the day was the dinner of 6000 school children upon the Level, where it is estimated there were assembled from 8000 to 10,000 persons to witness the festivities. In the evening the town was illuminated. The celebration terminated with some magnificent displays of fireworks. We quote the following description of the Pier display from the *Brighton Herald*:—

At about nine o'clock signal rockets were seen in the air, the noise of reports could be heard, and there was a tremendous rush to the cliffs, which, together with the beach, were in a short time covered with people. The fireworks on the Pier were prepared by Southby, the experienced London pyrotechnist. The fixed pieces were very beautiful. The opinion was general that nothing superior of the kind had been seen in Brighton. By a very



THE PEACE COMMEMORATION AT SALFORD.—THE TOWNHALL.

PEACE COMMEMORATION AT PORTSMOUTH: TRIUMPHAL MONUMENT ON SOUTHSEA COMMON.—(SEE NEXT PAGE.)

proper arrangement, persons were not admitted on the Pier after eight o'clock, so that accidents by the fall of rocket sticks might be prevented. On the sea, in front of the town, there was a large number of spectators in boats, in some of which there were minor displays of fireworks.

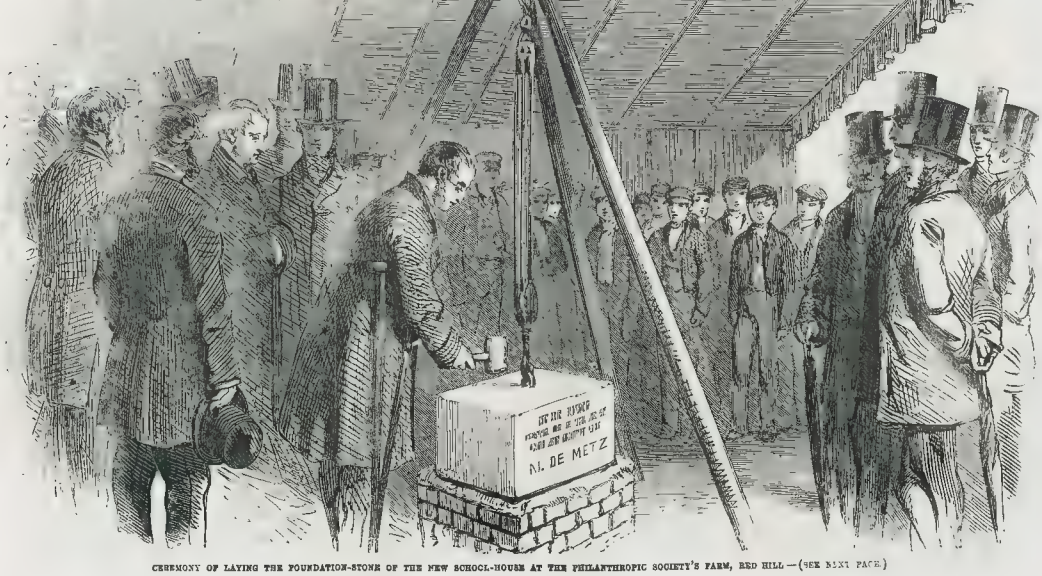
TESTIMONIAL PRESENTED TO SIR ROBERT M'CLURE.
(SEE NEXT PAGE.)

The display on the Esplanade was also very fine; and the showers of rockets, tourbillons, flying serpents, golden rain, Catherine-wheels, and showers of coloured balls, were very brilliant.

## SALFORD.

The rejoicings at Salford took place on May 29. The great scene of recreation during the day was in Peel-park, which was visited by from 120,000 to 150,000 persons. In the evening the park entrances and buildings were illuminated. There were no fireworks; but the public buildings in the borough were illuminated with devices in gas, stained glass transparencies, variegated oil-lamp devices, mottoes, initials, &c.; the whole by order and at the expense of the Corporation.

We have engraved the artistic decoration of the Townhall, which was



CEREMONY OF LAYING THE FOUNDATION-STONE OF THE NEW SCHOOL-HOUSE AT THE PHILANTHROPIC SOCIETY'S FARM, RED HILL.—(SEE NEXT PAGE.)

ornamentally executed. The painting, 25 ft. by 14 ft., was exhibited in front of the portico and the windows of the large room. In its centre stands Peace wearing a laurel chaplet, and holding an olive-branch in her right hand, and a globe in her left. To her right are a lion and a lamb, lying together, as emblematic of Tranquillity. A second fine female figure, bearing a cornucopia and a sheaf of corn, represents Agriculture; whilst Music is figured as striking a lyre, and Poetry holds forth a partially open scroll. To the extreme right is a seaport, crowded with ships, and the quays filled with merchandise—emblematic of mercantile prosperity as resulting from peace. To the left of the central figure (to the right of the spectator) are three other figures. One has snapped a sword, significant of the cessation of war; but the crown of victory which is worn indicates that the object for which the sword was drawn has been attained; Justice, with her balance, stands next; and then Unity, holding a compact bundle of rods. Beyond this group are figures painted in the background, indicative of the horrors of war; but Justice and Unity spread a veil, to shut them from the sight of Peace. Here, too, upon a battle-field, a widow and child kneel weeping over the corpse of a soldier, as showing the domestic affliction that must result from war. All the figures are well drawn, the drapery being painted in light and brilliant colours for the purpose of showing well by gaslight. At the ends of the large painting are two others; that to the right bearing the Salford arms, and that to the left the seal of the Duchy of Lancaster. Each of these is 14 feet by 12 feet; and, while the arms are fully emblazoned and in proper colours, the seal has been faithfully reproduced and carefully gilded. The tympanum of the pediment is filled in with the Royal arms, in the appropriate colours, upon a beautiful blue ground; and upon the frieze "Peace" is displayed in large letters formed by gas jets. To the right are the initials "V. A.," and to the left "N. E.," all in large letters, and lighted by gas, a brilliant star being placed between each two initials. From the apex of the pediment rises a high flagstaff bearing the British ensign; to the right being the flags of France and Turkey, and to the left those of Sardinia and Russia, similarly supported. At the base of each painting there is a tastefully-arranged group of flags; and the effect of the whole is very pleasant and artistic. All the paintings are surrounded by laurel and other foliage, interspersed with flowers; and the lower part of the façade is similarly decorated. The paintings were designed and executed by Mr. H. C. Whaite, of Bridge-street, upon whom they reflect great credit. The general decorations there were conducted by Mr. Whaite, sen. The gas devices and arrangements, as well as the stained glass, were executed by Messrs. Howard and Atkinson, of this city. The effect of the paintings at the Townhall and the various gas devices, when fully lighted, was excellent. The paintings were not transparencies; they were shown by means of the light from the devices, and of rows of burners surrounding the paintings, but concealed from the spectators. There were lines of burners round the tympanum of the pediment; the flames from them being visible.

## PORTSMOUTH.

UPON the preceding page we have engraved the extempore Memorial which the enthusiastic folks at Portsmouth improvised on Southsea Common by converting one of the landmarks for ships entering the harbour into a triumphal pillar by means of ingenious additions and decorations. On the sides of the pillar were inscribed the names of the Allied Powers—England, France, Turkey, Sardinia—and the various engagements in which, during the late war, their armies had, either collectively or individually, distinguished themselves. On the summit of this pillar was the figure of Britannia, holding a flagstaff, from which waved the Royal standard.

We have engraved also a characteristic Sketch of the eccentric person who, acting as a sort of master of the revels, marshalled the games and

THE PEACE COMMEMORATION AT PORTSMOUTH: THE MASTER OF THE REVELS.

rustic sports of the day. He was mounted on an old white pony, and wore a faded hunting dress and a very high hat.

## THE FIREWORKS IN HYDE-PARK AND THE GREEN-PARK.

A page 668 we have engraved these two principal displays of Fireworks in the metropolis, on the night of the 29th of May, as they appeared from the bridge in Kensington-gardens, where the effect was strikingly beautiful.

## NEW SCHOOL-HOUSE AT THE PHILANTHROPIC SOCIETY'S FARM, RED HILL.

IN our Journal of last week we briefly recorded the ceremony of the laying of the foundation-stone of a new School-house at the Philanthropic Society's Farm, at Red-hill, on Saturday week. We now engrave the very interesting scene.

M. De Metz, whose services and sacrifices in the cause of reforming youthful criminals are so well known, and whose celebrated Colonie Agricole, at Mettray, near Tours, is the model to which the founders of reformatory schools have more or less agreed to look, had arranged to lay the stone; and a large gathering of the friends of the reformatory cause had been expected, but the exceedingly unfavourable weather made the meeting comparatively a small one. Among those present, however, were the Bishop of St. David's, the Dean of Salisbury, Mr. Adderley, M.P., Mr. H. T. Hope, Mr. A. Beresford Hope, Mr. W. Cotton, Mr. Gladstone, Mr. Penrhyn, Mr Somers Cocks, M.P., Mr. Stuart, Mr Phillipps, Mr. Moxon, Rev. J. C. Wynter, &c.

The new School-house is the gift of Mr. Gladstone, the treasurer; Mr. Bell giving his gratuitous services, as architect, in its design and construction. It will contain from forty to fifty boys, having accommodation, also, for an assistant master. The Red-hill Institution is arranged on the plan of family division and superintendence, being now composed of six houses, or schools, each complete in itself—the whole accommodating about 260 boys. The house now added is at some distance from the other portions of the school, and is situated on the additional farm which the Philanthropic Society have lately purchased, adjoining the original property on the east side. In consequence of M. De Metz's arrival being delayed by an unforeseen accident till a late hour, the Bishop of St. David's officiated in his stead, and laid the first stone of the house. Two appropriate hymns were sung by a choir of boys, and a prayer offered by the Rev. Sydney Turner. M. De Metz came just on the conclusion of the ceremony, and delivered a very eloquent address in French, which the Bishop afterwards translated with a singular felicity and exactness of expression.

After apologising for the lateness of his arrival, and paying a just compliment to Mr. Gladstone, who gave them, he said, example of that higher charity which not only *gives* but *acts*, M. De Metz spoke earnestly of the importance of forming a normal school for the formation and training of reformatory teachers, and pointed out the great facilities which the Red-hill Institution offered for this purpose. "The noble science of improving men, of making the *bad good*, cannot be learnt in a moment—is not every one's acquirement. So high a mission requires self-denial, devotedness of spirit, a thorough morality of conduct; above all, de pity Christian feelings" Mettray, he said, owed its remarkable success mainly to the pains which had been taken by its founders to prepare suitable agents beforehand. No one would open an hospital without securing a proper medical staff. Those who undertook the vast responsibility of curing the diseases of the mind and soul ought not to be less provident. "From the time," he concluded, "that you have opened a training school for reformatory teachers here, I shall consider the prospects of the reformatory cause somewhat safe. You have here the means, the teachers the numbers, that enable you to do it. You have the man by whom it can be done. Resolve on it, and you will render the greatest benefit in your power to your country, and do the most for the security and full development of your work."

The company then adjourned to the large school-room hall adjoining the chapel, which was ornamented by the efforts of the boys and their teachers with inscriptions, wreaths, &c., in a very tasteful manner. Here addresses were presented by the schoolmasters and industrial teachers of the institution, and by the boys—the latter accompanying their congratulations with an offering of £6 10s., collected throughout the school, as a present to the boys at Mettray.

M. De Metz responded to the addresses in very feeling terms, assuring the boys that he looked on them as a portion of his Mettray family—that their generous gift would excite the liveliest feelings of regard, and the record of it be specially preserved as a bond of mutual aid and sympathy. The boys sung "God Save the Queen" with hearty good will, and the visitors separated about five o'clock.

## TESTIMONIAL TO CAPTAIN SIR ROBERT M'CLURE.

A COSTLY piece of plate, of elegantly characteristic design, has just been presented to Captain Sir Robert M'Clure, late of her Majesty's discovery-ship *Investigator*, by a number of officers of the Royal Navy, several of them among the most distinguished in their profession, in admiration of his intrepidity and perseverance in penetrating through the Polar Ocean in search of Sir John Franklin, which, as is well known, led to the solution of an important geographical problem in the discovery of the North-West Passage, and has rendered his name illustrious in the naval annals of the British empire. The testimonial consists of a winged figure of Fame standing on tiptoe on the part of a globe representing the Polar Seas, and in the act of blowing a trumpet. It is exquisitely carved in frosted silver, and stands on an ebony pedestal, which bears an appropriate inscription commemorating the services of this gallant Arctic navigator, and the motives in which the testimonial originated. It is from the establishment of Messrs. Hunt and Roskell, of Bond-street, and is a beautiful work of art.

Captain Sir James C. Ross was delegated by the subscribers to present the testimonial, and he did so in a letter in which he felicitously expressed their and his own admiration of the courage, perseverance, and skill displayed by Captain Sir Robert M'Clure, and added that it would remind him of the many arduous and hazardous events of his memorable voyage, and would not fail to keep alive in his heart a deep sense of gratitude to God, who guided and preserved him amid numberless dangers, and, after an absence of nearly five years, restored him in safety and honour to his friends and his country. Sir Robert M'Clure, in reply, stated that he fully appreciated the feelings which had prompted so flattering a mark of the approbation of his professional friends, who were the best judges of his public conduct, and it should ever be cherished by him with the most grateful recollections. He added that it would be gratifying to them to avail himself of so fitting an opportunity of expressing his admiration of the officers and men associated with him in his enterprise, to whose zeal, exertions, and co-operation he must pay that public tribute of his regard.

The testimonial bears the following inscription:—

Presented to Captain Sir Robert J. Le Mesurier M'Clure, R.N., late of H.M. discovery ship *Investigator*, by officers of the Royal Navy, in admiration of his intrepidity and perseverance in penetrating through the Polar ocean in search of Sir John Franklin, which led to the discovery of the north-west passage, and has rendered his name distinguished in the naval annals of the British Empire.

## THE CENTRAL AMERICAN ROUTES—PANAMA TO AUSTRALIA.

*(To the Editor of the* ILLUSTRATED LONDON NEWS.)

WHILE thanking you very cordially, as one of the public, for your interesting and most instructive remarks on the political geography of Central America, give me leave to supply one seemingly trivial, but in reality very important, deficiency that is implied rather than expressed, or left unexpressed, I should say, at the close of your remarks. After enumerating the several projected schemes of intercommunication between the Atlantic and Pacific, you say "the only one undertaken, and that is now near completion, is the Panama Railway." Such phrase leaves the impression that the Panama Railway is not complete, which is not the case. This great enterprise, the dream of enthusiasts and philosophic adventurers and inquiring minds for many generations, and which long occupied the present mind of the present ruler of France, has been in perfect working order for more than twelve months, uninterrupted for a single day, save by two recent lamentable occurrences—one a scandalous outrage by some New Grenadian desperadoes, whose signal chastisement has been insisted on by the United States' Government; the other an accident through the overturning of an engine down a steep embankment.

The railway is the great, and at present the only, highway between the oceans. All the treasures and troops and governmental material of every kind, to and from California and the Atlantic seaboard of the Union, pass over it. A new and most miscellaneous traffic in all the produce of the west coast of South America, including Costa Rica coffee, Peruvian guano, and Pacific whale oil, is springing up in consequence of the facilities thus afforded as compared with the tedious time-consuming, and therefore expensive, transit round Cape Horn. By way of the Isthmus a large and fast-increasing trade is being prosecuted between England and the Pacific; and any practical man who knows the tendency and requirements of that trade, and of the more extended trade and postal services which may, at a very small expense, and with great promptitude, be linked with it, is perfectly well aware that Panama is the easiest, cheapest, and most expeditious route to Australia.

This was abundantly shown four years ago, before Lord Jocelyn's Committee, by Mr Lowe, the present Vice-President of the Board of Trade, by Sir Edward Belcher (then whom no man is better entitled to speak on the subject), and by several others. All the arguments then adduced have been rendered doubly cogent since by the opening and regular working of the Panama Railway. With the Atlantic terminus of that line (Aspinwall) our Royal West India mail has a regular postal communication, thus securing half the whole distance to Australia to begin with. All that would be necessary, therefore, to complete the other half would be to place steamers on the Pacific side suitable to that navigation. By this means, and only by this means, would any direct postal advantage be given to our important and thriving colony of New Zealand, where there would be a coaling station (the only one necessary), the steamer thence proceeding straight either to Melbourne or Sydney, a branch steamer at the same time going to either of these ports, and so on the return voyage.

Here would be but one transhipment the whole way, while there must be several by the eastern (Ceylon) route, a fatal objection to all but the wealthiest class of passengers; and only by that route which Panama can traverse could any bulky mails, including newspapers, Parliamentary papers, and books, be conveyed. No crotchet or ideality is involved in this. Had the Panama Railway been in existence at the time Lord Jocelyn's Committee reported they would have reported in favour of the Panama route. Not only is the railway now opened, and by it (without steamers on the Pacific) Australian news is received with great speed by way of Galle, but the Royal West India mail-boats punctually ply to and from the Atlantic side of the railway, and would ply on the Pacific side also if public interests only were concerned. Any of your innumerable intelligent readers can readily test the accuracy of these statements of your obedient servant,

THE LONDON AGENT OF THE PANAMA COMPANY.

A DESTRUCTIVE THUNDERSTORM.—The Duchy of Saxe-Coburg was visited with a thunderstorm on the night of the 31st ult. and 1st inst., accompanied by a terrific hurricane, striking down and tearing up, by turns, trees of four-and-half feet diameter, and eighty feet high, and turning and twisting the wires of the telegraphs into all manner of fantastic forms. Persons on the roads were turned round by the force of the wind, and almost stifled by it. In the vicinity of the city of Coburg innumerable plantations of fruit-trees, garden, and their summer-houses, were completely blown away and destroyed. Reports had reached that place from the surrounding country that a great number of casualties had occurred to man and beast, and in one part 350 large trees were found to have been blown down.

## SCIENCE AND INDUSTRY.

MAN is compelled to act before he knows, or can know. Ages before he knew anything about the wonderful process by which a portion of food, be it animal or vegetable, is converted into blood, and becomes part of his own frame, restoring wasted strength and giving renewed vigour, he ensnared wild animals, speared or hooked fish, cultivated the ground, and procured by his labour a continued supply of food. To this day, in every part of the world, there are millions of people who know little or nothing of this process, but are skilful and industrious in procuring an abundance of food for themselves and others. Iron was found or made, and wrought into a variety of instruments; gold and silver were discovered or fabricated out of the clods, and used as ornaments or money, before the science of metallurgy was heard of. In fact, as the metals nowhere exist in purity in great quantities, and are, in the great majority of cases, the products of art, industry must have made them before they could become objects of scientific investigation. The same may be said of chemistry. Men made wine and beer before the process of fermentation engaged attention, wove and dyed cloth with mineral and other colours before the term "precipitate" was invented, and used gunpowder for the purposes of destruction before any idea was formed of the nature of gas and of the theory of explosive mixtures. Through the whole history of our species we can trace similar phenomena. Man is impelled to act by his appetites, his impulses, and his passions; and it is not precisely just to reproach the workmen of England and of the world because they are ignorant of the scientific principles of the actions or manipulations they perform. After man had fed himself for ages he inquired into the curious process of digestion by which his own body is continually built up and sustained. When, by practical skill and industry one produces subsistence for a score, several of them, having leisure and being at ease, become observers of industry and its effects. From noticing the elaboration of metals, the fermentation of the grape, and a multitude of other effects, science was evolved; observation was extended from the effects of man's works to other things; knowledge of them was acquired; and Science, in its turn, became the instructor of Industry—repaying it, by increasing its skill and lightening its toils, for the knowledge which Labour had enabled Science to acquire. It is in the order of nature that knowledge should only come after action, that labour should precede science, and science then enlighten industry. England, and all Europe, long ago reached the stage in social history at which science largely repays industry, and has, especially within the last seventy years, shed great light over many of its manipulations, has investigated the properties of the substances it handles, and has very much contributed to its ease and its success. This is quite as it should be, and we have only gratification to express at knowing that scientific men, and the chiefs of political society, are anxiously directing the knowledge they have had leisure and the means to acquire continually and further to improve all the industrious arts by which society is sustained, but which must at last, as at first, be the roots of its greatness.

We have before us the third Report of the Commissioners for the Exhibition of 1851 to the Secretary of State for the Home Department, describing what they have done to April of the present year, with a view of making science the tutor of industry. They were incorporated for this purpose. Their report is accompanied by a number of appendices extending from A to T, maps of the Commissioners' estate at Kensington, plans of the Museum they are building, &c., constituting a very respectable blue-book as to size, paper, and print. From it we may gather an outline history of what science has lately done and proposes to do for the help and instruction of industry. We can only state, however, one of the facts. Parliament and the Commissioners, from the proceeds of the Exhibition, have laid out £342,500—the former contributing £177,500 and the latter £165,000, on an estate at Kensington, to be used by science as a site whence it may spread illumination over the land. How this is to be accomplished in detail is not set forth, the war, probably, having made too large demands on the public resources to permit the immediate application of any considerable sum to the purposes contemplated by the Commissioners. They "have shown," they say, "how a practical beginning has been made, with the support of Parliament, towards the realisation of the comprehensive scheme in contemplation of which the Kensington Gore estate was purchased, by means of the erection of a structure (the Museum), sufficiently extensive to provide for the more immediate wants of the public, without prejudice to the *adoption hereafter of measures* calculated to make permanent provision for those wants *on a scale worthy of the nation*." From which we infer that the Commissioners contemplate to expend at Kensington, in the name of science, as has been done at Munich, the capital of the small kingdom of Bavaria, some £13,000,000 sterling in erecting "Walhallas," "Glyptotheks," "Pinakotheks," &c., or various galleries of science and art, in order to make London "an artistic city," the brilliant focus of light for the whole empire. Under this aspect the desire of Science to improve Industry seems a great ambition; and when we think for a moment over the success of our own humble efforts in diffusing information amongst the people with means in comparison so infinitely small, and with no cost to the public, we fear this ambition will "o'erleap itself," and Science fail to achieve the good it wishes.

From the report and the appendices some useful information may be gleaned. The history of the scientific and artistic institutions of Munich is given in a paper by Mr. Ward, the Consul-General for Saxony. The Commissioners narrate not only entirely what they have done, but what has been done generally in England of late to promote scientific instruction? It might have been said in fewer words, and all the matter in the book might have been put into a cheap form and made accessible to the public for a very small sum; but we must not quarrel with the cost of a book which appears not to be intended for sale. The Commissioners tell us that the total number of visits to our Exhibition was 6,039,195, the total receipts £606,000, and the total expenditure £330,000; while the visitors to the Paris Exhibition, including those to the Palace des Beaux Arts, was 4,653,465, the receipts £17,677, the expenditure about £500,000. The French Exhibition was paid for by the national funds. Neither the New York nor the Dublin Exhibition was successful. Our Exhibition was paid for by voluntary subscription, which not only liquidated all the cost, but left in the hands of the Commissioners a net surplus of £186,436. We might gather other useful facts from the "Report," but we have already exceeded our proper limits; and can only say further, of the present exertions of science to improve and enlighten industry, as described by the Commissioners, that they would be more acceptable, if not marked by excessive confidence amounting to arrogance, and by claims of superiority over industry more offensive than conciliatory. Knowledge comes after action, and so learns to be its pilot—but is its servant, not its master.

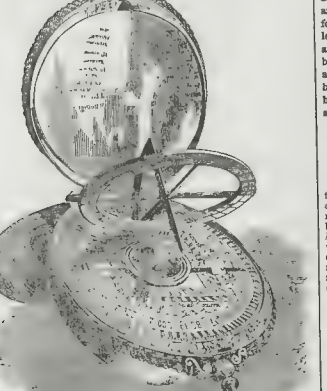
## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*A little chink may let in much light.*—OLD PROVERB.

### SIR FRANCIS DRAKE'S ASTROLABE.



THE ASTROLABE OF SIR FRANCIS DRAKE, IN GREENWICH HOSPITAL.

Among the many relics of England's naval heroes enshrined in that stately and appropriate repository, Greenwich Hospital—a noble building dedicated to a nobler purpose—few are more interesting, few attract more attention, than the subject of the above Engraving—the astrolabe, or instrument for taking the altitude of the sun or stars, once belonging to the famous Drake.

This instrument, constructed for Sir Francis when Captain Drake, prior to his first expedition to the West Indies in 1570, and subsequently preserved in a cabinet of antiquities belonging to the Stanhope family, was presented in 1783, by the Right Hon. Philip, fifth Earl of Chesterfield, on his quitting England as Ambassador to the Court of Spain, to the Rev. Francis Bigsby, A.M., of Stanton Manor, Derbyshire, who had in the preceding year married the Hon. Frances Stanhope, widow, his Lordship's stepmother. In 1812 that gentleman, having ruptured a large blood-vessel, in anticipation of approaching death gave it as a token of affection to his younger brother, Robert Bigsby, Esq., of Sion-hill House, Nottingham-hire, the father of whom had the honour of presenting it to King William IV., by whom it was bestowed upon the Royal Hospital of Greenwich.

### LETTER FROM LORD BOLINGBROKE TO POPE.

The following highly characteristic and interesting letter, which, if now, as we believe, first published, will gladden the heart of Mr. Carruthers and future editors of Pope, was transcribed by the learned Mr. Charles Godwyn upon the flyleaf of the ninth volume of his copy of Pope's works, now in the Bodleian Library, Oxford, whence, by the kind permission of Dr. Bandinel, we have extracted it:—

"Dear Pope,—I do not know how it is, but the air of Twickenham agrees with me considerably better than a residence in town, and I find a greater share of satisfaction at the bottom of your little garden than ever I experienced in the bustle of a Court. Possibly this may proceed from a proper estimation of your work, and a just opinion of all the ambitious coronets or fawning sycophants I am surrounded with. Certain it is, however, the dignity of human nature lessens in my notion of things, according to the knowledge I have of mankind; and the more intimate I become with the generality of people the greater occasion I have to despise them. The felon at the bar, and the judge upon the bench, are stimulated by the same motives, tho' they act in different capacities. Take the one but plunders thro' a hope of gain; and let me ask, if the other would take any pains in the administration of justice without a reasonable gratuity for his labour?

"This, you will say, may be carrying things too far, and possibly it may be so; yet, though a particular instance or two may be brought to contradict an observation of this kind, they can by no means be produced as arguments against the universal depravity. I am greatly pleased with a remark which Swift made a few days ago in a conversation which we had upon this very subject. I need not tell you how sour the Dean is in his sentiments of the world; but I think the following declaration is not more distinguished for its severity than supported by its justice. 'Were we,' said he, 'to make a nice examination into the actions of every man we should find one half of the world to be rogues, and the other half to be blockheads; the latter half may be divided into two classes, the good-natured blockhead and the sensible; the one, through an easiness of temper, is always liable to be ill used; the other, through an excess of vanity, is frequently exposed to be wretched. Mutual confidence and real friendship are very pretty words, but seldom carry any meaning. No man will entertain an opinion of another which is opposite to his own interest, and a nod from a great man, or a smile from a strumpet, will set a couple of blockheads by the ears who a moment before would have ventured their lives for each other's reputation.'

"Lord Peterborough dined with me yesterday. I have a high idea of the goodness of this nobleman's heart, though it may be brought as a proof against my favourite system; but he is of a turn so excessively romantic that I cannot be equally prejudiced in favour of his understanding. I have no notion of a man's perpetually exposing himself to unnecessary dangers for the mere sake of being talked of; or, through a ridiculous thirst for military glory, venturing a life which should be preserved for the service of his Prince and the interest of his country. My motive for saying this, you know, is neither founded upon pique nor directed by ill nature. My Lord is a man for whom I have the most perfect regard, and my esteem alone is the reason why I may be so extremely sensible of his errors

"I saw Addison this morning. Somehow or other, Pope, I can by no means think that man an excellent poet. His prose is very well, but there is a heaviness about his versification which is totally inconsistent with elegance and spirit, and which, though it may in the thoughts of some people carry much judgment, is in my opinion a proof of very little genius. I am far, you know, from being fond of eternal epithets in poetry, or endless endeavours at sublimity of expression, but I would have it existed a little above prose in the most humble species, and carry an air of some dignity and importance.

"Trivial as the remark may appear, it was very well for a boy of fourteen, who was reading Cato, and coming to that tag which is so highly celebrated by some of the author's friends:—

To the pure limpid stream, when foul with stains.

"The lad burst into a fit of laughing, and cried, 'Here is a bull; who ever thought that a stream could be pure and limpid, yet at the same time foul with stains?' I could not help joining the laugh at the archness of the boy's observation, tho' the criticism might seem too low for judgments of more experience and maturity. But why do I entertain a fellow of your abilities in this manner, who are so greatly a superior master of the subject? I am, somehow, fond of scribbling, and become trifling, for the sake of spinning out a letter. If possible, I shall take an airing down your way on Saturday, and pray let me have a little leg of lamb, with some spinnage and plain butter, to regale on. Where I dine in town they starve me with luxury; and I have sat at many a table where I had not a bit of anything to eat, because I had too much of everything. You and I can go down to the bottom of the garden, and manage a bottle or two of that excellent ale after dinner, and enjoy what you are good-naturedly pleased to call

The feast of reason, and the flow of soul.

"Farewell, dear Pope, and believe me to be your own BOLINGBROKE."

### NOTE.

LORD PEMBROKE'S RECIPE FOR MAKING PORT WINE.—A short time back, at a public dinner, Lord Palmerston related a pleasant story how a certain Lord Pembroke was in the habit of telling his guests that for the goodness of all his other wines they had the assurance only of his wine-merchants, but for the excellence of the port he could personally vouch, *having made it himself*. The following, a correspondent informs us, is the veritable recipe which his Lordship adopted:—Eight gallons of genuine port wine, forty gallons of elder, brandy to fill the hogshead. Elder tops will give it the proper roughness, and cochineal whatever stregth of colouring you please. The quantity made should not be less than a hogshead. It should be kept full two years in cask, and as long in bottle before it is used.

### QUERIES

ERRATA.—Can you inform me when the practice of giving a list of *errata* was first adopted? BIBLIOPEGUS.

The *errata* was unknown before the invention of printing. The correction of a manuscript was an easy process. When the writer perceived an error he effaced it with a sponge before the ink dried; or he erased the defective word or words, and placed a mark beneath. An account of the *errata* prefixed or added to the most memorable books published since the discovery of printing would form an extremely interesting chapter in literary history. During the first half of the seventeenth century the works printed in Paris were so incorrect, we are told, that a State order was issued on the subject to the effect that "so few good books are issued at Paris, and those that are printed appear so imperfect, from the bad paper used and the few corrections made in them, that we must pronounce it a kind of disgrace, and consider it a serious loss to the State." The same faults prevailed in other countries; and even the Bible, in the correction of which unusual care was bestowed, has been frequently disfigured by typographical blemishes. We can call to mind only a few of these at the moment, but some of our antiquarian readers will doubtless enable us to extend the list considerably. Pope Sixtus V. published an edition of the "Vulgate" in Rome, of which he had carefully supervised the correction of each proof. At the end of the work he attached a bull excommunicating any person who ventured to alter the text. This bull entertained the people exceedingly, for the Bible was discovered to be so full of errors that he was compelled to suppress the edition. In a Bible published in London, 1634, the passage (Psalms xiv.), "The fool hath said in his heart there is no God," was printed: "The fool hath said in his heart there is a God." Another Bible contained almost as strange a misprint (Ruth iv. 13): instead (of "The Lord gave her conception," it read "The Lord gave her *corruption*." The editions of Field, printed for the University of Cambridge, are full of faults. It has been said that he received a large sum of money from the Independents for altering a single passage in the "Acts of the Apostles" (vi. 3), which ends with the words, "whom we may appoint," &c., to "whom ye may appoint," &c., thus causing the right of choosing pastors to emanate from the people, and not from the pastors. In the same Bible we find (1 Cor. vi. 9), "Know ye not that the unrighteous shall inherit the kingdom of God?"! The most amusing *errata* we remember to have met with occurs in a French writer's translation of "Ovid's Metamorphoses." At the end of the work the translator says:—

Pour moi, parmi des fautes innombrables
Je n'en connais que deux considérables,
C'est l'entreprise et l'exécution:
A mon avis fautes irreparables
Dans ce volume.

SINGULAR BEQUEST.—A long time ago, the story goes, an eccentric individual constructed a subterranean habitation, and left by will a sufficient sum of money in trust to buy an annuity of one hundred pounds for any person who would endure incarceration

THE PEACE CONSOLIDATION—THE FIREWORKS IN HYDE PARK AND THE GREEN PARK, SKETCHED FROM KENSINGTON GARDENS.—SEE PAGE 669.

## THE BAPTISM OF THE IMPERIAL INFANT.

FOR months past carpenters, masons, jewellers, and robemakers have been at work, it is said, under the immediate superintendence of the Emperor of France, preparing for that solemnity which is to surpass in splendour the ceremony with which the King of Rome and the Duke of Bordeaux were admitted to the Church. The municipal authorities have vied with the Government in the purchase of costly draperies and the elaboration of rich designs. The son of Napoleon III. will be conveyed to Notre Dame on Sunday next the 16th inst., in conformity with regulations almost Chinese in their minuteness. There is not a footman who has not his appointed place; there is not a guest who has not his post drawn up. Titles will be showered upon many eminent Bonapartists; and, following the example of his uncle, Napoleon III. will dine, after the baptismal ceremony, with the Prefect of the Seine, at the Hotel de Ville. On Sunday, it is said, Marshal Pelissier will become Duke of Sebastopol, and Bosquet Duke of Malakoff; while titles will be allotted to M. de Persigny, Count de Morny, and others. There will, of course, be a shower of pardons to offenders, as certainly as, at night, there will be a shower of rockets. After spending about £13,000 upon the decoration of Notre Dame, and offering a morning pageant to the show-loving eyes of the Parisians, it would be imprudent to leave them unoccupied in the evening. The inundations will not put out the Roman candles which, in honour of the Pope's representative, will assuredly figure largely in the pyrotechnic part of the great exhibition. Only last year there was a report that the fête money of the 15th of August was to be given to the soldiers in the East: the amount was probably given: still the ministers put out lanterns, and the city of Paris was illuminated. And thus should the French Government decide to give the fête money, or part of it, to the Lyons sufferers, we may rest assured that there will hardly be a rocket the less seen in the heavens on Sunday evening. The Parisians are sympathetic; they deplore the loss of life in the south; but still, and before all, they love to be in the streets, and to see Chinese lamps dangling from their seven-storied houses.

This fête is more than an ordinary ceremony. It is regarded as the climax in the wondrous fortunes of the Imperial parent. Surrounded by the delegates of all the Courts of Europe, in the presence of Royal echoes, the child of Louis Napoleon and of his gentle consort—a simple lady from Madrid—will receive Royal godfathers and godmothers to watch over his spiritual welfare. Not a single person destined to be present at this ceremony will think so much of the gold and silver and rich tapestries about him as of the Imperial infant's fate, with two pretenders to his crown, watching the progress of his fortunes from the border. From the hour of his birth the child of Louis Napoleon has been most studiously surrounded with the state that would appear to strengthen his position as heir apparent to the throne. No detail has been wanting. Imperial guards have been on duty at the nursery door since first he cried in his nurse's arms. His first sleep was in a gorgeous cradle, worth some £4000, presented to his mother by the city of Paris (See Illustration). On the morrow of his birthday crowds of senators and generals pressed around to look upon him. Over his swaddling-clothes floated the broad riband of the Legion of Honour, for which men toil during a whole lifetime, and which they accept at the close as a sufficient reward. His teeth will be cut upon the military medal that glistens upon the breast of Bosquet. He is the *enfant de troupe* of the first regiment of the Imperial Guard. To him do the writers of *Figaro* owe their existence; for is it not within the memory of many readers that, when threatened with confiscation by the authorities for the publication of indecent articles, *Figaro* petitioned the Imperial baby in his cradle to arrest the impending sentence. The Imperial father replied that an appeal made to him in the name of his son should not be refused.

THE IMPERIAL PRINCE IN HIS CRADLE.—FROM A PHOTOGRAPH.

And then, again, his Imperial Highness is the baby-patron of how many institutions? He watches over the orphans of Paris. In his name his mother performs her acts of charity. Thus has even the memorable five-sous subscription been turned to the account of the infant's popularity. It is said that this collection of sous from the masses, in the shape of copper homage to the Empress and to her offspring, has elicited the sympathy of six hundred thousand individuals in Paris and the *banlieue*. The pecuniary result is small, of course, the highest allowed contribution being five sous, or two-pence-halfpenny; still the Empress presents it, in the name of the heir-apparent, to the people, that it may be used to protect orphans. She wished to see orphans under the protection of her son. She wished that the poor workman taken prematurely from his family should carry with him in his dying moments the consoling idea that the Imperial benevolence would watch over his children. This, it should be remembered is but a repetition of the benevolence with which her Majesty turned aside the offering of the Municipal Council, on the occasion of her marriage, and gave it to "the children of the people." On the present occasion the Empress has added an annuity of 30,000 francs to the fund, "until her son can do it for himself, and feel that he is so doing." In this way his Imperial parents have endeavoured to associate the name of the heir apparent with the charities of his country, that he may grow up secure in the affections of the people over whom it is the hope of his father he is destined to reign.

Whether the French people accept this zealous guardianship of the child as evidence of the anxiety of his parents for his security is a point which we need not touch upon. The jokes to which the five-sous subscription gave rise are not evidence one way or the other; while, on the other hand, it is certain that the French people are generous enough to give the Emperor and Empress some credit for the untiring energy with which they have always advanced to succour any section of the nation, or any individual, in distress. The Emperor will attend the baptism of his child—fresh from the scenes of desolation which the inundations have produced in the southern departments. Altogether, it must be allowed that, while decorators, goldsmiths, and artists have been set to work to produce a splendid show; while the Pope has sent a special Cardinal to officiate; and while Royal sponsors have been obtained to do honour to the reception of the Imperial infant into the Church, his parents have been untiring in their efforts to popularise his name among the people. The *enfant de troupe*, Grand Cordon of the Legion of Honour, wearer of the military medal, patron of French orphans, and liberator of the writers in the *Figaro*, makes his first appearance in public on Sunday, loaded with honours, considering the fact that he cannot have cut his teeth yet, and guarded about by parents determined to vindicate his rights and smooth his way to the throne.

The reception of Cardinal Patrizi—from the three rounds fired from the top of Notre Dame de la Garde at Marseilles, when the corvette appeared bearing his Eminence to the shores of France, to his entry into Paris, preceded by the Pontifical crossbearer mounted on his white charger led by two footmen—will give the reader a faint idea of the pomp with which

FIRST APPEARANCE OF THE IMPERIAL PRINCE IN PUBLIC.

Sunday's ceremony will be conducted. The *Times'* correspondent thus describes the reception at Marseilles:—"Baron Fallet de Conches, Master of the Ceremonies, sent by the Emperor to receive the Legate and accompany him to Paris; Monsieur Sacconi, Archbishop of Nicea, the Apostolic Nuncio; the Bishop of Carcassonne and Lannes, the Prefect of the department, and General Carondelet, prepaired on board the vessel to welcome the Prelate. All the shipping in the harbour was dressed with flags. The Legate landed at La Canebière, where the authorities were assembled and carriages were waiting. The Bishop and Nuncio having left carriages were waiting. The Bishop and Nuncio having left for the Church of St. Martin to make the necessary preparations for the reception of his Eminence, the cortège began to move, and proceeded by the Canebière and the Cours to the cathedral. Allied troops, consisting of Gendarmes and Lancers, and next came the carriages of the agent of the Department of Foreign Affairs, of the Roman Consul, of the Presidents of the Tribunal and Chamber of Commerce, of the President of the Tribunal of First Instance and the Attorney-General; of the Mayor and of the Bishop; General Carondelet on horseback and his staff; the carriage of the Prefect; an Imperial outrider; the Pontifical crossbearer, mounted on a white horse led by two footmen; the carriage of the Legate and of the Master of the Ceremonies of the Emperor; the carriage of the relatives of the Legate's suite; and a body of Cuirassers closed the procession. The Bishop received the Cardinal Legate at the gate of the Cathedral under a canopy, and after the religious ceremony his Eminence was conducted in the same order to the Episcopal Palace, when the persons forming the cortège who had not yet been presented were introduced to him by the Master of the Ceremonies.'

## *LITERATURE.*

**Izmeer; or, Smyrna and its British Hospital in 1855. By a Lady.** London: Madden, Leadenhall-street.

Ismeer, or Izmir, means "The Beautiful," and this name is not inappliceable to this fair trading city of the Levant, with its capacious bay, picturesque houses, mosques, minarets, and groves of cypress, bulwarked in by a range of hills, on the highest summit of which stands a ruined castle. Frank, Jew, Turk, and Armenian throng its narrow streets and bazaars, impregnating the air with otto of roses, musk, and tobacco, and displaying almost every variety of feature and costume, the majority realising Milton's magnificent line:—

Dusk faces with white silken turbans wreathed.

A closer inspection dissipates part of the spell. We land, climb up the interminable scales, or thread the rugged, tiresome streets, and find that Smyrna, like most Eastern towns, is ill-drained, and the houses ill-ventilated, close, and incommodious. By day and by night domestic plagues abound. Sand flies bite venomously, mosquitoes defy the thickest muslin curtains, bugs triumph over the Levant powders prepared for their destruction; and fleas—the pigmy infantry warred on incessantly—baffle the nimblest fingers. These are, no doubt, specially ordained on purpose to rouse the Oriental lethargy. Even the Smyrniote ladies, long celebrated for their beauty, owe half their attractions, according to the ungallant Mr. Macfarlane, to cosmetics, dyes, paints, and jewellery. Their really fine heads are set on dumpy bodies, and they fascinate only while they remain in their frames—the windows, but English ladies, who had gone voluntarily, without any vow, to minister to the wants of the sick and wounded of the British Army, to do what only women can do well—nurse and console the suffering and dying. A nobler mission never left our shores; and, as long as the valour and heroic endurance of our soldiers are mentioned, this female devotion, characteristic of the late war, will be held in proud, and solemn, and affectionate remembrance. If English pride and English reserve have become proverbial abroad—if we have got enemies surly and undemonstrative over our liberties, and prone to grumble and obtest in the midst of our island comforts and luxuries—let us, as a set off—not as a complete exculpation, for we should mend our faults—point to English humanity, thus bodied forth in its most lovely and winning form amidst the horrors of war—humanity, self-sacrificing, sincere, continued, and unostentatious.

The fair volunteers, however, were at first dissatisfied with their hospital costume—it levelled all distinctions. Ladies, nurses, and washerwomen were clad alike, and some confusion and bad feeling were the result. "At we spent nearly all day at the hospital," says our authoress, "where no other women were on any pretence admitted, it will at once be seen that the soldiers could not have mistaken us, and that the precaution was unnecessary. We do certainly mismanage matters, though we are the most practical people on the earth. The voyage, too, was rather rough; and the party landed at Smyrna amidst heavy rain. This test tried "the beautiful," but did not, in the eye of the stranger, destroy it. The two hotels in the town were full; but one hospitable purveyor provided for the sixteen lady-nurses, and next day hired a Turkish cavass, or guard, to accompany them over the town. All was new and striking. "I felt as if I was walking in the 'Arabian Nights,' and should hardly have been surprised if I had been asked to step into Aladdin's palace, or met the African magician at any moment." Operations at the hospital were commenced on the 20th of March:—

There were from eight hundred to a thousand sick and wounded in the hospital when we arrived, and death was very busy amongst them. Dr. Meyer had not yet come; so arrangements were arranged *pro tempore* by Mr. Macleod, one of the head surgeons who acted as his substitute. As things were, therefore, not regularly organised, we all walked down to the hospital, on Tuesday morning, without any very definite plan—meeting on the way some soldiers, one of whom exclaimed, with more expletive, "——Tom, there's the nurse!" and were placed, pretty nearly by chance, in the several divisions. The one which fell to my lot had from sixty to eighty patients; and I must say I felt a little strange just at first, on finding myself the only female, save my nurse, among so many sick soldiers. But how soon self is forgotten when you are in the midst of sickness and suffering, and know that people are depending on you for relief! The fear, horror, and disgust which would probably affect an inactive spectator have not the smallest place in your mind, and you have but one feeling left—pity, and a desire to alleviate pain. I have found some very bad cases; two were especially so. One of these had been frostbitten, and was also consumptive. The other had had fever, dysentery, and was then suffering from the extremest exhaustion and a most hideous bed-sore. Both were quite young men, of two or three and twenty; but they looked like sixty. Poor Cotterill! he is before me now, as I used to see him lying in the most uneasy position, almost on his shoulders and crushed face, with his large hollow eyes perpetually following me or my nurse, Mrs. Bowler, as we went about from bed to bed. She had been at the hospital three days before I came, and he had got quite fond of her. Her first work had been to cut off his hair, which she described as a perfect mass of vermin; as also his whiskers and eyebrows; while from off the bed they were brushed in myriads, and had to be swept up, and the floor washed afterwards. When she had finished, and made him as comfortable as she could, he looked up in her face, and said, "I believe you're not a human being, but a angel!" And this was no isolated case, for there were many such; and the state of filth and wretchedness in which the first sick and wounded arrived was, I am told, beyond all description—their clothes had to be cut off outside and in the open air.

Sad and shocking scenes for delicate, well-bred women, unaccustomed to such duties. But they worked steadily from nine o'clock in the morning till five or six in the evening, cheered by the sight of the poetive good they were doing, and by the grateful attachment of the men:—

One poor man, who was dying, would not let the lady's hand go at all, he could not bear that she should leave him an instant, which was very painful for her, as there were others of her patients crying and urging constant care to whom it might be of use; while to him, poor fellow, it was quite evident no care could avail. He died that afternoon, and, I think, another man also in the same ward on Sunday. One of the ladies, on going into a ward to attend to two poor men who had to be fed every half-hour, observed a boy on one of the beds eyeing her most wistfully; so she went up and asked him if he wanted anything. "Yes." he replied, pointing to what she had been giving the other. "I would like some of that; I have had nothing from the hand of a woman yet: I believe if I had something from the hand of a woman I would get well." Many an expression of gratitude and kindness followed [illegible] and many an exclamation of "It does my heart good to see an Englishwoman again!" We returned from our first day at the hospital, tired and pleased, and interested, O how much! in the poor fellows we had left [illegible] and dying, but [illegible] uncomplaining and patient; for, with hardly [illegible] exception, these were the characteristics of all I came in contact with.

Fever tried them very [illegible] the nurses took the infection, and one of them fell a victim. The authoress had one bad case in her ward. She left the patient at night when not a vestige of hope remained:—

Next day, at an early hour, I stood at the door of the ward. How my heart beat! I had seen no one who could tell me whether he was alive or dead. At last I summoned courage and went in. The orderly, who had been up all night, turned round and saw me; a smile broke over his face as he exclaimed, "All right, ma'am; Jem's alive!"

Such instances of sympathy constantly broke out—the brave fellows were never deficient in tenderness. When the men had partially recovered they evinced their gratitude to their nurses by working for them mats and rugs made out of coats worn at Alma, Inkerman, and Balaclava. Some of these appear to have been highly ingenious, displaying the flags of the allied armies; the Crescent, Cross, Thistle, and shamrock, &c. The newspaper and post days were also periods of great excitement, and one forbidden pleasure, smoking, was eagerly sought after. The authorities had determined that there should be no smoking in the wards and corridors, and the poor fellows could not, in many instances, get out of bed and go down stairs to enjoy their luxury. One man thus evinced his devotion to what Charles Lamb called "the great plant" and what Byron dignified as "sublime tobacco":—

He had just had one of his toes taken off under the influence of chloroform. It bled profusely; and the surgeon, after binding it up, went away, giving her strict injunctions not to allow him to move, and ordered him some medicine, which he would send presently. She was called away for a few minutes, and went, leaving M——— with strict orders not to put his foot down. On her return to his bedside, to her astonishment he was gone; and, after searching, she discovered him, by the traces of blood on the stairs and corridor, sitting down in the yard, smoking his pipe with the greatest *sang froid*. She spoke to him seriously about disobeying orders and doing himself an injury; but he was perfectly callous on the subject of his toe. She succeeded, however, in working on his feelings at having disfigured the corridor with blood; and he came back, saying, "Indeed, ma'am, I could not help going to have a pipe, for that was the nastiest stuff I ever got drunk on in my life"—alluding to the taste of the chloroform. Poor fellows, the anti-smoking regulations were rather too much for them; they could not obey them. Often have I, guided by my olfactory nerves, entered a ward unexpectedly, and caught a pipe being hurriedly shoved under the bed clothes. This was a grave offence, for no matches were on any pretext allowed among the patients, and hiding a lighted pipe was a little short of incendiarism. The excuse was generally the same: "Please, ma'am, I had the toothache so bad." Great was the joy when the order against smoking was rescinded.

Few of the men wished to go home. When told that they would hasten and establish their recovery by being removed to England, they paid little regard to this most *urgent of private affairs*; their general reply was that they would rather join their comrades in the Crimea than their friends in England. One man entreated the doctor to allow him to remain, as he was slowly recovering; and next morning, as if to strengthen his petition, he presented the doctor with some verses, beginning thus—

Might I march through life again,
In spite of every bygone ill,
To the end of life a campaign
I would be a soldier still.

There were other military poets in the hospital, but some of their lucubrations would have been as well away. The authoress might also have advantageously abridged some of her minute details. The reader, however, seems to hear and see all that is going on daily in the hospital; he becomes familiar with the names and the manners; and all is favourable to the British soldier. Even the roughest of them have, as Goldsmith said of Johnson, nothing of the bear about them but the skin. When "the lady" appears in the ward or courtyard, all scowling and bullying ceases. They were all delighted to hear of the Prince of Wales and Princess Royal sending two of their pictures to be sold for the Patriotic Fund. They never could be done speaking of it, saying, with tearful eyes, "God bless them! Her Majesty will never want soldiers while there are such Princes." How small an act of kindness may thus contribute even to the security and stability of the throne! Emerging from the hospital, and accompanying the authoress in her holiday excursions, we have some lively sketches of the country and people. The neighbourhood of Smyrna was then infested with brigands or robbers, familiar with the mountain passes and retreats, and no one could go far without a guard. One of the resident medical men, Dr. M'Naith, was captured, and was only ransomed on his friends paying £400. There was no sufficient Turkish force to put down these hordes, and our authoress says they were "much amused at the eagerness of the poor invalids to be up and have at the *Klephtes*; some who could hardly raise themselves in bed declaring, if they were only allowed to get up and at them, they would give them such a pic-nic as they never had in their lives!" At length the Turks instituted a close pursuit after the brigands, and their chief, Symoom, was shot, saying as he died, "Cut off my head, but don't take my body into Smyrna." This deferential respect for the body appeared with his head, was duly considered; the dead chief was decapitated, and our authoress unexpectedly saw the head when conveyed to Smyrna:—

A man, whom I had not observed, brought in a small bag of goat's hair, out of which he tumbled something, which he kicked with his foot. I looked down mechanically, and there lay the poor ferocious head! It was small, with insignificant, mean-looking features, but there was nothing very ghastly about it. The dark hue of the skin, even in ordinary death, prevents that; and I suppose he having been shot and killed suddenly, in this case, made it less so than usual. As all superstition of a decapitated human head did not seem to me so horrible as I had fancied.

We cannot find room for the pictures here drawn of Turkish domestic life. The wedding scenes and entertainments, Turkish music and dancing, the feast of the Ramazan, the fruit-market at Smyrna, the processes of fig and grape drying, raisin-packing, &c., are vividly yet succinctly described; and there is a very interesting account of a short residence made by the authoress at Boudjah, in the neighbourhood of Smyrna, where the English ladies enjoyed themselves by riding on donkeys, looking for shrubs and flowers; sketching the women, with their gracefully-shaped jars on their shoulders, going to the fountains; gathering almonds and walnuts, or listening to the muezzin's call to prayer in the still evening. Such scenes form a pleasing background to the fever-wards and operations of the hospital; although it is in the latter that the most thrilling interest and the real value of the volume consists. The authoress is more favourable to Turkey and the Turks than most of our writing travellers. She likes the country, the climate, the people, and their customs. Even on the score of cleanliness in their houses, persons, and dress, she thinks the poorer classes of the Turks surpass ours; but then they dislike to destroy animal life, and their fields and houses swarm with animated nature of every description, and they utterly ignore quarantine laws. Even the sun has ample work to dry up impure vapours and noxious gasses. We much prefer old England; but those who wish to know more of daily life in Turkey cannot do better than read this excellent volume—the result of acute observation, a clear head, and a good heart.

**Headaches: their Causes and their Cure. By Henry Wright, M.D. Churchill.**

Since the days when Dr. Buchan cogitated his oracle of "Domestic Medicine in the Chapter Coffee-house, and meditated upon health and disease in a first floor in Paternoster-row, what a host of "medical books" has been poured forth upon the reading public! The little volume before us is not precisely an addition to this class of works, though it may be said not to disregard the old author's rule in physic "Always to content the patient when it can be done without doing him any prejudice." Dr. Wright adduces the fact, which is undoubted, that the frequency of headaches increases in communities as they advance in civilisation. This is especially noticeable in two very opposite varieties of constitution: first, in nervous and hysterical people; secondly, in those who are habitually free livers. These two classes represent a large number of the sufferers from headaches; and their very existence is almost necessarily identified with that of a high state of civilisation. "No one," says Dr. Wright, "ever heard of a squaw afflicted with hysteries, or of an epicurean Red Indian. Indeed, I learn from good authority that among the primitive tribes in North America, and in the South Sea Islands, headaches are almost unknown." Here, then, is a case made out for the publication of such a work as the present, a hundredfold more evident than when the Paternoster-row physician wrote his empirical motto of "The knowledge of the sufferers from headaches is half its cure." Dr. Wright does not deal in panaceas of this doubtful kind. He does not aim at

the thousand natural shocks that flesh is heir to:

but he strikes at one class by simple remedies; and although, we know, it often beneficially bestowed as a warning sign of a disease that becomes the more difficult to cure in proportion as the first symptoms are neglected, and which can be removed only by the aid of weapons that none but skilled hands should employ. Here, then, is the principle of Dr. Wright's little book, which will be highly prized by sensible readers:—

Although the common sense of an educated person may often lead him to judge rightly whether the simple means at his own disposal are sufficient to afford relief; yet, if rightly guided, it might do more. It might warn him of the risk he often runs in allowing so simple an ailment as a headache to proceed unchecked. It is true that a little knowledge is a dangerous thing; but even this is surely better than the ignorance which blindly betrays to danger.

The subject is divided into two parts:—1. Headaches, their Varieties and Symptoms; 2. Headaches, their Causes and Treatment. Their causes are systematically treated; and in an appendix are given some fifty formulæ applicable to the several cases indicated by marginal numbers. The work is throughout written in a popular manner: there is no affectation or professional pedantry; but the substratum of the book is common sense and great success in disabusing the reader of error. The arrangement of the subject is admirable; the illustrations are pertinent and attractive; and neither Hunter, Wadd, nor Kitchiner, in their volumes of medical gossip, is more inviting than Dr. Wright upon that common source of annoyance and discomfort—headache.

## THE STRANGERS' HOME.

On Saturday week his Royal Highness Prince Albert laid the foundation-stone of a building, to be called "The Strangers' Home," designed to supply a manifest and long-felt desideratum in the charitable institutions of the metropolis, by affording all the comforts and advantages of a home to natives of India, Arabia, Africa, China, the Straits of Malacca, the Mozambique, and the Islands of the South Pacific, who may require them during their temporary sojourn in London. No man can have walked the streets of our political emporium without being moved to commiseration by the utterly wretched condition of many of the Lascar seamen and others from kindred climes—friendless, homeless, and destitute—in a country far distant from their own, speaking a language altogether unintelligible to the native population, and hearing one they are equally unable to understand. These and such as these are the classes mainly contemplated by the founders of the Home. The building will be capable of accommodating 250 inmates, with apartments for the superintendent, a hospital, dispensary, shipping and secretary's offices, and furnished throughout, including lighting, warming, hot and cold baths and lavatories, will cost nearly £8000, besides £1250 paid for the freehold of the site, which is close to the junction of the East and West India Docks-road, in the immediate vicinity of Limehouse Church. The object of the directors is to offer to all Oriental strangers who visit England a comfortable and respectable lodging, with wholesome food, at a cost which it is presumed they can afford, and which shall render the institution self-supporting. Arrangements will also be made for taking charge of their money and other property, when desired, for making remittances to their families and friends, tendering them advice and affording them information, protecting them from imposition, procuring them employment in cases where it is provided by them with instruction in the English language. Nearly £4000 has been subscribed towards the institution, including a gift of £500 by the Maharajah Dhuleep Singh, and contributions amounting to £100 by other natives of India.

The Prince Consort arrived precisely at four o'clock, and was received by the Earl of Chichester, heading a deputation of the directors of the Home, including Major-General Alexander and others, his Highness the Maharajah Dhuleep Singh, Bishop Carr, Colonel Sykes, Chairman of the East India Company, Sir Erskine Weir Hogg, M.P., Mr. Mangles, M.P., Capt. Shepherd, and several other directors of the East India Company. Besides the Maharajah Dhuleep Singh several other distinguished Orientals were in attendance in their magnificent national costumes, including Nawab Meer Jaffer Ales Khan, Bahadar of Surat; the Syrian Archbishop, three Parsee bankers, several Mahrematan, Burmese, and Chinese gentlemen, and many others. The young Princess of Coorg was also present and witnessed the ceremony.

The Earl of Chichester, having explained to the Prince the object of the institution, proceeded to direct the attention of his Royal Highness to the distressed and helpless condition in which, in the majority of cases, the natives of other countries employed in our commerce found themselves upon landing for the first time in this country.

Mr. C. L. Bracebridge, the architect of the building, was then introduced by the Earl of Chichester to the Prince, and explained to his Royal Highness the ground-plan and details of the proposed building.

The Bishop of Bombay having offered up a prayer suitable for the occasion, the ceremony of laying the stone commenced.

A case containing one of each of the coins of the realm, and also a rupee or sixteen-ana piece, an eight-ana piece, a four-ana piece, and a two-ana piece, in silver, was duly deposited in the receptacle prepared for it in the stone. Over these was laid a brass plate bearing an inscription. A richly-chased trowel was then handed to the Prince, who forthwith proceeded to lay the stone in due form.

The ceremony was concluded by the band, next sang the 117th Psalm.

The Maharajah Dhuleep Singh, addressing his Royal Highness in English, said:—On the part of the natives of India and other strangers from distant lands, for whose benefit this institution was to be established, I beg to thank his Royal Highness for his kindness and consideration in performing the ceremony which had now been completed. Having since his arrival in England had opportunities of observing the great necessity which existed for an institution of the kind, he had thought it his duty to assist as far as lay in his power in its establishment; and through the unwearied benevolence of Colonel Hughes, Major Lavie, and the other gentlemen of the committee who had so earnestly and successfully exerted themselves in its behalf, he had the happiness of seeing its first stone laid by his Royal Highness as an earnest of his approval of its object. He trusted that through God's blessing it might yet take a high place among the many useful institutions of this great metropolis, and he begged again to assure his Royal Highness of his heartfelt gratitude.

Colonel Sykes, the Chairman of the East India Company, also addressed his Royal Highness, and expressed to his Royal Highness the grateful acknowledgments of the subscribers for having given the invaluable prestige of his approval of their undertaking by his presence there that day, and by the part he had obligingly taken in the proceedings.

Prince Albert said: It has, as you justly suppose, given me great pleasure to co-operate with you in the good work, the foundation of which has this day been laid. It appears to me to be our duty to assist and protect, as far as lies in our power, from the dangers and temptations to which their helplessness and ignorance expose them, the natives of remote regions who are brought to our shores, assisting in our commerce, and contributing by their labour to the wealth of this country. (Cheers).

In accordance with Oriental custom bouquets were then presented to the Maharajah and the other native princes and gentlemen. The Maharajah then presented a bouquet to Prince Albert, with a handkerchief for her Majesty, which the Prince was graciously pleased to accept. The gentlemen of the Prince's suite were then presented, by some of the most distinguished natives of India, China, and Africa, with handkerchiefs having the elevation of the Strangers' Home imprinted on them. The band played the National Anthem, and his Royal Highness left amid the cheers of the people assembled at the ceremony. Handkerchiefs and bouquets were also presented to each of the Orientals who had assembled to the number of 200 to testify their interest in the proceedings.

## "THE BOTTLE OF SMOKE" AT THE ADELPHI.

This little piece continues to justify the favourable opinion we expressed of it on its production. The plot, as we have observed before, is remarkably slight, but the merriment which it elicits is unbounded. This is no doubt attributable in a great degree to the excellent acting of Wright, who plays the part with an evident relish of the humours of the situations. Pretty Miss Wyndham proves herself a most natural and earnest actress in the little part of *Lucy Morton*, and really seems the clever industrious artist she assumes to be. Our illustration represents the close of the piece, where *Mr. Cambricson*, convinced of his folly in suspecting *Lucy*, endeavours to make amends by turning fuchsia-doctor himself. We have no doubt but this merry little piece will have a long and prosperous run.

Tomb of William Cobbett.—Over the slab which has hitherto covered the grave of William Cobbett in the Churchyard of Farnham, Surrey, a tomb has just been erected by Mr. Thomas Milnes, the sculptor who executed the statue in recently put up in Jermyn-street. The tomb is made of a durable stone from the quarry of Roch Abbey, in Yorkshire. It stands near the porch of the church, is of solid workmanship, oblong in form, and in style following the plainest old English architecture. On one panel the inscription from the slab, is:—"William Cobbett, son of George and Anne Cobbett born in the parish of Farnham, 9th of March, 1762. Enlisted into the 54th Regiment of Foot in 1784, of which regiment he became Sergeant-Major in 1785, and obtained his discharge in 1791. In 1794 he became a political writer. In 1832 was returned to Parliament for the borough of Oldham, and represented it till his death; which took place at Normandy Farm, in the adjoining parish of Ash, on the 18th of June, 1835." On the panel opposite:—"Anne Cobbett, Daughter of Thomas and Anne Read, and wife of William Cobbett; born at Chatham, 28th of March, 1774. Married at Woolwich, 5th of February, 1792. Died in London, 19th of July, 1848."

*NEW PUBLICATIONS, &c.*

MESSRS. HURST and BLACKETT (successors to Mr. Colburn) have just published the following New Works:—

MEMOIRS of the COURT of the REGENCY, from Original Family Documents. By the Duke of BUCKINGHAM and CHANDOS, K.G. 2 vols., 8vo, with Portraits.

Full descriptive lists can be had on application.

CHAPPELL, 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, composed by JOHN CRAMER, the instrument has (unlike the ordinary Cottage Pianoforte) Three Strings, and the fullest Grand compass of Seven Octaves, F to F. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description, the tone is round, full, and rich, and the power equal to that of a Richard Grand. The case is of the most elegant construction, in rosewood, the touch elastic, and the repetition very rapid. Every possible precaution has been taken to ensure its standing well in tune. Chappell and Co. specially call the attention of the public, the pianoforte makers, and merchants to the Foreign Model, feeling assured that no Pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and if not found perfectly satisfactory within twelve months of the purchase.—50, New Bond-street, London.

MUSICAL-BOX REPOSITORY, 32, Ludgate-street (opposite Everington's), London. |---|---|---|
| Out-patients relieved week ending 7th June | ... | ... 831 |
| New Cases admitted as Out-patients, ditto | ... | ... 121 |
| In-door Patients | ... | ... 52 |

It was only on the personal responsibility of eight members of the Committee that the means were provided for opening and furnishing the new Hospital, and, though the contributions obtained at the last Anniversary will, to a considerable extent, meet the pressing liabilities, the Committee desire to remind the friends of the Charity that there is still a large debt upon the building, and that the annual income is altogether inadequate to defray the current expenditure.

Donations will be most gratefully received by the Treasurer, or by the Secretary, at the Hospital.

Treasurer, H. EDMUND GURNEY, Esq., 85, Lombard-street.

Bankers, ALEXR. BARCLAY and CO., 54, Lombard-street.

H. SEWELL, Honorary Secretary.

RICHARD C. SLATER, Secretary.

City Office, 6, Liverpool-street, June 9, 1856.

TO INVALIDS.—A PHYSICIAN who is unmarried and has no family, and resides in an elegantly-furnished house, with pleasant and retired garden attached, in the healthiest of the western suburbs of London, is desirous of receiving into his house an INVALID GENTLEMAN as BOARDER. Who would require very little attention, and pay £2 2s. per week. For further particulars and references apply by letter, prepaid, addressed to B. S., care of John James, Esq., Surgeon, 13, Pall-mall, London.

SCARBOROUGH, the Queen of Watering Places in the North. PHOTOGRAPHY.—J. EASTHAM'S PHOTOGRAPHIC EXHIBITION is OPEN for Admission Free. Portraits re-coloured in the highest style of Art, opposite Mr. Theakston's Library, 13, Great Nicholas-street, Scarborough.

MEDICINE CHESTS, containing Eleven Stopped Bottles, Scales, Weights, and Measure, in Polished Oak Case, with Lock and Key. Mahogany Chests of equally useful and complete prices, at WILLIAM T COOPER'S 26, Oxford-street, London.

DEAFNESS.—Patronised by Royalty.—PINE'S ACOUSTIC REFLEXIONS are the greatest relief when the tympanum is not entirely destroyed. They can be worn with no hat or bonnet. To be obtained of Mr. W. Pine, at his Aerial Depository, 44., West Strand

DEAFNESS.—A Newly-invented Instrument for relieving cases of Deafness, under the SOLE AGENCY of MR. [illegible] Object Glass of any Invisible Tympanum. It [illegible] the Ear, and is not perceptible to the most scrutinising observer. It is of such slight weight in the head that it cannot be felt. It is the most useful [illegible] and assists both to hear distinctly a church and the public assemblies. Patent specialities, with drawings of the most transparent brilliancy, for Weak and Defective Eyesight.—Messrs. J. and H. SOLOMONS, Opticians and Aerists, 39, Aldersgate-street, Piccadilly (opposite the York Hotel)

CAUTION.—PATENT EVER-POINTED PENCILS, S. MORDAN and CO. are daily receiving complaints of the inferior imitations of their Pencils, and therefore, S. M. and Co. therefore caution all Purchasers to see that the Patentee's name is engraved on each, as agents eighty in the country of stationers are constantly pressed on the public, as they yield a greater profit to the vender, but will be found of no value in use.

Perhaps the same caution is even more strictly necessary when Patent Refillable Lead Pencils are purchased, as the refills are useless. Unless these have been most accurately gauged to the exact size of the pencil point, they will be found utterly useless.

Each box of Genuine Lead Pencils is stamped "Warranted S. Mordan and Co."—Manufactory, 23, City-road, London.

FINE ARTS.—S. MORDAN and CO. beg to inform the Public that they are enabled to supply a genuine pure CHROMATROPE LEAD PENCIL, without a particle of grit or any other impurity. S. M. and Co. have no hesitation in asserting that such a pencil as this will be found to have never yet been produced, and is confirmation of this, the highest testimonials from all the first artists in London, and engineers have been received, the following is an abbreviated list:—

| | |
|---|---|
| Copley Fielding, Esq., R.W.S. | C. L. Eastlake, Esq., P.R.A. |

# THE ILLUSTRATED LONDON NEWS

No. 807 —VOL. XXVIII. SATURDAY, JUNE 21, 1856. [WITH A SUPPLEMENT, FIVEPENCE.

## PEACE WITH AMERICA.

As we last week ventured to predict would be the case, the British Government has not thought fit to imitate the uncourteous, if not unfriendly, conduct of the Cabinet of Washington. Mr. Crampton and the three British Consuls have been dismissed—somewhat ignominiously—but Mr. Dallas is to remain at the Court of St. James's. Public opinion will approve the wise forbearance of the British Government. This country is too strong—has too splendid a fleet—too efficient an army—too patriotic a people—and too capacious a treasury—to be suspected of unworthy deference to the United States or any other Power in either hemisphere. There is no risk that her generosity will be misunderstood, or that her patience will be attributed to pusillanimity. The American people know her mettle, as they know their own, and will not suffer Mr. Pierce and his moribund Administration to provoke a war that would inflict incalculable injury upon both nations, and stamp indelible disgrace upon the one that should unnecessarily commence it.

Reckless as Mr. Pierce has hitherto shown himself, it is not likely that he desires to push matters to the last extremity. He has run about with his torch at the edge of the powder-magazine to show his daring, and to win the applause of such "barren spectators" as have a relish for such feats; but he would probably regret as much as any man in America or England if an explosion were to result. He has already evinced a disposition to withdraw from the perilous contiguity of combustible material, and has accompanied the dismissal of Mr. Crampton and the three Consuls by the exposition of the reasons on which he grounded the act;—reasons which will go far to satisfy the English public that their interests will not suffer by the transference of Mr. Crampton to some other sphere of usefulness. The Enlistment question, that at one time threatened to be so exasperating, is virtually at an end. It has expired with Mr. Crampton's mission, and the world will hear no more of it. Mr. Crampton and the Consuls have been sacrificed to its *manes*, and, if the United States are satisfied, Great Britain is well content.

The Central American question is more difficult. Mr. Dallas has received full powers from his Government to negotiate a final settlement of all the points in dispute. It must be confessed that the American Government and people start in the discussion with a considerable advantage over ours. They have thoroughly made up their minds, and have studied the subject, not only in its relation to their own interests, and to various political necessities scarcely appreciated or even understood, on this side of the Atlantic, but in its relation to the temper of the people of England. They know exactly what they want. They know, moreover, that it is of vital importance to them to obtain it, and that it is not of vital, if of any, importance to England to gain a diplomatic or any other victory over America in this matter. They will, therefore, persevere till they carry their point. Though Mr. Dallas has power to negotiate, it is only in one sense. If he fail to persuade the British Government to acquiesce in his interpretation, either of facts or treaties, he has no power to accede to those of his opponents, but can merely give them another opportunity of yielding, by referring the matter to arbitration. We shall not presume to offer any opinion upon the strict law or justice of the case; to say whether Great Britain have a right, *de facto* or *de jure*, to the Bay Islands; or declare what we may consider the equitable construction, the latent sense, or the obvious and palpable meaning of the Clayton-Bulwer Convention; but we may broadly state our own impression to be that the British public cares very little about the matter, and that it would far rather yield to the Americans all they want, if the thing could be done with the least show of dignity, than spend one shilling for gunpowder to bombard their towns or slay their citizens. Far better in every way that the shadowy King of Mosquitia should disappear altogether—like the red men in Massachusetts—and that all the country, from Texas to Panama, should be inhabited by enterprising, go-a-head traders

THE INUNDATION AT LYONS.—SKETCHED BY GUSTAVE DORÉ.—(SEE NEXT PAGE.)

of the Anglo-Saxon breed, than that Great Britain should exercise a nominal protectorate over a semi-savage and useless potentate, or maintain a barren and contested sovereignty over any portion of the islands or the continent of Central America. If Brother Jonathan will but keep cool, avoid angry words, and give British diplomacy—such as it is—a few months for quiet consideration, the whole affair will, we are convinced, be satisfactorily settled; and the United States will obtain the coveted lands, perhaps without any very great advantage to the Union, but certainly with no appreciable disadvantage to England.

There is one point in the future relations of the two countries on which sufficient attention has not yet been bestowed by the British Government. Whenever the Americans have to appoint an Ambassador to London, they select the very best and most illustrious man at their command. They may not always have the best man for President, but they never fail to send one of their worthiest men to the Court of St. James's. It is the "crack" Embassy—the highest in rank, in honour, and in influence. But the British Government does not return the compliment. The Americans think that an embassy to Washington should be as important to the English people as an embassy to Paris, Berlin, Vienna, or St. Petersburg. But the British Government thinks Washington of less consequence than Lisbon or Munich. The Americans are right, and the English Government is wrong, in this respect. When we next send an Ambassador to Washington, let a man of acknowledged talent, and of high rank, be selected; and the American people will take it as an earnest of our respect and good will towards them. Among such men as Lord Carlisle, Lord Granville, and Lord John Russell—if either of those eminent persons would accept the post—it would not be difficult to make a choice that would be acceptable to America and advantageous to England. Lord John Russell laboured under some disadvantage at Vienna, from his comparative ignorance of the French, and his total ignorance of the German, language; but at Washington there would be no disqualification on this account; and his high talents, his estimable character, and his illustrious career, would recommend him to the cordial reception of the American people. If the Government could be induced to offer, and his Lordship to accept, the mission, the author of the Reform Bill would add a crowning benefit to the many which he has conferred upon his country, and entitle himself, as a pacificator, to the respect of America and the gratitude of England. But, if for any reason Lord John Russell should be unwilling or unable to undertake the dignity and the responsibility, there are other statesmen of rank and position who might be induced to render this service to their country. The Government must sooner or later bethink itself of raising the Embassy at Washington to the dignity that should belong to it, unless—which we do not suppose—this country is to remain unrepresented in America.

## THE RHONE: ITS COURSE, AND SHARE IN THE RECENT INUNDATIONS.

"I SHOULD like," said an English lady to one of the monks of the Simplon, "to travel on an avalanche, if only for the sake of feeling what it would be like." "Madam," answered the reverend father, "I am afraid that at the end of your journey you would not be in a condition to describe your sensations." The idea, though impracticable, was original and bold; but the traveller along the Swiss valleys has dangers to confront greater even than that which formed the subject of the lady's wish.

It would seem impossible to treat of the Rhone otherwise than as the theme of tourists, the subject of romance, or the scene of historical events almost deserving this latter designation. Its very name conjures up recollections of Lake Leman, Clarens, the rocks of La Meillerie, and the glowing pages of la nouvelle Héloïse; but it is nevertheless a fact that this noble river has other claims than these, and that it has at all times excited the attention of statesmen and geographers.

Leaving the Saone and its smiling banks at Macon, and turning his back upon the hills crowned by the châteaux of Mons. de Rambuteau, and dear to the memories of Paris and the Empire, the traveller sees stretching before him till lost in extreme distance the fertile plains of La Bresse. This large tract of cultivated country was formerly covered with impenetrable woods. A few scattered clumps of trees are now the only vestiges of the ancient forests. Vineyards on both the river banks, crops of various kinds of grain, fishponds and poultry-yards, now usurp the place of the oak, the beech, the maple, and the elm. The change, though in most respects beneficial, has this bad effect—the banks, which then, firmly clamped and held together by the tenacious grip of spreading and gigantic roots, formed a natural embankment to the most impetuous river in Europe, deprived of this support, have proved powerless against the swollen current, and hence result the inundations which now so frequently follow a duration of rainy weather.

The second cause is to found in the delta of the Rhone, La Camargue, which French engineers and capitalists are yet far from having properly reclaimed, though the latter or English would, according to the most experienced opinion, have ere this have transformed into a region of extraordinary fertility.

To remove these defects two remedies appear to suggest themselves—replacing the river banks with trees, and irrigation on a grand scale. The first, besides being a process necessitating time, would also involve a heavy expense; the latter would prove a speedy, and comparatively inexpensive, undertaking. The science of irrigation is now perfectly understood by engineers, and it is while the circumstances under which France is at present labouring exist that the fittest opportunity would seem to offer itself to the combined talent of both French and English for the provision of some remedy which would place these unhappy localities in safety, and prevent the recurrence of a parallel disaster.

The English traveller who has visited France, and knows the districts through which the river Rhone runs from Lyons to the Mediterranean, can hardly form any idea of the ruin which has been caused by the irruption of these waters. The inundation includes in its ravages upwards of 560 English miles, from Lyons to the delta of La Camargue, and from Orleans to the sea through the whole length of the Isère to its junction with the Rhone—that is to say, that the waters covered a vast extent of country, not less than 600 leagues, or 1200 English miles.

There is some difference in the estimate as to the extent of territory which has been subject to these inundations some stating the area to be 600 miles in length, and others 1200 miles. But, were either of those figures correct, it would be almost impossible to form an accurate idea of the nature of the calamity itself. Let them for a moment suppose that the seas which surrounded England were to make an inroad on the coast of Devonshire, and were to sweep with one broad current through the whole length and breadth of this island, they might then, in some degree, realise the extent of the damage which France has suffered. The most fruitful parts of that country have been devastated by the floods. Nearly 40,000 human habitations have been destroyed or so seriously damaged as to require reconstruction.

These reflections irresistibly lead us to the consideration of a point in psychology not a little interesting—the far greater interest taken by mankind in the misfortunes of individuals than in those of numbers, which we can only account for by the supposition that a disaster which comprehends the destruction of a whole population is too great for the grasp of the human heart. An earthquake may swallow up a nation, and awaken, indeed, all our powers of astonishment and awe; but let a poor labourer be buried in the well he is engaged in sinking, and how quickly, how infinitely more personal, are the emotions called into play by the anxious voices which bear his still dearer cry for help, and bend all our energies to his rescue! The fate of the man rouses impulses which the fall of a nation fails to create.

The human heart is full of such phenomena, and it is for this reason that, in the history of the inundation which at present occupies the attention of all France, the mind is overwhelmed by the greatness of the calamity; it is the "episode," the "incident" which strikes up and awakens all our genuine feelings of pity and sorrow. A few among the many, such are presented to our readers by the pencil of an eyewitness.

## FOREIGN AND COLONIAL NEWS.

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday.

THE fêtes of the baptism continue to form the great subject of excitement of the moment. Happily the weather, though on Saturday somewhat threatening, has, on the whole, been decidedly favourable; and, being cooler than during the preceding week, has been less fatiguing to the sight-seeing crowd. Seldom, if ever, has the traffic in window-letting been so extensive and so expensive as on the occasion of the passage of the Imperial cortége. Not only were the windows of the dwellings, from ground-floor to garret, hired out, but numbers of shops had their fronts removed where they could not be opened, and their counters displaced, in order to establish stages and platforms, each chair on which was let at from ten to fifteen francs, while each shopkeeper had in his pay a band of gamins, or boyish idlers, to pursue the passers-by—the English more especially—and capture them if possible. Certain windows were let at upwards of £20, and in some balconies was exposed the notice—"To be let for the benefit of the victims of the inundations." A part of the decorations of Notre Dame were strikingly magnificent, but the taste that presided over the rest is extremely questionable, the introduction of gaudy colours and tinsel ornaments of the most flimsy description, bearing little analogy with the style and purpose of the edifice. The external decorations were no less brilliant than those of the interior, and were in a sort of Byzantine style. The cortége was, in all respects, singularly magnificent and imposing. The Cardinal Patrizi in a carriage drawn by eight horses, and preceded by his *porte-croix* in another carriage, led the van, attended by an escort of cavalry, but received little or no demonstration from the spectators. Much more enthusiasm greeted the approach of the Imperial infant, in (we believe) the carriage occupied by the Emperor and Empress on the occasion of their marriage, at the right and left of which rode the Maréchaux Canrobert and Bosquet, thus recalling the address of the Emperor, who, when announcing to them their new dignities, particularly recommended to them the protection of his son. The Emperor and Empress were also greeted with much warmth. Her Majesty's dress was white over a blue skirt, and a diadem of brilliants encircled her head. After the ceremony the Emperor and Empress proceeded to the Hôtel de Ville, to partake of the magnificent banquet prepared for them, and the Prince Imperial returned to the Tuileries, whence, in the evening, he was reconducted to St. Cloud. The Duc d'Albe alone represented the family of the Empress on this occasion, the Duchess and the Comtesse Montijo not having sufficiently recovered from the fatigues of their late journey.

A whisper is beginning to arise that before many months have expired there may be a prospect of a second Imperial christening: such an announcement seems to us at least premature, but, true or false, we wish not to be behindhand in mentioning its existence.

In the midst of these rejoicings fresh details full of the most painful interest are daily arriving from the scenes of the inundations. Among the most horrible are the accounts of the graveyards and cemeteries, torn up by the torrents, and the skeletons and bodies, more or less decomposed, caught in trees and left hanging there after the subsiding of the waters. Certainly in no circumstances of the career of Napoleon III. have the sympathies of all been so warmly and entirely drawn to him as on this late occasion. In one instance, when he was standing up to his knees in water, among the ruins of one of the most populous and most suffering parts of Lyons, a well-known demagogue, whose antecedents presented not a few judicial condemnations on political grounds, approached the Emperor, saying, "Monsieur, I do not partake of your opinions, or belong to your party, but I approve of what you are doing, c'est très bien." It is said, moreover, that the president of one of the secret democratic clubs at Lyons has written to the Emperor to announce to him, in his own name and in that of all its members, that the association is, in consequence of the gratitude and admiration excited by his Majesty's late efforts, dissolved, and that all take the voluntary engagement no longer to oppose themselves to his dynasty.

It appears that M. de Lamartine has resolved to appropriate to the victims of the inundations the whole of the produce arising from the sale of his "Entretiens," which publication counts about 60,000 subscribers, at twenty francs a year. The circumstance, if true, is an instance of almost unexampled generosity, as, if the poet's statement that this is the only resource left him, and that the success or failure of his labours is a question of life or death be unexaggerated, he renounces all the fruits of his arduous toils, and is again plunged into the gulf of ruin from which their success—a success nearly, if not wholly, sufficient to relieve him from his desperate position—was about to extricate him.

M. Couture, the painter of one of the pictures that has lately excited the most attention, "l'Orgie Romaine," has been charged by the Government to represent the scene of the christening. It is said that the price of the picture is fixed at 80,000 francs, upwards of £3000.

Last week took place the marriage of Mdlle. le Hon, daughter of the Comtesse le Hon, with the son of the Prince Poniatowski. The ceremony was conducted with the utmost splendour. The Prince Napoleon attended. The Cardinal Donnat, Archbishop of Bordeaux, gave the nuptial benediction; and nearly all the Court, with a large number of the Senate, took part in the celebration of the union.

Nadar, the celebrated draughtsman and photographist, is occupied in the erection of a princely *atelier* on a large piece of ground, well planted with fine trees, in the Rue St. Lazare; and Diaz has just completed a beautiful house and studio in the Mont St. Georges, built in the style of Louis XIII., after drawings executed by the artist himself.

The Sultan has transmitted by his Ambassador the sum of 40,000f. for the benefit of the *inondés*.

The scholars of a school in Paris, on hearing of the trait cited in our last week's letter respecting the ouvriers of the Faubourg Montmartre, requested that no meat should be cooked for them for one day, and that the products of the saving should go to the same charity.

The Opéra Comique will shortly bring out a posthumous work of Adam with a poem of Scribe.

### AMERICA.

By the steam-ship *Baltic*, which arrived at Liverpool on Wednesday evening, we have news from New York to the 7th inst.

The democratic convention at Cincinnati terminated their labours on the 6th. The ballot delegates unanimously nominated Mr. Buchanan, Mr. Dallas's predecessor in this country; the opponents were Pierce and Douglas. The convention on the second ballot nominated John C. Breckenridge for Vice-President, which was also adopted by a large majority.

The effigies of President Pierce and Preston S. Brooks had been hung in front of the State-house, at Concord, New Hampshire. Indignation meetings in reference to the Brooks outrage continue to be held throughout the States.

Advices from Kansas reported that orders had reached Fort Leavenworth placing the command of all the troops in the territory with General Harvey. Lawrence is reported quiet. The correspondence of the *New York Tribune* says that—

A hundred armed men left Westport, Mobile, last Saturday to scour Southern Kansas and make the country, as they said, "too hot for the Free State people." Guerilla parties were scouring the territory, and collisions were occasionally occurring; but the general disposition of the free people is to remain quiet and pursue their farming. Settlers were coming into the territory in considerable numbers from Indiana and Illinois.

## EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Her Majesty has signified her intention of honouring the Marquis and Marchioness of Westminster with her presence at Grosvenor-house, on occasion of the fête to be given by the Marchioness on the 26th inst.

The Emperor of the French has presented, through the Earl of Ducie, the sum of 1000f. to the Sailors' Institute at Shadwell.

The Municipal Council of Nantes has resolved that a request should be respectfully presented to the Emperor to accept from that town a residence for the Prince Imperial.

On the 10th inst. King Leopold and all the Royal family of Belgium accompanied the Countess de Nemily and the Duke and Duchess of Rencourt from Laeken to Brussels. The Duke and Duchess of Brabant and the Count of Flanders accompanied the ex-Queen to Ostend, where they arrived at five o'clock in the afternoon.

The Emperor Alexander has ordered that only those tradesmen who supply the Imperial couple shall in future be permitted to place the Imperial coat of arms over their doors, whilst those who furnish the Grand Dukes and other members of the reigning family are only to mount a shield containing the initials of such member, surmounted by a crown.

Her Majesty and his Royal Highness Prince Albert have forwarded to the Lord Mayor donations of one thousand and five hundred pounds respectively in aid of the fund now raising at the MANSION-house for the relief of the sufferers by the inundations in France.

The French Emperor has given 600,000 f. out of his private *cassette* to the sufferers from the inundations of the Rhone and Loire.

The distribution of the Queen's medals to the Sardinian troops at Turin passed off with great success. There was an immense concourse of spectators from all parts of Italy.

The Czar Alexander has conferred the order of Saint Anne of the first class upon General Edgar Ney, who was lately sent to St. Petersburg on an extraordinary mission.

The Grand Duke Michael keeps Prince Charles of Prussia and the artillery department, of which the latter is Grand Master, on the continual qui vive. Scarcely a day passes without the Grand Duke attending at the drill and practice of field and siege batteries.

The veteran General Neumann, first aide-de-camp to the King of Prussia in waiting, and fifth senior officer not of Princely rank in the army, has received from the Czar the insignia of St. Alexander Nevsky in diamonds.

Mr. Crampton, late British Minister of the United States of America, arrived in London on Monday, and had an interview with the Earl of Clarendon. Mr. Crampton also paid a visit to Viscount Palmerston.

His Excellency the Ambassador of France left town on the 13th inst. for Paris in order to be present at the baptism of the Imperial Prince on the following day.

The ex-King of Oude landed at Folkestone on Wednesday afternoon, accompanied by E. L. Coffey, Esq., and suite, and left for town by express train on the South-Eastern Railway.

The Dowager Queen of the Netherlands has reached Warsaw on her way back to the Hague, but she will first visit a German bath.

Accounts from Christiania represent the reception of the Crown Prince in that city, in his new capacity of Viceroy of Norway, as most enthusiastic and brilliant, and his arrival had been celebrated by great rejoicings and numerous festivals, balls, illuminations, and other galeties.

Governor Sir G. Barkly has arrived in this country from Jamaica; and, after receiving instructions from her Majesty's Government, will proceed to his new government in Australia.

The Emperor Alexander II. accepted during his late visit to Berlin, from the King of Prussia, the Grand Cross of Commander of the Order of the Royal House of Hohenzollern.

Sir Colin Campbell has fixed Monday, the 30th inst., as the day of his arrival in Glasgow. He will take up his residence on that day at Possil House, as the guest of Sir Archibald Alison, and make his first public appearance in the city of his birth on the following day.

Russia has withdrawn her protest against the nomination by Turkey of Prince Stourdza as a member of the Principalities Commission.

Mr. Joseph Fowler, President of the St. George's Society, has been appointed Acting Consul at New York.

The hand of the Spanish Infanta Donna Amelia was demanded at a solemn audience, on behalf of the Prince Adalbert of Bavaria, on Monday last.

Count de Persigny has been raised, by decree dated June 16, to the dignity of Grand Cross of the Legion of Honour.

Lord Stanhope and the Marquis of Londonderry have arrived at Vienna from the Crimea. They are en route for the springs of Marienbad.

The ex-King Don Ferdinand arrived at Lisbon on the 6th inst. from his visit to Spain.

By order of the French Emperor medals commemorating the christening of the Imperial Prince have been distributed to all the children of the colleges, academies, and schools, and also to the sub-officers and soldiers of the army of Paris.

Miss Nightingale is expected to arrive in England about the middle of next month.

M. De Kisseleff, Russian Ambassador to the See of Rome, passed through Venice on the 7th inst., on his way to his post.

Mr. Worledge, of the Middle Temple, will be the new judge of the Suffolk County Courts, in succession to the late Mr. Eagle.

The last surviving son of the poet Wieland died on the 10th inst., at Weimar.

On Monday evening Mr. Henry Mayhew delivered a lecture at the Polytechnic Institution to a very numerous audience (composed in great part of the industrial classes), on "The curiosities of life among the labourers and poor of London."

A letter from the Count de Paris is in circulation, in which he protests against the notion of a fusion, and announces that his political course will be in accordance with his father's will.

Mr. W. Bernard M'Cabe has resigned the editorship of the *Dublin Weekly Telegraph*—one of the newspaper organs of the Irish Roman Catholic party.

Christians have been, for the first time, admitted to join the procession of the Bairam, and to kiss the hand of the Sultan.

Mrs. Fanny Kemble has arrived in the United States, and intends, it is said, to retire to her estate at Lenox, Massachusetts.

Giovanni Ruggeo, lately tried in Florence for reading and circulating the Bible, has been acquitted.

The bell brought from Sebastopol which the French Emperor has given to Notre Dame has arrived at the Cathedral.

It is understood that there will be a review in Hyde-park on the 28th inst., the anniversary of her Majesty's coronation.

In Hanover a vast number of Communist circulars have been in circulation, emanating from a society of Germans, whose head-quarters are said to be in London.

Prior Park, the seat of the once famous Roman Catholic College, is to be sold on the 24th inst.

The Grand Council of Ticino has passed a bill establishing equality between sons and daughters in the case of intestate successions.

A movement for an advance of wages has commenced among the power-loom weavers and winders of Preston, which threatens to assume the character of another strike.

The cholera has again appeared in the western and south-western suburbs of Vienna. There have been cases in the Gumpendorf, Shottenfeld, and Alser suburbs, where the disease was very prevalent at this time last year.

It appears by a recent return that the number of bushels of malt brought into charge in 1853-4 was 41,020,381; in 1854-5, 35,403,603; and in 1855-6, 38,584,350.

The jewels recently stolen from the Madrid Chapel, and which were worth 7,000,000 reals, have, in consequence of a communication made by one of the thieves, been found buried in a vacant piece of ground near the principal prison.

The Act for the Survey of Great Britain is to continue in force till the end of the year 1858.

The Spanish Government has accepted the mediation of France in the difference with Mexico.

The value of the goods exported from the United States to Canada, under the Reciprocity Treaty, was 9,500,000 dollars. The value of the goods exported to Canada in 1855, of United States' product or manufacture, was £141,764.

The Madrid journals of the 12th inst. announce that the Government of Cuba had reported that the most perfect tranquility prevailed in the island, notwithstanding the insult which Spain had received in Mexico he had sent to Vera Cruz a frigate and two smaller vessels.

## THOUGHTS IN THOROUGHFARES.

I HAVE on a former occasion alluded to the perambulator nuisance on the pavements, which, according to a report in the newspapers, has driven an irritated old gentleman to a police court for redress. It is evident, however, that the infants' friends are so numerous as to leave little chance of sympathy to an elderly complainant; and accordingly the veteran who went to state his grievance retired amid the "titters" of his audience. The children's party appears to be so strong at present that the pavements must be abandoned to the equipages of the juvenile population, while the maturer portion of the public makes its way as it best can, by dodging the carriages drawn by horses on the one hand, and those propelled by nursemaids on the other. The great street-organ question is another subject connected with the quiet enjoyment of the public thoroughfares in which the juvenile interest may be said to clash with the convenience of the public in general. It is hopeless for the gentleman engaged in philosophical reflections or mathematical calculations at No. 1 to attempt to get rid of the nuisance of that music while there is a mater-familias at number two who insists on her baby being danced at the window to any tune that may be ground on the organ below. Street music may be a real blessing to mothers, but it is often a serious inconvenience to fathers; and a determined band with their brazen instruments of torture will continue their operations in spite of all the remonstrances of the angry gentleman over the way, so long as encouragement is to be had from a smiling party of females and juveniles opposite. The only way to put down street-music—if it ought to be abolished—is to make it penal to patronise it, just as it has been proposed to put an end to street begging by inflicting a fine on every one convicted of giving money to a mendicant. No less an individual than Mr. Babbage appeared to complain the other day of the disturbance of his scientific pursuits by a street-musician who had answered remonstrances with threats, and who was very properly fined by the magistrate. The protection of Mr. Babbage from any temporary stoppage of his intellectual machinery by the hand-organ nuisance is a matter in which the public may be said to be concerned, for his scientific labours are far more profitable to society than the "Barrel-Organ's Daughter," or any other equally popular air can possibly be to the children of his neighbour opposite. It may be all very well to denounce an enemy to street organs as "the man who hath not music in his soul," but a man may have plenty of music in his soul without wishing to have an extra supply laid on through his windows. It is true that "music hath charms to soothe;" but, under certain circumstances, it has also power to irritate.

The penny-a-liners seemed determined to make the most of their last opportunity in dealing with Palmer, and his execution was made the medium of introducing a quantity of irrelevant matter, under the various heads of "another account," "further details," and "additional particulars." Among other equally interesting matter, a sort of biographical account of the hangman was given; and the important fact has been duly chronicled that Palmer had "salad" on more than one occasion during his imprisonment at Stafford. It is strange that the "dressing" was not described at full length, for a judicious penny-a-liner might have made threepence at least by the ingredients. If, however, we were not told how the salad was dressed, no such omission occurred with reference to the hangman, for his costume was described with much minuteness. The set of Madame Tussaud's latest "additions" to her collection of culprits still must the eye on the walls, and in other places where the announcements of public amusements are exhibited; but Palmer will no doubt cease to be the star of Baker-street when he is eclipsed by some other more recent criminal. Perhaps in time the wax of which he is composed will be "run down" into some other form, and the materials employed in moulding the murderer may be hereafter used in making a philanthropist, if such a character is eligible for admission into such very distinguished company as that which Madame Tussaud is surrounded with.

Notwithstanding the promises of the General Omnibus Company, the thoroughfares are not yet supplied with those commodious vehicles which will prevent the necessity for still crushing one's hat against the roof, treading on the feet of one's fellow-passengers on entering or quitting the conveyance, and maintaining a cramped position, to prevent collision with the knees of the person opposite. Convenient omnibuses are said to have been seen here and there in different parts of town; but, if they exist at all, they are by no means general; and at the West-end a single one is understood to have been put upon the Brompton-road, where it serves rather as a vehicle for the satirical observations or "chaff" of the drivers and conductors of the old machines than as a vehicle for public convenience.

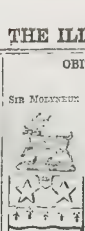
The metropolis has now been for some months in the hands of the new Board of Works, which seems to be by no means unanimous in its movements. Any great improvement in the aboveground communications of London must not be expected until the work to be done below the surface—the drainage, with which the Board of Works is especially charged—has been agreed upon. At each meeting some new motion is brought forward, an amendment is proposed, a debate ensues, and an adjournment generally follows. In public bodies it may be remarked that the constant repetition of motion after motion is a serious check on movement. At present the grand question is that of an "outfall" for the drainage of London; but while the members of the Board are continually falling out among themselves, an "outfall" of a more useful kind is not easily agreed upon.

Even the most philosophic of pedestrians would scarcely look for heroes and heroines among the professional mendicants who throng the streets; but we are assured, on the faith of a gentleman who has paid much attention to the subject, and who has been lecturing on it recently at the Polytechnic Institution, that the rags of our ragamuffins conceal, or rather garnish, much true nobility. Among other specimens of Nature's aristocracy the street clown is said to be entitled to a high position—a fact which would not have been suspected by those who had seen him merely swinging a ballabout at the end of a string to keep back the boys, and performing some rather ordinary evolutions on a piece of carpet in the middle of the carriage-way. I am by no means inclined to dispute the result of the observations of the gentleman to whom I allude; and it is certainly a more reasonable as well as a more wholesome theory, that heroism is to be found in the mountebank, than that the criminal classes should be elevated into the principal characters of plays or romances, as they have sometimes been by novelists and dramatists. There is no doubt that there is much kindness towards each other among the poor, but there is a kind of endurance sometimes to be met with among the street population that is not altogether respectable. The voluntary exposure of shoeless feet in cold weather is often a self-inflicted penance which is voluntarily suffered because it is found to pay; but the endurance of street beggars is of a different kind from that which has been noticed as characteristic of the street clown, of whom a type is presented in the modern play of "Belphegor," which may fairly win the admiration of

A WALKING PHILOSOPHER.

## OBITUARY OF EMINENT PERSONS.

### SIR M. H. NEPEAN, BART.



SIR MOLYNEUX HYDE NEPEAN, second Baronet, of Bothenhampton, and Loder's Court, in the county of Dorset, died at Lee Hall, near Hexham, Northumberland, on the 4th inst. He was the eldest son of the first Baronet, the Right Hon. Sir Evan Nepean, many years Under Secretary at State, and M.P. for Queenborough and Bridgenorth, by his wife, Margaret, daughter of Captain William Skinner. He was born the 20th September, 1783, and succeeded to the family title and estates in Bornelsshire on the death of his father, the 2nd October, 1822. Sir Molyneux was for nearly thirty years clerk to the Supreme Court in Jamaica. He married, first, 30th August, 1813, Charlotte, youngest daughter of Philip Eglestone, Esq., by whom (who died the 28th June, 1838) he had three sons and six daughters, of whom survive two sons and one daughter. He married, secondly, the 30th May, 1852, Lydia Clark, eldest daughter of William Clark Wright, Esq., of Muston House, Northumberland, by his wife, Charlotte, daughter of Joshua Parr, Esq., of Pentree Parr, Carmarthenshire. Sir Molyneux by his second marriage had one daughter, who only survived her birth a few weeks. Sir Molyneux is succeeded by his eldest son, Molyneux Hyde, now the third Baronet, who was born the 2nd July, 1814, and married, the 27th April, 1841, Isabella, only daughter of Colonel Geils, of Dumbuck, county Dumbarton.

### SIR ALEXANDER CRICHTON, M.D., F.R.S.

THIS venerable and talented physician died on the 4th instant, at his residence, The Grove, near Sevenoaks, at the advanced age of ninety-three years. He was son of Alexander Crichton, Esq., of Newmiglon, and grandson of Patrick Crichton, of Woodhouselee and Newmiglon, Mid Lothian. Sir Alexander was for many years Physician in Ordinary to Alexander I., Emperor of Russia, and also physician to the household of the late Duke of Cambridge. He was one of the oldest, if not the oldest, Fellows of the Royal Society, having been elected in 1800. He was a member of various other British and foreign learned societies, and was a Knight of two Russian and one Prussian Order; and received permission to wear those orders in England on his return, in 1820. He was also created a Knight-Bachelor in 1820. Sir Alexander Crichton was the author of some valuable medical works, particularly of a book on "Mental Derangement." He married, in 1800, Miss Dodwell, only daughter of Edward Dodwell, Esq., of West Moulsey, Surrey.

### SIR WILLIAM OGLE CARR.

SIR WILLIAM OGLE CARR, Knight, Chief Justice of the Supreme Court at Ceylon, died in that colony on the 25th of last April, in his fifty-fourth year. He was the third son of William Thomas Carr, Esq., of Kengal, Hampstead. He became a student of Gray's Inn in 1820, and was called to the bar by the society of that inn on the 26th of April, 1826. Going to Ceylon, he was admitted King's Advocate there, and in December, 1839, he was appointed second Puisne Judge of the colony. In April, 1854, he was made Chief Justice of Ceylon and created a Knight. Sir William Ogle Carr married Miss Clement, the daughter of Colonel John A. Clement, of the Royal Artillery.

### LIEUT.-COLONEL CAMERON.

LIEUT.-COLONEL WILLIAM GORDON CAMERON, of Nea House, died on the 26th ult. He was the eldest son of General Cameron, of the East India Company's service, and was born at Chunar, on the 14th of June, 1790. Entering the Army early in life, he was in the Grenadier Guards during the latter years of the Peninsular War, and was wounded at Waterloo. The same year he was attached to the staff of Wellington at Waterloo. The loss of his right arm and other severe wounds in that memorable battle incapacitated him from further active service.

### GEORGE BENNETT, ESQ., Q.C.

THIS respected gentleman, who died on the 26th ult. at his residence, Sodyllhall, Shropshire, in his seventy-eighth year, was called to the bar in Ireland in 1800, and became a Queen's Counsel there in 1822. He was a distinguished advocate during a period when the Irish bar abounded in great names: his practice was for many years unrivalled both in the equity and the common law courts. He was the friend and intimate of nearly all his illustrious contemporaries, and was himself one of the last remaining types of a great legal era. He filled for a long period the office of leading Crown Prosecutor for Munster, and was for some time the "father" of the Munster bar. In politics he was strongly and firmly attached to Conservatism. Mr. Bennett quitted the bar about seven years since, and went to live at his seat in Shropshire, where he spent the close of his life in domestic retirement.

### J. N. AUGUSTIN THIERRY.

THIS eminent historian, who died at Paris on the 21st ult., was born at Blois in the Department of Loire et Cher, in 1795; he was educated at Paris. Devoting himself early in life to the study of history, he eventually became one of the greatest writers on that subject of his time and country. His most famous works are, "The Conquest of England by the Normans," "Letters on the History of France," and "The Narrative of the Merovingian Time." For the last twenty years Baron Gobert's annual prize of 10,000f. for history has been awarded to Thierry. Thierry was a member of the Academy of Science and Belles Lettres, but he declined standing for the Académie Française, because his election would have disqualified him from the Gobert prize. This premium was as kindly as it was rightly given; for during the twenty years of its receipt M. Thierry has been blind, and paralysed on one side. The loss of his sight was brought on by intense labour in his historic pursuits. He lately wrote in reference to his infirmities:—"If I had to recommence my career, I would do what I have done. Blind and suffering, without hope, and almost without intermission, I can bear impartial witness that there is something in this world of more value than material enjoyment, better than fortune, better than health itself, and that is devotion to knowled

## THE UNIVERSAL AGRICULTURAL EXHIBITION IN PARIS, 1856.

*(From our Special Correspondent.)*

SECOND NOTICE.

THE Exhibition closed on the 11th June, by a formal distribution of the first prizes—a tedious and monotonous affair (in the absence of the Emperor and Empress), of no sort of interest after the first half hour to any one except the prizeholders. The total prizes amounted to nearly £18,000, and these seem to have been distributed on the principle of rewarding every class and every nation that exhibited without any serious attempt to ascertain, in a few days, the respective and exact merits of many hundred animals, machines, and articles. All who have carefully followed the course of exhibitions, whether agricultural or industrial, must have come to the conclusion that, in nine cases out of ten, it is impossible to discover what is the absolutely best animal, and still more the best machine, although it is easy to decide that such and such animals or implements are good enough to deserve a prize of some sort. All that the public ought to expect is a minimum of merit in the prize-winners. In fact, the Paris Exhibition was a sort of lottery, where those who drew prizes had merit of some kind, as did those who drew blanks were left not without hope that they might win on a future occasion. The awards of the juries in almost every class are open to objection; in machinery they were frequently absurd, but one moment would come when the public, freed from this side of the water, where breeders and implement-makers have found, from the liberality of the French Government, a new market and a new medium of publicity opened, not in France only, but the whole of Europe. Then some Swiss cattle will be sent, which, although of no sort of value for ordinary agricultural purposes, may find purchasers among those who now keep the picturesque Alderney. The Schwitz breed is quite as picturesque, with its dun colour, black nose, black horns, and bushy black tail, as the Alderney, much larger, and capable on suitable rich pasture of giving a greater quantity of milk.

Lord Hastings, of Melton Constable, Norfolk, has purchased a picked herd, consisting of two bulls and eleven cows of this choice milking breed, rejecting a couple of the best grey colour. The breed might be traced in the Exhibition from Switzerland, through Germany, following the mountain ranges, where rich valleys are to be found in summer, into Styria, in the Austrian dominions, and (as a cross) into the mountain districts of Hungary.

The only other animals that could be profitably exhibited in England for the farmer's shop. For these our colonies in Australia, New Zealand, and South Africa could send a present demand; and an annual show of good saleable animals, at the value of £15 to £40 each, would probably find regular customers.

The French Bretonne cows (of which an Illustration appears in the ILLUSTRATED LONDON NEWS of 14th inst.) found several English purchasers as fancy stock. They are very small, quite as small as the Alderney, with more delicate limbs, of a black and white colour, with beautiful deer-like heads, small, smooth, upright horns, and are great milk-producers. A couple would be found more hardy, nearly as good milkers, and, as a novelty, even more picturesque than the Alderney, grazed on the little paddocks of suburban residences. They have more size than the Kerry, and more constitution than the Ayrshire, but are, probably from want of cultivation, inferior commercially to both. The show of Ayrshires was very fine. They seemed decidedly the best dairy cattle in the Exhibition, and sold well. But it is to be doubted whether in a French farmyard they will continue to produce their usual quantity of milk without the care and the succulent roots of their native Scotland. The Kerrys shown were picked specimens, and the cow engraved was perfection. The price asked was in proportion.

The most useful stock exhibited by the French were the Charolais, the Flamande, and the Normandé. The Charolais is a pure white breed, evidently closely allied to our Shorthorns. It is impossible to say what careful selection might do towards improving it; but in the present demand for beef in France the short and ready course will be to cross with the Shorthorn from good herds—that is to say, from good young bulls which are to use among north-country farmers, and not from animals reared on the milk of two or three cows, and fattened like bullocks to win premiums by fat, not muscle. The Flamande is a breed of large red cattle, famous in the dairy, with a distinctive character, showing a pure breed. It is a matter of consideration whether the best cross to improve it will be a Hereford or Shorthorn. As almost all the draught-work in the field and in the road is done by cattle in France, the draught qualities of the breed must be considered in every attempt at improvement. The Hereford is a good ox at plough, and therefore, taking the affinity of appearance into consideration, it will be a better cross than the Shorthorn for ordinary farmers. The Normande is a large, thick-skinned, bony race, of many colours, including black and white and probably a mixture of several northern breeds. It is the pride of Normandy, and most profitable in the dairy. At six years old the ox gives plenty of beef; but it seems, as a butcher assured us, just the unprofitable condition that all our horned stock were when well, several years ago, laid down the principles of breeding. prepared the way for the labours which have made our modern Hereford, Devon, and Polled Angus what they are.

It is the opinion of a Swiss agriculturist of the first class—acquainted with all the breeds of Europe, that the Swiss cows of Uri, Berne, and other districts where parti-colours prevail, and which, in opinion, generally bear a strong resemblance to Normandy and Dutch cow, would be extensively crossed with the beef-making Shorthorn of England. The same remark applies to all those northern districts of France where good grass is to be found. The dairy is gradually becoming a secondary consideration, or at any rate railroads have opened meat markets to it unknown. But the prejudices of the French farmers are very great, and these prejudices have been strengthened by the failure of fancy stock bought in England at fancy prices. The Germans, who tend more to the larger farms, more capital, and more intelligent bailiffs, will profit sooner than the French from the Paris Exhibition. In the district of the Rhine and south of France, in the district of peasant proprietors where the cow draws the cart and the plough, and iron is more rare in implements than gold ornaments among our mechanics, improvement seems hopeless, the peasant agriculture, except of vineyards, is retrograding—that is the unpleasant truth.

Beside the French and British exhibitors of cattle, fair specimens of peculiar breeds have been sent from Holland, from Denmark and the Duchy Holstein, from Switzerland three different races, and from the Austrian dominions animals representing everything but beef.

The novel divisions of the Cattle Exhibition may be characterised as 1st, cattle specially reared for the dairy, and 2nd for the dairy and for meat, and, 3rd, the nearly wild races, which (like our Scotch cattle before they were improved) feed on mountain districts and untinclosed pastures, and are valued chiefly for their skins and flesh.

The Dutch make a large show of those great bony black-and-white cows that are not unfrequently found in our markets and our dairy districts, which form a feature in Flemish landscapes. In the Dutch cattle and Holsteiners feed them—their excellent qualities are well known. But they are most unprofitable beasts to fatten, and, now that the demand is proportional to so constant, we may expect that these Exhibitions will lead the breeders of Northern Europe to try for a little of the symmetry of form and quality which will make their oxen acceptable in the English markets. I am astonished to find the agricultural correspondent of a contemporary recommending our dairy farmers to cross their stock with a black and white Dutch bull. Such a cross is contrary to every principle of breeding. The male animal gives the external locomotive organs, the female the internal or vital organs. To cross with a Dutch bull would be to lose quality of flesh without the slightest chance of gaining the milking qualities needed. There is no history extant of the cattle colonisation of Europe, but I made some curious discoveries in the Exhibition. I found a striking resemblance to our Devons in the "Yong hard" breed from Saxony, and also the D'Argeu or Du Grest breed exhibited by the Agricultural Society of Schleswig. The Schleswig cows, some the horses attached to their horns by which they do the work of the farm, are Saxon animals, which are the better of the two, do not seem a cross with good Devon bulls would open the English exportation to these two breeds, and would not unfit them even for draught. The other Holstein cattle do not show any particular breed; they are of all colours and forms, and good milkers, and among them no doubt are descendants from the original stock of our Shorthorns.

There are some most satisfactory results in the Exhibition, from crosses between the Shorthorn and the Charolais, the Flamande, the Normande, and also between the Devon and a small red race, "Salers," exhibited by the Emperor.

There are a number of other French breeds which bear the decided marks of an aboriginal race. The Gascogne, a dun grey, with black points, short flat horns, heavy dewlap extending between fore legs, and thick, black, bushy tail, which might pass in a park for a wild animal, and the Bazaidaise, of a grey badger-colour black nose and tail, which is celebrated in the wine countries as a superior animal for draught, but not for milk, are most likely that any of these dun native breeds can be improved by British crosses, because they are required for draught and milk, and their characters are so distinctly marked that it would be difficult to change them. The Salers are like bad Devons, and, as before observed, have been successfully crossed with Devons. The Parthenaise are a small red breed, of a red dun, like a large coarse Alderney; they are found near Nantes; the cows are all worked.

What is most needed by Continental improvers is a report on the suitability of the different improved breeds of British live stock to the various districts of Europe—hot, temperate, and cold—marsh, pastures, plains, and mountains. Some committee of learned Germans, assisted by our practical breeders, will do this, no doubt. The French, who know, for their own use, the unpleasant truth about French breeds and machines.

I shall say nothing about the machinery, because there the foreign exhibitors did not produce a single original or novel idea. A great proportion of the foreign implements were perfectly useless, so slightly made and badly finished. As long as iron continues at protection prices, and as long as doors and windows fit as they do in France, millwork and wheelwork will neither work nor last. There were French thrashing-machines on the ground that no common power could move with corn to work. The very first step for improving foreign agriculture must be to abolish all duties on raw iron, and put revenue duties on iron manufactures.

At the present duties, reduced by the decree of the Emperor, our implement-makers in ploughs and simple implements are doing a considerable business with France, but still more with Germany.

On the Danube they must have English ploughs, harrows, drills, horse-hoes, reaping-machines, and steam thrashing-machines, if they intend to develop the full resources of their rich soil.—S. S.

The prize bull, "Grand Master," bred by H. Ambler, Esq., of Wilkinson-hall, Halifax, has, we are informed, been purchased for 250 guineas by Charles H. Greeo, Esq., late Senior Gold Commissioner of New South Wales, for shipment to Sydney; and Mr. Fisher Hobbes's prize young Hereford bull has been purchased at a long figure for the colony of Victoria. The increasing population of our Australian colonies requires such an improvement in the breed of cattle as will enable the stockholder to bring his bullocks earlier to market; and we could not propose a more advisable course to meet the desired end than improving the colonial cattle by crossing with the most perfect of our English bulls. "Grand Master" is one of six pure-bred Durhams which Mr. Green takes out with him

COSTUMES FROM THE FANCY-DRESS BALL, IN AID OF THE ROYAL ACADEMY OF MUSIC.

## FANCY-DRESS BALL AT THE ROYAL ACADEMY OF MUSIC.

We last week gave a Sketch of the Interior of the Hanover square Rooms as they appeared on the occasion of the recent Fancy-Dress Ball in aid of the funds of the Royal Academy of Music, which, as our readers are aware, was honoured with the presence of her Majesty the Queen and the whole Court. In the accompanying description allusion was made to the superb dresses worn by those members of the female aristocracy who took part in the fancy quadrilles. We engrave, from private drawings, four of the most remarkable costumes. One of the most exquisite personations in the ball-room was that of the Duchess of Manchester, representing the queenly Cybele in a costume of surpassing charteaess and beauty. The dress was of the finest white barège de cachmere, embroidered with gold in a Greek pattern running round the bottom of the skirt and at the top. Across the centre twined a wreath of myrtle leaves in gold embroidery. The waist was gathered in by a golden band engraved with lions, an emblem of Cybele; and the

RECEPTION OF COLONEL LAKE AND CAPTAIN THOMPSON, AT HULL.—(SEE NEXT PAGE.)

sleeves were looped with six golden fibulæ, from a Greek model. A crimson scarf was fastened on the left shoulder with a gold brooch, copied from the antique, and its rich deep colour was finely be[illegible] by a broad band of gold embroidery, in that Greek pattern which is supposed to have been suggested by the waves of the sea. Her Grace wore on her head a crown of golden leaves, and bore in her hand a gold trident and key, the emblems of Cybele. On the Queen descending from the royal box into the ball-room her Majesty recognised the Duchess, and with a gracious smile complimented her on her fine personification of the character.

The Duchess of Wellington attracted her Majesty's especial observation by the singular beauty of her dress, as representing the "Moon," in the Countess of Jersey's quadrille. Her Grace wore a petticoat of white silver tissue, covered with clouds of blue and white gauze, shaded off and looped up with blue and white marabouts, the dress itself being studded with diamond crescents. Around the waist was a belt of magnificent diamonds, formed from the order of the St. Esprit, by the late Duke, and presented to him by Louis XVIII. A *rivière* of large diamonds sparkled round the top of the corsage. On her head the Duchess wore a white gauze veil and marabouts; and on the centre of her forehead a diamond crescent. Fastened half-way down the dress were bouquets of white lilies, upon which were described the phases of the moon, reaching to the bottom of the dress on the other side. This charming costume realised the idea of light emerging from a fleecy cloud.

The Countess of Jersey, as the Lady of her own quadrille of "Night and her Attendant Stars," wore a dress of dark blue over black, powdered with silver stars, and a veil of dark blue and silver. Her Ladyship had on her head a wreath of diamond stars. Foremost among her starry host shone her Lady-ship's beautiful daughter, the Lady Clementina Villiers, wearing a light blue tulle dress, spangled with silver stars, and a large diamond star on her forehead. A blue veil, spotted with silver stars, floated from the back of the head, and completed a costume of the rarest elegance and beauty.

Among the other more remarkable dresses were those of the Lady Louisa Mills, representing Marie Leczinski, Queen of Louis XV., in a robe of white silver, with a deep point lace flounce attached to the dress by garlands of pink roses. The demi-train was of rich blue velvet, lined with pink satin, trimmed with a fontange of ribbon, and attached with bouquets of roses; and the body was trimmed with point lace, roses, and diamonds. Miss Weymss, as a Spanish lady, attracted especial observation. Her dress was of corbe-coloured satin, with Spanish lace flounces and black velvet and jet fringe, a mantilla and white rose in the hair forming the head-dress. The quadrille was of the style of the Bergere de Watteau.

To Madame Desoon, of Bruton-street, is due the merit of the charming taste displayed in the manufacture of the Duchess of Manchester's costume; and to Madame Duval, of New Bond-street, the credit of having carried out to perfection the designs furnished by the Duchess of Wellington.

## RECEPTION OF COLONEL LAKE AND CAPTAIN THOMPSON, AT HULL.

A VERY interesting demonstration of patriotic feeling took place at Hull, on the 7th inst., to welcome the return of Colonel Lake and Captain Thompson, two of the heroic defenders of the city of Kars. These two officers, since October last, had been prisoners in the hands of the Russians, having been removed from Armenia to St. Petersburg, on the surrender of the famished fortress to General Mouravieff. The reader will remember among the records of the siege the masterly engineering of Colonel Lake, who laid out and threw up those wonderful redoubts which presented, for seven hours and a half, an insurmountable obstacle to the Russian troops, and before which 4000 of them laid down their lives. Nor are the deeds of Captain Thompson, the hero of Karadagh, less worthy of remembrance by the coolness and bravery with which he conducted that signal attack.

The Corporation of Hull, therefore, well and wisely determined upon giving these two heroes a warm reception. A telegraphic message was received stating that the *Burlington* steamer had started from Copenhagen on Wednesday morning with the two officers on board, and that their arrival at Hull might be expected by eleven o'clock on Saturday. Accordingly, from an early hour, great excitement prevailed in the town. Vast crowds of people congregated on the piers; hundreds of flags and banners were suspended from the windows; but not until four o'clock was the signal gun fired announcing that the *Burlington* was in sight. In the course of a few minutes the bells of Holy Trinity were ringing out their welcome and intelligence to the town. Between four and five o'clock a cloud of smoke over the "Point" announced the approach of the anxiously-expected steamer, and in a few minutes she was seen off Paull, with her rigging gaily decked.

Two or three steamers crowded with passengers went out to meet the *Burlington*, and very shortly afterwards the Mayor, Anthony Sanderson, Esq., and a select party, put off in a tug to greet the returning heroes. The *Burlington*, firing as she came along, slackened speed opposite the Victoria Dock, and waited the approach of the corporation packet and one containing Mr. Gee and friends, who, with the Mayor, were introduced to the two gallant gentlemen. The Mayor explained the arrangements which had been made by the Corporation. Colonel Lake and Captain Thompson expressed their acknowledgments at the splendour of the reception which awaited them.

Our Artist has sketched the stirring scene at the moment of the two heroes landing.

They speedily descended from the docks of the *Burlington*, and went on board the pilot-boat. As they approached the Corporation pier, two six-pounders threw out their blustering welcome, and simultaneously a loud and hearty burst of cheering went up from the ten thousand throats of the multitude. Having landed, it was with the utmost difficulty that the gallant soldiers made their way to the Victoria, preceded by a band of music. Colonel Lake and Captain Thompson (a Hull man) were then introduced to the crowd by the Mayor, at a window of the hotel. The two heroes were received with great enthusiasm, and, having addressed their thanks to the people, they withdrew to luncheon, which also about eighty ladies and gentlemen partook. The Mayor presided, and proposed the health of the two heroes, who returned thanks. Other toasts were drunk, after which Col. Lake and Capt. Thompson were conveyed in a carriage and four to the North-Eastern Railway station, their progress through the streets being a scene of heartfelt enthusiasm and triumph.

We deeply regret to add that, within a few days of this gratifying welcome, one of its brave recipients has been numbered with the dead. Captain Thompson in addressing the meeting at Hull, on the 4th inst. complained that he was suffering from an illness which made it difficult for him to speak—meaning thereby a severe cold: on the 13th inst. he died suddenly, at the residence of his family, in Gloucester-street, Belgrave-road.

Captain Thompson was the son of a gentleman holding a Government appointment in one of the northern counties. He was educated at Eton, and entered the military profession, in which he became so distinguished, in 1845. He served in India as Lieutenant in the 66th Bengal Native Infantry, and returned to England, after ten years' absence, in the autumn of 1854. He volunteered soon after to join the Eastern campaign. His name is imperishably linked to those of Williams, Lake, and the small knot of heroes who upheld in Asia Minor the banner of the British arms. Captain Thompson had recently conferred on him the honour of the Companionship of the Bath, in common with his gallant comrades. This lamented young officer had only reached his twenty-seventh year.

## ARRIVAL OF GENERAL WILLIAMS, K.C.B.

The hero of Kars, General Sir William Fenwick Williams, K.C.B., landed at Dover on Monday last, and was received by the Mayor, the authorities of the town, and the resident and neighbouring gentry in the most enthusiastic manner. On his arrival at the Ship Hotel an address from the corporation was presented to the gallant General.

In his reply General Williams, after some feeling remarks on the fate of his brave comrade, Captain Thompson, said the mother of that officer would have the consolation which has been the only consolation experienced by many mothers during the present war—they have given their sons to the service of their country! (Hear, hear.) "And if the day comes," said the gallant General, "when the repetition of this sacrifice shall be necessary, I believe there will be thousands who will give up their offspring as readily as the mothers who are now weeping for the loss of theirs, for woe to the nation that forgets its military art! Woe to that nation—woe to that nation who heaps up riches, but who does not take the precaution to defend them (Hear). I have passed through armed Europe, and I take this, the earliest, opportunity of uttering a warning to those who forget the military art."

At the conclusion of the speech the usual etiquette observed on such occasions was thrown aside, and, notwithstanding the presence of the ladies, a hearty cheer resounded through the apartment.

General Williams afterwards partook of a *déjeuner*, provided at the Ship Hotel, and left for London by the two o'clock train.

Grand Ball at the Royal Opera-House, in Aid of the Royal Academical Musical Fund ... ... ...

[illegible] Messrs. Quilter, Ball, [illegible] Messrs. Overend, Gurney, and Co. at one time held securities deposited with them by Cole to the amount of £323,230 11s. 11d., of which only £54,138 11s. 11d. were genuine. Cole Brothers were in collusion during their nefarious career with the firm of Davidson and Gordon, and it is ascertained that the nominal amount of spurious warrants on which those swindlers raised money reached the enormous sum of £518,600, of which Cole Brothers fabricated £367,800, and Davidson and Gordon £150,800.

There were many other minor agents in this deeply-laid scheme of villany who aided and abetted in the frauds. They need not here be mentioned; but the cunning with which the scene of operations was selected deserves a special notice. Cole took a wharf, called Hagen's Sufferance-warf, in Mill-street, Bermondsey, in which he placed a person named Maltby; and Maltby, though Cole's servant, appeared to be the occupying wharfinger on his own account. On one side of this wharf was the Platform-wharf, belonging to Messrs. Groves and Son. When suspicion first arose as to the genuineness of the tin and spelter warrants, and parties went to satisfy themselves that the goods were really in existence, "Maltby," says Mr. Seton Laing, "did not hesitate to this request (of ocular demonstration), but at once conducted Mr. Goodburn and Wilkins into a large warehouse running up one side of the wharf and adjoining his countinghouse. He there showed them a pile of goods, and said, "That is the pile from which the spelter will be delivered." The warehouse belonged to Groves and Son, as well as the spelter; and it certainly is remarkable that Messrs. Laing and Campbell, whose suspicions had been excited, did not at once detect that most important fact. However, the result was that eighteen of the warrants held by them, and which had been handed to them by Cole as tangible securities, amounting in nominal marketable value to £18,000, were spurious and worthless.

Davidson and Gordon were general merchants, but also carried on a large distillery at West Ham-lane, in the county of Essex, about four miles from their counting-house in Mincing-lane. Their involvements, when they failed and fled the country, amounted to nearly £500,000, besides a large amount of duty which they owed to the Exchequer.

Out of the great City frauds arises a question of really national importance, frequently discussed by earnest and advanced reformers, but which unfortunately has not yet taken any firm hold on public opinion: that question involves the appointment of a public prosecutor, who would really become the conservator of mercantile morality. The prosecution of Cole costs Messrs. Laing and Campbell, the victims of some of his swindling transactions, £800 in legal expenses: surely it is unjust that a private firm, in the honest endeavour to bring a gang of swindlers to punishment, should have to pay such a sum. It is also to be considered that few persons would undertake so costly an exposure, and hence the criminal has many chances of escape, which encourage him to embark in the lottery of fraud; moreover, many not so conscientious as Mr. Laing, who was offered £1500 by Cole's attorney to desist, but which that gentleman to his honour refused, might be tempted to compromise such affairs, and withhold evidence by which justice would be defeated. Against these contingent evils the appointment of a public prosecutor is the only safe guarantee. The London bankers, and some other trading associations, retain an attorney specially nominated to act in all cases where they are wronged, and the tendency of the system is to make the reckless speculator pause. The existence of a national functionary, invested with analogous powers, would check the fraudulent dealer in his operations; and, while in numerous instances it would deter from crime, it would ensure correction whenever crime was perpetrated.

## THE CRYSTAL PALACE—OPENING OF THE GREAT FOUNTAINS.

THE Great Fountains of the Crystal Palace Gardens were opened on Wednesday—the event of the spectacle constituting a splendid fete, unique of its kind, and extraordinarily beautiful. The Queen and her illustrious guests were present, and more than twenty thousand of her majesty's subjects shared the pleasure of the day. The Palace was opened at twelve o'clock, and trains after train arrived from town with crowds of visitors. The day was very fine, the ladies were dressed in summer costume, and each new group as it arrived added new and brilliant ornaments to the moving picture. Even at one o'clock the grounds contained as many persons as are to be seen on the ordinary days. After this time the number rapidly augmented, and up to five o'clock the arrivals by the train and the road were continuous.

Her Majesty and the Prince Consort, the Regent of Baden, Prince Frederick William of Prussia, the Prince of Wales, the Princess Royal, the Princess Alice, with the Duchess of Athol, Lady Caroline Barrington, Lord Rivers, Lieutenant-General Baron Schreckenstein, Colonel Baron Seutter, Lord Charles Fitzroy, and Captain the Hon. D. De Ros, left Buckingham Palace at twenty minutes past four o'clock in four open carriages and four, escorted by a detachment of the 3rd Light Dragoons, and arrived at the Palace precisely at five o'clock.

The Royal party rode slowly round the grounds, attended by Sir Joseph Paxton, on horseback, who pointed out to them from time to time the most favourable points for witnessing the display. The bands of the Coldstream Guards, the Royal Artillery, and the Company, which were in attendance and stationed at different parts of the gardens, played the National Anthem as her Majesty entered; and throughout her progress, in making the circuit of the basins, she was greeted with one continued ovation. A few minutes after five, when the Royal cortege had reached a position commanding the most advantageous view of the spectacle, the whole system of waterworks, including, besides the fountains in the terraces, the water-temples, the cascades, the two large waterfalls, and the fountains of the grand lower basins, were brought gradually into operation. The richest visions of the Arabian Nights and Persian tales seemed more than realised as one gazed on the gorgeous scene. The fountains continued playing for forty-five minutes, during which five nearly 2,000,000 gallons of water had passed through the jets.

Her Majesty left the grounds soon after six, when the fountains ceased playing.

The nomination of Sheriffs for the City will take place at the Guildhall on the 24th inst., at twelve o'clock. The only candidates are Mr. J. J. Mechi, the governor of the Union Bank, and Mr. Alderman Lawrence.

Mr. T. A. Roebuck, M.P., the newly-appointed Chairman of the Administrative Reform Association, is to preside at a public meeting of that body, which is to be held to-day (Saturday), at the London Tavern.

LEICESTER ELECTION.—The nomination took place on Wednesday morning, when, after the usual formalities, Mr. John Biggs, the [illegible] was declared the person to represent the borough in Parliament. No other candidate was proposed, and the Mayor declared Mr. Biggs duly elected. Mr. Biggs, who was loudly cheered, then addressed his constituents, and the whole proceedings were concluded in an hour and a half.

## METROPOLITAN NEWS.

CLERKS' SOCIETY.—The twenty-fourth anniversary dinner of this excellent association was held on Tuesday, the Freemasons' Tavern, when Mr. Russell Palmer, Q.C. and M.P., the chair, supported by many of the most distinguished members of the profession. The [illegible] on the occasion amounted to £310. This institution [illegible] week to each of its members when [illegible] attending to business. The third and last branch of expenditure consists of an allowance of £20 made to the family of a member on his decease, and of half that sum on the death of a member's wife, should he survive her. At the last anniversary there were only 570 members, but the report of the present year announces a considerable increase, the contributions during the year being £1323. At present, however, the general fund falls short of £20,000, at which we may be permitted to express both astonishment and regret, considering the numbers of the profession, and the opulence it enjoys. During the last year the receipts for the general fund only reached the sum of £[illegible], while the expenditure for relief in sickness, superannuation, and death absorbed £1040, leaving a balance of £1323, which has been duly absorbed. The sums disbursed from the casual fund, and as loans, amounted to £381. While it is gratifying to hear that this association is progressing, it must be confessed that the above figures grow cold, the superannuations rapidly increase; and, as this society has existed during twenty-four years, the interest on its invested capital, which ought to accumulate from year to year, may be trenched upon, unless additional members are largely secured. The profession, by one united and generous effort, could double its present capital in twelve months, and that without any appreciable pressure on individuals. Let the country be canvassed as well as the metropolis, and this result would be readily accomplished.

ALLEGED MANSLAUGHTER BY A SURGEON.—At Bow-street Police Court, on Monday, Dr Charles Snape, late superintendent at the Surrey Lunatic Asylum, appeared before Mr. Henry, to answer a charge of having killed Daniel Dolly, an inmate of the asylum, on the 9th of April last. On the morning in question the man Dolly, who was about sixty-[illegible] years of age, was in a state of excitement and very troublesome, and [illegible] Snape was about to order him a cold bath, when the man, who properly remembered having been subjected to the same treatment a former occasion, went behind Dr. Snape, as he was opening the bathroom door, and struck him. The man was then seized upon by the attendants, and compelled to enter the bath. Dr. Snape then observed, "I never before was struck by a patient," and ordered the man to be kept in the bath for half an hour. He was kept in the bath for twenty-eight minutes, and in about fifteen or sixteen minutes after, as near as could be calculated, he was dead. The bath was a closed box, having no aperture for the admission of air, and the door was fastened on the outside with an iron bar, so that whatever illness the [illegible] for assistance, it was not in his power to get out. It had been calculated person in the bath might suffer, or whatever occasion he might have [illegible] that the water ran in a continuous stream, at the rate of four gallons a minute, the orifices being unusually large, and that in the course of the time the deceased was within there must have descended upon [illegible] about [illegible] gallons of water. It was part of the [illegible] of the keeper to [illegible] treatment, to put the patient almost [illegible] a dose of tartar emetic, and [illegible] that purpose in a cupboard, to which [illegible] had access, and it was [illegible] that he might be kept in the bath [illegible] [illegible] a gradual rise of the light colour of [illegible] and [illegible] when [illegible] [illegible] [illegible] [illegible] instead of the usual dose, which was three. It appeared from the evidence [illegible] having brought out of the bath, the deceased was shivering, and immediately he became ill and had a fit. The attendants ran for the doctor, but before he arrived the patient had died. After the examination of several of the attendants, who denied that the bath had been given as a punishment, the case was remanded for further evidence.

ROYAL BOTANIC SOCIETY.—The second exhibition took place on Wednesday in the Regent's park, and was attended by many persons of rank, including the Countess de Neuilly, the Duchess de Nemours, Prince and Princess de Joinville, the Duke and Duchess of Sutherland, the Marchioness of Cholmondeley, Earls Waldegrave, Ellesmere, Craven, and Portsmouth; Countess Waldegrave, Lord Ebrington, &c. The stove and greenhouse plants were in fine condition, especially the pelargoniums; the fuchsias and orchids were much admired.

PUBLIC LIBRARIES ACT.—On Monday evening a public meeting of the ratepayers of St. Pancras was held in Vestry-hall, King's-road, Camden-town, to take into consideration the propriety of introducing the Public Libraries Act into the parish. Mr. Churchwarden Streeten took the chair. Mr. Kenny proposed a resolution against the adoption of the act, which was met by an amendment by Mr. Ross, that it would not be advisable to augment the, at present, too heavy rates. On a division there was a large majority against the introduction of the act into the parish.

HEALTH OF LONDON.—In the week that ended on Saturday last the total number of deaths registered was 1027. In the corresponding weeks of ten years 1846-55 the average number was 930, which, for the ease of comparison, should be raised according to increase of population, and in this case will become 1023. The actual number agrees closely with the result obtained by calculation; and it is consequently true, says the Registrar-General: that the health of London, if not better, is also not worse than might be expected at this healthy season of the year. Last week the births of 879 boys and 749 girls, in all 1672 children, were registered in London. In the ten corresponding weeks of the years 1846-55 the average number was 1, 72.

## THE BAPTISM OF THE IMPERIAL PRINCE.

THE baptism of the Imperial Prince was celebrated on Saturday last, at half-past five o'clock p.m., in the Church of Notre Dame. A salute of artillery, fired at six o'clock in the morning, announced that this was the day fixed for the ceremony; and at two o'clock all the avenues leading to the cathedral were occupied by the Imperial Guard, under the command of General Regnaud de St. Jean d'Angely. The Master of the Ceremonies also arrived at an early hour to superintend the execution of the programme and the placing of the persons invited, who began to enter the church at half-past two.

At half-past four o'clock the Cardinal Legate left the Tuileries for Notre Dame, with a cortège composed of three Court carriages, following the same line of march as the Imperial cortège. Two squadrons of the 11th Regiment of Cuirassiers, with a Colonel and band, opened the march; next came a carriage, drawn by six horses, containing three persons of the Legate's suite and the Prefect of the Palace of the Emperor: a second carriage, also with six horses, three other persons of the Legate's suite, and a Chamberlain of the Emperor, two Imperial outriders; and the third carriage, drawn by eight horses, which was adorned with the insignia of an Equerry of the Emperor riding on the right, and, on the left, a captain of Dragoons of the escort. Two squadrons of the 11th Regiment of Dragoons, commanded by a chief of squadron, closed the march. On his arrival at Notre Dame the Cardinal was received by the Archbishop of Paris at the head of the chapter, and conducted to his throne.

Their Majesties, on arriving, alighted at the great gate of Notre Dame, and were received at the entrance of the church by the Archbishop of Paris, the assistant Bishop, and the honorary members of the Metropolitan Chapter. After having paid their devotions at the high altar, they were conducted to the *prie-dieu* beneath a canopy borne by canons. The wax taper for the ceremony was borne by the Countess Montebello, Lady of the Palace; the chrism-cloth by the Baroness Montant, Lady of the Palace; the salt, by the Marchioness de la Tour-Maubourg; the ewer, by the Countess de Labedoyère; the water-basin, by the Countess de Reynevel; the napkin, by Madame de Saulay.

Immediately preceding the Imperial Prince came the Grand Duchess Stephanie of Baden, representing the godmother (the Queen of Sweden), and his Royal Highness Prince Oscar of Sweden and Norway. Then came the Imperial Prince, carried in the arms of Monsieur Rouher, Count of Ollonden of Prince, and wearing a rich mantle lined with ermine; to his right and left were the under-governesses and the nurse; the Emperor [illegible] Empress under a canopy. The Empress's train was borne by [illegible] Behind the canopy were the Princes of the Imperial [illegible] family, the Princes and Princesses of the Emperor's [illegible] the Court. On reaching the *prie-dieu* the whole of the [illegible] their Majesties drew up in two lines to the right and left. The Princes and Princesses stood to the right and left of the *prie-dieu* above mentioned. To the right of the Emperor the Imperial Prince was held in the arms of the governess, and to the rear were the subgovernesses and nurse.

The clergy, who met their Majesties at the entrance, resumed their places respectively in the order already mentioned. The Cardinal Legate proceeded from his throne, stood before the altar, and chanted the "Veni [illegible] which was executed by a full orchestra. During the performance [illegible] the ladies bearing the chrism, &c., preceded by a master and assistant of ceremonies, advanced towards the *prie-dieu*, made [illegible] to their Majesties, and proceeded to deposit the chrism-cloth, ewer, napkin, &c., on the credence tables near the altar. At the conclusion of the "Veni Creator," the master and assistant of ceremonies bowed before the altar, and then to their Majesties, and advanced towards the Cardinal Legate, who went to the entrance of the sanctuary, and there performed the rite of the Catechumens. The Cardinal Legate then conducted the infant to the font, and all the persons to the right and left of their Majesties and the Imperial Prince, and behind them, advanced in the same order as above mentioned, ascended the estrade, and occupied thereon and along the steps the same places they held near the *prie-dieu*, with the exception of the Marshals, who occupied places reserved for them on the estrade.

Their Majesties then seated themselves on the throne; the Grand Mistress and the ladies of the Empress and of the Princesses sat on benches, and the officers not on duty stood in the nave behind the estrade. The Grand Duchess of Baden, as representative of the godmother, stood at the font. The Cardinal Legate then completed the ceremony of baptism according to the religious ceremonial, the Imperial infant having been previously *ondoyé*, or having received the baptismal water. This ceremony being concluded, the Grand Master of the Ceremonies made his obeisance to their Majesties and the Imperial Prince. The governess placed the Prince in the arms of the Empress, while an assistant master of ceremonies advanced to the middle of the choir, and cried aloud three times, "Vive le Prince Impérial!" the Empress standing all the time, and holding the Prince up in her arms. The *vivat* was executed by a full orchestra. Then the governess received the infant from the hands of the Empress, and made an obeisance to her Majesty. The Imperial infant, borne by his governess, with the sub-governesses and nurse to the right and left, preceded by an assistant and a master of ceremonies, an Equerry of the Emperor, the Prefect of the Palace on duty, and four Chamberlains of the Emperor, and followed by an aide-de-camp and an orderly officer of the Emperor, was conducted to the chamber prepared for him in the chapel of the choir. He was taken thence to the sanctuary, and lastly to the Palace of the Tuileries, with his cortège, consisting of three Court carriages, preceded by a squadron of Guides, and followed by a squadron of Cuirassiers of the Guard.

When the Imperial infant left, the Cardinal Legate chanted the "Te Deum," which was executed by the orchestra, as well as the "Domine Salvum." During the "Te Deum," the Archbishop of Paris, accompanied by the Curé of St. Germain l'Auxerrois (the parish of the Tuileries), presented for the signature of their Majesties the register containing the entry of baptism. The representatives of the sponsors and the other persons indicated by the Emperor also affixed their signatures. The Pontifical benediction terminated the ceremony; it was bestowed in the most solemn manner by the Cardinal Legate, the Emperor and Empress kneeling at the *prie-dieu*.

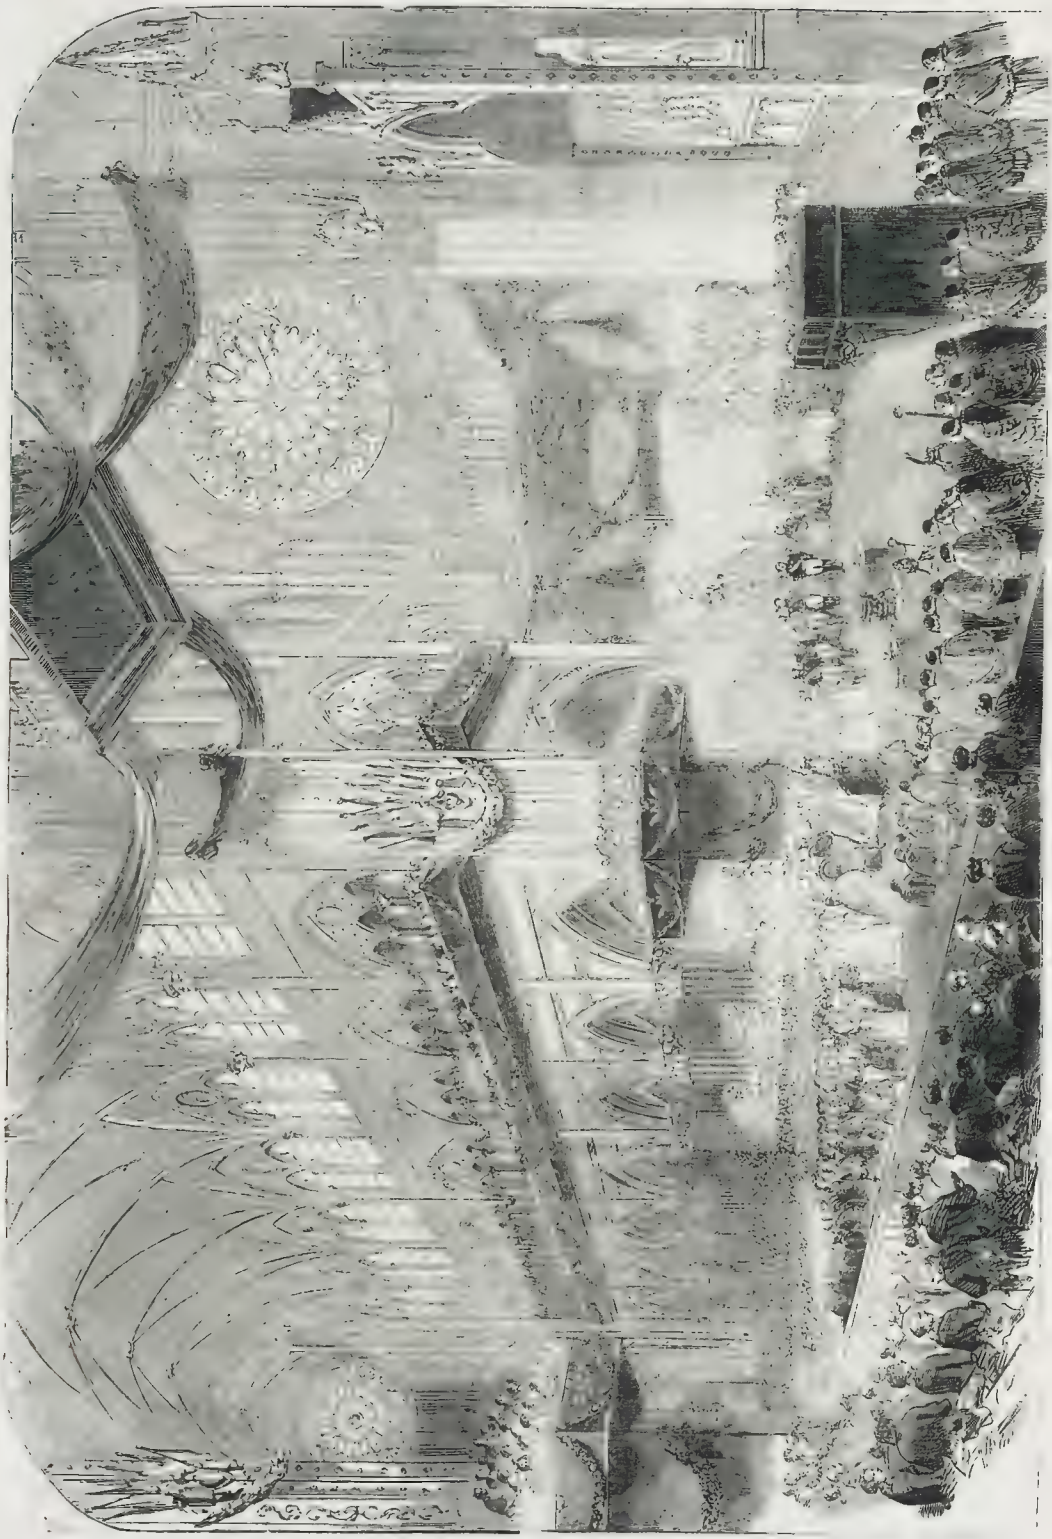
There were nearly eighty prelates, including cardinals, at the ceremony, among whom three Irish Roman Catholic Bishops on their way from Rome.

Immense crowds thronged the way leading to the church, and the windows and balconies of the Rue de Havre and of the approach to Notre Dame were filled with spectators. The Grand Hôtel de Louvre and all the houses along the streets were decked out with flags and streamers.

The banquet took place in the Galerie des Fêtes, the whole of which was occupied with tables laid out in the most gorgeous style. That occupied by the Imperial party was placed exactly in the centre, at the part leading from the Salle de Caryatides. At that spot was a square table of immense size, extending from one side of the gallery to the other, with only sufficient space left for the passage of the attendants. At eight o'clock four of the Cent Gardes, in full uniform, entered and took up their places, two behind the Emperor's chair, and two facing them at the opposite side. There they stood like statues until the end of the dinner. A short time after they had taken their stations the Emperor and Empress entered the banqueting-hall, followed by the favoured guests who had been invited to their table. Everything at the Imperial table was served to the guests on silver, and the decoration of a splendid new service of silver gilt. The other tables were occupied simultaneously with the Imperial one, and, although 300 persons partook of this banquet, not the slightest confusion prevailed, as every one's place was marked beforehand. At all the tables except that of the Imperial party a gentleman and lady sat alternately; and as all the gentlemen were in uniform or in full official costume, and the ladies wore a profusion of diamonds, the coup-d'œil was magnificent. During the dinner the Emperor and Empress conversed frequently with the high personages near them; the Empress, it was remarked, addressing the Legate in a very animated manner. At the conclusion of the repast, their Majesties went into the Salle des Caryatides, where they walked about for some time, conversing with the distinguished guests who flocked in from the gallery. The Imperial party then withdrew to a salon prepared for their recep ion, took coffee, and in about half an hour after entered the Salle du Trône, where chairs of state had been placed for their Majesties.

The fête of Sunday was ushered in by the honours of a salute from the guns of the Invalides. From an early hour crowds were on the move towards the Champs Elysées, the Esplanade des Invalides, and the Barrière du Trône, which were the three great points of attraction. On the last two platforms were erected, and military pantomimes and humorous games of buffoonery were enacted, which brought together a great number of spectators, evidently delighted with what was going on. Four poles, made slippery with grease, were planted with fair gifts for prizes at the summit, for those who had courage and perseverance enough to reach it, and a considerable number of competitors made the trial. Their failures appeared far more pleasing to the crowd than their success. But what afforded most amusement to the public was the sending up of balloons carrying bonbons for them to scramble for. Three hundred of these were let off in the Esplanade in the course of the afternoon, and at about five a large balloon was sent up, from which bags of bonbons were thrown down among the crowd. Everything passed over with great good humour, and the crowd seemed much pleased with the amusements, favoured as they were by the fineness of the weather. The proceedings at the Barrière du Trône were somewhat similar, excepting that there was no balloon ascent. At all the theatres gratuitous performances were given, each house performing its best and newest pieces. Immense audiences were everywhere to be seen, and, as is usual with the French public when admitted without payment, the greatest attention was paid to the performance. Towards the evening the crowd seemed to divide into two vast streams, one proceeding to the Place de la Concorde, and the other to the Barrière du Trône, where two splendid *feux d'artifices* were to be displayed simultaneously. An immense assemblage of people took possession, at an early hour of the evening, of the terrace of the garden of the Tuileries, and of every available spot on the Place de la Concorde which commanded a view of the illuminations. The whole attraction of the latter, as far as the western end of Paris is concerned, was concentrated in this neighbourhood; and the remaining quarters of the town, notwithstanding the general and brilliant nature of their illuminations, remained comparatively deserted. The view offered from the Place de la Concorde was magnificent in the extreme. A brilliant garland of fire extended from the gardens of the Tuileries to the Arch of Triumph, which started out from the darkness of the evening in vivid brightness. The Champs Elysées presented a fairy-like scene; a triple row of white and variegated lamps, intersected by brilliantly-coloured Chinese lanterns and transparencies, hung in festoons along each side of the road; while at intervals were suspended chandeliers artistically constructed of wire and oil-lamps. Similar chandeliers were spread in profusion amid the trees of the Champs Elysées, and heightened the colouring of the scene. The calm of the evening and the absence of wind favoured the display of lights, and altogether the illuminations of last night were equal to any recently witnessed in this capital.

The preparations for the fireworks were on an extensive scale. At half-past nine the Emperor gave the signal for the commencement of the display by discharging a rocket from a balcony of the Ministry of Marine, which had been magnificently arranged for the Imperial family and the Court. Scarcely had the signal rocket soared into the air than a reply of rockets took place from the Quai d'Orsay, while the cannon of the Invalides commenced an uninterrupted discharge. After a display of fireworks of every species, a representation of a Gothic edifice containing a baptismal font was lighted, and exited, by the beauty of its construction and architectural form, a remarkable enthusiasm among the immense multitude. Another discharge followed, and then an edifice corresponding to the first was fired, with the same [illegible] ended with a magnificent bouquet [illegible] imitation, and then the immense [illegible] kept up, and flowed in apparently endless streams [illegible] prepared repeatedly at the balcony, [illegible] acclamations of the crowd [illegible] continued during the evening among the thousands of spectators.



THE BAPTISM OF THE IMPERIAL PRINCE IN THE CATHEDRAL OF NOTRE DAME

HER IMPERIAL MAJESTY THE EMPRESS OF THE FRENCH, AND THE IMPERIAL INFANT.—(SEE PAGE 679.)

## NOTES OF THE WEEK.

On Monday evening the topic in all circles was the announcement, in both Houses of Parliament, that our Government did not intend to repay the expenses of Mr. Crampton, our representative in the United States, by the dismissal of Sir Dallas, the recently accredited Envoy from General Pierce. The general feeling on the subject was one of satisfaction. It is well that, whatever may have been our previous error in intrusting an important position to a gentleman of no very distinguished abilities, and whatever may have been his error in a complicated situation, we should have acted, on two points, with frankness and forbearance. We have declared to the States an apology which even the reluctant Pierce is compelled to admit is satisfactory; and when, defeated by our straightforwardness, he is driven to the small spite of getting rid of some private individuals, for the sake of a swagger about "kicking out the Britishers," we have forborne to retaliate, have consented to regard the entertainment question as settled, and are prepared to discuss that of Central America. In this part of the transactions the Government of England has behaved as became it, and it now remains to be seen how honest are the professions of the Pierce Cabinet upon the subject remaining to be settled, and, whatever be the result, the hands of England will be free from blood guiltiness. It is in the highest degree satisfactory to learn that the bellicose claptraps of the President are not likely to preserve that name to him, for we hear by the last mail that the Democratic Convention at Cincinnati has met, and has virtually, as is understood, settled the election, by unanimously choosing, as its candidate, Mr. James Buchanan, formerly the American representative here. This at least indicates the desire of the American people for a ruler of a political character different from that of the present intriguing head of the Republic.

The details of the christening of the son of France will be found elsewhere. The imposing ritual was performed with every magnificence which the soldier and the priest can lend to a spectacle; and the feminine element was also largely introduced, to refine and soften the pageant. The procession of ladies, with the mystic symbols appertaining to the sacrament of baptism, as administered by Rome, was one of the most interesting portions of the scene; but the most interesting of all was the presence of the fair and gentle mother of the young Christian. The Empress's appearance commanded the sympathy of all; and when, in the excitement of the moment, she embraced her infant with enthusiasm, the hardest heart present could not have suppressed a wish for the happiness of the child so singularly arriving at the Royal dignity. The Prince may have a stormy career, but he has commenced his career with all "the glory of regality."

A defeat of the Government on Tuesday night by Mr. Walpole, upon a question which neither Mr. Walpole nor his majority will be permitted to unsettle, is in itself a small matter. The Queen had a grand ball that night, and we presume that Lord Monck and Mr. Hayter could do nothing with their whips. The small majority for disturbing the system of National Education in Ireland (which, for a compromise, is working exceedingly well) is due to some of the two thousand invitations which were issued from Buckingham Palace, and the vote will be speedily rescinded. There is not much else in the Parliamentary week to call for mention. The Government plan in reference to the road across St. James's-park has been finally adopted—a road opening near Marlborough House, and a suspension-bridge across the ornamental water. We are very glad to be able to add that the idea of throwing this road open to vans, carts, and other heavy vehicles, will not be adopted, and that it will be kept solely for passenger traffic. The foot-passengers have especial reason to be thankful for the exclusion of the lumbering and thundering Juggernaut cars that afflict our great thoroughfares. Morning sittings have commenced in the House of Commons, from which it is inferred that the days of the Session are numbered.

The poisoner Palmer was duly hanged on Saturday morning at Stafford. He persisted in lying to the last, as might have been expected from the character of the miscreant, about whom there does not appear to have been the slightest redeeming quality. That he was a favourite with grooms, chambermaids, and servants generally, with whom he liked to joke, and to whom he gave a good deal of money, may be set down at its value, and in most persons' minds will scarcely go to the favourable side of the account, where however, if placed, it would be the solitary item. No power of penny-a-lining can exalt this ruffian into a hero—when the mawkish paragraphs of his advocates in the penny press, which, in its treatment of the Palmer question, shows how fit it is to be relied upon as an adviser of the people. Failing in saving Palmer, it now looks out for another respectable line of advocacy, and finds one in sneering at those who sympathise with Italian liberty. If war broke out in Italy, Manchester cotton would be less in demand than Birmingham bayonets; so Sardinia is to be written down by the scribblers for whom Ben Jonson (of whom they probably never heard) has provided a name, the *Pennyboys*.

An investigation before Mr. Henry, at Bow-street, has shown the utility of the Lunacy Commission. That body has decided a prosecution against the resident surgeon of the Wandsworth Asylum, on the charge of having occasioned the death of an elderly lunatic by a means which excites a horror akin to that with which one reads the records of Fox touching the martyrs: that missionary institution known as the Inquisition. If the witnesses speak the truth, a poor old man of disordered intellect, who became outrageous and struck the surgeon, was forcibly stripped, and thrust into a shower-bath in which the water descended in an unusually heavy volume. He was kept there, it is stated, under the fall of water for half an hour, during which time some six hundred gallons must have been poured upon him. He could not release himself; but, "if he had called very loud, the keeper might have heard him." Whether the poor old creature called or not is not in evidence; but soon after he was taken out his features assumed an agonised appearance; he had shivering fits; and in about twenty minutes he was dead. Anybody who has quailed under half a minute of the ordinary shower-bath will be able in some measure to appreciate what it is alleged this old man endured. The case has to be heard again; and at present there is but the statement for the prosecution and the evidence on one side—unless, indeed, we set on the other the volunteer declaration of Mr. Clarkson, the barrister, who, imitating Mr. Serjeant Shee, stated his conviction of the innocence of his client. The jury showed their opinion of Mr. Shee's testimony; and Mr. Henry actually rebuked Mr. Clarkson for his superfluous and improper declaration, which the excellent magistrate described as quite valueless.

People ask the reason why her Majesty, whose patronage of all public entertainments is so liberal, has made, up to the present time, an exception unfavourable to the Opera-house that bears her name? Two or three answers are given, but none seem of sufficient weight to induce the Sovereign to withhold from a great and meritorious undertaking that countenance which is so valuable to it. That any especial regard for any other establishment should have occasioned this deprivation of patronage is impossible—the Court of England can never be a partisan, and the Queen's own sense of justice is as proverbial as her kindness. Something has been said, also, about silly people thrusting worthless people into prominent places before the curtain; but English gentlemen, even if silly, are gentlemen, and can only have required a hint as to the impropriety of any conduct which can have attracted public notice. However, in the absence of any apparent reason why Her Majesty's Theatre is not honoured with her Majesty's support, we can only hope that the indefatigable exertions of Mr. Lumley to provide a first-class entertainment for the higher and educated classes will ere long be rewarded by the approbation of the first lady in the land.

## *MUSIC.*

The only novelty at the Royal Italian Opera has been the performance for the first time this season of "Don Giovanni," with Madame Devries, a débutante in this country, in the character of *Donna Anna*. Of this lady we had never heard before, though she is of mature years, and evidently has great experience of the stage. She has a good [illegible] intelligence and [illegible] but, unfortunately, is not much like Mozart's interesting heroine, and her matronly appearance quite frogs the dramatic effect of the performance. It is the more to our purpose that the lady should be brought forward in this part that Madame Jenny Ney, a member of the company, the prima donna of the Dresden stage, and one of the greatest dramatic singers of the present day, was not hired to perform. The treatment of this lady at the Royal Italian Opera is quite unaccountable. She has been here for two seasons, and has never been allowed to appear in any opera save the "Trovatore." Everything has a cause, if one could only find it out; but the cause of this strange *coup de théâtre* quite passes our comprehension. Ronconi once more revived the character of *Don Giovanni*, notwithstanding the unequivocal failure of his last attempt. We wonder this admirable and intelligent artist cannot perceive how completely he is unsuited to this part. He has neither the person, the manner, nor the voice which it demands; and instead of the polish of the Spanish gentleman, and the graceful ease and gaiety of the fashionable libertine, he gives us the coarse of a mere vulgar debauchee. The other parts, however, were well supported. Belletti was charming as *Zerlina*; Marai gave [illegible] ordinary weight and importance to the fine but much-neglected [illegible] of *Elvira*, Gardoni sang beautifully as *Don Ottavio*; and Formes's *Leporello* was unrivalled! But the inadequacy of the two principal performers made the opera go off coldly and heavily.

Mrs. Anderson's annual concert is always the most brilliant benefit-concert of the season. For several years it has been given in Covent Garden Theatre; but this year it has been transferred to Her Majesty's Theatre, and has been supported by all the strength of Mr. Lumley's establishment. It took place on Monday morning, when the house was crowded to the doors with the most fashionable company in London: for Mrs. Anderson's high character and talents have gained her the general esteem and favour of the whole musical world, from Hyde Park to Denmark. The concert was a rich and varied banquet of music. All the great singers of the Opera, who are never heard at concerts—Viardot, Piccolomini, Albertini, Wagner, Belletti, Calzolari, Reichardt, and others—contributed their assistance, together with the most celebrated instrumentalists. Herr Joachim, Madame Clara Novello, with several other eminent performers not belonging to the theatre; and among whom was Mr. Charles Braham, newly arrived from Lisbon, where he has held a distinguished position on the opera stage. He has made great progress since he left England: his beautiful voice is cultivated and his style polished; and he is altogether an accomplished artist. Mrs. Anderson herself played one of Hummel's concertos. In consequence of the severe accident which, in 1847, left her hand so lame, she has not performed in public for some years; and it was agreeable to find that she is perfectly recovered, and as able as ever to maintain her high position among the great pianists of the day.

The fourth Concert of the Royal Academy of Music, on Tuesday morning, gave satisfactory proof of talent on the part of the pupils, cultivated by sound instruction. The young singers who distinguished themselves were Miss Forster, Miss Spiller, Miss Wyatt, and Miss Shepherd, all pupils of Mr. Cusins; and Miss Bennett, Miss Fosbrooke, and Miss Whitwell, pupils of Signor Schira. Miss Scott, a pupil of Mr. Holmes, gave great promise as a pianist; and a youthful violinist, Master Isaacs (a pupil of Mr. Blagrove), may already be called a masterly performer. The fault of this concert was that it did not afford any remarkable specimen of progress in the art of composition.

Madame Schumann gave a second "pianoforte recital" at the Hanover-square Rooms on Tuesday morning. The principal pieces she played were selected from the works of her husband. They were very characteristic and contained many striking effects, admirably given by Madame Schumann's fine performance; but their style must appear strange and fantastic to those whose ideas of the pure and beautiful in music are derived from the works of Mozart, Beethoven, and Mendelssohn.

The New Philharmonic Society had their last concert of the season at the Hanover-square Rooms on Wednesday evening. The attraction of Madame Goldschmidt (Jenny Lind) filled the room to overflow, and numbers were obliged to listen, as they best could, in the ante-room. Madame Lind sang three pieces which she had sung on previous occasions—the well-known and somewhat hackneyed scena from the "Freischutz," the bravura air, "Squalida veste," from Rossini's "Turco in Italia;" and a set of Chopin's pianoforte mazourkas, arranged for the voice and piano by Mr. Goldschmidt. She sang with all her usual brilliancy and effect, and was applauded with the usual enthusiasm. Mrs Robinson, the distinguished Dublin pianist, played Mozart's above-named D Minor, maintaining the high reputation she has gained in the Irish metropolis. There was a selection from Dr. Wylde's music to "Paradise Lost," a work of merit, but not effective, the poetry of Milton's epic being not fitted for lyrical treatment. Beethoven's Pastoral Symphony, extremely well played, was the great treat of the evening.

The Reunion des Arts had an interesting soirée on Wednesday, given in honour of Madame Schumann, and fully attended by members and visitors. The first part consisted of music by Dr. Schumann: a violin quartet, several German lieder, and a pianoforte quartet, in which Madame Schumann performed the principal part. This last piece was admirably executed, the other parts being played by Messrs. Deichmann, Godfrie, and Hausmann. There was also some miscellaneous vocal music, in which Mdlle. Krall and Herr von der Osten took part. This society goes on prosperously; it is well conducted, and its entertainments are exceedingly elegant and attractive.

Mr. and Madame Sydney Pratten's Matinee Musicale.—This concert took place on Tuesday last in Willis's Rooms, under the patronage of several of the nobility. The vocalists were Mr. and Mrs. Weiss, Miss Louisa Vinning, Madame and Mdlle. Rudersdorff, and Miss Fanny Rowland; and the instrumental performers Mr. G. A. Osborne (pianoforte), Mr. Lazarus (clarinet), Mr. Baumann (bassoon), Mr. Sydney Pratten (flute), and Madame Pratten (guitar and concertina). Mr. and Madame Weiss—now become indispensable at thorough English concerts—gave universal satisfaction by their charming duet, "O du Gebelle." The ballad of "Fond Memories," composed by Mr. Weiss, and sung by Madame, was also very effective, and reflected the greatest honour both upon the composer and the singer. Madame Rudersdorff, with the best intentions no doubt, but not very wisely, sang a song of Piccolomini's; later in the afternoon she attempted something less daring—a canzonette not associated with any great name—and met with no success whatever. Miss Louisa Vinning sang "Ernani Involami" with extraordinary power, executing the most difficult passages with an ease and finish which it usually takes a lifetime to acquire. Miss Fanny Rowland and Mdlle. Matilde Rudersdorff each contributed a song, and were well received. Mdme. Pratten performed on two instruments, the guitar and the concertina, and it is impossible to say which gave the most pleasure. Mr. Pratten performed excellently on the flute, both in concert and solo; and Mr. Osborne played in a quartet with the other instrumental performers, but did not favour the audience with a solo. The concert was well attended.

---

The Gold-dust Robbery.—A few days since a discovery of a most extensive robbery of gold and silver (amounting to nearly £11,000) was made at the Bank of England. Several boxes, supposed to contain specie, had arrived from Southampton, by the Soleil West India steamer, and were consigned for security to the custody of the Bank authorities. On undergoing examination the discovery was made that the whole of the precious metal had been abstracted, and that shot and lumps of lead had been substituted. The boxes were from different merchants at New Granada, and appeared to have been shipped at Carthagena on board the steam-ship above named for England. On Monday notice was posted at Lloyd's, for the information of the underwriters, that the police at Carthagena, after the departure of the steamer, had received information of the robbery, and had taken into custody the thieves, with a large portion weight of gold (£4000) in their possession—a portion of the plunder. The parties implicated are said to be the carriers who brought the boxes to Carthagena from the interior of the country.

An Unpopular Queen.—The editor of a democratic journal at Madrid has been condemned the other day for seditious writing, when the publication was prohibited, to Queen Christina, and, in a kind of appeal to the democratic party, declared that Majesty was not worthy to occupy the throne of Spain. A few days after he was ordered out of the editors. The prosecutor gave as a reason for his conduct that he was, when the murmurs were so loud that the President had the greatest difficulty in appeasing the tumult. The editor was acquitted.

## TOWN AND TABLE TALK ON LITERATURE, ART, &c.

Mr. Macaulay has undertaken to write the life of Samuel Johnson for the forthcoming volume of the "Edinburgh Encyclopædia" of Adam and Charles Black. The full-length sketch of Johnson in Mr. Macaulay's Essays is a masterpiece in its way. Will the memoir be as good? Will the writer renew his attack on Mr. Croker?

On the same day that we were told of the circumstance we have just announced, we received the reprinted defence of Mr. Croker's edition of Boswell, made, in 1831, by a writer in *Blackwood*, in reply to a "diverting and provoking" review in the *Edinburgh*, known at the time as by Mr. Macaulay, and since included in every reprint, dear and cheap, of the "Essays" of our great Whig historian. Mr. Murray, as the proprietor of Mr. Croker's edition, has been induced in part to issue this defence from the mistake of a contemporary to which we directed attention a few weeks back. The reprint, reviewed as a recent publication by our contemporary, appeared twenty-five years ago; the copy which by the courtesy of Mr. Murray is now before us is a reprint fresh from the printer's hands, and bears the date of the present year.

Mr Murray's best reason for reprinting the defence of Mr. Croker is founded, we believe, partly on the success of the defence itself, and partly to remove an unjust belief perpetuated by the essayist, that Mr. Croker's edition of Boswell is the worst-edited book in the English language. When Mr. Macaulay wrote his famous review he was a young Whig politician, willing to wound and not afraid to strik Mr Croker was a standard Tory statesman and a well-known Quarterly Reviewer, willing to wound, and most certainly not afraid to strike. A kind of wit combat had taken place between them in Parliament, and the osterie at Holland House pitted the young man fresh from Trinity College, Cambridge, against the Secretary of the Admiralty and the life and backbone of the *Quarterly Review* A great Whig laugh was raised at the time when the number of the *Edinburgh Review* appeared containing Mr. Macaulay's attack on Mr. Croker. Thousands have been diverted with it since who know nothing of what Mr. Croker has done for Boswell and for Johnson but from what Mr. Macaulay has told them. The reviewer allows no kind of merit to Mr. Croker, and the impression which he leaves is exactly what he sought to convey—that of a British classic edited by a person thoroughly incompetent to his task.

As the merits of the Macaulay and Croker controversy have been revived by the release of the Defence, and as the subject is at present one of Town Talk in literary circles, we may be excused for enlarging on a matter of so much interest. Mr. Croker made no reply till the year 1848, when in a new edition of Boswell he defended some of his imputed mistakes, and repaired the great but ingenious blunder of his former edition—the inlaying the text of his author with other people's contributions. A better-edited book than this edition of Boswell of 1848 does not exist in English literature. It is, perhaps, a little disfigured by the Macaulay controversy, and by that curious entry in its index of "Blundering Criticism, *see* Macaulay, T B." The great point of controversy between these twin Privy Councillors has been set for ever at rest by the production of at least twenty copies of a book which Mr. Macaulay asserted, and still asserts, was never published. This is the "History of Prince Titi," a book which Johnson saw with surprise when in Paris in the library of a French lady. We have a copy of the book before us while we write, and Mr. Macaulay may see another published copy of the book which he asserts was never published in a collection he is known to consult very often, the library at Lansdowne-house. When Mr. Macaulay reprints his "Essays" he should acknowledge his mistakes, and cease in this instance to misinform his readers.

The picture of the week is "The Council of War on the morning previous to the storming of the Mamelon," painted by Mr. Egg, whose absence this year from the Exhibition of the Royal Academy was so much regretted by all who take an interest in art. The cause of his absence is happily accounted for in this fine cabinet picture. It is a picture of three persons in the favourite pyramidal form. The scene is laid in Lord Raglan's quarters in camp, and the persons represented are Lord Raglan, Omer Pacha, and Marshal Pelissier. The plan of the attack is explained on a map by Marshal Pelissier, who is standing to the English and Turkish Generals, who are seated. So lifelike is the picture that one can almost fancy the Marshal to be speaking. It is easy to see that the plan of attack has brought conviction to the French Marshal's companions in arms. The smile of satisfaction on Lord Raglan's face is particularly happy. The likenesses are excellent—true, we feel confident, to the man themselves, and most certainly true to the many photographs by good and various hands that we have of them. They are in their actual dresses, and the contrast between the Turk, the Englishman, and the Frenchman is pictorial in the highest degree. In point of execution the picture is excellent, firm, glowing, and truthful.

Whosoever takes an interest in a British Museum of British Antiquities, should make a point of visiting (there is no charge for admission) the important collection of antiquities formed by Mr. Whincopp, of Woodbridge, in Suffolk, and about to be scattered by Messrs. Sotheby and Wilkinson. The collection is well known to Fellows of the Society of Antiquaries and the members of the Archæological Institute and the Archæological Association. Colchester, York, and London have yielded Roman treasures to the Whincopp collection. The Eastern counties have been dug and drained for curious Saxon remains. Urns, rings, and fibulæ abound; suggesting a wish that dividend-day at the Bank was a little nearer.

Any reference to our well-known auctioneers of books, manuscripts, and antiquities, reminds us of a pleasant rumour that has reached us connected with the father of the firm. Mr. Sotheby has just completed his two expensively-illustrated quarto volumes on block-books; and is now (when the hammer of the auctioneer and the pen of the skilled compiler in catalogues are not in hand) actively engaged on the third and concluding volume—"Early Watermarks on Paper." He is to dedicate his work to the Philobiblon Society.

The last cargo of Assyrian sculptures was on Saturday transferred at Havre; from the French ship *Manuel* to the English Steam-packet Company's ship *Soho*, and has now reached England, and been deposited in the British Museum. These sculptures comprise about fifty cases of the best works of Assyrian art, being the series discovered by Mr. Loftus in the lower story of Assher-banipal's palace at Kouyunjik: amongst them are several which have been engraved in the Illustrated London News—viz., the Queen of Assyria drinking beneath the Vine; the King hunting a Lion; and the King pouring a libation. There is a full and nearly complete Hunting series, of the finest workmanship. In a Wild Ass Hunt, the animals are represented taken in the lasso, shot by the King's arrows, and worried by dogs. Another series, found in an ascending passage, represents a Procession to the Hunting-ground, with dogs, nets, &c.; and the return home with the spoils—dead lions, birds, hares, &c. The collection includes also five or six cases containing the famous inscription recording Senacherib's campaign against Hezekiah, which Mr. Loftus contrived very ingeniously, notwithstanding its fractured and calcined state, to cut away from the Bull at the entrance to Senacherib's palace, and pack safely before he left Assyria. The *Manuel* brought, likewise for the Louvre, twenty-eight cases which were saved from the unfortunate French collection: among these sculptures is a Bull from Khorsabad, similar to those in the French and British Museums.

---

Mdlle. Sarah Felix, Mdlle. Rachel's sister, has returned to Paris, from the United States, to engage a French company for a theatre which she intends opening in America.

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—MONDAY.

DISMISSAL OF MR. CRAMPTON.—The EARL of DERBY inquired to what, if any, conclusion her Majesty's Government had arrived as to the course advisable to be taken with regard to the questions between this country and the United States? In behalf of CLARENDON deed, that as soon as the papers on the subject, now in the hands of the printers, were delivered, together with the answer of her Majesty's Government to the despatches, he would be prepared to answer the Earl of Derby's question. But, as it was their duty to allay the present anxiety, he might then state that it was not the intention of her Majesty's Government to dismiss Mr. Dallas.—The Earl of DERBY could not but rejoice at the announcement, since, although the United States' Government was not in the right, our Minister certainly had been in the wrong. The United States had just cause of complaint. To submit to the dismissal of our Minister was humiliating, but it must be done; and what was more, he rejoiced at the resolution adopted by her Majesty's Ministers.

LIMITED LIABILITY BILL.—Lord STANLEY of ALDERLEY proposed the second reading of the Limited Liability Bill. He said the time had gone by when joint-stock enterprise was to be regarded with suspicion. They knew that it merited encouragement, and that the enormous bruances and difficulties interposed to its progress by former jealousies and suspicions should be removed. The industry of this country, the vast energies of its people, its wonderful tendency to development, were at present overweighted in the race with Continental nations. There would be less chance of fraud under this bill than under the old system, for when the public had to pronounce themselves they would naturally look after their own interests; whereas, at present, relying upon Government protection, they lost the advantage of individual vigilance.—Lord MONTEAGLE said that the bill was contrary to the principles of Free-trade. The bill was all restrictions. It was the third of a series, and comprehended all the evils of its predecessors. Who would be the sufferers? The humbler classes, with their small savings filched from them by designing men in fraudulent enterprises, over which they could have no control. What would these companies be but lotteries? So new and frightful speaks of gambling. Had they forgotten the railway mania—when it drew within its vortex men, women, and even children, and opened gambling-shops, its offices, at the corner of every great street? So would it be again, said the Duke of ARGYLL quoted speeches of Lord Montegle to show his Lordship in the wrong as to his estimate of the probable perils about to ensue from the passing of the bill. The Government could not discriminate between fair trade and speculation. Therefore the Government ought not to interfere. The former system had been no protection to prudence, neither was this inconsistent with it. There was abundance of capital in the country, but it lay dormant for want of facilities for investment.—On a division the numbers were—Contents, 18; Non-contents, 6: Majority, 13.—The bill was then read a second time.

### HOUSE OF COMMONS.—MONDAY.

SALE OF DECEASED OFFICERS' COMMISSIONS.—Mr. GROGAN moved a resolution to address the Queen, praying that she would be graciously pleased to direct that officers dying of disease while on active service should have power to leave their relatives the value of their commissions, the same as if they fell in action. The motion was supported by Sir De Lacy Evans, Colonel Dunne, and Colonel North; and the latter officer also complained of the injustice which the recent regulations on army promotion inflicted on old officers in the Army. After some further discussion, the resolution was rejected by a majority of 81 to 30.

FUTURE ORGANISATION OF THE ARMY.—The Army having gone into Committee of Supply, a conversation ensued on the reductions that were to take place, and the future organisation of the Army, and complaints were made by Colonel Dunne and Sir De Lacy Evans, and others as to the preference that was shown for the foreign troops over the regiments of the Line and the Militia.—Mr. PEEL denied that any preference had been shown. The disembodiment of the Militia took place under Act of Parliament; the Foreign Legions were to be kept up by their Convention, but he hoped they would all be disbanded by the autumn. He then proceeded to state the future organisation of the Army. It was proposed to make every regiment of infantry consist of a strength of 1000 men, to be formed into twelve companies—eight for service, and four for depôt and drafts. The service companies would consist of 800 men and 200 recruits. The Guards would be reduced by 2000 men. The strength of the cavalry was not yet fixed, but it was intended to keep in pay a greater force of Line than horses. There would be little or no reduction in the Artillery; and the men would be trained both as gunners and drivers. The total saving would be about six millions a year.

THE BRIDGE IN ST. JAMES'S-PARK.—On bringing up the report on Supply, Mr. BLOMFIELD rose to oppose the vote for throwing a foot-bridge over the ornamental water in St. James's park. He took for granted that the House would not allow the beauty of the Parks to be destroyed, even for the sake of public convenience. Now, he did not think the proposed bridge would be an ornament, but the contrary. However, on this point, he was willing to be guided by the opinion of Sir Joseph Paxton. He had another objection to the vote, and that was, that no matter of ornament or taste ought to be left to the judgment of the Board of Works, unless a plan was produced to the House. And as Sir B. Hall had proposed to a semi-road through the Park for the convenience of Westminster and Marylebone, that showed the right hon. Baronet had no taste.—Sir J. PAXTON expressed great doubts as to the picturesque effect of the proposed bridge. He would recommend that the vote should be postponed to another Session, as he had never yet seen the necessity for any bridge whatever.—The vote was ultimately carried by 110 to 57.

HANOVER EMBASSY.—Lord PALMERSTON said, in answer to Mr. Wise, that it was not the intention of the Government to break up the diplomatic establishment at Hanover. It was quite true the House of Commons had this year recommended that this should be done; but he thought the Government ought to have confidence placed in them to this extent, that they knew best where to place their diplomatic agents.

THE SARDINIAN LOAN.—The House having resolved itself into Committee, the CHANCELLOR of the EXCHEQUER proposed a resolution for the loan of a second million to the Government of Sardinia, by which one million was lent at the time, and another million was to be lent that time twelvemonth, if the war continued.—The resolution was agreed to without comment, and the House resumed.

#### OUR RELATIONS WITH AMERICA.

On the motion for going into Committee of Supply,

Lord J. RUSSELL rose to ask the Government what were our present relations with the United States. Had there been any negotiations going on between the two countries he would not have put this question, but the question was, whether there was to be any diplomatic intercourse between the countries whatever? He understood that there was now no dispute between the two Governments; but it appeared the Government of the United States did not give the same credit to her Majesty's representative there, and, on account of his conduct there, had dismissed him. But they accompanied this dismissal with very positive assurances of their good will towards England, and had declared their willingness to submit some of the other points in dispute to arbitration. He did not mean to go into any of these questions. But the House ought to know whether the Government meant to dismiss Mr. Dallas, the American Minister; and, next, what was intended to be done with any force that, pending the negotiation, might be sent to Greytown? If the Government considered that the removal of Mr. Crampton was a wanton insult, the Government could not but resent the insult by dismissing Mr. Dallas. If they believed that an insult was not intended, then he maintained that, following former precedents, they should not resent it, but proceed to negotiations of arbitration. He was glad that, even if Mr. Dallas had thought the despatch of Mr. Marcy was calm and dispassionate, and, while he maintained the opinions held in America still he was willing to submit to arbitration. He was glad that, even if Mr. Dallas remained, [illegible] might be [illegible] other means. He did not [illegible] country, and he would be glad [illegible] tion of the East [illegible] in the West. [illegible] Central America [illegible] But the peace [illegible] Nicaragua [illegible] Mosquito [illegible] Europe, [illegible] [illegible] [illegible]

THE NEW STATE BALL-ROOM AT BUCKINGHAM PALACE.—(SEE PRECEDING PAGE.)

## HER MAJESTY'S THEATRE.

JOHANNA WAGNER, the celebrated prima donna of the Berlin Opera, respecting whom so much curiosity has been excited in this country by circumstances which every body must remember, has at length appeared before the English public, and met with the reception due to her merits and her fame. She made her début on Saturday last in the character of *Romeo* in Bellini's opera "I Capuletti ed i Montecchi." For some days previously it was whispered about that an attempt would be made to get up an expression of disapprobation of the part alleged to have been taken by her in the disputes between the rival managers—a part for which no blame could attach personally to her; but if any such foolish and malicious intention had existed it was completely frustrated by the acclaim of enthusiastic welcome which burst from the audience in every part of the house the moment the fair stranger presented herself before them.

For the splendid triumph achieved by her on this occasion Mdlle. Wagner was not indebted to the merits of the opera, which is among the weakest of the many weak productions of the modern Italian stage. It is one of Bellini's earliest pieces, composed while his powers were yet immature, and not comparable to any of the subsequent works on which his reputation is founded. The airs are prettily,—for every Italian composer, however little of an artist, has a natural vein of melody, and can at least write prettily,—but they are trite and common, without any individuality or characteristic expression. As a sheet of white paper receives any meaning that may be impressed upon it, so these vacue blank melodies have no expression save that which is given to them by the singer. These airs, moreover, are not inartificially treated; and the concerted music betrays such a lack of constructive skill as to show that the composer, when he wrote this opera, was little more than a tyro in his art. So generally has its weakness been felt, that it has seldom been performed without attempts to strengthen it by the introduction of music by other composers. The most general practice has been to throw aside the last act, substituting the last act of an older opera on the same subject, by Vaccai. The improvement thus made however, is very small; and Mdlle. Wagner has done right in not adopting it; for a work from one hand must have consistency and unity of design, however feeble its execution may be. The success of this opera must be ascribed entirely to its subject, the tale of the hapless pair whose names have been immortalised by Shakspeare, and still live in the traditions of the ancient city of Verona. The plot of the opera is very slight, and differs from Shakspeare in several particulars; but the leading incidents are similar; and, in the catastrophe, the Italian dramatist has adopted Garrick's alteration. *Romeo*, breaking open *Juliet's* tomb, and finding her, as he thinks, lying dead on her bier, swallows poison. She awakes and rises; *Romeo*, in the rapture of their reunion, forgets what he has done. But the rapture is momentary, and is followed by despair and the agony of death. *Romeo* expires, and *Juliet* falls lifeless on his body. Alterations from Shakspeare are not to be admitted on our stage; but it must be allowed in this case that the variation deepens the tragic effect of the catastrophe.

Such is the piece which has served to introduce Johanna Wagner to the English public. The character of *Romeo* is regarded as one of the finest of her parts; and, feebly as it is drawn and coloured by the Italian dramatist, it is sufficient to show that she is a tragedian of the highest order. It is, indeed, in the dramatic department of her art that her greatest strength evidently lies, and it was to this department that she was first drawn by the earliest bent of her genius. She was an actress before she was a singer; and, by the time she was fifteen, she had appeared with distinction both in tragedy and serious comedy. Her father, himself an eminent musician, had given her a musical education, and she afterwards profited by the lessons of Garcia, the ablest vocal instructor of the day. Thus prepared, she appeared on the musical stage, where she speedily rose to her present pre-eminent position. A biographical notice says that she was born in Hanover, in 1831; and though owing to her precocity, her name has long been known to the world, yet this account of her age is confirmed by her blooming appearance and the freshness of her voice. She is a beauty of the genuine Saxon type, with blue eyes, a fair complexion, and a profusion of fair hair. She is above the ordinary female stature, exquisitely formed, and free and graceful in every movement. When she appeared in the chivalrous attire of the youthful *Romeo*, a burst of admiration shook the house, and it was some minutes before she was allowed to utter a sound. When, at length, her voice was heard, its rich, deep contralto tones, in a piece of spoken recitative, completed the spell wrought by her aspect. Her

MDLLE. JOHANNA WAGNER AS "ROMEO," AT HER MAJESTY'S THEATRE.

THE RUNNING DOWN OF LORD ALFRED PAGET'S YACHT "ALMA," OFF DOVER.—(SEE NEXT PAGE.)

Sir, Si Romeo Ducdon on Sunday was [illegible] with great simplicity and in a tone of mild and [illegible] the next sir, to fiery indignation, with which he [illegible] the Capulets In the earlier part of the opera it was [illegible] Romeo he not at all the Romeo of Shakspeare. He is the head of the Montecchi, and comports himself accordingly. It is not till the third act that the Shakspearean features of the character begin to appear. There is a powerful scene between Romeo and Tebaldo, who corresponds in some particulars with the Tybalt of Shakspeare but in the opera Tebaldo is Romeo's rival, being the lover and kinsman of Juliet Romeo, attacked by his rival with threats and defiance, restrains himself a while, but at length replies with equal violence. The burst of passion with which he [illegible] and were she to appear in the Romeo of Shakspeare instead of the Romeo of Bellini, she would be the most perfect embodiment of our poet's beautiful conception that the stage has ever seen. Even hampered as she was by the necessity of singing feeble music, instead of giving vent to her feelings in the passionate accents which these situations would have prompted, she succeeded in exciting as heartfelt emotions and in drawing as many tears as ever were caused by the distress of the tragic stage.

In this drama Mdlle. Wagner's singing is thrown in some measure into the background partly by the character of the music, and partly to [illegible] transcendent powers as an [illegible]. Even when she is singing [illegible] beautifully she does not allow us to think of her voice or her execution; we think only of the passion and feelings which she clothes in such wonderful language. We may say, however, that her voice, though essentially a contralto of immense power and volume, is also of great compass, and is capable of rising to the heights of the soprano scale. She sings in the German manner, with great simplicity and purity, and a very sparing use of florid embellishment. But the whole of the music, and partly to the [illegible] of her vocal qualities it is necessary to hear her sing the music of the great masters of her own country.

The opera, as a whole, is well performed. Reichardt has obtained [illegible] in the part of *Tebaldo*, and Mdlle. Jenny Bauer is a [illegible] and interesting *Juliet*. *The mise en scène* is splendid; and in the [illegible] scene there is a pretty divertissement, in which Marie Taglioni [illegible] herself to be the most captivating *danseuse* of the day.

## LOSS OF LORD ALFRED PAGET'S YACHT "ALMA."

THE following extract from a letter by Lord Alfred Paget describes the loss of his yacht, and the narrow escape from drowning of his Lordship and her crew, on the night of the 4th instant:—

Last night, a little before midnight, I was on my passage from Colchester to the Isle of Wight, and was running before a light air—the wind easterly—going about three to four miles an hour. The night was beautifully clear and bright starlight. When off the South Foreland, about four miles from the Lighthouse, as I was coming up the companion-ladder, I heard the men on deck shouting to a steam-boat to "Stop her!" I was on deck in an instant, and saw a steamer making straight for us at full speed. In about a couple of minutes she struck us on the starboard bow, cutting my yacht in two almost under water, and propelling us forward some distance, as, strange to say, her paddles were not stopped even when she struck us.

The shock was terrific, and when the steamer did stop and get clear it became evident that the yacht was fast sinking by the head. One of my men jumped on board the steamer, and entreated the captain to stay by our sinking vessel, and send a boat to save us. His request was, after some hesitation, complied with; but in the meantime we had managed to launch our long-boat, and had got into her (as the yacht went down by the head almost all her stern was up). Neither I nor any of the crew had time to save an article of any kind. I requested the officer in charge of the steamer's gig to take us on board and tow us to the land, but this he refused to do, saying he had despatches on board; so we had a long and hard pull against the tide, running out very strong, and at last succeeded, thank God, in getting into Dover harbour.

Had any look-out been kept on board the steamer, on so lovely and calm a night, a vessel might easily have been seen two miles off, especially one with new sails; but I am sorry to say that in too many instances these vessels, going at the rate of 12 or 14 knots an hour, altogether neglect that precaution, and many a poor fisherman's run down by them and never heard of more.

The *Alma* was nearly 70 tons, and was only completed at the end of last year. We put our boats to port, as the law requires; but, having little more than steerage way, we could do nothing to save her.

The vessel which caused this catastrophe is the Belgian mail-steamer the *Diamant*, is the property of the Belgian Government, and, under forms, in turn with the English, French, and Belgian Company's steamers, the mail service between Dover and Ostend.

His Lordship may be congratulated that his own life and the lives of the crew were not lost. But it seems very strange that the officers in charge of the steam-vessel should have acted with such indifference after the catastrophe; and we should hope that the Belgian Government will afford to the noble Lord ample compensation for the loss he has sustained in having his vessel run down in this manner. We trust they will not overlook the total want of officerlike and humane feeling in leaving Lord Paget and the crew four miles from the land, to get there how they be-t might. Had the weather thickened, or the wind risen, there is no knowing what would have been the result of such conduct; and we hope the right feeling of all nations will be expressed freely on this part of the transaction, which affects the lives of tens of thousands who obtain their livelihood by fishing and carrying coastwise, and in their humble sphere have little opportunity of making their grievances known to the world.

## *NATIONAL SPORTS.*

THE late Ascot meeting was large in point of company, but dull as regarded both its racing and its betting. Its Cup, in the absence of Fandango and Rifleman, was the uninteresting of contests, and terminated in the triumph of a well-known licensed victualler, who threw the reins most completely to his feelings, waving his hat aloft over his head, and cheering himself right lustily, as he led his son of Alarm for inspection round the Royal enclosure. The stakes produced a score of runners, and Mr. Howard's pair—Goldfinch and Schleidam—each of whom cost him 460 guineas, or only about half the price which he paid for brother to Goldfinch, at Tattersall's, the Monday before, ran second and third in the dust of yearlings at the Royal as last Monday was not great, but still the seventeen averaged 160 guineas a piece, or about two guineas less than they did last June. In 1854 the average was 441 guineas, and the top price 1000 guineas, for Yellow Jack—a sum which fell to 480 guineas in 1856 for Imperieuse, and to 410 guineas for Mincemeat in the last sale. Kingmaker represented the Baron's stock at Ascot, and it is rarely that one sees such a well-grown black two-year-old at the post, though he evidently lacks speed. Commotion, by Alarm, who was thought to be nearly the best two-year-old form out, and has been sold it is said, for a very large sum, suffered an easy defeat this week from Tournament at Hampton; and Sauceboy who does not bear knocking about so well as he did last year, is in the muster. Ten yearlings will be sold at Tattersall's on Monday, and thirty-six lots of blood stock, including the handsomé Danube, on the morning of Stockbridge races. Fandango is scratched for the Goodwood; and Fazzoletto is also struck out of everything till Goodwood, and the Whitewall stable quite expect that he will win that place in the St. Leger which Surplice so ungallantly snatched from his dam Canezou in 1848, owing solely, as Frank Butler believed to the day of his death, to his having had his orders to "come" within the distance, instead of waiting till within few strides of home. Nothing is scratched for the Leger a dead letter, and, as we look down the list of 1384, we see none of the preferable against him and Ellington, bar Mary Copp, Kapsig Vandermahl Holy, Cerva, and perhaps Rapid Range, who [illegible] Lord Zetland's Epsom Derby will take place in the St. Leger [illegible] wanting as a starter. The Scruband Course trial at Westminster is fixed for the 26th, and the match has so annoyed some of the Jockey Club that they propose not to allow any one to run a horse at Newmarket who shall be concerned in the future.

The racing week will be a busy one in the racing world, as the Cup will be all alive from Tuesday till Friday. Leamington has Wednesday and Tuesday, Wednesday and Thursday will witness the [illegible] meeting at Newcastle, where nearly £1000 is added to the stakes. The handicap weights are too low, but [illegible] were warded for their pubiis spirit in other respects, as [illegible] ration Purse has brought them its subscribers, and [illegible] North Derby, on Tuesday, includes Ellington 9lb. extra, Queer Fellow Forbidden Fruit, King of the Gipsies, and Artillery; and Vedette Kertch Chief, Magnifier, and Blink Bonny are in the Tyro The latter three are in the Grand Stand Stakes on the following day; and Zeta, 5 st. 5 lb., looks very likely for the Northumberland Plate. This mare is in the Gateshead Lottery Stakes with Manganese, Tilly, and Heir of Lynne on the Thursday, when the latter will not improbably make the Gold Cup.

The Bibury Club Race commences on Wednesday, and are succeeded by a very full Stockbridge list on Thursday, which will, however, be sadly shorn when the starting bell rings. Shoreham, Cocobus, Claret, and Lord Alfred are in one triennial; Wentworth and Eglantine in another; and the fifteen-hundred-guinea Anton and some of Scott's dark two-year-olds in a third. Astrologus, One Act, Wentworth, and Minerope are in the Stockbridge Derby, and Ayacanora and several illustrious unknowns in the Hurstbourne Stakes. "Newcastle" is mentioned for the Cup, with good names. A move will be made to Worthy Down on the Friday, where Nougat is in one of the six races which make up the Winchester Meeting.

Among the deaths we have to note that of Mr. Burton Bindon, in his eightieth year, once the well-known proprietor of a Dublin oyster-shop. He was one of the best riders in Ireland, and kept hounds in the county Galway, where, as The Druid informs us in "Post and the Paddock," the best Irish wolf-jumpers are supposed to come. Mr. Harry Bird, who was well known as a rider across country as the owner of Little Red Rover and other good horses, has also paid the debt of nature; and the monument to Wilson Lilwhite, which consists of a white marble pedestal surmounted by a broken column, with a wreath of flowers, is very shortly to be reared at Highgate. It is, however, to be regretted that, out of the requisite five guineas, only twenty-five guineas is at present collected. The accounts from the grouse are prosperous; and countless advertisements of moors, and dogs with approved scores, are beginning to dot the papers. Large fish, too, are beginning to reward the [illegible] Waltons everywhere—to wit, an 11lb. trout near Windsor; a 33½ salmon on the Wye; and pikes of a "Blue Peter" size, which [illegible] one almost tempted to bathe.

The aquatic features form a magnificent array. On Monday come the Pimlico Union Club four-oar races from Putney to Barnes, and the St. Margaret's and St. John's Regatta; on Tuesday, the St. Mary's (Lambeth) Regatta and the St. George's Yacht Club Regatta (Dublin Bay); on Thursday, the Birkenhead Model Yacht Club Sailing Match and the Royal Yorkshire Yacht Club Regatta; on Thursday and Friday, the Royal Western Yacht Club (Ireland) Corinthian Matches; and on Saturday, the Royal Thames Yacht Club Sailing Match (for third and fourth class yachts), from Erith to Chapman's Head and back.

At Lord's, on Monday, Sixteen Oxford University men play the United All England Eleven; on Wednesday, Thursday, and Friday, Rugby School will be engaged three days against the M. C. C., and then the Marlborough College; while on Thursday the M. C. C. and ground play Kent a return match at Gravesend.

### HAMPTON RACES.—WEDNESDAY.

Stand Plate.—Swallo.fle, 1. Westminster, 2.
Hurst Plate.—Lady Florence, 1. Uscurer, 2.
Surrey and Middlesex Stakes.—Winkfield, 1. Redemption, 2.
Claremont Stakes.—Tournament, 1. Commotion, 3.
Innkeepers' Plate.—Usurer, 1.

### THURSDAY.

Richmond Plate.—Englemere, 1. Dead heat with Queen Mab f. and Now Brighton for the second place.
Visitors' Plate.—Mary, 1. December, 2.
Queen's Stakes.—Strongbow, 1. Astrologus, 2.
Railway Plate.—Cantup, 1. Bacon, 2.
Bushy Plate.—Icarus, 1. Flying Duchess, 2.

*The range of temperature during the week* was 32·8°.

*The Weather.*—Fine, except 12th and 13th, which were very rainy.

*The direction of the wind* was N.E. at 7 a.m., became N.N.E. at 9 a.m., S.S.W. at 7 p.m., S.W. at 4 p.m.; S.S.W. at 4 a.m. on 12th, S.W. at 7 p.m., moved through W. and N. to E. at 10 p.m.; became N.E. at 1 p.m. on 13th, N.N.E. at 9 p.m., N.W. at 7 p.m., W. at 10 p.m.; W. at 7 a.m. on 14th, W.S.W. at 11 a.m. W. at 3 p.m., W.N.W. at 4 p.m., W. at 8 p.m.; W.N.W. at 12 a.m. on 15th, S.W. at 10 a.m., W. at 2 p.m., N.W. at 9 p.m., W.N.W. at 6 a.m., W.S.W. at 6 p.m. on 16th, W.S.W. at 10 a.m., S.W. at noon, in which quarter it remained.

12th Nottingham catchily (Silene nutans) in flower.

E. J. LOWE.

OPENING OF THE NEW ATHENÆUM AT BOSTON.—On Tuesday the opening of this institution was inaugurated by a dejeuner in the Assembly Rooms, and a soiree in the Corn Exchange. F. Cooke, Esq., the Mayor, occupied the chair; and was supported by Sir Charles Anderson, Bart., the Rev. B. Bickin, the Vicar. After the dinner the guests were several ladies. A variety of toasts were drunk, including "The Health of the Members for the Borough," for which Mr. Mark Lemon returned thanks on behalf of Mr. Herbert Ingram, from whom was read a letter explaining his detention in town by his Parliamentary duties, and inclosing a subscription of £10 to the Athenæum fund. A communication was also read by the Mayor from Mr. Cabbell, M.P., inclosing a cheque for ten guineas towards the furnishing fund. At the close of the dejeuner, the company adjourned to the soiree in the Corn Exchange, where about 1000 guests sat down to tea. Thomas Gardit, Esq., presided; and after passing a series of resolutions the large meeting separated. Next week we shall give a fuller account of the interesting proceeding, with two Engravings of the Institution building.

A DEPUTATION from the county of Gloucester and city of Bristol on Tuesday attended on Lord Palmerston, to present a petition to her Majesty, praying for the separation of the see of Gloucester and Bristol, and a similar petition from the city of Bristol. Among the deputation were the Earl of Ellenborough, the Earl St. Germans, Lord Redesdale, Lord Leigh, and Lord Elcho.

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

As the differences between this country and the United States appear to be in a fair train of settlement, matters during Mr. Crampton's dismissal, some rather extensive *Bull* operations have been effected in National Stocks this week, and prices generally have had an upward tendency. The supply of stock in the hands of the holders, from the public having purchased rather freely, has decreased, and higher prices appear to be confidently anticipated. The discount market has been tolerably supplied with cash; yet the leading bankers are still charging 2½ per cent for best paper, short-dated. The fact that a low value of money is not looked forward to, and it is argued in financial quarters that a surplus means will be speedily absorbed.

Since we last wrote the imports of bullion have amounted to £160,000 from the West Indies, 760,000 dollars from the United States (300,000 being on French account), and £175,000 from Australia. During the same week we broke over £700,000 in gold will be received from Sydney. As there is very little demand for the Continent, and as the arrivals are mostly purchased by the Bank, a further increase in the stock of bullion may be safely calculated upon. Bar silver has realised 61½ per ounce.

The dealings in Consols on Monday were by no means extensive, yet the quotations were firmly supported. The Three per Cents Reduced, 3 per Cents, 1½ Bq; the New Three per Cents, 94¾ to 94⅞; Consols for Account, 94⅞ to 95; Bonds, 25 prem; India Bonds, 10s. 6d.; Exchequer Bills, 6s. to 5s. prem. On Tuesday prices were rather higher, which was the case throughout the week. The Three per Cents Reduced were 94⅝ [illegible]; New Three per Cents, [illegible]; Long Annuities, 1855, 17⅛; Consols, for [illegible]; India Bonds, 10s. to 15s. prem.; Exchequer Bills, 5s. to 4s. prem.

The following day were moderately extensive, as follows—

Three per Cents Reduced, 94⅝ ⅞; Consols for [illegible] Sept., 95 prem; New Three per Cents, 94⅞ to 95; Long Annuities, [illegible]; India Bonds, 10s. to 15s. prem.; Exchequer Bills, 5s. to 4s. prem.; Ditto, New, 4s. to 3s. prem.; Bank Stock, [illegible]; Three per Cents Reduced, [illegible]; New Three per Cents, [illegible]; Long Annuities, [illegible]; Bank Stock, [illegible]; Exchequer Bills, 5s. to 4s. prem.; India Bonds, [illegible]; Long Annuities, 1860, 3 5-16. India Bonds, 10s. to 12s. premium.

The dealings in the Foreign House have not been extensive. Prices, however, have been slightly on the advance. Austrian Five per Cents have realised 92½; Brazilian Five per Cents, 101: Ditto, Small, 100; Chilian Six per Cents, 105; Mexican Three per Cents, 22½; Peruvian Four-and-a-Half per Cents, 79 Ditto, Three per Cents, 58; Russian Four-and-a-Half per Cents, 98¼; Sardinian Five per Cents, 92½; Spanish Three per Cents, 47; Ditto New, Deferred, 20½; Turkish Six per Cents, 103½; Ditto Four per Cents, Guaranteed, 104½; Belgian Four-and-a-Half per Cents, 97; Dutch Four per Cents, 96½; Ditto, Two-and-a-Half per Cents, 63½; Granada Two-and-a-Quarter per Cents, 17½

There has been a fair business doing in Joint-Stock Bank Shares, as follows:—Australasia, 85½; English, Scottish, and Australian Chartered, 17½; London and Westminster, 49½; New South Wales, 44; Oriental, 41½; South Australia, 35½; Union of London, 30½; Western Bank of London, 20.

Most Miscellaneous Securities have been tolerably active. Australian Agricultural have realised 30½; Canada Company's Bonds, 133; Ditto, Government Six per Cents, 113⅜; Crystal Palace, 2½; Ditto, Preference, 6½; General Screw Steam Ship, 1½; London General Omnibus, 4; Mexican and South American, 4½; North of Europe Steam, 13½; Peel River Land and Mineral, 3½; Van Diemen's Land, 16½. Ashton and Oldham Canal shares have marked 145: Birmingham, 93: Derby, 84; Grand Junctions, 93; Leeds and Liverpool, 231½; Leicester, 99½; Loughborough, 65½; Macclesfield, 71. Oxford, 103; Regent's, 16 ex div., Rochdale, 76; Stafford and Worcester, 69½; Stourbridge, 290; Warwick and Birmingham, 2½; Warwick and Napton, 30; Worcester and Birmingham, 20; Wilts and Berks, 4; St. Katharine Docks Securities have been 84½; Southampton, 69; Victoria, 2½; Ditto, New, 10½.

Most Railway Shares have sold steadily, and the quotations have slightly improved. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston, 5½; Bristol and Exeter, 69½; Caledonian, 69½; Chester and Holyhead, 19½; East Anglian, 17, Eastern Counties, 10½; East Lancashire, 80. Fact 3.—On the Great Fact Magic, Mystery, and Money have gone together; and the Wizard's bankers work day and night to count the [illegible] of visitors. The audience of one night ratifying the work of passed by that of the preceding evening. Fact 5. Those who have [illegible] the first time brought their whole family on the second. Fact 6. Never before was there so much laughter or so much applause within the walls of the Standard. Fact 7. The audiences have been the most [illegible] ever assembled on the East of London. Fact 8. In the first week there were 18,571 persons, in the second ditto, 29,012 persons; in the third ditto, 31,063 persons; in the fourth ditto, 39,939 persons; total, 118,485 persons in one month. Fact 9.—On the Great Fact Magic, Mystery, and Money have gone together; and the Wizard's bankers work day and night to count the [illegible] of visitors. The audience of one night ratifying the work of passed by that of the preceding evening. Fact 5. Those who have [illegible] the first time brought their whole family on the second. Fact 6. Never before was there so much laughter or so much applause within the walls of the Standard. Fact 7. The audiences have been the most fashionable

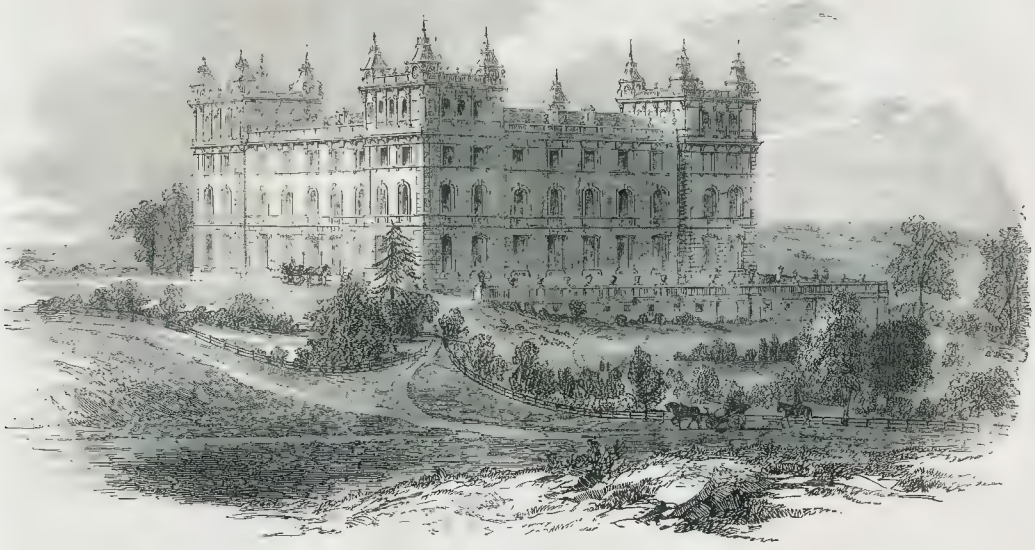
THE [illegible] AT LYONS—SKETCHED BY GUSTAVE DORÉ



ILKLEY WELLS HYDROPATHIC ESTABLISHMENT.

## LAUNCH OF THE "TORINO."

ON the 21st of the last month this noble steam ship, the last of four vessels built by Messrs. C. Mare and Co. for the Genoese Transatlantic Navigation Company, was launched from their yard at Blackwall. Since the first of these vessels, the *Victor Emanuelle*, was built, much advance has been made in the decoration and internal accommodation of screw steam-ships, and these advantages have been so fully carried out in this vessel as to render the *Torino*, both in build, tonnage, capacity, and internal comfort, perhaps the most perfect steam-propelled vessel afloat.

There was an immense concourse of spectators to witness the interesting event, and the ceremony of naming the *Torino* was performed by Mdme. Petrozi.

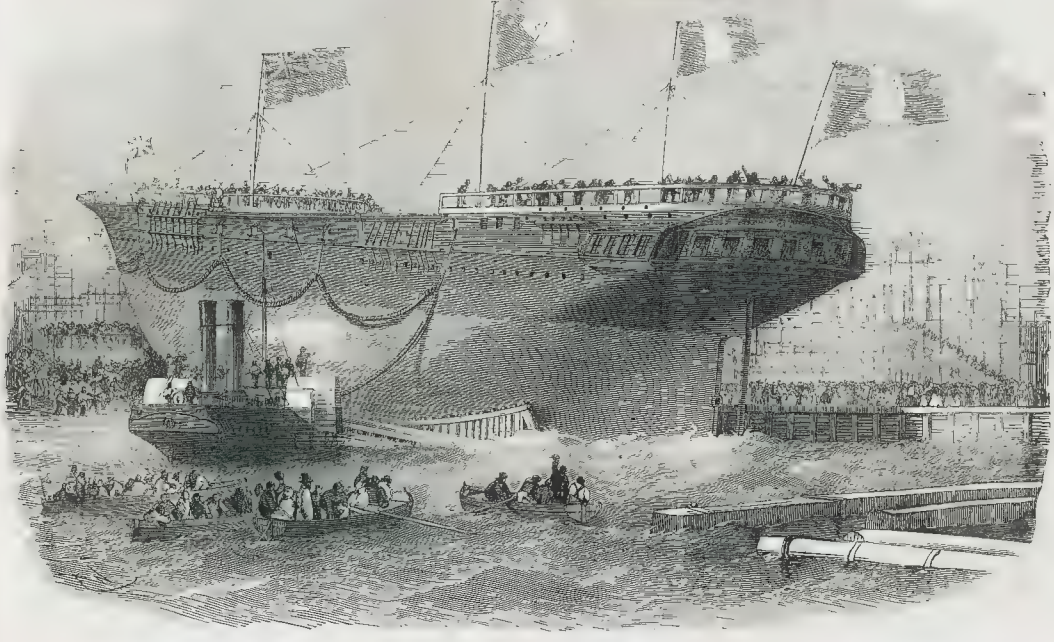
All the vessels of this company have been built and fitted out under the immediate superintendence of Captain John Ford, lately connected with the General Screw Shipping Company, and are giving the greatest satisfaction for every excellent quality.

The *Torino* is the sister ship to the *Genoa*, launched about two months back at the same place. These vessels have all been designed and built by Mr James Ash, and reflect the greatest credit on the abilities of that gentleman. She is nearly 2000 tons burden, and 300-horse power; 263 feet 4 inches long between the perpendiculars; 286 feet over all; 38 feet beam, and 27 feet depth of hold. Her engines are by Messrs. Maudslay and Co.

## ILKLEY WELLS HYDROPATHIC ESTABLISHMENT AND HOTEL.

THE village of Ilkley, in Wharfedale, Yorkshire, has long been celebrated for its fine scenery, its invigorating air and the purity of its water, and is the resort of invalids from all parts of the country, but more especially the inhabitants of the large northern towns. Amongst the many noted "Dales" of Yorkshire, the valley of the Wharfe stands pre-eminent for the wild grandeur of its upper course, and the extended and fertile vale into which it gradually expands. After passing under the lofty Crags of Kilnsay, skirting Burden Tower, forcing its impetuous way through the rude and massive rocks which form the ineffectual barrier of Bolton Strid, and winding amidst the luxuriant woods and fields where stand the ruins of the celebrated Bolton Priory, the Wharfe at length reaches the picturesque village of Ilkley (the *Olicana* of the Romans). The southern side of the valley is here bounded by the lofty range of rocky hills called Rombalds or Rumbles Moor, from which gushes, in never-failing force, the spring of pure cold water for which Ilkley is famed, and which from an early period has attracted its summer votaries and contributed to enhance the well-deserved reputation of this delightful place, the invigorating effects of a plunge in the "Old Wells" having been known and appreciated long before the name of hydropathy was heard.

Attracted by the romantic beauty of the situation, the bracing mountain air, the celebrity of the water, and the fact that Wharfedale having been an original seat of Hydropathy in this country, had, by many years'



LAUNCH OF THE 'TORINO,' AT BLACKWALL.

experience, proved itself to be particularly propitious to the Water Cure, a company of gentlemen resolved on erecting a first class establishment in the vicinity of, and to be supplied from, the famous spring. They accordingly purchased an estate on the face of the hill immediately abutting upon the Moors, obtained the control of the "Old Wells," and erected a building, which, in point of architectural design, in convenience of arrangements, in the comforts of accommodation, and in the charming and extended views it commands, is unsurpassed by any establishment of its class in the kingdom.

The house is situated at a considerable elevation, commanding extensive and picturesque views in all directions. The grounds, which have been very tastefully laid out by Mr. Major, of Keighley, near Leeds, are skirted by Rombalds Moor on one side; whilst on the other they join the cultivated land surrounding the small but charming village of Ilkley. The building has been erected from the designs of Mr. Cuthbert Brodrick, architect, of Leeds and Hull. It is in the Italian palazzo style of architecture, and built of stone from the adjoining moors. The external appearance, with its four towers and spacious terraces, has a remarkably fine effect, while the absence of the usual accessory outbuildings shows the unbroken completeness of the design from whatever point of view it is seen. The space inclosed by the terrace walls has been appropriated to the offices; and thus an interrupted view of the beautiful surrounding scenery is obtained from every part of the building.

The internal arrangements are seen at once upon entering, and are exceedingly simple. The ground plan is a square, with a space in the centre, in Italian buildings appropriated to a courtyard, but here it is covered in, and forms the billiard-room, library, and manager's offices. Around this central part runs an elegant spacious corridor, lighted by twelve stained glass windows, and from this the principal rooms are entered.

The dining-room is the largest apartment in the building, and will conveniently dine 100 guests. There are also two large drawing-rooms, coffee-room, and about a dozen sitting-rooms, all on the ground-floor. On the upper-floor are two smaller drawing-rooms, eighty-seven bed-rooms, and six bath-rooms. Gas-works are in course of erection in Ilkley, to supply both the village and the establishment. The contractors were Messrs. Pickard and Ogden, of Bradford; and Mr. Chippendale, of Otley, has fitted up the cooking apparatus and is superintending the works connected with the gas supply. The furniture has been supplied by Messrs. Constantine and Co., of Leeds; Mr. Mills, of Bradford; and Messrs. Roberts and Co., of Leeds.

Dr. Rischanek, formerly of Vienna, is the resident physician at the establishment. He is, we believe, one of the oldest practitioners of the system in England, and his name is well known in connection with hydropathy. The supply of water for the hydropathic treatment is obtained from the spring on the moor which has so long rendered Ilkley famous, and made it the resort of invalids.

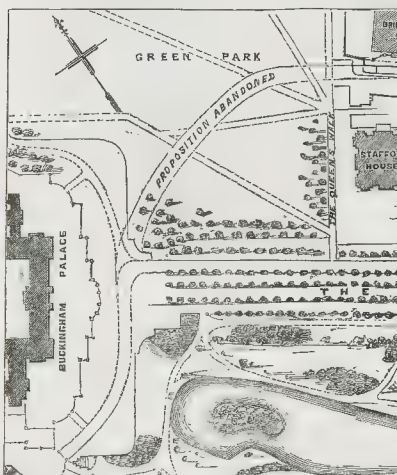
Besides the reception of patients, the new establishment affords ample accommodation for those who seek only pleasure and relaxation.

The tourist and the artist may here find ample employment. Bolton Abbey, with its magnificent woods; the splendid rock scenery of Malham, Goodale, and Brimham; together with those strange secrets which concern the caves of Clapham, Yordas, and Weathercote, are all within easy reach by road or rail; whilst the immediate neighbourhood of Ilkley abounds in scenery that will charm the pedestrian, whether he chooses on the one hand the wild and rocky pathways which second the moor, or on the other the rural and wooded margin of the Wharfe. Excellent trout-fishing may be obtained at Ilkley, and shooting in the season.

The establishment was opened on Wednesday, the 26th ult., when a company of about 150 partook of an elegant and abundant collation provided in the spacious dining room. As the valley of the Wharfe was the original seat of hydropathy in this country, it is reasonable to expect that there this modern branch of therapeutics still finds its most able and skilful practitioners.

## NEW OPENING INTO ST. JAMES'S-PARK.

In order that our readers may have the opportunity of understanding this question, we have engraved those portions of the Plan appended to the Report of the Parliamentary Committee on the subject which will enable them to do so. There has been some misapprehension in the public mind on this subject, and therefore, to make the question intelligible,



PLAN OF THE NEW OPENING INTO ST. JAMES'S-PARK.

we must begin at the beginning. As our readers well know, all the entrances to the park are accessible to foot passengers; and with the exception, perhaps, of a foot-bridge across the water, on the site of the old Pagoda-bridge, nothing could be more well adapted for their accommodation. For persons in private carriages very little if anything appeared to be wanted, for access to Pall-mall was always permitted to them through the Stable-yard; and, once in Pall-mall, the privilege of the *entrée*, the drive along the Mall and out at the Horse Guards, is of really little importance.

The only real inconvenience, therefore, was that any one in a cab or hired carriage who desired to pass from Pimlico to Pall-mall was obliged to go a long way round. The facilities granted to hired carriages a few years since having been suddenly stopped in the autumn of last year, much grumbling followed. Soon after the public were alarmed by a row of scaffold-poles appearing across the park, and it was ascertained that a contract was positively making or made for a new road and bridge cutting the park and the ornamental water in two. The press was roused, and (evidently by arrangement) Sir John Shelley, on the part of his constituents, addressed a letter to Sir Benjamin Hall, who replied that he was acting under the direction of the Home Secretary, Sir George Grey.

Everything thus remained in *statu quo* until Parliament met, when Sir Benjamin Hall announced plans for the improvement of the park, as they were called, and obtained the appointment of a Select Committee.

That Committee was constituted as follows, and their first meeting was on the 3rd March:—

*Lunæ, 25° die Februarii*, 1856.—Ordered, that a Select Committee be appointed to consider the best means of communication between those parts of the metropolis which lie north of St. James's-park and those parts which lie south and south-west thereof, and to report thereupon to the House. Ordered, that the paper presented on 18th February be referred to the said Committee.

*Martis, 18° die Februarii*, 1856.—Committee nominated of Sir Benjamin Hall, Lord John Manners, the Chancellor of the Exchequer, Mr Disraeli, Lord Robert Grosvenor, Lord Hotham, Sir Joseph Paxton, Mr. Stephenson, Sir John Shelley, Mr Hutchins, Colonel Boldero, Mr. Drummond, Mr. Stuart Wortley, Colonel Wilson Patten, Mr Mace.

On the 7th they reported that they had considered two plans, viz:—

One, for a road from Marlborough-house over the site of the German Chapel, then by a road and bridge of three arches, fifty feet wide, across the park to Bird-cage-walk, where it terminated.

Secondly, for a line in continuation of Pall-mall, through Lord Sidney's house, into the Green-park, and round to the front of the Palace. (This road is shown in our Map)

Thirdly, the Commissioners also considered a suggestion for a road into the park at the Duke of York's Column, and another for a road into the park near Charing-cross.

The cost of the first scheme was estimated at £20,900 for the road, &c., and £2800 for the bridge.

The cost of the second was estimated at £163,250.

The third was estimated at £7,800.

The divisions in the Committee were numerous and somewhat discordant; but they ended thus:—They unanimously refused a road-bridge across the park; but they recommended a foot-bridge, at a cost of £2800. They agreed to the road into the park over the site of the German Chapel, at £21,900, by a majority of eight to three; Mr. Disraeli and Mr. Drummond voting in the minority. They negatived the road continuing Pall-mall westward; but they agreed to the road by the Duke of York's column. The latter proposition was, however, subsequently abandoned in the House, and, therefore, the whole of these extensive schemes ended in a recommendation to make a road about 500 feet long at a cost of £21,900, and to build a foot-bridge of eighteen iron piles, with a flat iron beam, across the ornamental water in the park: These projects were opposed by Lord Robert Grosvenor, but principally by Mr. Tite, M.P. for Bath, who resisted the first as a foolish waste of public money, and as destroying a very curious and beautiful specimen of the architecture of Inigo Jones, called the German Chapel, and used as a place of worship for the foreign Ambassadors, the Attachés, and servants of the Palace; and he opposed the second as utterly inconsistent with good taste. Admitting however, the avowed necessity of the communication into Pall-mall, he proposed that the road into the park should be effected by an improvement of the present communication at the west end of the Palace, simply by cutting off a piece of the garden of St. James's Palace, about 170 feet by 50 feet; and he further urged that, if a foot-bridge across the ornamental water were to be determined upon, it should only be done by a suspension-bridge. This road we have shown upon the plan, and the bridge will occupy the site of the old pagoda-bridge. On a division the vote of £21,900 for the road, and £2800 for the bridge, were negatived by a large majority. On Friday last the Government, however, having adopted the suggestions of Mr. Tite, introduced a supplemental vote of £4500 for the road, as shown in the plan, and £3500 for a suspension-bridge. The largeness of the former sum led to some discussion, but it was explained that it included the inclosure of a large piece of land to be given to the gardens of Marlborough House, expensive railings and gates across the Ambassadors' Court, and other items not necessary to the road itself. This estimate was introduced by Lord Palmerston, who took the matter out of the hands of Sir Benjamin Hall, and it passed without a division. There was no discussion about the bridge, but it was opposed, and on a division carried by a large majority. Our readers would have fancied this would have finished this discussion; but it was not so, for Lord Elcho gave notice of a motion to prevent the construction of the bridge on bringing up the report. On Monday evening this question came to issue, Lord Elcho and Sir Joseph Paxton opposing the bridge as a probable disfigurement of the park; Lord Palmerston and Mr. Tite being of opinion that, if carefully executed, it would not have that effect; but the latter did not admit the proved necessity of such a communication, as he had presented a petition numerously signed by the inhabitants of the surrounding district against it. On a division the construction of the bridge was determined upon by a narrow majority. In our opinion we cannot but congratulate the public upon both improvements.

A REBELLION IN HAYTI.—The Boston *Traveller* of the 2nd June publishes extracts from a letter bearing date Aux Cayes, Hayti, May 19, which states that a formidable insurrection had broken out in that part of the island against the Emperor Soulouque. The writer says:—"A body of from 3000 to 3500 insurgents took possession of a post between this place and Fingrey last night, with the view of attacking the town to-day. The military authorities were only aware of this at seven o'clock this morning. The alarm drums were immediately beaten, and every male adult in town was ordered to join the troops. At ten a.m. the troops marched out with the citizens who had joined them; but, being only 500 strong strong, it is probable they will not make an attack on the insurgents, but will content themselves with defending the entry of the town till reinforced." A postscript to the letter, under date of eleven a.m., adds:—"The alarm drums are again beating. It is said that the troops sent out are repulsed, and the insurgents are pushing forward. People are running distractedly through the streets, taking stores, &c."

## THE BRITISH INSTITUTION.

IN no country is there so great a disproportion between the smallness of the public collections and the richness and variety of the private ones as in England. If our national gallery is not yet what it should be, and probably may become, our private collections are rolling on like snowballs. The Duke of Northumberland has lately added several valuable pictures to the family accumulations, several of which now grace the walls of the British Institution; and this admirable establishment, which periodically discloses to public admiration those flowers of art which otherwise would blush unseen in the domain of privacy, is this year unusually copious, so much so that, except the rare Exhibition of 1851, we recollect none more attractive.

No. 1 is an allegorical portrait of Villiers, Duke of Buckingham, by Rubens, the property of the Jersey family, heads of the elder surviving branch of the Villiers (of which the present Lord Clarendon is an illustrious cadet). This is a very gallant picture of "Ostentation," a term applied to such works as the Medicean series in the Louvre. In this case something more than an ordinary equestrian portrait is intended, but yet, the dramatic and religious element being wanting, allegory is impressed into the service of decoration. Unless in great hands, such pictures usually fail, as it requires an extraordinary amount of technical power to make amends for the want of human interest; and from the sublime to the ridiculous is only a step in such perilous regions. But Rubens was a master in such attempts; and a more distinguished presence than that of *the* Buckingham, the celebrated lady-killer and cavalier, could not be furnished by either Whitehall or the Louvre. Free air, land, and water, the most picturesque of costumes, and the most superb of horses, are all noble accessories. But why, oh! why, the eternal Scheldt fishfag as the classical Nereid?

No. 49, a Landscape with Waterfall, by Ruysdael, the property of Mr. Fordham. We congratulate this gentleman on the possession of one of the very finest Ruysdaels that it has been our lot to see—representing an undulating country, with waterfall, under a cloudy sky. Unlike the Bothas Pyankers, and Cuyps, to whom all God's creation was a heliotrope, Ruysdael delighted in sober slate colour. Never have we seen this Quaker garb of nature given with more effect than in this picture. But when we look closely into the works of this most anti meretricious painter we discover a marvellous fallacy of subject, that partly atones for his want of venture into brighter regions. His disposition of masses is like a beautiful piece of architecture: it would be unsafe to add anything, or to take away anything. But, Quaker though he be, and restricted the circle of his permitted sensations, air, earth, and water, all stand in the most perfectly harmonious relation to each other. He does not set powerfully on the nervous system by colours that make a rapid consumption of optical sensation, but he steals on our sympathies with the most tenacious impression of unobtrusive beauty. But, instinctive harmonist as he is, we cannot give him the highest place as a landscape-painter: he never *dared* beyond his own atmosphere, within that he was perfect.

No. 48, "The Gods Feasting on the Fruits of the Earth," by Bellini, from the Aldobrandini Gallery at Rome, belongs to the Duke of Northumberland. This is a very curious and beautiful picture, different in subject from those usually taken by the early Venetian painters. We almost think that Poussin must have seen this picture, and that it gave a direction to the whole of his subsequent efforts, so curiously does it anticipate by more than a century his manner of treating such subjects. In beauty of landscape Titian never surpassed even if he ever equalled this. Altogether this is the most remarkable picture of the Venetian school of classical genre that we have seen. Its defect is a want of ingenuous abandonment in the grouping, which is set with a too histrionic and mechanical artifice. It looks rather too much of a transferred frieze. The colouring of some of the left of the picture is flat, and we think damaged, but the right half is delicious beyond all powers of description. The blues and whites are treated with a power, and at the same time a measure, that might have been a lesson to Lesueur and Philip de Champagne. The foliage in mass above, and the light through the trees, reveal a true master.

No. 31, "Marchese di Savorgnano," from the Mareschalchi Palace at Bologna, by Titian, the property of the Right Hon. George Bankes, M.P. This is one of Titian's grand works. This is not the man-jahoo of Swift, Jan Steen, and Hogarth, but the man-demigod of Shakspeare and Buffon's describing. This portrait is replete with distinction—that compound of imposing self-possession and courteous gentleness which is here carried to its highest expression. Who and what this Savorgnano was we do not know; but if he was not an honest man his looks deceive us. Quite different is Andrea del Sarto's portrait of himself (No. 45): the plausible, mendacious swindler is visible in every feature. This is one of the new acquisitions of the Duke of Northumberland, from the Braschi Gallery: it was dedicated by the artist to Duke Lorenzo del Medici.

No. 52, The "Crucifixion," from the Church of Vittoria, Rome, by Guido, also belonging to the heir of the Percys. It is by such compositions as this, and not by the voluptuous elegance of the Susannahs and the Cleopatras, that Guido has attained the height of his reputation. This picture is full of the finest religious sentiment. Christ, crucified, has breathed his last; the foot of the cross is flanked by Mary and a disciple; a skull on the ground denotes Golgotha, and Jerusalem is overlooked in the distance, not delineated, but faintly revealed in the darkness. The whole composition is full of pathos and sublimity. The body of Christ—the touchstone of a great artist—is designed and handled with singular power, care, and felicity; and there is a sombre fascination in the landscape such as Salvator never surpassed. The shadows are limpid and untired, as in his Carravaggesque manner. The skulls on the ground and the temple in the distance are full of the most puissant association. But, if we are to be hypercritical, why has he made the drapery of Mary (or Mary Magdalen) so baggy? Also the disciple, to our eyes, has a slight suggestion of attitudinising. Nevertheless, Guido shows himself in the wild effect of this composition a sacred tragic poet of nearly the highest power.

No. 53, "The Temple of Jupiter Panellenius, Island of Ægina," with Athens in the distance, by Turner, the property of the Duke of Northumberland. This celebrated work is one of the best specimens of the art of this "prince of the power of the air," when still on terra firma, and before he had taken his departure for those transcendental regions in which we cannot live with him; in short, it is an early Turner, and therefore, in our opinion, one of the *golden* age of this artist. By this we do not mean the age of tornados of gamboge, but of the good old time. In short, we are of the unorthodox *quoad* the storms of yokes of eggs, which always remind us of Paul de Kock's pictorial genius when "in the suds." Other artists basely imitate nature, but give me the artist who can *invent* a nature of his own." This "imitates" some of Nature's most select handiwork; and therefore is a production of extraordinary beauty. Many in the days of our fathers thought it Turner's masterpiece. When we say that we prefer the "Building of Carthage" in the National Gallery, we give the measure of its classification, which is with the very highest efforts of the master. The subject is large, varied, and poetical. The air is finely treated, but with nothing comparable to the magic of the effulgent haze of the "Building of Carthage." Had there been no Ihad we might have given the Odyssey a higher place in our estimation.

We are oppressed with the multitude of other delightful pictures. It is a glut of riches. At present we have only time to allude to (No. 10) "A Landscape and Figures," by Both; (No 17) Parmegiano's "Portrait of Himself," two Salvators belonging to the Duke d'Aumale; (No. 20) "A Landscape" by Fyaker; (No. 22) "A Landscape" by Ruysdael and Berchem; (No. 27) "A Dutch Family," by Maes; (No. 30) "A View of a Town," by Van der Heyden, belonging to the Duke of Wellington; (No. 37) "A Guard-room," by Teniers; (No. 46) "Portrait of Pope Paul (the third) III." by Titian; (No. 47) Hobbema's "Village," (No. 63) "The Bonnet Shop," by Teniers; (No. 79) "A Hawking-Party," by Paul Potter; (No. 82) "Venus Wounded," by Pagi: (No. 87) "A Concert," by De Hooge; (No. 110) "A Woodman's Cottage," by P. Nasymth; (No. 12) "The Guerrilla taking leave of his Confessor," by Wilkie; (No. 137) Hogarth's "Garrick as Richard III.;" and charming works of Reynolds, Romney, and other English artists.

THE IMPERIAL STATE CARRIAGES OF THE EMPEROR OF THE FRENCH.—Every one admires the wonderful beauty of the horses of these carriages and the admirable style of all the equipments. In fact it may with truth be declared that no Monarch in Europe can vie with the Emperor of the French in the admirable appointment of everything relating to the State equipages. The carriage in which the Prince Imperial rides is that which was used as the State carriage at the marriage of their Majesties, but the present State carriage of his Majesty is altogether new, and for extreme richness and elegance cannot be matched. It is absolutely dazzling with gilding and painting. The upper part is open, being merely ornamented with plate glass, so that the persons occupying it can be perfectly seen by the spectators. On the panels of the doors are painted on an Imperial mantle covered with bees, the Napoleonian arms surmounted by the crown, surrounded by the cordon of the Legion of Honour, and supported by genii. The four side panels have symbolical figures taken from religious subjects. On the front and back are again the arms of the Empire supported by genii. All these paintings have been executed by first-rate artists, and in the most beautiful manner. The body of the carriage is a mass of gilding and the upper part has a group supporting the Imperial crown.—*Galignani*.

## LITERATURE.

MEMORIALS OF HIS TIME. By HENRY COCKBURN. Adam and Charles Black, Edinburgh.

Lord Cockburn, who died about two years ago, at the age of seventy-five, was a man of mark among the society of Edinburgh. He was allied by family to the aristocracy of the country. He was long one of the most eminent members of the Scottish bar, and was raised to the bench several years before his death. He took an active part in the general as well as local politics of his time; and his literary acquirements gave him an honoured place among those distinguished men of letters who imparted a peculiar character to the social life of the Scottish metropolis. He was not much of an author, his literary efforts having been limited to some contributions to the *Edinburgh Review*, a pamphlet or two on temporary topics, his Life of his friend Jeffrey, and the present posthumous work. But all that he has done is honourable to his character and talents; and these "Memorials of his Time" will have a permanent value as a record of the changes made by the last half century—the most eventful fifty years in the history of the world—in the moral, political, and social condition of the country of his birth. The book is accordingly readable and entertaining; rich in pleasant anecdote and lively gossip; but these only serve to give zest and piquancy to the graver portions of the volume.

Henry Cockburn was a Whig of the old Foxite type, and it is to his honour that he espoused liberal principles at his very outset in life, when by doing so he risked the favour of his own most powerful relatives, and knew that he was marring his prospects in the world. His talents and industry achieved success at the bar; but the political rewards of his profession were withheld from him till the accession of the Grey Administration, when he was made Solicitor-General at the age of fifty-one. People south of the Tweed have little notion what it was to be a Scottish Whig in Cockburn's early days. The country lay prostrate under the iron rule of a Tory oligarchy; and to be a Whig at Edinburgh in those days demanded as courageous and disinterested a spirit of patriotism as it now does to be a liberal at Naples or Vienna :—

No young person, who came to think for himself soon enough to keep what he heard in remembrance, can ever forget the painful impression made upon him by the intolerance of those times. No doubt the intolerance was justified, or at least provoked, by fright at first; but this soon became a pretence; and the hourly violence that prevailed was kept up chiefly as a factious engine. I lived in the midst of it. My father's house was one of the places where the leaders, and the ardent followers, of the party in power were in the constant habit of assembling. I can sit yet, in imagination, at the small side table, and overhear the conversation, a few feet off, at the establishment Wednesday dinner. How they raved! What sentiments! What principles! Not that I differed from them. I thought them quite right; and hated liberty and the people as much as they did. But this drove me into an opposite horror; for I was terrified out of such wits as they left me at the idea of bloodshed, and it never occurred to me that it could be avoided. My reason no sooner began to open, and to get some fair play, than the distressing wisdom of my ancestors began to fade, and the more attractive sense that I met with among the young men into whose company our debating societies threw me gradually hardened me into what I became—whatever this was.

The political state of Scotland in those days is illustrated by Lord Cockburn's description of the celebrated judge, Macqueen of Braxfield. After speaking of his strength of intellect and legal learning, our author proceeds :—

With this intellectual force as applied to law, his merits, I fear, cease. Illiterate and without any taste for refined enjoyment, strength of understanding, which gave him power without cultivation, only encouraged him to a more contemptuous disdain of all matters less coarse than his own. Despising the growing improvement of manners, he shocked the feelings even of an age which, with more of the formality, had far less of the substance of decorum than our own. Thousands of his sayings have been preserved, and the staple of them is indecency; which he succeeded in making many people enjoy, or at least endure, by hearty laughter, energy of manner, and rough humour. Almost the only story of him I ever heard that had some fun in it without immodesty was when a butler gave up his place because his Lordship's wife was always scolding him. "Lord!" he exclaimed, "ye've little to complain o'; ye may be thankfu' ye're no married to her."

It is impossible to condemn his conduct as a criminal judge too gravely or too severely. It was a disgrace to the age. A dexterous and practical trier of ordinary cases, he was harsh to prisoners even in his jocularity, and to every accused whom he chose to dislike. I have heard this attempted to be accounted for and extenuated by the tendency which the old practice of taking all the evidence down in writing, by judicial dictation, had to provoke a wrangle between the court and the bar every moment, and thus to create mutual impatience and hostility. No doubt there was something in this; but not much. And Braxfield, as might have been expected, from his love of domineering, continued the vice after its external cause, whatever it may have been, had ceased. It may be doubted if he was ever so much in his element as when tauntingly repelling the last despairing claim of a wretched culprit, and sending him to Botany Bay or the gallows with an insulting jest; over which he would chuckle the more from observing that correct people were shocked. Of this worst quality, for which he was too strong and too jovial, but from cherished coarseness

The union of talent with a passion for rude predomination, exercised in a very discretionary court, tended to form a formidable and dangerous judicial character. This appeared too often in ordinary cases—but all hope on his administration of the common business of his court disappear in the indeable iniquity of the political trials of 1793 and 1796. In these he was the Jeffreys of Scotland. He sat the head of the court, and the only very powerful mind it contained, was the real director of its proceedings. The reports make his abuse of the judgment-seat bad enough; but his misconduct was not so fully disclosed in formal decisions and charges, as it transpired in casual remarks and general manner. "Let them bring bring me prisoners, and I'll find them law," used to be openly stated as his suggestion, when an intended political prosecution was marred by anticipated difficulties. If innocent of this atrocious sentiment, he was scandalously ill-used by his friends, by whom I repeatedly heard it ascribed to him at the time, and who, instead of denying it, spoke of it as a thing understood, and rather admired it as worthy of the mas and of the times. Mr. Horner (the father of Francis), who was one of the jurors in Muir's case, told me that when he was passing, as was often done then, behind the bench to get into the box, Braxfield, who knew him, whispered -"Come awa, Master Horner, come awa, and help us to hang ane o' thae damned scoundrels." The reporter of Gerald's case could not venture to make the prisoner say more than "Citizen Gerald;" such an innovation." But the full truth is, that in stating this view he added that all great men had been reformers, "even our Saviour himself." "Muckle he made o' that," chuckled Braxfield, in an under voice; "he was hanget." Before Hume's communications had made our criminal record intelligible, all forms and precedents were a mystery understood by the initiated alone, and by nobody so much as by Mr. Joseph Norris, the ancient clerk. Braxfield used to quash anticipated doubts by saying, "Hoot! just gie me Jonse Norris and a good jury, an' I'll doo for the hallow." He died in 1799, in his seventy-eighth year.

This is an admirable specimen of Lord Cockburn's portrait-painting. Many other characters are drawn with equal truth and spirit; and the book is indeed a picture-gallery of the most remarkable people of the author's time—judges, lawyers, divines, and literati.

The following are a few traits from the picture of David Rae, Lord Eskgrove, who succeeded Braxfield as head of the Criminal Court :—

Eskgrove was a very considerable lawyer; in mere knowledge probably Braxfield's superior. But he had nothing of Braxfield's grasp or reasoning, and in everything requiring force or soundness of head he was a mere child compared with that practical Hercules. Still he was cunning in old Scotch law. But a more ludicrous personage could not exist. When I first knew him he was in the zenith of his absurdity. People seemed to have nothing to do but to tell stories of this one man. To be able to give an adequate idea of Eskgrove, with a proper imitation of his voice and manner, was a sort of fortune in society. Scott in those days was famous for this particularly. Whenever a knot of persons were seen tittering in the Outer House to one who was talking slowly, with a low muttering voice and a perplexed mind, and then the listeners burst asunder in roars of laughter, nobody thought of asking what the joke was. They were sure that it was a successful imitation of Eskgrove, and this was enough. Yet never once did he do or say anything which had the slightest claim to be remembered for any intrinsic merit. The value of all his words and actions consisted in their absurdity.

As usual, then, with stronger heads than his, everything was connected by his terror with Republican horrors. I heard him, in condemning a tailor to death for murdering a soldier by stabbing him, aggravate the offence thus, "And not only did you murder him, whereby he was berea-ved of his life; but you did thrust, or push, or pierce, or project, or propel, the le-thal weapon through the belly-band of his regimental breeches, which were his Majes-ty's!"

He rarely failed to signalise himself in pronouncing sentences of death. It was almost a matter of style with him to console the prisoner by assuring him that, "Whatever your religi-ous persua-shun may be—or even if, as I suppose, you be of no persua-shun at all—there are plenty of rever-end gentlemen who will be most happy for to show you the way to yeternal life."

He had to condemn two or three persons to die who had broken into a house at Leas, and assaulted Sir James Colquhoun and others, and robbed them of a large sum of money. He first, as was his almost constant practice, explained the nature of the various crimes, assault, robbery, and housebreaking, of which last he gave them the etymology; and he then remarked that they attacked the house and the persons within it, and robbed them, and then came to the climax, "All this you did; and God preserve us! just when they were aitten doon to their dinner!"

Another original of the Scottish bench was George Ferguson, Lord Hermand, a personage still remembered in Edinburgh. He was an able lawyer and worthy man :—

Two young gentlemen, great friends, went together to the theatre in Glasgow, supped at the lodgings of one of them, and passed a whole summer night over their punch. In the morning a kindly wrangle broke out about their separating or not separating, when by some rashness, if not accident, one of them was stabbed, not violently, but in an vital a part that he died on the spot. The survivor was tried at Edinburgh, and was convicted of culpable homicide. It was one of the sad cases where the legal guilt was greater than the moral; and, very properly, he was sentenced only to a short imprisonment. Hermand, who felt that discredit had been brought on the cause of drinking, had no sympathy with the tenderness of his temperate brethren, and was vehement for transportation. "We are told that there was no malice, and that the prisoner must have been in liquor. In liquor! Why has a man drunk! And yet he murdered the very man who had been drinking with him! They had been carousing the whole night; and yet he stabbed him after drinking a whole bottle of rum with him! Good God! my Lords, if we will do this when he's drunk, what will he not do when he's sober!"

His love of children was warm-hearted and unaffected. He always treated them seriously, exactly as if they were grown up. Few old men's speeches are more amiable than his about his grandnephew who happened to be his partner in a match at bowls: "No wonder that that fellow and I are such friends—there are just seventy years between us." His was eighty, the boy ten.

But when a boy happened to be a sailor he was irresistible. A little English midshipman, being violently attacked by a much bigger lad in Greenock, defended himself with his dirk, and by an unfortunate, if not accidental, thrust killed the assailant. He was tried for this at Glasgow, and had the good luck to have Hermand for his Judge, for no Judge ever fought a more gallant battle for a prisoner. The boy appeared at the bar in his uniform. Hermand first refused "to try a child." After this was driven out of him, the indictment, which described the occurrence and said that the prisoner had slain the deceased "wickedly and feloniously" was read; and Hermand then said, "Well, my young friend, this is not true, is it? Are you guilty or not guilty?" "Not guilty, my Lord." "I'll be sworn you're not!" In spite of all his exertions, his young friend was convicted of culpable homicide; for which he was sentenced to a few days' imprisonment.

Henry Mackenzie, the so-called "Man of Feeling" :—

Henry Mackenzie's excellent conversation, agreeable family, good evening parties, and the interest attached to united age and reputation, made his house one of the pleasantest. One of the Arbiri Elegantiarum of old Edinburgh, he survived to flourish in a new age. But though he survived the passing away of many a literary friend, and many a revolution of manners, he accommodated himself to unavoidable change with the cheerfulness of a man of sense, above the weakness of supposing that the world must have been in its prime only when he was in his. The title of "The Man of Feeling" adhered to him ever after the publication of that novel; and it was a good example of the difference there sometimes is between a man and his work. Strangers used to fancy that he must be a pensive sentimental Harley; whereas he was far better—a hard-headed practical man, as full of worldly wisdom as most of his fictitious characters are devoid of it; and this without in the least impairing the affectionate softness of his heart. In person he was thin, shrivelled, and yellow, kiln-dried, with something, when seen in profile, of the clever wicked look of Voltaire.

Two noted literary ladies :—

For a small place, where literature sticks out, Edinburgh has never been much encumbered by professed literary ladies; and most of those we have had have been exotics. The two best about this time were Mrs. Elizabeth Hamilton, the authoress of "The Cottagers of Glenburnie," and Mrs. Grant, widow of a minister at Laggan, who had unfolded herself in the "Letters from the Mountains"—an interesting treasury of good solitary thoughts. They were excellent women, and not too blue. Their sense covered the colour. I think it was to Mrs. Hamilton that Jeffrey said, in allusion to the good taste of never losing the feminine in the literary character, that there was no objection to the blue stocking, providing the petticoat came low enough down. One wonders why Mrs. Hamilton, with her good Scotch eye, did not put more Scotch among her cottagers than dirt, on which almost solely the book lives. Mrs. Grant was a tall, dark woman, of very considerable intellect, great spirit, and the warmest benevolence. Many individual Whigs, particularly of Jeffrey, in spite of her amusing horror of their principles, was honourable to her heart. She was always under the influence of an affectionate and delightful enthusiasm, which, unquenched by time or sorrow, survived the wreck of many domestic affections, and shed a grace over the close of a very protracted life. Both she and Mrs. Hamilton were remarkable for the success of their literary conversational gatherings. Their evening parties had the greater merit from the smallness of their houses, and of their means.

Lord Cockburn gives some ludicrous pictures of the old Scotch ways of administering justice. Here is one of them :—

At Edinburgh the old Judges had a practice at which even their barbaric age used to shake its head. They had always wine and biscuits *on the bench* when the business was clearly to be protracted beyond the usual dinner hour. The modern Judges—those I mean who were created after 1810—have put an end to this; but with those of the preceding generation, some of whom lasted several years after 1800, it was quite common. Black bottles of strong port were set down beside them on the bench, with glasses, carafes of water, tumblers, and biscuits; and the without the slightest attempt at concealment. This refreshment was generally allowed to stand untouched, and, as if despised, for a short time, during which their Lordships seemed to be intent only on their notes. But in a little, some water was poured into the tumbler, and sipped quietly as if merely to sustain nature. Then a few drops of wine were ventured upon, but only with the water: till at last patience could endure no longer, and a full bumper of the pure black element was tossed over; after which the thing went on regularly, and there was a comfortable munching and quaffing, to the great envy of the parched throats in the gallery. The strong-headed stood it tolerably well, but it told, plainly enough, upon the feeble. Not that the crime was absolutely intoxicated, but it was certainly sometimes affected. This, however, was so ordinary with these sages, that it really made little apparent change upon them. It was was not very perceptible at a distance; they all and acquired the habit of sitting and looking judicial enough, even when their bottles had reached the lowest ebb. This open-court refection did not prevail so far as I ever saw, at circuits. It took a different form there. The dignity of the inn frequently produced a total stoppage of business; during which all concerned—Judgesand counsel, clerks, jurymen, and provosts—had a jolly dinner, after which they returned again to the transactions and hangings. I have seen this done often. It was a common remark that the last step of the evening procession was far less true to the music than that of the morning.

This work has been published by Lord Cockburn's executors; and we learn from their preface that it was written between the year 1821 and the close of 1830, with the exception of some small additions and alterations made subsequently. The narrative closes with the death of George IV., in the summer of 1830; the accession of the Whigs to power a few months after wards; and the author's appointment to the office of Solicitor-General, under the administration of Earl Grey. Our specimens of the book are culled from its lighter portions; but the reader will find a luminous and comprehensive view of the progress of public opinion and general enlightenment in Scotland during the whole period to which these "Memorials" relate.

THE EMPEROR'S VIGIL, AND THE WAVES AND THE WAR. By ERNEST JONES, of the Middle Temple, Barrister-at-Law, Author of the "Battle Day." London: George Routledge and Co.

When noticing the "Battle Day," and other productions of Mr. Ernest Jones, we expressed our conviction that he might eminently qualified to excel in lyrical poetry, and that criticism is fully justified by the present volume. The tone of his mind is vigorous, and he combines depth and warmth of feeling with a lively fancy and an ardent imagination, chastened by a cultivated taste. Some modern bards have achieved an ephemeral reputation by an inflated and obscure style, and a spasmodic straining after effect, mistaking the unintelligible for the sublime; while critics of perverted judgment, or affecting eccentricity, have lavished praise on what is simply ridiculous. Mr. Jones has studied his art in a purer and wiser school. He, indeed, soars on high, but his flight is sustained on firm and steady pinions. His diction is clear, sparkling, and copious, and the flow of his verse is ever marked by ease and grace.

On the present occasion Mr. Jones has attuned his lyre to the stirring strains of war, singing the praises of our gallant seamen in the Baltic fleet.

The "Emperor's Vigil" is the longest poem in the collection, and breathes throughout a noble indignation against the ambition and despotism of the late Czar Nicholas.

We have not space for lengthened extract, but cannot resist the following quotation from one of the sweetest and tenderest poems in the volume. It is entitled the "Sailor's Night Watch," and has only to be known to become a favourite in the navy :—

What steals upon the midnight?
What walks across the wave,
Where the moon's long light path stretches o'er
The sailor's sullen grave,
Like a bridge that is built by angels,
The sinking soul to save?

And then, in the stilly midnight,
Sweet forms come tripping o'er,
For I see at the end of that ray of light
My home on a pleasant shore.

And my dear one lonely and sad within,
And my child at the cottage door.

Their eyes are turned towards me,
And I beckoned them to my side,
I beckon them up with the pulse of my heart,
And they come o'er the ocean wide,
On that delicate path that the angels made
For the feet of my sorrowing bride.

We would willingly quote more from this exquisite little poem, but our limited space forbids; and perhaps we have said enough to send the reader who relishes true poetry to the volume itself. Mr. Jones gives half a promise that he will also celebrate the deeds of our Crimean heroes, and surely there are few writers better qualified to do justice to their fortitude and valour.

## STONE COFFINS DISCOVERED IN WORCESTER CATHEDRAL.

*(From a Correspondent.)*

On the 7th ult. the workmen engaged in the repairs now in progress a Worcester Cathedral, while excavating for foundations at the foot of the south-west buttress of the south-east transept, discovered two stone coffins, containing skeletons, very perfect, and apparently in the exact position in

which the bodies had been deposited. Both are the remains of men of large stature—the one of extraordinary height, measuring nearly 6 ft. 6 in. The first-discovered coffin was 5 ft. below the surface of the ground, 2 ft. from the base of the buttress, and with its lower extremity or foot pointing about fifteen degrees to the northward of east. It is roughly hewn out of an entire block of sandstone, similar to that of which the ancient walls of the cathedral are built, and with a recess formed for the head There were no remains of covering. The last-discovered and most ancient coffin, containing the largest skeleton, is of still ruder workmanship than the former, constructed of several roughly-worked stones, with the recess for the head formed of three pieces. This coffin had a covering of rough slabs. Its situation is very remarkable, its lower part, as far as the knee joints, being partly imbedded in the masonry of the buttress, which appears to have been built round it. There was nothing found which could lead to their identity.

The importance of the works which led to these discoveries rendering their removal unavoidable, orders have been given by the Very Rev. the Dean that they should be carefully deposited in the crypt.

## INAUGURATION OF THE PRINTERS' ALMHOUSES, TOTTENHAM.

On Wednesday (last week) the Almhouses for the reception of aged and infirm members of all branches of the printing trade, which have just been erected at Wood-green, Tottenham, were formally inaugurated by a grand *déjeûner*, held in the grounds adjoining the building. The Earl Stanhope, the president of the institution, whose family name is so intimately connected with the printing trade, in both a literary and mechanical point of view, most appropriately presided on the occasion. The noble chairman and the stewards, comprising the representatives of some 150 of the leading publishing firms of London, assembled at the building at about half-past twelve, and were conducted over the whole establishment by the architect, Mr William Webb.

The building is in the Tudor style of architecture, and occupies three sides of a square, the fourth, fronting the road, being tastefully laid out as a garden. It contains between thirty and forty rooms, and will give accommodation to about twelve couples, allowing a neat and comfortless sitting-room and bed room and kitchen to each couple. The number of inmates is, however, at present small, only three couples having been elected out of six candidates at the first ballot, which took place on the 9th inst. The inmates of the institution receive, in addition to the gratuitous house accommodation, a certain weekly allowance, which varies according to the amount of any other means of subsistence which the recipient may possess. The inspection of the building having concluded, the whole party retired to the pavilion erected on the grounds at the back of the Almshouses, where a *déjeuner* was served, at which Earl Stanhope presided.

In the evening a grand tea party, followed by a concert and a ball, in celebration of the inauguration, took place at the Highbury Barn Tavern, at which between 400 and 500 persons connected with the mechanical portion of the printing trade were present. William Clowes, Esq., presided on the occasion.

On the day preceding the opening of the Almshouses, a neighbouring Quaker lady (on the acquaintance of Elizabeth Fry), rapidly approaching threescore years and ten, visited the institution, and, having inspected the building, presented each of the newly-elected inmates with 5*s.*, and directed them to send to her residence every other morning for a supply of new milk; nor did this kind visitor depart without leaving a donation in the subscription-box, and her name enrolled in the visitors' book. We are happy to learn that the subscriptions in connection with the Festival exceed £670.

## FANCY BAZAAR AT WELLINGTON BARRACKS.

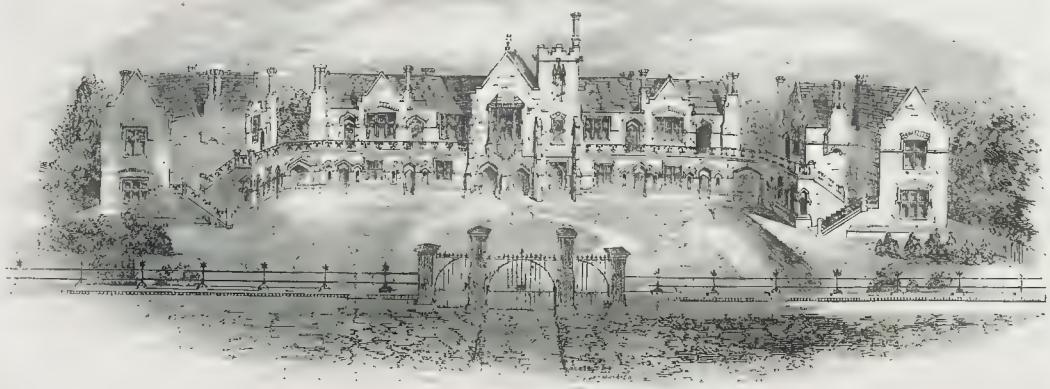
THE committee of ladies who during the last two years have been occupied in the praiseworthy task of assisting and providing employment for the wives and children of Guardsmen on foreign service in the East having ascertained that a nursery and infant-school were much needed, wherein the younger children of the Brigade of Guards might be tended and instructed during their mothers' daily absence at work, a subscription has been opened with a view of carrying out that object, and a sufficient sum has already been collected to justify the trustees (Colonels Thornton, Keppel, Steele, Moncrieff, Kingscote, and Carleton) in entering into a negotiation for the purchase of a proper site for such an establishment, close to the Victoria Lodging-house for Married Guardsmen.

FANCY BAZAAR AT THE WELLINGTON BARRACKS, ST. JAMES'S-PARK.

Her Majesty the Queen has graciously promised her support to this charitable institution, and their Royal Highnesses the Duke of Cambridge and the Duchesses of Kent, Cambridge, and Gloucester have already subscribed liberally towards carrying it out

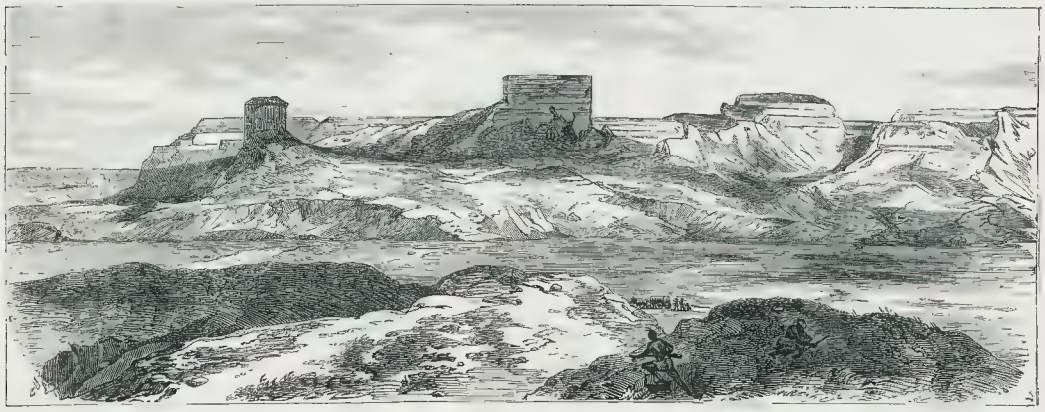
On Thursday and Friday (last week, a Grand Fancy Fair was held in aid of the funds for erecting the necessary buildings, and for the permanent maintenance of the proposed nursery and school, in the grounds of the Wellington Barracks, Birdcage Walk, St. James's Park. The bazaar was fitted up in six large marquees, two to each regiment, the whole under the superintendence of Mrs. Armytage, assisted by Mrs. Foxcomby, Mrs. Moncrieff, and the ladies of officers of the brigade. The bands of the Grenadier and Coldstream Guards attended during each day, and played a selection from the most eminent composers.

On Friday the Queen and Prince Albert, the Princess Royal, and Prince Frederick William of Prussia, honoured the bazaar with a visit.



THE PRINTERS' ALMSHOUSES WOOD-GREEN TO TENHAM.—(SEE PRECEDING PAGE.)

## THE NEBRASKA AND KANSAS TERRITORY.



ANCIENT BLUFF RUINS, NEBRASKA.

SETTLERS ENTERING NEBRASKA, PAPPEA CREEK

STEAMER PASSING BATON ROUGE NEBRASKA.—(SEE NEXT PAGE.)

## THE NEBRASKA AND KANSAS TERRITORIES.

NEBRASKA is the name given to a portion of that extensive unoccupied territory of the United States the boundaries of which are the 40th parallel of N. lat., on the S.; Utah, Oregon, and Washington territories, on the W.; the 49th parallel of N. lat., on the N.; and the territory of Minnesota, and the States of Iowa and Missouri, on the E. It hitherto has been the home of the crafty "Pawnee," the stately and brave "Sioux," and the suitably named "Snake" tribes of Indians, with others of less importance. Now their death warrants are signed, and, if we may credit recent accounts, Uncle Sam will prove a relentless executioner. On the 25th of May, 1854, an act was passed, and on the 30th of the same month was confirmed by the President of the United States, organising the most important parts of Indian and all north-west territory into two territories, Nebraska and Kansas. The bill guaranteed that the property of the Indians within the territories should be respected until their titles to the lands should, by treaty, be extinguished. Various tribes of the Nebraska Indians have transferred their lands to the United States, the "Omahas" and "Ottoes," for instance, have ceded nearly 10,000,000 acres, for which they are to receive 52,000 dollars annually, for thirty years For themselves they have reserved a tract ten miles wide, and of an indefinite length, which they of course will keep until the proper authorities want it. The fate of the red men is evident. Henceforth they must, willingly or not, resign Buffalo and Elk on the rolling prairie to Yankee farmers, and try to be content, like some of the rest of us, with visions of happy hunting-grounds beyond the grave There is little hope for them here. Go which way they may, the land is occupied; and to remain is only to be embroiled in deadly feuds—to be shot down with out hesitation and with very little remorse.

The territory is doubtless a valuable acquisition to the United States. Large portions will afford extensive fields for agricultural enterprise, and already it is decided that a railway shall pass through it to California. The western portion will be valuable for little else besides grazing. There are also large portions that are very mountainous, sandy, and barren. The Missouri river rises in this territory, and the Platt river and the Yellow Stone river are confined during their whole course to it. Both the Platt and the Yellow Stone have many large tributaries. The Platt is the largest affluent of the Missouri, and rises in the Rocky Mountains. It is very broad, and so shallow that, except during floods, it is seldom difficult to find a convenient ford. The Yellow Stone is the most important affluent of the Missouri, being about 1000 miles in length, 800 miles of which are navigable.

It was during the passage of the Nebraska Act that the "Missouri Compromise" was repealed. The South declared that it was unconstitutional to interfere with the domestic institutions of states or territories. At last the contention became so fierce that a dissolution of the Union was threatened both in and out of Congress. Nebraska and Kansas, however, were left to decide for themselves whether slavery should exist as an institution or not. By calling in the assistance of the "border ruffians" of Missouri a small handful of pro slavery settlers in Kansas succeeded last year in electing a slave legislature against the wish of the great majority of the settlers. The dispute between the two parties, which has been taken up warmly by the North and South, has gone to so great a length, as we explained last week, that it threatens to break up the Union. We have this week given views of "Settlers entering the Territory of Nebraska" and "Ancient Bluff Ruins near Fort Laramie, in Nebraska."

## GOLD MEDAL OF THE ROYAL INSTITUTE OF BRITISH ARCHITECTS.

IN some of our former numbers we have given Engravings of Medals presented to distinguished men, and we shall endeavour, as opportunity occurs, to complete the list. With this view, we give the Gold Medal placed at the disposal of the Institute of British Architects by her Gracious Majesty the Queen, the Patroness of the Institution. This society formerly consisted of two bodies, the Architectural Society, and the Institute of Architects, but the former, under the presidency of Mr. Tite, was merged into the latter about ten years ago. The body is numerous, the Institute is established by charter, and contains all the leading architects of England and of most other countries. The medal (given annually) "is conferred on such distinguished architect or man of science, of any country, as may have designed or executed any building of high merit, or produced a work tending to promote or facilitate the knowledge of architecture, or the various branches of science connected therewith."

By the by-laws of the Institute, no party can be recommended to the Queen for this honour without the recommendation of the Council of the Institute, confirmed at a meeting of all its members specially summoned for the purpose.

GOLD MEDAL OF THE ROYAL INSTITUTE OF BRITISH ARCHITECTS, ADJUDGED TO MR. TITE, M.P.

The medal was first given in 1848, and the following is a list of those professors to whom it has been adjudged —

1848.—C. R. Cockerell, R.A.
1849.—Gav. L. Canina, Hon. and Cor. Member, Rome.
1850.—C. Barry, Fellow, R.A.
1851.—T. L. Donaldson, Fellow.
1852.—Chev. Leo. von Klenze, Hon and Cor. Member, Munich.
1853.—Sir R. Smirke, Hon. Fellow, R.A.
1854.—Philip Hardwick, Fellow, R.A.
1855.—J. J. Hittorff, Hon. and Cor Member, Paris.
1856.—William Tite, Fellow, M.P., F.R.S.

The medal is a fine work of art, and is by the elder Wyon. Our Engraving is somewhat less than the real size.

## CHESS.

*** Our customary notices to Chess Communicants are unavoidably postponed until next week.

| 15. Kt takes P | P takes K P | 39. P to Q Kt 4th | Kt to Q 4th |
| 16. B takes Kt (h) | B takes B | 40. K to K 3rd | B to K 4th |
| 17. Q to Q B 4th (ch) | B to Q 4th | 41. B to Q Kt 6th | Kt to Q B 6th |
| 18. Q to K 2nd | Kt to K B 4th (i) | 42. B to Q 5th | P to Q B 4th |
| 19. P to K B 3rd | Q R to K sq | 43. P takes P | K takes P |
| 20. B to K B 2nd | B takes Q B P | 44. K to Q 2nd | P to Q Kt 5th |
| 21. P to Q B 4th | P to Q 4th | 45. B to Q 8th | K to Q Kt 4th |
| 22. P takes P | Kt to Q 3rd | 46. K to Q 3rd | P to Q R 4th |
| 23. Q to Q 2nd | B to Q B 5th | 47. K to Q Kt 2nd | P to Q R 5th |
| 24. K R to K Kt sq | Q R takes Kt | 48. B to K B 6th | P to Q R 6th (ch) |
| | | 49. K to Kt sq | P to Q Kt 6th |
| | | | and White surrendered |

(a) This resolves the opening into a position of the Scotch game, and is not thought quite so good a move as 3. K B to Q B 4th.
(b) This defence we are disposed to estimate more highly than we formerly did.
(c) White does not avail themselves of the gambit in the shape of a pawn now offered, as its acceptance would cost them the game
(d) The best move, undoubtedly.
(e) Threatening Q B to K R 6th. &c.
(f) Had they taken with the Q R Pawn, Black could safely have won their King's Pawn.
(g) Probably the best move, as it leaves them free to take the King's Pawn; or, after playing P to Q R 3rd, to gain an awkward attack upon the adverse Queen.
(h) It was contemplated that White would now make a desperate effort to recover themselves by playing Kt to K B 6th (ch). That move, however, would have cost them the exchange, and left their game in other respects no better than it was before
(i) Now Black have fairly got the attack into their own hands; and they never afford the enemy a chance of retrieving their position

### CHESS ENIGMAS.

No. 991.—By E. S., of Hartlip.

*White*: K at Q B 3rd, B at Q B 6th, B at K 8th, Kt at Q Kt 2nd, P at Q 2nd and Q Kt 4th.
*Black*: K at his 5th, B at Q Kt 4th, P at K B 3rd, K 4th, and Q R 3rd.

No. 992.

An ingenious emendation of Problem No. 631.—By Mr. H. MESER, of Lisbon.
*White*: K at Q Kt 4th, B at K sq, B at Q 7th, Kt at Q B 4th, P at K 3rd, and Q Kt 5th.
*Black*: K at Q 4th, B at K R 4th, Ps at K Kt 4th, K 5th, and Q 3rd.
White to play, and mate in four moves.

No. 993.—By EICHSTADT.

*White*: K at Q B 7th, B at K 5th, Ps at K 4th, Q B 3rd, and Q R 4th.
*Black*: K at Q B 4th, B at Q 8th, Ps at Q 2nd, Q B 5th, and Q R 4th.
White to play, and mate in five moves.

PAPAL GODFATHERS.—"The present," observes the *Débats*, "is not the first time that a Pope has acted as godfather to Royal children. When Charlemagne was at Rome his son Pepin was baptised by Pope Adrian I. In France no other ceremony of the kind occurred, if we make a mistake not, up to the 16th century in the reign of François I., when the Dauphin of France, son of François I., who was baptised on the 25th of April, 1518, had a godfather doubly illustrious, since he was Pope and bore the name of Leon X.; he had besides a second godfather, the King of Sicily, Duke of Lorraine. The latter was present at the baptism; the Pope was represented by his nephew, Laurent de Médicis, Duke d'Urbino. The godmother was the Duchess Ancona. The Dauphin of France, son of Henry IV., who was afterwards Louis XIII., had also a Pope for his godfather—Paul V., of the Borghese family. The baptism took place at Fontainebleau on the 14th of September, 1606."

MAIL PACKETS IN CASE OF WAR.—There are now six mail steam-packet communications every month between England and the United States. In article 20 of the United States and English Postal Convention, it states that "in case of war between the two nations the mail packets of the two countries shall continue their navigation without impediment or molestation until six weeks after a notification shall have been made on the part of either of the two Governments and delivered to the other that the service is to be discontinued, in which case they shall be permitted to return freely and under special protection to their respective ports."

A SPANISH CRISIS.—The Madrid journals of the 10th inst. state that the whole city had been plunged into profound alarm in consequence of a report having been suddenly spread that a popular rising had commenced, and of the Government having taken military precautions with extraordinary promptitude. So great was the alarm that an officer of the staff went to the palace to accommend the Queen not to make her customary promenade, and another was sent to the Retiro, where the Princess of the Asturias was being promenaded, to have her removed to a place of safety. But it turned out that the reported rising was nothing more than a tremendous hubbub at the bull-fighting circus at the Porta del Alcala, and that it was caused by the president of the bull-fight having ordered a bull which behaved badly to be slaughtered, whereas the spectators wished to have him igcominiously expelled. The conflict ended in the triumph of the president.

A COLLISION IN THE PRINCIPALITIES.—On the 2nd there was a collision between some Austrian Uhlans and the Wallachian militia. The Uhlans who were to leave Fokschani for Bucharest had demanded several carriages for the transport of their baggage. An officer of Wallachian militia, who was on his way with his men to Braila, claimed the same vehicles. It is said that twelve militiamen were wounded, and that the Austrian officer received a bayonet stab. As soon as the circumstances were known at Bucharest, the AUSTRIAN Commander-in Chief despatched General Maniani with a staff officer, and the Wallachian Government a major and a surgeon, to inquire into the affair.—*Post Amgt Gazette.*

## EXECUTION OF PALMER.

IN a small portion of our last week's publication we gave a short notice of the execution at Stafford on Saturday morning. We now present a more detailed narrative of the last hours of the Rugeley poisoner.

Palmer denied the justice of his sentence to the last, but in a manner which left the impression on all who heard him that he had something on his mind which he would not disclose. About half-past ten o'clock on Friday night Major Fulford, the governor of the gaol, being aware that Mr. Smith, the attorney, was shortly expected to arrive, went to the prisoner's cell, accompanied by the Rev. Mr. Goodacre. He told Palmer that, if he wished to make any family or confidential communications to Mr. Smith, he might rely that they would not be divulged, and that they should be kept a profound secret. Palmer immediately replied, "What I have to say to Mr. Smith I do not wish to be kept secret, but I hope, on the contrary, that you will take care to let it be made as public as possible. I have only to say that I am very grateful to Mr. Smith for his exertions on my behalf, and I also thank the officers of this gaol for their kindness to me." He then finished this sentence by using this remarkable expression, "I also wish to say that Cook did not die from strychnia." Major Fulford, upon his saying this, addressed Palmer, and said, "Mr. Palmer, I hope, at this awful moment, you are not quibbling as to the cause of Cook's death. The question is, not whether Cook was murdered by strychnia, but whether he was killed by you or not." Palmer rejoined, "Why, Lord Campbell summed up the case as one of murder by strychnia." Major Fulford again said, "That is not the question; the point is whether Cook was murdered by you or not." Palmer then said, "I have nothing more to say than this, I am quite easy in my conscience, and happy in my mind." Mr. Smith arrived at the prison soon after this occurred, and he was immediately admitted to the prisoner's cell. The prisoner's brothers and sister were present during the interview. It was anticipated that the prisoner was about to make some important communication to his attorney; but it turned out that his chief object was to thank him personally for the great pains he had taken in preparing his defence, and also to contradict a rumour which it seemed he imagined had got abroad, that he had made a confession in London either to Serjeant Shee or to some of the authorities of the gaol of Newgate. He wished Mr. Smith to do all in his power to get the statement contradicted if it had been made, and he also pressed upon him, for the sake, as he said, of his family and his "poor boy," that the body of Cook should be again exhumed and submitted to examination, with a view to show that it did not contain any strychnia. Mr. Smith promised to do all in his power to comply with Palmer's request. Before he left, Palmer gave him a religious tract, entitled "The Sinner's Friend;" and, just before he handed it to him, he wrote on the first page, in a firm, bold hand, "William Palmer, June 13, 1856."

The inns of Stafford carried on a busy trade on the day previous to the execution. All day long people flocked into the town by road, by rail, on foot, on horseback, in gig, carriage, or on donkey. Such crowding at the railway station, such jostling in tavern yards, and tavern parlours and coffee rooms, such crowding and pushing in public-house kitchens and taprooms. Everybody wanted to get shelter, and everybody found great difficulty in securing anything of the sort. Beds had been at a premium for days past, and he who came to Stafford on Friday hoping to secure one without having made previous arrangements for that purpose found himself miserably deceived. There was no bed to be got—not for love, not for money, not for any consideration; and lucky were those who (content to sit up all night on a chair, or lie upon a table, or litter down on a hay-loft, or share a stable with the horses) were able to get a good supper to feed that physical strength which was necessary to withstand the mighty crush which all knew next morning must inevitably bring.

Stafford has seldom seen a more motley throng than that of last Saturday morning. The town mechanic, the respectably-dressed tradesman, the rustic labourer, the dark-featured miner, or puddler from the iron districts, stood together in a strangely-blended, restlessly-heaving, and loud-murmuring mass; with women dotted about at intervals—panting and fainting from the pressure, but unable to disengage themselves from the dense mass of human life in which they had become embedded. The scene was at once exciting and saddening; for the solemn thought that Justice was about to exact her right and her might contrasted strangely with the aspect of that vast assemblage of people, in the minds of most of whom, to judge by appearance, curiosity had sway, to the entire exclusion of all nobler thoughts.

Perhaps no criminal of celebrity was ever executed in so inconvenient a place, so far as the facility for obtaining a view is concerned. The standing room outside the gaol was not more than ten feet wide, and although the street either way extends a very considerable distance, there was only available space for comparatively few persons—perhaps 5000 or 6000, the view of the scaffold either way being intercepted by the towers of the gaol. With the first peep of dawn the people began to take up a position from which a good view of the scaffold could be obtained. By four o'clock hundreds had taken their stand upon the limited area from which such a view could be obtained; by five o'clock the hundreds had swelled to thousands; by six o'clock every foot of vantage-ground was occupied, while the population of the surrounding villages still came pouring into the town, too late to see, but not too late to hear, how he died, and know whether he had made a confession.

The convict retired to rest early on the morning, and slept two hours and a half, when he was visited again by Mr. Goodacre, the chaplain; between five and six he had some tea, but without eating anything with it. The chaplain saw him repeatedly until the hour of his execution, accompanied by the Rev. Mr. Sneyd, a clergyman in the neighbourhood, who had visited him once or twice during the week. Shortly after seven he had another cup of tea; and to the turnkey who gave it him, and who asked him how he was, he replied he was quite comfortable. About half-past seven o'clock Colonel Dyott, the High Sheriff of the county, accompanied by Mr. Hand, the Under Sheriff, and some of his officers, arrived at the gaol, and they proceeded to the prisoner's cell, accompanied by Major Fulford, the governor, and the Rev. Mr. Goodacre. The prisoner shook hands with them, and returned thanks to the governor for the kindness he had received at his hands. Shortly afterwards Colonel Dyott asked the prisoner whether he did not think that the time had arrived when he ought to admit the justice of his sentence? Palmer immediately, and with great earnestness, exclaimed, "No!" then, striking one of his arms down, and with great energy, he added, "They are my murderers." He did not mention whom he meant by "they," but he again repeated the expression, "I am murdered; they are my murderers."

At this moment the prison bell gave forth its mournful sound. Palmer heard it quite unmoved, and it being now close upon eight o'clock a signal was given for the procession to be formed. It was headed by the chaplain, who commenced reading the Burial Service. He was followed by some officers of the Sheriff; then came the prisoner, close to whom was the hangman and his assistant. The High Sheriff and his deputy and a few of the county magistrates who are visiting justices of the gaol, and Major Fulford, the governor, closed the procession. The cell in which the prisoner had been confined was in a sort of gallery, and he had to descend an iron staircase. He descended at a quick pace; and, notwithstanding his arms and hands being pinioned, he never faltered, but exhibited a most extraordinary appearance of nonchalance, and, indeed, indifference. He made a bow to the governor of the prison, Major Fulford, who was standing at the bottom of the staircase, and shook hands with one of the officials of the prison, and then with great composure resumed his place in the procession. The distance from this spot to the place of execution is considerable, and Palmer traversed the whole of it with a firm light step, tripping, as it were, along the ground. He did not evince the least appearance of alarm when he came suddenly upon the ladder leading up to the scaffold, but at once mounted it rapidly, and, having looked up and observed the spot where the rope was hanging, he, of his own accord, placed himself under it, and the executioner at once placed the noose round his neck. This was the only moment when he appeared to betray any emotion, for the moment the rope touched his flesh he turned deadly pale. Contrary to general expectation, the crowd did not evince any manifestation against the prisoner upon his making his appearance on the scaffold. There was a slight yell from one portion of the crowd, but the majority of those present gave no expression of feeling, and, indeed, almost perfect stillness prevailed. The hangman, having drawn the cap over the face of the prisoner, retired from the scaffold and withdrew the bolt that secured the drop, which at once fell, and Palmer appeared to die almost instantaneously. There was not a single convulsive effect observable: his pinioned hands gradually dropped, and he ceased to exist, apparently without a pang.

After hanging an hour the body was cut down and carried to the interior of the gaol, where a cast of the head was accurately taken by a gentleman named Bridges, who is connected with the Liverpool Phrenological Society, who had a special authority from the visiting justices for that purpose. The countenance of the prisoner did not exhibit any indication of his having suffered a violent death, and a sort of contemptuous smile appeared upon the face. In the course of the day the body was buried within the precincts of the gaol.

*NEW BOOKS, &c.*

TO ALL INTERESTED IN THE YOUNG.
BOY'S OWN JOURNAL and YOUTH'S MISCELLANY. Every Saturday, ONE PENNY. Published at the office of the "Boy's Own Magazine." A year and a half since was commenced the "Boy's Own Magazine," which has proved The success of this periodical for youth was soon certain, and each month has seen a large increase in the number of purchasers. Here has been, however, a mass of correspondence addressed to the proprietors of the "Boy's Own Magazine," desiring the more frequent issue of such attractive and useful publications. The letters that have been received on this subject are not only from the Young, but from Parents, Heads of Families, and Schools, showing, beyond all doubt, the great necessity for a Boy's Literature, at once Moral, Entertaining, and Instructive. For these reasons it is published in "The Boy's Own Journal and Youth's Miscellany." The Proprietors are confident in the hope that Boys in town and country will like it, and feel that their Elders will approve, the matter and manner of this new candidate for their support. "Boy's Own Journal" every Saturday, One Penny.
S. O. BEETON, Publisher, 8, Bouverie-street, London; and sold by all Booksellers.

T., the original Maker of a Twenty-five Guinea Pianoforte, has, by the care he has devoted to all branches of the manufacture, obtained the highest reputation throughout the universe for his instruments, unequalled in durability and delicacy of touch, more especially for their excellence in standing to any in the various climates of our colonies. In elegant walnut, rosewood, and mahogany cases, packed for shipment, £2 2s. extra. H. TOLKIEN'S Manufactory, 37, 38, and 39, King William-street, London-bridge.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, Price Fifty Guineas.—This instrument has (unlike the ordinary Cottage Pianoforte) Three Strings, and the extended compass of Seven Octaves. It is strengthened by every possible means to ensure the greater amount of wear, and to stand perfectly in any climate. The workmanship is of the best description, the tone is round, full, and rich, and the power equal to that of a Richord Grand. The case is of the most elegant construction, in rosewood, the touch elastic, and the repetition very rapid. Every possible precaution has been taken to ensure its standing well in tune. Chappell and Co. especially invite the attention of the public, the profession, and musicians to the Foreign Model, feeling assured that on Examination, in no respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and if damaged overcoming within twelve months of the purchase.—50, New Bond-street, London.

## LOST PUBLIC SPIRIT.

EVERY reflective politician in our own or foreign countries must have observed the palpable collapse of public virtue among our governing classes. We live in a time of transition—in a time when the old statesmanship, the old parties, and the old leaders, are dying out; and when no new parties, and consequently no new leaders, have arisen among the people, to express their wishes, and to marshal the youth and the maturity of the country into those great political phalanxes, by which in free countries freedom is best preserved, and most securely increased. But the day is fast approaching when the apathetic rottenness of Parliaments and Governments must give way to nobler and more wholesome impulses; when the ministry of *poco-curantism* must be replaced by one more in accordance with the earnest work which the country has to perform, and with the difficulties and perils through which it has to pass; and when a Parliament must be returned, the members of which will think more of high political principle, of rigid adherence to patriotic duty, and of the rights and progress of all classes in every part of the empire, than of the security of their own seats, or of the merely local prejudices, jealousies, and illiberalities of the corrupt constituencies by whose favour they tack the letters M.P. to their names, and strut about in the full-blown dignity of senatorial rank. Sir Robert Peel is not the last of our statesmen. He was the last to set a great example, and to sacrifice the traditions of his youth, the friendships and connections of his life, and the Shibboleths of his party, to the cause of truth and justice, and the imperative command of his convictions. But it would fare ill with England if there were no other men to arise in her councils to prefer virtue to place, and the cause of their country to the effete traditions of their party.

But where are these new men? We search for them in vain. We see none who look beneath the surface of things, or who form large views of the real position of England at the present day, or of the duties that will devolve upon her amid the approaching convulsions of the continent of Europe. The men of the new generation who might once have guided the people, have snuffed themselves out by their unstatesmanlike adherence to the dogma of the Quakers—that War is in no circumstances justifiable, and that a nation, smitten by another nation on the right cheek, is bound to turn the left cheek to receive the same insult; and that the only safe and advisable rule of worldly conduct is to mind the shop, to grow fat, to prosper, and to heap up wealth. To these men there have as yet arisen no successors. We have some honest politicians of note; but unluckily they are all—or nearly all—impracticable and "crotchetty," and have not the tact to work harmoniously and efficiently with other men, or the energy and steadiness that spring from great purpose. On the other hand there are many men of tact and energy, capable of marshalling, of leading, and of governing their fellows, but unfortunately they are not honest, or are so closely associated with the great families who look upon the government of the nation as their birthright, or the necessary appanage of their dignity, that their leadership inspires distrust instead of confidence, and is tolerated, not approved, by the people.

In addition to the want of men, there is the want of political organisation. In free countries nothing can be done without organisation, and everything can be done with it. What carried the Roman Catholic Emancipation Act? Organisation. What carried the Reform Bill? Organisation. What repealed the Corn-laws? Organisation. But at the present time organisation is defunct except for religious and sectarian purposes. On a question of the Sunday or the Sabbath, or of the grant to Maynooth, an admirably constructed and effective machinery is in existence; but there is no such machinery for political or secular purposes. The machinery was broken up with the Anti-Corn-law League, and has never since been reconstructed. An attempt has been recently made to restore the wholesome action of public opinion by the formation of what is called the Administrative Reform Association, but hitherto with very little success. That body, if not a complete failure, has certainly not proved itself to be a very signal triumph either of the popular will or of the popular principle. It has lived a spasmodic kind of life, and was thought but a fortnight ago to be hopelessly defunct. Mr. Roebuck has, in the interval, given it a galvanic shock; and it has opened its eyes, stretched its limbs, and given a convulsive snort, to prove that it is yet above ground. But we cannot discover in Mr. Roebuck speech on the reinauguration of the Association, or in anything that it has yet done or proposes to do, the signs of a real and permanent vitality. It enunciates a profession of political faith so broad that Lord Palmerston, Lord Derby, Mr. Gladstone, Mr. Disraeli, Mr. Bright, and Mr. Gavan Duffy, if the latter were still in Parliament, or Mr. Feargus O'Connor, if still alive, might severally give in their adhesion to it. Lord Palmerston is an Administrative Reformer as good as Mr. Morley or Mr. Roebuck; and, in spite of the ugly reminiscences connected with the name of "Dowb," so is Lord Panmure. Indeed, Lord Palmerston, though a jester and a "joker of jokes," has proved in the only real and urgent business which the nation has recently had in hand, that he is an Administrative Reformer of the best and highest class. The same praise is due to the Ministry as a body, as most people will admit, when they compare the state of our army and navy when Lord Aberdeen quitted office, and Lord Palmerston assumed the whole responsibility, with that in which it was at the conclusion of the war. The cry of Administrative Reform in the mouths of those who, at present, seek to agitate the country with it, is either a sham or a mistake. No Ministry, no Government, will oppose or deny it; consequently, no Government, however incapable or corrupt, can be overthrown upon it, and replaced by a better. The question is too vague, too meaningless, and too intangible for political warfare. It is a question that is not even

MAJOR-GENERAL SIR WILLIAM FENWICK WILLIAMS, K.C.B., "THE HERO OF KARS."—FROM A PHOTOGRAPH BY JOHN WATKINS, PARLIAMENT-STREET.—(SEE NEXT PAGE.)

skin deep. It lies upon the surface, like soot upon the cheeks of a chimney-sweep, and may be wiped off, leaving the peccant humours in the blood as vigorous as if the ablution had not been performed. The evil to be remedied has a much deeper seat. It is not so much a corrupt or incapable Administration that the country has to fear as a corrupt and incapable Parliament. The existing Parliament has ceased to represent, and possibly never did represent, the feelings of the nation. It does not understand the state of Europe, with which our own prosperity or the reverse is so intimately connected; and is almost as blind to all the great movements of the outer world as the family council of the Emperor of Japan. It is true that Parliament will not listen to any demand for Parliamentary Reform, that the subject has not yet assumed proportions large enough to frighten it into respect or good behaviour, and that men with crotchets or well-meaning doctrinaires have converted it into a weariness and a bore. But these are no reasons why Parliamentary Reform, the real cure for political evils, should not be sought by earnest and enlightened men who aspire to guide the opinions of their fellow-countrymen. Parliamentary Reform will be the great question of the next few years; even should the complications of foreign wars and convulsions arise to share the inquietude and demand the sacrifices of the public. Why should "Administrative Reformers" give this question the go-by, because they imagine it to be unpopular? If it be a true principle, if it be the thing which is needed to secure the Administrative Reform for which at present they clamour, if it lie at the very root of all other reforms, and if no essential amelioration be practicable without it, why should they care whether it be popular or unpopular? It is not by cowardice and procrastination that great political or any other victories can be won. Lord Palmerston, or the Minister who shall succeed him, could knock down with a breath the whole structure that Mr. Roebuck has undertaken to prop up, by simply giving in his own adhesion to it, and that of his colleagues; and this he could do without the sacrifice of a single principle of his life or of a single interest of his party. When will the Administrative Reformers see that an organisation without a great and living principle to support is good for nothing?

## MAJOR-GENERAL SIR WILLIAM FENWICK WILLIAMS, BART., K.C.B.

THE return of the heroic defender of Kars to England, and the honour and distinction with which he has been received by his grateful country, are among the most interesting incidents of the history of the past fortnight. "After having been honoured," says a contemporary, "by the Sovereigns, the higher circles, and the populations of countries for which he did not fight and in a special manner by those of the country which he fought against, General Williams has at length returned to his own land, in whose cause he displayed his noble qualities, whose commission he bore, and whose name he so brilliantly maintained in the face of a very energetic, capable, and powerful enemy, amidst trials and difficulties unsurpassed."

The gallant General landed at Dover on Monday week. At Dover General Williams was received by the Mayor and Corporation, with Colonel Lake, who served so nobly by the side of the General at Kars. At Birmingham's Royal Ship Hotel he was presented by the Corporation with an address of congratulation, to which General Williams replied in a speech full of manly British feeling.

The presentation of the address took place in one of the hotel apartments, and our Artist has portrayed the very interesting scene, in which Mr. Stilwell, the deputy Town Clerk, is reading the address to the General. The Mayor, J. Worsfield, Esq., is attended by his mace-bearer. Among the authorities present are the Coroner of the borough, Mr. G. F. Thompson, the Chaplain of the Corporation, the Rev. J. Pinkie, Rural Dean; the principal naval officer of the port, Captain M'Lwaine; the Commandant of the Garrison, Colonel Streatfield; the Commandant of the British Swiss Legion, Colonel Raines; besides a large number of the resident and visiting gentry.

General Williams afterwards partook of a *déjeuner* with the Mayor and most influential inhabitants of the town, and then proceeded by railway to London. His reception at Dover was truly enthusiastic; and he was greeted with loud and hearty cheers from hundreds of persons assembled on the quay.

The gallant officer, on arriving in town, had interviews with the military authorities. On entering the United Service Club, of which the gallant officer has been a member for several years, he was received with great cordiality. On Tuesday week the General was present at her Majesty's State Ball at Buckingham Palace, where he was introduced to the Sovereign by the Earl of Clarendon.

The first public duty of General Williams was a melancholy one. On Wednesday week he attended to the grave the remains of his brave companion in arms, Major Thompson.

At the Investiture held on Saturday last, at Buckingham Palace, General Williams received the honour of Knighthood of the Bath; the General having been nominated by her Majesty a Knight Companion of the Order, for his bravery at Kars in September last. The General was introduced between the Genealogist and the Gentleman Usher, and knelt before the Queen who was graciously pleased to confer the honour of Knighthood upon him with the sword of the Field Marshal the Gold Stick in Waiting. Her Majesty, assisted by his Royal Highness Prince Albert, passed round Sir William's neck the Riband, with the Badge suspended, of a Knight Commander (Military Division) of the Bath. The Queen then placed on his breast the star of a Knight Commander. Sir William then kissed the hand of his Sovereign, and withdrew.

On Monday evening, at Gloucester House, the Duchess of Gloucester had a dinner-party in compliment to General Williams. This day the General will dine with the Army and Navy Club, St. James's-square; and on Monday he will receive a similar compliment at the hands of the United Service Club.

A banquet is in course of preparation at Woolwich to be given by the officers of the Royal Artillery to General Sir William Williams, who is appointed to the post of Commandant of Woolwich Garrison, in the room of Major-General Whitwates, who has resigned. The formal installation of General Williams will take place on the 4th of July, the day following his reception at dinner.

On Thursday the General laid the foundation-stone of the memorial slate of the new School Chapel at Harrow, to commemorate the Harrow officers who fell in the Crimea.

A Portrait of General Williams, from a family picture painted a few year since, appeared in the ILLUSTRATED LONDON NEWS for February 2, with an outline of his life and services.

The Portrait of the hero engraved upon our front page is from a photograph taken on Saturday last, by Mr. John Watkins, of Parliament-street; it is a very successful likeness, and is meritorious as a work of art: it represents the hero dressed in the uniform of a General of Artillery, and wearing all his orders

Her Majesty the Queen having been pleased to honour General Williams with a command to sit to Mr. Mayall, the artist, of 224, Regent-street, for a full-length photographic portrait, in the dress worn by the gallant General at Kars, accordingly, on Wednesday Sir William gave his desired sitting, when Mr. Mayall, with his usual skill and certainty, produced a remarkably fine and characteristic likeness.

Sir William Williams is sitting for his bust to Mr. G. G. Adams, of Sloane-street.

THE new ship *Victor Emmanuel*, whose launch we engraved a few weeks back, made her trial trip on Saturday last with the most satisfactory results. She is the first vessel of a new line established by the Messrs Joyce, of Mcorgate-street, to run between England and the Cape, carrying passengers and cargo. She is upwards of a thousand tons burthen, with engines of ninety horses nominal power, is fitted with Cunningham's patent topsails, and with the screw alone averaged a speed of nine knots per hour.

## FOREIGN AND COLONIAL NEWS.

### FRANCE.

*(From our own Correspondent.)*

PARIS, Thursday

PARIS has again subsided into the comparative quiet that habitually reigns in it at this season, although many foreigners, especially English, occupy the hotels and furnished apartments, and help to keep up the extravagant prices so many circumstances have raised. Among the whispers that go round with regard to the minor details and events of the christening, it is said that Lady Cowley, who, in fact, abstained on several occasions from appearing at the fêtes, has been much displeased at the precedence accorded to the Duchess of Hamilton. Further, it is said that the Legate is far from being satisfied at his reception here, having expected to be met with the same homage that is paid in Rome to the Pope and that he was much annoyed at not being able to pronounce a Latin discourse at the christening, which, not being in the programme of the ceremony, was drowned at the commencement by the music. There is, moreover, a whisper that the Emperor and Empress went about in a *fiacre* to see the illuminations. We report the rumour in our position of chronicler of words as well as deeds; but we beg to stand in no wise responsible for the truth of the story. We believe, however, that there is more ground for the statement that certain members of the Imperial family very near the throne are far from satisfied at the arrangements contained in the *Senatus Consultum* relative to the Regency. The absence of one of the parties concerned from the christening ceremony, and the very small part taken by the other in the events attending it, are certainly significant.

The expedition of the Prince Napoleon to the north is conducted on a very complete and extensive scale. M. Chorlaky (whose piece at the Odéon, "La Florentine," was made the occasion of certain strongly-marked Democratic demonstrations in the winter) attends it for the purpose of giving a narrative of its course and events; M. Giraud is to make a series of drawings; MM. Rousseau, Sahl, &c., are employed in other artistic capacities; and, in addition, a considerable suite is attached to the person of the Prince, who travels under the name of the Comte de Me don.

Considerable attention has been excited here by the pretended text of the letter addressed by the Comte de Paris to the Comte de R——, which was said to contain his profession *de foi* relative to the ideas of a fusion. In this letter the young Prince was supposed to state that, seeing the period of his majority approach, he considered it his duty to make known his political sentiments; that these were such as are expressed in the will of his father, and in which his mother has brought him up; that, were his opinions even less fixed on this point than they had previously been, the discussions lately occurring on the occasion of the visit of the Comte de Chambord to Nervi on the subject of the tricoloured flag, the emblem which appeals to all his filial sympathies, would have decided them. It now appears, however, that the whole story resolves itself into a simple paragraph, in which the young Prince says that the Duc de Nemours has informed him of what has recently occurred in his family; that, his age preventing him from entering into these matters, he has kept aloof from all; and that he only has before his eyes the will of his father, the conduct of his grandfather, and a Constitutional Monarchy."

The decree bestowing on each of the Princes of the Orleans line, or on their widowers or descendants, an annual allowance of 200,000 francs, is generally approved.

There is a report that King Otho has some intention of continuing the journey he has undertaken to Carlsbad as far as Paris. Such an idea has been conveyed through the medium of Admiral Bonet.

Hector Berlioz has, as was generally anticipated, succeeded to Adolph Adam in the Institute. He obtained nineteen votes; Panseron, eleven; and Felicien David but five.

It is said that several prelates took advantage of the occasion which the late ceremonies afforded them of holding personal communication with the Emperor to touch on the subject of the non-observance of the Sunday in the prosecution of the public works, and on the obstacles put in the way of the soldier's attendance at mass. The Emperor, our authority informs us, received these "indiscreet interferences" with silent disapproval.

It is said that in October will take place in Paris an exhibition yet more interesting to general spectators than the admirable one which has just terminated—namely, a collection of horses from all parts of the world. It will, no doubt, be difficult of composition, but it cannot fail to be highly attractive.

A report more than once raised and extinguished is again brought forward, relative to the removal of the remains of the Duc de Reichstadt, and the rumour even goes on to state that a battalion of Zouaves will be sent on the expedition, which is to enter Paris on its return on the day of the St. Napoleon. It appears, however, that, whatever may be the result of the negotiations on the subject, as yet Austria has by no means yielded to the propositions of M. de Bourqueney, who has tried in various ways to carry the point.

The health of Mdlle. Rachel continues to be in a most precarious state and necessitates a journey to Ems. The Baux Bonnes were at first recommended, but her sister Rebecca having died there about two years since prevented her adopting the advice.

## THE INUNDATIONS IN FRANCE.

WE are glad to see, from the most recent reports of the damage sustained by the late inundations in France, that the aggregate amount of loss will be much less than was at first estimated. Before the floods had withdrawn, the French papers said it would take at least £16,000,000 to repair the injuries in town and country. It is now calculated that the loss will not be half that sum. Even with this deduction, however, the amount of suffering is large enough to call for the most liberal contributions on the part of the wealthy to relieve the distress. At the late meeting at the Mansion House, the Governor of the Bank of England said he had received a letter from Lyons, which stated that no less than forty thousand human habitations had been either carried away or so damaged that they would have to be rebuilt; and they might, therefore, imagine that at least an equal number of families had been reduced to destitution. In the country the damage which was done by the floods was bad enough, as he remarked; but when the waters reached the towns they could scarcely picture the distress, the utter despair of the inhabitants, and the damage done to the artisans, who found it impossible to resist the ravages of the waters

M. Doré, the eminent French artist, has endeavoured to give a picture of what took place in one of the streets of Lyons, which will give our readers some notion of the frightful ruin caused by the floods in that seat of industry.

We understand that the London Stereoscopic Company have just received at their gallery, 54, Cheapside, a series of transparent stereoscopic proofs of the scenes of the inundations.

## UNION OF THE DANUBIAN PRINCIPALITIES.

The principal inhabitants of Jassy, nobles and others, have agreed on a representation to the Allied Commissioners, demanding—

1. The union of the Principalities under a Prince of one of the reigning families of Europe (not of the neighbouring States), and 2. The establishment of a capital in the centre of the new State.

The Porte is also reported to have addressed a note on the subject to the Powers interested in the matter, stating—that the union of the two provinces under one Sovereign would endanger the suzerainty of the Porte over them; and that, whilst the instructions to the Turkish Commissioners are to assist in everything that can benefit the Principalities and their people, they are equally firm in forbidding them to consent to anything that may weaken the Porte's suzerainty.

The question of the Danubian Principalities still occupies the attention of the Austrian Government. Recent letters from Vienna say that the true reason why Austria is so averse to the union of Moldavia and Wallachia is to be found in the following sentence, which is taken from the last of the series of Governmental articles that have recently been forwarded from Vienna to the *Augsburg Gazette*:—"The world does not need the formation of a second and modern Sardinia between the Danube, the Pruth, and the Carpathians."

## THE CONTEST FOR THE UNITED STATES' PRESIDENCY.

The news by the Royal Mail steam-ship *Africa*, which left New York on the 11th inst., gives little or no information regarding the probable result of the contest for the Presidency. The various sections of the party opposed to Southern domination and the supremacy of brute force overthrew all reason and common sense enough to elect the man of their choice if they can unite upon a candidate. Meantime the Democrats, headed by the Slave power of the South speak confidently of the return of Mr. Buchanan.

There was a very remarkable scene in Washington on the 7th, on the occasion of a ratification meeting in response to the nomination of that gentleman. Speeches were delivered by Senators Cass and Douglas (the rejected candidates) responding to and sustaining the nomination of Mr. Buchanan and Mr Breckinridge for the first and second places in the gift of the American people. At the conclusion of the speaking in the saloon the assembly repaired to the presidential mansion to pay their respects to President Pierce. After a "spirit-stirring salute from the band," the President, from an upper window, addressed the assembly. He said:—

It is never to be forgotten by me that in 1852 older and better soldiers (Cries from the multitude, "Not better!")—than myself, Mr. Buchanan, and Mr. Cass, men who had been faithful and tried leaders through many years of labour and conflict, were passed by to call me from the retirement which I had sought, and to which I shall return without regret. May I not add, gentlemen, if life be spared to me, I shall go back to the state of my birth with the consciousness of having adopted no single measure of public policy during my administration which I did not believe to be demanded by the best interests of my country, nor one which does not to-night command the approbation of my judgment and my conscience? The conduct of those older and better soldiers of whom I have spoken, and of the younger but nevertheless better soldier, Judge Douglas (the author of the Nebraska Bill), who I am glad to see now standing by the great and good man, General Cass (who is anxious for a war with England), who for so many years has had not merely my confidence and respect, but my affection, will never cease to be gratefully remembered by me. They were all in the field, not merely to encourage and direct, but actually to lead the columns. Their energies were not put forth because the standard was in my hands, but because the banner was, in their estimation, for the time being, the impersonation of those sound constitutional principles which they believed could alone give stability and permanence to this glorious fabric of our institutions. It is cheering to know that the action of the late convention places the statesmen and patriots who are to lead us now upon the identical platform which I accepted, with full conviction of my judgment and with every sentiment of my heart, and that they are to occupy it with the standard inscribed over it, as much, so far as the strict construction of the Constitution and the maintenance of the constitutional rights of every portion of the Union are concerned.

## THE CIVIL WAR IN KANSAS.

While President Pierce and the Democratic party are glorifying themselves over the shameful deeds of the present Administration, and straining every nerve to return Mr. Buchanan, who does not promise to be a whit more friendly to Great Britain than Mr. Pierce has been, civil war continues to rage in Kansas. On the 4th inst Governor Shannon issued a proclamation ordering all the unauthorised military companies to disperse, and warning outlaw parties to keep away from the territory, as he had sufficient force to enforce the laws and protect the citizens. What Mr. Governor Shannon means by "protecting the citizens" may be inferred from the following statement in a letter from Kansas:—

A party of pro-slavery men, including a son of Governor Shannon, made a night attack on the house of Captain Walker, five miles from Lecompton, but they were repulsed, and young Shannon taken prisoner. He was released on the following day, after which Shannon took a company of United States' dragoons, and spent two days in searching the homes of the Free-state men, taking possession of all the arms and ammunition which could be found.

Other accounts from Kansas state that the Free state forces had burned the town of Bernad. The town of Franklin was, it is said, captured by the Abolitionists on the morning of the 4th instant, after a desperate fight, in which three Pro-slavery men were killed. Marshal Donaldson and four men were killed at Hickory Point on the 3rd instant.

A general rendezvous of Pro-slavery men was appointed at Ball Creek, preparatory to another attack on Lawrence. General Whitfield was to command. They expected to concentrate 600 men before starting. The men were mostly furnished with United States' muskets. The Free state men were deficient in arms and provisions.

The *Democratic Press* has a letter from Lecompton, June 4, which states, that thirty Southerners, while proceeding from Westport to Hull Creek, under command of Pate, encountered about the same number of Free-state men. They had a number of Free-state prisoners, whom he arranged in front, in a shield. Then his company fell back, under cover of the unarmed prisoners, and had between logs and trees. The Free-State men then dropped down in the grass, and a scattered firing was kept up for two hours, till Pate surrendered unconditionally. Three Missourians of Pate's party escaped, among them Coleman, the murderer of Dow. The Free-state party took thirty horses, a number of rifles and United States' muskets, besides a quantity of goods stolen at Lawrence.

The spirit manifested by the Governor, improvised a demonstration which was surpassed only by the great Summer meeting in the same place. Full 5000 persons were present, and 5000 dollars were collected on the spot in material aid for the struggling people of Kansas. A committee of citizens will be appointed to collect further subscriptions. During the evening addresses were delivered by the Hon. Samuel Galloway, of Ohio; Judge Culver, of Brooklyn, and others, and no little Buffum, who have borne a prominent part in the troubles in Kansas.

At a public meeting in Worcester, Massachusetts, on the 7th inst., 4500 dollars were subscribed to aid the Free-state settlers of Kansas. It is said a large number of men in that city have volunteered to emigrate to Kansas. They are to be well armed, and commanded by persons of experience in military tactics

In the Senate the member for Illinois has introduced a bill for the pacification of Kansas. It simply proposes to abolish the territorial Government of Kansas and the laws passed by its Legislature, and extend over the distracted territory the Government and laws in force in Nebraska. After a sharp discussion the bill was referred to the Committee on Territories Mr. Crittenden had proposed another plan, suggesting that the President send General Scott to take command of the troops.

RUSSIAN PROPERTY IN BALACLAVA.—The quantity of property recovered by the Russians in plate and money from the ruins of Balaclava and its environs is greater than could have been supposed. The Chief Priest of Balaclava has succeeded in finding a quantity of church plate and silver spoons, forks, jewellery, and pearls, which were hidden in a well that was choked up with butcher's offal. The pearls since were discovered. Another Russian waited on Colonel Harding, the Commandant of Balaclava, and requested leave to look, for some things he had lost in his house; and, on receiving it, he entered the half-ruined mansion, and removing the stone wood-work, behold! there was an iron box full of gold and silver, which, he informed the Commandant, was the property of his daughter, who was just about to be married. He said he could not trust a Tartar, and so he had hidden the money, but she should make away with it, and he was delighted beyond measure when he got permission to take away his treasure as soon as he had proved his right to it.—*Letter from the Camp, June 10.*

CRIME IN THE CRIMEA.—As the troops are withdrawn from the Crimea the hosts of scoundrels who have hitherto been kept in awe by force of arms begin to execute their avocation, and thefts, robbery, and violence are on the increase. On the outskirts of the camps As Colonel Walker was quietly sketching the other day near the Fedukhine heights a bullet whistled by him, and on looking up he saw the smoke of the discharge and immediately afterwards observed a Greek running off at a considerable distance over the broken ground, where a horse would have had no chance. Another officer was fired at from one of the deserted French camps in the Kamara, as he was riding homeward after dark. An officer of the 19th was attacked by four men on the high-road from Balaclava to the front, robbed and beaten, but the pistol came up before the ruffians could commit murder, as they then ran off. Horses are stolen wholesale—nine were carried off from the Light Division camp in one night. The French soldiers and camp people at Kamiesch have been informed by the authorities that the execution of the Czar must be accomplished by the 5th of July, and that they can receive no protection for their property or persons if they remain after that date.—*Letter from the Camp, June 10.*

## NOTES OF THE WEEK.

THE American question has not presented any new phase, unless we reckon as such a fresh "complication," arising from an attempt, on the part of an ill-bred American here, to force himself into the Queen's presence, at Wednesday's Levee, in attire in which he would not dare to present himself in a lady's drawing-room in New York. But the domestic relations of the States themselves continually afford fresh and curious matter for study. The Kansas affair appears to be causing the utmost excitement, especially among the Abolitionist population, who see with indignation that an armed mob of ruffians is permitted to enact every kind of outrage upon the inoffensive citizens of the new state, while the Government refuses to interpose and put an end to such doings. We have news of what is called "a sanguinary battle" between the two parties, and it is stated that the Slavery men have conquered, but that some of their adherents have been shot. The Sumner and Brooks affray has also agitated the public mind. This was no mere common brawl, no outbreak of ungoverned temper. In Mr. Sumner was represented the principle of freedom, and he was therefore odious to the South upon broader grounds than the scorching eloquence with which he denounced the slave-owners. This is felt throughout the States, and the swaggering approbation which a few of the worst slave-journalists have given to the brutal assailant of Sumner does not produce any effect beyond an increase of disgust. A bully may beat a man who rebukes him; but it is felt that a political party is extensively damaged when it meets a charge with a bully's arguments. Every honest newspaper in the Union has recorded its loathing of such a course; but the most withering denunciation we have yet read has proceeded from the pen of Mr. Emerson, the celebrated author, who says,—"I do not see how a barbarous community and a civilised community can constitute one State. I think we must get rid of slavery or we must get rid of freedom. Life has no parity of value in the free states and in the slave state. In one it is adorned with education, with skilful labour, with arts, with long prospective interests, with sacred family ties, with honour and justice. In the other life is a fever; man is an animal, given to pleasure, frivolous, irritable, spending his days in hunting and practising with deadly weapons to defend himself against his slaves, and against his companions brought up in the same idle and dangerous way. Such people live for the moment; they have properly no future, and readily risk on every passion a life which is of small value to themselves or to others. Life and life are incommensurate. The whole state of South Carolina does not now offer any one or any number of persons who are to be weighed for a moment in the scale with such a person as the meanest of them all has now struck down."

Mr. Walpole's manifestation against the system of education in Ireland obtained but a shortlived glory. On Monday night a counter-resolution was proposed, which, although it did not go as directly to the point as it might have done, meant, and was explained by Lord Palmerston to mean, a contradiction to the Walpolean proposition. The Conservative leaders showed some tact in avoiding a decisive overthrow—they gave in their adhesion to the new address that was moved, affecting to believe that it was to the same effect as their own, and Mr. Walpole himself actually voted for it. For this "tergiversation" they are soundly rated and declared untrustworthy by the organs of the party. But there were certain honest believers in the expediency of driving the little Papist from school by forcing the Bible upon him, and they would not let the question be dropped so easily, but took a division on their own peculiar demand—namely, that Government aid should not be withheld from schools where the patrons were Protestant enough to carry the rule that the Scripture should be taught. The lists showed that there are ninety-seven men in the House who would rather let a child go uninstructed than taught otherwise than out of the authorised version. *En revanche*, however, Mr. Spooner gained another victory over Maynooth on Wednesday. The Jew Bill has been rejected by the House of Lords; Lord Lyttelton must have spoken eloquently for it; and Lord Derby introduces a bill for removing the "House of Stuart" folly from the Parliamentary oath, without removing the words that exclude the Jew. The House of Lords will possibly pass this bill, and take credit for an enlightened conformity to the dictates of common sense, while in no degree conceding a point really at issue. We are glad to add that the Honourable East India Company, despite a terrible clamour by that very readily-excited orator, Sir James Hogg, has been compelled to do justice to the heirs of the Nawab of Surat, whose property the Company took away, on condition of paying those heirs a pension, which, in default of issue, on condition of paying those heirs a pension, which, in default of issue, endeavours to avoid paying. The marked sense of a body of English gentlemen in regard to the "highly untradesmanlike conduct" of the Company.

Mr. Bowyer, a gentleman who was converted to Rome some time ago, and who, like all converts, is ten times more desperately zealous than old believers, was greatly scandalised at a statement in the *Times*, that at the christening banquet of the Prince Imperial six Cardinals were forgotten, and consequently had to squeeze into such places as they could. Mr. Bowyer argued with his usual "forcible feebleness," that the thing was impossible, for this reason. There are but six Cardinals in France, and for the Emperor to have forgotten the whole lot would have been an insult to religion, of which the eldest son of the Church is incapable. But it turns out that the correspondent of the journal stated a fact; that though the Cardinals were not actually forgotten, the officials had neglected to secure seats for them, and that other people had taken the seats. So that the undignified squeezing was really performed. The same M.P., who appears to hold a brief for King Bomba and the Pope, attacked the Home Office the other day, because the assassin Foschini had not been captured. Mr. Bowyer attempted to connect him with Mazzini. By the way, the recent rebuke of one of the Italian patriots against those who use "the poniard" has not been very graciously received in Italy. The Liberal party deny any "theory of the dagger," but urge that, in their otherwise disarmed condition, and exposed as they are to the brutalities of tyrants, it is not wonderful that steel should sometimes leap out where oppression has become too galling for endurance. Against a Government which slowly tortures innocent persons to death it might drive one to first principles to say what form of resistance or vengeance is unwarrantable.

An interesting sight is in store for London. The Guards, on their way home, will be received at the Waterloo station by the Horse Guards authorities, and will march through the principal streets, and finally be inspected in the Park by her Majesty. Sir Fenwick Williams of Kars has aroused the spleen of the Manchester party by his words, "Woe to the nation that neglects the military art;" but the wholesome truth that in the presence of armed Europe England must be ready and able to use her arms is not likely to be rejected by the people, whose ears are not stuffed with cotton.

It is stated, and not contradicted, that the Bishop of London is about to resign his see, feeling himself inadequate to the discharge of its multifarious duties. Furthermore, it is said that the Bishop of Durham is about to follow the example of Dr Blomfield. Lastly, in connection with Church matters, we may mention that it was announced that the vacant see of Gloucester was to be given to Mr. Chevenix French, the protegé of the Bishop of Oxford, and that the zig zag process which Lord Palmerston calls "keeping peace in the Church" was to be adopted, and the last new Bishop having been a hot Evangelical, this one was to be a distinguished Trostarian. But the allegation seems to be premature.

A "friendly address" from the citizens of Dublin to those of New York is now in course of signature, and has already obtained the names of the Lord Mayor and of several other influential persons.

## COUNTRY NEWS.

METEOROLOGICAL OBSERVATIONS AT THE HIGHFIELD HOUSE OBSERVATORY, NEAR NOTTINGHAM.

FOR THE WEEK ENDING JUNE 21, 1856.

*The range of temperature during the week* was 26°.

*The Weather* was—On 18th fair, from 9h 15m, p.m. rainy, 19th rainy, with thunder at 4½ p.m. 20th from 10 a.m. till 5 p.m. rain, 21st fine, 22nd showers, 23rd and 24th dull, with slight rain.

*The direction of the wind* was—On the 18th N.W., became W.N.W. at 1 p.m., S.W. at 3h a.m., W. at 8½ a.m., S.W. at 10 a.m., W. at 4½ p.m.; S.S.W. at 11h a.m. on 19th, S. at 4h a.m., S.S.E. at 11 p.m., S.E. at 2 p.m., S.S.E. at 4 p.m., S. at 8½ p.m., S.S.W. at 9 p.m., S. at 4 a.m. on 20th, moved through W. to N.W. at 6h a.m., became N.N.W. at 8½ a.m., N. at 10 a.m., N.N.W. at 1½ p.m., N.W. at 7½ p.m., W.N.W. at 9½ p.m., W. at 2 a.m. on 21st, W.S.W. at 7½ p.m., S.W. at 10 a.m., S.S.W. at 4½ p.m., S.W. at 7½ p.m., W.S.W. at 11 p.m.; W. at 1½ a.m. on 22nd, S.W. at 4½ a.m., W. at 8½ a.m.; moving through N. to N.N.E. at 3 a.m. on 23rd, became E. at 3 p.m.; moved through S. to S.W. at 5 a.m. on 24th, became W.S.W. at 8½ a.m., becoming W. at midnight.

E. J. Lowe

MR. BRIGHT'S HEALTH.—We understand that Mr. Bright, M.P., is now residing at the house of Ardachy, near Dunkeld, the property of the Right Hon. Edward Ellice, M.P., who, we believe, has given instructions to the effect that Mr. Bright should lack no convenience or recreation which that wild but interesting mountain region can afford.—*Inverness Courier*.

MR. THACKERAY IN EDINBURGH.—We understand that the Directors of the Philosophical Institution have secured for the public of Edinburgh the privilege of hearing the lectures on the "Four Georges," which Mr. Thackeray has delivered with so much success in America. Mr Thackeray has just returned to Great Britain, and will, for the first time in this country, deliver these lectures here early in November next.—*Scotsman*

EXHIBITION AT MANCHESTER OF ART TREASURES.—At a meeting of the General Council of Subscribers to this undertaking, held in Manchester on Monday, the designs for the building, by Messrs. C. D. Young and Co., were selected, and the contract for the building intrusted to them at their estimated price of £24,500. The building must be delivered to the committee on the 1st of January, 1857. John C. Deane, Esq., who held a similar appointment in the Dublin Exhibition of 1853, is the Commissioner engaged for the collection of the art treasures to be exhibited.

WELCOME TO LIEUT.-COLONEL WOOD.—The picturesque little village of Lyttleton, Middlesex, was on Monday last the scene of an animated reception to one of the Crimean heroes. Lieut.-Colonel David Wood, of the Horse Artillery, had that forenoon arrived in the city of London, having shared in the perils of the recent campaign, and, as it was understood he was to proceed in the afternoon to the family seat (his father's residence in Hiddlesex), the villagers on the road to Lyttleton, as well as many of the neighbours, resolved to give him an enthusiastic welcome. The roads leading from the Ashford station were in several places decora ed with triumphal arches and banners with suitable devices. A large and graceful archway spanned the road within a few hundred yards of the gateway to the mansion of the lord of the manor, with the appropriate inscription, "Welcome Home." About an hour after the dulcet bells the gallant Colonel passed along, heartily cheered by those assembled to welcome him. Colonel David Wood, who looked well, arrived in the Crimea in time to share the glories of Inkerman, where he got a narrow escape. He has two other brothers high in rank in her Majesty's service.

A NATIONAL MONUMENT TO WALLACE.—On Tuesday last a large and influential meeting was held at Stirling, on the site of the Abbey Craig, overlooking the scene of the battle of Stirling, to inaugurate the movement for a monument to the great Scottish hero and patriot, Sir William Wallace. The Earl of Elgin, the Provost of Edinburgh, and several other gentlemen, addressed the meeting, at which it was resolved to appoint a committee, consisting of the Lords Lieutenant and Sheriffs of counties and the chief magistrates of the principal towns in Scotland, to take the requisite steps to obtain subscriptions.

THE RAILWAY STRIKE AT LIVERPOOL.—The vigorous measures adopted by the directors have alarmed the turnouts, who, seeing that their places are being rapidly filled by other men, are crying loudly for arbitration, asserting that their case is misunderstood, and appealing to the shareholders and merchants in the town to help them.

FLIGHT OF A DEFAULTER.—Another Lincolnshire solicitor (says the *Lincolnshire Times*) —a gentleman of considerable practice and influence in Horncastle—has "evaporated." His estimable wife has said to be extensively. These unfortunate events have given a great shock to the confidence felt in the legal profession of this county, several members of it in high positions having recently fled from the country, leaving many of their clients large sufferers.

TRANSFER OF LAND.—It appears by a recent return that during the last three years the gross number of conveyances of land registered in Ireland was 7072; of that number, in 2261 conveyances the consideration was under £500; in 387 the consideration was £500 and under £1000; in 3761 no consideration was mentioned; and in 191 the consideration was 5s., or 10s., or "for love and affection."

THE TIPPERARY BANK.—On Tuesday last a considerable number of persons attended at the late office of the Tipperary Bank, in the town of Tipperary, to receive the dividend of 9s. in the pound, which was paid to them by a person representing the official assignee. Many farmers depositors—who held receipts varying from £10 to £600, seemed quite elated at receiving, as a beginning, one-tenth of what they once imagined was lost to them for ever.

HANDBOOK TO THE INVERNESS AND NAIRN RAILWAY.—The authors (George and Peter Anderson) of the "Guide to the Highlands and Islands of Scotland," one of the most valuable tourists' guides ever written have again come forward with a work on the old subject. Like its celebrated predecessor, the little book before us displays the elegant style and graphic descriptions. All the regulations and advantages of this new company are clearly and concisely stated and every place of historical moment or natural beauty receives artistic treatment. "The snorting of the 'iron horse,'" say the topographers, "is now being heard on our lone moors and pastoral solitudes; and when the commercial intercourse between the kingdom of the North Central Highlands and the south can move rapidly, from days to hours, and when the shackles of things which has hitherto kept the 'North Country' in a state of isolation." At the end is an exceedingly useful appendix containing a list of all the places on the new line, besides a list of fares and particulars respecting omnibuses and hackney vehicles. The little work is altogether interesting and a very instructive one, and combines within the compass of some fifty pages the statistical excellence of a "Bradshaw" with the gossip of a Murray's Handbook.

LOWESTOFT REGATTA.—The annual marine regatta at this beautiful watering-place has, we hear, been appointed to take place on the 22nd of July next: the prizes given will amount in value to nearly £250, including a magnificent piece of plate, valued at 100 guineas, given by Sir Morton Peto, Bart., for a schooner match. The exertions of Captain Andrew Jane Tennant, one of the most important of the coast regattas, and the influx of visitors at this season for the benefit of the sea-bathing is a token of the popular position Lowestoft holds among other places of a similar character. Whilst the facilities afforded by the railway company for visiting it render it economical and easy of access.

THE GOLDEN ROSE.—After the mass celebrated in the chapel of the Palace of St. Cloud by Cardinal Patrizzi, on the 19th inst., the ceremony presenting the Golden Rose took place. During the mass the rose was brought by the Master of the Ceremonies of the Emperor and placed on the altar. At the conclusion of the mass the Cardinal Legate took his place in a fauteuil in front of the altar, opposite their Majesties. Mgr. Monsan Lavalette, one of the prelates in the suite of the Legate, read in a loud voice the pontifical brief, conferring on Cardinal Patrizzi the power to deliver the Golden Rose in place of the Holy Father. After the document had been read, the Empress was requested by the Master of the Ecclesiastical Ceremonies to approach the altar, and the Golden Rose was presented to her Majesty, while the Cardinal pronounced the Latin formula usual on such occasions. The Prince Imperial was present at the ceremony, and after its conclusion, when the Imperial party had withdrawn to the state apartments, the Legate received the pontifical messenger to the Pope to the Emperor, and the Holy Rosary for the Prince Imperial.—*Monitor*

## EPITOME OF NEWS—FOREIGN AND DOMESTIC

Theman-of-war *Cressy*, 90, which is conveying Lord Wodehouse to St Petersburg, arrived off Copenhagen on Monday last. His Lordship will disembark at Cronstadt.

The Prince Regent of the Grand Duchy of Baden arrived on Saturday morning at Calais, and was received on his landing by General de l'Espinasse (Aide-de-Camp of the Emperor), the General commanding the 3rd military division, the Prefect of the Pas-de-Calais, the General commanding the department, and the principal civil and military authorities.

Prince Napoleon and suite, having pa'd Edinburgh a hurried visit, re-embarked on Saturday at Leith, on board the Imperial yacht *Reine Hortense*, and together with her consorts proceeded to the North Seas on a scientific mission.

The Prince Regent of Baden, accompanied by the persons in his suite, went from St. Cloud to Trianon last Sunday morning. About noon the Emperor and Empress, with the Grand Duchess of Baden, also drove over. About two o'clock the Emperor and the Prince Regent, mounted on horseback, and with the Empress and the Grand Duchess in a carriage, proceeded to view the park of Versailles and see the grand waterworks play.

The King of Oude, who has recently been dethroned by the East India Company, is expected to arrive in England by the Alexandria mail-packet *Indus*, due the beginning of July.

The King of Sweden has charged Prince Oscar, his son, to present to the Emperor for the Prince Imperial the insignia of the order of the Seraphim.

Amongst the marriage stipulations of Dona Amalia and Prince Adalbert of Bavaria is one to the effect that the wedding shall take place at Madrid; and another that the Princess shall not be followed into Bavaria by any Spanish lady—all her present attendants being destined to leave her at the frontier.

The Berlin papers say that "the Prince and Princess of Prussia will probably leave Berlin for London at the end of July, and remain there for a week; and it is thought that Queen Victoria will come to Berlin in September."

A bill is now before the French Council of State for making a restitution to the Orleans family in the shape of a settlement of 200,000 francs a year on each of the Princesses, whether daughters or daughters-in-law of the late King.

The Duke of Bedford and the Marquis of Westminster have contributed nearly £10,000 towards the erection of new churches in London.

The Grand Duchess of Parma on attempting to leave the city was taken prisoner by the Austrian military authorities, and obliged to return to her capital. On offering some remonstrance she was told that, as the Government of Parma had called in Austrian troops, it was necessary that the Sovereign should remain to countenance their acts.

The drawing-room of Lord John Russell's residence at Pembroke Lodge, Richmond, has been entered by thieves, who carried away a writing-case, workbox, good seal and key, with some valuable papers.

There is no longer any talk of General La Marmora being sent on a mission to Paris and London. As the story now goes, Garibaldi and Dan rinda with all the prestige he has acquired at St. Peters burg and Berlin, is to be the Sardinian envoy.

The Pope has yielded to the urgent representations of Hanover, and formed the principality of Osnabruck into a separate bishopric. For a long time it has been an appendage of the bishopric of Hildesheim.

On Wednesday, the 9th of July, a grand festival will be held at the Crystal Palace, Mr. Oliveira, M.P., in the chair, in aid of the efforts of the Wine Duties Reduction Committee, of which that gentleman is the chairman.

M. Place, of the Société du Crédit Mobilier, was expected at Constantinople, with a view to the organisation of a bank. Preparations on an extensive scale were making for his reception, and a palace at Boyukdere was on the point of being taken and furnished handsomely.

A despatch from Constantinople, of the 18 h inst., mentions that the concession of the new bank has been awarded to the company of which Mr. Layard is the director.

On Saturday last a floral fête and morning concert took place at Cremorne Gardens in aid of the funds of the Royal St. Anne's Society. The number of children at present in the institution at Bixton-hall is about 240, and there are 60 in the City Institution, making over 300 altogether.

Kissengen is unusually full for the season. Among the recent arrivals are Count Nesselrode and his niece, the Prince and Princess of Lichtenstein, Lady Le Poer Trench and family, and a number of distinguished names of all nationalities.

Cowes Castle, of which the late Marquis of Anglesey was Governor, is to be converted into a clubhouse for the members of the Royal Yacht Squadron.

The wealthy Landgrave of Furstenburg, who possesses vast property in Bohemia, and a spacious mansion at the former place, has opened his library, consisting of 20,000 volumes, for the use of the public.

Fifteen of the principal pictures in the Manfrini Gallery, Venice, have been purchased by Mr. Alexander Barker. According to recent accounts from Venice, Mr. Barker was on treaty for an additional portion of the Manfrini Gallery.

The *Times* states that the announcement of the appointment of the Rev. R. C. Trench to the vacant see of Gloucester and Bristol was premature. The successor has as yet been found for the late Bishop.

In consequence of the breaking off of a marriage by which he expected to come into a very large fortune, Prince Dolgorouki will not visit Paris. General Strogonoff, the Curator of the University of Moscow, is likely to be the new Russian Ambassador.

The death of Mr. Lennard induces Mr. Mechi to again announce to the electors of Maldon his determination to go to the poll at the next election, as a candidate for their suffrages.

Captain Chappell, R.N., has resigned his situation as secretary to the Royal West India Mail Steam-packet Company—a position which he has held from the first formation of the company, upwards of fifteen years.

The Cardinal Legate is occupied in paying his farewell visits, preparatory to his departure from Paris, which will take place in a few days.

Captain Gambier, Governor of the Millbank Prison, has been appointed a director of convict prisons; and Captain Brandley, Deputy Governor of Millbank, has been appointed the Governor of that prison.

The Lords Commissioners of the Admiralty have determined that Dr. James Ree is entitled, on behalf of himself and companions in his expedition, to the reward of £10,000 for ascertaining the fate of the expedition under the command of Sir John Franklin.

Count Orloff, on his return from the south of France, only remained in Paris a single night, and has again taken his departure, this time for Germany, by the Strasbourg Railway.

The Lord Chancellor has appointed Mr. Charles Saunders, the present Recorder of Plymouth and Devonport, to the County Court Judgeship, vacant by the death of Mr. Wilmore.

Count d'Escayrac de Lauture, who is about to head an expedition to discover the sources of the Nile, has left Paris for Berlin, Dresden, Vienna, and Trieste, with the view of forming an international scientific commission to accompany him.

A steamer has been launched at Cowes which is intended to convey passengers to and from Constantinople, and ports in the Black Sea. Other steamers are to be built at the same place for a similar purpose.

The environs of Lugo, Forli, and Bologna are so much infested with robbers that it is dangerous to go a few miles out of the town in these provinces.

The trial of William Dove, for the murder of his wife by strychnine, at Leeds, is appointed to take place on Wednesday, the 16th July.

Twelve boulevards are now in course of construction in Paris—the Boulevard de Sebastopol, the Boulevard from the Fout de l'Alma to Chaillot, the Boulevard du Nord, that parallel to the Seine, on the left bank of the river, and seven boulevards starting from the Triumphal Arch at the top of the Champs Elysees.

Large numbers of labourers are daily arriving in Cork from the western counties, and proceeding to England to the hay harvest.

The Polish Cossacks, hitherto attached to the Anglo-Ottoman Contingent, are to form in future a separate corps, to be recruited from the Sultan's Christian subjects.

Carlisle Cathedral (which the Ecclesiastical Commissioners have during the past three years been endeavouring to restore to its ancient splendour) was reopened for public worship on Sunday.

Snow fell in great abundance in Switzerland in the night of the 6th inst. The Eiswenig, in the mountains of Appenzell, was covered with a coating of considerable depth.

A large ship, called the *Moro Castle*, of Windsor, Nova Scotia, has been found waterlogged and deserted off the Cork coast, and been brought into harbour by the pilots of Crookhaven.

THE ASCENT OF BALLOONS FROM THE ESPLANADE OF THE INVALIDES.

## BAPTISM OF THE PRINCE IMPERIAL.

AMONG the entertainments provided for the working classes at the fête on Sunday, the flight of balloons showering bon-bons afforded most amusement. Three hundred balloons were let off in the Esplanade in the course of the afternoon, and at about five a large balloon was sent up, from which bags of bon bons were thrown down amongst the crowd. Everything passed over with great good humour, and the people seemed delighted with the amusements provided for them, favoured as they were by the fineness of the weather. The proceedings at the Barrière du Trône were somewhat similar, excepting that there was no balloon ascent. At all the theatres gratuitous performances were given, each house performing its best and newest pieces. Immense audiences attended, and, as is usual with the French public when admitted without payment, the greatest order prevailed. The Boulevards and public pro-

FONT OF ST. LOUIS, IN WHICH THE IMPERIAL INFANT WAS CHRISTENED.

she wore at the baptismal ceremony. Next is the Font of St. Louis, a beautiful specimen of niello work. Beneath is the beautifully artistic scene of the Triumphal Arch erected at the opening of the Victoria-avenue upon the Place de l'Hotel de Ville. This was the most striking novelty of the Fête. At the corner of the Victoria-avenue (named in honour of our Sovereign's visit to Paris) were two imitative buildings, in appearance as large as the Hôtel de Ville itself, and to the eye, when viewed from the terrace made on purpose to see them from, they appeared as solid. This terrace, richly carpeted, was visited by almost all the company in the course of the evening. The French people were mightily tickled at this improvised city, representing the Place de l'Hôtel de Ville as it will be when it is finished according to the plan. St. Jacques La Boucherie was illuminated; and beyond the arch which unites the two card-houses a large extempore garden, illuminated, was seen in perspective.

the Municipal Palace and of the simulated erection opposite threw out a light as bright as day, and enabled the spectators to distinguish perfectly the occupants of the several carriages. The Emperor and Empress were received at the bottom of the grand staircase by Baron Haussmann, Prefect of the Seine, and M. Delangle, President of the Municipal Commission, accompanied by the members of that body. The Imperial party then ascended to the Cour Louis XIV., the Emperor giving his arm to the Grand Duchess of Baden, and the Empress leaning on Prince Oscar of Sweden. Their Majesties then proceeded at once to the principal ball-room, the Grand Galerie des Fêtes, and took their places on chairs of state exactly opposite the Salle des Caryatides. The ball then commenced, the Emperor dancing with the Baroness Haussmann and the Empress with the Prefect, in order to mark fully their sense of the splendid entertainments given at the Hôtel de Ville. His Majesty also in the course of the evening waltzed with the Princess Mathilde. It was remarked that, on this occasion, the space in front of the Imperial seats was kept clear to a vast extent, in order to render the heat as little oppressive to the Empress as possible. Their Majesties afterwards went through the rooms, and, on arriving at the Prefect's apartments, partook of refreshments. Both seemed in high spirits, and conversed in an animated manner with a number of the high personages present. There were three ball-rooms opened on this grand occasion—that already mentioned, a second in the Salle du Trône, and a third in the large saloon over the Prefect's apartments. Buffets were disposed in every convenient part of

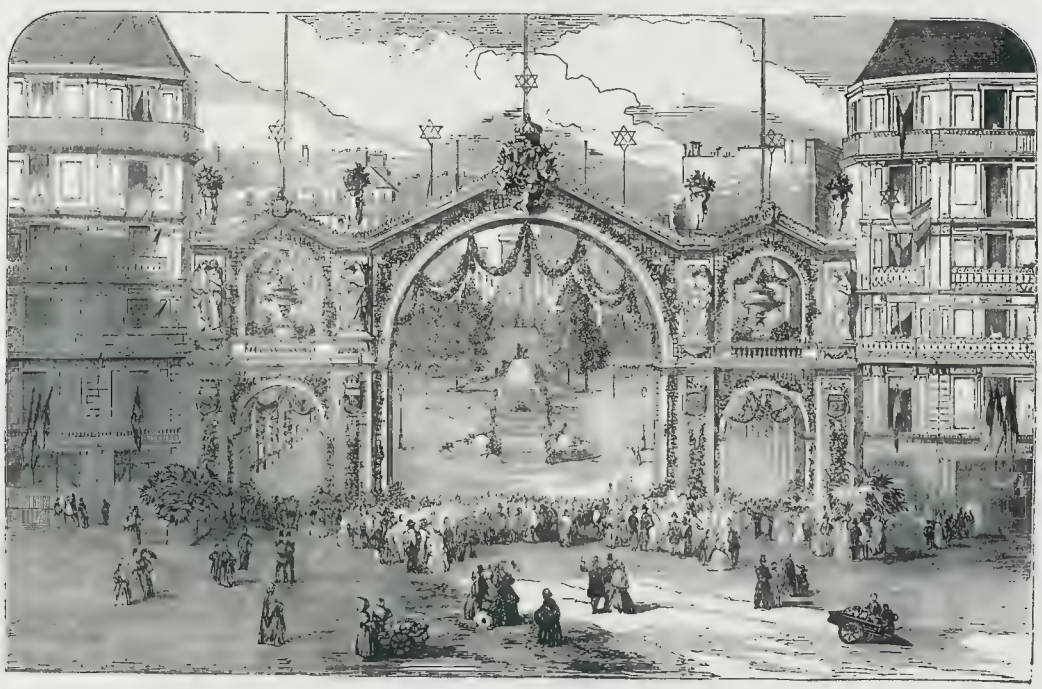
menades were crowded all day. Towards evening the crowd divided into two vast streams—one proceeding to the Place de la Concorde and the other to the Barrière du Trône, where two splendid *feux d'artifice* were to be simultaneously displayed. We may here add that the Prefect of the Seine has presented a bag of bon-bons to each of the 50,000 children attending the primary schools of Paris.

We have engraved the animated scene of the flight of the three hundred balloons and the fall of the shower of bon-bons.

We have engraved a whole length Portrait of the Nurse, "a magnificent looking peasant woman, dressed in the picturesque costume which

The ball given on Monday by the city of Paris to the Emperor and Empress, in honour of the baptism of the Prince Imperial, was of rare magnificence. Their Majesties arrived at about half-past ten from the Tuileries, which they had reached about half an hour before from St. Cloud. The Imperial cortége consisted of eight close carriages, that conveying their Majesties being escorted by a party of the Cent Gardes in full uniform. A vast crowd filled the streets from the Palace to the Hôtel de Ville, and in the vicinity of the latter building the mass of human beings was so dense that movement was nearly impossible. The reason of the afflux towards that spot was, that the splendid illumination of

the building, and on each a profusion of *draperies* were placed to show that the fête was a baptismal one. The masses of natural flowers arranged throughout the building were in such profusion as to excite astonishment; and during the night the beautiful cascades of the Salle St. Jean were as much an object of admiration as the wondrous arrangements of the Cour Louis XIV. One o'clock struck before the Imperial party thought of retiring; and when on their way to the carriage entrance they arrived at the uppermost landing of the staircase, they seemed again so struck with its manifold beauties that the Empress seated herself to enjoy the scene, and the other ladies following the example, an extempore *salon* was thus in a



TRIUMPHAL ARCH AT THE VICTORIA-AVENUE, PLACE DE L'HOTEL DE VILLE.—FROM A PHOTOGRAPH BY RICHEBOURG.

moment organised, the ladies being all seated, but the Emperor, Prince Oscar, and the other gentlemen standing. After about a quarter of an hour's de sy the Empress rose, and the Emperor led t e Grand Duchess down the staircase, the Empress following with Prince Oscar. Before leaving, their Majesties expressed to Baron and Madame Haussmann their admiration of all the arrangements, and their high satisfaction at the splendour of the fête. Loud cheers arose from the guests as their Majesties proceeded to their carriage, and similar acclamations arose as they drove off. The front of the Hôtel de Ville was lit up at the moment of de parture with Bengal lights, and the effect on the illuminated buildings was charming. Meanwhile dancing continued in the three ball-rooms with undiminished spirit, and many of the guests remained until nearly four in the morning.

The fête of St. Louis is named after Louis IX., and is an interesting specimen of Sarcenic art. In it were christened Louis XIII., XIV., XV., and XVI., the King of Rome (Napoleon II.), and the Duke of Bordeaux, now known as the Count of Chambord.

### CALENDAR FOR THE WEEK.

SUNDAY, June 29.—6th Sunday after Trinity.
MONDAY, 30.—Earl of Argyll beheaded, 1685.
TUESDAY, July 1.—Battle of the Boyne, 1690. The Nile, 1798.
WEDNESDAY, 2.—Hungerford Market opened, 1833.
THURSDAY, 3.—Jean Jacques Rousseau died, 1778.
FRIDAY, 4.—Cambridge Term ends.
SATURDAY, 5.—Sovereigns first issued as currency, 1817.

# THE ILLUSTRATED LONDON NEWS.

*LONDON, SATURDAY, JUNE 28, 1856.*

A RIDICULOUS, if not unpleasant, incident occurred at her Majesty's Levee on Wednesday last. Two versions of the story have been given to the public, and both have been generally credited. We cannot undertake to say which of the two is correct; but we trust, for the sake of good manners as well as of good feeling, that that which attributes the circumstance to a simple mistake—no sooner made known than apologised for will prove to be true. The first story alleges that an American of some consideration in his own country, presented himself at the Levee with dirty boots and a black neckie, and made a "scene" when he was refused admission by the Master of the Ceremonies; and that Mr. Dallas, the American Minister, although in proper costume himself, refused to present himself before the Queen unless the personage with the offensive tie were admitted along with him. It was supposed by those who heard this version of the story—which rested upon the authority of two, if not three, of the morning journals—that her Majesty heard nothing of the matter until the Levee was over, or that she might have waived her dignity to gratify her curiosity by the sight of a person of such rough exterior and of such rude manners. The conduct of Mr. Dallas was very generally blamed by all to whom the circumstances were made known, inasmuch as there was no necessity why he should have lent to the unconscious ignorance or to the wilful discourtesy of his countrymen the sanction of his name and functions as Ambassador. The other and we are fain to believe the correct representation of the facts is, that a professor of military science in one of the American Universities, the gentleman who sought the honour of being presented to her Majesty, was fully aware that an official costume of some kind, or, in the case of Americans, the full-dress ordinary costume of a gentleman, was necessary on such occasions, and that he endeavoured to conform to the rule by arraying himself in the costume he was accustomed to wear as professor of his College. Of this costume a black military stock—not a neck-tie—formed part. He was in the most urbane and considerate manner refused admission by the Master of the Ceremonies on account of the black stock; and instead of going quietly to his hotel, or the nearest shop and providing himself with the white tie that etiquette no less than strict rule demanded, he withdrew. If the matter had ended here, no harm would have been done, but unfortunately he was accompanied by his Ambassador in his retreat, and the latter did not think proper to return to the Levee. Her Majesty, it appears, was apprised of the circumstance, and graciously directed that the military gentleman should be admitted in spite of his costume, but before the order could reach the ante-room, the Ambassador and his friend had departed. Whatever blame attaches in this matter falls upon Mr Dallas, who ought to have known better his own dignity and responsibility, more especially at a time when the relations between Great Britain and the United States are so uncordial. We understand that his Excellency has since entered into some explanations, which have been considered satisfactory. We hope, therefore, that the matter will be allowed to drop; and that we shall hear no more accusations against the unlucky, and possibly innocent, man in the black stock of disrespect, which he appears not to have intended, and of ungentlemanliness of which, if this be the true story, he was not guilty.

THE mercantile community has for a long period been promised an improved law of Partnership, to permit the formation of companies on the principle of limited liability, without the necessity of going to Parliament for an act in each case, or asking the Crown, through the Board of Trade, for a charter of incorporation. Great benefits have been expected of such a measure, and great hopes excited that by it enterprise would be extended, and its advantages distributed more equally than now throughout society. The measures to realise these promises and expectations have, after two or three attempts, been carried so far that we can appreciate their probable consequences, and we are afraid that they will add to the disappointments which legislation has in many cases, latterly, except when directed simply to repeal bad laws inflicted on the people.

One of them, called the Joint-Stock Companies Bill, really permits limited liability, and after the debate in Committee on Tuesday, in the Lords, needs little more than the Royal assent to become a law. It consists of 117 clauses, and with its schedules fills no less than 54 pages, the whole being graciously intended to inform men of business how they may and must carry on their own affairs. When the voluminousness and complication of our laws is already universally complained of, and numerous projects have been entertained to condense and to codify them, to increase them by such an enormous statute on such a subject is in itself an offence against common sense. But the bill, when examined, turns out to be little better than a mockery. The public justly demanded, and will continue to demand, such an amendment of the law of partnership as will enable them to unite their means and their strength to carry on conjoint enterprises for their common advantage, while each one shall be enabled, by his own open declarations to his partners and the world, to limit his responsibility to any sum he pleases; whereas he can now, without subterfuge and dishonour, or without a special Act of Parliament, or being responsible to the extent of his whole property, engage in no such enterprise. For our commercial country, the present state of the law has long been considered scandalous, excluding honest and scrupulous men from sharing in the advantages of combined enterprise which the effects of the law limit to bold and unscrupulous adventurers able and permitted to borrow to any extent. The measure which pretends to amend this state of the law begins by excluding from its operations banking and insurance, though these are peculiarly appropriate for companies. They require a considerable capital and a numerous body of shareholders to secure success, but they are left under the operation of the law as it now exists. Another glaring anomaly is thus at once to be added to the statute book. Similar businesses are henceforth to be regulated by different laws. Having cut off banking and assurance from its supposed advantages, the measure permits any number of persons more than seven to form a company, with or without limited liability, by a memorandum of association, and complying with the requisitions of the Act in respect of registration. If they consist of more than twenty persons they cannot form a company unless registered, and unless they comply with all the provisions of this Act. By the mere statement of its extent the reader will at once be satisfied that these provisions must be minute, complicated, and difficult to understand; consequently the measure is more calculated to hinder than facilitate enterprise by the formation of companies with limited liability. As Lord Campbell said, it will not confer on the public the advantages they expect. The measure proceeds on the antiquated and now discredited notion that the Legislature must lay down rules for the business of individuals instead of allowing them to conduct their business in their own way, enforcing amongst them a fulfilment of their contracts, and the doing of justice to one another. Such a complicated law can now effect very little good; and the two old and enriched traders—one in banking and the other in politics, Lord Overstone and Lord Monteagle—who have solemnly, elaborately, and verbosely protested against the measure, have evinced, without necessity, their continued but always disguised animosity to commercial freedom.

The other supplemental measure, called a Bill to Amend the Law of Partnership (No. 2), which was to have been committed in the House of Commons on Tuesday had the House not been counted out, enacts that no person making a loan to traders, and receiving as compensation a portion of their profits, no agent or servant employed by traders and remunerated by a share of the profits, and no annuitant, is to be considered a partner. So far as this bill narrows the comprehensive decisions of the common law, and excludes these cases from its definition of partnership, it is a useful measure, and shows that the law which needs such limitations and corrections must be sweepingly unjust.

THE Belgian Association for Promoting Free-trade have fixed on the 22nd, 23rd, and 24th of next September for the convention of an International Congress at Brussels, the main object of which is to inquire into the economic conditions of labour in various nations. The projectors of this movement are pledged to keep themselves free "from all exterior influences, whether of governments, schools, or parties." Men of all nations are invited to bring with them "documents, such as laws, general regulations, customs, tariffs, tables of taxes, &c., cost of transport, price of raw materials, and of the same when manufactured—in short, every information which can make the inquiries of the Congress complete." The principle of association has become a marked and encouraging characteristic of the age in which we live, and the Exhibition of the works of Industry of All Nations in Hyde-park has been attended with permanent results incalculably beneficial to the progress of civilisation. Three peoples, hitherto estranged by national prejudices, felt the warm and generous impulses of brotherhood; there nations were taught that friendly emulation in art and science offers brighter laurels to an elevated and elevating ambition than those gathered on the blood-stained fields of battle. Warlike France, in which the spirit of ancient chivalry was deeply and strongly implanted, has now fairly entered upon the career of peaceful industry, and the wisdom of her presentrulers has recognised the useful policy of Free-trade. Belgium responds, and, as years roll on and sound knowledge is diffused, exclusiveness will be banished from the marts of commerce. The parties who have convened the Brussels meeting have selected two leading questions which are to form the main subjects of debate. This is a wise resolution, not only because it enables every one to store his mind with facts, illustrations, and arguments, but because, the propositions being specific, the best guarantee is taken that the discussion shall not become vague, discursive, or irrelevant, or merge itself into a mere verbal altercation. The questions to be considered are the following:—

"First, what are the artificial or natural obstacles opposed to the extension of the commercial relations of the country to which you belong?" In answer to this question, each member of the Congress is requested to state the facts which relates to his country at large or to his particular industrial or commercial pursuit; likewise the reasons, if any, why customs or other restrictions should be maintained in countries with which his country has commercial relations.

The second question asks, "What are the practical means proposed, or to be proposed, in each country, to remove or diminish the obstacles which impede the extension of commercial relations with other nations?"

A complete answer to the first of these questions would fill a book if all the ramifications which legitimately grow out of it were investigated. We have not space to touch even on the leading points, but trust that the result of the conferences at Brussels will help Europe into the path of Free-trade.

The custom-houses stand in the way of complete free-trade under our existing system of finance, but they might remain, without detriment to commerce, if the system of finance were changed. This is a matter which the promoters of the Belgian Congress have overlooked, and yet it is fundamental. We would also submit to their serious attention the fact that money constitutes one half of every bargain, which every man knows who enters the market as a purchaser, though the fact is quite ignored in the popularly-accredited schools of political economy.

## *THE COURT.*

Her Majesty held an investiture of the Order of the Bath on Saturday last at Buckingham Palace, when Major-General Sir William Fenwick Williams of Kars, and a great many other officers, received honourable distinctions from the hands of the Sovereign, in acknowledgement of their valuable services during the late war.

On Sunday her Majesty and the Royal Highness the Prince Consort, with the Prince of Wales, the Princess Royal, and the Princess Alice, attended Divine service in the Chapel of Buckingham Palace. The Hon. and Very Rev. the Dean of Windsor officiated. The Duchess of Kent and Prince Frederick William of Prussia also attended the service. His Royal Highness Prince Oscar, second surviving son of his Majesty the King of Sweden and Norway, arrived at the Palace in the afternoon, and had an audience of her Majesty, introduced by the Earl of Clarendon. In the evening the Prince dined with her Majesty.

On Monday the Queen, Prince Albert and the Princess Royal, rode on horseback in the morning accompanied by Prince Frederick William of Prussia. The Hon. Flora Macdonald, Baron Moltke, Lord Charles Fitzroy, and Captain the Hon. De Ros, attended Her Majesty and the Prince Consort honoured the performance of the Philharmonic Concert with their presence in the evening. Her Majesty and his Royal Highness were accompanied by the Prince of Wales, the Princess Royal, the Princess Alice, and Prince Frederick William of Prussia.

On Tuesday the Queen held a Court and Privy Council at Buckingham Palace. Her Majesty having been pleased to appoint the Right Hon. John Viscount Sydney to be Lord Lieutenant of the county of Kent, his Lordship took the customary oaths before the Queen in Council. The Queen has also been pleased to appoint the Right Hon. Anthony Earl of Shaftesbury to be Lord Lieutenant of Dorsetshire, the noble Earl likewise took the usual oaths. At the Court Mr. Crampton, late Envoy Extraordinary and Minister Plenipotentiary to the United States of America, was presented to her Majesty, at an audience, by the Earl of Clarendon.

On Thursday the Queen and the Prince with the Royal Princes at present a visit to this Court, honoured the Marquis and Marchioness of Westminster with their company at a grand ball, given at Grosvenor House.

### THE LEVEE.

The Queen held a Levee on Wednesday afternoon in St. James's Palace. Her Majesty and his Royal Highness the Prince Consort arrived from Buckingham Palace soon after two o'clock, escorted by a party of the Life Guards. Their Royal Highnesses Prince Oscar of Sweden, Prince Frederick William of Prussia, the Duke of Cambridge, and his Serene Highness Prince Edward of Saxe-Weimar, were present, and were conducted to the Queen by the Vice-Chamberlain. The Queen and Prince Albert entered the Throne-room at two o'clock, accompanied by Prince Frederick William, Prince Oscar, and the Duke of Cambridge, and attended by the Lords and Ladies of the Royal household. Her Majesty wore a train of pink satin, covered with English lace, and trimmed with bows of pink and white satin ribbon. The petticoat was white satin, covered with lace, and trimmed with white satin bows. The head-dress was composed of diamonds.

After the diplomatic circle had been introduced, a great variety of addresses of congratulation on the conclusion of a treaty of peace were presented to her Majesty by the Mayors and corporate officers of the principal towns in the kingdom. The general circle was very numerously attended.

## *CHURCH, UNIVERSITIES, &c.*

APPOINTMENTS.—*Rectories*: The Rev. J. Llewellyn Davies, to Christchurch, Marylebone; the Rev. J. E. Bond, to Romansleigh, near Southampton; the Rev. T. King, to Pincumbe, near Bromyard; the Rev J Rumpf, to Pakefield, Suffolk, the Rev. G. D Newbolt, to Knotting, with the Rectory of Souldrop, Bedfordshire, the Rev F. W Murray, to Leigh, Essex; the Rev. T. Prater, to Leighton-under-the-Wrekin, Wellington, Salop; the Rev. F Holo, to Broad Hempston, near Totnes, the Rev. G. F. Whitaker, to Flordon, in Norfolk; the Rev. R. Burnett, to Bonchurch, Isle of Wight; the Rev. M. J. Anderson, M.A., to Hockering, with Mattishall-Bergh, Norfolk. *Vicarages*: The Rev. E. Awdry to Kingston St. Michael, near Chippenham; the Rev. S. F. Cunningham, to Woburn; the Rev. F. N. Pochin, to Sileby, Leicestershire; the Rev. E. Seymour, to Manaccan, Cornwall. *Incumbencies*: The Rev. J. R. Morfitt, to Holy Trinity Church, Southampton; the Rev. J. Stephenson, to St. John's, Weymouth; the Rev R. Fort, to Coopersale, near Epping; the Rev. J. Griffiths, to Llandeilno, Cardiganshire; the Rev. A. B. Hill, to St. Paul's, Tiverton.

CONFIRMATION BY THE BISHOP OF LONDON.—The Bishop of London has appointed a confirmation to be held at the parish church of St. Martin's-in-the-Fields on the afternoon of Sunday, the 13th of July, at three o'clock, for those young persons who have been prevented from availing themselves of the confirmations held in London during the spring.

DINNER TO MR. R. G. HILL.—A number of friends of Mr. R. G. Hill, for many years a medical practitioner in Lincoln, and well known in connection with the introduction of the non-restraint system into the Lincoln Lunatic Asylum, entertained that gentleman at dinner at the Great Northern Hotel on Thursday evening week, as a mark of their esteem and respect on his leaving his native city, having recently relinquished the private establishment which he has conducted for a consideratable time in Lincoln for a more extensive one in the vicinity of London.

The Cathedral of Gran, in Hungary, is to be consecrated on the 31st August, and Liszt, the pianist, who is a Hungarian, has composed a mass for the occasion.

## THE PROPOSED NEW SITE OF THE NATIONAL GALLERY, AND NEW DESTINIES OF TRAFALGAR-SQUARE.

THE question of a new location for the National Gallery, and that of the future disposition of what Sir Robert Peel somewhat hyperbolically called "the finest site in Europe," are intimately connected, and demand the immediate attention of all Londoners who take the slightest degree of pride in their capital, or lay any pretensions to taste. With respect to the contemplated removal of the nation's pictures to some suburban spot in the neighbourhood of Old Brompton and Kensington we object to it, if upon no other, upon this simple and practical ground, that it would, to a considerable extent, deprive the public of the useful enjoyment of the collection itself, which was the purpose with which it was formed. These gems of art are not intended for casual inspection by a few virtuosi, but to gratify the eye, solace the imagination, and educate the taste of the hardworking denizens of a crowded industrial metropolis; to promote amongst them, by force of example, a genius for design, in which confessedly our manufacturers stand so much in need. A central locality is an essential condition to the usefulness of an educational institution of this character, and this the National Gallery now has at Charing-cross—the very point where the extreme bounds of the City and of the West-end meet, and whence diverges the road to the Senate the Law Courts, and the principal offices of Government. As an evidence of its claim to consideration as the centre of our metropolitan system we find that the new radius for cab fares is measured from it; and, upon the whole, we do not think it possible that any other spot could be selected attainable with greater facilities by an equal number of inhabitants of the metropolis and its suburbs than the one in question. But, if we carry the national pictures out of town to Old Brompton, we take them at once to that portion of the suburbs most distant from the great bulk of the industrial classes for whose use and behoof they were especially intended. The Gore House fields are six long miles from the Shoreditch station; a whole day would, therefore, have to be occupied in the journey to and fro, by those who would be adventurous enough to visit the national collection from the eastern districts of the metropolis. The pretence set up against the present site on the score of London smoke is all nonsense, or, if it be of any validity, would apply equally to the Royal, noble, and other private collections in all parts of town. In truth, however, dryness of site is the principal consideration in the selection for a picture-gallery; and in this respect Charing-cross is at least equal to the fields in the neighbourhood of Old Brompton, the atmosphere of which is known to be more moist than that of any other district at the same radius round the metropolis.

What the influences are which have operated upon the Government to induce them to entertain this injudicious and unpopular measure we are not prepared to say. The minute of correspondence between the Treasury and the Royal Commissioners for the Exhibition of 1851, published in the course of the past week, gives very meagre information upon this point, and glosses over a subject which is certainly not unimportant, as to the manner in which the recommendation for it was arrived at by the Committee of the House of Commons to whom the question was referred in 1853, and which has been erroneously stated in the third report of the Royal Commissioners. Two distinct resolutions were discussed in the Commons' Committee—one of which was as to the retention of the National Gallery on its present site, the other as to its removal to this particular locality in Old Brompton, the favourite project of an illustrious member of the Royal Commission. The first proposition was carried in the negative, that is against the present site, by a majority of ten votes to one—the late Mr. Baring Wall being in and constituting the minority; but the second proposition was only carried in the affirmative by six votes against five, that is a bare majority of one. Yet, in the face of these facts, the Report of the Royal Commissioners states that the decision in favour of the proposed site "was arrived at by a majority of ten votes to one, the late Mr. Baring Wall being the only dissentient;" and the advisers of an illustrious personage were so inconsiderate as to allow his Royal Highness to sign this report.

As for the negotiations between the Treasury and the Royal Commissioners, they are a juggle—a specimen of roundabout routine inexplicable to common understandings, though doubtless in strict accordance with the most recondite authorities in red-tapeism. It seems that the Royal Commissioners, having a surplus of public money from the Exhibition of 1851 of some £150,000, induced the Government to contribute £170,000 more, to enable them to purchase the Gore House estate, it being understood that they are to hold it under some conditions—not very clearly defined—subservient to public uses. In due course the Lords of the Treasury, having considered the recommendation of the Royal Commissioners for the removal of the National Gallery to their newly-purchased estate, at once agree to it, and then send a polite letter to the Royal Commissioners, requesting to be informed if they will permit sufficient land out of this Gore House estate for the purpose; to which the Royal Commissioners, through their secretary, Mr. Bowring, graciously reply in the affirmative. The whole thing smacks of that most official but, to John Bull, most unpalatable ingredient, "jobbery," and every one wonders the Government should have lent themselves to it.

As to "the finest site in Europe," as soon as the national pictures are carted away it is to be the field for more jobbery of even a lower order than any that has been announced for fruition on the Gore House estate. A new monster hotel company will in due course take possession of these desirable premises, on a long building lease; and Trafalgar-square will henceforth be infested with ticket-porters and touts, like a very Folkestone landing-place. It is yet time to avert these abominations; but to this end the public voice must pronounce itself firmly, unmistakably, and promptly.

---

LIFE-BOATS FOR THE PORT OF LONDON.—The Committee of the Royal National Life-boat Institution are appealing to the inhabitants of the metropolis in furtherance of an object which we believe has strong and peculiar claims on their sympathy and support. That object is, the providing their own port, the great centre of the world's commerce, with means for rescuing from death those who may be shipwrecked on their approach to it. The chief of the dangers to which our vast foreign trade is exposed in making the port of London are the Goodwin Sands, those fatal shoals which, lying in the great highway of trade, near the entrance of the Thames, have for ages been the dread of the mariner, and which have swallowed up more of the nation's wealth, and destroyed more human lives, than any other of the many dangerous reefs and shoals of our coasts. The Life-boats of the Institution being now brought to a state of great perfection, and an efficient system being established for their management, the Committee believe that, with the generous pecuniary aid of the inhabitants of London, and the co-operation of the skilful and hardy boatmen of Deal, they may be enabled to found an establishment for rescuing lives from shipwreck on

## IMPERIAL PARLIAMENT.

### HOUSE OF LORDS.—FRIDAY, JUNE 20.

This being the anniversary of her Majesty's accession to the Crown, the House of Lords did not sit.

### HOUSE OF COMMONS.—FRIDAY, JUNE 20.

FOSCHINI, THE ASSASSIN.—Mr BOWYER remarked that the Italian Foschini, who had lately stabbed a compatriot in London, had hitherto evaded research. He inquired whether any means had been taken to secure his apprehension?—Sir G. GREY decided the efforts that were making to capture the criminal, of whom a description had been forwarded to all the outports, and to every country where by the existing treaties offenders against the English criminal law would be arrested and given up. There were, he said, good grounds to believe that the culprit in question, whom his fellow-refugees were supposed to have kept concealed in this country, would even yet be brought to trial for his offence.

THE RETURN OF THE GUARDS.—In reply to Mr. Baring, Lord PALMERSTON stated that the march of the Guards regiments through London on their return from the Crimea, would be so timed and arranged as to afford all the inhabitants of the metropolis an opportunity of witnessing the triumph. After traversing London, the Guards would muster for inspection in Hyde-park.

OUR RELATIONS WITH THE UNITED STATES.—On the motion that the House do now adjourn, Mr. GLADSTONE inquired when the answer of the British Government to the recent despatch of Mr. MARCY, with reference to the dismissal of Mr. Crampton from Washington, would be laid before the House.—Lord PALMERSTON explained the reasons which rendered it, in his opinion, still inexpedient to enter upon any formal discussion of the question, but promised to lay the papers before the House at some early day in the ensuing week. Sir J. PAKINGTON confessed to feelings of deep shame and anxiety at the present state of our relations with the United States. Judging from the papers already in the possession of the House he had arrived at the conclusion that the discreditable result had chiefly arisen from the mistaken policy pursued by her Majesty's Ministers, who had both irritated and deceived the United States' Government. He hoped that the discussion would not be long postponed.—Sir G. GREY remonstrated against any attempt to prejudge the question.—Mr. MOORE intimated his readiness to proceed with his motion on the subject of the dismissal of Mr. Crampton at the earliest opportunity.—The subject then dropped, and the motion for adjournment was agreed to.

UNIVERSITY REFORM.—The Cambridge University Bill was considered as amended in the Committee. Some additional and further amendments were proposed, and led to considerable discussion. Among others, Mr HEYWOOD moved the addition of a clause providing that "it shall not be lawful either for the University or any of the colleges, or for the examiners, to introduce any new religious test or qualification relating to any university or college office or emolument into any statute of such university or of any such colleges." This motion was carried on a division, and adopted by a majority of 151 to 109—42 Ministerial supporters, likewise moved by Mr. HEYWOOD, removed the restriction which now prevented a Dissenter from taking the degree of M.A., and thus sustaining a vote among the governing body of the University, was also carried, after discussion, by a majority of 84 to 60—24. The Bill was ultimately reported with its amendments, and ordered to be read a third time on Monday next.—After some discussion the Joint-Stock Companies Winding-up Act Amendment Bill was read a second time

### HOUSE OF LORDS.—MONDAY.

#### OATH OF ABJURATION BILL.

The second reading of the Oath of Abjuration Bill was moved by Lord LYNDHURST, who briefly adverted to the historical events which had rendered the oath unmeaning, obsolete, and even absurd. He valued the present measure, however, chiefly as a medium for removing the legislative obstacles which now prevented a Jew, if elected, from taking his seat in Parliament. After describing the nature and the result of former attempts in the same direction, Lord Lyndhurst defended the principles on which the bill was founded, and justified the object it was calculated to secure

Lord STANHOPE moved as an amendment that the bill should be read a second time that day six months. Among all divisions of the Christian community there was a bond of union whose presence and strength should on all occasions be recognised. With the Jew there was no such connexion, and it would be impossible to admit a member of that persuasion without throwing open the door of Parliament to Mahometans and Pagans indiscriminately.

The Marquis of CLANRICARDE supported the bill, maintaining that religious distinctions formed no reasonable cause for the denial of political rights.

Lord LANSDOWNE entreated their Lordships, by accepting the bill, to close the long-lasting conflict which had existed between the constituencies and the House of Commons, or between one House and the other

Lord BROUGHAM feared that the nation would forfeit the favour of Providence if by a national act it subjected its Christian character

The Bill of Sir GERRARD was then read a second time.

The Marquis of LANSDOWNE insisted upon the right of the Jews, who contributed to the burdens and performed all required functions of the State, to enjoy also every political privilege. He apprehended danger or disparagement to the national Christianity be regarded as merely abstract.

The House divided on the motion for the second reading—

### HOUSE OF COMMONS.—MONDAY.

#### NATIONAL EDUCATION (IRELAND).

Mr C. FORTESCUE brought forward the motion of which he had given notice, and which was so framed as to reverse the resolution adopted on the previous Tuesday on the motion of Mr Walpole, with respect to the system of national education in Ireland. The resolution affirmed by the late vote would, he argued, vitiate its principle, linking with the national system a series of schools in which denominational teaching was made compulsory, and he called upon the House to remove this source of doubt and peril in the progress of an institution which had hitherto worked so beneficially to the Irish community.

Mr. KIRK, in seconding the motion, offered many arguments and authorities to prove the danger attending any attempt at inculcating religious knowledge by compulsory methods.

Mr. WALPOLE saw nothing in his own proposition inconsistent with the tenour of the resolution now before the House; and, after a minute discussion of the terms and effect both of the address voted in the previous debate and the present motion, arrived at the conclusion that the two were perfectly reconcilable, and might stand together. He consented, therefore, to accept the resolution, leaving to the National Board the duty of framing regulations to adapt the principles it enunciated with the changes prescribed in the address already adopted.

Mr. LABOUCHERE accepted Mr Walpole's assurance that he had no intention to oversee the system of national education in Ireland, but contended that his motion would practically have that effect.

Mr. DENIS accused the Ministry of a want of candour and courage in proposing an indirect resolution instead of challenging from the House a simple vote of confidence. He proceeded to describe and analyse, in some detail, the mode in which the national system of education was now worked in Ireland.

Lord J. RUSSELL consented to adopt the resolution now presented, though nothing that it had offered a more direct negative to the previous address.

Mr. NAPIER defended the Church schools, denying that the instruction imparted in them partook of a sectarian character, and asserting their importance to the maintenance of religious principle for educational purposes. To confine this right could not, he argued, disturb the operation of the existing system.

Mr. HORSMAN maintained that the principles embodied in the former address were directly antagonistic to those on which the national system of education was founded, and emanated from a party who had always evinced a fierce hostility against that system.

Mr. F. O'BRIEN supported the resolution, considering it direct by antagonistic to the address adopted a few days before by a chance majority.

Mr GROGAN regretted that the resolution had not been met by a direct negative or of a questionable acceptance, from the supporters of the former address.

Mr HAMILTON defended the Irish Church Education Society.

Lord BERNARD moved the adjournment of the debate.

Lord PALMERSTON remonstrated against the postponement of a decision on a question which had, he thought, been sufficiently discussed.

Mr. I. BUTT believed that the new resolution was to be by intention and tendency a direct reversal of the address. He could not reconcile the conduct of Mr Walpole, required that their meaning should be interpreted in a non-natural sense.

On a division the motion for adjournment was negatived by a majority of 231 to 200—31.

Another motion for adjourning the House was made by Mr. VANCE.

After a brief conversation relative to the propriety of proceeding the debate, Lord PALMERSTON again remonstrated against delay in arriving at a determination on the question. The sense in which the Government accepted the resolution was, he said, as conveying a pledge that no change should be admitted in the present system of national education in Ireland.

After a short discussion the resolution was put and carried without opposition.

### HOUSE OF LORDS.—TUESDAY.

Lord LYNDHURST laid on the table the report of the Select Committee on the Divorce and Matrimonial Bill, and gave notice that on Thursday next he should move that the report be referred to a Committee of the whole House.

The Joint-Stock Companies Bill passed through Committee, after some opposition from Lords Overstone and Monteagle.

The Earl of DERBY moved the second reading of his Oath of Abjuration Bill, which is limited to the settlement of the existing statute so far as regards the abjuration of the descendants of the Pretender.

Lord CAMPBELL regretted that the bill, instead of amending the existing law, did not repeal it altogether, as it was a disgrace to the statute-book.

After some further discussion, the bill was read a second time.

### HOUSE OF COMMONS.—TUESDAY.

The morning sitting was occupied entirely by private business—viz., the third reading of the Nawab of Surat Treaty Bill, which, in spite of the warm and strenuous opposition of Sir J. Hogg, who moved the rejection of the bill, was carried by a large majority, and the bill passed. When the House assembled for the evening sitting it was counted out.

### HOUSE OF COMMONS.—WEDNESDAY.

#### MAYNOOTH GRANT BILL.

The second reading of the Maynooth Grant Bill was moved by Mr. SPOONER, who described the principle and object of the measure. The principle it was designed to carry out was, he said, that of severing the connexion between the State and the Roman Catholic College, and to put an end to what he regarded as the commission of a sinful sin.

The motion was supported by Sir H VERNER and Mr. J. M'GREGOR.

Mr H. HERBERT moved, as an amendment, that the second reading of the bill should be deferred for six months.

Mr. NAPIER, in defence of the bill, argued at much length that the grant to Maynooth had proved a blunder as a provision for educational purposes, and was a crime when viewed as a religious endowment.

Mr MAGUIRE vindicated the rights and asserted the moral and social equality of the Roman Catholic as compared with the Protestant members of the community.

Mr. DRUMMOND approved of the motion upon abstract grounds, partly because it tended to sever the union between Church and State, from which, as he believed, the Church has always had more loss, and partly as conveying a protest against the domination of the priesthood in its intellectual bearings, as directed against Maynooth College, he opposed the bill, which he considered to be founded upon a mistaken view, and to involve, moreover, a clear breach of the national faith.

Mr. NEWDEGATE observed that the House had recently passed a resolution against religious perseverance in educational establishments, and was, therefore, bound in consistency to withdraw the grant to Maynooth.

Mr. BLAND and Sir J. PAKINGTON opposed the bill, from the apprehension that its consequences would prove injurious to the Protestant Establishment in Ireland

Mr. BOWYER defended the system of instruction practised at Maynooth

Mr. HORSMAN, speaking for the Government, declared that they still held themselves bound, as heretofore, to maintain the grant to Maynooth as a matter of policy, good faith, and justice.

After a few words from Captain BELLEW and Colonel VERNER,

Sir STEWART RENDLE, and the House divided For the amendment, [illegible]—6.

The following question, "that the bill be read a second time," was then put from the chair, but opposed by Mr. BOWYER, who moved the adjournment of the debate.

Mr. SPOONER remonstrated against the procrastination

Mr. H. HERBERT, however, insisted upon the propriety of further discussion, contending that a full [illegible] of the House, protracted by [illegible] quarter to six o'clock, when the SPEAKER ordered the [illegible]

### HOUSE OF LORDS.—THURSDAY.

The Grand Juries Bill, the object of which was to alter the law in respect to the swearing of witnesses in criminal cases, by empowering the foreman of the Grand Jury to administer the oath to the witnesses in the Grand Jury room was, on the motion of Lord CAMPBELL, read a second time

The Annuities Redemption Bill and the Transfer of Works (Ireland) Bill were respectively read a third time and passed.

Several other bills upon the paper were advanced a stage.

### HOUSE OF COMMONS.—THURSDAY.

The House met at twelve o'clock.

[illegible] COMMUNICATION WITH AUSTRALIA.—Mr. WILSON, in reply to Sir J. Pakington, said that the Government, with the concurrence of the Colonial representatives, had accepted an offer for the postal service between this country and Australia, from Southampton, via Suez, the Red Sea, Point de Galle, and Cape Leeuwin, to Melbourne. The vessels to be employed, which had been recently built, were of not less than 2,000 tons burden and 400 horse power, and the contract in question was to be effected in fifty days, with a penalty of £50 per day, if that period were exceeded. The first vessel would start from Southampton for Melbourne on the 24th inst., and be ready to [illegible] Southampton on the 1st of October following. The contract was for five years, and the annual [illegible] the Colonies.

The [illegible] (Scotland) Bill passed through Committee up to [illegible] House then adjourned until six o'clock.

[illegible] Committee.

Sir C. [illegible] to Mr. J. Blanke[illegible] stated that he saw no chance of passing the Irish Corporation Bill this session, and that he should, therefore, not [illegible] it further, which he trusted it would be passed. The Bill was accordingly withdrawn.

NATIONAL EDUCATION (IRELAND) BILL.—Lord PALMERSTON appeared at the bar of the House and presented the Address agreed on by the House on Tuesday last, praying for the Royal Assent to the Bill for promoting National Education in Ireland, and it was the ordinary form of her Majesty to see that system upheld and strengthened by a strict adherence to those regulations which had hitherto secured to it the due and proper exercise of parental authority, of the rights of conscience, and the religious liberty of all denominations of Christians.

WILLS AND [illegible] BILL.—The SOLICITOR GENERAL moved the second reading of this bill, the object of which was to abolish the jurisdiction of the Ecclesiastical Courts in connection with wills and administrations, and to vest it in a general court of equity, governed by the rules of common law in matters of testacy, whose decision should in all cases be final. It was further proposed to have an office in every county court district, to receive all papers connected with matters of administration, and to give to the registrars of such offices power to prove estates up to the amount of £1000, and to administer up to £300. The bill would also provide for the payment of salaries for the new offices, and of compensation for those who were deprived of their offices by the new arrangements.—Sir J. KELLY supported the second reading of the bill, which he hoped would shortly become law.

Sir J. GRAHAM was not disposed to resist the second reading of the bill, but thought it would be difficult to speak decisively as to its merits until it should be printed with all its provisions.—Mr. COLLIER was in favour of the principle of the bill; but thought there was room for great improvements in it in Committee.—Mr. MALINS thought it impossible they could pass a satisfactory bill with such

## MUSIC.

THE PHILHARMONIC SOCIETY'S sixth and last concert of the season took place on Monday evening. It was wholly composed of a single piece—Robert Schumann's Cantata, "Das Paradies und die Peri" ("Paradise and the Peri")—a work of great celebrity in Germany, but hitherto unknown in this country. Madame Goldschmidt-Lind having kindly consented to sing at one of the Philharmonic Concerts this season, the directors resolved to avail themselves of this opportunity of bringing forward a novelty of such importance; Madame Lind being a great admirer of the work, and having sung in it in Germany. It was to have been produced at the previous concert (to be postponed to the last, by command, in order that the Queen and prince Albert, with their Royal visitors, might be able to be present at the performance.

The utmost pains were taken in its production. M. Bartholomew was engaged to make an English version of the original German poem, which is a more translation of Moore's poem; and no skilfully has he executed this task that he has adapted to the music, with very few alterations, Moore's own words. To make use of the poem, in this form, it was necessary to obtain the permission of Messrs. Longman and Co., which they kindly and readily gave. Madame Goldschmidt-Lind undertook to sing the principal soprano part; and, for the other solo parts Mrs. Lockey (Miss Dolby), Mr. Benson, Mr. Montem Smith, and Mr. Lawler were engaged. The chorus—eighty strong—consisted of the best singers that could be obtained from Exeter-hall, the Opera houses, and the Royal Academy of Music, and the work was careful y studied and rehearsed under the able direction of Professor Sternlale Bennett.

The performance took place before one of the greatest and most brilliant assemblages we have ever seen in the Hanover-square Rooms. The Queen and Prince Albert, with the Prince of Wales, the Princess Royal, and the Princess Alice, were present; together with the Prince of Prussia and the Crown Prince of Sweden, and a numerous and splendid cortége of English and foreign nobility and gentry. Most of the distinguished musical celebrities now in London were among the audience.

Of the excellence of the performance there has been but one opinion, though there has been much diversity of judgment as to the quality of the work itself. Jenny Lind, with her characteristic enthusiasm, threw her whole heart and soul into her part;—not only putting forth all her unparalleled vocal power, but singing with that intense earnestness and passion for which she is pre-eminent. Nor was there any difference of opinion as to the merits of the other solo singers, the orchestra, and the chorus. All agree that the execution of the music was admirable in every respect. The audience was exceedingly attentive; and the most remarkable passages (especially Madame Lind's marvellous vocal efforts) were applauded. But there was no excitement, no enthusiasm; and the reception of the work was a success d'estime rather than a triumph. Some of our diurnal critics have pronounced sentence of unmitigated condemnation on the work, declaring it to be worthless, rubbish, and so forth, while others have given their judgments with more reserve. We shall not take a part in the controversy, only we may observe that, considering Robert Schumann's reputation in Germany, a country at least as musical as ours and the admiration amounting to enthusiasm which many persons of unimpeachable taste and judgment feel for his music, it can scarcely be such mere trash as some critics hold it to be. Our own judgment, we are not ashamed to confess, is not yet formed. We listened to many things with great pleasure. We found graceful melodies, traits of feeling, grand harmonic combinations, and, above all, rich and plentiful instrumentation; while, on the other hand, we met with much that seemed dry, crude, harsh, and obscure. The music, in short, is of a new school with which we do not pretend to be familiar; and what may be the effect of increased familiarity we may never have the means of ascertaining. At all events, it will be admitted that the Philharmonic Society have done well in giving the English public the opportunity of forming some opinion of the music of a man who, deservedly or not, is one of the chief musicians of the day.

The Philharmonic season just terminated has been a most successful one. The Society have regained the "golden opinions" which, it seemed at one time, they were losing, and which, we trust, they will not run the risk of losing again.

The concert of the MUSICAL UNION on Tuesday morning was "the Director's Matinée," a performance annually given in consideration of Mr. El a's great and successful exertions, in his capacity of director —exertions which have raised the society to its present height of great and still increasing prosperity. The music of Mr. Balfe is popular with the members of the Union is shown by the crowded assemblage of rank and fashion who always honour the Director's Matinée with their presence; and on Tuesday it was, if possible, more crowded than ever. The programme on these occasions is always of a most attractive character, and on Tuesday it was no exception to the rule, by command, in order that the Queen and prince Albert, with their Royal visitors, might be able to be present at the performance.

The utmost pains were taken in its production. M. Bartholomew was engaged to make an English version of the original German poem, which is a more translation of Moore's poem; and so skilfully has he executed this task that he has adapted to the music, with very few alterations, Moore's own words. To make use of the poem, in this form, it was necessary to obtain the permission of Messrs. Longman and Co., which they kindly and readily gave. Madame Goldschmidt-Lind undertook to sing the principal soprano part; and, for the other solo parts Mrs. Lockey (Miss Dolby), Mr. Benson, Mr. Montem Smith, and Mr. Lawler were engaged. The chorus—eighty strong—consisted of the best singers that could be obtained from Exeter-hall, the Opera houses, and the Royal Academy of Music, and the work was careful y studied and rehearsed under the able direction of Professor Sternlale Bennett.

The performance took place before one of the greatest and most brilliant assemblages we have ever seen in the Hanover-square Rooms. The Queen and Prince Albert, with the Prince of Wales, the Princess Royal, and the Princess Alice, were present; together with the Prince of Prussia and the Crown Prince of Sweden, and a numerous and splendid cortége of English and foreign nobility and gentry. The Philharmonic season just terminated has been a most successful one. The Society have regained the "golden opinions" which, it seemed at one time, they were losing, and which, we trust, they will not run the risk of losing again.

The concert of the MUSICAL UNION on Tuesday morning was "the Director's Matinée," a performance annually given in consideration of Mr. El a's great and successful exertions, in his capacity of director —exertions which have raised the society to its present height of great and still increasing prosperity. The music of Mr. Balfe is popular with the members of the Union is shown by the crowded assemblage of rank and fashion who always honour the Director's Matinée with their presence; and on Tuesday it was, if possible, more crowded than ever. The programme on these occasions is always of a most attractive character, and on Tuesday it was no exception to the rule, by command, in order that the Queen and prince Albert, with their Royal visitors, might be able to be present at the performance.

The first part consisted of Haydn's Quartet in G, No. 81; Beethoven's grand sep-et in E flat, op. 20; and Mendelssohn's duet in D, for piano and violoncello. The performers were—violins, Sivori and Vieuxtemps; violoncello, Piatti; double bass, Howell; and wind instruments, Lazarus, Baumann, and Harper. In addition to these concerted pieces, Signor Andreoli (a distinguished pianist newly arrived in England) played a solo of Chopin, and Madame Schumann played a selection of her husband's fantasias. And lastly, Madame Viardot contributed some interesting vocal music; singing Schubert's ballad, "The Erl King;" a French ballad of the sixteenth century; and the invitation of Jenny Lind) some of Chopin's melodies, and the barcarole of Signor Randegger, all thereby spoiled in our humble opinion. Schubert's ballad, we must add, was beautifully accompanied by Madame Schumann.

MADAME GOLDSCHMIDT-LIND's sojourn in England is drawing to a close. Her "farewell concert" (the last but one) at Exeter-hall, on Wednesday evening, consisted of "The Creation," performed in the same manner as in the early part of the season. It does not, therefore, call for any special remark; it being only necessary to say that the hall was crowded in every part by an immense assemblage, and that "the Nightingales" incomparable singing created, if possible, greater enthusiasm than ever. It is understood that she does not mean to return to this country; her intention being to retire into private life, settl-d with her well earned laurels, and the more solid results of her brilliant career. In England she will leave nothing but regret behind her; and no foreign artist has ever been so successful in gaining "golden opinions from all sorts of people."

MR. BOLEYNE REEVES'S CONCERT.—This accomplished harpist gave a very charming concert, by permission of Mr. and Mrs. Warner, at their mansion in Grosvenor place, on Tuesday evening, which was numerously and fashionably attended. The music was well selected, and the artistes were all eminent in their several degrees. Herr Tedesco and Mdlle. Gilchi performed on the pianoforte, and Signor Giulio Regondi and Mr. Reeves excelled themselves on the instruments they have made their own. Mdlle. Emilie Krall gave a cavatina from the "Freischutz" with great effect, and Miss Lascelles sang a song by Mr. Reeves with much grace and sweetness. But we were more than usually charmed by the manner in which the young contralto, Mdlle. Correlli, sang the "Se m'abandoni" of Mercadante. This young lady possesses a contralto voice of unusual depth and extent, which has been cultivated in Italy; so that she comes to us with all the advantages which art as well as nature can bestow. When we had reason to complain that her style wanted warmth, but on Tuesday she sang like one inspired, and she is a most valuable addition to a very limited class of vocalists. We congratulate Mr. Reeves on having placed Mdlle. Correlli so advantageously in his concert; he is too good a musician not to appreciate the power and influence of such a voice. Signor Marras and Signor Vario added much to the interest and variety of this musical treat. These drawing-room concerts are delicious at this season of the year, and in this instance the draperies and furniture were so disposed that they did not take from the effect of the music, and the superb suite was admirably ventilated.

THE CRYSTAL PALACE CONCERTS go on successfully, drawing, every Friday, vast multitudes to Sydenham. The sixth, on Friday (last week), was the best of the series, being more varied and less exclusively confined than the others had been to the *repertoire* of the Royal Italian Opera. Its chief feature was the celebrated fragment of Mendelssohn's unfinished opera, "Loreley," sung with immense power by Madame Jenny Ney, and enthusiastically applauded. That great tragedian and singer has left London, on her return to Dresden.

IT is now positively affirmed that Covent-garden Theatre is to be rebuilt; Sir Charles Fox and Mr. Henderson having entered into a contract, and pledged themselves that the building shall be ready for operatic performances within six months from the date of commencing operations. What that date is, however, has not yet been stated.

MR. HENRY HILL, long regarded as one of the finest tenor-players in Europe, died on the 11th of this month. He had for some time la bouyed under a pulmonary complaint, but did not appear to be in immediate danger, and performed his professional duties till within a few days of his death. He was a worthy man as well as an excellent artist, and his loss will be long and deeply regretted.

LYCEUM THEATRE.—On Friday (last week) Madame Ristori appeared in Signor Marenco's drama of "Pia di Tolomei," and achieved another triumph by the powerful impression of the heroine.

HAYMARKET THEATRE.—Mr. Buckstone, who enjoys the threefold reputation of being a popular actor in comedy and farce; a meritorious dramatic au hor; and a manager of great tact and ability; announces in an usual benefit for Wednesday next, July 2. The performances will be Shakspeare's comedy of "Twelfth Night," which has not been acted at the Hay market for eight years; to be followed by a new Spanish ballet, for the first time with the renowned Spanish dancer, Pepita Nena; and the entertainments of the evening will conclude with the farce, in which Mr Buckstone and Miss Blanche Fane will sustain the characters. There will be other entertainments, and Mr. Buckstone will address the audience on this the last night of being a popular actor in comedy and farce; a meritorious dramatic au hor; and a manager of great tact and ability; announces an usual benefit for Wednesday next, July 2. The performances will be Shakspeare's comedy of "Twelfth Night," which has not been acted at the Hay market for eight years; to be followed by a new Spanish ballet, for the first time with the renowned Spanish dancer, Pepita Nena; and the entertainments of the evening will conclude with the farce, in which Mr Buckstone and Miss Blanche Fane will sustain the characters. There will be other entertainments, and Mr. Buckstone will address the audience on this the last night of the season. With such attractions and claims the fullest measure of success may be anticipated.

THEATRE ROYAL, COVENT GARDEN.—The whole of the valuable English music in store, which cost the proprietors many thousand pounds, saved from the late fire from having been unwisely left in packing-offices when the Italian Company took possession of the theatre, is, we perceive, to be submitted to the hammer by Messrs Robins, at their auction-room, on Thursday next, together with the prompt-books, play-bills, and, not the least curious, the auction-bills of pay ledgers from 1776 to 1826, with the autograph receipts of the most eminent actors and actresses during those periods, with their respective salaries; the journals with the nightly performances, and two playbooks, all the papers connected with the long-litigated Chaucery proceedings.

A HINT TO PIO NONO.—A thoroughly orthodox Catholic priest, the Abbé Michon, in a pamphlet, just published, in Paris, which will probably make a great sensation, seriously advocs es the expediency of the Pope renouncing all dominion at Rome and going to reside in England, where he would be the spiritual head of the church. The Abbé starts with the assumption that the restoration of the temporal power of the Pope at Rome is inevitable. The influence of modern ideas being, as he says, imperative upon Papal institutions, the progressive element in the Roman nation has become altogether antagonistic to the Pontifical Government. As long as diplomacy, aided by force, chooses to sustain the old machinery it may continue to work, but whenever the foreign troops withdraw from Rome the Papacy will find itself face to face with revolution. The Abbé takes it for granted that whenever the revolution shall make head, the Pope will be forced to abdicate his temporal power, and he doubts seriously whether after such an abdication he could maintain his spiritual supremacy at Rome with proper dignity. One city alone, a neutral city out of Italy (he would be forced to add also his European Governments.

The injury done to the crops by the late inundations in France is estimated at 160,000,000f., of which 30,000,000f. are referable to the numerous trees for all kinds. In that amount is not included the damage done to houses, to the less to cattle, utensils, &c., or to injury done to railroads

## MONETARY TRANSACTIONS OF THE WEEK.

*(From our City Correspondent.)*

NOTWITHSTANDING that the stock of gold in the Bank of England is reported monthly, that the account markets is literally filled with money and that there is every prospect of our drifters ces with America being amicably settled, the money-market, as regards Stock the week is to have been by no means animated. National securities, however, have been very firm, and if the quotations have shown a tendency to advance. Nearly all the foreign exchanges are favourable, and some of them show a slight profit on gold shipped to this country. In the Continent there is scarcely any demand, and the whole of the late heavy arrivals from Australia have gone into the Bank. For silver there is less inquiry for India and China; and the returns from the Bank during the ensuing month will no doubt show the specie to be in excess. At present the stock of gold is very little under £18,000,000, and important additions have lately been made to the *Reserve*.

We have had no direct imports of gold from Australia th s week; but several vessels with large quantities on board are daily expected. From New York we have received £197,000; from Antwerp, £26,000 (the latter being silver); and £8000 from other quarters.

There was a steady market for Consols on Monday. The Three per Cents Reduced marked 94¾ ⅞; the New Three per Cents, 94¾ ⅞; and Consols for Account, 94¾ ⅞. Co-lan Scrip was 2¾ prem. India Bonds, 14s. prem.; Exchequer Bills, 10s. to 13s. prem.; Ditto, Bonds, 50s. On Tuesday the transactions were not extensive, yet prices ruled firm; namely, Consols, 217; Three per Cents Reduced, 95¾ to 95⅝; New Three per Cents, 95¾ ⅞; Consols for Account, 94¾ ⅞; Consols Scrip, 3¼ ⅝ prem.; India Bonds, 14s. prem.; Exchequer Bills, 10s. to 13s. prem.; Ditto, Bonds, 50s. ⅝; Long Annuities, 1885, 17⅞. In the following day the markets generally were steady, as follows:—Bank Stock, 217 to 218; Three per Cents Reduced, 95¾ ⅝; New Three per Cents, 95¾ ⅝; Consols for Account, 94¾ ⅞; Long Annuities, 1859, 8 1 16; Ditto, 1885, 17 11-16 ⅞; India Bonds, 14s. prem.; Exchequer Bills, 10s. to 13s. prem.; Exchequer Bonds, 99¾ ⅝. On Thursday the Bank of England transferred the sum much late of discount to 4½ per cent. This reduction was followed by a correspondi ng one on the part of the private bankers and discount-houses. National Stocks were firm. The Three per Cents Reduced were 95¾ ⅝; and the New Three per Cents, 95¾ ⅝. Bank stock, 218. Exchequer Bills, 10s. to 14s.; and India Bonds, 14s. prem. The Board of Trade returns published on Thursday show an increase in the value of our exports, compared with May, 1855, of £385,754

Great firmness has characterized the operations in the Foreign House, and the value of most securities has been on the advance. There have been dealings in Brazilian Five per Cents at 103½; Ditto, New, 1829 and 1839, 101¾; Ditto Four-and-a-Half per Cents, 97; Cuba, Six per Cents, 103¾; Chilian Six per Cents, 108; Danish Five per Cents, 103½; Buenos Ayres Six per Cents, 82; Ecuador New Consolidated, 14¼; Ditto Provisional Loan Warrants, 5; Granada Two-and-a-Quarter per Cents, New Active, 19¾; Ditto, Deferred, 7⅞; Mexican Three per Cents, 23¾; Peruvian Four-and-a-Half per Cents, 79; Ditto, Three per Cents, 55¾; Russian Four-and-a-Half per Cents, 96; Ditto Five per Cents, 103; Spanish Three per Cents, 47¾; Ditto New Deferred, 25¾; Ditto, Certificates of Coupon, not funded, 8¾; Ditto Passive, 5¾; Ditto, Certificates of Coupon, not funded, 8¾ per cent; Ditto Small, 103; Ditto Four per Cents, guaranteed, 105; French Three per Cents Scrip, Second Loan of 1855, 5 prem.; Ditto Three per Cents, 71f 50c.; Guatemala, 37; Dutch Two-and-a-Half per Cents, 63¾.

Joint-stock Bank shares have been very brisk, as follows: Australasia, 10; Bank of Egypt, 12¾; Bank of London, 50¾; Hindoostan, 20; Ionian, 6 ex div., 5¼; London Chartered of Australia, 18¾; London and Colonial, 33; London Joint-stock, 31½; New South Wales 46¾; Oriental, 41; Ottoman Bank, 12¾.

Most Miscellaneous Securities have been firm in price; but the business done in them has been very moderate. Australian Agricultural have realised 31½; Australian Royal Mail, 3¾; Canada Company, 88; Crystal Palace, Preferred, 6 per Cents, 11½; Crystal Palace, 2¾; Do., Preferences, 5¾; General Screw Steam Navigation Company, 1¼; London General Omnibus, 4¾; National Discount Company, 3¾; North of Europe Steam Navigation, 7¾; Peninsular and Oriental Steam Navigation Company, 70 ex div.; Ditto, New, 10 ex div.; Van Diemen's Land, 17. East London Waterworks have been 120; Ditto, Four per Cent Preference, 97½; Ditto, Five per Cent, 99¾. Kent, 19¾; Grand Surrey, 74; Kent, 80, Southwark and Vauxhall, 69¾; West Middlesex, 100. St. Katharine's Dock Shares have marked 85, Southampton, 42¾; Victoria, New, 13¾.

Railway Shares have been in request, on higher terms. Quotations have advanced to some extent. The traffics for July will be about £1,500,000. The following are the official closing prices on Thursday

ORDINARY SHARES AND STOCKS.—Aberdeen, Nottingham, and Boston, 5; Caledonian, 82¾; Chester and Holyhead, 12¾; East Anglian, 18¾; Edinburgh, Perth, and Dundee, 57¾; Great Northern, 80¾; Great Southern and Western (Ireland), 109; Great Western, 60¾; Lancaster and Yorkshire, 99¾; London and Blackwall, 7¾; London and Brighton, 106; London and North-Western, 104½; London and South-Western, 104; London, Tilbury, and Southend (Barking shares), 2; Manchester, Sheffield, and Lincolnshire, 38. Midland, 82¾; Ditto, Birmingham and Derby, 82½; North British, 38; North-Eastern (Berwick), 89¾; Ditto, Leeds, 19¾; Ditto, York, 61¾; North Staffordshire, 12; North-Western, Dublin, 97; Oxford, Worcester, and Wolverhampton, 34½; Scottish Central, 104; Scottish Midland, 77¾; Shropshire Union, 49; South-Eastern, 73¾; Stockton and Darlington, 37; West-End of London and Crystal Palace, 8, 9¾

LINES LEASED AT FIXED RENTALS.—Brecknig hamshire, 98¾; Midland-Bracford, 94¾

PREFERENCE SHARES.—Aberdeen Six per Cents, 118; Caledonian Four-and-a-Half per Cents, 100¾; Great Western (Birmingham Stock), 74¾; Midland Consolidated, 129; North Eastern—Berwick, 94¾.

FOREIGN.—Belgian Eastern Junction, 2; Buffalo and Lake Huron, 6¾; Eastern of France, 37¾; East Indian, 283¾; Ditto, Extension, B, 28¾; Ditto, C, 72; Grand Trunk of Canada, 14; Great Indian Peninsula, 99¾; Ditto, New, 8¾; Great Luxembourg, 8¾; Great Western of Canada, 26¾; Ditto, New, 3¾; Madras, 201; Namur and Liége, with interest, 2¾; Paris and Lyons, 86¾; Royal Swedish, 1¾; Sambre and Meuse, 12¾

Mining Shares have been tolerably active :—On Thursday Australian were

*Friday Afternoon.*

The reduction in the rate of discount by the Bank of England to 4½ per cent has been productive of a steady and improving Consol Market to-day. The Three per Cents ex div. are 94¾ 95, the Reduced, 95 to 95¾; and the New Three per Cents, 95¾ ⅞; Bank Stock, 218; Exchequer Bills, 10s. to 14s. prem. Foreign Bonds and Railway Shares continue firm.

## THE MARKETS.

CORN EXCHANGE (Friday).—A very limited supply of English wheat was on sale this day's market. Fine flours were had a firm demand, and the wants of the samples found buyers at, in some instances, a further 4s. per sack improvement in the quotations. The imports of Foreign wheat continue limited. That description of produce was very firm, as fully to day's currency. The limited quantity of grain were steady. Both barley and malt moved off fairly at very full prices. Oats were held for more money, but the business doing within was by no means large. Beans, peas, and flour were quite as dear as on Monday.

*Arrivals this Week.*—English: wheat, 2160; barley, 94; malt, 3680; oats, 19; flour, 1600. Irish: barley, 600; oats, 1140. Foreign: wheat, 7,040; barley, 1000; oats, 8,080; flour, 640 sacks.

*English.*—Wheat, Essex and Kent, red, 68s. to 80s.; ditto, white, 70s. to 83s., Norfolk and Suffolk, red, 69s. to 77s.; ditto, white, 72s. to 84s.; grinding barley, 36s. to 39s., distilling ditto, 38s. to 41s.; malting ditto, 41s. to 45s., Lincoln and Norfolk malt, 78s. to 84s.; brown ditto, 65s. to 67s., Kingston and Ware, 72s. to 84s.; Chevy, 74s. to 86s.; Yorkshire and Lincolnshire feed oats, 21s. to 23s.; potato ditto, 27s. to 29s.; Cork and Cork, black, 22s. to 24s.; ditto, white, 24s. to 26s.; Cork beans, 37s. to 39s.; Essex, 36s. to 38s.; maple, 42s. to 44s.; white, 44s. to 47s.; hollers, 47s. to 49s. per quarter. Town-made flour, 45s. to 48s.; suffolk, 43s. to 45s.; stockton and Yorkshire, 42s. to 44s.

*Arrivals this Week.*—English: wheat, 2160; barley, 94; malt, 3680; oats, 19; flour, 1600. Irish: barley, 600; oats, 1140. Foreign: wheat, 7,040; barley, 1000; oats, 8,080; flour, 640 sacks.

*English.*—Wheat, Essex and Kent, red, 68s. to 80s.; ditto, white, 70s. to 83s., Norfolk and Suffolk, red, 69s. to 77s.; ditto, white, 72s. to 84s.; grinding barley, 36s. to 39s., distilling ditto, 38s. to 41s.; malting ditto, 41s. to 45s., Lincoln and Norfolk malt, 78s. to 84s.; brown ditto, 65s. to 67s., Kingston and Ware, 72s. to 84s.; Chevy, 74s. to 86s.; Yorkshire and Lincolnshire feed oats, 21s. to 23s.; potato ditto, 27s. to 29s.; Cork and Cork, black, 22s. to 24s.; ditto, white, 24s. to 26s.; Cork beans, 37s. to 39s.; Essex, 36s. to 38s.; maple, 42s. to 44s.; white, 44s. to 47s.; hollers, 47s. to 49s. per quarter. Town-made flour, 45s. to 48s.; suffolk, 43s. to 45s.; stockton and Yorkshire, 42s. to 44s.

*Foreign.*—Wheat, Dantzic, 70s. to 74s.; Pomeranian, Rostock, and Mecklenburgh, 68s. to 72s.; Marianopoli, 68s. to 69s.; Ghirka, 68s. to 69s.; Taganrog, 68s. to 69s.; Egyptian, 64s. to 66s.; Salonica, 64s. to 66s.; Fine Odessa, 68s. to 70s.; Barley, 36s. to 38s.; Egyptian, 34s. to 36s.; Danish and Holstein, 36s. to 38s.; Oats, Dutch, 22s. to 24s.; Danish and Holstein, 22s. to 24s.; Flour, Hamburgh, 40s. to 42s.; Stettin, 40s. to 42s.; Pomeranian, 40s. to 42s.; Spanish, 40s. to 42s. per barrel.

*Seeds.*—Clover and linseed are in request at very full prices. In all other seeds only a limited business is doing.

Linseed, English, crushing, 57s. to 58s.; bumpseed, 56s. per quarter. Coriander, 20s. to 21s. per cwt. Tares, 7s. 6d. to 8s. per bushel. English rapeseed, 38s. to 40s. per last. Foreign, 36s. to 37s. per last. Canary, 68s. to 69s. per quarter. Hempseed, 42s. to 43s. per quarter. Linseed cakes, English, £12 5s. to £13 5s.; ditto, foreign, £11 5s. to £12 5s. per ton. Rapeseed cakes, English, £12 5s. to £13 5s.; ditto, foreign, £11 5s. to £12 5s. per ton. Cotton cakes, £7 5s. per ton. Canary, 68s. to 69s. per quarter.

*Bread.*—The prices of wheaten bread in the metropolis are from 9½d. to 10d., of household ditto, 6½d. to 7½d. per 4lbs. loaf.

*Imperial Weekly Averages.*—Wh at, 69s. 11d.; barley, 36s. 6d.; oats, 24s. 7d.; rye, 44s. 8d.; beans, 43s. 9d.; peas, 41s. 6d

*The Six Weeks' Averages.*—Wheat, 68s. 8d.; barley, 36s. 6d.; oats, 24s. 0d.; rye, 43s. 6d.; beans, 43s. 6d.; peas, 40s. 8d.

*English Grain Sold Last Week.* Wheat, 105,387; barley, 4172; oats, 13,371; rye, 111; beans, 3663; peas, 253 quarters.

*Teas.*—The public sales held this week have gone off slowly, yet very little change has taken place in the quotations. Privately the demand is on a sluggish scale, and fair prices have an active sale for bacon the value of which has improved quite 4s. per quarter. Land is in good request, and prices, in some instances, have advanced.

*Tallow.*—For the time of year the demand is by no means active. P.Y.C., on the spot, is, and for the last three months, is, per cwt. Town tallow, 46s. per cwt.

*Hops.*—The value of last year's growth has moved all steadily at our quotations. Sussex pockets, 80s. to 90s.; Weald of Kent ditto, 84s. to 92s.; Mid and East Kent ditto, 94s. to 98s.; Farnham, 120s. to 140s.; Bavarian, 120s. to 130s.; Belgian, 110s. to 120s.

*Potatoes.*—Fair average supplies of old potatoes are still on offer. The demand is languid, at from 70s. to 80s. per ton. New qualities range from 6s. to 16s. per cwt.

*Wool (Friday).*—Our market has been rather languid, with many of the kinds of hops, in Sussex pockets, 80s. to 90s.; Weald of Kent ditto, 84s. to 92s.; Mid and East Kent ditto, 94s. to 98s.; Farnham, 120s. to 140s.; Bavarian, 120s. to 130s.; Belgian, 110s. to 120s.

*Potatoes.*—Fair average supplies of old potatoes are still on offer. The demand is languid, at from 70s. to 80s. per ton. New qualities range from 6s. to 16s. per cwt.

*Hops (Friday).*—Our market has been rather languid, with many of the kinds of hops, in Sussex pockets, 80s. to 90s.; Weald of Kent ditto, 84s. to 92s.; Mid and East Kent ditto, 94s. to 98s.; Farnham, 120s. to 140s.; Bavarian, 120s. to 130s.; Belgian, 110s. to 120s.

*Tallow.*—For the time of year the demand is by no means active. P.Y.C., on the spot, is, and for the last three months, is, per cwt. Town tallow, 46s. per cwt.

*Wool

PARIS FASHIONS FOR JULY.

*Girl's Dress.* Bonnet of white taffetas, with a similar bow on each side of the poke. Dress of white muslin embroidered *en plumettes*, with three volants; the sleeves short, and having also three small volants. The body has two braces, or double braces, which have on them also the same embroidery. A wide waistband of fancy ribbon, with long floating or hanging ends, completes this costume.

## THE LORD LIEUTENANT'S RECEPTION AND PROMENADE, DUBLIN.

An *al fresco* Court ceremony is a scene of great enjoyment, better suited to the present season than the artificial splendour of state rooms; and the Lord Lieutenant of Ireland has proved the superior *agrémens* of the out-door assembly by holding his receptions and promenade in the grounds in front of the Viceregal Lodge instead of within the stately saloons of the Castle. The first reception and promenade of the season was held by his Excellency on the afternoon of the 7th inst. The attendance of nobility and gentry resident in Dublin was exceedingly numerous. The promenade terminated shortly after eight o'clock.

THE LORD LIEUTENANT'S RECEPTION AND PROMENADE, DUBLIN.

## THE UNIVERSAL AGRICULTURAL EXHIBITION IN PARIS, 1856.

*(From our Special Correspondent.)*

THIRD NOTICE.

THE Swiss cattle come in due order after the French, and have evidently been extended more widely over Continental Europe than any other improved breed. From Fribourg and Berne come large parti-coloured cows, hollow-backed, with deep dewlaps; some of the Berne were marked very much like a Hereford, with white faces; and altogether the red and white and red and black Swiss were quite capable of passing muster in a Cheshire dairy. They feed on the rich grass of the Alpine moun-

HUNGARIAN SHEPHERD.—FROM A PHOTOGRAPH BY RICHEBOURG.

tains in summer, and are stabled and fed and curry-combed in winter. They are perfectly civilized. The whole story of the Ranz des Vaches, horns, cowherds in costume, is familiar to us; and certain it is that we can borrow nothing from them. But the Swiss, who, like ourselves, are dependent on private enterprise alone, are judiciously purchasing for the purpose of adding meat to their dairy stock.

The Swiss are a highly intelligent race, and understand their art as

HUNGARIAN HEADSMAN.—FROM A PHOTOGRAPH BY RICHEBOURG.

well as any Shorthorn or Devon breeder. It is the Schwitz breed that are the most interesting race of Switzerland. There is no mistake about them; they are as decided a breed as the West Highlander, improved by a century of cultivation, and we trace them along the mountain chains of all the Alpine regions of Europe. There we may leave them; the only use we could make of them would be to put a bull to our little Alderneys with the view of getting more size and constitution. They do not always handle well.

The Austrian part of the Cattle Exhibition was extremely well got up, and included specimens of several singular native and improved breeds. They were divided geographically into districts; and it was most interesting to Englishmen to find in the section of Bohemia and Moravia, under the title of a Berne-Moravian, a real Hereford cow, evidently one of the race from which that breed of which Herefordshire and Shropshire are so justly proud must have been originally derived; while a white-grey cow from Styria—derived, according to appearances, from a cross between a native white breed and the dark dun of Schwitz was a specimen of everything that a milking-cow ought to be. This cow has been purchased by a gentleman living near Croydon, but will require better food than the short turf of chalk hills.

The Engravings represent two of the Swiss breed.

The cow with the bell is a black and white four-year-old Swiss, of the *Bernoise* breed, exhibited by Mons. Daniel Jaton, of Chailly-

Pur-Lausanne (Vaud). To strangers it was difficult to detect any essential difference between the Bernoise and the Fribourgeoise cows. The Berne bulls seemed to have heads of a more decided bull stamp, with deeper dewlaps than those from Fribourg. The cows were native, long-legged; parti-coloured, chiefly black and white, but some red, and red and white, like Herefords; all famous milkers. These are the breeds that have been in demand in their districts for beef as well as milk since the extension of railroads through France and Germany, and the consequent increase of travellers. And, as before mentioned, in the opinion of the Swiss Commissioner, they will in future be continually crossed with the Shorthorn, or perhaps, if draught is required with Hereford bulls. These breeds excel as buttermakers; while the Dutch, of very much the same stamp but fed differently, give more for making cheese. The great pear-shaped bell is made of iron; it seems to have stood the beating of Alpine storms for centuries, and gave forth a sound anything but musical within the building; on a mountain-top it may sound

HUNGARIAN SHEPHERD.—FROM A PHOTOGRAPH BY RICHEBOURG.

more sweetly. The belt by which it was suspended is about four inches in breadth, richly embroidered and ornamented with red silk, brass, and cowrie shells; with an inscription, in this instance complimentary not to the wearer the cow, but to the Agricultural Exhibition. Beside the bell hung a very cleverly contrived one-legged stool, nicely carved, and provided with a strap to hang over the milker's shoulders when following the herds up the mountain gorges in the summer.

CHAROLAIS BULL.
SWISS COW—BERNESE BREED.

BROWN SCHWITZ BULL.

AUBERIAN PIGS.

BLACK POLLED ANGUS.

PRIZE CATTLE AND PIGS AT THE PARIS UNIVERSAL AGRICULTURAL EXHIBITION.

The brown bull is a representation of the famous breed of the canton Schwitz, sent by Mr. Gottifried Burgi, of Arti. Down the backs of these Schwitz runs a dark-shaded mark like the cross on the withers of a donkey. The head is fine, with somethi.g of the Alderney cast; the eyes full and intelligent, the horns black tipped, the tail black and bushy in size.

The other two illustrations are of two breeds—one until recently unknown in this country, another new to France. The white bull is a Charolais, and the black a Polled Angus. The Charolais may be said to be a native of Berri (the birthplace and favourite residence of George Sand). The Scotch, as formerly of several colours, but has now settled into white. The oxen are considered the best workers in France—that is their excellence; they also have more capacity for making beef than most of the French breeds. They are very poor dairy cattle; but Count du Gouray tells me that a Shorthorn cross doubled the milk capacity of a Charolais herd. The breeders will not cross with any but white Shorthorns, and purchase of oxen have a preference over any other colour. The half-bred oxen are found to work well.

The Angus bull is an animal seldom seen south of the Tweed, although the beef supplies our butchers with their primest joints, and the oxen fill the winter-yards of our Lincolnshire and Norfolk farmers.

The Hungarian sheep (engraved in our Journal of the 14th inst.) not less curious than the white ox. This sheep, both in the male and female, has long, upright, spiral horns like an antelope, with a beautiful black or dove-coloured deer-like head, and long coarse wool, of the same quality as the hair-faced Highland sheep. This wool makes the blanket-coats of the Hungarian shepherds and herdsmen. The ewes are milked, and supply, as the Highlanders do, a common kind of cheese.

While on the subject of Danubian stock, I must not overlook the swine. The pigs exhibited by France and Germany were almost entirely of British descent. There were no specimens of those greyhound-like animals that used to run wild in the forests on both sides of the Rhine—wretched creatures, libels on porcine qualities. But the Austrian Commission wisely sent examples of their best and worst native breeds.

The Szalonts is a great long legged, long-nosed, dog-eared, flat-sided pig, with a thick skin covered with red bristles of the coarsest quality; he might easily be mistaken for a wild boar, but has not the bad quality possible for bred, either as pork or bacon. The sooner this breed is improved out of the country the better. The specimen in question proved both active and vicious: when his keeper wished to rouse him to have his portrait taken he resisted violently, showed his tusks, bit, and eventually sprang over a high inclosure into the adjoining pen.

The Mangalicza breed, on the contrary, is capable of early improvement. It is of a blue black colour, compactly shaped, and a cross of two with a good-sized Essex would improve the shape, refine the skin, and give earlier maturity. These two pigs are engraved.

The costumes of the attendants of the Hungarian stock attracted as much attention as the cattle and sheep. Their wives and children, and even the girls picked men. One shepherd was a very handsome young fellow, with a mild, oval, deep bronze countenance, almost oriental in expression, with black, piercing, roving eyes, and long, straight, black hair. He wore a black loose handkerchief round his throat, a close-fitting blue cloth hussar jacket without sleeves, with red glass buttons, and hanging over his left shoulder a blue pelisse of the same cloth; his sleeves were loose, and of white linen, and so were his trousers, which were so full and so short that they might be taken for a white kilt; on his legs were long, stout boots. He leaned on a wooden crook carved and coloured. The parti coloured strings of his embroidered tobacco-pouch hung from his jacket pocket. He was of middle stature, muscular, slight, and active, and walked with a proud, free step. His female companion wore red trousers, and white embroidered blanket-cloak; he carried across his shoulders a most elaborate whip and an axe in his hand. But these, I suspect, were the holiday dresses of the head servants of a princely, if not royal, domain.

One of the keepers of the Schwitz cows wore a very remarkable costume. Shoes with broad silver buckles, green stockings and breeches, and green embroidered garters, bright saffron-yellow breeches, a red waistcoat with large square silver buttons, white shirt-sleeves, a gay red handkerchief round his waist, a union belt to his bras a across his chest embroidered with brass plates of cattle, and a broad silver watch-chain, made a great display; while the head of a thin, parchment-coloured, sharp, fibbergibbet face was covered with a leather embroidered skull-cap. S. S.

METROPOLITAN IMPROVEMENTS.—The new street from Spitalfields Church to Shoreditch, for which an act was passed in July, 1846, is now entirely at a stand for want of ready money; the sum required to complete the undertaking is about £27,000, to meet which deficiency the Commissioners of Works are empowered to sell or mortgage the building ground on each side of the street. In October last, after the subject had been discussed for some months, the architect represented the inexpediency of selling any of this ground before opening the street as a public thoroughfare, and suggested the propriety of borrowing £20,000 on mortgage.

TITHE REDEMPTION TRUST.—The annual meeting of the members of this society was held on Thursday, at their rooms, No. 1, Adam-street, Adelphi, under the presidency of Lord John Manners, M.P. Prior to the meeting, service was performed at St. Michael's Church, Burleigh-street—the sermon being preached by the Rev. Dr. Wordsworth, Canon of Westminster. From the report presented at the meeting it appeared that the society had succeeded in restoring to the use of the Church many parochial tithes which had fallen into the hands of lay impropriators, and that many other cases were under consideration. It was stated that a great desire exists on the part of lay impropriators to release these tithes on favourable terms and that the society only wants funds to carry on the work of restoration to its fullest extent.

HARROW SCHOOLS.—THE SPEECH DAY.—Thursday having been appointed for the annual Harrovian Commemoration, a large number of the parents and friends and gentlemen, including many old Harrovians, arrived at Harrow at an early hour in the morning, and were received by the head Master (the Rev. C. J. Vaughan), and his staff. After the usual preliminary congratulations and other ceremonies, the whole of the company proceeded to the large dining-hall, where the prizes were distributed to deserving and successful competitors were presented with the several prizes. The speech list was then gone through, much to the satisfaction of the audience, which was the largest we ever remember seeing on a similar occasion

CROSSED CHEQUES.—The new Act to amend the law relating to draughts on bankers was issued on Wednesday. The preamble that the law requires as to the obligations of bankers with respect to cross-written draughts, and that it would conduce to the ease of commerce, the security of property, and the prevention of crime, if drawers or holders of drafts on bankers, payable to bearer or to order on demand, were enabled effectually to direct the payment of the same to be made only to or through some banker. Therefore it is enacted that a draught crossed with a banker's name is to be payable only to or through some banker. The Act is now in force.

THE recent discovery of iron ores in the uncultivated wilds of Exmoor Forest, Devonshire, is expected to produce a complete revolution in the iron trade. The district will, it is estima ed, raise from 200,000 to 300,000 tons iron ore annually.

RECEPTION OF MAJOR-GENERAL SIR WILLIAM FENWICK WILLIAMS AT DOVER THE READING OF THE CORPORATION ADDRESS [illegible]

MISS AGNES GLADSTONE AND HER BROTHER HERBERT, CHILDREN OF THE RT. HON. W. E. GLADSTONE, M.P., MARBLE GROUP, ALTO RELIEVO."—BY A. MUNRO.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

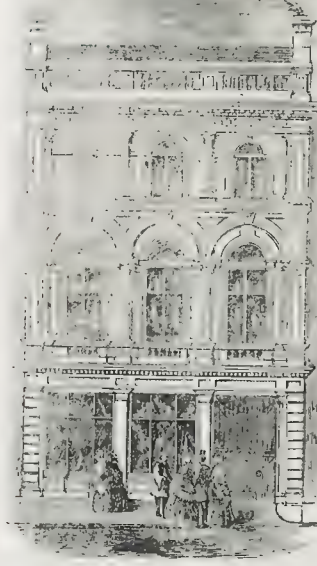
"QUEEN BOADICEA."—J. THOMAS, SCULPTOR.—FROM THE EXHIBITION OF THE ROYAL ACADEMY.

"TITIAN AND HIS GOD-DAUGHTER—A SONNET FROM PETER ARETIN."—PAINTED BY W. H. KEARNEY.—FROM THE EXHIBITION OF THE NEW SOCIETY OF PAINTERS IN WATER COLOURS.

## THE NEW ATHENÆUM, AT BOSTON.

From the proceedings at the inauguration of this admirable institution, recorded in our Journal of last week, we derive a few interesting details. It appears that for several years the necessity of a proper building for the purposes of the Athenæum had been generally acknowledged in the town. The old rooms near the fish market were unhealthy, unsightly, and altogether unfitted for the purpose. As the society increased in numbers and importance, these objections became daily more apparent. Various schemes were from time to time proposed to raise a new building; and at length a suite of rooms in the new Corn Exchange has been appropriated to the institution, the formal opening of which took place on Tuesday week. Upon that occasion, Mr. W. Gardt, jun., said they had met to celebrate the opening of the new building, and he trusted to inaugurate a new era in their existence. The institution very properly excluded political and theological topics; but by extending knowledge he believed they were extending the great fundamental principles of religion. Though the society was self-supporting, yet they had ever sought the aid and co-operation of ministers of religion, who by their countenance added to the respectability and moral power of the society. He was happy to find the clergy and ministers did come forward so numerously to give their support, and he hoped they would ever continue worthy of that support, and that they (the clergy) would never feel ashamed or have cause to regret that they associated their names in the roll of members.

The Rev. G. B. Blenkin, M.A., the Vicar, was thankful to have an opportunity to express the interest he felt in the Athenæum. It had been said that the interests of science and religion were opposed. This might have been the case in times gone by, in the days of Galileo for instance; but when the blessed light of the Reformation dawned, that opposition ceased to exist. When science was made the handmaid of religion, and reason bowed itself at the foot of the cross, then ministers could cordially hold out the right hand of fellowship. If there required any proof of this he need only refer to Adam Sedgwick, the geologist, who indeed found "sermons in stones." He had a letter from that gentleman expressing his regret that from indisposition he was unable to attend the present meeting. He (the Vicar) returned them his most cordial thanks for the kind manner in which they received him, and hoped the Boston Athenæum would ever be what it ought to be, the handmaid of religion, and that its members would become not only more cultivated in intellect, but would under God's good grace become better citizens, better Christians, and better men.



THE BOSTON ATHENÆUM.

Mr. T. Gardt, President of the Athenæum, stated that the management of the Athenæum reflected great credit upon the committee, and the greatest cordiality and good feeling prevailed among the whole 450 members; he never heard a wry or angry word. The had received the support of the Mayor and the principal clergy and gentry of the town and neighbourhood, and several learned men had come great distances to deliver lectures which they all had much pleasure in hearing.

Mr. W. H. Adams said he had been one of the original founders of the old Mechanics' Institute, which was the germ (if he might so call it) of the present flourishing society. He hoped that every similar society might have equally as good a building as the one they had erected, and be trusted the time would come when not only every town, but every village and hamlet, in this empire might have its institute, bringing home knowledge to the door of every man.

Mr. Gardt, the President, at the soirée in the Exchange, glanced at the Athenæum, and compared the rooms of the past with the present noble structure. They had lately received a valuable donation of books for the library from their respected member, Mr. Ingram. He thought that institution ought not to be like charitable institutions, it should be independent and self-supporting. At the close of the year 1851 they had agreed to raise the subscription from 1l. to 1l. 5s. Though that was not a trifling amount to some, it was agreed to without a dissentient voice. Many of those very members earned their living by the sweat of their brows. He considered that gentlemen who subscribed their guinea a year to that institution had an equivalent for their money, considering the very many advantages they received therefrom in the shape of lectures, library, new books, and morning and evening papers.

A series of resolutions was then carried in furtherance of the views and objects of the institution.

---

RIFLE-SHOOTING.—A clever feat of rifle-shooting came off near Paris last week in presence of some of the best shots of the French army and several distinguished officers. Captain Wellington Guernsey, late of the Turkish Contingent, was matched to shoot twenty-five pigeons against Lieutenant Arnaud, of the Chasseurs de Vincennes, for 500 francs a side, with single bullets, at 160 English yards. Lieutenant Arnaud used one of M. Minie's latest improved rifles; Captain Guernsey used one of the Enfield military rifles now supplied to the British army. Lieutenant Arnaud killed eighteen birds, Captain Guernsey twenty-four, out of the twenty-five, right off, (only missing the last shot), to the astonishment of all present. An officer of the Guards present offered to back Captain Guernsey, for a large sum, to shoot a match of distances, from 300 to 1,200 yards, with any rifle-shot to be found.

A CREDIT MOBILIER COMPANY IN BELGIUM.—The *Emancipation* of Brussels announces that the Minister of Finance of Belgium has signed the statutes of a Crédit Mobilier Company for that country, with a capital of 20,000,000 fr., in 500 fr. shares. It adds that only 5,000,000 fr. of the capital will be reserved for the public, M. de Rothschild having taken 8,000,000 fr., M. Rischoffsheim 7,000,000, and other great capitalists the rest. The president of the board of directors is M. Liedts, who is at present Governor of Brabant.

MEDAL PRESENTED TO DR. GUGGENBUHL, BY THE KING OF PRUSSIA.

## HOSPITAL FOR THE CURE OF CRETINISM.

THE Medal which we engrave, accompanied by the Order of the Red Eagle, has just been conferred by the King of Prussia upon Dr. Guggenbuhl, the well-known Swiss philanthropist, whose successful experiments and benevolent exertions on behalf of a large and deeply-afflicted class of Cretin and little idiot children are recognised in every country in Europe.

His Majesty, always anxious to promote scientific researches and to lend his aid to any effort in the cause of humanity, has not only testified a deep sympathy in the object of the Doctor's pursuits, but has expressed his earnest desire that he should continue to pursue with unremitting exertion those studies of the causes of the disease, and of the remedial agents which have been the absorbing objects of Dr. Guggenbuhl's life.

An interesting fact stated by Baron Humboldt, who has from the commencement of these investigations, taken the lively interest in the good cause, is the total absence of cretinism amongst the coloured races in the valleys of South America.

To the establishment of the Adenberg Hospital, at Interlacken, we are indebted for having first drawn the attention of the world to the good results of a practical investigation into the causes of the lamentable spread of cretinism. It is now considerably enlarging, so as to admit of a classification of its inmates.

We give an extract from a recent account of a celebrated French physician who has visited the institution within the last few months:—

Here I saw a mathematician, who knows the rules of arithmetic, and who explained to me the decimal system; beside him was a young geographer, who could trace with his finger on the map the principal rivers, and point out the towns, cities of Europe, &c.: a little further on was a botanist, who showed me the flowers of the Alps. Almost all the little cretins I saw there wrote neatly and well. Amongst them many spoke French, German, English, and some more than two languages. After the intellectual studies they appeared to enjoy with great spirit the gymnastic exercises.

The Doctor has recently visited Austria, where he was successful in exciting the attention of the Emperor to the degraded state of the population of the valleys of Styria and Carinthia, where cretinism fearfully abounds.

---

## COMPULSORY VACCINATION.

THERE is a very strong feeling of dissatisfaction generating on the subject of Compulsory Vaccination which at least deserves calm and considerate attention. It is a new thing in legislation to compel a man to undergo an operation, not for the cure, but for the prevention, of disease; and this not so much on his own account as in the interest of his neighbours; and nothing but a very strong case of necessity could justify such an interference with our individual liberties. Such a step, however, was adopted by the Compulsory Vaccination Act of 1853; and there is now a bill before Parliament to extend the provisions of that Act. By this measure it is proposed to make vaccination compulsory upon all children up to thirteen years of age; as well as upon all emigrants and crews of emigrant ships, all scholars in schools receiving aid from Government grants, and all inmates of workhouses, lunatic asylums, and prisons. In the case of the operation not proving successful in the first instance, it is to be repeated again and again, at intervals of not less than two months, until the patient shall receive a "certificate of insusceptibility to vaccine disease," which will be available to him for one year only; after which the same course of vaccination and revaccination will have to be gone through; and so on every year. All persons to whom the Act shall apply will be liable to be called upon to produce a certificate of successful vaccination, or of insusceptibility to vaccine disease; and every person "refusing or neglecting to comply with any requirement of this Act" will be liable to a penalty of 20s., and 5s. additional for every day's continuance after notice. Besides these pecuniary penalties, which, though they may sometimes operate seriously, may yet not be found sufficiently heavy to enforce obedience where conscientious and rooted objections exist, except in the case of the poorer classes, is a provision calculated to strike terror into the hearts of sensitive persons, and, as we think, wantonly to aggravate the pain of domestic bereavement. By the 27th clause it is ordained that in the case of the death from small-pox of any child (that is a person under thirteen years of age) born since the 20th of August, 1853, a coroner's inquest shall be held on the body, with a view of ascertaining whether the deceased had been duly vaccinated; and, in default, of enforcing the penalties for neglect against the parents, through the agency of the Poor-law guardians. This is carrying the terrors of the law beyond the grave in a manner without precedent in our humane criminal code. Besides all this, there is a clause in the bill providing that, it smallpox shall become prevalent in any part of England, the Board of Health shall have power to issue special regulations for the steps for its repression "by revaccination or otherwise;" penalty for neglecting any such regulations, 5*l*.

Now it happens that, irrespective of the objections upon general grounds to this official interference with the cares and discretionary powers of parents in their dearest relations of life—in addition to the natural repugnance in the bosoms of all Englishmen against all that savours of arbitrary dictation and bureaucracy—there is a very many persons who, whilst they entertain strong doubts as to the efficacy of vaccination as a preventive of small pox, on the other hand have a painful impression that the process itself is sometimes attended with evil effects, in consequence of the difficulty of procuring the vaccine matter free from the taint of other disease. These are points, however, which we will not enter upon at present. We think it sufficient to call attention to the extraordinary compulsory provisions of this bill, and to suggest the question whether such an amount of interference with individual rights is now demanded in the interests of public safety?

---

## THE WORCESTERSHIRE LUNATIC ASYLUM, AT POWICK.

THE first pic-nic for the season of the patients of the above excellent institution took place on Tuesday week, the 17th inst. The spot selected was in the adjoining parish of Leigh; where, by the kindness of Mr. Isaac, of Leigh Court, a field had been placed at the disposal of the merry-makers. Forty-six of the female patients were brought, under the care of Miss Giddings (the matron) and Mr. Hume (the steward), assisted by a staff of nurses and attendants. The party from the institution numbered upwards of seventy, and arrived upon the ground in carriages and waggons about twelve o'clock. After partaking of luncheon they freely wandered over the meadow, under careful, but not obtrusive, surveillance, and enjoyed the beautiful prospect.

The field had been admirably chosen for the purpose. It is the high field which is the site of the ancient Leigh Court. At the base of the lofty mound where the keep formerly stood is the deep-burrowing willow Teme, winding its devious course amid the rich "baums," and pastures, and hop-yards that make its valley alike picturesque and profitable. Over against the mound is Cotheridge Court, with its mile of stately avenue: on one side are clustering coppices, with a long reach of well-timbered landscape, crowned by the spires of the Faithful City: on the other side is the wooded country stretching from Broadwas and Martley, to Alfrick, backed by its noble range of hills—the Abberley, Berrow, and Ankerdine; the panorama is continued by the wooded heights of Old Storrage and the famous hills of Malvern; and, in the immediate foreground, shut out from the meadow by a screen of chestnuts and limes, is the noble parish church of Leigh, with its picturesque and trimly kept churchyard. A landscape such as this, full of diversified beauty, and bathed in the glories of one of the brightest days of sunny June, could not awaken other than pleasurable feelings in the breasts of those whose faculties, though obscured on certain points, are the more keenly susceptible to the delights of sight and sound.

Many of the patients having expressed a wish to see the interior of the church, they were conducted through the sacred edifice, and were greatly gratified with an inspection of the many fine monuments and objects of interest that it contains. After walking round the churchyard they returned to their meadow, where the brass band of the institution had now commenced playing. The band is not only a significant feature in the government of a lunatic asylum conducted on humane and enlightened principles, but it is also an evidence of what may be done by perseverance and good instruction. It is entirely composed of the warders of the institution, who, notwithstanding that their hours of practice are necessarily limited, have, in the short space of eight months, become a most efficient band. This is due to the judicious tuition and strenuous exertions of Mr. Langdon, of Worcester, who has had their training, and has devoted no little time and talent to the furtherance of so truly important work:—we say really important, because the introduction of music into the asylum has been marked with the happiest effects on the patients. The band plays at the institution on certain evenings in the week, and on Fridays the patients have a dance.

Mr. Langdon having taken his place at the head of his pupils, and being joined by Mr. Hume, the steward, who is an excellent musician, the national airs of France and England were played in fine style. To these a country dance succeeded, and to the lively measure of its music the majority of the patients were soon tripping, their nurses and attendants mixing with them. We were informed that so much had the pleasures of the day been anticipated, that the patients had devoted the previous evening to unceasing "ball practice," and the preparation of polkas for the next day's performance; and they certainly proved themselves to be admirably proficient in those many steps, to obtain a due knowledge of which we are accustomed to place ourselves under the instruction of a Coulon or a D'Egville.

The pic-nic dinner was laid on the brow of the hill; and soon after three o'clock the beef-steak pies and other good things provided for the occasion were plunged into with a right good will, and appetites sharpened by air and exercise. After dinner, music and dancing alternated for the remainder of the evening, the exertions of the band being relieved by those of a fiddler. Nor were songs wanting, for one of the female patients sang an old ballad, in admirable style, and with a good soprano voice; and a male patient (who has a knowledge of music, and is the drummer of the band, amused a large audience by the genuine humour that he threw into "Villikins" and two other comic songs.

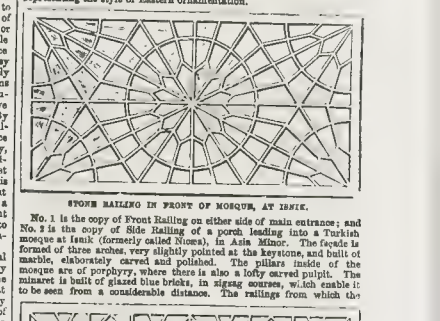
A large proportion of the inhabitants of Leigh were present, and joined the patients in their dances and amusements. This gave a social character to the assembly that appeared to exercise a salutary influence on the afflicted inmates of the institution, whose unvarying demeanour throughout the day was a sufficient evidence of the beneficial results that have been accomplished in laying aside the terrors of chains and whips, and darkened cells, for bright rooms, kind words, and humane treatment.

The day was terminated without the slightest *contretemps* having occurred to mar its pleasures; and it was early eight o'clock before the pic-nic party left the ground, taking with them, as we may hope, many sunny fancies wherewith to cheer less happier moments.—CUTHBERT BEDE, B.A.

---

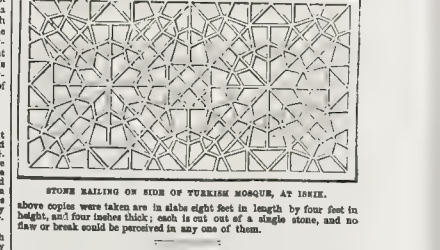
## TURKISH ART.

THE outlines of these specimens of ornamental art in Turkey have been placed at our disposal by an obliging Correspondent, and are interesting, a representing the style of Eastern ornamentation.



STONE RAILING IN FRONT OF MOSQUE, AT ISNIK.

No. 1 is the copy of Front Railing on either side of main entrance; and No. 2 is the copy of Side Railing of a portal leading into a Turkish mosque at Isnik (formerly called Nicæa), in Asia Minor. The façade is formed of three arches, very slightly pointed at the keystone, and built of marble, elaborately carved and polished. The pillars inside of the mosque are of porphyry, where is also a lofty carved pulpit. The minaret is built of glazed blue bricks, in zigzag courses, which enable it to be seen from a considerable distance. The railings from which the



STONE RAILING ON SIDE OF TURKISH MOSQUE, AT ISNIK.

above copies were taken are in slabs eight feet in length by four feet in height, and four inches thick; each is cut out of a single stone, and no flaw or break could be perceived in any one of them.

---

NO ROMAN CATHOLIC BISHOP FOR BERLIN.—It now appears certain that we are not to have a Roman Catholic bishop in this city. The Minister of Public Worship is of opinion that there is not sufficient reason to creat such a see in this capital, the number of Roman Catholics here not being sufficient to warrant such a step. The King, it is said, has fully approved of this decision.—*Letter from Berlin.*

# Memorabilia,

## LITERARY, ANTIQUARIAN, SCIENTIFIC, AND ARTISTIC.

*"A little chink may let in much light."*—OLD PROVERB.

### HOTSPUR'S CHAIR AND THE BLOODY GAP, ALNWICK CASTLE, NORTHUMBERLAND.

ALNWICK CASTLE, Northumberland, abounds in interest; and our Engraving (from a drawing by Cuthbert Bede) represents one of its most noteworthy features. "Hotspur's Chair" is the name given to the seated recess of the Ravine Tower, to which tradition points as the favourite resort of "the gallant Hotspur, young Harry Percy." Here, it is said, he was accustomed to sit the while his troops exercised in the Castle-yard beneath, and from hence he could view an approaching enemy, and take timely mea-ures for their due reception. The Castle stands on a commanding situation; and through the loop-holes on either side of the stone seat Hotspur would have a very extensive prospect over the valley of the Aln and to the distant sea coast.

"The Bloody Gap" is between the Ravine and the Records (or Round) Tower. Its extent is plainly to be distinguished at the present day, from the variations in the masonry. It will be seen, in our Engraving, as commencing near to the angle of the wall, and extending to the right. "The Bloody Gap" was the name given to a breach made by the Scots during the Border wars. The date and exact event are unknown; but, according to tradition, three hundred of the Scots fell within the breach vainly endeavouring to make good their entrance. Many arrows have been found in the adjacent walls, so placed as to lead to the supposition that they were shot from the opposite battlements and windows of the keep when the assailants were making the "Bloody Gap." A broad walk runs along the walls and within the battlements of this second court-yard.

We have reason to believe that no sketches taken *within* the walls of Alnwick Castle have hitherto been published. We shall, therefore, have the more pleasure in returning to this subject at some future day.

### WARRANT FOR THE GOLD MEDALS STRUCK AFTER THE PEACE IN 1713.

A copy of the original document, signed by Queen Anne, and countersigned by the Earl of Oxford, containing directions for the making and distribution of the Gold Medals after the Peace of Utrecht in 1713, may not be uninteresting at the present moment. It is thus worded:—

ANNE R.,

Wheresa by Our Order in Council bearing date the 24th day of June last, We did declare our Pleasure, that Medals should be stampt to perpetuate the Memory of the happy conclusion of the Peace, according to the Draft of such Medal that day presented to and approved by Us, and did thereby direct, that such numbers of Medals of Gold be made and prepared according to the said Draft, as should be directed under Our Royall Signet and Sign Manuall, to be distributed in such manner as We should think fit, OUR WILL AND PLEASURE now is, and We do hereby direct, authorise, and command that you forthwith give the necessary orders to the Master and Worker of Our Mint, to prepare, or cause to be made and prepared, with all the speed that may be, the number of Eight hundred and twelve Medals of Gold, according to the Draft approved by Us, as aforesaid, each Medal to contain in weight about fourteen pennyweight and fifteen grains of fine gold, and to be in value (with three shillings a piece for workmanship and wast) about three pounds ten shillings, which said Medals you are to cause the said Master and Worker to deliver in manner following, that is to say, into Our right trusty and welbeloved Samuel Lord Masham, Cofferer of Our household, to be distributed by him to the severall Lords and others mentioned in a List hereunto annext, two hundred and fifty of the said Medals, and to Our right trusty and welbeloved Counsellour, William Bromley, Esq., Speaker of Our House of Commons, the number of five hundred and sixty-two of the said medals for the several Members of the said House, and such of the Officers attending the same as are menconed in the said List, and Our further Pleasure is, that by virtue of Our Generall Letters of Privy Seal bearing date the 13th day of March, in the First year of our Reign, you issue and pay, or cause to be issued and paid, out of any Our Treasure being and remaining in the Receipt of Our Exchequer applicable to the uses of Our Civil Government, to the said Master and Worker of Our Mint, or to his Assigns, so much as the said Medals shall amount unto, not exceeding the number and value aforesaid, upon his producing to you the receipts of the said Samuel Lord Masham, and of the said Speaker of Our House of Commons, for the delivery of the said Medals, the said value to be paid to the said Master and Worker without account, imprest or other charge, and clear of all fees or disburements on receiving. And for so doing this shall be your Warrant. Given at Our Court at Windsor Castle, the 14th day of July, 1713, in the twelfth year of Our Reign.

By ter Majesty's Command, OXFORD.

To Our Right Trusty Rt. Welbeloved Cousin and Counsellour Robert Earl of Oxford and Earl Mortimer, Our High Treasurer.

A LIST OF GOLD MEDALS (made to perpetuate the memory of the happy conclusion of the peace) to be distributed by the Right Honorable the Lord Masham, Cofferer of her Majesty's Household, and the Right Honorable William Bromley, Esq., Speaker of the House of Commons; viz.:—

By the Lord Masham.

| | | | |
|---|---|---|---|
| To the Right Honorable the Peers in the House of Lords | ... | ... | 170 |
| To her Majesty for the Ladys at Court | ... | ... | 50 |
| To Foreign Ministers, Secretarys of Embassys, and others | ... | ... | 30 |
| In all | ... | ... | 250 |

By the Speaker of the House of Commons.

| | | | |
|---|---|---|---|
| To the Members of the House | ... | ... | 558 |
| To the Chaplain, Serjeant-at-Arms, Clerk, and Clerk Assistant | ... | ... | 4 } 562 |
| Totall | ... | ... | 812 |

The gold medals thus ordered to be made bore on the obverse the Queen's head, with the inscription ANNA D. G. MAG. BRIT. FR. ET. HIB. REG.; and on the reverse a figure of Britannia standing, holding an olive branch in her right hand, and a shield and spear in her left. Beneath, on one side of her, are represented ships ploughing the main, and on the other persons engaged in the business of agriculture. Above is the legend CONCORDIS VENERANTUR ARMIS; and, in the exergue, MDCCXIII. Medals of silver were also struck of the same type, and specimens of both may be seen in the coin-room of the British Museum, together with another silver medal, of large size, also struck on the occasion of the same peace, and of rare occurrence, of very similar design, but the legend on the obverse is altered to BELLO. ET. FACE.; and, in the exergue, ANNO MDCCXIII. PAX RESTITVTA. Both designs were executed by John Croker, chief engraver of the Mint (whose initials are beneath the Queen's bust), and the original draughts, from the exergue, MDCCXIII. Book of Designs in the Department of Manuscripts, British Museum, purchased by me at the sale of Stanesby Alchorne, Esq., in November, 1851.

British Museum, May 29. F. MADDEN.

### QUERIES.

THE ELMS, SMITHFIELD.—In your interesting articles on the old executioners, the Elms, which some historians have placed at Tyburn, are said to have been a spot in Smithfield. May I request the writer's authority for this statement?—STRYPE.

[There are abundant authorities, but the following extracts from Maitland will be sufficient to prove that a place called the Elms, in Smithfield, was from very early times a spot where criminals suffered:—"In the time of Henry V. a new building was made in the west part of Smithfield, betwixt the Horse-pool and the river of the Wells of Turnehill brook, in a place then called the Elms, for that there grew many elm-trees and had been the place of execution for offenders," vol. ii., p. 987, ed. 1775. "Between Hosier and Cow lanes, in Smithfield, anciently was a large pool of water called Smithfield-pond, or Horse-pool, from the watering of horses there, and to the south-west of which in Cow-lane, where St. John's-court is situate, stood the gallows or public place of execution denominated the 'Elms,'" &c., vol. ii., p. 991.]

CAN you inform me who is the author of the following pamphlet? "Temporis Filia Veritas. A merry devise called the Troublesome Reign and Lamentable Death of Edward the Second, with the Life and Fall of Gaveston and the Insolent Pride and Tyrannical Government of Mortimer and Isabella, his Wife, Daughter of France, and Queene of England, with the Coronation of Edward the Third, their Sonne, and the Deliverie of her Daughter Mawde from the Tyrannie of her Mother and Mortimer. Written by W. S. Gent. Printed for A. Boulter, at the Signe of the Bishop's Head in Paul's Churchyard, 1612." By Edward II. is meant Marlowe's play, and by W. S. Shakspeare is intended. Is this the first edition? Is it known when it was published? Is it mentioned by any writer? Is it reprinted in any collection of old plays?—W. J. THOMS.

WHO was the author of the Irish ballad "St. Patrick was a gentleman, and born of decent people?"—SHAMROCK.

["This song originally consisted of three verses, which were the joint production of the late Mr. Henry Bennett and Mr. Teleken, of Cork, and were sung by them in alternate lines at a masquerade in that city, where they appeared as ballad-singers in the winter of 1814 or 1815."—Vide Croker's "Popular Songs of Ireland," p. 22.]

WHERE did the Charnavoda (or Cara-Sou) branch of the river Danube formerly discharge its waters into the Black Sea?—D. F. C.

### ANSWERS TO QUERIES.

SINGULAR BEQUEST.—In the sketch of the life of John Roby, appended to "Roby's Legendary and Poetical Remains" (Longman), page 26, is the following note, written in 1827:—"Seven miles from Manchester, near Hollinwood, is a piece of land, called Roby's Piece, which was bequeathed by the said John Roby, who lived there in entire seclusion, looked up for seven years; after this apprenticeship he might, if he thought proper, have his liberty, and an annuity of £100 a year. No one has yet been found to fulfil this engagement, and the place was built up twenty or thirty years ago."—B. H.

"WE CAUGHT HIM NAPPING AS MORSE DID HIS MARE."—It was a common thing when I was at school in the north of England if we caught a boy asleep when he should have been awake, to say, "I've caught thee napping as *Morse* (not Morse) did his mare." The interpretation is—a man of the name of Morse had a mare who was very wild and difficult to catch, and one day seeing her lying in a slough, and, thinking she was asleep, he exultingly exclaimed, "Wall, I've caught thee napping at last" the poor mare, at the same time, being as dead as Julius Cæsar.—S.

WHIP-DOG DAY.—For the information of your correspondent Ægidius, I send the following extract from "Drake's Eboracum," p. 219.—"St. Luke's Day (October 18) is known in York by the name of Whip-Dog Day, from a strange custom that schoolboys use here of whipping all the dogs that are seen in the streets that day. This custom was kept up with great spirit until within a few years, not only by boys but by others of a larger growth, yet blessed with no more sense. It was, I believe, at last very wisely forbidden by one of the mayors, and has, consequently, gradually declined; a few mischievous urchins generally transgress, but the canine race in York have happily now little to fear on St. Luke's Day.

ELECTRIC TELEGRAPH.—In reply to the query of your correspondent in Aberdeen, in your paper of May 24th, I refer him to a letter in the pendent in Aberdeen, in your paper of May 24th, I refer him to a letter in the *Scots Magazine* for 1753: it is dated Renfrew, February 1, 1753, and begins thus:—"Sir,—It is well known to all who are conversant with electric experiments, that the electric power may be propagated to any distance. For one place to another, without being sensibly abated by the length of its progress. Let then a set of wires, equal in number to the letters in the alphabet, be extended horizontally between two given places," &c. The rest of the letter will be found in the *Scots Magazine*. Your correspondent will see that the date is fourteen years earlier than that of the publication from which he quotes.—DAVID C. A. AGNEW, Wigtown.

CALVS'-HEAD ROLL.—Be pleased to inform your correspondent who inquires as to the origin of the item "To calves'-head, &c.," in the old "battles" of the Middle Temple, that in ancient times the chief cook of every royal household always gave every Term a calves'-head breakfast to the whole fraternity, for which every gentleman paid at least one shilling. In the eleventh year of James I., however, this breakfast was turned into a dinner, and appointed to be on the first and second Monday in every Easter Term. The price per head was regularly fixed, and to be paid by the whole society, as well absent as present—a fact which will account for the appearance of the item in the Trinity bills. The sum thus collected, instead of being handed over to the cooks, was divided among all the domestics of the house (see "Herbert's Antiquities of the Inns of Court and Chancery," 8vo, London, 1804, p. 227.—B. BRUNDELL, F.S.A., Temple, 16th June, 1856.

### TO CORRESPONDENTS.

SENEX.—The so-called "Plato's Advice," commencing "Say, Plato, why should man be vain?" is an alteration of a poem by the Rev. Matthew Pilkington, beginning, "Why, Lycidas, should man be vain?" (see "Bland's Collection of English Songs," in the Rev. F. Peacock's Collection.

SCHOOLBOY.—*Odi puerulos præcoci ingenio.* It is you who are. The writer is speaking of a certain opposition to books now familiarly known as the *Eccrinis*, and is perfectly correct in using the singular number. He speaks of a list of tasks, not of the tasks themselves.

THE PARLIE.—For "Lilliburlero," see National English Airs, by W. Chappell, F.S.A., vol. ii. p. 90, for the words; and for the music, vol. i. p. 47.

F. S. Lynn.—The author and the year of composition are both unknown.

M. T., Carnarvon.—Much depends upon the condition, but a quarto of that late date, as the best, cannot be of any particular value.

W. J. M.—Your query has been answered a hundred times in various Journals and books of reference.

J. BARON STARR.—Want of space, not will, was the deterring influence. If the MS required can be found it shall be returned by post.

J. P., Nottingham.—A note addressed to R. B. Bigby, Esq., Davies-street, London, would probably bring you the information desired.

A. Z.—In Byron's "Don Juan" we read—

Oh, for one hour of blind old Dandolo!

Th' octogenarian chief, Byzantium's conquering foe

RECEIVED.—James Forrest, W. L. W., Inquirer, D. M. A. B., Cobine, John Miles, J. M. W., Rylands, A Wife of the Last Century, De Wykes, G. M., Sinclair, M. P., Anderson, A. Z., Leeds, a Well-wisher, Bath, J. H. Christ Church, Oxford, A. Z. Thos. in Brown, Kilmarnock,

"THE LAKE OF GENEVA."—PAINTED BY W. COLLINGWOOD SMITH.—FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.

"LOOKING OUT."—PAINTED BY F. W. TOPHAM—FROM THE EXHIBITION OF THE SOCIETY OF PAINTERS IN WATER COLOURS.

## ART-EXHIBITIONS IN LONDON.

AMONG the English sculptors who have risen of late to support the school established by Banks and Flaxman, Mr. Munro is by far the ablest. He draws his inspiration from classic sources, and imbues his conceptions with a poetry and domestic beauty of his own. He has also a fine eye and hand for transferring his conceptions from clay to marble. This year he is seen to great advantage. His marble alto-relievo (No. 1352) of the daughter and son of Mr. Gladstone, the ex-Chancellor of the Exchequer, and one of the Illustrations of our present Number, is most happily executed. Our young sculptor delights in infantine grace and beauty. Not less excellent, though in a different way, is another example of his art, "Repose Study of a Baby in Marble," and a very beautiful study he has made of infancy and innocence. The group is better than the poetry by which Mr. Munro has sought to illustrate it:—

But, O my babe, thy lids are laid
Close fast upon thy cheek!
And not a dream of power and sheen
Can make a passage up between.

Mr. John Thomas, another English sculptor, in whom we note a marked improvement from year to year, contributes to the Academy three specimens of his skill in sculpture; viz. "Rachel" (1250); "Cleopatra" (1261); and "Queen Boadicea inciting the Britons to avenge the loss of their liberty, and the wrongs inflicted upon her children and herself" (1233). "It was much better (said the Queen of the Iceni) to fall honourably in defence of liberty than be again exposed to the outrages of the Romans." There is the heroic dignity of woman in Mr. Thomas's "Boadicea."

Our next Illustration is taken from one of the screens in the gallery of the Old Society of Painters in Water Colours, and comes from the pencil of that favourite with the public, Mr. F. W. Topham. He calls it "Looking Out." The action of the dog is admirable, and the whole incident is told most unmistakably.

Our next Illustration is from the same Exhibition, and is the best of Mr. W. C. Smith's many excellent contributions to the gallery. The subject is a never-tiring one with poets and painters—"The Lake of Geneva." Mr. Collingwood Smith had Byron before him when he sought to represent this celebrated water:—

Clear, placid, Leman! thy contrasted lake
With the wide world I dwelt in is a thing
Which warns me with its stillness to forsake
Earth's troubled waters for a purer spring.
Once I loved
Torn ocean's roar; but thy soft murmuring
Sounds sweet, as if a sister's voice reproved,
That I with stern delight should once have been so moved.

A more beautiful drawing has very seldom been seen on the walls of the Water-Colour Society than this by Mr. Smith.

Our Illustrations from the New Society of Painters in Water-Colours are "Come Along," a kind of "Follow-my-leader" picture, one of Mr. Jenkins the secretary's clever contributions. The expression on the face of the child is inimitable. Admirable, too, is the picture in point of colour. "Titian and his God daughter—a Sonnet from Peter Aretin," is by Mr. W. H. Kearney, who has here brought all his wealth of colour to do full justice to the great Venetian painter.

## "GRAZIELLA." PAINTED BY RUDOLPH LEHMANN.

THIS is one of Lamartine's prettiest word-pictures, exquisitely transferred to canvas by Rudolph Lehmann, of Rome. Lamartine relates in his autobiographical "Confidences" that having, during a youthful trip, been wrecked in a fishing-boat in the Greek isle of Procida, he and his companions were fed, clothed, and sheltered by a fisherman's family. One evening he read to them the story of "Paul and Virginia." We translate the passage in which this scene is described, that the poetic fidelity with which Rudolph Lehmann has illustrated it may be thoroughly appreciated :—

In a short time the attitude of each listener was changed. The fisherman, with his elbow resting on his knee, and his ear strained towards me, forgot to mend his nets. The old grandmother, who was seated opposite me, rested her chin upon her clasped hands, in the devout attitude of the poor women who sit humbly on the church pavement listening to the word of God. Beppo laid his guitar noiselessly on the ground, and placed his hand across the strings lest the wind should stir them to sound. Graziella, who remained usually at a little distance, insensibly approached me as if she were fascinated by some hidden power of attraction. Reclining on the wall of the terrace where I had placed myself, she drew nearer and nearer to my side. She gazed with her large earnest eyes, now on the book, now at my lips, whence flowed the recital. Before I had reached the middle of the story, the girl had forgotten her usual shyness towards me. I felt her warm breath upon my hands. Her hair lightly touched my forehead. Two or three burning tears fell from her cheeks, and blotted the page quite close to my fingers. Except the slow and monotonous tones of my voice, as I translated to the fisher family this poem of the heart, no sound could be heard, save the dull and distant murmur of the waves, as they beat against the coast beneath our feet.

M. Lamartine himself was so moved when he saw the picture in the Paris Exhibition that he wrote a very flattering letter to the artist. From it, in a letter to the artist, he wrote that :—

Graziella was but a dream—thanks to you, she becomes a reality. When I say a dream, I speak metaphorically, for nothing in that page of my life is imaginary except the name. The impression which I experienced on finding myself on the scene with a souvenir thus revived would have proved, I doubt not, a reminiscing impression for yourself also. You would have seen the power of your talent in my attitude and in my eyes. I return this morning to the Exhibition solely to see you again.

A mature connoisseur, difficult to please, said yesterday that you were in those halls the Petrarch of the pencil. You will see your name become great —poetry and love, if they do not always bring fortune, bring at least happiness and glory to men who make their début like you.

I am poor, but I should regret to see this picture pass into other hands than my own.

* * * * *

The "other hands" into which this picture has passed are those of a munificent London citizen, who can only enjoy the splendid collection of art-treasures he possesses through the medium of others, for it is his misfortune to be blind.

As Rudolph Lehmann first introduced to the English public by his "Graziella" (No. 360), and his "Roman Balcony Scene" (No. 11), now in the Exhibition of the Royal Academy—has already excited great attention, even beyond Art circles, it may be of interest to mention that he was born in Hamburg in 1819: and studied, first, under his father (himself an accomplished painter), and afterwards in Paris, Munich, and Rome, in which last metropolis of art he has fixed his residence. His greatest work, representing "The Pope in the act of blessing the Multitude assembled to witness the Completion of the great Work of Draining the Pontine Marshes," is in the Museum of Lille. He is best known, however, by the studies of Roman peasant life transferred to stone in two colours by M. Julien.

"Graziella," a charming episode from Lamartine's "Confidences," is published separately, and amply repays perusal.

## CRYSTAL PALACE PICTURE-GALLERY.

OUR visit to the Crystal Palace Picture-Gallery this week has not yet been productive of the result we anticipated; and we think, with all due respect to the managing director of this establishment (whose efforts in other departments we feel bound to eulogise), that an error has been committed in giving the public access to an entire gallery, in which a great portion of the pictures have either not arrived, or at least received numbers and labels, and of which the catalogue will not be ready for a fortnight, as we were informed. With many of the pictures it was with us tantalizing guess-work as to subject, painter, or country; and, with every latitude in the matter, we think that some judgment ought to have been used in excluding pictures that are monstrously bad. There are many charming pictures in the collection; but, even if first-class ones are not to be obtained, we think that the directors have done wrong in admitting works that are positive nonsense.

The English pictures are generally bad, as it would appear that our best artists have not made up their minds to encourage any rivals to the existing establishments in Pall-mall. The few exceptions make the rule. The best of the English school Landseer's charming "Forester's Family," finds its way to a loan from the studio of the King of the Belgians. The "forester's family" are the frisky young deer obeying the well-known signal of the keeper; and it is superfluous to tell the reader how this herd of brown heath and shaggy wood can treat such a subject. No colourist of the present day has the power of carrying line, that we are aware of, may be put before Landseer in sinky delicacy of detail, and yet, at the same time, in a general impression of force. A great literary writer has compared tech ical power of a high order to the trunk of an elephant, which could pick up a pin or crush a man encased in steel. The style of Landseer in his best efforts conveys this double impression of feminine fineness in detail which sums itself up in a totality, not of weakness or inequality, but of masterly force.

This very high but not exaggerated praise we can give to no other picture in the English collection here. Leslie has a clever picture from "Don Quixote;" and Sidney Percy a couple of Welsh landscapes, which show that he has looked at Nature for himself. These latter have truth, but not of the most pleasant kind: he understands the treatment of sunlight, but we would recommend less black in his shadows, and more breadth in his tone.

This English collection abounds in pictures which we cannot call bad, but unequal and imperfect—parts done with care or felicity, and other parts botched and over-muddled, or so generalised as to be out of keeping with the rest. Many of these are by young, and perhaps by promising, artists, and it goes against our grain to lead out to execution poor fellows who have perhaps done their best. Among the landscapes that pleased us is a cottage in Cumberland by Dearman; the house itself, and the mountains in the distance, very nicely done; but the tree on the left must go: let Mr. Dearman look into Hobbema for a few lessons as to how trunks and masses of foliage can be looked at by the eye of an artist. We also note favourably "A Scene in Betchworth-park," by N. Lupton; but too much pea-green rather offends. Why not have brought in something of a red tone, as a harmonising contrast? or, what is better, studied the outline, some device of chiar'oscuro? We may not capriciously invent or transpose in landscape said to represent a particular spot; but a perfectly free interpretation of nature is fully within the allowable means of art.

In the Flemish and German schools we have many fine pictures. The "Judgment of Solomon," by Baron Wappers, shows the masterly drawing of this distinguished artist, who, having resigned the direction of the Academy of Antwerp, which he held with such distinction during so many years, is now pursuing a prosperous career in Paris, where his works are deservedly held in very high esteem. We confess that we do not like this "Judgment of Solomon," or rather the offence which gave motive for Solomon's judgment. The real mother of the child ought not to beg for it, imploring piteously; she should spring forward and seize it, as a lioness would defend her cub from the hunter. Our conception, therefore, of the dramatic treatment of this subject differs radically from that of the Baron, who, we are bound to say, is a man of large general powers and attainments; and therefore it is not without diffidence that we express this opinion. In other respects there is much to admire. The draperies are finely treated; and the Hebrew character of the women carefully preserved, without falling into the exaggerated noses of a Quintin Matsys, or into the other extreme of those artists who make the women of the Old Testament young ladies with the contours of France and England.

A "Souvenir of Flanders," by Pieron, we take to be a view in the Campine, somewhat in the manner of Vandermeer. It is a very pretty piece of unambitious local nature—the heath and mosses treated with great delicacy. Of interiors the most striking is "The Courtyard of an Hostelry in the Seventeenth Century, with Troopers Gaming," by Leys. It looks just like one of those curious Renaissance hostels that one sees in Prague and Nuremburg. When we say that it would not be unworthy of Roberts, we name an artist with whom every painter of architectural interiors may feel proud to be mentioned.

Among the *genre* pictures we particularly note "The Critical Moment," by Vautier—a subject treated with great humour. The wooer, in Continental fashion, pops the question, not to the young lady, but to the father. The lover's embarrassment, the burly self-sufficiency of the father, and the suppressed anxiety of the daughter, are full of felicitous dramatic power. "A Wedding Scene in the Island of St. Mark, of the Zuyder Zee," is exceedingly curious, as showing the old Dutch costume: the wide hose, the crimson stockings, the broad-brimmed hat, and the form of the shoe;—wanting only a Vandyke frill to carry us back to the seventeenth century. The inhabitants of the islands of the Zuyder Zee and the Saxons of Transylvania appear to be the only populations that still preserve the dress of that period. Another excellent picture is a "Refractory Schoolboy," by De Block, who deals with his colour as a sort of more sober De Hooge.

A "Combat of Bulls," by Verboeckhoven, shows wonderful knack in animal-painting; the coats of the bulls are done to admiration, but Mr. Verboeckhoven has often done better than this, which has too much the air of very pretty Sèvres china-painting. The "Royal Chase" of Monpezat shows a very great improvement in this artist since his visit to England some years ago: his horses were always good, but certain ambitious efforts at effects of broken light were coarse and unsuccessful. In this respect we perceive a very great improvement. The terrace and avenue, which, for want of a catalogue or a label, we presume to be at Compiègne or Fontainebleau, form a very pretty and consistent landscape, with the light delicately managed, and the cavaliers uncommonly tiny and pretty. The French horse and cattle painters would be insufficiently represented without Rosa Bonheur, whose "Charcoal-burners," if we mist-ke not, we saw last year in Pall-mall, along with Mons. Biard's "Gulliver." Both pictures are well known. Of the first it is superfluous to speak; and the second, with all its cleverness, is not to us sympathetic. There is less coarseness in this than in many other works of Mons. Biard, who is certainly the most prolific caricaturist of the day, and an endless fertility of invention cannot be denied him. Even in this "Gulliver" the inversion of the ordinary relation between human stature and reptiled dimensions, with the great Brobdingnagian hand in agreement with the reptiles and vegetation, and in disagreement with the dimensions of Gulliver, is in happy accord with Swiftian invention: with all this the element of sympathy is wanting, and we infinitely prefer those *flaneurs* of the Boulevards and *Bals Badands* of the Champs Elysées, in which the traits, and even overdoes, with such a prodigal expenditure of fancy and farce.

Of what we may almost call caricature in landscape there is a very good specimen in what we presume to be a street in New York; the execution is coarse, but full of effect, somewhat in the theatrical scene-painting manner, and the bustle of sledging and traffic on snowy streets in midwinter, is well given. The omnibus-sledge is to an Englishman a novel and characteristic. The picture is a coarse one, but spirited, and redolent of a go-a head people.

We were charmed with two pictures portraying Norwegian scenery, which are among the most attractive and faultless pictures of the Exhibition, the one called the "Mountain Rose," by Be her, representing a mountain reddened by the setting sun, and a lake in a hollow, above which an eagle is seen to swoop. The subject is highly poetical: a large view of an eagle, dealt with by a man who is evidently familiar with the pitiful airs and most striking aspects of hill regions. The other landscape is a mountain-scene at Orrendale, in Norway, by Mons. Gude, a still more charming picture, representing a mid day sun on a snow-capped mountain, and the clear colours seen by a grand effect of thunder-clouds. The delicate blue of the unsunned snow and all the other parts of the picture are done with great naturalness. None of our Scotch Thompsons and Macculloch have, in our opinion, dealt with mountain landscape so poetically, nor has Stanfield always the power to give the effect of so hard an object as a snowy mountain. We have not the pleasure of knowing other productions of M. Gude, but we confidently recommend this landscape to the admiration of the visitors to the Crystal Palace.

## ADMINISTRATIVE REFORM.

ON Saturday last Mr. Roebuck, M.P., the newly-appointed chairman of the Administrative Reform Association, made his first public appearance in that capacity, by presiding over a public meeting of the members of the association, held at the London Tavern. Amongst the gentlemen on the platform were Mr. Hume, M.P.; Mr. Bright, M.P.; Mr. Murrough, M.P.; Messrs. J. P. Ball, Hamilton Geale, J. I. Travers, Wm. Lister, J. H. Elliott, J. Underwood, J. J. Mechi, S. Morley, E. Burke, J. P. Gassiot, J. Allan, T. Sutton, —King, Esq., Capt. Wilson, East India Navy, Dr. Cha lone; and at a later period of the day Meer Jaffir Ali Khan, who was attired in full Oriental costume, was introduced by Mr. Murrough.

The Hon Chairman, having assumed the presidential chair, commenced his address by pointing out what he conceived to be the cause of the gross mismanagement of our national affairs as exhibited in the indecision which led to the war with Russia, and to the way in which that war was carried on :—

It is the fault of the governors whom you appointed; and last of all, it is your fault for having appointed those governors. It has long been my belief that the people of England, in this way, are very like the people of America. We are told that the intelligent, instructed, well-to-do people of that country look upon public affairs as the gods of Epicurus are said to have done on the affairs of this mundane world: they were happy, pursued their own occupations, obtained wealth, and followed pleasure—they were very comfortable, and left the State to take care of itself. So you have done (Hear, hear). You have allowed two parties in this country to range themselves the one opposite the other, to obtain political power, and to pursue their own interest. You looked on, and what was the consequence? Why, gallant men who went out in your name, to fight your battles, to protect your interests, were made to suffer what I may call, when I think of you, an ignominious death (Hear)

They fell not by the sword of the enemy, but by causes brought about by the imbecility of their rulers (Hear). They died from want, from cold, and from every mischief which imbecility and inefficiency could create. Day by day was the soul of England harrowed by the accounts of these transactions, and it was not till the voice of the press called upon the people of this country to insist upon their rulers doing their duty that anything was done (Loud cheers). And let me tell you that you owe a great debt to the press (Cheers). Upon that occasion what was done on the affairs of this mundane world: they were happy, pursued their own occupations, obtained wealth, and followed pleasure—they were very comfortable, and left the State to take care of itself. So you have done (Hear, hear). You have allowed two parties in this country to range themselves the one opposite the other, to obtain political power, and to pursue their own interest. You looked on, and what was the consequence? Why, gallant men who went out in your name, to fight your battles, to protect your interests, were made to suffer what I may call, when I think of you, an ignominious death (Hear)

They fell not by the sword of the enemy, but by causes brought about by the imbecility of their rulers (Hear). They died from want, from cold, and from every mischief which imbecility and inefficiency could create. Day by day was the soul of England harrowed by the accounts of these transactions, and it was not till the voice of the press called upon the people of this country to insist upon their rulers doing their duty that anything was done (Loud cheers). And let me tell you that you owe a great debt to the press (Cheers). Upon that occasion what was done? A trial was tried for the first time a great experiment. Publicity was introduced into the management of the army, and we were told that its destruction would be the inevitable consequence. What was the consequence? To show that destruction was the result of the inefficiency of our rulers, and that inefficiency was discovered by the agents of the press, who were sent there to inform the public of what was going on (Cheers). What is it that rests upon this present you? Indifference. What do? Ought you to be apathetic, and follow your own pleasures and interests? Believe me to follow your own interests in that way is to take a very narrow view of your own interests. I believe that some of this country is to take an active part in the management of their own national concerns (Cheers). I do not mean that, like the old people of Athens, you are to meet together for the purpose of actually directing the State; but you are always to have your minds active, and be ready to bring to bear upon your representatives a direct responsibility (Cheers). This can only be done by showing yourselves at all times fully alive to what is happening, and ready to visit with punishment any dereliction of duty on the part of those who represent you (Cheers). It is idle to talk of Administrative Reform unless you are ready to have Parliamentary Reform (Loud cheers). An evil is there.

The House of Commons is said to represent the people. But in that House you have by your apathy allowed the whole government of the country to be in the hands of some half-a-dozen families (Cheers). I see them night by night, one-half ranged on one side of a green table and the other half upon the other. I find among them party fights and individual hates, but I do not find the interests of England predominant. I see the Whig party, and I am not speaking of gentlemen who have now possession of the government of this country as demons in human shape; they are men, and they will act as men always do in their position; but while all this happens who are to blame? I say you, for on this occasion you are to me the representatives of the people of England. I have shown you the mischiefs which have followed a system of irresponsible government in regard to Russia, but there is another event which hangs over our heads, brought about, I am bold to say, by Ministerial incapacity, which is ten times more threatening than anything which you have yet gone through, and we are now on the eve of war with America, whose people are our chief customers, blood of our blood, bone of our bone—who are Englishmen transplanted to the other side of the Atlantic, connected in every way with us, and who are to us dependent upon us. We are upon the brink of outraging humanity by going to war with these our American brethren (Hear, hear). The cause of this is want of knowledge, or a want of something else worse than a want of knowledge, on the part of your rulers. They have gone on step by step, and you have quietly looked on, while there was not a rational man among you who did not foresee the great issues of fact was likely to arise. Why do I bring forward these illustrations? In order to impress upon the minds of my countrymen that they are chiefly concerned in all that concerns the interests of England national y, and that in the pursuit of wealth, which is the besetting sin of the present day, they forget everything else (Cheers). The people of this country are in this like the people of America—they worship the almighty dollar; and so long as you do that, so long you will be made, like beasts of burden, to bear the yoke—and you deserve to bear it. You are unwor hy of the name of freemen if you do not set up to the obligations of freemen. What then do I deduce from the homily which I have read to you? That you should take part in the business of the government. You will ask, "How can we do that?" I think I can show you. I have said that the House of Commons is the governing power of the country. The great aspiration of my heart has been, from the first time that I took part in politics, to see the House of Commons the representative of the people (Cheers). But the great question I have seen the people of England hot and cold—at one time ardent reformers, and at others shivering at the very breath of name of reform ("Shame"). It may be a shame, but if it be so, you are answerable for it, not me. Well, then, what are you to do? You are to try to affect the House of Commons. You cannot organically reform the House of Commons in the present temper of the public mind; but if you were now to propose to the people of England a measure of organic Parliamentary reform, they would turn a deaf ear to you (Cries of "No."). Stop, I believe you can obtain the same end by different means. The public at this time are so fully alive to the evils of the system of administration, that by means of the agitation for administrative reform, you can effect the reform of the House of Commons. But I really believe that if, at the present moment, an angel from heaven were to come down with a perfect Parliamentary bill in his hand, the people of England would turn aside from him (Cries of "No, no!") I certainly am not that angel; but I know that I am not unable to obtain anything like a hearing upon such a subject in the House of Commons (A Voice—"Try'em"). Try'em! I have tried them; and what occurs in the House of Commons—that House of Commons which is understood to be the representative of the people—when any measure of Parliamentary reform is proposed? They say, "So-and-so has got a crotchet. Well, poor man, let him try it." The thing passes off. They put him in a minority, and there is an end of the matter. But if you pursue the course which I have pointed out you can bring these gentlemen to their senses Though they are not alive to Parliamentary reform, they are keenly alive to their own seats, and if you can affect them through that part you affect them vitally (A laugh), and you will create all that enthusiasm which, you now see has so utterly departed from them. Now how can this be done? I have seen in the House of Commons this phenomenon. I have seen the Government of the country maintaining itself in power by a very small majority, and at that time I have found that there was always a set of gentlemen who stood apart upon every great party division, who made very much of themselves; and not made up their minds, and did not know how they were going to vote. They wanted to be courted. I was in my mind's eye several of these individuals. I recollect when the Ministry of Lord Melbourne had only a majority of four, a puzzling gentleman said, "Coming events cast their shadows before (by four)" ("Hear," and a laugh). I recollect one of these waiters upon Providence was suddenly seized with a very large amount of virtue, and how was that overcome? How was the yielding goodness of the man made to follow his own private interests? By giving him an invitation to the Queen's private ball (A laugh). Now what is often done for bad purposes can be sometimes used for good. In every constituency there are two great parties, but in many there is a third, not like the Whig party upon Providence alluded to, but a body of really intelligent, well-intentioned, thoroughly honest men, who, if they have not the power of turning a member to Parliament, have sometimes the power of turning one out. Now if these men would combine—if they could say, "We will not pledge ourselves to either side. Mr So-and-So, who has called himself a Liberal, is a sham—he has not done his duty, and we do not intend to return him," the Mr. So-and-So would discover the consequences; he would be turned out, and his successor would understand that he might be in exactly the same predicament at the next election, if he acted in the same manner. That you would create representative responsibility. If you had an organisation of such men in every town in the country, you would be able through them to influence the House of Commons. It is to this that I have directed the attention of the Administrative Reform Association. I have come among them at their own solicitation; and I must say, upon their behalf, that they have acted, I do not think in the most judicious manner, but still in a way to do great good to the country (Hear, hear). The gentleman on my right (Mr. Morley) is a person whom I think it a great honour to succeed, and he is one upon whose valuable co-operation I mainly at the present time depend (Cheers). He and I together, and other well-known men who are associated with him, will devote ourselves to this great task (Hear). We intend—we hope to be able—to reform the Administration of this country through the influence of the House of Commons, and in that house we intend to attempt to obtain influence—not the influence of corruption, for we are not able to corrupt—we are not rich enough for that, but the influence of mind (Hear): the influence of an organisation starting from a centre here in London, and radiating in every part of Great Britain and Ireland, and by which we hope to act upon the consciences of the kingdom, who are eventually the governors of this country (Cheers). In this hope we have assembled together; we have met for this purpose, and we have called you together to see whether we have your co-operation, sympathy, and support in this great undertaking in which we are now engaged (Hear, hear). On you I will eventually depend (Hear, hear). We hope to rid the country of Government imbecility—and in the end to establish such a Government as a great and enlightened people ought to have—a Government that will pursue not its own interests but yours—holding you up as the envy of surrounding nations, as you have often been told you were—a people sufficiently enlightened, and sufficiently instructed to take into your own hands your own great national concerns, and so to conduct them as to contribute to the greatest happiness of the greatest number of the people (Long-continued cheers.)

Mr. Samuel Morley then came forward to propose the following resolution :—

The exigencies of the present time, and the singular incapacity lately shown by the various departments of the Government, render it the imperative duty of the people to take an active part in the management of the national affairs, in the hope of introducing therein the energy, honesty, and intelligence that ought to distinguish the administration of a great and civilised people.

After enumerating the circumstances which he retired from the chairmanship of the Administrative Reform Association, he defended the course heretofore pursued by the association, which had certainly done much in preparing the way for the present necessity of carrying out reform in several of the Government departments. He expressed his belief that by the new system proposed to be carried out by the Administrative Reform Association great economy would be effected, for sham reformers would be rejected and real reformers returned to represent the people of England. In reference to the ineffective manner in which London was represented, he said he would call the attention of the electors of London to the fact at the proper time, with a view of seeing if they could not effect an alteration in this respect. A voice here exclaimed, "We want you" (Hear, hear).

Mr. Gassiot having seconded the resolution, it was supported by

Mr. Travers, who said he had been appointed treasurer, and that twelve members of the committee of the association had already subscribed one hundred guineas each towards the funds, so that they started fair. They must, however, expend a much larger sum than that in order to do the work required.

The resolution was carried unanimously.

Mr. Jacob Bell then moved a vote of thanks to the chairman, for the ability with which he had presided over the meeting.

Mr. Mechi seconded the motion, which was carried (Hear, hear). He would not occupy the time of the meeting by any lengthened remarks, but he thought that no merchant would like his private affairs conducted in the way the affairs of this country were administered, and that the work of the Administrative Reform Association was a most useful one (Hear hear)

Mr T. Wall (secretary to the Working Men's Hume Testimonial) signified his concurrence in the vote; expressing his high opinion of Mr. Roebuck's services in favour of the people.

Mr. Gassiot put the resolution, which was carried amid loud and long-continued cheers.

Mr. Roebuck said he hailed this as the first day of the second year of the Administrative Reform Association. He thought they set out with favouring gales—with the approbation of the meeting, and believed they would carry the good ship safely into port (Loud cheers). But the people must not be inactive—they must be active because they thought the association was awake (Cheers). Let them keep their eyes upon the House of Commons; and, depend upon it, the moment the people exerted themselves, their representatives would be worthy of them ("Hear, hear," and loud cheers).

THE FRENCH COTTON MANUFACTURERS.—The *Journal des Débats*, from complaints of justice and the grievances of their letter, addressed from certain cotton manufacturers, who complain that, if the new French tariff be allowed to pass, there is an end of their trade, and England will become sole masters of the cotton markets. The prizes at universal exhibitions, of which was nothing heard but the prodigious superiority of French manufactures. Attention was challenged to the marvellous progress that had been made, and, in fact, the "conqueress of the world had been conquered." Now that they are taken at their word, and an attempt is made to give the public some benefit from these great improvements, the most doleful lamentations are made, and figures offered to show that upwards of 30 per cent protective duty is required to keep out the invader.

ON Wednesday week a fête was held at Sudbrook Park, near Richmond, formerly the mansion of the Duke of Argyll, but now the hydropathic establishment of Dr. Ellis and his lady, who entertained about a hundred of their friends, including many who had been patients at the establishment. Mr. Wheeler, of London, delivered a lecture on Entomology in the Library: and the evening was enlivened by out-door amusements and the performance of the band of the Royal Surrey Militia.
